"Amputation is not unfrequently advisable in order to prevent the occurrence of gangrene."—*Miller: Surgery* (1864), p. 149.

1. *Surgery*: The act of cutting off a limb, or a portion of a limb.

2. *Gardening*: The pruning or dressing of vines, &c. (*Dyche*, 1758.)

***ām-pū-te**, *v. t.* [Lat. *amputo*.] [AMPUTATE.] To cut off. (*Cockeram*.)

ām-pūx, *s.* [Gr. *ampyx*=a band or fillet.]

1. A band or fillet used by the ancient Greek and Roman women for binding their front hair; a head-band.

2. A similar head-band for elephants and horses. Homer describes the steeds of the god of war as thus adorned.

ām-rī-ta, *s. & a.* [Sansk. *amrut*=the water of immortality, nectar; *amar*=immortal; *a*, like the Gr. *ā*, priv., and *mruta*=dying; cognate with Lat. *morior*=to die; *mors*=death.]

1. *Hindoo Myth.*: A fabled celestial tree, bearing ambrosial fruit.

"The divine *Amrita* tree
That blesses heaven's inhabitants
With fruits of immortality."

Moore: *Light of the Harem*.

2. The largest and finest kind of Rose-Apple, or *Jamb* (*Jambosa vulgaris*), a fruit-bearing tree of the Myrtle order.

āms-dor'-fi-aŋs, *s.* [From Nicholas Amsdorf, their leader.]

Church Hist.: A German Protestant sect in the sixteenth century who, with their chief, are said to have maintained that good works are not only unprofitable, but are obstacles to salvation. Amsdorf made this assertion in the heat of controversy, and does not seem to have meant much more by it than to enforce the teaching of the Apostle Paul, "that a man is justified by faith without the deeds of the law" (Rom. iii. 28).

ām-sō'-nī-a, *s.* A genus of plants belonging to the order Apocynaceae, or Dogbanes. The species are pretty, and are easily propagated. They are indigenous in North America.

***āmt**, *s.* [ANT.]

a-mūck', **a-mōck'**, *s.* [It has no connection with the English word *muck*; but is from the Malay *amuk*=engaging furiously in battle, attacking with desperate resolution, rushing in a state of frenzy to the commission of indiscriminate murder. (See the def.) Applied to an animal or a man in a state of violent rage. (*Marsden: Malayan Dict.*, 1812.)] In such a state as that described above. Used only in

the expression *To run a muck* or *amuck*, which means to rush, under the influence of opium or "bhang" (an intoxicating drug made from hemp), out of one's house into the street, armed with a sword, a dagger, or other lethal weapon, and kill every one—man, woman, or child—who cannot with sufficient promptitude escape. This maniacal and inhuman method of venting rage is mostly confined to the Malays; or if practiced by other races, it scarcely ever passes beyond the limits of the Mohammedan world.

¶ *To run amuck*: To fall foul of. (*Lit. & fig.*)

ām'-ū-lēt, *s.* [In Dan., Dut., & Ger. *amulet*; Fr. *amulette*; Sp., Port., & Ital. *amuleto*; Lat. *amuletum*. From Arab. *hamalet*=an amulet; *hamala*=to carry.]

1. *Lit.*: Anything hung around the neck, placed like a bracelet on the wrist, or otherwise attached to the person, as an imagined preservative against sickness, "witchcraft," or other evils. Amulets were common in the ancient world, and they are so yet in nations where ignorance prevails. Thus an observant visitor to a school in India may see many a pupil with a piece of ordinary string tied bracelet-fashion round one or both of his wrists. This is an amulet, or talisman, which having been blessed by a Brahman, has then been sold for half a rupee (about twenty-four cents), or even for a rupee itself, as a sure preservative against fever. [See TALISMAN, CHARM.]

"... the little images of the tutelary deities, even the earrings, probably considered as amulets or talismans, were taken away and buried."—*Milman: Hist. of Jews*, 3d ed., vol. i., p. 36.

"How could she thus that gem forget?
Her mother's sainted amulet."

Byron: *Bride of Abydos*, ii. 5.

2. *Fig.*: A preservative against sin.

"... thou hadst an amulet
In the loved image, graven on thy heart,
Which would have saved thee from the tempter's art."

Moore: *Lalla Rookh; Veiled Prophet*.

ām-ū-lēt'-ic, *a.* [Eng. *amulet*; -ic.] Pertaining to an amulet.

ā-mūr'-ca, *s.* [In Ital. *amurca* and *morchia*; Lat. *amurca*; Gr. *amorge*, *amorgēs*=the watery part which flows out when olives are pressed; oil-tees: *amergō*=to pluck or pull. (Never used of liquids.)] Oil-tees; a lye made of oil.

"Though grain, that toucheth oil or fat, receiveth hurt, yet the steeping of it in the dregs of oil, when it beginneth to putrefy, which they call *amurca*, is thought to assure it against worms."—*Bacon: Nat. Hist.*, Cent. vii., § 670.

***ā-mūr-cōs'-i-tŷ**, *s.* [From Lat. *amurca* (q. v.).] The quality or qualities inherent in the lees of any substance.

a-mūr'-coŭs, *a.* [Eng. *amurca*; -ous.]

1. Pertaining to the lees of oil. (*Ash*.)

2. Foul with the dregs of anything.

a-mū'-s-a-ble, *a.* [Eng. *amuse*; -able. In Fr. *amusable*.] Capable of being amused.

a-mū'-s-e, *v. i. & t.* [Eng. *muse*, *v. i.*; Fr. *amuser*=to divert; from *muser*=to loiter, to trifle; Ital. *musare*=to lounge; Ger. *müssig*=idle.]

†*A. Intransitive*:

To muse, to think, to reflect; to be absent in mind, owing to the concentration of the attention on the thoughts with which one is occupied at the time.

"Or in some pathless wilderness *amusing*,
Plucking the mossy bark of some old tree."

Lee: *Jun. Brut*.

B. Transitive:

*1. To cause to muse; to occupy or engage the attention, and consequently to divert it from other objects.

"Being *amused* with grief, fear, and fright, he could not find a house."—*Fuller: Ch. Hist. of Britain*, bk. ix., § 14.

"Such a religion as should afford both sad and solemn objects to *amuse* and affect the pensive part of the soul."—*South: Sermons*.

*2. To keep a person from departing, or from acting, by telling him some frivolous story which causes him to lose his time and his opportunity; to delude by vain promises, or expectations, or pretenses; to cheat, to deceive.

"Bishop Henry, on the other side, *amused* her with dubious answers, and kept her in suspense for some days."—*Swift: Character of K. Stephen*.

Amulets.

"And then for the Pharisees, whom our Saviour represents as the very vilest of men, and the greatest of cheats; we have them *amusing* the world with pretenses of a more refined devotion, while their heart was at that time in their neighbor's coffers."—*South: Sermons*, ii. 153.

¶ In this, as in other senses, it is sometimes used reciprocally, when it means to deceive or delude one's self with some vain imagination.

"They think they see visions, and are arrived to some extraordinary revelations: when, indeed, they do but dream dreams, and *amuse* themselves with the fantastic ideas of a busy imagination."—*More: Decay of Piety*.

3. To entertain or divert the mind; to inspire it with agreeable emotions; in general, though not always, attended with mirth.

"*Amus'd* at ease, the godlike man they found,
Pleas'd with the solemn harp's harmonious sound."

Pope: *Homer's Iliad*, bk. ix., 245, 246.

"With these went all who live by *amusing* the leisure of others, from the painter and the comic poet, down to the rope-dancer and the merry andrew."—*Macaulay: Hist. Eng.*, ch. i.

a-mū'-sed, *pa. par.* [AMUSE.]

"Amused spectators of this bustling stage."

Cowper: *Task*, bk. v.

ā-mū'-s-ēe, *s.* [Eng. *amuse*; -ee.] The person amused, as contradistinguished from the amuser.

"... given the amuser, the *amusee* must also be given."—*Carlyle: Heroes*, Lect. III.

a-mū'-se-mēt, *s.* [Eng. *amuse*; -ment. In Fr. *amusement*.]

*1. *Subjectively*: An occupation of the attention; the state of being in a reverie.

"Here I put my pen into the ink-horn, and fell into a strong and deep *amusement*, revolving in my mind with great perplexity the amazing changes of our affairs."—*Fleetwood: Pref. to Lay Baptism*.

2. *Objectively*: Whatever is fitted to engage the attention; to divert it from other objects of contemplation; to inspire it with pleasing and even mirthful emotions, or to delude it with vain expectations.

"In a just way it is lawful to deceive the august enemy, but not to lie; that is, by stratagems and semblances of motions, by *amusements* and intrigues of actions, by ambushes and wit, by simulation and dissimulation."—*Jeremy Taylor: Doctor Dubitantium*, bk. iii., c. 2.

"... his favorite *amusements* were architecture and gardening."—*Macaulay: Hist. Eng.*, ch. xi.

amusement-monger, *s.* One who deals in amusement as in an article of merchandise. One who caters for the amusement of the public.

"Next, busy actor on a meaner stage,
Amusement-monger of a trifling age,
Illustrious histrionic patentee."

Cowper: *Valediction*.

a-mū'-ēr, *s.* [Eng. *amuse*; -er. In Fr. *amuseur*.] One who amuses. (*Cotgrave*.)

ām-ū-sētt'e, *s.* [Fr.=child's play.] A small one-pounder cannon, designed, on account of its lightness, to be used in mountain warfare.

a-mū'-iŋg, *pr. par. & a.* [AMUSE.]

"I have the greatest proof in nature at present of the *amusing* power of poetry, for it takes me up so entirely, that I scarce see what passes under my nose, and hear nothing that is said about me."—*Pope: Letter to Jervas* (1714).

"... and with a strange,
Amusing, yet uneasy novelty ..."

Wordsworth: *Excursion*, bk. i.

a-mū'-iŋg-lŷ, *adv.* [Eng. *amusing*; -ly.] In an amusing manner. (*Todd's Johnson*.)

ā-mū'-i-ve, *a.* [Eng. *amuse*; -ive.] Which amuses the mind.

"Whose lofty elms and venerable oaks
Invite the rook, who, high amid the boughs,
In early spring his airy city builds,
And ceaseless caws *amusive*."

Thomson: *Seasons; Spring*.

ā-mū'-i-ve-lŷ, *adv.* [Eng. *amusive*; -ly.] In a manner to give amusement.

"A south-easterly wind succeeded, blowing fresh, and murmuring *amusively* among the pines."—*Chandler: Trav. into Greece*, p. 12.

***ā'-mŷ**, ***ā'-meŷe**, *s.* [Fr. *ami*=a friend.] A friend, a lover, a sweetheart.

"Scheo saide heo was *ameye*
To Ammon, the god of pleye."

Alisaunder, i. 50.

"For he saide, in that nyght Ammon
Scholde come to theo lady
And beon hire leof *amy*."

Ibid., i. 376. (*Boucher*.)

***a-mŷd'-ward**, *adv.* [AMIDWARD.]

a-mŷ'-ēl-oŭs, *a.* [Gr. *amuelos*=without marrow; *a*, priv., and *muelos*=marrow.]

Med.: A term applied to or descriptive of a foetus in which the spinal cord is absent.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðhis; sin, aŝ; expect, Xenophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şūn; -tion, -şion = zhūn. -tious, -cious, -sious = şhūs. -ble, -dle, &c. = beļ, deļ.

a-mÿg'-dal-æ, *s. pl.* [Lat. *amygdala*, *pl. amygdalæ*=an almond. In Fr. *amygdales* (*pl.*); Port. *amygdalas* (*pl.*).] The tonsils, or what are popularly called the "almonds" of the throat.

a-mÿg'-dal-âte, *a. & s.* [Mediæval Lat. *amygdalatum*, *s.*; from Lat. *amygdala*, *amygdalum*, or *amygdalus*=the almond.] [See ALMOND.]

A. *As adj.*: Composed of almonds.

B. *As substantive*:

1. An artificial milk, or emulsion made of blanched almonds.

2. *Chem.*: A salt whose acid is the amygdalic.

a-mÿg'-dāl-ē-æ, *s. pl.* [From Lat. *amygdalus* (*q. v.*).] An old sub-order of Rosaceæ, elevated by Lindley into his order Drupaceæ, or Almond-worts. [DRUPACEÆ.]

a-mÿg'-dāl-īc, *a.* [Lat. *amygdalus*; Eng. *-ic*.] Pertaining to plants of the genus *Amygdalus*.

amygdalic acid, *s.* $C_{20}H_{28}O_{13}$. An acid obtained from the bitter almond.

a-mÿg'-dāl-in, *s.* [Lat. *amygdalinus*=pertaining to an almond.]

Chem.: Amygdalin, $C_{20}H_{27}NO_{11} \cdot 3H_2O$, is extracted by alcohol from bitter almonds and the leaves of the Cherry Laurel (*Cerasus Laurocerasus*). It crystallizes in very small white crystals, and is decomposed by the action of a fermentable substance, *Synaptase*, in the presence of water, into hydrocyanic acid $(CN)H$, benzoic aldehyde, $C_6H_5 \cdot CO \cdot H$, and glucose, $C_6H_{12}O_6$.

a-mÿg'-dāl-ine, *adj.* [Lat. *amygdalinus*.] (1) Pertaining to almonds; (2) almond-like.

ā-mÿg'-dāl-īte, *s.* [Lat. *amygdalites*.] A plant mentioned by Pliny, which is so called from resembling the almond-tree. Probably a *Euphorbia*.

a-mÿg'-dāl-ōld, *a. & s.* [1. Lat. *amygdala*; Gr. *amygdalē*, contracted from *amygdalea*=the kernel of an almond. 2. Gr. *eidos*=that which is seen, form, shape: *eidos*=to see. The form of an almond.]

†1. *As adj.*: Almond-shaped. The more common term is AMYGDALOIDAL (*q. v.*).

2. *As substan. Geol.*: Any rock in which round or almond-shaped nodules of some mineral, such as agate, chalcedony, calc spar, or zeolite, are scattered through a base of wacke, basalt, greenstone, or other kind of trap. Amygdaloid is of volcanic origin. When bubbles of steam and gas are confined in the molten matter they form small cells. When the lava before cooling runs for some distance, the cells, originally globular, become almond-shaped. The mineral which they contain is introduced, after or during consolidation, by matter separating from the mass or infiltrated by water permeating the rock.

a-mÿg'-dāl-ōld-āl, *a.* [Eng. *amygdaloid*; *-al*.] Almond-shaped. *Spec.*, pertaining to the rock called amygdaloid.

"In some of the amygdaloidal traps of Scotland, where the nodules have decomposed, the empty cells are seen to have a glazed or vitreous coating, and in this respect exactly resemble scoriaceous lava or the slags of furnaces."—*Lyell: Man. of Geol.*, ch. xxviii.

a-mÿg'-dāl-ūs, *s.* [Lat. *amygdalus*; Gr. *amygdalos*=the almond-tree.] [ALMOND.] A genus of plants belonging to the order Drupaceæ, or Almond-worts. It contains, among other species, the common peach, *A. Persica*, with the nectarine (var. *nectarina*), the almond, *A. communis*, with the var. *amara*, or bitter almond. They are valued both for their flowers and their fruit. The flowers of the common peach are gently laxative. They are therefore suitable to be employed in the ailments of children.

ām-ÿl, *s.* [Lat. *amylum*, *amulum*; Gr. *amylon*=fine meal . . . starch; *amylōs*=not ground at the mill; *a. priv.*, and *mylos*=a mill.]

Chem.: A monatomic alcohol radical $(C_5H_{11})^{\cdot}$, also called Quintyl from its containing five carbon atoms.

amyl acetate, *s.* [See AMYL ETHERS.]

amyl alcohols, quintyl alcohols, *s. pl.* $C_5H_{12}O$. Eight alcohols may have this formula.

Four primary:

Three secondary:

One tertiary:

The boiling-points are given of the six alcohols which have yet been obtained.

The important alcohol is *isobutyl carbinol*, commonly called *amyl alcohol*; it forms the greater part of fusel oil, which is obtained in purifying spirits distilled from corn or potatoes. It is a colorless, oily liquid, with a penetrating, peculiar smell and burning acrid taste; sp. gr. 0.81. There are two modifications which act differently on polarized light: by oxidation it yields isovaleric acid, $C_5H_8O \cdot O$.

amyl ethers, *s. pl.* Several are known; the most important is *amyl acetate*, $C_5H_{11} \cdot C_2H_3O \cdot O$, obtained by distilling sodium acetate with amyl alcohol (isobutyl carbinol) and sulphuric acid. It boils at 140°, is a colorless liquid, and has the flavor of jargonelle pears. It is used in perfumery.

ām-ÿl-ā-ceous, *a.* [In Fr. *amylacé*; from Lat. *amylum*=starch (*q. v.*).]

1. *Generally*: Pertaining to starch, containing starch; resembling starch; having the properties of starch.

"Amylaceous substances are not digested by the stomach, but are acted upon whilst they are in the small intestines."—*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 242.

2. *Botany. Amylaceous granules*: Certain granules of starch found in all plants, and particularly abundant in some, as in the rhizoma of equisetum. Turpin called them Globuline. (Lindley: *Introd. to Bot.*, 3d ed., 1839, bk. i., ch. i.)

ām-ÿl-ām-ine, *s.* [Eng., &c., *amyl*; *amine*.]

Chem.: An amine $C_5H_{11} \cdot N$.

ām-ÿl-ēne, quīn'-tēne, pēn'-tēne, *s.* [Eng., &c., *amyl*; *-ene*.]

Chem.: C_5H_{10} . Three isomeric olefines are known having this formula.

Pentene, or *Ethyl-allyl*, $CH_3-CH_2-CH=CH_2$, obtained by the action of zinc ethyl on allyl iodide. A limpid liquid, boiling at 39°.

Amylene, or *Isopentene*, obtained by distilling amyl alcohol with $ZnCl_2$. A colorless liquid, boiling at 35°. Its formula is $H_3C > CH-CH=CH_2$.

Methyl Ethylethene $\begin{cases} H_3C \\ | \\ H_3C < C = CH-CH_3 \end{cases}$, prepared by action of strong alcoholic potash on tertiary pentyl iodide. It boils at 35°.

amylene glycol, *s.* $(C_5H_{10})''(OH)_2$. A diatomic alcohol. It is a thick, sweet, colorless liquid, boiling at 177°.

ām-ÿl-īc, *a.* [Eng. *amyl*; *-ic*.] Pertaining to amyl.

ām-ÿl-ōld, *s.* A substance produced by the action of sulphuric acid on cellulose, used in the manufacture of incandescent lamp filaments.

ām-ÿl-ōld, *a.* [*Amyl*, and Gr. *eidos*=form, appearance.] Resembling or containing amyl.

amylod substance, or lardacein, *s.*

Chem.: An albuminoid (*q. v.*) which in certain diseases is deposited in the liver. It is colored red by iodine, and violet by H_2SO_4 and iodine; concentrated HCl dissolves it, forming acid-albumin. Dissolved in KHO, it forms potassium albuminate. It can also be obtained by the action of very dilute HCl and fibrin, and evaporating the solution to dryness in a water-bath. It is insoluble in gastric juice.

Ām-ÿr-ald-īsm, *s.* [From Moses Amyraldus or Amyraut, a French theological professor at Saumur, who was born in 1596, and died in 1664.]

Church Hist. & Theol.: The tenets of Amyrald and his followers. They were that God desires the happiness of all men, and that none are excluded from it by an eternal decree. That those who would be saved must believe in Christ. That the power of believing is refused to none, but divine assistance effective for the purpose is not bestowed on all. These views were called Universalist, but they were so in words rather than in reality.

***ām-ÿ-rāle**, *s.* An old form of ADMIRAL. (*Scotch.*)

ām-ÿr-ī-dā-çē-æ, *s. pl.* [From the typical genus *Amyris* (*q. v.*).] An order of exogenous plants placed by Lindley under his Rutales, or Rutal alliance. The Amyridaceæ have a panicked inflorescence, hypogynous stamina, double the petals in number, a one-celled ovary, with two to six pendulous ovules; the fruit sub-drupaceous, samaroid, or ovumous, with from one to two

seeds, the leaves compound with pellucid dots, and abounding in resin. They occur in the tropics of India and America, in the latter region extending as far north as Florida. In 1846, Lindley estimated the known species at forty-five.

ām-ÿr-is, *s.* [Lat. *myrrha* and *myrrhis*; Gr. *myrrhis*=a plant. *Myrrhis odorata*.] The typical genus of the Amyridaceæ, or Amyrid order of plants. It has a finely smelling resinous gum. *A. Gileadensis* produces the celebrated Balm of Gilead. [BALM.] The *A. toxifera* is said to be poisonous. The *A. Plumieri* and the *A. hexandra* furnish part of the Gum Elemi of commerce. The wood of *A. balsamifera* in Jamaica yields one kind of Lignum Rhodium. The layers of the liber of a species belonging to the same genus are employed by the Nubian Mohammedans for paper.

***a-mÿs'**, *adv.* Old spelling of AMISS.

a-mÿz'-tli, *s.* The Mexican name of a species of Sea-lion (*Otaria*), found on the sea-coasts and estuaries of the American Pacific coast. Its skin is valued on account of the length and softness of its hair.

ān, *article*. [A. S. *an*, *æn*=(1) one; (2) single, sole, another; (3) a certain one, some one; (4) any, every one, all. In Sw. *en*; Dan. *en*, *een*; Dut. *een*, *eene*; Ger. *ein*; Gael. *aon*; Irish, *ein* *ean*, *aon*; Welsh *un*, *yn*; Cornish *uynyn*; Arm. *yunau*; Lith. *vena*; Fr. *un*, *on*; Sp. *uno*, *un*; Port. *hum*; Ital. *uno*; Lat. *unus*; Gr. *heis*, masc., *hen*, neut.=one.] [ONE.]

1. *Its form*: The indefinite article, and at first its only form, being placed before words beginning with a consonant, no less than those commencing with a vowel, as is still the case with a similar word *one*. [ONE.] (See the subjoined examples in which *an* is used before a consonant.)

"He it setten on an mirie stede."

Story of Gen. and Exod. (1250), ed. Morris, 680.

"In a weie an time he cam."—*Ibid.*, 1,435.

"On an busk rane and wel tidi."—*Ibid.*, 2,015.

"An kire."—*Ibid.*, 2,451.

"An wis man."—*Ibid.*, 2,649.

"An sel."—*Ibid.*, 2,769.

Now the form *a* occurs as well as *an*. For rules as to when the one and when the other is employed, see *A as a part of speech* (A., V., page 1).

† In some words now beginning with *n*, that letter has become detached from *a*, and has adhered to the commencement of the subsequent word, which formerly began with a vowel. Thus, in East Anglia, according to Forby, an ass is called a *nasil* or *nazzle*, i. e., *an asil*, or *an azzle*. Similarly, a newt, originally called an *eft*, *evet*, or *ewt*. In *adder*, again, the contrary appears to have happened: it was at first a *nadder*, and became *an adder*. So also with *apron*, originally *napron*. [ADDER, NATRIX.]

II. *Its signification*: The primary signification of *an* is (1) *one*, in a very indefinite sense, *any one*; (2) *each*; (3) *any*; (4) *one in particular*; (5) *every*. [See *A as a part of speech* (A., V., p. 1). Sometimes *an*, like *a*, is placed before a participle or an adjective without in any way altering the meaning.

"And when he had fasted forty days and forty nights, he was afterward an hungred."—*Matt.* iv. 2.

ān, *conj.* [A contracted form of AND (*q. v.*).] Wedgwood thinks this may have come from *e'en*, a contraction of *even*; O. Sw. *æan*=and yet, still, continuously. Horne Tooke derives it from A. S. *unnan*=to give. In Lat. *an*=or, or whether; Gr. *an*, contraction from *ean*=if, haply, perchance; Arab. & Sam. *an*=if; E. Aram. *an*, and *ayin*=if, or whether.]

† *An* is obsolete in English, but still exists in Scotch.

1. If.

**(a) Old English*:

"He can't flatter, he!

An honest mind and plain, he must speak truth,

An they will take it, so; if not, he's plain."

Shakesp.: *King Lear*, ii. 2.

(b) *Scotch*:

"Troth, I kenna,—an they come so many as they speak o' . . ."—*Scott: Antiquary*, ch. xlv.

2. As if.

"My next pretty correspondent, like Shakespeare's lion in Pyramus and Thisbe, roars an' it were any nightingale."—*Addison*.

*3. And.

"Thurch mani a cuntrè vp an doun."

Amis and Amiloun, 1,798.

ān, or **a**, as a *prefix*, derived from the Greek. [Gr. *an*, or *a*, generally called *alpha*, privative, but *an*, and not *a*, is the original form. In English, Anglo-Saxon, Old Saxon, German of all ages, and Goth. *un*; Dut. *on*; Old Norse & Sw. *o*; Dan. *u*; Wel. *an*; Gael. *ana*, *an*, *am*; Lat. *in*; Sansc. *an*.] From a study of its use in Gaelic, Prof. Key infers that it originally signified *badly*, from which there came

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trÿ. Sÿrian. æ, œ = ē; ey = ā. qu = kw.

the senses (2) of negation, and (3) of intensity. Badness is a negation of good, and the more intense that it is, the more is it worthy of the name of *badness*. [See Prof. Key's *Philological Essays* (1868), pp. 127-148.] Now *an* priv. is used before a vowel, and a before a consonant, as *anomalous*, *atheist*.

**ān*, **ūune*, *v. t.* [A. S. *unnan*, *geunnan*=to give.] 1. To give. (*Boucher*.) To appropriate, to allot as one's own. (*Jamieson*.)

"Y take that me gode *an*."

Sir Tristrem, iii. 7. (*Boucher*.)

2. To consent. (*Boucher*.)

"Ich *an* wel ! cwith the nightingale,

Ah wranne, naut for thire tale."

Hale and Nightingale, 1, 728.

**ān*, *v. t.* [O. Sw. *an*, pres. tense of *una*, or *unna*=to wish well. (*S. in Boucher*.)] To wish well to. (*Boucher*.) To owe, to be indebted to. (*Jamieson*.)

"Tristrem speke bigan

1. *As a prefix*: Up to; increase, or strengthening; repetition, or improvement; back, backward. (See the various words which follow.)

2. *As a substantive*. [Gr. *ana*, in the distributive sense=each, throughout.]

Med. Prescriptions: The like quantity. It is often contracted to *āā*, or *ā*: as *ana* 3 oz.; *aa* 3 oz.; *a* 3 oz.

"In the same weight prudence and innocence take,
Ana of each does the just mixture make."

Cowley.

"He'll bring an apothecary with a chargeable long bill of *anas*."—*Dryden*.

ā-nā, *a'-nā*, *suffix & s.* [From Latin. In Fr. *ana*. Properly, the termination of the neut. pl. in Latin adjectives ending in *anus*, as in sing. *Trojanus*=a Trojan man; neut. pl. *Trojana*=Trojan things.]

1. *As a suffix*: Added to proper names, as an appellation of books consisting of clever or witty sayings of deceased men of eminence, and anecdotes regarding them; some doubtless authentic, others as obviously mythic. This use of the term *ana* seems to have begun in France about the middle of the seventeenth century, whence it spread to other parts of Europe. The *Scaligerana*, or *Scaligeriana*, appeared in two parts: the first ultimately called, however, *Scaligeriana Secunda*, first appeared in the year 1666; the former in 1699. Among other Continental *ana* the *Menegeana* came forth in 1692, and the *Poggiana* in 1720. England had its *Walpoliana*, its *Addisoniana*, its *Johnsoniana*, its *Swiftiana*, its *Mooriana*, &c.; and some works like Boswell's celebrated *Life of Johnson*, though not called *ana*, might with much propriety receive the name.

2. *As an independent word*, when it becomes a *substantive pl.* (See example under No. 1.)

ān-a-bai'-nā, *s.* [Gr. *anabainō*=to go up: *ana*=up, and *bainō*=to go.] A genus of plants belonging to the alliance Algae (Sea-weeds) and the order Confervaceæ (Confervas). It is to the *A.* or *Sphærozyga spiralis* that the green color of the water in Ballydrain lake is attributable. (*Lindley: Veg. Kingd.*, p. 16.)

ān-ā-bāp'-tism, *s.* [In Ger. *anabaptism*; Fr. *anabaptisme*; Sp. & Port. *anabaptismo*; Lat. *anabaptismus*; Gr. *anabaptisma*=re-baptism, from *anabaptizō*=(1) to dip repeatedly; (2) to re-baptize; *ana*=in the sense of again, and *baptizō*=(1) to dip in or under water, (2) to draw water, (3) (New Test.) to baptize.] (*Liddell & Scott*.)

1. The doctrine of the German Anabaptists of the sixteenth century.

2. The doctrine of the modern Baptists, looked at from the point of view of those who hold that baptism administered in infancy is valid, and consequently that if it be repeated in adult life there is a second baptism.

"Anabaptism is an heresy long since condemned both by the Greek and Latin Church."—*Featley: Dippers Dipt*, p. 1.

"That would be Brownism and Anabaptism indeed."—*Milton: Reason of Ch. Gov.*, bk. 1.

ān-ā-bāp'-tist, *s.* [In. Ger. *Anabaptist*; Fr. *anabaptiste*; Sp. *anabaptista*, *anabatista*; Port. *anabaptista*; Ital. *anabatista*.] [ANABAPTISM.]

A. *As substantive*. *Church History*:

1. A member of a well-known fanatical sect which largely figured in the ecclesiastical and civil history of the sixteenth century. It began to attract notice within four years of the ever memorable 31st of October, 1517, on which Luther affixed his "theses" to the gate of the castle church of Wittenberg. The most eminent of its early leaders were Thomas Munzer, Mark Stubner, and Nicholas Storck. They had been disciples of Luther; but becoming dissatisfied with the moderate character of his reformation, they cast off his authority, and attempted more sweeping changes than he was prepared to sanction. During his absence, they, in 1521, began to preach their doctrines at Wittenberg. Laying claim to supernatural powers, they saw visions, uttered "prophecies," and made an immense number of proselytes. The ferment which the exciting religious events taking place in Central Europe had produced in men's minds, had made them impatient of social or political as well as of spiritual despotism; and in 1525 the peasants of Suabia, Thuringia, and Franconia, who had been much oppressed by their feudal superiors, rose in arms, and commenced a sanguinary struggle, partly, no doubt, for religious reformation, but chiefly for political emancipation. The Anabaptists cast in their lot with the insurgent peasantry, and became their leaders in battle. After a time the allied princes of the Empire, led by Philip, Landgrave of Hesse, put down the rebellion, and Munzer was defeated, captured, put to the torture, and ultimately beheaded. In 1532, some extreme Anabaptists from Holland, led by a baker called John Matliias, and a tailor, John Boccoldt, called also, from the place whence he came, John of Leyden, seized on the city of Münster, in Westphalia, with the view of setting up in it a spiritual kingdom, in which, at least nominally, Christ might reign. The name of Münster was changed to that of Mount Zion, and Matthias became its actual king. Having soon after lost his life in a mad warlike exploit, the sovereignty devolved on Boccoldt, who, among other fanatical freaks, once promenaded the streets of his capital in a state of absolute nudity. On the 24th of June, 1535, the Bishop of Münster retook the city by force of arms, and Boccoldt was put to death in the most cruel manner that could be devised. The excesses of the Anabaptists were eagerly laid hold of by the Popish party to discredit the Reformation. It was in the year 1534, when Boccoldt was in the height of his glory in Münster, that Ignatius Loyola took the first step toward founding the order of the Jesuits, and the extension and rapid success of that celebrated fraternity are to be attributed in a very large measure to the reaction against Protestantism produced by the share which the Anabaptists took in the peasants' war, and the character of the spiritual sovereignty which they set up while Münster was in their hands.

2. One belonging to the modern Baptist church. The term is used only by those who believe in infant baptism, and is properly becoming obsolete, there being an unfairness in using an expression which suggests a connection between the turbulent fanatics of Münster and the quiet, law-abiding English Baptists. [ANABAPTISM.]

"... rebels, schismatics, Presbyterians, Independents, *Anabaptists*, Quakers, the blessed offspring of the late reforming times."—*South: Sermons*, vi. 83.

B. *As adjective*: Relating to the Anabaptist doctrine or sect.

"... the *anabaptist* anarchy."—*Froude: Hist. Eng.*, pt. i., ch. ix.

ān-a-bāp-tis'-tīc, **ān-a-bāp-tis'-tīck*, *ān-a-bāp-tis'-tī-cal*, *a.* [Eng. *anabaptist*; -ic or -ical.] Pertaining to Anabaptism, or to the sect holding the doctrine so characterized by its opponents.

"The ... illent Bucer takes occasion severely to reprove those four hypocrites of the *anabaptistic* sect in his time, who would not allow of any freer use of the good creatures of God, and would frown at any mirth in company, though never so innocent."—*By. Bull's Works*, ii. 657.

"... *anabaptistical*, antinomian, heretical, atheistical epithets . . ."—*Milton: Colasterion*.

**ān-a-bāp-tis-trī*, *a.* [Eng. *anabaptist*; -ry.] The Anabaptist doctrine, worship, or dominion.

"Thus died this imaginary king; and *anabaptistry* was suppressed in Munster."—*Payitt: Heresiography*.

ān-a-bāp-tī-ze, *v. t.* [Gr. *anabaptizō*=to baptize a second time.]

"Though some call their profound ignorances new lights, they were better *anabaptized* into the appellation of extinguishers."—*Whitlock: Manners of the English*, p. 160.

ān-a-bāp-tī-zīng, *pr. par. & a.* [ANABAPTIZE.]

As substantive: Re-baptizing.

"... the *anabaptizing* of infants, &c."—*Fell: Life of Hammon*, § 1.

ān-a-bas, *s.* [Gr. *anabainō*=to go up: *ana*=up, and *bainō*=to go.] A genus of fishes of the order Acanthoptera, and the family Anabatidæ. The species, the *A. testudineus*, of Southern India and Java, ordinarily live in rivers and fresh-water ponds, emerging, however, at times, and worming their way, by means of their serrated opercula and the spines in their fins, along the ground, and, according to some observers, even up trees. In Tamul, the name given to them is *Paneiri*=Tree-climbers.

ān-āb'-a-sīs, *s.* [Gr. *anabasis* = (1) a going up, as on horseback; (2) a journey, an expedition: *anabainō* = to go up; *ana* = up; *bainō* = to go.]

1. *Spec.*: The name given by Xenophon to his celebrated work describing the expedition of Cyrus the younger against his brother Artaxerxes Mnemon, king of Persia. Arrian also calls the expedition of Alexander the Great to Asia an *anabasis*.

2. *Gen.*: Any similar expedition, as that of Napoleon I. to Moscow.

ān-a-ba-th-rūm, *s.* [Lat., from Gr. *anabathron*=a seat upon steps, a professor's chair.] A pulpit, desk, or high seat.

ān-a-bāt'-ī-dæ, *s. pl.* [From *anabas*, the typical genus (q. v.).] A family of fishes belonging to the order Acanthoptera. Cuvier formerly placed them under his family with labyrinthiform pharyngeals.

ān'-a-blēps, *s.* [Gr. *ana* = up, and *blepō*, fut. *blepsō*=to look.] A genus of abdominal fishes, of the order Malacopterygii Abdominales, belonging to the family Cyprinidæ (Carps). Their eyes greatly project, and moreover seem, but only seem, as if divided into two; hence the species is called *A. tetraphthalmus*. It is found in the rivers of Guiana.

ān-āb'-ō-līsm, *s.* [Gr. *anabole*=a throwing up, and suff. -ism.] Constructive metabolism, as opposed to *catabolism*, or destructive metabolism. Its processes tend to build up the energy and substance of a living organism, as in the conversion of a nutritive element of food into animal or vegetable tissue.

ān-a-brō-chiṣ'-mūs, *s.* [Gr. *anabrochismos*; *anabrochizō* = to draw out by a loop: *ana*=up, and *brochos* = a noose or slip-knot.]

Old Med.: "A way of drawing out the inverted pricking hairs of the eyelid." (*Glossog. Nova*.)

ān-a-brō'-sīs, *s.* [Gr. *anabrōsis*, from *brōsis*=an eating up: (1) meat; (2) an eating: *bibrōskō* = to eat, fut. *brōsomai*.] A wasting away of the body.

ān-a-cāmp-tēr'-ī-a, *s. pl.* [Gr. *anakamptērion*=a place to walk backward and forward in.] Lodgings of those who fled to religious houses for sanctuary.

ān-a-cāmp'-tīc, **ān-a-cāmp'-tīck*, *a.* [From Gr. *anakamptō*=to bend back; *ana*=back, and *kamptō*=to bend.] Pertaining to anacamptics (q. v.).

"Anacamptick (Gr.) signifies reflecting."—*Gloss. Nova*.

anacamptic sounds, *s.* Reflected sounds, such as those of echoes; sounds falling from acute to grave.

ān-a-cāmp'-tīc-al-lī, *adv.* [Eng. *anacamptical*; -ly.] By reflection.

ān-a-cāmp'-tīcs, *s. pl.* [ANACAMPTIC.]

1. *Anciently*: The science of reflected light, now called *catoptrics*.

2. The science of reflected sounds.

ān-a-cāmp'-tīs, *s.* [Gr. *anakamptō*=to bend back: *ana*=back, and *kamptō*=to bend. So called apparently from the reflexed edges of the pollen masses.] Richard's name for a genus of Orchidaceæ containing the pyramidal orchis, *A. pyramidalis*, the *O. pyramidalis* of Linnæus, and many modern writers.

ān-a-cānth-ī'n-ī, *s. pl.* [Gr. *an*, priv., and *akanthinos*=thorny; from *akantha*=a thorn; *akē*=a point.]

Zool.: In Müller's classification of Fishes, the second sub-order of the order Teleostia. It is equivalent to the Malacopterygii of Cuvier and other writers. It is distinguished from the Acanthoptera (the same as the old Acanthopterygii) by the absence of spines in the rays of the fins. There are four families: the Ammodytidæ (Sand-eels), the Ophideidæ, the Gadidæ (Cods), and the Pleuronectidæ (Flat-fishes). The last-mentioned family has fossil representatives.

ān-a-cānth'-ūs, *s.* [Gr. *a*, priv. and euph.; *akantha*=a thorn.] A genus of fishes of the Ray family.

ān-a-car-dī-ā'-čē-æ, *s. pl.* [From *anacardium*, the typical genus.]

Anacards or *Terebinths*: An order of exogenous plants, placed by Lindley under his Rutales, or Rutal alliance. They have usually unisexual flowers. The stamina are equal in number to the petals, or twice as many, or even more; the ovary is generally single; the fruit most commonly drupaceous;

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şhñ; -tīon, -şion = zhñ. -tious, -cious, -sious = şhş. -ble, -dle, &c. = bəl, dəl.

the seed, solitary. The leaves are without dots. The order consists of trees or shrubs, with a resinous gummy caustic, or even milky juice. They occur in the tropics of both worlds. In 1846, Lindley estimated the known species at ninety-five. Among these may be noted the Cashew-nut, the Pistacia-nut, and the Mango-fruit. Plants of the order furnish various varnishes, lacs, lacquer, and mastic. *Rhus toxicodendron* and *R. radicans* are exceedingly poisonous.

ăn-a-car'-dī-um, s. [In Sp. *anacardio*; Port. *anacardo*; Gr. *ana*=resemblance, and *kardia*=heart. So called from the form of the nut.] A genus of plants, the type of the order Anacardiaceæ (Anacards). It contains the Cashew-nut of commerce (*A. occidentale*), the clammy juice of which is used in India for varnishing. The varnish is first white, but afterward becomes black. It is all but poisonous; so is the fruit, which acts upon the brain. The tree itself is an elegant one, with pinnated corymbs of sweet-smelling flowers.

ăn-a-ca-thar'-sis, s. [Gr.=a clearing away: *ana*=up, and *katharsis*=cleansing: *kathairō*=to make pure. Cleansing by an upward action; expectoration or vomiting.]

ăn-a-ca-thar'-tic, a. & s. [Gr. *anakathartikos*.]

1. *As adj.*: Promoting (a) expectoration, or (b) vomiting.

2. *As substan.*: A medicine fitted to excite expectoration or vomiting.

ăn-a-çeph-ai-æ-ō'-sis, s. [Gr. *anakephalaiōsis*=a summary; *ana*, and *kephaliōsis*=(1) a comprehension of several notions in a general term; (2) summary treatment; *kephalē*=the head.]

Rhet.: The recapitulation of the heads of a discourse.

a-năch'-ar-īs, s. [Gr. *ana*, in the sense of a repetition of, and *charis*=a contraction for *Hydrocharis*. A repetition of the *Hydrocharis*, or Frog-bit.] A

Anacharis Alsinistrum.

1. Portion of a plant of *Anacharis alsinistrum*.
2. End of a branch, showing female flower.
3. Female flower enlarged.
4. Main stem, showing branching and rootlets.
5. A leaf enlarged.

genus of plants belonging to the order Hydrocharidaceæ, or Hydrocharis. The *A. alsinistrum*, or Long-flowered Anacharis, an American plant, is now naturalized in ponds, canals, &c., in Britain.

***a-năch'-ôr-ēt, *a-năch'-ôr-ite**, s. [See ANCHORITE.]

***a-nă-chôr-ēt'-i-cal**, a. [O. Eng. *anachoret*=*anachorite*; suffix *-ical*. In Fr. *anachoretique*; Sp. *anacoretico*; Port. *anachoretico*.] Pertaining to an anchorite or anchirite.

ăn-a-chrôn'-ic, a. [Gr. *ana*=backward; *chronikos*=of time; *chronos*=time.] Involving an anachronism. (Coleridge.)

ăn-ăch-rôn'-ism, *ăn-ăc-rôn'-ism, s. [In Ger. *anachronism*; Fr. *anachronisme*; Sp. and Ital. *anacronismo*; Port. *anachronismo*; all from Gr. *anachronismos*: *ana*, and *chronismos*=(1) a long duration, (2) a coming late; *chronizō*=to touch; *chronos*=time.] The placing of an historic event, or manners and customs, &c., at a wrong chronological date. The term is especially used when anything is dated too early. Thus, it would be a very great *anachronism* were a modern poet to introduce cannon at the siege of Troy.

"This leads me to the defense of the famous *anachronism*, in making Æneas and Dido contemporaries; for it is certain that the hero lived almost two hundred years before the building of Carthage."—Dryden.

"The statement, therefore, which represented the Roman envoys in the year after the first secession as obtaining corn from Dionysius the elder, resembles the *anachronism* which makes Numa the disciple of Pythagoras, or that which describes the colloquy between Solon and Cæresus."—Lewis: *Early Roman History*, ch. xii., pt. ii., § 19.

ăn-a-chrôn'-is'-tic, a. [From Eng. *anachronism* (m); *-tic*. Or from Gr. *ana*=back; *chronistos*=tarrying, delaying.] [ANACHRONISM.] Pertaining to or involving an anachronism; wrongly dated.

"Among the *anachronistic* improprieties which this poem contains, the most conspicuous is the fiction of Hector's sepulchre."—Warton. *Hist. E. P.*, ii., § 5.

ăn-ăch'-rô-nize, v. t. To place at a wrong time.

ăn-a-clă'-sis, s. [Gr. *anaklasis*=a bending back and breaking; *anaklaō*=(1) to fracture, to bend back, (2) to break short off; *ana*=back, and *klaō*=to break.]

Surgery: The bending back of any part.

ăn-a-clă'-tic, a. [Gr. *anaklastos*=bent back.] Bent back; refracted.

anaclastic glasses, s. [Called in Ger. *vexier glaser*, i. e., vexing glasses, from the disturbance produced by their resilience.] A kind of sonorous flat-bellied vials, shaped like inverted funnels, with bottoms extremely thin, and slightly convex. When alternately filled with air, and exhausted by the mouth, they emit a considerable sound, produced by their thin bottoms assuming first a convex and then a concave form. They are made chiefly in Germany.

ăn-a-clă'-tics, s. pl. [ANACLASTIC.] The science of dioptrics; the science which treats of refracted light.

ăn-a-clī'-sis, s. [Gr. *anaklisis*=a lying or leaning back; *ana*=back, and *klinis*=a bending, inclination; *klinō*=to make, to bend.]

Med.: A term used by Hippocrates to describe the reclining posture of the sick; also a couch or sick-bed.

ăn-a-çœ-nô'-sis, s. [Gr. *anakoinōsis*=an arrangement, a communication: *anakoinō*=to communicate or impart; or *ana*, intensive, and *koinōsis*=a making common; *koinō*=to make common; *koinos*=common.]

Rhet.: A figure by which a speaker applies to his opponents for their opinion on some point in dispute between him and them.

ăn-a-côl'-ă-thôn, s. [In Fr. *anacolouthé*. From Gr. *anacolouthos*=want of sequence; *an*, priv., and *akolouthos*=following; *akolouthēō*=to follow.]

Rhet. & Gram.: Want of sequence in a sentence. Such a change in the structure of a sentence as to render it ungrammatical.

ăn-a-côn'-dā, s. [Ceylonese name.] A large snake, the *Python tigris*, which occurs in the island of Ceylon. The name is also given to the *Eunectes murinus*, a large South American snake of the Boa family.

ăn-a-côs'-tā, s. [Dut.] A woolen diaper made in Holland for the Spanish market.

ăn-ăc-rē-ôn'-tic, a. & s.; **ăn-ăc-rē-ôn'-tique**, s. [In Fr. *Anacréontique*; Sp., Port., and Ital. *Anacreontico*. From *Anacreon*, a celebrated Greek lyric poet, who flourished about 540 B. C. His writings were elegant in diction, and melodious in cadence, but liable to censure from a moral point of view, his unvarying themes being wanton love and wine.]

A. As adjective: Pertaining to Anacreon, or to erotic poetry.

Prosody. Anacreontic verse: A kind of verse much used by Anacreon. It consists of three feet and a half, usually spondee and iambuses, though sometimes anapests occur in it.

"It is, indeed, a memorable fact to be recorded of a boy, that, before completing his fifteenth year, he had translated the Greek Hymn of Synesius into English *Anacreontic* verse."—De Quincey's *Works* (ed. 1863), vol. ii., pp. 71, 72.

B. As substantive:

1. A verse composed in the meter called *Anacreontic*. [ANACREONTIC VERSE.]

2. A erotic poem: a poem treating on Anacreon's favorite subjects, love and wine.

"To the miscellanies [of Cowley] succeed the *anacreontiques*, or paraphrastic translations of some little poems, which pass, however justly, under the name of Anacreon."—Johnson: *Life of Cowley*.

ANACREONTIC.

"Friend of my soul! this goblet sip,

'Twill chase that pensive tear;

'Tis not so sweet as woman's lip;

But, oh! 'tis more sincere.

Like her delusive beam,

'Twill steal away thy mind:

But like affection's dream,

It leaves no sting behind!"—Moore.

***ăn-a-crī'-sis**, s. [Gr. *anakrasis*=an examination, an inquiry: *ana*=again, and *krisis*=a separating; *krinō*=to separate.]

Among old Civilians: Interrogation of witnesses, especially by torture.

ăn-a-çyc'-lūs, s. [In Fr. *anacyle*; Sp., Port., & Ital. *anaciclo*; Gr. *anakykleō*=to turn round again; *ana*=again, and *kykleō*=to move round; *kyklos*=a ring or circle. So called because there are rows of

ovaries without flowers, placed in a circle round the disk.] A genus of plants belonging to the order Asteraceæ, or Compositæ. The Pellitory of Spain (*A. pyrethrum*) has a fleshy root, which, when fresh, produces on the hands of those who gather it first a sensation of great cold, and then one of burning heat. In rheumatic affections of the mouth it is employed as a masticatory. In other diseases it is used as a powerful rubefacient and stimulant. (Lindley: *Veg. Kingd.*, p. 707.)

ăn-a-dēm, ăn-a-dē-me, s. [Lat. *anadema*; Gr. *anadēma*, for *anadesma*=a band for women's hair.] A garland or fillet. A chaplet or crown of flowers.

ăn-a-dī'-ā, s. A genus of snakes containing the *A. ocellata*, or Eyed Anadia, believed to be from India.

ăn-a-dī'-ā-dæ, s. pl. [From the typical genus *Anadia* (q. v.).] A family of Ophidians.

ăn-a-dī-plō'-sis, s. [Lat. *anadiplosis*, from Gr. *anadiplosis*=a doubling back. In rhet.=a repetition; in gram.=a reduplication: *ana*=again, and *diplosis*=a compounding of words: *diploō*=to double; *diploos*=double.]

Rhet.: The reduplication of a word by the repetition at the commencement of a new clause of the word by which the former one was terminated. (Glossogr. *Nova*.)

"... as, he retained his virtues amidst all his misfortunes, misfortunes which only his virtues brought upon him."—Johnson.

ăn-a-drôm, s. [For etym. see ANADROMOUS.] Any fish which ascends rivers; the eel, for instance.

ăn-ăd-rôm-ōūs, a. [Gr. *anadromos*=running up, as a fish "running up" a river: *ana*=up, and *dromos*=a course, or running; *dramein*, pr. infin., and *dedroma*, 2 perf. of *trechō*=to run.] Pertaining to such fishes as at certain seasons ascend rivers.

a-næ'-mī-a, s. [Gr. *anaimia*=want of blood: *an*, priv., and *haima*=blood.] Bloodlessness: a morbid state of the system produced by loss of blood, by deprivation of light and air in coal mines, or causes more obscure. The patient is characterized by great paleness, and blood-vessels, easily traceable at other times, become unseen after great hemorrhage, or in cases of anæmia. (Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 295.)

ăn-æ'-mic, a. [Gr. *anaimos*=bloodless; Eng. suffix *-ic*.] Relating to the disease called Anæmia (q. v.).

"If the brain be *anæmic*, the quantity of surrounding fluid will be large."—Todd & Bowman: *Physiol. Anat.*, vol. i., p. 298.

ăn-æ-môt'-rôph-ỹ, s. [Gr. *anaimos*=bloodless, and *trophē*=nourishment, from *trephō*=to nourish.] Want of nourishment; its cause being deficiency of blood.

ăn-ă-ē-rôbe (Pl. **ăn-ă-ē-ro'-bī-a**), s. [Gr. *an*, priv.; *air*=air; *bios*=life.] An individual of the *Anaerobia*.

ăn-ă-ē-rô'-bī-a, s. pl. [ANAEROBE.] Bacteria that do not require air or free oxygen in order to live. [FACULTATIVE ANAEROBIA.]

ăn-ă-ē-rôb'-ic, a. [Eng. *anaerob(e)*; *-ic*.] Capable of living in the absence of air or free oxygen.

ăn-ă-ē-rô-bī-ô'-sis, s. [Gr. *an*, priv.; *air*=air; *biosis*=way of living.] Life maintained in the absence of air or free oxygen.

ăn-æs-thē'-sī-a, s. [Gr. *anaisthēsia*=want of perception, or of feeling; stupidity: *an*, priv., and *aisthēsis*=perception by the senses; *aisthanomai*, fut. *aisthēsomai*=to perceive.] Loss of the sense of touch; incapacity of feeling.

ăn-æs-thēt'-ic, ăn-æs-thē'-tic, a. & s. [Gr. *an*, priv., and *aisthētikos*=perceptive.]

1. *As adj.*: Pertaining to an anæsthetic; deadening or destroying consciousness. (See the substantive.)

2. *As substantive (plur.)*: A class of medicines which, when inhaled in the form of vapor, destroy consciousness for a time, and with it the sense of pain. Garrod makes anæsthetics the third order of his sub-class, defined as medicines acting especially upon the brain proper, but probably also upon other portions of the central nervous system. Among the uses to which they are put are the alleviation of pain and spasm, the production of unconsciousness during surgical operations or parturition, and the procuring of sleep in delirium. The best known are chloroform, ether, and protoxide of nitrogen (nitrous oxide).

"Since the introduction of ether and chloroform as anæsthetics in the practice of surgery . . ."—Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 406.

ăn-a-găl'-lis, s. [In Sp. *anagallide*; Ital. *anagallide*; Lat. *anagallis*; Gr. *anagallis*; *ana*=again, and *agallō*=to make glorious, to adorn; because, regularly as the proper season arrives, it readorns the ground.] A genus of plants belonging to the order Primulaceæ (Primworts). The

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camel, hêr, thêre; pîne, pît, sîre, sîr, marine; gô, pôt, or, wôre, wôlf, wôrck, whô, sôn; mûte cûb. cûre, unite, cûr, rûle, fûll; trỹ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

1. *arvensis*, the Scarlet Pimpernel, is a well-known plant, easily recognized by its pretty rotate flowers, generally crimson, though more rarely blue, flesh-white, colored or white, with a purple eye. Opening in sunlight, and closing when the beams of the luminary are withheld, it is sometimes called the Poor Man's Weather-glass. It flowers from May to November. A very poisonous extract can be formed from it; nevertheless, the plant has been used in cases of madness, epilepsy, and dropsy.

ăn-a-gên-nē'-sis, s. [Gr. = regeneration.] Rep-
aration or regeneration of tissue.

ăn-a-glŷph, s. [Gr. *anaglyphē* = a work in low relief; *ana* = up, and *glŷphē* = carving; *glŷphō* = to hollow out, to engrave.]

Sculpture: A figure cut in low relief on a plane, or smooth surface, as in the case of a cameo.

ăn-a-glŷph'-ic, a. [Gr. *anaglyphos*.] The
same as ANAGLYPTIC (q. v.).

Anaglyphic Art: "The art of carving and en-
graving." (*Glossogr. Nova*.)

ăn-a-glŷp'-tīc, a. & s. [Lat. *anaglyptus*; Gr.
anaglyptos.]

1. As adj.: Wrought in low relief, embossed,
engraved, or enched in low relief. When the
design is produced by the engraving or indentation,
as in the case of seals, it is then termed *diaglyphic*,
or *intaglio*.

2. As substantive: Anything wrought in low re-
lief, in a manner described under the adjective.

"They rather concern the statuary art; though we
might yet safely, I think, admit some of the Greek *ana-
glyptics*."—*Evelyn: Sculptura*, p. 16.

ăn-a-glŷp'-tō-grāph, s. [Gr. *anaglyphē* = a
work in low relief; *graphē* = a drawing; *graphō* = to
scratch, to scrape, to grave.]

Nat. Phil.: A machine for producing drawings or
etchings in relief, from models, coins, medals, &c.

ăn-a-glŷp'-tō-grāph'-ic, a. [Eng. *anaglyph-
tograph*; -ic.] Pertaining to the art of producing
drawings or etchings in relief, or to the anaglypto-
graph (q. v.).

ăn-a-glŷp'-tōg'-raph-ŷ, s. [Lat. *anaglyptus*;
Gr. *anaglyptos* = wrought in low relief, embossed;
graphē = delineation; *graphō* = to grave, scratch, or
scrape.] The art of copying works in relief.

ăn-a-g-nōr'-i-sis, s. [Gr. *anagnōrisis* = recogni-
tion; *ana* = again, and *gnōrisis* = acquaintance
(with each other); *gnōrō* = to make known.]
Recognition; the *dénouement* in a drama.

ăn-a-g-nō'-sis, s. [Gr. *anagnōsis* = a knowing
again; *ana* = again, and *gnōsis* = an inquiry, judg-
ment; *gnōnai*, infin. of *gignōskō* = to know.] Recog-
nition. The same as ANAGNORISIS (q. v.).

ăn-a-gō-gē, **ăn-a-gō-gŷ**, s. [In Fr. *anagogie*;
Sp. *anagoge*, *anagogia*; Port. & Ital. *anagogia*;
Gr. *anagōgē* = a leading up; *ana* = up, and *agōgē* = a
leading; *agō* = to lead.]

Theol.: Elevation of the mind to spiritual objects.

¶ The form *anagogy* is in Dyche's Dict. (1758).

Exegetics: The pointing out of a spiritual sense
under the literal words of portions of Scripture; the
indication of a reference to New Testament doctrine
in the prophecies, types, and symbols of the Old.
[ANAGOGICAL.]

Med.: The return of humors or the rejection of
matters upward by means of the mouth.

ăn-a-gō-gēt'-i-cal, a. [Formed as if from Gr.
anagōgētikos, from *anagōgē* (q. v.).] Pertaining
to anagoge. The same as ANAGOGICAL (q. v.).
(*Bailey*.)

ăn-a-gōg'-i-cal, a. [In Fr. *anagogique*; Gr.
anagōgikos = raising the mind to heavenly things,
mystical.] Pertaining to anagoge; mysterious,
elevated, spiritual. (Applied specially to one of the
four chief methods of interpreting Scripture, the
other three being the *literal*, the *allegorical*, and the
tropological methods.)

"Which is an *anagogical* trope or hygh speakynge of
my lorde above hys compasse."—*Bale: Yet a Course at the
Romysh Foxe*, fol. 36.

"From the former of these two have been drawn certain
senses and expositions of Scriptures, which had need be
contained within the bounds of sobriety; the one *anagogi-
cal*, and the other philosophical."—*Bacon: Advancement
of Learn.*, bk. ii.

"We cannot apply them [prophecies] to him; but by a
mystical *anagogical* explication."—*South: Serm.*, viii. 161.

ăn-a-gōg'-i-cal-ly, adv. [Eng. *anagogical*; -ly.]
Mysteriously, with spiritual exaltation; in a spirit-
ual sense.

ăn-a-gōg'-ics, ***ăn-a-gōg'-icks**, s. pl. [Gr. *ana-
gōgikos* = mystical.] The study of mystical subjects.

"The notes upon that constitution say that the Misna
Torah was composed out of the cabalistics and *anagogics*
of the Jews, or some allegorical interpretations pretended
to be derived from Moses."—*L. Addison: State of the Jews*,
p. 248.

ăn-a-grām, s. [In Sw. *anagram*; Ger. *ana-
gramm*; Fr. *anagramme*; Sp. *anagrama*; Port.
& Ital. *anagramma*. From Gr. *ana* = backward, and

gramma = that which is drawn or written, a letter;
graphō = to grave, to write.]

†1. The letters of any word read backward. Thus
in a satire on the English government under Lord
Melbourne, which appeared in a provincial Tory
paper, the political leader was described as Enruo-
blem, which was simply Melbourne spelled back-
ward.

2. The letters of any word or words transposed in
their order so as to make another word, or more
generally a short sentence. Thus the letters in the
name of *William Noy*, Attorney-General to Charles
I., who toiled hard in his vocation, become, when
transposed, *I moyl in law*. Similarly *Galen* becomes
by transposition *angel*, and *Mary*, *army*. The prac-
tice was not much in vogue among the Greeks and
Romans, but it was common among the Jewish
cabalists. Among European nations it first began
to be extensively employed in the sixteenth century.
Sometimes writers put not their own name but its
anagram on their works; thus, Calvin put not Cal-
vinus, but its anagram, Alcuinus, on the edition of
his *Institutes* published at Strasburg in 1539. In
certain cases mathematicians, who had made dis-
coveries for which they wished to claim priority
without communicating their secret, gave forth its
anagram instead of itself. This was done by Galileo,
Huyghens, and Sir Isaac Newton. Sometimes these
anagrams were intentionally so obscurely worded,
and of such a length, as to render their solution
almost impossible. Thus Galileo announced his
observations on Saturn: Smaismmilme poeta
leumi bone nugttayiras = *altissimum planetam ter-
geminum observavi* (I have observed that the most
distant planet is triple-formed). Huyghens also
announced his discovery of Saturn's ring in the fol-
lowing anagram: aaaaaaa ccccd eeeee iiiiii llll
mm nnnnnnnn oooo pp q rr s tttt uuuu = *annulo
cingitur, tenui, plano nusquam coherente, ad eclip-
ticam inclinato* (it is surrounded by a slender ring,
nowhere coherent, inclined to the ecliptic).

"Though all her parts be not in th' usual place,
She hath yet the anagrams of a good face;
If we might put the letters but one way,
In that lean dearth of words, what could we say?"

Donne's Poems, p. 70.

"Thy genius calls thee not to purchase fame
In keen iambics, but mild anagram."
Dryden: Mac Flecknoe, v. 204.

†**ăn-a-grām**, v. t. [From the substantive.] To
construct an anagram by transposing the letters of
any particular word.

ăn-a-grām-măt'-ic, **ăn-a-grām-măt'-i-cal**, a.
[From Gr. *ana*, and *grammatikos*; *anagramma* =
an anagram.] Containing an anagram.

"For whom was devised Pallas' defensive shield, with
Gorgon's head thereon, with this *anagrammatical* word."
—*Camden*.

"Some [places] have continued *anagrammatical* appel-
lations, from half their own and their wives' names joined
together."—*Swift: On Barb. Denom. in Ireland*.

ăn-a-grām-măt'-i-cal-ly, adv. [Eng. *anagram-
matical*; -ly.] After the manner of an anagram.

"Please to cast your eye *anagrammatically* upon the
name of the balsamum; you will find, 'Convenient rebus
nomina sæp suis.'"—*Gayton: Notes on Don Quix.*, iii. 3.

ăn-a-grām-măt'-ism, s. [Gr. *anagrammatis-
mos*.] The art or practice of making anagrams.

"The only quintessence that hitherto the alchymy of
wit could draw out of names is *anagrammatism*, or meta-
grammatism, which is a dissolution of a name truly
written into its letters as its elements, and a new con-
nection of it by artificial transposition, without addition,
subtraction, or change of any letter into different words,
making some perfect sense applicable to the person
named."—*Camden*.

ăn-a-grām-măt'-ist, s. [From Gr. *ana*, and
grammatistēs.] One who makes anagrams.

"To his lo. fr. Mr. W. Aubrey, an ingenious *anagram-
matist*, late turned minister."—*Garage: Epigrams*, Ep. 18.

ăn-a-grām-măt'-ize, v. t. [In Fr. *anagram-
matiser*; Port. *anagrammatisar*; Ital. *anagram-
matizzare*; Gr. *anagrammatizō*.] To make ana-
grams.

"Others suppose that by the word Sophyra, which is
Ophyr *anagrammatized*, mentioned in the seventy-two in-
terpreters, is intended or meant Soffala or Sophura."—
Sir T. Herbert: Trav., p. 350.

"Others, in Latin, *anagrammatize* it [the name of Eve]
from *Eva* into *Væ*; because, they say, she was the cause
of woe!"—*Austin: Hæc Homo*, p. 182.

ăn-a-grāph, s. [Gr. *anagraphē* = a writing up,
a record; *anagraphō* = to write up; *ana* = up, and
graphō = to write.]

1. An inventory; a register.

2. A commentary.

a-na-grōs, s. [Sp.] A Spanish measure for
grain used chiefly in Seville, and containing about
two bushels.

ăn-a-gŷ'-rīs, s. [In Port. *anagyro*; Ital. *anigi-
ride*; Lat. *anagyros*; Gr. *anagyris* and *anagyros*;
ana = backward; *gyros* = a circle.] A genus of

papilionaceous plants, one of the Cistropical Eupo-
dalyriacæ. The *A. fœtida*, a bush with trifoliate
leaves and yellow racemose flowers, has purgative
properties, and its seeds are narcotic.

ăn-ai'-mā, a. [Gr. *a* = without, and *haima* =
blood; *anaimia* = want of blood.] A zöological term
used by Aristotle, and signifying *without blood*. It
need scarcely be added that Aristotle's idea of the
bloodless character belonging to certain animals
was wholly erroneous. [ANÆMIA.]

ă'-nal, a. [From Lat. *anus* = the anus.] Per-
taining to the anus.

Ichthyol.: The *anal fin* is the fin placed on the
lower part of a fish's body, and so far behind as to
be near the anus.

"the first rays of the dorsal and anal fins."—
Griffith's Cuvier, vol. x., p. 7.

ăn-ăl'-cīte, **ăn-ăl'-cīme**, s. [In Ger. *analzim*;
Gr. *analkis* = weak; *a*, priv., and *alkē* = strength.
So called because by rubbing it becomes weakly
electric.] A mineral classed by Dana as the type of
his Analcite group. It occurs isometric, in trape-
zohedrons, and massive granular. Its hardness is
5 to 5.5, its sp. gr. 2.22 to 2.29 or 2.278, the luster vit-
reous, the color white, tinged with other hues. It
varies from transparent to opaque. It is brittle. It
consists of silica 51 to 55.12, alumina 22.23 to 24.13,
lime 0.27 to 5.82, soda 6.45 to 14.65, potassium 0.55 to
4.46, and water 7.68 to 9.75. It is found in Scotland
in the Kilpatrick and Campsie Hills, at Bowling, in
Glen Farg, on the Calton Hill near Edinburgh, and
at Kilmalcolm; in Ireland in Antrim; in the Faroe
Isles; in various other parts of Europe, as well as
in Nova Scotia, Canada, and the United States.

¶ Dana considers Picranalcime probably to be
analcite altered by the magnesian process, and
Cluthalite also to be changed analcite.

analcime carnea, s. [Lat. *carnea* = fleshy;
from *caro*, genit. *carnis* = flesh.] The old name for
SARCOLITE (q. v.).

analcite group, s. A group of minerals placed
by Dana as the third in order under the Zcolite sec-
tion of his Hydrous Silicates.

ăn-a-lēc'-tā, s. pl. [ANALECTS.]

ăn-a-lēc'-tīc, a. [From Gr. *analektikos*.] Per-
taining to analects: as, an *analectic* magazine—
i. e., one containing essays or selections.

ăn-a-lēc'ts, **ăn-a-lēc'-tā**, s. pl. [In Ger. *ana-
lekten*; Fr. *analectes*; Sp. *analectos*. From Gr.
analekta, neut. pl. of *analektos* = choice, select.]

*1. Crumbs which fall from the table; "the re-
mains or fragments taken off the table."

2. A collection of short literary productions, as
essays or jottings; "certain parts or portions se-
lected out of different authors." (*Dyche*.)

ăn-a-lēm'-mā, s. [In Ger. & Lat. *analemma*.
From Gr. *analemma* = that which is used for
repairing or supporting anything; *analambanō* =
to take up; *ana* = up, and *lambanō* = to take.]

1. *Geom.*: A projection of the sphere on the plane
of the meridian orthographically made by a
straight line and ellipses, the eye being supposed
at an infinite distance, and in the east or west
point of the horizon.

2. *Mech.*: An instrument made of brass or wood
on which the projection now mentioned is drawn,
with an horizon or cursor fitted to it, in which the
solstitial colure and all circles parallel to it will be
represented as concentric, all circles oblique to the
eye as ellipses, and all the planes of which pass
through the eye as straight lines. The *analemma*
now described is used for illustrating, at least with
an approach to accuracy, the various astronomical
problems.

ăn-a-lēp'-sis, **ăn-a-lēp-sŷ**, **ăn-a-lēp'-sī-a**, s.
[Gr. *analēpsis* = a taking up, restoration; *analam-
banō*, fut. *analēpsomai* = to take up, to restore to
health; *ana*, and *lambanō*, fut. *lēpsomai* = to take.]

1. The augmentation or nutrition of an emaciated
body; recovery of strength after disease. (*Quincey*,
&c.)

2. The name given by Johannes Anglicus and
Riverius to a kind of epilepsy which is said to pro-
ceed from disorder of the stomach. It is sometimes
used in a more extended sense for epilepsy in gen-
eral. (*Parr*.)

ăn-a-lēp'-tīc, ***ăn-a-lēp'-tīck**, a. & s. [In Fr.
analeptique; from Gr. *analēptikos*.]

1. *As adjective*: Restorative.

Analeptic tonics: In Garrod's classification of
medicines, the same as blood tonics or blood restor-
atives (q. v.).

2. *As subst.*: A medicine designed to impart tone
to the system, restoring flesh, strength, and cheer-
fulness after sickness or weakness from whatever
cause; a restorative.

ăn-ăl-gē'-sī-a, s. [Gr *an* = without, and *algos* =
pain.] Absence of pain whether in health or disease.

ăn-ăl-gē'-sīc, s. & a. [ANALGESIA.]

A. *As subst.*: A medicine that allays pain.

B. *As adj.*: Having the quality of allaying or
destroying pain.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. ph = f.
-cian, -tīan = şan. -tion, -sion = şhūn; -tīon, -şion = zhūn. -tious, -cious, -sious = şhūs. -ble, -dle, &c. = bēl, dēl.

**an-āl'-ō-gāl*, *a.* [Eng. *analog(y)*; *-al*.] The same as ANALOGOUS.

"When I see many *analogical* motions in animals, though I cannot call them voluntary, yet I see them spontaneous, I have reason to conclude that these in their principle are not simply mechanical."—*Hale*.

an-a-lōg'-i-cal, *a.* [In Fr. *analogique*; Sp., Port., & Ital., *analogico*; Lat. *analogicus*; Gr. *analogikos*=proportional, analogous.]

*1. Analogous.

"There is placed the minerals between the inanimate and vegetable province, participating something *analogical* to either."—*Hale: Origin of Mankind*.

¶ Dr. Johnson draws the following distinction between the words *analogous* and *analogical*: "*Analogous* signifies having relation, and *analogical* having the quality of representing relation."

2. *Logic and Ordinary Lang.*: Pertaining to analogy; pertaining to resemblances of any kind, on which may be founded reasoning falling short of the conclusiveness possessed by induction. [ANALOGY, INDUCTION.]

"The cases in which *analogical* evidence affords in itself any very high degree of probability are, as we have just observed, only those in which the resemblance is very close and extensive."—*John Stuart Mill: Logic*, 2d ed. (1846), vol. ii., ch. xx., p. 105.

3. *Biol.*: Pertaining to two animals, two plants, or even an animal and a plant, which in certain respects resemble each other; the similarity, however, being one of analogy only, and not of affinity. [ANALOGY, AFFINITY.]

"All *analogical* resemblances, as of a whale to a fish."—*Darwin: Descent of Man*, vol. i., pt. i., ch. vii., p. 230.

an-a-lōg'-i-cal-lŷ, *adv.* [Eng. *analogical*; *-ly*.] In an *analogical* manner.

"... we are often obliged to use these words *analogically* to express other powers of the mind which are of a very different nature."—*Reid: Inquiry into the Human Mind*, c. 7.

an-a-lōg'-i-cal-nēss, *s.* [Eng. *analogical*; *-ness*.] The quality of being *analogical*; fitness to be applied for the illustration of some analogy.

**an-āl'-ōg'-ie*, *s.* [ANALOGY.]

an-āl'-ōg'-i-sm, *s.* [In Ger. *analogism*; Fr. *analogisme*; Port. *analogismo*. From Gr. *analogismos*=fresh calculation, reconsideration, a course or line of reasoning, proportionate calculation; from *analogizomai*=to count up again: *ana*=again, and *logizomai*=to count.]

1. An argument from the cause to the effect.

2. Investigation of things by the analogy which they bear to each other.

an-āl'-ōg'-ist, *s.* [Eng. *analog(y)*; *-ist*.] One who reasons from analogy.

an-āl'-ōg'-ize, *v. t.* [Eng. *analog(y)*; *-ize*. Gr. *analogizomai*.] [ANALOGISM.] To reason from analogy; to explain by means of analogy.

"We have systems of material bodies diversely figured and situated, if separately considered; they represent the object of the desire which is *analogized* by attraction or gravitation."—*Cheyne: On Regimen; Natural Analogy*, § 8.

an-āl'-ōg'-i-zed, *pa. par.* [ANALOGIZE.]

an-āl'-ō-gōn, *s.* [Neut. of Gr. adj. *analogos*=proportionate, analogous to.] That which is *analogous* to something else.

an-āl'-ōg'-ōus, *a.* [In Sp., Port., & Ital. *analogo*; Lat. *analogus*; Gr. *analogos*=proportionate to.]

1. *Logic & Ord. Lang.*: Presenting some analogy or resemblance to; parallel to in some respect; similar, like.

"The language is *analogous*, wherever a thing, power, or principle in a higher dignity is expressed by the same thing, power, or principle in a lower but more known form."—*Coleridge: Aids to Reflection* (1839), p. 149.

"... the artificial instruments which we ourselves plan with foresight and calculation for *analogous* uses."—*Owen: Classif. of the Mammalia*, p. 62.

¶ It is followed by *to* of the thing to which the resemblance is perceived.

"... that the particular parts principally objected against in this whole dispensation are *analogous* to what is experienced in the constitution and course of Nature or Providence."—*Butler: Analogy*, Introd.

2. *Grammar*: Nouns are sometimes divided into *univocal*, *equivocal* and *analogous*. (*Whately: Logic*, bk. ii., ch. v., § 1.)

3. *Pyro-electricity*. *Analogous pole* is the name given to the end of a crystal which shows positive electricity when the temperature is rising. It is opposed to *antilogous pole* (q. v.). (*Atkinson: Ganot's Physics*, § 637.)

4. *Biology*:

(a) Having a relation of analogy, but not one of affinity.

"The pigeons in one order [the *Rasores*], and the *Edentates* in the other [the *Ungulata*], follow next; let us therefore see how far these groups are *analogous*."—*Swainson: Birds*, vol. iii. (1837), p. 160.

(b) Having a relation of analogy combined with one of affinity.

"The two owls, the two tyrant fly-catchers (*Pyrocephalus*), and the dove, are also smaller than the *analogous* but distinct species."—*Darwin: Voyage round the World*, ch. xvii.

Analogous variation: Variations of a similar character in different species, genera, &c.

"Many of these resemblances are more probably due to *analogous* variation, which follows, as I have elsewhere attempted to show, from co-descended organisms having a similar constitution, and having been acted on by similar causes inducing variability."—*Darwin: Descent of Man*, vol. i., pt. i., ch. vi., p. 194.

an-āl'-ōg'-ōus-lŷ, *adv.* [Eng. *analogous*; *-ly*.] In an *analogous* manner.

"Can you, then, demonstrate from his unity, or omnipresence, which you conceive but *analogously* and imperfectly."—*Skelton: Deism Rev.*, Dial. 6.

"... the same word may be employed either univocally, equivocally, or *analogously*."—*Whately: Logic*, bk. ii., ch. v., § 1.

an-āl'-lōgue, *s.* [Fr. *analogue*=analogous; Gr. *analogos*=proportionate to; *ana*=up to; *logos*=reason. According to reason; analogous to.] That which resembles something else in one or more respects.

Specially:

1. *Philol.*: A word in one language corresponding to a word in another.

"S. (Sanskrit) *ap*, water, the *analogue* of the Latin *aqua*."—*Key: Philological Essays* (1868), p. 258.

2. *Biol.*: A part of an animal or plant which has the same function as another part in a second animal or plant differently organized. [HOMOLOGUE.]

3. *Geol.*: Any body which corresponds with, or bears great resemblance to, another body. (Especially used by geologists in comparing fossil remains with living specimens.)

"... the great abundance in the oolitic ocean of fishes, whose nearest living *analogue* is the Port Jackson shark (*Cestracion*)."—*Owen: British Fossil Mammals and Birds* (1846), p. xiv.

an-āl'-ōg'-ŷ, **an-āl'-ōg'-ie*, *s.* [In Sw. & Dan. *analogia*; Ger. & Fr. *analogie*; Sp., Port., Ital. & Lat. *analogia*; all from Gr. *analogia*=(1) equality of ratios, proportion; (2) analogy; *ana*, and *logos*... =a ratio, &c.; *legō*=to count.]

A. *Ord. Lang.*: Similitude of relations between one thing and other (see B., *Logic*, No. 1), or such resemblances as are described under *Logic*, No. 2. (The thing to which the other is compared is preceded by *to* or *with*.)

"The *Analogy* of Religion, Natural and Revealed, to the Constitution and Course of Nature. By Joseph Butler, LL.D., late Lord Bishop of Durham."

¶ When both are mentioned together they are connected by the word *between*.

"... if a real *analogy* between the vegetable world and the intellectual and moral system were presumed to exist."—*Isaac Taylor: Elements of Thought*, 8th ed. (1846), p. 31.

B. *Technically*:

I. *Logic*:

1. Resemblance of relations, a meaning given to the word first by the mathematicians, and adopted by Ferguson, Whately, and, as one of various senses, by John Stuart Mill. To call a country which has sent out various colonies, the mother country, implies that there is an analogy between the relation in which it stands to its colonies and that which a mother holds to her children. (See B., II., *Math*.)

2. *More usually*: Resemblance of any kind on which an argument falling short of induction may be founded. Under this meaning the element of relation is not specially distinguished from others. "Analogical reasoning, in this second sense, may be reduced to the following formula: Two things resemble each other in one or more respects; a certain proposition is true of the one, therefore it is true of the other." If an invariable conjunction is made out between a property in the one case and a property in the other, the argument rises above analogy, and becomes an induction on a limited basis; but if no such conjunction has been made out, then the argument is one of analogy merely. According to the number of qualities in one body which agree with those in another, may it be reasoned with confidence that the as yet unexamined qualities of the two bodies will also be found to correspond. (Mill's *Logic*, pp. 98-107.) Metaphor and allegory address the imagination, while analogy appeals to the reason. The former are founded on similarity of appearances, of effects, or of incidental circumstances; the latter is built up on more essential resemblances, which afford a proper basis for reasoning.

II. *Math.*: Proportion; the similitude of ratios. (Euclid, Bk. V., Def. 8.)

III. *Grammar*: Conformity with the structure or the genus of a language.

IV. *Biol.*: The relation between parts which agree in function, as the wing of a bird and that of a butterfly, the tail of a whale and that of a fish. (Huxley's *Classif. of Animals*, 1869, Gloss.) Relations of analogy were made very prominent in the system of the now extinct Quinary school of zoologists. They are to be carefully distinguished from those of affinity. [AFFINITY.]

"... the *analogy* of the hawk to the shrike, or eagle to the lion."—*Swainson: Classif. of Birds*, i. 345.

"The *analogy* between the swan and the ostrich is one degree, that between the ostrich and the giraffe is another, while the *analogy* between the bee and the weaving birds (*Ploceanæ*) is another."—*Ibid*.

an-a-lŷ-ŷ-a-ble, *a.* [ANALYZABLE.]

an-a-lŷ-ŷe, *v. t.* [ANALYZE.]

an-a-lŷ-ŷ-ēr, *s.* [ANALYZER.]

an-āl'-ŷs-is, *s.* [In Sw. *analys*; Dan. *analysis*; Ger. *analyse* (*Logic*), *analysis* (*Math*); Fr. & Port. *analyse*; Sp. *analisis*; Ital. *analisi*. From Gr. *analysis*=(1) a loosing, releasing; (2) a dissolving, the resolution of a whole into its parts, *analysis* opposed to *genesis* or *synthesis*; in *Logic*, the reduction of the imperfect figures into the perfect one; (3) the solution of a problem, &c.: *analyō*=to unloose: *ana*=backward, and *lyō*=to loose.]

A. *Ordinary Language*:

1. *Gen.*: The act of analyzing; the state of being analyzed; the result of such investigation. The separation of anything physical, mental, or a mere conception into its constituent elements. (A scientific word which has partially established itself in ordinary speech.) [ANALYZE, *s.*]

"We cannot know any thing of nature, but by an *analysis* of its true initial causes; till we know the first springs of natural motions, we are still but ignorants."—*Glanville*.

Used specially—

(1) In some of the senses given under B. (q. v.).

"... but the subsequent translation of the shock of the æthereal waves into consciousness eludes the *analysis* of science."—*Tyndall: Frag. of Science* (3d ed.), viii., p. 177.

(2) A syllabus, conspectus, or exhibition of the heads of a discourse; a synopsis, a brief abstract of a subject to enable a reader more readily to comprehend it when it is treated at length.

B. *Technically*:

I. *Math.*: The term *analysis*, signifying an unloosing, as contradistinguished from *synthesis*=a putting together, was first employed by the old Greek geometers to characterize one of the two processes of investigation which they pursued. The *Analytical Method* of inquiry has been defined as the art or method of finding out the truth of a proposition by first supposing the thing done, and then reasoning back step by step till one arrives at some admitted truth. It is called also the *Method of Invention or Resolution*. Analysis in Mathematics may be exercised on finite or infinite magnitudes or numbers. The analysis of finite quantities is the same as *Specious arithmetic* or *algebra*. That of infinites, called also the *new analysis*, is particularly used in fluxions or the differential calculus. But analysis could be employed also in geometry, though Euclid preferred to make his immortal work synthetic; it is therefore a departure from correct language to use the word *analysis*, as many do, as the antithesis of geometry; it is opposed, as already mentioned, to synthesis, and to that alone.

"Calculations of this nature require a very high *analysis* for their successful performance, such as is far beyond the scope and object of this work to attempt."—*Herschel: Astron.*, 5th ed. (1855), § 604.

II. *Chem.*: The examination of bodies with the view of ascertaining of what substances they are composed, and in what proportion these substances are contained in them. The former is called *qualitative* and the latter *quantitative* analysis.

"The following method may be adopted for this kind of *quantitative analysis*."—*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 308.

Chemical analysis is classified into *Blowpipe*, *Qualitative*, *Gravimetric*, and *Volumetric* analysis; and the *Proximate* and the *Ultimate* analysis of organic bodies.

1. *Blowpipe analysis*: The substances examined by the blowpipe are (1) heated alone on charcoal; (2) heated on a platinum wire with borax (q. v.); (3) with microcosmic salt, NaH.(NH₄)PO₄+4H₂O; (4) with sodium carbonate; (5) on a piece of charcoal which has been moistened with a few drops of nitrate of cobalt; (6) fused with potassium nitrate. The reactions are given under the respective metals (q. v.).

2. *Qualitative analysis* is employed to find out the composition and properties of any unknown substance, and to separate different substances from each other. It is performed in the following manner: The substance is dissolved in distilled water; if not soluble in water, then in hydrochloric acid or

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pine, pît, sîre, sîr, marîne; gô, pôť, or, wôre, wôlf, wôrċ, whô, sôn; mûte, cûb, cûre, unite, cûr, râle, fûll; trŷ, Sŷrian. æ, œ = ē; œy = â. qu = kw.

in aquaregia; if insoluble in these, it is fused with sodium carbonate. The commoner bases and acids contained in the solution are tested for as follows: Add hydrochloric acid. A white precipitate is either AgCl (argentic chloride), Hg₂Cl₂ (mercurous chloride), or PbCl₂ (plumbic chloride).

Filter; pass H₂S (sulphuretted hydrogen gas) through the filtrate. A black precipitate is either PbS (plumbic sulphide), CuS (cupric sulphide), HgS (mercuric sulphide), or Bi₂S₃ (sulphide of bismuth). A yellow precipitate is either CdS (cadmium sulphide), As₂S₃ or As₂S₅ (sulphides of arsenic), or SnS₂ (stannic sulphide). A brown precipitate is SnS (stannous sulphide). A white precipitate is Sb₂S₃ (antimonious sulphide).

Filter; boil the filtrate to expel H₂S, add a few drops of nitric acid, and boil to oxidize the iron; then add chloride of ammonium and ammonia. A red precipitate is Fe₂O₃ (ferric oxide). A bluish-green precipitate is Cr₂O₃ (chromic oxide). A white precipitate is Al₂O₃ (aluminic oxide), or phosphates, borates, and oxalates.

Filter; to the filtrate add sulphide of ammonium. A black precipitate is either CoS (sulphide of cobalt), or NiS (sulphide of nickel). A pink precipitate turning brown is MnS (sulphide of manganese). A white precipitate is ZnS (sulphide of zinc).

Filter; to the filtrate add ammonium carbonate. A white precipitate is either BaCO₃, SrCO₃, or CaCO₃ (carbonates of barium, strontium, or calcium).

Filter; divide the filtrate into two parts. To one part add Na₂HPO₄ (sodium phosphate). A white precipitate is Mg(NH₄)PO₄·6H₂O, indicating the presence of magnesia. The other part is evaporated to dryness, heated strongly to drive off the ammoniacal salts, and if there is a residue it is tested for potash and soda.

Ammoniacal salts are tested for in the original solution by adding caustic potash, which liberates ammonia, NH₃, which is recognized by its smell, and by its turning red litmus paper blue.

The sulphides of arsenic, antimony and tin are soluble in sulphide of ammonium, and are re-precipitated by HCl.

The tests for the other rarer metals and acids, and the confirmatory tests for the above, are given under their respective names (q. v.).

Acids may be tested for as follows: Carbonic, hydrosulphuric, hydrocyanic acids are liberated by stronger acids with effervescence. Carbonic, arsenious, arsenic, chromic, boracic, phosphoric, oxalic, hydrofluoric, and silicic acids give from a neutral solution a white precipitate, with BaCl₂ (barium chloride), which dissolves in hydrochloric acid; but sulphuric acid gives a white precipitate insoluble in acids.

Tartaric and citric acids are recognized by the precipitate charring when heated, and emitting fumes of peculiar odor.

Chloride of calcium, with phosphoric and boracic acids, gives a white precipitate, which is soluble in acetic acid; also with oxalic and hydrofluoric acids, a white precipitate, insoluble in acetic acid.

Nitrate of silver (AgNO₃) gives a black precipitate with hydrosulphuric acid; a yellow precipitate with arsenious, phosphoric, and silicic acid; a red precipitate with chromic and arsenic acid, and a white precipitate with boracic and oxalic acids. All these precipitates are soluble in nitric acid.

Nitrate of silver (AgNO₃) gives a precipitate insoluble in nitric acid with hydrochloric, hydrocyanic, hydrobromic, and hydriodic acids.

Ferric chloride (Fe₂Cl₆) gives a red color with acetic acid and sulphocyanic acid; a black precipitate with gallic and tannic acids; a blue precipitate with ferrocyanides.

Nitric acid (HNO₃) and chloric acid (HClO₃) are not precipitated by any reagent. Their salts deflagrate on ignited charcoal.

For confirmatory tests for acids, see under their respective names.

3. *Gravimetric analysis*, or quantitative analysis by weight, is the method of separating out of a weighed quantity of a compound its constituents, either in a pure state or in the form of some new substance of known composition, and accurately weighing the products; from the results of these operations the percentage of the constituents contained in the substance can be determined.

4. *Volumetric analysis*, or quantitative analysis by measure, determines the amount of the constituents contained in a given solution by—

(a) Neutralization of a measured quantity of the liquid by a certain volume of a standard solution of acid or alkali.

(b) By the quantity of a standard solution of an oxidizing or reducing agent required to oxidize or reduce a measured quantity of the liquid to be tested.

(c) By observing when no further precipitation takes place on adding the standard solution of the reagent to a known volume of the liquid to be tested.

5. By *proximate analysis* we determine the amount of sugar, fat, resin, alkaloid, &c., contained

in an organic compound, each of these being removed and separated by different solvents, &c.

6. By *ultimate analysis* of an organic substance we determine the percentage of carbon, hydrogen, oxygen, nitrogen, sulphur, and phosphorus contained in it. Thus the amount of carbon and hydrogen is determined by burning a weighed quantity of the substance in a combustion tube along with oxide of copper, and collecting the water produced in a weighed U tube filled with chloride of calcium, and the carbonic acid gas in weighed bulbs filled with caustic potash.

III. *Other sciences, Logic, Metaphysics, Philology, &c.*: The separation of anything which becomes the object of scientific inquiry into its constituent elements; also the result thus obtained.

*ǎn-ām'-āyl, v. t. [ENAMEL.]

An'-a-mēse, s. A native of Anam, a kingdom in Southeastern Asia.

ǎn-ā-mīrt'-a, s. A genus of plants belonging to the order Menispermaceæ, or Menispermads. The *A. cocculus* produces the seed called *Cocculus Indicus*, which is poisonous, but yields a fatty oil on being crushed. (Lindley: *Veg. Kingd.*, p. 309.)

ǎn-ām-nē'-sis, s. [Gr. *anamnēsis*=recollection, from *anamimnēskō*=to remind one of anything; *ana*=again, and *mimnēskō*=to remind.]

Rhet.: A figure calling to mind anything which has been forgotten.

ǎn-ām-nēst'-ic, a. & s. [Gr. *anamnēstikos*=able to recall to mind.]

1. As adj.: Pertaining to anamnesis; acting as a remembrancer.

2. As substantive: A medicine believed to restore the memory.

ǎn-ām-ni-ō'-tā, s. The group of vertebrates in which the fetus is without an amnion.

ǎn-ā-mōrph'-ism, s. [From Gr. *anamorphōsis*=forming anew.] In zoology: progression from a lower type to a higher one.

ǎn-ā-mōrph-ō'-sis, ǎn-ā-mōrph'-ō-sý, s. [In Ger., Fr., & Port. *anamorphose*. From Gr. *anamorphōsis*=a forming anew; *ana*=again, and *morphōsis*=(1) shaping, molding; (2) from *morphōō*=to give form to; *morphē*=form.]

Perspective: A projection of any object in such a way, that if looked at from one point of view it will appear deformed; while from another it is properly proportioned. Sometimes the object is so projected that to the naked eye it appears deformed, while a mirror of a particular shape will at once present it in its proper aspect.

ǎn-āmp'-sis, s. [Altered from Gr. *anakampsis*=a turning round or back; return.] A genus of fishes of the family Labridæ (Wrasses). They are from the Indian Ocean.

¶ Cuvier, &c., spell this word *anampses*.

ǎn-ā'-nā, ǎn-ā'-nās, ǎn-ā-nās'-sā, s. [In Dan., Ger., Fr., Sp., & Ital. *ananas*; Port. *ananas* or *ananas*. From *manas*, the Guiana name.]

1. Ord. Lang. (Of the forms *anana*, *ananas*, and *anassa*). The pine-apple.

1. The pine-apple.

"Witness, thou best *anāna*, thou, the pride
Of vegetable life, beyond what'er
The poets imag'd in the golden age."

Thomson: *Seasons*, Summer.

2. A fruit of the same family—the *Bromelia Pinquin*, called in the West Indies *Penguin*; bnt, of course, not to be confounded with the well-known bird of the same name.

II. *Technically*. (Of the form *anassa* only.)

Botany: A genus of Bromeliaceæ (Bromel-worts), to which the pine-apple, *A. sativa*, belongs. [PINE-APPLE.]

ǎn-ān-chý'-tēs, s. [From Gr. *a*, priv.; *angchō*=to press tight, to strangle. "Not pressed." (Owen.)] A genus of Echinoderms occurring in Cretaceous strata.

ǎn-ān'-drī-a, s. [See ANANDROUS.] A genus of plants belonging to the order Asteraceæ (Compositæ). The *A. discoidea* has mucilaginous and other leaves.

ǎn-ān'-drōus, a. [Gr. *anandros*=without a husband; *anēr*, genit. *andros*=a man, . . . a husband.]

Bot.: Pertaining to a flower which is destitute of

Anandrous Flowers.

1. Mulberry. 2. Common Birch. 3. Bulrush.
4. Hop. 5. Bottle Sedge.

stamens; as are the females of all monœcious and diœcious plants; for example, the willows.

***an-āng-ēr**, *v. t.* [ANGER.] To anger, to incense.

"... and when the emperoure herde this, he was greatly amoued and sore *anangered*."—*Virgilius* (ed. Thom).

ān-āng'-u-lar, *a.* [Gr. *an*, priv., and Eng. *angular* (q. v.).] Not angular.

***an-ān'-tres**, *conj.* [ENAUNTER.]

ān'-a-pāst, **ān'-a-pēst**, *s.* [In Ger. *anapäst*; Fr. *anapest*; Sp. & Port. *anapesto*; Lat. *anapæstus*. From Gr. *anapaistos*, as substantive=*anapæst*; as adj.=struck back; *anapaio*=to strike again or back; *ana*=again; *paio*=to strike.]

Prosody: A foot consisting of three syllables: the first two short, and the third long. It may, from one point of view, be considered the reverse of a dactyl, which has the first syllable long, and the second and third short. In Latin, *Hēlēnē* is an anapest. In English it is difficult to find single words, each constituting an anapest; the tendency in our language being to pronounce trisyllables as dactyls. *Overflow* and various other words beginning with *over* may be made anapests; thus *ō | vēr | flōw*, *ō | vēr | rēach*, though they might also be made amphimacers, *ō | vēr | flōw*, *ō | vēr | rēach*. The following is an anapestic line:

Tō yōūr hōmes | cried thē lēa | dēr of Īs | rā-ēl's hōst.

"An anapest is all their music's song,
Whose first two feet are short, and third is long."

Sir J. Davies: Orchestra, st. 70.

ān-a-pās'-tic, **ān-a-pēs'-tic**, ***ān-a-pēs'-tick**, *a. & s.* [In Fr. *anapestique*; Lat. *anapæsticus*; Gr. *anapaistikos*.]

1. *As adjective*: Pertaining to an anapest.

Anapestic verse: A verse consisting mainly of anapests. [ANAPÆST.]

"... our common burlesque Alexandrine or anapestic verse."—*Percy on the Met. of P. Plowman's Visions*.

2. *As substantive*: An anapestic line or verse.

"... several seeming examples, where an anapestic is terminated with a trochee, or a tribrachys, or a cretic."—*Bentley: Phal. III*.

ān-a-pāst'-ī-cal, **ān-a-pēs'-tic-al**, *a.* [Eng. *anapestic*, *anapestic*; -al.] The same as ANAPÆSTIC, *adj.*

ān-a-pāst'-ī-cal-lŷ, **ān-a-pēs'-ī-cal-lŷ**, *adv.* [Eng. *anapestical*, *anapestical*; -ly.] After the manner of an anapest, or an anapestic verse. (*Christian Observer*.)

an-āph-ōr-a, *s.* [In Ger. *anapher*; Fr. *anaphore*; Port. & Lat. *anaphora*. From Gr. *anaphora*=a bringing up, a raising; *anapherō*=to bring or carry up; *ana*=up, and *pherō*=to carry.]

Rhetoric: The commencement of successive sentences or of successive verses with the same word or words, as—

Where is the wise? Where is the scribe?

Where is the disputer of this world?

ān-āph-rōd'-ī-ā, *s.* [Gr. *anaphrodisia*: *an*, priv., and *aphrodisia*, neut. pl. of *aphrodisios*=belonging to venery; *Aphroditē*=Venus.] Sexual impotence.

ān-āph-rō-dī-āc, *s.* [Eng. *anaphrodisi(a)*; -ac.]

Pharm.: A medicine intended to diminish sexual feeling. Garrod divides remedies of this kind into direct and indirect: the former acting as sedatives on the spinal cord; the latter lowering the tone of the general system.

ān'-a-plās-tŷ, *s.* [Gr. *anaplastos*=that may be formed again.]

Surg.: Tissue-grafting, or reparation of superficial lesions by transplanting healthy living tissue to the ruptured parts, as a portion of skin to a denuded surface. Also called skin-grafting. [GRAFTING, 4 *Surg.*]

ān-a-plēr-ōt'-ic, ***ān-a-plēr-ōt'-ick**, *a. & s.* [Lat. *anapleroticus*; Gr. *anaplēroōsis*=a filling up; *anaplēroō*=to fill up: *ana*=up, and *plēroō*=to fill; *plērōs*=full.]

1. *As adjective*: Which fills up; especially used of "filling up" flesh in an emaciated body.

"Anaplerotic medicines are such as fill up ulcers with flesh."—*Glossographia Nova*.

2. *As substantive*: A medicine fitted to "fill up" flesh in an emaciated body.

ān-āp-ō-phŷs'-is, *s.* [Gr. *an*, priv.=not, and *apophysis*=(1) an offshoot; (2) *Anat.*, the process of a bone; the prominence to which a tendon is attached.]

Anat.: A process connected with the neural arch, which projects more or less backward, and is generally rather slender or styliform.

ān'-arch, *s.* [Gr. *anarchos*, adj.=without head or chief.] One who is the author of anarchy. One who plots or effects the overthrow of legitimate government.

ān-arch'-ic, ***ān-arch'-ick**, **ān-arch'-ī-cal**, *a.* [Eng. *anarch*, -ic; *anarchic*, -al. In Fr. *anarchique*;

Sp. *anarquico*; Port. *anarchico*, *anarquico*; Ital. *anarchico*.] Pertaining to anarchy, tending to subvert legitimate government.

ān'-arch-ism, *s.* [Eng. *anarch*; -ism.] Anarchy.

ān'-arch-ist, *s.* [As if from Gr. *anarchistēs*.] One who aims at or succeeds in producing anarchy.

The principal tenet of modern anarchists is that "everything is everybody's." They hold that the entire wealth of the community exists for each individual, to take from it what he requires. With this doctrine of the right of free appropriation, is combined a hatred of the propertied classes. They hope to accomplish a social revolution by means of dynamite bombs, which they dignify by the name of "scientific warfare." The number and frequency of outrages by anarchists upon life and property have led several of the European governments to adopt severe repressive measures. [SOCIALISM (2).]

Selections made by Judge Joseph E. Gary, the trial judge in the famous anarchist case in Chicago, from the record of the appeal of the anarchist, Spies vs. the People, 122d Illinois Reports, 1.

"Before you lies this blissful Eden. The road to it leads over the smoking ruins of the old world. Your passport to it is that banner which calls to you in flaming letters the word 'Anarchy.'"—From the *Arbeiter-Zeitung*, a paper edited by Spies and Schwab, May 7, 1885.

"One man armed with a dynamite bomb is equal to one regiment of militia, when it is used at the right time and place. Anarchists are of the opinion that the bayonet and galling gun will cut but a sorry figure in the social revolution. The whole method of warfare has been revolutionized by latter-day discoveries of science, and the American people will avail themselves of its advantages in the conflict of upstarts and contemptible braggarts who expect to continue their rascality under the plea of preserving law and order."—From the *Alarm*, a paper edited by Albert R. Parsons, October 18, 1884.

ān-ar-chis'-tic, *a.* [Eng. *anarchist*; -ic.] Pertaining to, or having the characteristics of, anarchy.

ān'-ar-chize, *v. t.* [Eng. *anarch*(y); -ize.] To reduce to a state of anarchy.

ān'-arch-ŷ, *s.* [Eng. *anarch*, -y; Sw. & Dan. *anarki*; Ger. & Fr. *anarchie*; Sp. *anarquia*; Port. *anarchia*, *anarquia*; Ital. *anarchia*. From Gr. *anarchia*, *anarchos*=without a head or chief; *an*, priv., and *archos*=leader; *archē*=a sovereignty.]

Lit.: Absence of government, and consequent disorder, as when "there was no king in Israel, but every man did that which was right in his own eyes" (Judges xvii. 6).

2. *Poet.*: Disorder in nature.

ā-nar'-cō-tin, **ān-ar'-cō-tine**, *s.* Gr. *a*, priv., and *narcotikos*=narcotic.] Narcotine, so named from its lack of narcotic power.

ān-ār'-ē-ta, *s.* [Gr. *anaires*=destroyer.]

Astrol.: the planet that determines the time of death in a nativity.

ān-a-rhŷn'-chŷs, *s.* [Gr. *ana*=up, and *ryngchos*=a beak, a bill.] A genus of plovers found in New Zealand. There is but one species, *Afrontalis*. It differs from the ordinary plover only in its bill, which is bent sidewise and upwards.

ān-ar-na-čī-næ, *s.* [Eng. *anarnacus*; -inæ.] A sub-family of the *Ziphiinæ*, containing the species included in the genus *Hyperoodon* (q. v.).

ān-ar'-na-cŷs, *s.* [Eskimo *anarnak*=the bottle-nose whale.] A genus of ziphioid cetaceans; the same as *Hyperoodon* (q. v.).

ān-ar-rhē'-a, *s.* [Gr. *ana*=up, and *rheo*=to flow.] *Pathol.*: Afflux to an upper part, as blood to the head.

ān-ar-rhēx'-is, *s.* [Gr. *anarrhēxis*=a breaking up.] *Surg.*:

1. The refracture of a bone.

2. The breaking out again of a checked hemorrhage.

ān-ar'-rīch-as, *s.* [Gr. *anarrhichaomai*=to scramble up.] A genus of fishes of the order Acanthopterygii, and family Gobiidae. It contains the *A. lupus*, found in Europe and in North America, distinguished by the possession of large teeth and very powerful jaws, called in America, Cat-fish, Sea-wolf, Stone-biter, and Swine-fish; in England, the Wolf-fish; in Scotland, the Sea-wolf or Sea-cat; and in the Orkneys, the Swine-fish.

ān-ar'-thrī-a, *s.* [Gr. *an*, priv., and *arthron*=a joint.]

1. Without joints; *anarthrous*.

2. Partial loss of the power of articulation. [ALALIA.]

ān-ar-th-roŷs, *a.* [Gr. *anarthros*=without joints; *an*, priv., *arthron*=a joint, . . . the article; *arariskō*=to join.] It is the reduplicated form of *arō*, which occurs only as a root.

1. *Entom.*: Without joints.

2. *Grammar*: Without the article.

ā-nās, *s.* [Lat. *anas*, genit. *anātis*=a duck.] The typical genus of the Anatidae, a family of wading birds, and of the Anatinae, one of its sub-families. It contains the most characteristic of the ducks.

ān-a-sar'-ca, *s.* [In Fr. *anasarque*; Port. *anasarca*; Gr. *ana*=up, and *sarx*, genit. *sarkos*=flesh.]

Med.: A disease characterized by a dropsical effusion of serum into the cellular tissue. It may be acute or chronic, local or general. The dropsical effusion which often appears in children after scarlatina, and that which after heart disease in old age creeps up from the lower limbs till it terminates life, with other dropsical effusions, are all ranked under anasarca. Anasarca may either generally or locally attend upon organic disease of any part of the body.

"... that dropsical effusion which is commonly called *Anasarca*."—*Todd & Bowman: Phys. Anat.*, i. 53.

ān-a-sar'-cōŷs, *a.* [Eng. *anasarca*; -ous.] Pertaining to anasarca.

ān-a-seis'-mic, *a.* [Gr. *ana*=up, and *seismos*=an earthquake.] Moving upward: said of an earthquake.

ān-a-stāl'-tic, *a.* [Gr. *anastaltikos*=fitted for checking; *anastellō*=(1) to send or raise up; (2) to draw back, to restrain; *ana*=again, and *stellō*=to set in order, to send.]

Old Med.: Astringent.

ān-ās'-ta-sis, *s.* [Gr. *anastasis*=(1) a making to stand up, (2) a removal, (3) a or the resurrection; *anistēmi*=to make to stand up, to raise from sleep or from death; *ana*=up or again; and *histēmi*=to cause to stand, to raise.]

*1. *Old Med.*: Hippocrates used the word in various senses, as for (a) a migration of humors, and (b) a rising up or recovery from sickness.

2. *Theol.*: The resurrection. In the Greek of Matt. xxii. 23 and many other parts of the New Testament. Anastasis was the title chosen for works on the Resurrection of Christ from the dead, by many writers of the seventeenth century.

ān-a-stāt'-ic, *a.* [Gr. *anastatos*.] Pertaining to the raising up of any person or thing.

anastatic printing, *s.* A method of zincography invented by Wood in 1841, designed to reproduce drawings, engravings, printed matter, &c., whether recent or old. If, for instance, it be sought to obtain the *fac-simile* of an old newspaper, the paper is first wetted with dilute phosphoric acid, and then placed between sheets of blotting paper to remove the superfluous moisture. It is then found that the acid has corroded the blanks, but has not affected the printed letters. The sheet is next placed in contact with a plate, and pressure applied, which makes a *fac-simile* of the letters in reverse order on the plate. Gum is next applied, and more ink, then a little acid, and finally again ink, when the printing stands out as clear and distinct as in the original.

ān-a-stāt'-ī-ca, *s.* [Gr. *anastatos*=made to stand up; from *anastasis* (q. v.).] A genus of plants belonging to the order Brassicaceæ, or Crucifers. The *A. hierochientina* is the celebrated "Rose of Jericho." It is an annual, inhabiting the Egyptian desert. It is so highly hygrometric that when fully developed it contracts its rigid branches so as to constitute a ball. Exposed then to the action of the wind, it is driven hither and thither. If, however, it be brought in contact with water, the ball-form vanishes, and the branches again acquire their natural expansion. Superstitious tales about this so-called rose are afloat in the East. It is said to have first bloomed on Christmas Eve, and continued in flower until Easter; at its birth heralding the advent of the Redeemer, and immediately before its departure honoring His resurrection. Plants of this kind are sold in the florists' stores in America about Easter time. They appear to be dead, but placed in water they revive. They are sold as "Resurrection plants."

ān-a-stōm-āt'-ic, *a. & s.* [Gr. *ana*=through, and *stoma*=the mouth.]

1. *As adjective*: Having the quality of opening vessels, or of removing obstructions.

2. *As substantive*: A medicine having the quality of opening the mouths of the vessels of the body and removing obstructions. Examples: deobstruents, cathartics, and sudorifics.

ān-a-stōm-ō-se, **ān-a-stōm-ī-ze**, *v. i.* [In French *anastomoser*; Port. *anastomosarse*. From Gr. *anastomōō*=to furnish with a mouth: *ana*=throughout, and *stomōō*=to stop the mouth of; *stoma*=mouth.]

Nat. Science: To blend together mouth to mouth. (Used of vessels or cells which, retaining their distinction throughout a great part of their extent, still either really or apparently blend together at their mouths; to inosculate.)

"Anastomosing (*anastomozans*): the ramifications of anything which are united at the points where they come in contact are said to *anastomose*. The term is confined to veins."—*Lindley: Introd. to Bot.*, p. 466.

"The capillaries are very fine, their moshos large, and they *anastomose* throughout."—*Todd & Bowman: Physiol. Anat.*, vol. ii. (1856), p. 274.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

ăn-a-stôm-ôş'-ing, *pr. par. & a.* [ANASTOMOSE.]

"... the branching or anastomosing character of its fibrillæ."—*Todd & Bowman: Physiol. Anat.*, i. 74.

"... the length of the transverse anastomosing capillaries."—*Ibid.*, vol. i., p. 166.

ăn-a-stôm-ô'-sis, ăn-a-stôm-ô'-şy, *s.* [In Fr. & Port. *anastomose*; Gr. *anastomōsis*=an opening, an outlet, a discharge.] [ANASTOMOSE.]

1. A uniting by the mouths of vessels distinct during the greater part of their course. (Used especially of the veins and arteries in the human or animal body, and of the veins in plants.)

"One of the most simple of these anastomoses is found in the union of two arteries, originating from different trunks to form one."—*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 323.

2. *More loosely*: To appear to unite without actually doing so.

"The anastomosis of nerves thus formed differs from the more correctly named *anastomosis* of blood-vessels; for in the latter case the canals of the anastomosing vessels communicate, and their contents are mingled; but in the former the nerve-tubes simply lie in juxtaposition, without any coalescence of their walls, or any admixture of the material contained within them."—*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 218.

ăn-a-stôm-ôt'-ic, *a. & s.* [Gr. *anastomōtikos*=fit for opening.]

1. *As adjective*: Pertaining to anastomosis.

"An anastomotic branch."—*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 116.

2. *As substantive*. *Old Med.*: A medicine designed to open the mouths of the extreme blood-vessels.

an-ăs-trôph-ē, an-ăs-trôph-ỹ, *s.* [In Ger., Fr., & Sp. *anastrophe*. From Gr. *anastrophē*=a turning back or wheeling round; *anastrephō*=to turn upside down, to turn back: *ana*=back, and *strephō*=to twist, to turn.]

Rhet. & Gram.: A figure by which the natural order of the words in a sentence or in a clause is reversed.

ăn-a-tăse, *s.* [Gr. *anastasis*=extension; *anateinō*=to stretch up: *ana*=up, and *teinō*=to stretch. Named *anastasis*=extension, from the length of its crystals as compared with their breadth; they are, however, minute in size.] A mineral, called also Octahedrite (q. v.).

an-ăth'-ēm-a, ăn-a-thēme, *ăn-ăth-ēm, *s.* [In Ger. *anathem*; Sp. & Ital. *anatema*; Port. & Lat. *anathema*. In Greek there were two similar words, one *anathēma*, and the other *anathema*. Both in Latin became *anathēma*. In Greek the first signified a votive offering set up in a temple to be preserved; the second, ultimately at least, a similar offering devoted to destruction. It is from the latter that the English word *anathema* comes. Both are from *anathēmē*=to lay upon, to set up as a votive gift; *ana*=up, and *tithēmē*=to put, to place.]

I. *In the New Testament*:

1. The act of pronouncing "accursed," the solemn giving over of a person to God for utter destruction, corresponding to what is called in Hebrew *chhērem*, or *chhērem*, 1 Kings xx. 42. (See Trench's *Synonyms of the New Testament*, pp. 17-22.)

2. The object of such a curse.

"If any man love not the Lord Jesus Christ, let him be *Anathema*."—1 Cor. xvi. 22.

II. *Church History*:

1. Excommunication and denunciation by a pope, a council, or a bishop, of a real or reputed offender. This was called the *judiciary anathema*.

"Her bare *anathemas* fall but like so many *bruta fulmina* upon the schismatical."—*South: Sermons*.

"... the Apostle, who hath denounced an *anatheme* to him, . . ."—*Sheldon: Miracles of Anti-christ* (1615), p. 5.

"Your holy father of Rome hath smitten with his thunderbolt of excommunications and *anathemes*, at one time or other, most of the orthodox churches of the world."—*Ibid.*, p. 129.

2. The *abjuratory anathema* pronounced by a convert in renouncing his "errors" or "heresies."

an-ăth-ēm-ăt'-i-cal, *a.* [Gr. *anathematikos*.] Relating to an anathema; containing an anathema.

an-ăth-ēm-ăt'-i-cal-ly, *adv.* [Eng. *anathemat-ical*; -ly.] In an anathematical manner. (Johnson.)

an-ăth-ēm-ăt-ism, *s.* [In Port. *anathematismo*; Gr. *anathematismos*.] An excommunication, a cursing.

"Sundry civil effects—excommunication and *anathematism* by law do work."—*Dr. Tooker: Of the Fabrique of the Church* (1604).

an-ăth-ēm-ăt-i-ză-tion, *s.* [In Fr. *anathematization*; Port. *anathematizaçao*.] The act of anathematizing, an excommunication, an accursing.

"*Anathematization*, excommunication, and accursing are synonymous."—*Compend. of the Laws of the Church of Scotland* (1830), xxxv.

an-ăth'-ēm-at-ize, *v. t.* [In Fr. *anathematiser*; Sp. *anatematizar*; Port. *anathematizar*; Ital. *anatemizzare*; Lat. *anathematizo*; Gr. *anathematizō*.]

1. *Lit.*: To excommunicate, to accurse, to put under a ban.

"The pope once every year (on Maunday Thursday) excommunicates and *anathematizes* all heretics."—*Bp. Barlow: Remains*, p. 220.

2. *Fig.*: Publicly to denounce.

"That venality was denounced on the hustings, *anathematized* from the pulpit, and burlesqued on the stage."—*Macaulay: Hist. Eng.*, ch. xv.

an-ăth'-ēm-at-ized, *pa. par. & a.* [ANATHEMATIZE.]

an-ăth-ēm-at-i-z-ēr, *s.* [Eng. *anathematize*; -er.] One who excommunicates, curses, or denounces.

"How many famous churches have been most unjustly thunderstruck with direful censures of excommunications, upon pretense of this crime, which have been less guilty than their *anathematizers*!"—*Bp. Hall: Cases of Conscience*.

an-ăth-ēm-at-i-z-ing, *pr. par.* [ANATHEMATIZE.]

ăn-a-thēme, *s.* [ANATHEMA.]

an-ăth'-ēr-ŭm, *s.* [Gr. *an*=without, and *athēr*=the beard or spike of an ear of corn; awn. Awnless.] A genus of plants belonging to the order Gramineæ, or Grasses. The *A. muricatum* is said

Anatherum Nardus: Root, Stem, and Flower.
(One-sixth natural size.)

to be acrid, aromatic, stimulating, and diaphoretic; while the *A. nardus* possesses similar qualities to such an extent that it is called the Gingergrass.

an-ăt'-i-dæ, *s.* [From Lat. *anas*=the Duck genus.] A family of birds, the last of the Natatorial, or Swimming order. They have a flattened bill covered with a soft skin, and furnished at the edges with a series of lamellæ, with which they sift the mud in which they seek their food. The family contains geese and swans as well as ducks, and has been divided into the following sub-families: Anatinae (True Ducks); Fulegulinæ (Pochards); Merginae (Mergansers); Cygninae (Swans); Anserinae (Geese); and Phenicopterinae (Flamingoes), the last-named sub-family connecting the family Anatidæ and the order Natatores, or Swimming, with the Grallatores, or Wading Birds.

ăn-at-if-ēr-ŭs, *a.* [In Fr. *anatif*, *anatifère*; Port. *anatifero*; Lat. *anas*=a duck, and *fero*=to bear.] Producing ducks.

"If there be *anatiferos* trees whose corruption breaks forth into branches, yet if they corrupt they degenerate into maggots, which produce not them again."—*Browne: Vulgar Errors*.

ăn-a-ti'-næ, *s.* [Lat. *anatinus*=pertaining to a duck.] The typical sub-family of the Anatidæ. [ANAS, ANATIDÆ.]

ăt-an-ăt'-ō-çism, *s.* [In Fr. *anatocisme*; Sp. *anatocismo*; Lat. *anatocismus*; Gr. *anatokismos*=compound interest: *ana*=again, and *tokos*=(1) a bringing forth, (2) offspring, (3) interest of money; *tiktō*=to bring forth.] Compound interest. (*Glossogr. Nov.*)

ăn-a-tôm'-ic, ăn-a-tôm'-i-cal, *a.* [Fr. *anatomique*; Sp., Port., & Ital. *anatomico*=anatomical; Lat. *anatomicos*=an anatomist; Gr. *anatomikos*=skilled in anatomy.] Relating or pertaining to anatomy. [ANATOMY.]

1. *Spec.*: Used for the purpose of anatomy.

"An anatomical knife."—*Watts: Logic*.

2. Proceeding on the principles of anatomy; as exhibited by anatomy.

"... the various tissues, the *anatomical* character of which will be discussed in subsequent pages."—*Todd & Bowman: Physiol. Anat.*, vol. i., p. 46.

"... the *anatomical* evidence by which they may be supported."—*Ibid.*, vol. ii., p. 47.

3. Separated into minute portions, as if by the knife of an anatomist.

"The continuation of solidity is apt to be confounded with, and, if we look into the minute *anatomical* parts of matter, is little different from, hardness."—*Locke*.

ăn-a-tôm'-i-cal-ly, *adv.* [Eng. *anatomical*; -ly.] In an anatomical manner; on the recognized principles of anatomy; in the way required by anatomy; by anatomical research.

"The presence of nerves, and their mode of sub-division, have not as yet been satisfactorily demonstrated *anatomically*."—*Todd & Bowman: Physiol. Anat.*, vol. i., p. 70.

"... it ceases to be *anatomically* recognizable."—*Ibid.*, vol. i., p. 168.

ăn-ăt-ôm-ist, *s.* [In Sw. *anatomist*; Fr. *anatomiste*; Sp., Port., & Ital. *anatomista*.]

1. *Lit.*: One who dissects the bodies of men or animals to ascertain their internal organization. One who dissects plants with a similar object in view is never simply called an anatomist; he is denominated a *vegetable anatomist*. Adjectives are prefixed to the noun to indicate the departments of animal anatomy which the cultivator of the science specially studies; as—

Comparative anatomist: One versed in comparative anatomy.

"Pursuing the comparison through the complexities of the bony framework, the *comparative anatomist* would first glance at the more obvious characters."—*Owen: Classic. of the Mammalia*, pp. 77, 78.

Morbid anatomist: One whose special department of the science is morbid anatomy. [ANATOMY.]

"... the researches of the *morbid anatomist*."—*Todd & Bowman: Physiol. Anat.*, i. 316.

¶ The chief names in antiquity which have come down to our time as anatomists are those of the second Hippocrates, who was born B. C. 460, and died about 377; Aristotle, who made his chief anatomical investigations between B. C. 334 and 327; Herophilus and Erasistratus of Alexandria, in the third century B. C. (?); Celsus, A. D. 3 to 5 (?) and the most illustrious, in this respect, of all, Galen of Pergamus, who was born in A. D. 131, and died about the beginning of the third century. In modern times the revival of anatomical study began in Italy, and quite a crowd of illustrious inquirers flourished in that country before much was done in this department of science in the other parts of Europe. The first was Mondini of Bologna, who flourished about A. D. 1315. Of the rest may be mentioned Eustachi, about 1495 or 1500, after whom a tube in the ear is called, and a valvular membrane in the heart. [EUSTACHIAN.]; Fallopio, or Fallopius, who was born about 1523, and died in 1562, and who gave a name to the Fallopiian tubes of the uterine; Cæsalpini, after whom the Cæsalpina genus of plants is called; and finally, Malpighi, born in 1628, and died 1694, after whom the Malpighia genus of plants and a gland are named. Of the early English anatomists, the most illustrious was Harvey, who was born in 1578, published his immortal work, in which the circulation of the blood is intimated, in 1628, and died in 1657. The later anatomists who have rendered good service to the science are too numerous to be mentioned here.

2. *Fig.*: One who examines the internal structure of anything; one who keenly dissects anything submitted to his scrutiny.

ăn-ăt-tôm-i-ză-tion, *s.* [Eng. *anatomize*; -ation.] Anatomy.

an-ăt-ôm-i-ze, *v. t.* [In Sw. *anatomisera*; Fr. *anatomiser*; Sp. & Port. *anatomisar*; Ital. *anatomizzare*.]

1. *Lit.*: To dissect an animal with the view of ascertaining its internal structure. Similarly, to dissect a plant.

"Our industry must even *anatomize* every particle of that body which we are to uphold."—*Hooker*.

2. Mentally to dissect or separate into minute portions, with the view of thoroughly understanding it, any object presented to the senses, or any idea suggested to the mind.

"... his psychological dissection went no farther than the extremities of the subject he had laid out for *anatomizing*."—*Bowring: Bentham's Works* (1843), vol. i., p. 11.

"I think it will be most useful to begin, as it were, by dissecting the dead body of language, by *anatomizing* its phonetic structure . . ."—*Max Müller: Science of Lang.* (6th ed.), vol. ii. (1877), p. 80.

an-ăt-ôm-i-zed, *pa. par.* [ANATOMIZE.]

an-ăt-ôm-i-z-ing, *pr. par.* [ANATOMIZE.]

ăn-ăt-ôm-ỹ, ăn-ăt-ôm-ie, *s.* [In Sw. & Dan. *anatomi*; Ger. & Fr. *anatomie*; Sp. & Ital. *anatomia*; Latin *anatomia*, *anatomica*, *anatomice*. From Gr. *anatomē*=a cutting up, a dissection; *anatemnō*=to cut up: *ana*=up, and *temnō*=to cut.]

A. *Ordinary Language*:

I. *Literally*:

1. The act or process of dissecting the body of a man or an animal, with the view of ascertaining

bôll, bôy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f
-cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del

its internal organization, its development, and the changes which its structures undergo in disease. The act or process of similarly treating a plant. (In this first sense anatomy is an art.)

2. The knowledge of the internal structure of human or animal bodies, or of plants, acquired by such dissections. (In this second sense anatomy is a science.)

II. Figuratively:

1. A skeleton.

"Oh that my tongue were in the thunder's mouth,
Then with a passion I would shake the world,
And rouse from sleep that fell anatomy
Which cannot hear a feeble lady's voice."
Shakesp.: *K. John*, iii. 4.

2. The body.

"... Oh, tell me, friar, tell me,
In what vile part of this anatomy
Doth my name lodge? tell me, that I may sack
The hateful mansion."
Shakesp.: *Romeo and Juliet*, iii. 3.

3. In ridicule: A thin, meager-looking person.

"They brought one Pinch, a hungry, lean-faced villain,
A mere anatomy, a mountebank,
A threadbare juggler, and a fortune-teller,
A needy, hollow ey'd sharp-looking wretch,
A living dead man."—Shakesp.: *Com. of Errors*, v. 1.

4. Such elaborate division and subdivision of anything as remind one of dissections by an anatomist.

"It is therefore in the anatomy of the mind as in that of the body; more good will accrue to mankind by attending to the large, open, and perceptible parts, than by studying too much such finer nerves and vessels as will forever escape our observation."—Pope.

B. Technically:

I. *Science*: The knowledge of the structure of organized bodies obtained by their dissection. (See A., I. 1, 2.) It is naturally divided into (1) Animal Anatomy, generally called by way of eminence simply *Anatomy*, and (2) Vegetable Anatomy.

1. *Animal Anatomy*: To this the name of *Zootomy* is sometimes applied. It is naturally subdivided into (a) Human and (b) Comparative Anatomy.

(a) *Human Anatomy*, or the anatomy of the human subject. It is sometimes called *Anthropotomy* (q. v.). The prejudice against allowing the body of a relative, or even a corpse of any kind, to be dissected, long retarded the progress of this highly important and useful department of human knowledge, the ancients, and many moderns, too, being obliged to limit their dissections to the dead bodies of the lower animals, drawing analogies thence to the human frame instead of directly studying the corpses of mankind. Happily this difficulty has now been in a large measure overcome in all civilized countries. Human anatomy is generally divided into three subdivisions, *Descriptive*, *General*, and *Pathological or Morbid Anatomy*. The first investigates the various organs of the human body as they are in health, and the third as they are in disease; while the second inquires into the tissues, structures, or characteristics which are common to several organs. Sometimes *Descriptive Anatomy*, as distinguished from that which is *General*, is called *Particular or Special*. Sometimes, again, a new category is added, *Surgical Anatomy*, which treats of the position of the several organs with the view to possible surgical operations.

(b) *Comparative Anatomy*: The science which compares the structure of man with that of the inferior animals, and also that of the several classes, orders, &c., of the animal kingdom among each other, to ascertain the resemblances and dissimilarities in their analogous structures and organs. The knowledge thus acquired is then used for the purposes of classification and for the study of development. This is the science of Cuvier, Owen, and Huxley.

"There is no just ground to fear that the time required to gain the requisite elementary knowledge of *Comparative Anatomy* will detract from that which ought to have been exclusively occupied in the study of human anatomy and surgery."—Owen: *Lectures on the Comparative Anatomy and Physiology of the Invertebrate Animals* (1843), p. 5.

¶ Akin to Comparative Anatomy are *Physiological Anatomy*, defined by Todd & Bowman (*Anat.*, vol. i., p. 28) as "that kind of anatomy which investigates structure, with a special view to function," &c.; *Transcendental Anatomy*, which inquires into the plan or model on which the animal structure and its several parts have been framed.

2. *Vegetable Anatomy*: The similar dissection of a plant, or any part of it, to ascertain its structure. It is sometimes called also *Phytotomy* (q. v.).

"... little was known of vegetable physiology, nothing of vegetable anatomy."—Lindley: *Introd. to Bot.* (3d ed., 1839), Pref.

II. Art:

1. The art described under A., I. 1 (v. q.).

2. *Artificial anatomy*: The art of making models in wax, or some similar material, of the several parts of the frame in health and disease.

ăn-a-trép'-tíc, a. [Gr. *anatreptikos*=turning over, overthrowing; *anatrepō*=to turn up or over, to overthrow; *ana*=up, and *trepō*=to turn.] Overturning, overthrowing. (Enfield.)

ăn-a-tríp'-sís, s. [Gr. *ana*=again, and *tribō*=rub.]

1. Treatment of disease by friction or rubbing; massage.

2. Crushing of stone in the bladder.

*a-nā'-trôn, *a-nā'-trūm, s. [Gr. *nitron*=natron, not saltpeter, but potassa, soda, or both. Lat. *nitrum*; Ital. *natrum*.] Old names for NATRON (q. v.).

an-ăt-rōp-oūs, a. [Gr. *anatrepō*=to turn up or over.]

Bot.: The term applied to the position of an ovule of which the whole inside has been so reversed that the apex of the nucleus, and consequently the foramen, corresponds with the base of the ovule, with which, however, it maintains a connection by means of a vascular cord called the *raphe*. Examples: the almond, the apple, the ranunculus, &c.

ăn-ăux'-ite, s. [Gr. *anauxēs*=not increasing; *an*, priv., and *auxō*=*auxanō*=to cause to increase.] A mineral, a variety of clay, but placed by Dana under the same number as Comolite. It is translucent, is of greenish-white color and pearly luster, and contains about 55.7 parts of silica, a large percentage of alumina, 11.5 of water, a little magnesia, and protoxide of iron. It occurs at Bilin, in Bohemia.

ăn-būr-ỹ, ăn-bēr-rỹ, ăm-būr-ỹ, s. [A. S. *ampre*, *ōmpre*=a crooked swelling vein.]

1. A soft wart on a horse's neck.

*2. The disease called "fingers and toes" in turnips. The roots of turnips grown in too wet soil or otherwise unfavorable conditions, rot, and send forth an offensive smell. Insects are then attracted to the decaying structure, and deposit their eggs, which in due time generate larvæ, whose office it is to consume the putrid bulb. One of the species most commonly found is the *Trichocera hiemalis*, or Winter Gnat.

-ance, or -ăn-çỹ. An English suffix, corresponding to and derived from the Lat. *-antia*; as Eng. *abundance*, Lat. *abundantia*. It is=the state of: as *abundance*=the state of abounding; *temperance*=the state of being temperate.

*ăn-çell'e, s. [From Lat. *ancilla*.] A hand-maid.

"Glorius virgin, mayden, moder off God,
Doughter and ancelle, which milkest with-all
The Sone of God with thy brestes brod."

The Romans of Partenay (ed. Skeat), 6,455-7.

ăn-çest-ōr, *ăun-çest-ōr, *ăn-çes-tre, *ăn-çes-soiure, s. [Fr. *ancêtre*; O. Fr. *ancessour*; Sp. & Port. (pl.) *antecessores*; Ital. *antecessore*. From Lat. *antecessor*=he who goes before; *antecedo*=to go before.] One from whom a person is descended, whether on the father or mother's side. It is distinguished from *predecessor*, one who previously held the office to which one has now succeeded.

"But I will for their sakes remember the covenant of their ancestors, whom I brought forth out of the land of Egypt. . . ."—Lev. xxvi. 45.

ăn-çes-tōr'-i-ăl, a. [Eng. *ancestor*; -ial.] Ancestral.

"... they wish to adhere to their ancestral form of a regal government."—Lewis: *Early Roman Hist.*, ch. xi., § 1.

ăn-çes-trăl, ăn-çes-trěl, a. [Formed as from Lat. *antecessoralis*.] Pertaining to ancestors; derived from or possessed by ancestors.

"He generally vegetated as quietly as the elms of the avenue which led to his ancestral grange."—Macaulay: *Hist. Eng.*, ch. viii.

ăn-çes-trěss, s. [O. Eng. *ancestre*; -ess.] A female ancestor. (More usually *ancestor* is used in a feminine sense.)

ăn-çes-trỹ, *ăn-çes-trië, *ăun-çes-trië, *ăun-çes-triye, s. [O. Eng. *ancestre*; -y.]

1. The whole series or succession of persons, the last pair of whom were one's father and mother; the men and women who lived in one's country before he was born, and came of the same race as he now is.

"... Many precious rites
And customs of our rural ancestry
Are gone or stealing from us."

Wordsworth: *The Excursion*, bk. ii.

2. High birth, aristocratic or otherwise honorable lineage.

"Heirs to their labors, like all high-born heirs,
Vain of our ancestry as they of theirs."

Byron: *Opening of Drury Lane Theater*, 1812.

*ănçh'-ënt-rỹ, s. [ANCIENTRY.]

*ăn'-chě-șoũn, s. [ENCHESON.]

ănch-i-ê'-ta, s. [Named after P. Anchietea, a Brazilian writer on plants.] A genus of plants belonging to the order Violaceæ, or Violet-worts. *A. salutaris*, a creeping bush, smelling like cabbage,

Anchietea Salutaris: Branch, Flower, and Seed.
(One-fourth natural size.)

is a native of Brazil, and is considered by the inhabitants of that country as useful in skin diseases. It is also a purgative.

ănch'-i-lōps, s. [Gr. *angchilōps*=a sore at the inner corner of the eye: *angchi*=near; *l* euphonic; and *ōps*=the eye.] Same meaning as the Greek word.

ănch-i-thēr'-i-ũm, s. [Gr. *angchi*=near; *thērion*=a beast, specially a wild beast hunted.] A fossil mammal belonging to the family Palæotheriidae. It has been called also *Hipparitherium*, suggesting an affinity to the horse in the neighboring family of Equidae. The *A. Aurelianense* occurs in Miocene rocks in Spain, France, Germany, and in Nebraska.

"The second and fourth toes may be subsequently developed as in the rhinoceros; or they may be represented only by mere splint-like rudiments of their metacarpals, as in the horse. All intermediate conditions are met with in various extinct forms, as Palæotherium, *Anchitherium*, and *Hipparion*."—*Flower: Osteol. of the Mammalia* (1870), p. 265.

ăn-chō'-ic, ăç'-id, s.

Chemistry: Lepargylic acid, $C_9H_{16}O_4 = (C_7H_{14})''(CO''OH)_2$. A diatomic, dibasic, fatty acid, obtained by the action of nitric acid on Chinese wax, and on the fatty acids of coconut oil.

ănch'-ōr (1), *ăn'-cre, *ăn'-kre, *ăn'-kēr, s. [A. S. *ancer*, *ancor*, *oncor*. In Sw. *ankar*, *ankare*; Dan., Dut., & Ger. *anker*; Irish *ankaire*, *ancoir*, *ingin*; Gael. *acair*; Cornish *ankar*; Arm. *ancor*; Fr. *ancre*; Sp. *ancla*, *ancora*; Port. and Ital. *ancora*; Lat. *ancora*, less properly *anchora*; Gr. *ankura*; Russ. *iacor*; Pers. *anghar*. All from a root *anc* or *ang*=a bend. In Sansc. *ak*, *ankamī*, *ake*=to bend; *ankas*=a bend or curve.]

A. Ordinary Language:

1. *Lit.*: The well-known instrument for mooring a ship. (Described at length under B. 1.)

¶ Of the several nautical phrases arranged under B. 1, some have made their way into ordinary English. Specially—

To cast anchor:

(a) *Lit.*: To drop the anchor into the sea with the design of mooring the vessel.

"Regularly at that season several English ships cast anchor in the bay."—Macaulay: *Hist. Eng.*, ch. xxiii.

(b) *Fig.*: To infix itself firmly in a rock, as a tree does on a mountain side.

"Aloft the ash and warrior oak,
Cast anchor in the rifted rock."

Scott: *Lady of the Lake*, I. xii.

To drop the anchor, or to drop anchor: To let it run down into the sea. The same as *cast anchor*.

"Eutering with the tide,

He dropp'd his anchors and his oars he ply'd,
Furl'd every sail, and drawing down the mast,
His vessel moor'd, and made with haulers fast."

Dryden.

To lie at anchor: To remain steady in the water without drifting; being held to a nearly fixed spot by the anchor.

To ride at anchor: The same as to lie at anchor, but employing more motion.

"Far from your capital my ship resides
At Reithrus, and secure at anchor rides."

Pope.

To weigh anchor: To heave or raise the anchor from the ground to which it is fastened.

2. *Fig. Scripture, &c.*: That which gives stability and security to hope or faith or the affections.

"Which hope we have as an anchor of the soul, both sure and steadfast, and which entereth into that within the vail."—Heb. vi. 19.

the bottom of the sea, provided that the water is shallow enough to permit of this being done. Its invention was at a very early period. Those of the early Greeks were simply large stones, sacks filled with sand, or logs of wood loaded with lead. Then the Tuscans, or Midas, king of Phrygia, introduced a tooth, or *fluke*, which was ultimately exchanged for two. The modern anchor consists of a long bar or *shank* of iron

Anchor.

(c), branching out at the lower extremity into two arms (b) ending in flukes (a), barbed at their extremity, and with a stock of oak or wood (d) at the upper one, while it terminates in a ring, to which a rope or chain is affixed. The arms or flukes are designed to penetrate and fix themselves in the sea-bottom. They consist of a *blade*, a *palm*, and a *bill*. The one end of the shank is made square to receive and hold the stock steadily in its place without turning. To keep the stock also from shifting along the shank there are raised on it from the solid iron, or welded on it, two square tenon-like projections, called *nuts*. The end of the shank next the stock is called the *small round*. The other extremity, where the arms and the shank unite, is called the *crown*; and the points of the angle between the arms and the shank, the *throat*. A distance equal to that between the throat of one arm and its bill [BILL] is marked on the shank from the place where it joins the arms, and is called the *trend*. The use of the shank is to present an attachment for the cable. [CABLE, SHACKLE, GANGER.] That of the stock is to make the anchor fall in such a way as to enable one of the flukes easily to infix itself in the ground. Large vessels have more anchors than one, which are stowed in different parts of the ship. The best bower to the starboard, the *small bower* [BOWER] to the port-board, with the flukes on the bill-board, the *sheet anchor* on the afterpart of the fore-channels on the starboard side, and the *spare anchor* on the port side. [For other anchors see STREAM, KEDGE, GRAPNEL, MUSHROOM, FLOATING, MOORING.]

2. *Naut.* Some technical phrases which have found their way into English literature have already been given. [A. 1.] Others are the following:

An anchor is said to *come home* when it is wrenched out of the ground and dragged forward by the violence of the wind or the sea, or by the strength of a current. It is *foul* if it become entangled with the cable; *a-wash*, when the stock is hove up to the surface of the water; *a-peak*, when the cable is so drawn as to bring the ship directly over it; *a-cockbill* [A-COCKBILL], when hanging vertically; *a-tip*, when drawn out of the ground in a perpendicular direction; and *a-weigh*, when it has been drawn just out of the ground and hangs vertically.

At anchor is the same as anchored.

To back an anchor is to lay down a small anchor ahead of the one by which the ship rides, with the cable fastened to the crown of the principal one to aid in preventing its "coming home."

To cat the anchor: To draw the anchor to the cat-head by means of a machine called the "cat."

To fish the anchor: To employ a machine called a "fish" to hoist the flukes of an anchor to the top of the bow.

To steer the ship to her anchor: To steer the ship to the spot where the anchor lies while the cable is being heaved on board the ship.

To shoe the anchor: To cover the flukes of it with a triangular plank of wood to enable it to fix itself more tenaciously in a soft bottom.

To sweep the anchor: To dredge at the bottom of the anchoring ground for a lost anchor.

To throw the anchor: The same as Cast the anchor (A. 1.).

3. *Art.*: The shape of a buckle, the latter being usually described as having a tongue and an anchor.

4. *Arch.*: A kind of carving somewhat resembling an anchor. It is generally used as part of the enrichment of the bottoms of capitals in the Tuscan, Doric, and Ionic orders, or as that of the boustins of bed-moldings in Doric, Ionic, and Corinthian cornices, anchors and eggs being carved alternately throughout the whole building.

5. *Her.*: An anchor is an emblem of hope.

C. In composition, *anchor* is a substantive.

anchor-ground, s. Ground suitable for anchoring. It should not be too deep, or too shallow, or rocky. [ANCHORAGE.]

anchor-hold, s.

1. *Lit.*: The hold or fastness of the anchor.

2. *Fig.*: Security.

anchor-lining, s. [BILL-BOARDS.]

anchor-smith, s. A smith who forges anchors.

"Smithing comprehends all trades which use either forge or file, from the anchor-smith to the watch-maker." —Macon.

anchor-stock, s. The transverse beam of wood or bar of iron near the ring of an anchor.

anchor-watch, s. [WATCH, II. 1.]

ānch-ōr, *ān-cre, *ān-kre, v. t. & i. [From the substantive. In Sw. *ankra*; Dan. *ankre*; Dut. *ankeren*; Ger. *ankern*; Fr. *ancrer*; Sp. *ancilar*, *ancorar*; Port. *ancorar*; Ital. *ancorarsi*.]

A. Transitive:

1. *Naut.*: To moor by means of an anchor.

2. *Fig.*: To fix firmly, to cause to rest.

"... and great Pompey
Would stand, and make his eyes grow in my brow;
There would he anchor his aspect, and die
With looking on his life."

Shakesp.: *Antony and Cleopatra*, i. 5.

"Stars countless, each in his appointed place,
Fast anchored in the deep abyss of space."

Cowper: *Retirement*.

B. Intransitive:

1. *Naut.*: To come to an anchor.

"Hoarse o'er her side the rustling cable rings;
The sails are furl'd; and anchoring round she swings."
Byron: *Corsair*, i. 4.

2. *Fig.*: To fix (the eye) upon.

"Posthumus anchors upon Imogen:
And she, like harmless lightning, throws her eye
On him."

Shakesp.: *Cymbeline*, v. 5.

*ānch-ōr (2), s. [ANCHORITE.]

*ānch-ōr (3), s. [ANKER.]

ānch-ōr-ā-ble, a. [Eng. *anchor*; -able.] Able to be used as a place of anchorage.

"... and the sea everywhere twenty leagues from land anchorable." —Sir T. Herbert's *Travels*, p. 40.

ānch-ōr-ā-car-pā-čē-ā, s. [From Gr. *ankura* = (1) an anchor, (2) a hook; and *karpos* = the wrist, the carpus.]

Zool.: The name given by Milne-Edwards to a tribe of Entomostracans, belonging to the order Lerneadæ. They attach themselves to their prey by means of long, arm-shaped appendages springing from the thorax, united to each other at the tip, and terminating in a horny button in the center.

ānch-ōr-ā-čēr-ā-čē-ā, s. [From Gr. *ankura* = (1) an anchor, (2) a hook; and *keras* = a horn.]

Zool.: The name given by Milne-Edwards to a tribe of Entomostracans, belonging to the order Lerneadæ. They attach themselves to their prey by means of the head itself, which is furnished with one or more pairs of horn-shaped appendages, projecting laterally. It contains the families, Penelladæ and Lerneoceradæ.

ānch-ōr-āge (age = īg), s. [Eng. *anchor*; -age. In Fr. *ancrage*; Sp. *ancoraje*.]

*1. The hold of the sea-bottom by the anchor.

"Let me resolve whether there be indeed such efficacy in nurture and first production, for if that supposal should fail us, all our anchorage were loose, and we should but wander in a wild sea." —Wotton.

2. The set of anchors belonging to a vessel.

"The bark that hath discharg'd her freight
Returns with precious lading to the bay
From whence at first she weigh'd her anchorage."
Shakesp.: *Titus Andronicus*, i. 2.

3. Duty paid at a port for permission to anchor.

"This corporation, otherwise a poor one, holds also the anchorage in the harbor, and bushelage of measurable commodities, as coals, salt, &c., in the town of Fowey." —Carew: *Survey of Cornwall*.

4. A place suitable for anchoring in—that is, a place in which the water is of convenient depth, and the bottom such as will permit the anchor to hold. (This meaning, which is not in Johnson, as if it were unknown in his time, is now the almost exclusive signification of the word anchorage.)

"... the water was so deep that no anchorage could be found." —Darwin: *Voyage round the World*, ch. xi.

5. A support that holds on like an anchor, as, the anchorages of a suspension bridge.

ānch-ōr-ā-stōm-ā-čē-ā, s. pl. [From Gr. *ankura* = (1) an anchor, (2) a hook; and *stoma* = mouth.] The name given by Milne-Edwards to a tribe of Entomostracans belonging to the order Lerneadæ. They attach themselves to their prey by means of their stout foot-jaws, which are armed with strong hooks.

ānch-ōred, pa. par. & a. [ANCHOR, v.]

As adjective:

1. Held by an anchor.

"In the anchor'd bark." —Byron: *Corsair*, i. 7.

2. Shaped like an anchor; forked. (Used of a serpent's tongue.)

"Shooting her anchor'd tongue,
Threat'ning her venom'd teeth."

More: *Song of the Soul*, II. ii. 29.

3. *Her.*: An anchored cross is one the four extremities of which resemble the flukes of an anchor, as shown in the illustration. It is called also *anchry* or *ancré*. It is designed to be emblematic of hope through the cross of Christ. Cf. Heb. vi. 19, "Which hope we have as an anchor of the soul, both sure and steadfast."

Anchored Cross

ānch-ōr-ēl-lā, s. [Dimin. of Lat. *anchora* or *ancora* = little anchor.] A genus of Entomostracans, the typical one of the family Anchorelladæ. The *A. uncinata* is parasitic on the cod and the haddock. The *A. rigosa* was taken upon a cod.

ānch-ōr-ēl-lā-dæ, s. pl. [From *anchorella* (q. v.).] A family of Entomostracans, belonging to the order Lerneadæ and the tribe Anchoracarpacæ.

ān-čhōr-ēss, *ān-crēs, s. [Eng. *anchor* = anchorite; -ess, to mark the feminine gender.] A female anchorite.

"Anchoresses that dwell

Mewed up in walls." —Fairfax: *Tasso*.

"To this secluded spot, now famous more
Than any grove, mount, plain had been before,
By relique, vision, burial, or birth,
Of anchoress or hermit."

Browne: *Brit. Pastorals*, ii. 4.

ānch-ōr-ēt-ic, **ānch-ōr-ēt-ic-al**, a. [Eng. *anchoret*, -ic, -ical. In Fr. *anachorétique*; Sp. *anacoretico*; Port. *anachoretico*; Gr. *anachōrētikos*.] Pertaining to an anchorite; after the manner of a hermit.

ānch-ōr-ice, s. Ice formed at the bottom of a river, lake, &c.

***ānch-ōr-idge**, s. [Probably a corruption of Eng. *anchorage* (q. v.).] The porch of a church, particularly that of Durham, the church being compared to a ship. (Kennet's *MSS. Gloss.*) (Boucher.)

ānch-ōr-ing, pr. par. [ANCHOR, v.]

ānch-ōr-ite, **ānch-ōr-ēt**, **ān-āch-ōr-ēt**, ***an-āch-ōr-ite**, ***ānch-ōr**, ***ān-kēr**, s. [A. S. *ancer*; Fr. *anachorète*; Sp. & Ital. *anacoreta*; Port. & Lat. *anachoreta*; Gr. *anachōrētēs*, from *anachōrēō* = to go back, to retire: *ana* = backward, and *chōrēō* = to make room for another, to retire; *chōros* = space, room.]

I. Literally:

1. *Church History*: Any person who, from religious motives, has renounced the world, and retired from it into seclusion. (For the distinctions between the various kinds of ASCETICS, see that word. See also EREMITES.) The peculiarity of the anchorites, properly so called, was, that though they had retired for solitude to the wilderness, yet they lived there in fixed abodes (generally caves or hovels) in place of wandering about. When they did travel they slept wherever night overtook them, so that visitors might not know where to find them. They were most numerous in the Egyptian desert, where they lived on roots and plants, believing that to afflict the body was the best method of spiritually benefiting the soul. Most of them were laymen; there were also female anchorites. They first arose, it is said, about the middle of the third century, and in the seventh the Church extended its control over them, and ultimately threw difficulties in the way of any one who wished to adopt such a mode of life. [ASCETIC, EREMITIC, MONASTICISM, MONK, &c.]

2. *In a general sense*: Any person of similar habits to those of the old anchorites now described. The mistaken desire to retreat from the "world" to the wilderness is not distinctively Christian; it tends to manifest itself to a greater or less extent in all religions and in all ages. Anchorites of various Hindoo ascetic sects are at present to be found among the jungles and hills of India, and they were much more numerous when the dominant faith in that land was Buddhism.

"To desperation turn my trust and hope!

An anchor's cheer in prison be my scope."

Shakesp.: *Hamlet*, iii. 2.

"Yet lies not love dead here, but here doth sit,
Vow'd to this trench, like an anchorite." —Donne.

"Stooped ever to that anchorite's behest."

Scott: *Vision of Don Roderick*, ver. 30.

"... I know that with mankind,

Thy fellows in creation, thou dost rarely

Exchange thy thoughts, and that thy solitude

Is as an anchorite's, were it but holy."

Byron: *Manfred*, iii. 1.

bōll, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = șan. -tion, -sion = șhũ; -țion, -șion = zhũn. -tious, -cious, -sious = șhũ. -ble, -dle, &c. = bēl, dēl.

II. Figuratively. The anchorite of the forest is the bear.

ān'-chōv-ŷ, ān-chō'-vŷ, s. [In Sw. *anjovis*; Dan. *anchovis*; Dut. *ansjovis*; Ger. *anschove*; Fr. *anchois*; Sp. *anchoa*, *anchova*; Port. *anchova*; Ital. *acciuga*; Lat. *aphya*, *apua*; Gr. *aphuē*, usually translated an anchovy or sardine, but according to Yarrell and Adams, the mackerel-midge (*Motella glauca*).] (*Liddell & Scott*.) A fish, the *Engraulis encrasicolus* of Fleming; the *E. vulgaris* of Cuvier. It belongs to the Clupeidæ, or Herring family. In general, its length is from four to five inches; but specimens have been found seven and a half inches

Anchovy (*Engraulis encrasicolus*).

long. It is common in the Mediterranean and parts of the ocean. Shoals of anchovies annually enter the Mediterranean, and various fisheries exist along its northern shores, the most celebrated being at Gorgona, a small island west of Leghorn. Sometimes another species, the *E. meletta*, is either mixed with, or substituted for, the genuine fish.

anchovy-pear, s. The English name of the genus *Grias*, which is placed by Lindley doubtfully under the order Barringtoniaceæ (Barringtoniads). *Grias cauliflora*, the stem-flowering anchovy-pear, is an elegant tree, with large leaves, which grows in the West Indies. The fruit, which is eaten, tastes like that of the mang, and is pickled in the same way.

anchovy-sauce, s. A sauce made of the fish called anchovy.

ān-chū'-sa, s. [In Ital. *ancusa*; Sp. & Lat. *anchusa*.] From Gr. *angchousa*=alkanet; *angchō*=to press tight, to strangle; so called from a ridiculous notion entertained by Dioscorides that one might kill a viper if he irritated its throat by spitting into its mouth after having chewed the leaves of alkanet. A genus of plants belonging to the order Boraginaceæ (Borage-worts). It contains two well-known and widely distributed species, the *A. officinalis*, the Common, and the *A. sempervirens*, the Evergreen Alkanet. *Lycopsis arvensis* is sometimes called *Anchusa arvensis*. The real alkanet, once termed *Anchusa tinctoria*, now figures as *Alkanna tinctoria*. [ALKANNA, ALKANET.] A beautiful species, sometimes cultivated in flower-borders, is *Anchusa paniculata* or *Italica*.

ānch-ū'-sīne, s. [Eng. *anchusa*; -ine.] A red coloring matter obtained from the plant formerly called *Anchusa tinctoria*, but now *Alkanna tinctoria*.

ānch-ŷ-lōč-ēr-ās, s. [Gr. *angkylos*=crooked, and *keras*=horn.] A shell belonging to the class Cephalopoda. The *A. Calloviensis* occurs in the Kelloway rock.

ānch-ŷ-lō'sed, ānk-ŷ-lō'sed, ānc-ŷ-lō'sed, a. (or pa. par. of a verb *anchylose*, not used). [Gr. *angkyloō*, 1 fut. *angkylosō*=to crook, hook, or bend; *angkylē*=the bend of the arm; *angkos*=a bend or hollow.]

Anat.: Having an anchylosis. (Used of two bones, &c., so firmly united as to prevent motion between them.)

"... they [the teeth] are always lodged in sockets; and never anchylosed with the substance of the jaw."—Owen: *Classif. of Mammalia*, pp. 11, 12.

ānch-ŷ-lō'-sis, ānk-ŷ-lō'-sis, ānc-ŷ-lō'-sis, s. [Gr. *angkylosis*=a stiffening of the joints or of the eyelids.] [ANCHYLOSED.]

Anat.: The coalescence of two bones, so as to prevent motion between them. If anything keep a joint motionless for a long time, the bones which constitute it have a tendency to become anchylosed, in which case all flexibility is lost. In other cases, when anchylosis is the lesser of two evils, the bones which nature is about to weld together should be kept in the positions in which they will be of the greatest use when the union between them takes place.

"Had immobility been the object to be attained, that might have been more effectually accomplished by the fusion of the extremities of the segments together, as in anchylosis."—Todd & Bowman: *Physiol. Anat.*, vol. i., p. 138.

ānch-ŷ-lōt'-ic, ānk-ŷ-lōt'-ic, ānc-ŷ-lōt'-ic, a. [From Eng. *anchylosis*.] Pertaining to anchylosis.

***ān'-cien-čŷ**, s. [Eng. *ancien(t)*; -cy. In Fr. *ancien*.] Antiquity. [ANCIENTY.]

"... And the rest of the bishops follow him, in their due precedence, according to the dignity and *anciencies* of their respective sees."—*Jura Cleri*, p. 42.

ān'-cient, a. & s. [Fr. *ancien*; Sp. *anciano*; Ital. *anziano*, from *anzi*=before. Cognate with Lat. *antiquus*=old, ancient; *anticus*=in front, foremost; and *ante*=before.]

A. As adjective:

I. Ordinary Language:

†1. Old, estimated tacitly or explicitly by the standard of human life.

(a) Pertaining to persons advanced in years. (Opposed to *young*.)

"... Then they began at the *ancient* men which were before the house."—*Ezek.* ix. 6.

(b) Pertaining to things which have existed for some considerable time in one's history. (Opposed to *recent*.)

"But they, upon their *ancient* malice, will Forget, with the least cause, these his new honors."—*Shakesp.*: *Coriolanus*, ii. 1.

2. Old, estimated by the average duration of that to which the term *ancient* is applied.

"... some far-spreading wood Of *ancient* growth."—*Cowper*: *Task*, bk. 1.

"... an *ancient* castle overgrown with weeds and ivy."—*Macaulay*: *Hist. Eng.*, ch. xvi.

3. Old, estimated by the historic standard of time. (a) Opposed to modern, and especially referring, at the present day, to the centuries anterior to the fall of the Roman Empire. (In this sense, which is the most common use of the word, it is opposed to *modern*.)

"The whole history of *ancient* and of modern times records no other such triumph of statesmanship."—*Macaulay*: *Hist. Eng.*, ch. ix.

(b) In the mouth of one who lived at an early period of the world's history, it meant an age prior to his own.

"Is this your joyous city, whose antiquity is of *ancient* days?"—*Isa.* xxiii. 7.

4. Old, estimated by the geological standard of duration.

"Processes now going on in nature on a small scale, or imitated artificially by man, may enable us to comprehend imperfectly in what manner some of these infinitely grander *ancient* metamorphoses were effected."—*Murchison*: *Siluria*, ch. i.

5. From eternity.

"Thales affirms that God comprehended all things, and that God was of all things the most *ancient*, because He never had any beginning."—*Raleigh*.

¶ The words *ancient* and *old* are akin in meaning, and it is not easy to draw an absolutely precise line between their respective significations. *Old*, being opposed to *new*, is especially used of anything which is fresh when new, but has a tendency to wear out when old, or has nearly reached its proper term of existence, as an *old* hat; but it is also used when the lapse of time has increased instead of diminished the value of an article, as *old* wine. So also we speak of the *old* masters, meaning those who lived long ago, not those who are advanced in years. Finally, *old* generally indicates a lesser amount of duration than *ancient*. [OLD.]

II. Technically:

In Law:

Ancient writings: Legal documents more than thirty years old.

B. As substantive:

Ordinary Language:

†1. An old man, especially when invested with important office in the community.

"The Lord will enter into judgment with the *ancients* of His people, and the princes thereof."—*Isa.* iii. 14.

"The *ancient* and honorable, he is the head; and the prophet that teacheth lies, he is the tail."—*Ibid.*, ix. 15.

*2. A predecessor in anything.

"He toucheth it as a special pre-eminence of Junias and Andronicus, that in Christianity they were his *ancients*."—*Hooker*.

¶ The reference is to Paul's statement, "Andronicus and Junia, my kinsmen and my fellow-prisoners, ... who also were in Christ before me." (Rom. xvi. 7.)

3. (*Plur.*) Those who lived long ago. To us in general this means before the fall of the Roman Empire, the relapse into semi-barbarism which followed its overthrow, making a great gap in time between the civilization of what may be called the old world and that now existing. In this sense, *ancients* is opposed to *moderns*. This is the common use of the word.

"Some by old words to fame have made pretense, *Ancients* in phrase, mere moderns in their sense."—*Pope*: *Essay on Criticism*, 324, 325.

¶ To those who lived in the early ages of the world, of course the term signified men of a considerably prior date.

"As saith the proverb of the *ancients*. . . ."—1 Sam. xxiv. 13.

4. The Being existent from eternity.

"I beheld till the thrones were cast down, and the *Ancient* of days did sit."—*Dan.* vii. 9 (see also verses 13, 22).

***ān'-cient, *ān-shēnt**, s. [A corruption of Fr. *enseigne*, from Low Lat. *insignia*, Lat. *insigne*=a standard.] [ENSIGN.]

I. Of things:

1. A flag, ensign, or streamer of a ship, and formerly the flag or ensign also of a regiment.

"... ten times more dishonorable ragged than an old-faced *ancient*."—*Shakesp.*: 1 Hen. IV., iv. 2.

"It was a spectacle extremely delightful to behold the jacks, the pendants, and the *ancients* sporting in the wind."—*Don Quixote* (ed. 1687), p. 569. (*Boucher*.)

2. *Heraldry*: (a) In the form *anshent*=the guidon used at funerals. (b) A small flag ending in a point.

II. Of persons: The bearer of a flag, a flag-bearer, an ensign-bearer, an ensign in a regiment.

"This is Othello's *ancient*, as I take it—The same indeed, a very valiant fellow."—*Shakesp.*: *Othello*, v. i.

"'Tis one Iago, *ancient* to the general."—*Ibid.*, ii. 4.

"... *ancient* Pistol."—*Shakesp.*: 2 Hen. IV., ii. 4.

"... and now my whole charge consists of *ancients*, corporals, lieutenants, gentlemen of companies . . ."—*Shakesp.*: 1 Hen. IV., iv. 2.

ān'-cient-lŷ, adv. [Eng. *ancient*; -ly.] In ancient times; in times long gone by; the antiquity being estimated in any of the ways mentioned under ANCIENT (q. v.).

"The colewort is not an enemy, though that were *anciently* received, to the vine only, but to any other plant, because it draweth strongly the fattest juice of the earth."—*Bacon*.

"... for new varieties are still occasionally produced by our most *anciently* domesticated productions."—*Darwin*: *Origin of Species*, ch. xiv.

ān'-cient-nēss, s. [Eng. *ancient*; -ness.] The state of having existed from ancient or old times; antiquity.

"The Fescenine and Saturnian were the same; they were called Saturnian from their *ancientness*, when Saturn reigned in Italy."—*Dryden*.

ān'-cient-rŷ, *ān'-chēnt-rŷ, s. [Eng. *ancient*; -ry. In Fr. *ancien*; Ital. *ancianita*.]

1. The honor or dignity of having ancestry capable of being traced a long way back.

"Wherefore, most foolishly do the Irish think to ennoble themselves by wresting their *ancientry* from the Spaniard, who is unable to derive himself from any in certain."—*Spenser*: *On Ireland*.

2. The people of ancient lineage taken collectively.

"... wronging the *ancientry*."—*Shakesp.*: *Winter's Tale*, iii. 1.

3. Antiquity, or imitation of it.

"Heralds may here take notice of the antiquity of their art; and, for their greater credit, blazon abroad this precious piece of *ancientry*; for before the time of Semiramis we hear no news of coats or crests!"—*Gregory's Posthuma*, p. 236.

"You think the ten or twelve first lines the best; now I am for the fourteen last; add, that they contain not one word of *ancientry*."—*West to Gray*, Lett. 5, § 3.

***ān'-cient-ŷ**, s. [Eng. *ancient*; -y.] Age, antiquity. [ANCIENTY.]

"Is not the forenamed council of *ancienty* above a thousand years ago?"—*Martin*: *Marriage of Priests*, sign. I., ii. b.

ān-čī'-lē, s. [Lat.] A shield said to have fallen from heaven during the reign of Numa Pompilius. It was believed to be the shield of Mars; and as the prosperity of Rome was supposed to depend upon its preservation, eleven others were made like it, that any one wishing to steal it might not know which to take. (Could it have been originally a lump of meteoric iron?)

"Recorded to have been sent from heaven in a more celestial manner than the *ancile* of ancient Rome."—*Potter*: *On the Number 666*, p. 176.

"The Trojans secured their palladium, the Romans their *ancile*; and now the Roman Catholics have so great care of their images."—*Brevint*: *Saul and Samuel at Endor* p. 385.

ān-čīl-lār'-i-a, s. [Lat. *ancilla*=a maid-servant.] A genus of shells belonging to the family Buccinidæ. Both the shell and the animal resemble those of *Oliva*. Recent—twenty-three species from the Red Sea, India, Madagascar, Australia, and the Pacific Ocean. Fossil, twenty-one. Eocene—Britain, France, &c. (*Woodward*, 1851.)

ān-čīl-lār-ŷ, ān-čīl-lār-ŷ, a. [Lat. *ancillaris*=pertaining to female servants.]

1. *Lit.*: Pertaining to female servants or their occupation; subservient.

2. Auxiliary, aiding.

"It is beneath the dignity of the king's courts to be merely *ancillary* to other inferior jurisdictions."—*Blackstone*.

ān-čīl'-lē, s. [Lat. *ancilla*.] A maid-servant. (*Chaucer*.)

ăn-çip'-i-tal, ăn-çip'-i-tous, a. [Lat. *anceps*, genit. *incipitis*=(1) two-headed; (2) having two sides, double.]

Bot.: (The translation of the Latin *anceps*.) Two-edged, compressed, with two sharp edges, as the stem of an iris.

ăn-çis-trô-clă'-dê-æ, s. pl. [From *Ancistrocladus* (q. v.).] A new order of plants proposed by Planchon for the reception of a solitary and anomalous genus *Ancistrocladus*. The inflorescence is in panicles, with ten stamens in one row, five shorter than the others. The ovary is one-celled, with a single ovule. The fruit is a nut, crowned by the persistent calyx. Its nearest affinity is with the *Dipterocarpaceæ*.

ăn-çis-trô-clă'-dûs, s. [Gr. *ankistron*=a fish-hook; *ankos*=a bend or hollow; *klados*=a slip or shoot of a tree; *klao*=to break, to break off.] A genus of East Indian climbing plants, the type of Planchon's order *Ancistrocladæ* (q. v.).

ănc'-le, s. [ANKLE.]

***ănc'-ôme, *ônc'-ôme, *ûnc'-ôme, s.** [A. S.] A kind of boil, sore, or foul swelling in the fleshy parts.

"Swell bigger and bigger till it has come to an *ancome*."—*Marston: Eastward Hoe*, iii. 1.

ănc'-ôn (1), s. [Lat. *ancon*, genit. *anconis*; Gr. *ankôn*=the bend or hollow of the arm, the elbow.] 1. *Anatomy*: The apex of the elbow.

2. *Architecture* (plural *ancones*): (1) Ornaments on the keystones of arches, or on the side of door-cases; (2) the corners of walls or beams.

ănc'-ôn (2), s. & a. A kind of sheep.

As adjective:

"... this is known to have been the case with the *ancon* sheep."—*Darwin: Origin of Species* (ed. 1859), ch. i., p. 30.

ăn-cô'-nê-al, a. [Eng. *ancon*: -eal.] Pertaining to the ancon.

"The ulna is always characterized by a conspicuous, more or less compressed prolongation extending upward beyond the excavated humeral articular surface (sigmoid notch), and serving as the point of attachment to the extensor muscles of the fore-arm, called the olecranon or *anconal* process."—*Flower: Osteology of the Mammalia* (1870), p. 243.

ăn-cô'-nê-ûs, *ăn-cô'-nê-ûs, s. [Lat. *ancon*; Gr. *ankôn*=the elbow.]

Anat.: A muscle used in distending the fore-arm or cubit.

ănç-yl'-lô'-sis, s. [ANCHYLOSIS.]

ănç-yl'-lôt'-ôm-ûs, s. [Gr. *angkylos*=(1) a bend in the arm; (2) a joint bent or stiffened by disease; (3) a loop, a thong; *temnô*=to cut.]

Surgery: (1) A crooked knife or bistoury. (2) A knife for dividing the *frænum lingue* in tongue-tied persons.

ăn-çyl'-ûs, s. [Gr. *angkylos*, adj.=crooked, curved, rounded.] A genus of fluviatile shells belonging to the family *Limnæidæ*. They have limpet-like shells, and are called river-limpets. In 1875 Tait estimated the recent species at forty-nine, and the fossil at eleven; the latter from the Eocene.

ănd, *ănde, conj. & s. [A. S. *and*; Dut. *en*; Ger. *und*. The English *and* and *an*=if, are essentially the same word, and were of old used almost interchangeably.] [AN.]

A. As conjunction:

*1. As expressing contingency.

"And thou wilt gyven vs any good."

Pierce the Plowman's Crede (1394, ed. Skeat), 393.

(a) As standing for *if*, *though*, or *although*.

"It is the nature of extreme self-lovers, as they will set an house on fire, and it were but to roast their eggs."—*Bacon*.

(b) As joined to *if*, and therefore redundant.

"I pray thee, Launce, *an* if thou seest my boy, Bid him make haste."

Shakesp.: Two Gent. of Verona, iii. 1.

2. As a simple connecting particle, conjoining words with words, clauses with clauses, or sentences with sentences. This is now the normal use of the word *and*.

"Shem, and Ham, and Japheth."—*Gen.* vii. 13.

"Be fruitful, and multiply, and fill the waters in the seas, and let fowl multiply in the earth."—*Gen.* i. 22.

"And he put them altogether into ward three days. And Joseph said unto them the third day, This do, and live: for I fear God."—*Gen.* xlii. 17, 18.

B. As substantive:

"Thou servest me, I ween, w^t iffes and with *andes*."—*Sir T. More: Works*, p. 54.

"¶ In *Gen.* iii. 16. "Thy sorrow and thy conception"=the sorrow of thy conception. In this respect the English simply copies the Hebrew. A similar idiom exists in Latin. Virgil speaks of hurling "molem *et* montes" (a mass and mountains)=a mass of mountains.

**ănd* as a suffix.

Old English dialects: The present participle termination in northern dialects now superseded by the southern *-ing*.

"His glitterand armor shined far away."

Spenser: F. Q., I. vii. 29.

ănd'-a, s. A genus of plants belonging to the order Euphorbiaceæ (Spurge-worts). Habitat, Brazil. The *Anda* is remarkable for the purgative properties of its seeds, in this respect resembling the not remotely allied plant, the well-known castor-oil. The Brazilians use them in indigestion, liver-complaints, jaundice, and dropsy. They are called *Purga da Paulistas*. Their rind roasted on the fire is used in diarrhoea brought on by cold. If steeped when fresh in water, they render the liquid so narcotic that it is sufficient to stupefy fish. The oil is well adapted for the purposes of the painter. The fruit is eatable.

ănd-ăb'-a-tîşm, s. [From Lat. *andabata*=a gladiator whose helmet was without any opening for the eyes.] Uneertainty.

"To state the question, that we might not fail to *andabatism*, we are to understand, that as there be two kinds of perfection, one of our way, the other of our country to which we are traveling; so there are two kinds also of fulfilling God's law, one of this life, the other of the next."—*Shelford: Learned Discourses* (1635), p. 121.

ănd-a-lûs'-ite, s. & a. [From *Andalusia*, in Spain, where it was first found; and *-ite*=*lithos*=stone.]

A. As substantive: A mineral classed by Dana with his *Subsilicates*. It is orthorhombic. The hardness in typical specimens is 7.5, but in some opaque kinds only 3-6. Its sp. gr. 3.1 to 3.2, 3.05 to 3.35; its luster vitreous; its color whitish-red, flesh-red, violet, pearl-gray, reddish-brown, or olive-green. There is strong double refraction. The composition is silica, 33 to 40.17; alumina, 50.96 to 61.9; sesquioxide of iron, 0.30 to 5.71; sesquioxide of manganese, 0.53 to 0.83; magnesia, 0.17 to 1.14; lime, 0.21 to 4.12; soda, 0.10; potassa, 0.30 to 1.50; water, 0.25 to 2.60. Dana divides *andalusite* into "Var. 1. Ordinary; 2. Chastolite (macle)." *Andalusite* is found in argillaceous schist, in gneiss, in mica-schist, and rarely in serpentine. It is sometimes allied to kaolin, to mica, or to eyanite. It occurs at Andalusia in Spain, in Germany, Austria, France, and Russia; at Killiney Bay, near Dublin, in Ireland; near Ballachulish, in Scotland; and at Cumberland in England. Myelin has the composition of cyanite and *andalusite*.

B. As adjective: Dana has an *Andalusite* group of minerals defined as anisometrie, containing only sesquioxides. It includes *andalusite*, *fibrolite*, *kyanite*, and *topaz*.

ănd-dăn'-tê, s. & adv. [Ital. *andante*=going, the pr. par. of *andare*=to go.] [WEND.]

1. **As substantive:** A moderately slow movement between *largo* and *allegro*. It is the third in order of the five kinds of musical movement.

"... and gives to prayer

The *adagio* and *andante* it demands."

Courper: Task, bk. ii.

2. **As adverb:** In the time described above.

ănd-dăn-tî'-nô, adv., a. & s. [Ital.] A movement quicker than *andante*, of which the word *andantino* is a diminutive. It is intermediate between *andante* and *allegretto*.

ănd-dar'-ăc, s. Red orpiment.

ănd-dă'-têş, s. [Celtic.] A goddess or female power worshipped in Britain in pagan times.

"And to *Andates*, female power! who gave

(For so they fancied) glorious victory."

Wordsworth: Excursion, bk. ix.

***ănd-dê'-nă, s.**

1. The swath made in the mowing of hay.

2. As much ground as a man could stride over at once.

Ănd'-êr-sôn-ville pris'-ôn, s. A prison established by the confederate states at Andersonville, Georgia, during the American civil war. The total number of deaths in Andersonville prison was 12,462, about one-third of which took place in the stockade and two-thirds in the hospital. The greatest number imprisoned at any one time was 33,006. Number of escapes, 328.

ănd'-êş-ite, s. [In Ger. *andesin*. From the Andes mountains, in which it occurs.] A trielinic mineral classed by Dana in his thirteenth, or Feldspar group of *Unisilicates*. The hardness is 5-6; the sp. gr. 2.61 to 2.74; the color white, gray, greenish, yellowish, or flesh red; the luster sub-vitreous, inclining to pearly. It consists of silica, 57.15 to 60.29; alumina, 17.62 to 26.78; sesquioxide of iron, 0.30 to 8.35; magnesia, 0.03 to 1.85; lime, 2.24 to 9.23; soda, 3.91 to 7.99; potassa, 0.05 to 3.99; and water, 0.34 to 3.84. It is often, if not always, altered oligoclase, and itself it sometimes changes to kaolin. It occurs in the Andes, in Canada, in France, and Austria. *Saecharite*, a variety of it, is found in Silesia. [ANDESITE.]

ănd'-dê-sy'te, s. [From *andesite*, but with *yte* in place of *ite*, to show that it is a rock, and not a mineral.] A syenite-like rock occurring in the Andes. One of its ingredients is the mineral *Andesite* (q. v.).

ănd-ir'-a, s. [The Brazilian name.] A genus of plants belonging to the papilionaceous sub-order. About twelve species are known, all tropical American trees of moderate height, with alternate equally pinnate leaves about a foot long, and axillary or terminal panicles of generally showy flowers. The fruit is one-seeded, drupaceous, and in aspect like a plum. *A. inermis* is the cabbage-tree of the West Indies. [CABBAGE-TREE.] Its bark and that of *A. retusa* are anthelmintic. In small quantities it is drastic, emetic, purgative, and narcotic, while in larger doses it is actually poisonous.

ănd-ir-a-gua'-câ, s. [A South American name of the Vampire Bat, *Phyllostoma spectrum*.] [PHYLLOSTOMIDÆ VAMPIRE.] There are two species of the blood-sucking vampire bats in South America belonging to the genera *Desmodus* and *Diphylla*. These bats have sharp teeth, with which they make punctured wounds from which they suck the blood of their victims.

ănd'-ir-ôn, hănd'-ir-ôn, *ăwnd'-ir-ôn, *ăwynd'-yrne, *ăwynd'-êr, s. [In A. S. *brand-isen* is=a branding-iron or rod, a tripod (*Bosworth*), but this does not seem the origin of the English word. Sw. *brand-jern*; Fr. & Arm. *landier*; Mediæv. Lat. *andena*=an andiron. Skinner derives it (*a*) from *hand* and *irons*, or (*b*) from *and* and *irons*, or (*c*) from *brand* and *irons*. In Yorkshire the term *end-irons* (see

b) is applied to two coarse iron plates used to contract the fireplace. These being movable may be placed at a distance from each other when a large fire is wanted, and nearer when what is needed is only a small one. Boucher thinks that *and* in *and-irons* is the A. S. separable prep. *and*, Gr. *anti*, implying opposition, and that *andirons* are pieces of iron opposed to each other. Wedgwood believes the true etymology is the Flemish *wend-ijser*, from *wenden*=to turn; and *andiron* would then be the ræck in front of the kitchen dogs in which the spit turns.]

Generally in the plural: A pair of *andirons*=fire-dogs. A utensil consisting of two upright and generally ornamented pillars at some distance from each other, with a horizontal bar connecting them together. It was originally designed, as it still is in America, to prop up the extremities of logs of wood while they were being burned. Then it was used to support the ends of a spit.

"... Her *andirons*

(I had forgot them) were two winking Cupids."

Shakesp.: Cymbeline, ii. 4.

andiron brass, s. Lustrous brass, suitable to be used in the construction of *andirons*.

"And besides, I take it, *andiron* brass, which they call white brass, hath some mixture of tin to help the luster."—*Bacon: Physiol. Rem.*

ănd'-drăd-ite, s. [Named after the Portuguese mineralogist, D'Andrada, who first described it.] A mineral arranged by Dana as a sub-variety of garnet, and the variety chrome-garnet. He designates it "E. Lime Iron-garnet." It is the same as *Allochroite*. Its colors are various shades of yellow, green, brownish red, brown, and black. It is subdivided by Dana into—1. Simple Lime Iron-garnet: (a) *Topazolite*; (b) *Colophonite*; (c) *Melanite*, including *Pyreneite*; (d) *Dark-green Garnet*, including *Jelletite*. 2. *Manganesian Lime Iron-garnet*:

Andirons.

(a) Rothoffite, including Polyadelphite; (b) Ap-lome. 3. Yttriferous Lime iron-garnet, or Ytter-garnet. Sub-division 1 seems to include Calderite, the place of which is not yet thoroughly determined.

ân-dræ-ā, s. [Called after J. C. R. André, a German botanist.] The typical genus of the *Andræaceæ* (q. v.).

ân-dræ-ā-ċ-æ, s. pl. [From *Andræa* (q. v.).] Split-mosses. An order of acrogenous plants, placed by Lindley under his Muscales, or Muscal alliance. It contains only the single genus *Andræa*, which agrees with mosses in having a calyptra and operculum, and with Jungermanniaceæ in having a valvular theca.

ân-drân-ât-ôm-ÿ, s. [Gr. *anēr*, gen. *andros*=a man as opposed to a woman; and *anatomē*=dissection.] [ANATOMY.] The dissection of a human being, especially of the male sex.

ân-drē-as-bērg-ō-līte, s. [(1) Andreasberg, a bailiwick and town of the province of Hanover, in the Harz mountains, with mines of iron, cobalt, copper, and silver in the vicinity; (2) -lite.] A mineral, the same as *HARMOTOME* (q. v.).

ân-drē'n-ā, s. [From Gr. *anthrēnē*=a wasp.] A genus of bees—the typical one of the family *Andrenidae*.

ân-drē'n-ī-dæ, s. pl. [From *Andrena* (q. v.).] A family of bees, one of two constituting the sub-tribe *Anthophila*. They differ from the *Apidæ*, the other family, in having a short and blunt trunk, and in other respects. The species are all solitary in their habits.

ân-drē-ō-līte, s. [In Ger. *andreoilich*.] [ANDREASBERGOLITE.] A mineral, the same as *HARMOTOME* (q. v.).

ân-drē-ċ-ūm, s. [Gr. *anēr*, genit. *andros*=a man, as distinguished from a woman; and *oikos*=a house.]

Bot.: Rôper's name for the male system or apparatus of a plant; in other words, for the stamina.

ân-drōg'-ra-phīs, s. [Gr. *anēr*, genit. *andros*=a man; *graphis*=a style for writing.] A genus of plants belonging to the order *Acanthaceæ*. *A. paniculata*, called in India *Kariyat*, is a bitter tonic and stomachic, very similar to quassia. It is used in general debility, in convalescence after fever, and in an advanced stage of dysentery.

ân-drōg'-ÿn-al, a. [Formed as if from Lat. *androgynalis*.] [ANDROGYNE.] The same as *ANDROGYNOUS* (q. v.).

ân-drōg'-ÿn-al-lÿ, adv. [Eng. *androgynal*; -ly.] With the characteristics of hermaphrodites; at once male and female.

"The examples hereof have undergone no real or new transexion, but were *androgynally* born, and under some kind of hermaphrodites."—Browne: *Vulgar Errors*.

ân-drōg'-ÿn-ē, s. [In Lat. *s. fem.*=a masculine, heroic woman; in Gr. feminine of *androgynos*=a hermaphrodite; from *anēr*, genit. *andros*=a man, a male; and *gynē*=a woman.] A hermaphrodite.

"Plato, under the person of Aristophanes, tells a story, how that at first there were three kinds of men, that is, male, female, and a third mixt species of the other two, called for that reason *androgynes*."—Ferrand: *Love Melancholy*, p. 72.

ân-drōg'-ÿn-ōūs, a. [Lat. *androgynus*=a hermaphrodite.] Presenting the characteristics of both sexes in the same individual; at once male and female; pertaining to a hermaphrodite.

"Early *androgynous* condition of the vertebrata."—Darwin: *Descent of Man*, vol. i., p. vii.

"... hermaphrodite or *androgynous*."—*Ibid.*, vol. ii., part i., ch. vi.

Bot.: Producing both male and female organs on the same root, or in the same flower. (Loudon: *Cyclo. of Plants*, 1829, Gloss.)

ân-drō-mā'-nī-ā, s. [Gr. *aner*, genit. *andros*=a man, and Eng. *mania*.]

1. Nymphomania (q. v.).
2. An abnormal disposition exhibited by some women to assume masculine qualities.

ân-drō-mā'-nī-āc, s. [Gr. *andros*=a man, and Eng. *maniac*.] A woman afflicted with andromania.

ân-drōm'-ēd-ā, s. [Lat. and Gr.]

1. *Class. Myth.*: A daughter of Cepheus, king of Ethiopia, and Cassiope. It was fabled that she was chained to a rock by order of Jupiter Ammon, and then exposed to the attacks of a monster. Perseus released, and afterward married her. On her death she was changed into the constellation which bears her name. (Ovid: *Metam.*, iv. 670, &c.)
2. *Astron.*: A constellation, fancifully supposed to resemble a woman chained. It is in the northern hemisphere, and is surrounded by Cassiopeia, Lacerta, Pegasus, Pisces, Triangulum, and Perseus. It contains the bright stars Almach and Mirach, and Alpherat is on the boundary-line between it

and Pegasus. There is in the girdle of Andromeda a fine elliptic nebula, visible to the naked eye, and continually mistaken by the uninitiated for a comet. (Herschel: *Astron.*, § 874.)

On Sept. 21, 1898, the astronomers of the Pulkowa Observatory in Russia announced that they had discovered a stellated condensation in the center of this nebula, indicating that its nucleus is composed of stars instead of gas, like the matter surrounding it.

3. *Bot.*: A genus of plants belonging to the order *Ericaceæ*, or Heath-worts. A species (the *A. polifolia*, or Marsh Andromeda) occurs in the bogs of

Marsh Andromeda. (One-third natural size.)

Britain, the desolate character of the localities which it inhabits recalling to classical minds of fanciful tendency the barren rock to which Andromeda was chained (see No. 1). The Marsh Andromeda is an evergreen shrub, with beautiful rose-colored drooping flowers. Its shoots poison sheep, as do those of the *A. Mariana*, which grows in America; and the *A. ovalifolia*, of Nepal, acts with similar effect upon goats.

ân-drō-mēdeš, s. pl. [Gr. and Lat. *Andromedæ* (a); suff. -es.] *Astron.*: Meteors which appear to radiate from the constellation Andromeda, first observed on Nov. 27, 1872, and again on the same night of the month, in 1886. Also called *Bielids*.

"The other great shower occurs on the night of Nov. 27, and will be caused by the meeting of the earth with the meteors known as the *Andromedes*, or *Bielids*, which are closely related to the famous missing comet of Biela, if they are not in fact scattered debris of that comet itself."—Garrit P. Serviss, in *New York Journal*, Oct. 23, 1898.

ân-drō-pēt'-al-ōūs, s. [Gr. *anēr*=a man, and *petalon*.] Properly a leaf, but used by botanists for a petal.

Botany: Having stamens transformed into petals, as sometimes takes place when a single flower is converted into a double one.

ân-drōph'-a-gī, s. pl. [Gr. *Androphagoi*, the people described below; *androphagos*=eating human flesh; *anēr*=a man, and 2 aor. inf. *phagein*=to eat.] A race of cannibals, adjacent to Scythia, mentioned by Herodotus; hence cannibals generally.

ân-drō-phō-nō-mā'-nī-ā, s. [Gr. *androphonos*=man-killing, and *mania*=madness.] A mania for killing persons; homicidal insanity.

ân-drōph'-ōr-ūm, s. [Gr. *anēr*=a man, a male; and *phērō*=to bear.]

Bot.: Mirbel's name for the tribe formed by the union of the filaments in monadelphous plants. (Lindley: *Introd. to Bot.*)

ân-drōp'-ō-gōn, s. [In Sp., Port. & Ital. *andropogon*; from Gr. *anēr*=a man, and *pōgōn*=a beard; there being on the flowers a beard-like tuft of hairs.] A genus of plants belonging to the order *Graminaceæ*, or Grasses. *A. sorghum*, better known as *Holcus sorghum*, is extensively cultivated in India as a cereal. It is the Jowaree or Jondla of that country, and is called in English Great Millet. Another species, also grown in the Deccan as a cereal, is *A. saccharatus*, or Shaloo.

ân-dro-sēm'-ūm, s. [Lat. *androsæmon*; Gr. *androsaimon*, lit.=man's blood; *anēr*, genit. *andros*=a man, and *haima*=blood.]

*1. *Ancient classic writers*: A species of St. John's Wort, with blood-red juice: *Hypericum androsæmon*, *montanum* or *ciliatum*.

2. *Modern Botany*: A genus of plants belonging to the order *Hypericaceæ*, or Tutsans. The *A. officinale* is tonic and astringent.

ân-drō-sphīnx, s. [Gr. *androsphīnx*, from *anēr*=a man, and *sphīnx*.] A man-sphinx, that is, a sphinx with the bust of a man, and not, as is usually the case, with that of a woman.

ân-drōt'-ôm-ÿ, s. [Gr. *androtomēō*, lit.=to cut a man; *anēr*=a man, and *temnō*=to cut.] Dissection

of the human body, in contradistinction from zootomy, or dissection of the bodies belonging to the inferior animals.

ân'-droūs, in compos. [Gr. *anēr*=a man, a male.]

Bot.: Pertaining to the stamina. It is used only in composition, as *monandrous* plants, those with one stamen: *diandrous*, those with two, &c.

***ând'-swēre, v. & s.** [ANSWER.]

***ând'-vile, s.** [ANVIL.]

***a-nē'al.** [ANELE.]

a-nē'ar, adv. [Eng. *a*; -near.] Near.

ân-ēc-dō'-tal, a. [Eng. *anecdote*; -al.] Pertaining to anecdotes.

ân-ēc-dōte, s. [In Sw. *anekdot*; Dan. & Ger. *anekdote*; Dut. & Fr. *anecdote*; Port. *anekdota*; Ital. *aneddoto*; Gr. *anekdotos*=something not published, but kept secret: *an*, priv., and *ekdotos*=given out; *ek*=out, and *dotos*=granted; *didōmi*=to give.]

1. Originally something kept unpublished, secret history, or an ancient work not in fact published, though there was no intention of keeping its contents undivulged. The best collection of anecdotes, in this first sense of the word, is generally said to have been that of Muratori, in A. D. 1709: but the thing, if not the name, must have been much older.

"Some modern anecdotes aver,
He nodded in his elbow chair."—Prior.

2. A short but generally striking narrative of some single event in a person's history, related generally with a view of exhibiting his characteristic peculiarities. Among the best collections of anecdotes, in the modern sense, are the "Percy Anecdotes," sent forth by George Byerley and Joseph Clinton Robinson.

ân-ēc-dōt'-ic, ân-ēc-dōt'-ī-cal, a. [Eng. *anecdote*, -ic, -ical. In Fr. *anecdotique*; Port. *anecdotico*.]

1. Pertaining to anecdotes.

"Particular *anecdotal* traditions, whose authority is unknown or suspicious."—Bolingbroke to Pope.

2. In the habit of relating anecdotes.

ân-ēc-dōt'-ist, s. [Eng. *anecdote*; -ist. In Port. *anecdotista*.] One who relates anecdotes by word of mouth or by the pen.

ân-ēc-tā'-sī-ā, ân-ēc-tā'-sis, s. Gr. *an*, priv., and *ektasis*=extension.] Deficient size of an organ or part.

***ā-ne-hēde, s.** [A. S. *an*, *æn*=one; suffix *had*=Eng. *hood* or *head*; as in A. S. *wuduwanhad*=Eng. widowhood; *mædenhad*=Eng. maidenhead or maidenhood.] Oneness, union.

"The *anehede* of Godd with mannis soule."—Richard Rolle de Hampole, viii. (ed. Perry), p. 14.

***an-eī'-mī-ā, an-ē'-mī-ā, s.** [Gr. *aneimōn*=without clothing; *a*, priv., and *eima*=dress, a garment; *hennumi*=to dress. So called from the naked appearance of the spikes of inflorescence.] A genus of plants belonging to the order *Polypodiaceæ*, or Ferns. *A. tomentosa* smells like myrrh.

ân-ēl'-āce, ân-ēl'-ā-ċī-ō, s. [ANLACE.]

***ân-ē'le (1), a-nē'al, *an-nōy'le, v. t.** [A. S. *æl*=oil.] To administer extreme unction.

"Hyt ys not gode to be helut,
How a wyght schal be *an-elet*."

Instructions for Parish Priests (ed. Peacock), 1811-12.

***a-nē'le (2), v. t.** [Derivation uncertain, probably from Lat. *anelo*=to pant.] To attack, to worry. (R. Morris.) To approach. (Sir F. Madden.)

"Bothe wyth bullez and beréz and borez other quyte
And etaynez that hym *anelede*, of the heghe felle."
Sir Gawayne (ed. R. Morris), 722, 723

ân-ē-lēc'-trīc, a. & s. [Gr. *an*, priv., and Eng. *electrics* (q. v.).]

1. *As adjective*: Non-electric.

2. *As substantive (plur.)*: A term formerly used to designate those bodies which were commonly believed to be incapable of becoming electrical by friction.

"... bodies were formerly divided into *ideoelectrics*, or those which become electrical by friction, and *anelectrics*, or those which do not possess this property."—Atkinson: *Ganot's Physics*, 3d ed. (1868), p. 585.

Wolfins in 1709. Anemometers have been made of three kinds: 1st, those in which a windmill twists string round an axle against pressure; 2d, those in which a defined surface, say of a foot square, is pressed against a spring (Fig. 1); 3d, those in which water or some other liquid is made to stand at a higher level in one leg of an inverted syphon than in the other (Fig. 2). The anemometer now most commonly in use is more akin to the first, which also was the earliest type of the instrument, than it is to the second or the third. Four light metallic hemispheres, called from Dr. Robinson, who first employed them, Robinson's cups (Fig. 3), are made to revolve like a vane or weather-cock, and are found to do so at the rate of exactly one-third the velocity of the wind. The result is then recorded in pencil marks by a self-registering apparatus.

ān-ēm-ōm'-ēt-rŷ, s. [In Fr. *anémometrie*; Port. *anemometria*. (For etym. see ANEMOMETRY.)] A measurement of the velocity and strength of the wind. [ANEMOMETER.]

ān-ēm-ōn-ē, ān-ēm-ōn-ŷ, s. [In Dan., Ger., Dut., Fr., Sp., Ital., & Lat. *anemone*; in Port. also *anemola*. Gr. *anemōnē*, lit.=wind-flower, from *anemos*=the wind; because the flowers are easily moved by the wind.]

A. Ord. Lang. (Of the forms *anemone* and *anemony*.) Any wild or cultivated plant of the botanical genus *Anemone*. (See B., 1.)

"From the soft wing of vernal breezes shed,
Anemones, auriculas, enrich'd
With shining meal o'er all their velvet leaves."
Thomson: Spring, 536.

B. Technically. (Of the form *anemone* only.)

Lest ho me es-chaped that I ther chos."

Alliterative Poems; Pearl (ed. Morris), 186-7.

II. Naut.: A term applied to the situation of any mast or boom when standing perpendicularly to the plane of the deck, to that of the tops, &c. Top-masts are also said to be *anend* when they are hoisted up to their usual station at the head of the lower masts.

ān-ē-pāl-lāc'-ta, s. pl. [Gr. *anepallaktos*=not interchanging; *an*, priv., *epallassō*=to change over, to interchange; *epi*=upon, or over, and *allassō*=to change.] The term applied by Aristotle to those animals in which the upper and lower teeth do not interlock; namely, the herbivorous quadrupeds. (Owen: *Classif. of the Mammalia*, p. 2.)

ān-ēr-lŷ, a. Single, solitary. (Scotch.)

ān-ēr-ōid, a. & s. [Gr. *a*, priv., and *nēros*=wet, damp; from *naō*=to flow.]

A. As adjective: Not containing any liquid. (Used chiefly in the expression, "Aneroid barometer.")

Aneroid barometer: A barometer not containing a liquid, but constructed on a totally different principle from a mercurial barometer. Various forms of the instrument exist. One of these consists of a cylindrical metal box exhausted of air, and having its lid of thin corrugated metal. As the pressure increases, the lid, which is highly elastic, and has a spring inside, is forced inward; while, again, as it diminishes, it is forced outward. Delicate multiplying levers then transmit these motions to an index which moves on a scale, and is graduated empirically by a mercurial barometer. It is wonderfully delicate, but is apt to get out of order, particularly when it has been exposed to great variations of pressure. From its portability it is much used for determining the heights of mountains.

Aneroid Barometer.

B. As substantive: A barometer of the kind described under A.

ānes (often pronounced ēns), adv. [A. S. *anes*, genit. m. and n. of *an*, *æn*=(1) one, (2) single, sole, another; *æne*, *æene*=once, at once.]

1. At one time, at once; once. (Scotch.)

2. Only, solely.

ān-ēs-īs, s. [Gr. *anesis*=(1) a loosening, relaxing, (2) remission, abatement; *aniēmi*=to send up or forth, . . . to slacken, to relax: *ana*=up, and *hiēmi*=to set a-going.]

Med.: The abatement of morbid symptoms.

a-nēs-ō-rhīz'-a, s. [Gr. *anēson*, or *anēsson*, the same as *anēthon*=dill anise, and *rhiza*=root.] A genus of plants of the Umbelliferous order, of which one species, the *A. capensis*, is used in Southern Africa as an esculent.

ān-ēs-thē'-sī-a, s. Same as *Anæsthesia* (q. v.).

a-nēth'-ōl, s. [Lat. *anethum*=anise; *oleum*=oil.] [OIL OF ANISE.]

a-nēth'-ūm, s. [In Fr. *aneth*; Ital. *aneto*; Sp. *eneldo*; Port. *endro*. From Lat. *anethum*; Gr. *anēthon*=anise or dill.]

Bot.: A genus of plants belonging to the order Apiaceæ, or Umbellifers. *A. graveolens* is the dill. Its fruit is aromatic and carminative.

a-neū'ch (h guttural), adv. [ENOUGH.] Enough. (Scotch.)

ān-eūr-īsm, ān-eūr-ŷsm, s. [In Fr. *anévrisme*, *anévrisme*; Sp. & Port. *aneurisma*; Gr. *aneurysma*, and *aneurysmos*, from *aneuryō*=to widen, to open; *eruyō*=to make wide or broad; *eury*=wide, broad.]

Med.: A morbid dilatation of the aorta, or one of the other great arteries of the body. Four varieties of this malady have been described. In the first the whole circumference of the artery is dilated; in the second, or true aneurism, the dilatation is confined to one side of the artery, which then takes the form of a sac; in the third, or false aneurism, the internal and middle coats of the artery are ulcerated or ruptured, while those which are external or cellular expand into a sac; in the fourth, or mixed variety, the false supervenes upon the true aneurism, or upon dilatation.

ān-eūr-īsm'-al, a. [Eng. *aneurism*; -al. In Fr. *anévrismal*, *anévrismal*; Port. *aneurismal*.] Pertaining to an aneurism; affected by an aneurism.

"... a rational treatment of *aneurismal* and wounded arteries."—Todd & Bowman: *Physiol. Anat.*, vol. i., p. 29.

a-new', adv. [Eng. *a*=on; *new*. In Sw. *a nuo*.]

1. Another time; over again; afresh, again.

"... when, lo! the North anew,

With stormy nations black, on England pour'd
Woes the severest e'er a people felt."

Thomson: *Liberty*, pt. iv.

2. Newly, in a new manner, freshly.

"He who begins late is obliged to form *anew* the whole disposition of his soul . . ."—Rogers.

ān-frāc'-tū-ōse, a. [From Lat. *anfractuosus*=winding, crooked.] [ANFRACTUOSITY.] Anfractuous.

"Behind the drum are several vaults and *anfractuose* cavities in the ear-bone, so to intend the least sound imaginable, that the sense might be affected with it; as we see in subterraneous caves and vaults how the sound is redoubled."—Ray.

ān-frāc'-tū-ōs'-ī-tŷ, s. [Eng. *anfractuose*; -ity. In Fr. *anfractuosité*; Lat. *anfractus*=(1) a curving or bending, an orbit; (2) a tortuous route.] [ANFRACTUOUS.] The quality or state of being anfractuous; tortuousness.

"... their surface is generally smooth: the *anfractuosities*, when present, are few and simple."—Owen: *Classif. of the Mammalia*, p. 24.

ān-frāc'-tū-ōus, a. [In Fr. *anfractueux*; Port. *anfractoso*. From Lat. *anfractus*, adj.=broken, bent, round, winding, crooked; *amb*, and *fractus*=broken, pa. par. of *frango*=to break.]

A. Ordinary Language:

1. Lit.: Winding, crooked, mazy; full of winding passages; spiral.

"... with *anfractuous* spires and cocleary turnings, about it."—Fuller: *Worthies*; London.

2. Fig.: Tortuous.

"... *anfractuous* and involved consequences."—Bp. Taylor: *Rule of Conscience*, bk. ii., c. 3.

B. Technically:

Botany: Spiral, resembling in direction the spires of a corkscrew, or full of turnings and winding passages. (Lindley.)

ān-gei-ō-tēn'-ic, *a.* [Gr. *angeion*=(1) a vessel, (2) a blood-vessel; *teinō*, fut. *tenō*=to stretch, strain, extend.] *Lit.*=straining the blood-vessels. (See below.)

angiotenic fever, *s.* A name of inflammatory fever. Pinel believed its seat to be in the organs of circulation.

ān-gei-ōt'-ōm-y, *s.* [ANGIOTOMY.]

ān'-gēl, *ān'-gēl (1), *s. & a.* [In A. S. *engel*, *angel*; Sw., Dan., Dut. & Ger. *engel*; Russ. *angel*; Irish *amgeal*, *angiol*; Fr. *ange*; Sp. *angel*; Port. *anjo*; Ital. *angelo*; Lat. *angelus*. From Gr. *angelos*=(1) a messenger, (2) an angel, (3) the message brought; *angellō*=to bear a message, to announce.]

A. As substantive:

I. Ordinary Language:

1. *Gen.*: *A messenger, one employed to carry a message. a *locum tenens*, a man of business. (In this sense it is masc. or fem.)

"Resigns his crown to angel Carwell's trust."

Marvell: Britannia and Raleigh, 122.

¶ Grosart, the editor of Marvell's works, considers that this is the true explanation of the very common "Angel Inn." (*Andrew Marvell: Poems*, ed. Grosart, vol. i., p. 335.)

2. *Spec. Lit.*: One of an order of spiritual beings superior to man in power and intelligence, vast in number, holy in character, and thoroughly devoted to the worship and service of God, who employs them as his heavenly messengers. Their existence is made known to us by Scripture, and is recognized also in the Parsee sacred books.

"... noe man, noe angle, noe god."—*Orthographie and Congruitie of the Britan Tongue* (ed. Wheatley).

"And the angel answering said unto him, I am Gabriel, that stand in the presence of God."—*Luke i. 19.*

"We find, as far as credit is to be given to the celestial hierarchy of that supposed Dionysius, the senator of Athens, the first place or degree is given to the *angels* of love, which are termed Seraphim; the second to the *angels* of light, which are called Cherubim; and the third, and so following places, to thrones, principalities, and the rest, which are all *angels* of power and ministry, so as the *angels* of knowledge and illumination are placed before the *angels* of office and domination."—*Lord Bacon: Adv. of Learn.*, bk. i.

¶ We learn from Scripture that many angels, originally holy like the rest, fell from their pristine purity, becoming so transformed in character that all their powers are now used for the purpose of doing evil instead of good. These are to be identified with the devils so frequently mentioned in holy writ.

"And the *angels* which kept not their first estate but left their own habitation, he hath reserved in everlasting chains under darkness unto the judgment of the great day."—*Jude 6.*

"He cast upon them the fierceness of his anger, wrath, and indignation, and trouble, by sending evil *angels* among them."—*Ps. lxxviii. 49.*

3. *Figuratively*:

(a) Christ in angelic form or otherwise. (Compare *Gen. xxxi. 11-13.* with *John i. 18.*)

(b) A spirit which has assumed the aspect of some human being. The reference probably is to the Jewish belief that each person has his or her guardian angel.

"But she constantly affirmed that it was even so. Then said they, It is his *angel*."—*Acts xii. 15.*

(c) The representative of each of the seven Asiatic churches. "Unto the *angel* of the church of Ephesus write" (*Rev. ii. 1*); and "unto the *angel* of the church of Smyrna write," ver. 8. (See also *ii. 12, 18; iii. 1, 7, 14.*)

(d) An appellation given by an intimate friend, or especially by a lover, to the object of his or her affection.

"For Brutus, as you know, was Cæsar's *angel*:"

Judge, O you gods, how dearly Cæsar loved him!"

Shakesp.: Julius Cæsar, iii. 2.

(e) A person of seeming innocence, purity, and benevolence.

"Oh, what may man within him hide,
Though *angel* on the outward side!"

Shakesp.: Measure for Measure, iii. 2.

4. The name of a beautiful fish, which has its body covered with large green scales, and the laminae above the gills armed with cerulean spines. It is one of the Chatodons, and occurs on the coast of Carolina. It is quite different from the angel-fish (q. v.).

II. Technically:

Numis.: A gold coin, named from the fact that on one side of it was a representation of the Archangel

Angel of Edward VI.

Michael in conflict with the Dragon (*Rev. xii. 7*). The reverse had a ship with a large cross for the mast, the letter E on the right side, and a rose on the left; while against the ship was a shield with the usual arms. It was first struck in France in 1340, and was introduced into England by Edward IV. in 1465. Between his reign and that of Charles I. it varied in value from 6s. 8d. to 10s. It is not now current either in France or England. The last struck in England were in the reign of Charles I. (*H. Noel Humphreys: Coins of England*, 5th ed., 1848; and other authorities.)

"... shake the bags

Of hoarding abbots; their imprisoned *angels*

Set them at liberty."—*Shakesp.: K. John*, iii. 3.

"... and a counterfeit *angel* is made more like a true *angel* than if it were an *angel* coined of China gold."—*Bacon: Inter. of Nat.*, ch. xi.

B. As adjective: Angelical.

"All *angel* now—yet little less than all,
While still a pilgrim in our world below."

Scott: Lord of the Isles (Conclusion).

C. In composition, *Angel* is generally a substantive, but sometimes it is an adjective.

angel-age, s. [Eng. *angel*; and *age*=time of life.] An age or period of life at which a certain character is possessed, or certain actions done. It is not the same as *ANGELAGE* (q. v.).

"Why should you two,

That, happily, have been as chaste as I am,
Fairer, I think, by much (for yet your faces,
Like ancient well-built piles, show worthy ruins),
After that *angel-age* turn mortal devils?"

Beaumont and Fletcher: Valentinian, i. 2.

angel-bed, s. A bed without posts.

angel-choir, s. A choir of angels, especially that which sang when Christ's birth was announced to the shepherds at Bethlehem (*Luke ii. 13, 14*).

"God set the diadem upon his head,
And *angel-choirs* attended."

Cowper: The Task, bk. vi.

angel-fish, s. A fish of the Squalidae, or Shark family, the reverse of angelic in its look, but which derived its name from the fact that its extended pectoral fins present the appearance of wings. It is called also Monk-fish, Fiddle-fish, Shark-ray, and Kingston. It is the *Squatina angelus* of

Angel-fish.

Duméril, the *Squalus squatina* of Linnæus. It has an affinity to the Rays, as well as to the Sharks. It lies close to the bottom of the sea, and feeds ravenously on flat-fishes. It sometimes attains the length of seven or eight feet. It is found on the coasts of Europe and North America.

angel-food, s. A delicate white cake, composed chiefly of beaten whites of eggs, powdered white sugar and sifted wheat flour.

angel-form, s. A form deemed to be or resemble that of an angel.

angelica, or Garden Angelica. It is sometimes cultivated for its leaf-stalks, which are blanched and eaten as celery, or candied with sugar. It is regarded as stimulant and anti-pestilential.

"In his hand he carried,
Angelica uprooted,
With delicious fragrance
Filling all the place."

Longfellow: The Saga of King Olaf, ch. xvi.

angelica-root, s. The root of the *Arch-angelica officinalis*. It is fragrant, bitter, and pungent. When first tasted it is sweet, but leaves behind a glowing heat in the mouth. The Laplanders eat the stalks, roasted in hot ashes, for coughs, hoarseness, &c., and boil the tender flowers in milk to promote perspiration in catarrh attended with fever. In a candied state it is eaten as a sweetmeat.

angelica-stalk, s. The stalk of an angelica plant.

"Now will I confess it.
Better things are jewels
Than angelica-stalks are
For a Queen to wear."

Longfellow: The Saga of King Olaf, ch. xvi.

angelica-tree, s. *Aralia spinosa*. Its leaves are like those of the Angelica, whence its name. It is a small tree ornamental for lawns. The berries of the tree are used for relieving rheumatism and colic.

ăn-gěl'-i-cal, a. [ANGELIC.]

ăn-gěl'-i-cal-lý, adv. [Eng. *angelical*; -ly.] In an angelic manner; like an angel.

ăn-gěl'-i-cal-něss, s. [Eng. *angelical*; -ness.] Having the qualities of an angel.

Ăn-gěl'-i-cî, s. pl. [Plural of Lat. *angelicus*=angelic.]

Church History: The name given to an old Christian sect who greatly venerated angels, if indeed they did not attribute to them even the creation of the world. They flourished about A. D. 180.

ăn-gěl'-i-fý, v. t. [Lat. *angelus*=an angel; *facio*=to make.] To render angelic.

"The soul at this first resurrection must be spiritualized, refined, and angelified."—*Farinon: Sermons* (1647), p. 55.

Ăn-gěl'-i-nă, s. [A female name, from Lat. *angelus*=an angel.] An asteroid, the sixty-fourth found. It was discovered by Tempel, on the 6th of March, 1861.

An'-gěl'-iteg, s. pl. [In Ger. *Angeliten*. Named from Agelius, or Angelius, a part of Alexandria in which they used to meet.] An old Christian sect, a branch of the Sabellians, who flourished toward the termination of the fifth century. They believed that the persons of the Trinity were not the same or self-existent, but distinct gods, existing by participation in a deity common to them all. They were called also Severites and Theodosians, from Severus and Theodosius, who were successively their leaders.

ăn-gěl'-ôl'-ôg-ý, s. [Gr. *angelos*=an angel, and *logos*=a discourse.] The department of theology which treats of angelic beings.

ăn-gěl'-ô-nî-a, s. [Sp. *angelon*; from Lat. *angelus*=Gr. *angelos*=an angel.] A genus of plants belonging to the order Scrophulariaceæ (Figworts.) *A. salicariæfolia*, or Violet Angelonia, is a herbaceous stove-plant, with fine, large, light-blue flowers.

ăn-gěl'-ôph'-ăn-ý, s. [Gr. *angelos*=an angel; *phainô*=to bring to light; to make to appear.] The appearance or manifestations of angels.

"... the Theophany and Angelophany of the Old and New Testament."—*Strauss: Life of Jesus* (Marti-neau's transl.), vol. i., § 14, p. 67.

ăn-gěl'-ôt, s. [Fr.]

1. **Numis.**: An ancient French coin struck at Paris while that capital was temporarily in English occupation. It was so called from having on it the figure of an angel supporting the escutcheon of England and France.

2. A small cheese made in Normandy.

3. **Music**: A musical instrument somewhat resembling a lute.

ăn-gěl'-ús, s. A prayer to the Virgin, instituted by Pope Urban II., offered in Roman Catholic countries in the morning, at noon, and in the evening, at the sound of a bell called the *Angelus*. It is so called because it begins with the words "Angelus Domini nuntiavit Mariæ" (the angel of the Lord announced to Mary). [HAIL-MARY.]

"Sweetly over the village the bell of the *Angelus*
sounded."
Longfellow: Evangeline, i. 4.

ăng'-ěr, s. [A. S. *ange*=straitened, sorrowful, troubled, from *leel*, *angr*=grief, sorrow. *Ang* in compos.=trouble. It implies narrowness, constraint, or difficulty; as *angsum*, *angesum*=difficult, narrow; *angbreost*=an asthma, a difficulty of breathing (ANGUIST). Cognate with *enge*=narrow, confined. Mediæv. Lat. *angaria*=vexation, trouble, distress, anxiety; Lat. *ango*; Greek *angchô*=to press tight.]

*1. **Originally**: Any vexation, distress, or uneasiness of mind having its origin—

(a) In bodily pain.

"I made the experiment, setting the moxa where the first violence of my pain began, and where the greatest anger and soreness still continued, notwithstanding the swelling of my foot."—*Temple*.

¶ Though the substantive has now lost this sense, the adjective still retains it; for we speak of "an angry wound."

(b) In any other cause. *Spec.*, grief.

"She held hire hard in thralles wune,
And dede hire forge and anger mune,"

Story of Gen. and Exod. (ed. Morris), 971-72.

2. **Now**: An emotion or passion of the human heart excited by the spectacle of wrongdoing, especially to one's self. When it arises, the heart beats more frequently, the blood circulates more rapidly, the voice becomes loud and menacing, all thought of personal danger passes away, and a desire is felt, if indeed it be not carried out, of punishing the offender. Essentially anger is a virtuous emotion, planted in the breast to intimidate and restrain wrongdoers; but, through human infirmity, it is almost sure to be abused in one of four ways. A person under its influence may be hasty, passionate, fretful, or revengeful.

"... anger is like

A full-hot horse, who being allow'd his way,
Self-mettle tires him."—*Shakesp.: Henry VIII., i. 1.*

"A slight flush

Of moral anger previously had tinged
The old man's cheek."—*Wordsworth: Exc., bk. v.*

¶ In Scripture it is frequently attributed to God.

"And the Lord's anger was kindled the same time, and He swore, saying . . ."—*Numb. xxxii. 10.*

"... let not thine anger burn against thy servant."
—*Gen. xlv. 18.*

¶ In poetry anger has sometimes, though rarely, a plural. In this case it ceases to be an abstract word, because a concrete one=successive acts or states of indulgence of anger.

"Delicious spites and darling angers."

Tennyson: Madeline.

ăng'-ěr, v. t. & i. [From the substantive.]

A. Transitive:

*1. To render painful (used of the body); to trouble, to vex (used of the mind).

"He turneth the humors back, and maketh the wound bleed inward, and angereth malign ulcers and pernicious imposthumations."—*Bacon*.

2. To inspire with anger, to provoke. *Used—*

(a) Of man:

"By them that are no people, and by a foolish nation I will anger you."—*Romans x. 19.*

(b) Of God:

"They angered him also at the waters of strife."—*Ps. cvi. 32.*

B. Intransitive: To become angry. (*Scotch.*)

"When neebors anger at a plea."

Burns: Scotch Drink

ăng'-ěred, pa. par. & a. [ANGER, v.]

"The flush of anger'd shame

O'erflows thy calmer glances."

Tennyson: Madeline, 3.

ăng'-ěr-fûl, a. [Eng. *anger*; -ful(l).] Angry.

ăng'-ěr-îng, pr. par., a. & s. [ANGER, v.]

ăng'-ěr-lěss, a. [Eng. *anger*; -less.] Calm; without anger.

ăng'-ěr-lý, *ăng'-ěr-lich, adv. [Eng. *anger*, -ly; A. S. *lic*=like.] Angriely; like an angry person.

"And angerlich y wandrede the Austyns to proue,"

Pierce the Plowman's Crede (ed. Skeat), 268.

"Why, how now, Hecate? you look angerly."

Shakesp.: Macbeth, iii. 5.

***ăng'-ěr-něss, s.** [Eng. *anger*; -ness.] The state of being angry.

"Hail, innocent of angerness!"

MS. cited by Warton, Hist. Eng. Poetry, i. 315.

ăng'-i-ên-chý'-mă, s. [Gr. *angeion*=a vessel, and *engchyma*=an infusion; *engcheô*=to pour in; *en*=in, and *cheô*=to pour.]

Bot.: Professor Morren's name for vascular tissue. It is his fourth division of tissue, and comprehends (1) *Pleurenychyma*, or woody tissue; (2) *Trachenchyma*, or spiral vessels; (3) Modified *trachenchyma* or ducts; (4) *Cinenchyma*, or latiferous vessels.

ăn-gî'-nă, s. [In Fr. *angine*; Port. & Lat. *angina*=the quinsy. From *ango*, Gr. *anghō*=to press tight, especially the throat; to strangle.]

Medicine:

*1. A quinsy or other inflammatory disease of the throat.

"*Angina*. . . . It is an inflammation on the parts of the throat, subservient to respiration, speech, and deglutition; it is called a strangulation of the fauces, more properly an inflammation of the internal fauces."—*Parr: Med. Diet. (1809), i. 116.*

2. The *angina pectoris* (q. v.).

angina pectoris, s. [Lat.=angina of the breast.] The name first given by Dr. Heberden in 1768, and since then universally adopted as the designation of a very painful disease, called by him also a disorder of the breast; by some others "spasm of the chest," or "heart-stroke," and popularly "breast-pang." It is characterized by intense pain in the præcordial region, attended by a feeling of suffocation and a fearful sense of impending death. These symptoms may continue for a few minutes, half an hour, or even an hour or more. During the paroxysm the pulse is low, with the body cold, and often covered with clammy perspiration. Death does not often result from the first seizure, but the malady tends to return at more or less remote intervals, generally proving fatal at last. There are several varieties of it: an organic and functional form; and again a pure or idiopathic and a complex or sympathetic one have been recognized. Angina is produced by disease of the heart. It specially attacks elderly persons of plethoric habits, men oftener than women, generally coming on when they are walking, and yet more if they are running up-stairs or exerting great effort on ascending a hill. Stimulants should be administered during the continuance of a paroxysm; but it requires a radical improvement of the general health to produce a permanent effect on the disorder.

ăn-gî'-nôşe, a. [Lat. *anginosus*, fem. *anginosa*.] Pertaining to angina (q. v.).

anginose scarlatina, s. [Lat. *scarlatina anginosa*.] A variety of scarlatina, more severe than *Scarlatina simplex*, and less dangerous than *Scarlatina maligna*. [SCARLATINA.]

ăn-gî'-nôş, a. [Lat. *anginosus*; Fr. *angineux*.] Pertaining to the *angina pectoris*.

"... the *anginous* symptoms being either feebly manifested . . ."—*Cyclo. Pract. Med., vol. i., p. 87.*

ăn-gî'-ô-cărp'-i-ănş, s. pl. [ANGIOCARPOUS.]

Bot.: Mirbel's second class of fruits. The fruit is seated in envelopes not forming part of the calyx. It is opposed to *Gymnocarpium* (q. v.).

ăn-gî'-ô-cărp'-ôuş, a. [Gr. *angeion*=a vessel, a pail, a receptacle; from *angos*=a vessel, a jar, and *karpos*=fruit.]

Bot.: With fruit seated in an envelope not constituting part of the calyx.

ăn-gî'-ôg'-răph-ý, s. [In Fr. *angiographie*. From Gr. *angeion*= . . . a vessel (of the human body), and *graphê*=a drawing, a writing, a description.]

Anat.: A description of the vessels of the human body, arteries, veins, lymphatics, &c.

ăn-gî'-ôl'-ô-gý, s. [In Fr. *angiologie*; Sp. & Port. *angiologia*. From Gr. *angeion*=a vessel, and *logos*=a discourse.]

Anat.: The science which treats of the arteries, veins, and other vessels in the human body.

ǎn-gi-ō-mōn-ō-spērm'-ōūs, *a.* [Gr. *angeion*=a vessel; *monos*=alone; and *sperma*=seed.]

Bot.: Producing one seed only, and that not naked, but in a seed-vessel.

ǎn-gi-ōp-tēr-is, *s.* [Gr. *angeion*=a vessel; *pteris*=a kind of fern.] A genus of plants belonging to the alliance Filicales (Ferns), and the order Danæaceæ (Danæworts). The *A. erecta* is used with a fern of another genus in the South Sea Islands in preparing cocoanut oil.

ǎn-gi-ō-scōpe, *s.* [Gr. *angeion*=a vessel, and *skopeō*=to look at, to contemplate.] An instrument designed to be employed in the study of the capillary vessels of an organized body.

ǎn-gi-ō-spērm, *s.* [Gr. *angeion*=a vessel, and *sperma*=seed.]

Bot.: A plant presenting the characters of Linnaeus' order Angiospermia (q. v.).

ǎn-gi-ō-spērm'-i-a, *s. pl.* [Gr. *angeiospermus*=having the seed in a capsule; also *enangeiospermatus*, from *en*=in, *angeion*=vessel, and *sperma*=a seed.]

Bot.: In the artificial classification of Linnaeus the second order of the class Didynamia. It includes those didynamous plants which have their seeds inclosed in a seed-vessel, as contradistinguished from those in which they are apparently "naked." [GYMNOSPERMIA.] Most of the Scrophulariaceæ and their immediate allies fall under this Linnaean order.

ǎn-gi-ō-spērm'-ōūs, *a.* [ANGIOSPERMIA.]

Bot.: Having the seeds inclosed in a pericarp. It is opposed to Gymnospermous (q. v.). [ANGIOSPERMIA.]

ǎn-gi-ōs-pōr-ōūs, *a.* [Gr. *angeion*=a vessel, and *poros*=a seed, a spore; *speirō*=to sow.]

Bot.: Having the spores inclosed in a hollow shell or bag: *e. g.*, *Lycopodon*.

ǎn-gi-ōt-ōm-ŷ, *s.* [In Fr. *angiotomie*; Sp. & Port. *angiotomia*. From Gr. *angeion*=a vessel of the body, and *tomos*=a cut, from *temnō*=to cut.]

Med.: The cutting open of a vein, an artery, or some other vessel of the body.

ǎng'-lar-īte, *s.* [From Anglar, one of the places where it is found.] A mineral, a massive variety of Vivianite (q. v.).

ǎn'-gle (1), *s.* [A. S. *angel*, *angil*, *angl*=a hook, a fishing-hook; Dan. *angel*; Dut. *hengel*.] A fishing-rod, with its attached line and hook.

"They take up all of them with the angle, they catch them in their net, and gather them in their drag. . . ."—*Hab. i. 15.*

"The patient fisher takes his silent stand,
Intent, his angle trembling in his hand:
With looks unmoved he hopes the scaly breed,
And eyes the dancing cork and bending reed."
Pope: Windsor Forest, 137-140.

angle-rod, *s.* A fishing-rod.

"The second bigness is used for angle-rods. . . ."—*Bacon: Nat. Hist., Cent. vii., § 656.*

ǎn'-gle, *v. i. & t.* [From the substantive. In Dan. *angle*; Dut. *hengelen*; Ger. *angeln*.]

↗ *Intransitive*:

1. *Lit.*: To fish with a rod, line, and hook.

"The ladies angling in the crystal lake,
Feast on the waters with the prey they take."
Waller.

"But angled in the higher pool."
Tennyson: The Miller's Daughter.

2. *Fig.*: To attempt to gain human hearts by the use of tempting bait of one kind or other.

"She knew her distance, and did angle for me,
Madding my eagerness with her restraint."
Shaksp.: All's Well that Ends Well, v. 3.

†*B. Trans.*: To attempt to gain, or allure.

"If he spake courteously, he angled the people's hearts: if he were silent, he mused upon some dangerous plot."
—*Sidney.*

"I have angled me on with much pleasure to the thatch'd-house; and now I find your words true, That good company makes the way seem short."—*Walton: Compl. Angler, ch. 1.*

ǎn'-gle (2), *s.* [In Fr. *angle*; Sp. & Port. *angulo*; Ital. *angolo*; from Lat. *angulus*=an angle, a corner; Gr. *angkylos*=crooked. In Wel. *ongl* is an angle. Cognate with A. S. *angel*, *angil*=a hook (see ANGLE, No. 1); Teut. *ang* or *eng*=a narrow strip.]

A. Ordinary Language: The opening between two lines which meet one another; a corner, as of a room.

"For, where the rock and wall
Met in an angle, hung a tiny roof."
Wordsworth: Excursion, bk. ii.

B. Technically: The inclination of two lines to one another.

1. *Geometry*: Angles may be ranked under two leading divisions, *plane* and *solid* angles. A *plane* angle is the inclination of two lines to one another in a plane, which two lines meet together, but are not in the same straight line. [PLANE.] A *solid* angle is that which is made by the meeting in one point of more than two plane angles, which, however, are not in the same plane. [SOLID.] Each of the leading divisions, plane and solid angles, may again be subdivided into *rectilinear*, *curvilinear*, and *mixed* angles. A *plane rectilinear* angle is the inclination to each other of two straight lines, which meet together, but are not in the same straight line (Fig. 1). A *curvilinear* angle is the inclination to each other of two curved lines, which meet in a point (Fig. 2). A *mixed* angle is one formed by the meeting of a curve and a straight line (Fig. 3).

Fig. 1.

Fig. 2. Fig. 3.

Fig. 4.

Fig. 5.

Angles are measured by arcs (Fig. 4, M, N, P, Q), and it is immaterial with what radius the latter are described. The result is generally stated in degrees, minutes, and seconds, . . . ; thus—36° 14' 23"=36 degrees, 14 minutes, and 23 seconds. When an angle is isolated from other angles, it may be named by a single letter, as A (Figs. 1 to 4); but when two or more angles meet at one point they are named by three letters, never by one or two. In such cases the letter at that point is always named in the middle. Thus, in Fig. 5 there are two angles, the first of which may be named indifferently B C A or A C B, but not B A C; and the second D C A or A C D, but not C A D. The point at which the lines forming the angle meet is called the *angular point* or the *vertex* of the angle, and the lines themselves the *sides* or *legs* of the angle. In Figs. 1, 2 and 3, A is the angular point of the respective angles, the legs or sides being unlabeled. In Fig. 5, C is the angular point, and B C, A C, and C D, or C B, C A, and D C are the sides or legs.

Plane rectilinear angles are generally divided into *right* and *oblique*, or into *right*, *obtuse*, and *acute*. When a straight line standing upon another straight line makes the two adjacent angles (those on the right and left of it) equal to one another, each of them is called a *right angle*. An *oblique* angle is one which is not a right angle. An *obtuse* angle is that which is greater than one right angle, but less than two. An *acute* angle is that which is less than a right angle: both are oblique. The angles marked A in Figs. 1 and 4 are acute angles. In Fig. 5, if A C make the adjacent angles A C B and A C D equal to each other, then each of them is a right angle. In Fig. 6, A C D is an obtuse angle, and A C B an acute angle. Analogous terms exist in the case of curvilinear and mixed angles. Thus, in Figs. 2 and 3, A is an acute angle. A *spherical* angle is one formed by the intersection or the meeting of two great circles of a sphere. Many other designations are applied to angles; thus, in Geometry there are *opposite*, *exterior*, *interior*, *alternate*, *vertical*, and other angles, also angles of *contact*, &c. (See the italicized words.)

2. *Mech.*: In this science there are angles of *direction*, of *friction*, of *repose*, &c.

3. *Optics* has angles of *incidence*, of *reflection*, of *refraction*, of *deviation*, of *polarization*, &c.

4. *Astronomy* has angles of *position*, of *situation*, of *elevation*, *inclination*, *depression*, &c. (For these see the italicized words with which *angle* is combined.)

5. *Fortification*. *Dead angle*: An angle so formed that a small plot of ground in front of it can neither be seen nor defended from the parapet.

6. *Anatomy*: The *angle of the jaw* is the point at which the vertical hinder edge of the ramus, descending from the condyle, meets the horizontal inferior border.

¶ *Facial angle*. [FACIAL.]

angle-bar, *s.*

Joinery: A vertical bar at one of the angles of a polygonally-shaped window.

angle-bead, *s.* A bead of wood or other material affixed vertically to the exterior angle of a room or similar erection, and placed in the same plane with the plaster. It is called also *staff-bead*.

angle-brace, angle-tie, *s.*

Carpentry: A piece of timber affixed to two adjacent sides of a quadrangular frame, so as to make,

Angle-brace.

with the angle to which it is opposite, a right-angled triangle. If the wood join the two opposite angles of the rectangle, then it is called the *diagonal brace* or *tie*.

angle-bracket, *s.* A bracket placed at the point where two straight lines containing an angle meet, but not at right angles to either of those sides.

angle-capital, *s.*

Architecture: A term used in describing Ionic capitals. It signifies such a capital on the flank column of a portico, having the volutes placed at an angle of 45° with the plane of the front and returning friezes.

angle-float, *s.*

Plastering: A float made to any internal angle of a room. [FLOAT.]

angle-iron, *s.* Plates of iron, angular in form, used for the edges of any structure.

angle-meter, *s.* An instrument for measuring angles.

angle-modillion, *s.* [MODILLION.]

angle-rafter, *s.*

Architecture: A rafter placed along the angle of a hipped roof.

angle-shades, *s.* A fine British moth, *Phlogophora meticulosa*, the generic name, which means *bearing flame*, alluding to the shape of the markings on the anterior wings. The insect has long, slender ciliated antennæ, the abdomen tufted, and the wings dentate. The upper wings are pale rosy white, clouded with olive brown, each with a large triangular purplish mark in the center, and beyond it a white band. The hinder wings are whitish, with a dusky central crescent, and two or three faint transverse-waved dusky lines. The expansion of the wings is nearly two inches. The caterpillar is green, with a row of oblong white spots on the back, and a continuous white line on each side. It feeds on culinary vegetables and various field plants.

angle-staff, *s.* A vertical head of wood or other material affixed to the exterior angle of a building, in line with the plaster.

angle-tie, *s.* [ANGLE-BRACE.]

ǎn'-gled, *a.* [Eng. *angle* (2); -ed.] Furnished with angles.

" . . . fifty-angled custards."

B. Jonson: Masques, Nept. Triumph.

"The thrice three-angled beech-nut shell."

Bp. Hall: Sat. iii. 1.

ǎn'-gle-mē-tēr, *s.* [Lat. *angulus*, and Gr. *metron*=a measure.] An instrument used by geologists to measure the dip of strata, the angle of joint-planes, &c.

ǎng'-lēr, *s.* [Eng. *angle*; -er. In Ger. *angler*; Dut. *hengelaar*.]

1. *Gen.*: One who angles; one who fishes with a rod.

2. *Spec.*: A fish called also sea-devil, Frog, or Frog-fish; and in Scotland, Wide-gab, signifying wide mouth. It is the *Lophius piscatorius* of Linnaeus, and is placed under the order Acanthopterygii, and the family which has the pectoral fins foot-like. It has an enormous head, on which are placed two elongated appendages or filaments, the first of them broad and flattened at the end. These, being movable, are maneuvered as if they were bait; and when small fishes approach to examine them, the angler, hidden amid mud and sand, which it has stirred up by means of its pectoral and ventral fins, seizes them at once; hence its name. It occurs along the British coasts, and is three, or, occasionally, five feet long.

ǎng'-lēs-īte, *s.* [Named from the isle of Anglesia, in which it was first found.] A mineral classed by Dana under the Celestite group of Anhydrous Sulphates, Chromates, and Tellurates. Anglesite has been called also "Lead mineralized

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

by vitriolic acid and iron." "Lead Vitriol," and "Sulphate of Lead." It is orthorhombic. The hardness is 2.75-3; the sp. gr. 6.12 to 6.39. The luster is resinous, vitreous, or adamantine; the color white, tinged with yellow, gray, green, or blue. Anglesite varies from transparent to opaque. It is very brittle. The composition is sulphuric acid, 26.4; oxide of lead, 73.6=100. In addition to Anglesea, it is found in Cornwall, Derbyshire, Cumberland, in Scotland at Leadhills, in Australia, in America, and elsewhere. A variety of it is called Sardinian (q. v.).

Cupreous anglesite: A mineral, the same as LINARITE (q. v.).

†Ang'-lic, Ang'-li-can, a. & s. [In Dut. *Angli-caansch*; Ger. *Anglicaner* (s.); Fr. *Anglican*; Sp., Port. & Ital. *Anglicano*; Lat. *Anglicanus*. From *Anglia*, a Latin name of Britain, which at a yet unascertained date superseded that of Britannia, which had been formerly employed. The Lat. *Anglia* is from A. S. or O. S. *Anglen*, now *Angeln*, a district in the southeast of Schleswig, extending from the river Schlei, in the south, to the Fleusburg Hills on the north, with an area of about 330 square miles, and a population at present amounting to about 50,000. *Angeln* comes from A. S. *ange*, *enge*=narrow.]

A. As adjective:

1. Pertaining to England; English.

"... the sober principles and old establishment of the Anglican church."—*Fell: Life of Hammond*, § 1.

2. Pertaining to one holding the religious views described under B., 1 or 2. *Spec.*, pertaining to one holding high church views or to high churchism.

B. As substantive:

1. In the sixteenth century: One who held Roman Catholic doctrine, but preferred the rule of the English king or parliament to that of the Papacy.

"Secondly" [the reference is to A. D. 1539], "there were the *Anglicans*, strictly orthodox in the speculative system of the faith, content to separate from Rome, but only that they might bear Italian fruit more profusely and luxuriantly when rooted in their own soil."—*Froude: Hist. Eng.*, pt. i., vol. iii., ch. xvi.

2. Now:

(a) A member of the Church of England belonging to the High Church party.

(b) An English churchman, whether high, low, or broad.

"The old persecutors, whether Pagan or Christian, whether Arian or Orthodox, whether Catholics, *Anglicans*, or Calvinists, actually were, or at least they had the decorum to pretend to be, strong Dogmatists."—*Burke: Letter to R. Burke*.

Ang'-li-can-ism, s. [Eng. *Anglican*; -ism. In Fr. *Anglicanisme*.]

1. The Anglican system of doctrine or adherence to it.

2. Admiration of England leading to efforts to copy its institutions.

Ang'-li-cē, adv. [Lat.]

1. In English. (Used of language or idiom.)

2. After the manner of the English. (Used of manners or customs.)

¶ This word is frequently written thus: *Anglicē*.

Ang'-li-çi-fy, v. t. [*Anglici*, genit. sing. of nomin. pl. of Lat. *Anglicus*; suff. -fy, from *facio*=to make.] To make English; to Anglicize.

Ang'-li-çism, s. [In Ger. *Anglicism*; Fr. *anglicisme*; Port. & Ital. *Anglicismo*.] The English idiom, such as our countrymen are almost sure to introduce when they attempt to speak or write an ancient classic or a modern Continental tongue.

"They corrupt their style with untutored *Anglicisms*."—*Milton*.

Ang'-li-çize, v. t. [Eng. *Anglic*; -ize. In Ger. *Englicisiren*.] To make English; to assimilate to the English language in idiom, or to the English people in pronunciation, manners, customs, or sympathy.

"He [the letter U] pleaded, that the same place and powers, which Y had in the Greek language, he stood fully entitled to in the English; and that therefore of right he ought to be possessed of the place of Y even in all Greek words *Anglicized*, as system, hypocrite, &c."—*Edwards: Can. Crit.*, p. 275.

"The glaring affectation of *Anglicizing* Latin words."—*Warton: Hist. Eng. Poetry*, ii. 282.

Ang'-li-çized, pa. par. & a. [ANGLICIZE.]

Ang'-li-çī-zing, pr. par. [ANGLICIZE.]

Ang'-li-cūs sū-dōr, s. [Lat.=the English sweat; the English perspiration.]

Med.: A term applied to the sweating sickness of the Middle Ages. [SWEATING SICKNESS.]

Ang'-li-çā-tion, s. [Lat. *Anglus*=English; *facio*=to make.] The act or process of rendering English.

Ang'-li-fied, pa. par. & a. [ANGLIFY.]

Ang'-li-fy, v. t. [Lat. *Anglus*=English; -fy, from Lat. *facio*=to make.] To make English. It is used (1) of people who, born in another country than England, yet settle here, or copy English manners, or approximate more or less to a correct English pronunciation. It may be also employed of a place thronged by English, or modified in the direction of English manners by an influx of tourists or settlers from this country.

"... indeed, I should think that Calais or Boulogne was much more *Anglified*."—*Darwin: Voyage round the World*, ch. xxi.

(2) Of an English idiom occurring in speech or composition in another language.

Ang'-li-fy-ing, pr. par. [ANGLIFY.]

A. As adj.: Pertaining at once to India and to England.

"Every *Anglo-Indian* official . . ."—*Times of India*, July 19, 1878.

B. As subst.: A native of England or of the British isles resident in India.

"There is no doubt of its permanent popularity among *Anglo-Indians*."—*Times of India*, July 19, 1878.

Anglo-Irish, a. & s.

A. As adj.: Pertaining at once to the Irish and the English, or to one who has relations with both.

B. As subst.: A settler in Ireland, who was of English origin, and, unlike the native Irish, was regarded as within the "Pale."

"The *Anglo-Irish* of the Pale and the Celts of the provinces."—*Froude: Hist. Eng.*, pt. i., ch. xviii., vol. iv.

Ang'-glō-mā-nī-a, s. [In Fr. *anglomanie*; Port. *anglomania*.] A passion on the part of a person belonging to another country to imitate whatever is English.

Anglo-mania. [ANGLO-MANIA.]

Anglo-Norman, a. & s.

A. As adj.: Pertaining to the Anglo-Normans.

"... unable to encounter the shock of the *Anglo-Norman* cavalry."—*Scott: The Norman Horse-Shoe*.

B. As substantive: A Norman, and yet an Englishman. (Used specially of the Normans who came to England with William the Conqueror, and, not returning to the Continent, became, and still are, an important element in the composite English nation.)

Anglo-Saxon, a. & s.

A. As adjective:

1. Pertaining to the Anglo-Saxons.

"... Anglo-Saxon monasteries."—*Macaulay: Hist. Eng.*, ch. i.

2. Pertaining to the Anglo-Saxon tongue.

"It is estimated that in English there are about 38,000 words. Of these, 23,000, or more than five-eighths, are of Anglo-Saxon origin."—*Bosworth: Anglo-Saxon and Eng. Dict.* (pref.).

B. As substantive:

1. One of the Anglo-Saxon race—that is, of the mingled Anglo-Saxons and other Teutonic tribes from whom the English, the Lowland Scotch, a great proportion of the present inhabitants of Ulster, and the mass of the population in the United States and various British colonies sprung.

"Thus it appears that one Jute, three Saxon, and four Angle, altogether eight kingdoms, were established in Britain by the year 588, and that the Angles and Saxons bore the leading and chief part in the expeditions; they, therefore, when settled in this country, were collectively called *Anglo-Saxons*."—*Bosworth: Anglo-Saxon and Eng. Dict.* (pref.).

2. The language originally spoken by the race or races mentioned under No. 1.

"Anglo-Saxon, that is Angle, Engle, or English Saxon, is the language of the Platt, Low, Flat, or North part of Germany, brought into this country by the Jutes, the Angles, and Saxons, and modified and written in England. Those who remained in their old locality on the Continent had the name of Old Saxons, and their language Old Saxon; but those settled in Britain were properly designed *Anglo-Saxons*, and their language, perfected and written in England, was called *Anglo-Saxon*."—*Bosworth: Anglo-Saxon and Eng. Dict.* (pref.).

¶ The Anglo-Saxon tongue did not pass directly into the English. The Norman conquest, as was inevitable, introduced a new element into the language, and produced temporary confusion. When this began to pass away, and it became evident that the tongue of the conquered rather than that of the conquerors was destined ultimately to prevail, it was not the old Anglo-Saxon pure and simple which remained. There came in place of it various dialects, specially a Midland, a Northern, and a Southern one. It was a mixed dialect, mainly Midland, but also slightly Southern, which with Chaucer, in the fourteenth century, became the standard language; and at last, by a series of insensible changes, developed into the modern English tongue. [ENGLISH.]

Anglo-Saxonism, s. [A word or idiom belonging to or borrowed from the Anglo-Saxon tongue.]

Anglo-Turkish, a. Pertaining to or formed between England and Turkey; as, "the *Anglo-Turkish* Convention."

Angola-cloth, s. A light fabric made from the wool of the Angora-goat.

Angola-pea, s. A papilionaceous plant, belonging to the genus *Cajanus* (q. v.). It is called also *Pigeon Pea*.

Angola-seeds, s. pl. Small red seeds of the wild liquorice, used for beads, &c.

ang'-gōn, s. [In Fr. *angon*.] A barbed spear used by the Anglo-Saxons, the Franks, and many other Teutonic nations.

ang'-or, s. [Lat.= (1) a compression of the neck, suffocation, the quinsy; (2) anguish, torment, vexation; from *ango*=to suffocate, to strangle.]

1. Pain.

"If the patient be surprised with a lipthymons *angor*, and great oppress about the stomach, expect no relief from cordials."—*Harvey*.

2. Anxiety and constriction in the precordial region. (*Mayne*.)

**Angor pectoris*. [Lat.= intense pain in the breast.] The name used by Franche, in 1813, for the disease called *Angina pectoris*. [ANGINA.]

Ang'-gōr'-a, s. [The name of a vilayet in Asiatic Turkey.] A stuff made from the wool of the Angora-goat.

Angora-goat, s. A goat reared in the vilayet of Angora, famed for its wool.

Ang'-gōs-tūr'-a, Ang'-gūs-tūr'-a, s. [The old name of a city in Venezuela, in South America, now called Ciudad-Bolivar.]

Angostura bark: A bark, very valuable as a febrifuge, in possession of the Capuchin friars belong-

ing to the missions on the river Carony, in South America. It is a rutaceous plant of the genus *Galipea*, but whether it is the *G. cusparia* (*Bonplandia trifoliata*), or the *G. officinalis*, has not yet been completely determined. (Lindley: *Veg. Kingd.*, p. 471.) In London's *Encyclopædia of Plants* it is said to be the *Cusparia febrifuga*.

ān-gōs-tūr-in, s. A principle extracted from the Angostura bark.

āng-red (red as ērd), *pa. par.* [ANGERED.]

āng-rī-lŷ, *adv.* [Eng. *angry*; -ly.] In an angry manner; under the influence of anger.

"Let me not angrily declare

No pain was ever sharp like mine."

Cowper: *Olney Hymns*, xliii., *Prayer for Patience*.

āng-rŷ, *ān-grē, a. [From Eng. *anger*; -y.]

A. Ordinary Language:

*I. Of things inanimate: Bitter.

"The clay that clenges ther-by arn corsyes strong,

As alum and alkanar, that angrē arn bothe."

Alliterative Poems: *Cleanness* (ed. Morris), 1,034-5.

II. Of the body: Inflamed, painful. (Used of a wound or sore.)

III. Of the mind or heart.

1. Temporarily under the emotion of anger.

(a) Followed generally by *with* of the person regarded with anger.

"... Now therefore be not grieved nor angry with yourselves that ye sold me hither."—*Gen.* xlv. 5.

(b) *Formerly it was occasionally followed by *at* of the person.

"... are ye angry at me because I have made a man every whit whole on the Sabbath day?"—*John* vii. 23.

(c) Followed by *at* or *for* of the thing exciting anger.

"... wherefore should God be angry at thy voice . . .?"—*Eccles.* v. 6.

"... wherefore then be ye angry for this matter?"—*2 Sam.* xix. 42.

¶ It may be used of the inferior animals; and (with the inappropriateness of all human language employed of the Divine Being) of God.

"An angry Waspeth' one in a viall had."

Spenser: *F. Q.*, III. xii. 18.

"And the Lord was angry with Solomon, because his heart was turned from the Lord God of Israel, which had appeared unto him twice."—*1 Kings* xi. 9.

2. Habitually under the dominion of anger.

"It is better to dwell in the wilderness than with a contentious and an angry woman."—*Prov.* xxi. 19.

3. Exhibiting the marks of anger, proceeding from anger, sounding angrily.

"The north wind driveth away rain; so doth an angry countenance a backbiting tongue."—*Prov.* xxv. 23.

¶ Sometimes the term *angry* is applied to a whole group of passions, in place of a single emotion or its manifestations.

"He had always been more than sufficiently prone to the angry passions."—*Macaulay: Hist. Eng.*, ch. vii.

4. *Fig.*: Of such a character, that if it proceeded from a being capable of emotion, it would be regarded as a manifestation of anger.

"So that wildest of waves in their angriest mood,
Scarce break on the bounds of the land for a rood."

Byron: *The Siege of Corinth*, ver. 16.

B. Technically:

Hist.: *Angry boys* was the designation assumed by gangs of uproarious youths, who rendered the London streets unsafe during the Elizabethan age, like the Mohawks of a subsequent time. (See *Nares' Gloss.*: *Boys*.)

"Get thee another nose, that will be pull'd
Off, by the angry boys, for thy conversion."

Beaumont & Fletcher: *Scornful Lady*, iv. 1.

āng-sag-nā, **āng-sa-vā**, s. [Name given in some Indian languages.] A red gum resembling that called dragon's blood. It is brought from the East Indies.

āng-u, s. [West Indian name.] Bread made from the Cassada (*Jatropha manihot*), a Euphorbiaceous plant growing in the West Indies.

ān-guī-fēr, s. [Lat. *anguifer*; from *anguis*=a snake, and *fero*=to bear.]

Astron.: Another name for the northern constellation Ophiuchus, which has been called also Serpentarius.

ān-guī-lā, s. [Lat.=an eel. In Fr. *anguille*; Sp. *anguila*; Ital. *anguilla*.] A genus of fishes of the order Apodal Malacopterygii, and the family Murænidae (Eels).

ān-guī-lī-form, a. [Lat. *anguilla*=an eel; and *forma*=form, shape.] Eel-shaped. (Todd's *Johnson*.)

ān-guī-lī-form-ēs, s. *pl.* [From Lat. *anguis*=a snake, and *forma*=form.] According to Cuvier, the only family of fishes included under the order Malacopterygii Apodes. It is now more commonly called Murænidae.

ān-guī-lū-lā, s. [Dimin. of Lat. *anguilla*=an eel.] The typical genus of the family Anguillulidae (q. v.). The "eels" in vinegar are *A. aceti*; the similar animals in blighted wheat, *A. tritici*; and those in sour paste, *A. glutinosus*.

ān-guī-lū-lī-dæ, s. *pl.* [From the typical genus Anguillula.]

Zool.: A family of annulose animals belonging to the class Nematelmia, and the order Nematoidca. It consists of non-parasitic nematoid worms, and nearly corresponds to Dujardin's family of Enoplidae. Typical genus, Anguillula (q. v.).

ān-guīn-ār-i-ā, s. *pl.* [From Lat. *anguineus*=pertaining to a snake.] A genus of Zoophytes belonging to the family Eucratidae.

ān-guīne, a. [Lat. *anguinus*, from *anguis*=a snake.] Pertaining to the genus Anguis, or to snakes in general.

Anguine Lizard (*Chamaesaura anguina*): A lizard with four rudimentary feet. It is very snake-like. It inhabits the Cape of Good Hope.

ān-guī-nē-ā, a. [Lat. *anguineus*.] Pertaining to a snake, snakey; resembling a snake.

ān-guīn-i-dæ, s. *pl.* A family of serpent-like lizards. Typical genus, Anguis. It is sometimes reduced to a sub-family, Anguininae, or made altogether to disappear in the family Scincidae.

ān-guīn-i-næ, s. *pl.* [ANGUINIDÆ.]

ān-guīs, s. [Lat. *anguis*=a snake.] A genus of lizards of the family Scincidae. It contains the *Anguis fragilis*, or Slow-worm, which is so snake-like, from its being entirely destitute of limbs, that until lately it was ranked with the Ophidians. Though called the Blind-worm, it is not blind, but has perfectly visible, though small eyes. The popular belief that it is venomous is quite erroneous.

ān-guīsh, *ān-guŷch, s. [A. S. *ange*=vexation, trouble, sorrow, affliction, anguish; *ange*=vexed, troubled, sorrowful, troublesome, vexatious; *angsum*=difficult, narrow. In Sw. *ängslän*, *angest*; Dan. *angest*, *ængste*; Dut. & Ger. *angst*, *angoisse*; Sp. *ansia*, *angustia*; Port. *angustia*; Ital. *angoscia*, *angoscamento*=anguish, vexation; *angustia*=distress, scarcity. From Lat. *angustia*=a strait, a defile, generally in the plur., *angustiae*=straits; *angustus*=narrow; *ango*=to press tight. (ANGER.) Properly, such present fear and anxiety for the immediate future as arise when one has got squeezed into too narrow a place and cannot extricate himself.]

1. Excessive pain or distress.

(a) Excessive pain of body.

"... the anguish as of her that bringeth forth her first child . . ."—*Jer.* iv. 31.

(b) Excessive distress of mind.

"For when thacces of anguych watzh hid in my sawle."

Alliterative Poems: *Patience* (ed. Morris), 325.

"... we saw the anguish of his soul when he besought us, and we would not hear."—*Gen.* xlii. 21.

2. The expression in the countenance of intense bodily pain or mental distress.

"She spoke: and, furious, with distracted pace,
Fears in her heart and anguish in her face,
Flies through the dome (the maids her steps pursue),
And mounts the walls."

Pope: *Homer's Iliad*, bk. xxii., 592-595.

3. Anything fitted to excite intense bodily pain or mental distress.

"Seeing myself engaged, yea, and engulfed in so many
anguishes and perplexities."—*Trans. of Boccacini* (1626), p. 37.

ān-guīsh, *v. t.* [From the substantive.] To inflict anguish; to inflict excessive bodily pain or mental distress.

"Socrates was seen and observed to be much anguished, grieved, and perplexed; still seeming to feel some grief of mind."—*Trans. of Boccacini* (1626), p. 108.

ān-guīshed, *pa. par.* & a. [ANGUISH, *v.*]

"A strong emotion shakes my anguish'd breast."

Pope: *Homer's Odyssey*, bk. xix., 442.

āng-u-lar, a. [In Fr. *angulaire*; Sp. & Port. *angular*; Ital. *angolare*. From Lat. *angularis*=having angles or corners; *angulus*=a corner, an angle.]

A. Ordinary Language:

1. *Lit.*: Having angles or corners, cornered; so shaped as that the sides are united to each other by angles; containing an angle; aiding to constitute an angle; situated at the point where an angle is formed.

"As for the figure of crystal, it is for the most part hexagonal or six-cornered, being built upon a confused matter, from whence, as it were from a root, angular figures arise, even as in the amethyst and basaltes."—*Browne: Vulgar Errors*.

2. *Fig.* Of persons: Too little disposed to make concessions to others, and therefore exciting or tending to excite opposition to itself which a more conciliatory course of conduct would have prevented from arising.

B. Technically.

I. Mathematics:

1. The *angular point* in an angle is that at which the two lines inclined to each other meet. Used also in natural philosophy and other sciences.

"The distance of the edges of the knives from one another, at the distance of four inches from the angular point where the edges of the knives meet, was the eighth part of an inch."—*Newton: Optics*.

2. *Angular section* is the section or division of an angle into any number of equal parts.

Angular sections: The branch of mathematical analysis which investigates the properties of circular functions.

II. Mechanics:

1. *Angular motion* is the motion of any body around a fixed point, whether it revolves like a planet or vibrates backward or forward like a pendulum.

Angle of angular motion or *Angle of rotation*: The angle made by the two directions before and after the turning of a line perpendicular to an axis. (See III. 1.)

2. *Angular velocity* is the absolute velocity of a body moving round a fixed axis at a certain unit of distance. (See III. 2.)

III. Astronomy:

1. *Angular intervals*: Arcs of the equator intercepted between circles of declination passing through the heavenly bodies observed.

2. *Angular motion*:

(a) *Angular motion of the sun* is a calculated movement of the luminary through space, which in 1783 made Sir William Herschel propound the hypothesis that the luminary was in progress toward the star *Lambda Herculis*.

(b) The *angular motion* of the stars is a minute deviation from their relative places of several "fixed" stars, as the two stars of 61 Cygni, *Epsilon Indi*, *Mu Cassiopeie*, and many others. (*Herschel: Astron.*, §§ 852-4.)

3. *Angular velocity*. The *angular velocity of the sun's apparent motion* is in the inverse proportion of the square of the distance; thus, to compare the daily motion of the sun in longitude at one point, A, of its path, and at another B, the formula used is: The square of the line connecting the earth and sun, when the latter is at B, is to the square of that connecting them when he is at A, as the daily motion at A is to the daily motion at B. (*Herschel: Astron.*, § 350.)

¶ The expression is used in a similar sense of the planets.

IV. *Perspective*: A kind of perspective in which the two sides of the leading object represented are not parallel to the plane of the picture, and in which, therefore, the horizontal lines are so drawn as to meet each other at a vanishing point. It is called also *oblique perspective*.

V. Anatomy:

1. *Angular Artery*: The terminal part of the facial artery, which inosculates at the inner side of the orbit with a terminal branch of the ophthalmic artery.

2. *Angular vein*: The vein formed by the junction of the supra-orbital and frontal veins. It is perceptible beneath the skin, as it runs obliquely downward, near the inner margin of the orbit, resting against the side of the nose at its root.

VI. Botany:

1. Of the *general form*: Having projecting longitudinal angles. (Sometimes the terms "acute angled" and "obtuse angled" are used.)

2. *Spec. Of the margin of a leaf or other organ*: Having several salient angles on the margin, as the leaf of *Datura stramonium*. (*Lindley*.)

āng-u-lār-i-tŷ, s. [From Lat. *angularis*=having angles.] The quality of being angular, i. e., having corners. "Squareness; also an abounding in nooks and corners."

"What body ever yet could figure show

Perfectly perfect, as rotundity

Exactly round, or blameless angularity?"

More: *Song of the Soul*, III. ii. 38.

āng-u-lar-lŷ, *adv.* [Eng. *angular*; -ly.] In an angular manner; with angles, with corners.

"... a labyrinthine face, now angularly, now circularly, every way aspected."—*B. Jonson: Cynthia's Revels*.

"Another part of the same solution afforded us an ice angularly figured."—*Boyle*.

āng-u-lar-ness, s. [Eng. *angular*; -ness.] The quality of being angular; angularity.

āng-u-lāte, **āng-u-lā-tēd**, a. [Lat. *angulatus*, from *angulo*=to make angular, *angulus*=an angle.] Angular; having angles.

"Topazes, amethysts, or emeralds, which grow in the fissures, are ordinarily crystallized, or shot into *angulated* figures; whereas in the strata, they are found in rude lumps-like yellow, purple, and green pebbles."—*Woodward*.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sire, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

ǎng'-u-lō, in compos. Having an angle.

angulo-dentate, *a.*

Bot.: Angular and toothed, angularly toothed.

ǎng-u-lōm'-ēt-ēr, *s.* [Lat. *angulus*=an angle, and Gr. *metron*=measure.] An instrument for measuring angles. The more common term is ANGLEMEETER, and in the case of crystals, in mineralogy, GONIOMETER is employed.

ǎng-u-lōs'-ī-tý, *s.* [From Lat. *angulosus*=full of corners.] Nearly the same as *angularity*; but perhaps, as its etymology suggests, a stronger word.

*ǎng'-u-loūs, *a.* [In Fr. *anguleux*.] Angular, hooked.

"Nor can it be a difference, that the parts of solid bodies are held together by hooks and *angulous* involutions, since the coherence of the parts of these will be of as difficult a conception."—*Glanville*.

*ǎn-güst', *a.* [In Ital. *angusto*; Lat. *angustus*, from *ango*=to press tightly.] Narrow, straight, contracted.

ǎn-gūs'-tāte, *a.* [Lat. *angustatus*, *pa. par.* of *angusto*=to make narrow.]

Botany, &c.: Narrow at the base, but dilated above.

ǎn-gūs'-tā-tion, *s.* [From Lat. *angustus*=narrow.] The act of making narrow, the state of being made narrow; straitening.

"The cause may be referred either to the grumousness of the blood, or to obstruction of the vein somewhere in its passage, by some *angustation* upon it by part of the tumor."—*Wiseman*.

ǎn-gūs'-tī-clāve, *a.* [In Fr. *angusticlave*; Lat. *angusticlavus*, from *angustus*=narrow, and *clavus*=a nail, . . . a purple stripe on the tunic.]

In old Rome: Wearing a narrow purple stripe on the tunic. This was done by the Equites, and by the plebeian tribunes, while the senators had a broad purple stripe.

ǎn-gūs'-tī-fō'-li-āte, ǎn-güst'-ī-fō'-li-ōūs, *a.* [From Lat. *angustus*=narrow, and *folium*=a leaf.]

Bot.: Having the leaves narrow.

ǎn-gūs'-tūr'-a, *s.* [ANGOSTURA.]

*ǎn-hāng, *v. t.* [A. S. *hangian*=to hang.] To hang up; to hang.

"The remenaunt were *unhanged*, more and lesse, That were consented to this cursednesse."

Chaucer: C. T., 13,690, 13,691.

*ǎn'-hānged, *pa. par.* [ANHANG.]

ǎn-har-mōn'-ic, *a.* [In Fr. *anharmonique*; Gr. *an*, priv., and *harmonios*=producing harmony.] Not harmonic. [HARMONIC.]

anharmonic ratio or proportion, *s.*

Geom.: The term used by Prof. Chasles, when four points, *a, b, c, d*, being in a straight line, the ratio or proportion is $\frac{ac}{ad} : \frac{bc}{bd}$. Or when *A, B, C, D*,

meeting in the same point, $\frac{\sin. (A:C)}{\sin. (A:D)} : \frac{\sin. (B:C)}{\sin. (B:D)}$.

[HARMONIC.] (*Chasles: Géométrie Supérieure*, 1852, p. xix.)

ǎn-hē'-ale, *v. i.* [Lat. *anhelo*.] To pant.

ǎn-hē-lā'-tion, *s.* [Lat. *anhelatio*=difficulty of breathing, panting, from *anhelo*=to pant: *halo*=(1) to breathe, (2) to exhale.] The act of panting; the state of being short of breath, difficult respiration.

"Those unknown tendencies and *anhelations* of divine souls after the adorable object of their love."—*Glanville: Sermons* (1681), p. 313.

ǎn-hē-lō'-se, *a.* [In Sw. *aandelos*. From Lat. *anhelus*=(1) panting; (2) causing shortness of breath.] Out of breath, panting.

ǎn'-hīm-a, *s.* [Brazilian name.] The name of a bird, the Horned Screamer (*Palamedea cornuta*, Linn.). It is a wading bird, and the type of the

The Anhima (*Palamedea Cornuta*).

family Palamedeidae of Mr. G. R. Gray. It is blackish, with a red spot on the shoulder. The top of the head bears a long, horny, slender, and mobile stem,

and the wing is armed with two triangular spurs. It lives in the marshy parts of South America, and has a powerful voice, heard at a great distance. The sexes manifest much fidelity to each other. It is sometimes called "the horned screamer," or "the kamachi."

ǎn-hūn'-grý, *adj.* [AHUNGRY.] Hungry. (*Shakesp.: Coriolanus*, i. 1.)

*ǎn-hý, *adv.* [Old Eng. *an*=on; *hy*=high.] On high.

" . . . besechith God *an-high*."

Romans of Partenay (ed. Skeat), 2,704.

ǎn-hý'-dride, *s.* [From Gr. *anydria*=want of water; *anydros*=wanting water; *an*, priv., and *hydōr*=water.] An anhydride or an anhydrous acid is a chemical substance formed by the substitution of an acid radical for the whole of the hydrogen in one or two molecules of water. (*Graham: Chem.*, 2d ed., vol. ii., 542.) By the action of water they are converted into acids. Anhydrides do not act on litmus or other vegetable colors.

ǎn-hý'-drite, *s.* [In Ger. *anhydrit*; Gr. *anydros*=without water; referring to the fact that it contains no water of crystallization.]

Min.: A mineral classed by Dana under his Celestite group. Its crystals are orthorhombic. The hardness is 3-3.5; the sp. gr. 2.899-2.985; the luster vitreous, or somewhat pearly; the color white, or brick-red. Composition: Sulphuric acid, 55.80 to 59.78; lime, 40.21 to 43.06, with smaller portions of silica, sesquioxide of iron, and water. It is altered, by the absorption of moisture, into gypsum. It is divided by Dana into Var. 1. Ordinary. (*a*) Crystallized; (*b*) Fibrous; (*c*) Fine granular; (*d*) Scaly granular, under which is ranked Vulpinite (*q. v.*). Var. 2. Pseudomorphous. It occurs in various parts of Europe and in North America.

ǎn-hý'-droūs, *a.* [In Ger. *anhyder*. From Gr. *anydros*=without water; *a*, priv., and *hydōr*=water.]

1. *Chem.*: Having no water in its composition as anhydrous gypsum, gypsum with no water in its composition.

" . . . thus the *anhydrous* sulphuric acid does not redden litmus."—*Graham: Chemistry*, vol. ii., p. 188.

2. *Min.*: Dana divides the minerals classed as compounds of Chlorine, Bromine, and Iodine into (1) Anhydrous Chlorides, (2) Hydrous Chlorides, and (3) Oxochlorides. (*Dana: Min.*, 5th ed., p. 110.) He separates Fluorine Compounds into Anhydrous and Hydrous (*Ibid.*, p. 123), and adopts the same classification of the Oxids: 1st (*Ibid.*, 131); the Silicates (*Ibid.*, 203); the Phosphates, Arsenates, Antimonates (*Ibid.*, 527); the Sulphates, Chromates, Tellurates (*Ibid.*, 613), and the Carbonates (*Ibid.*, 669).

*ǎn'-ī, *a.* [ANY.]

a'-nī, *s.* [South American name (?).] The name given to the birds belonging to the genus *Crotophaga*, and indeed to those ranked under the subfamily *Crotophaginae*, a division of the Cuculidae, or Cuckoos. The typical anis—those of the genus *Crotophaga*—are found in South America, the West Indies and Florida. They are about the size of our blackbird.

*ǎn'-īe, *a.* [ANY.]

*ǎn-ī-ēnt'e, *a.* [Fr. *anéantir*=to annihilate; from *ā*=to, and *néant*=nothing, nought.] To bring to nought; to frustrate. The same as ANIENTISSE (*q. v.*).

*ǎn-ī-ēn'-tisse, *v. t.* [Fr. *anéantissement*=annihilation; *anéantir*=to annihilate.] To reduce to nothing; to annihilate.

" . . . the which three things ye ne han not *anientissed* or destroyed."—*Chaucer: Melibeus*.

*ǎn-ī-ēn'-tissed, *pa. par.* [ANIENTISSE.]

ǎ-nī'ght (*gh* silent), *adv.* [Eng. *a*=on, at, and *night*.] At night, during the night.

"I broke my sword upon a stone, and bid him take that for coming *anight* to Jane Smile."—*Shakesp.: As You Like It*, ii. 4.

ǎ-nī'ghts (*gh* silent), *adv.* [Eng. *a*=on, at; *nights*, pl. of *night*.] Night after night.

"Sir Toby, you must come in earlier *anights*; my lady takes great exceptions at your ill hours."—*Shakesp.: Twelfth Night*, i. 3.

"The turnkey now his flock returning sees,
Duly let out *anights* to steal for fees!"
Swift: Description of Morning.

ǎn-ig-ō-zānth'-ōs, *s.* [Gr. *anischō*, the same as *anechō*=to hold up, to lift up; and *anthos*=flower.] A genus of plants belonging to the order *Hæmodraceæ* (Blood-roots). They are curious Australian plants, with yellow or green flowers. The roots of the *A. floridus*, though acrid when raw, become mild and nutritious when cooked, and are used for food by the natives of the Swan river. (*Lindley: Veg. Kingd.*, 1847, p. 152.)

an'-il, *s.* [In Ger., Fr., Port. & Sp. *anil*=indigo; Arab. *nilon*; Mahratta and some other Indian languages *nila*=dark blue, as Nilgherry Hills=the Blue Hills.] The Indigo plant.

ǎn'-ile, *a.* [Lat. *anilis*.] Old-womanish.

ǎn-ī'le-něss, *s.* [Eng. *anile*; suffix *-ness*.] Anility.

ǎn-īl'-ic, *a.* [Eng. *anil*; suff. *-ic*.] Pertaining to anil (*q. v.*).

anilic acid, *s.*

Chem.: Indigotic acid = nitrosalicylic acid, $C_7H_5NO_5 = C_7H_5(NO_2)O_3$. Obtained by the action of boiling nitric acid and water on indigo, or on salicylic acid. It crystallizes in light yellow needles, soluble in hot water and alcohol.

ǎn-īl'-ine, *s.* [from *anil* (*q. v.*)] = amidoant-benzene = amido-benzol = phenyl-amine =

Chem.: Aniline was first obtained by distilling indigo with caustic potash. It occurs in the heavy oils from coal-tar. It is prepared from benzene, C_6H_6 , which is converted into nitro-benzene, $C_6H_5(NO_2)$, by the action of strong nitric acid. The nitrobenzene is reduced to aniline by the action of acetic acid and iron filings, or by sulphide of ammonium. Aniline is the basis of most of the coal-tar colors. It is an oily, colorless, refractive, volatile liquid, boiling at 182°. Its sp. gr. at 0° is 1.036. It solidifies at -8° to a crystalline mass; when exposed to the air and light it becomes brown. It is nearly insoluble in water, but dissolves in ether, alcohol, and benzene. It forms crystalline salts with acids. It does not turn red litmus paper blue. A slight trace of aniline gives a deep purple color with a solution of bleaching powder. Aniline combines with the iodides of alcohol radicals like amines. The atoms of H united to N in aniline can be replaced by alcohol radicals, as ethyl aniline—

The H in the benzol ring (C_6H_5) can also be replaced by radicals forming substitution compounds of aniline, of which, when one atom of H is replaced by an atom of Cl or a radical, there can be always three modifications; thus, three modifications of nitro-aniline ($C_6H_4(NO_2)(NH_2)$) are known; also chloraniline, $C_6H_4Cl(NH_2)$, and bromaniline, $C_6H_4Br(NH_2)$. [See Kekulé's *Organic Chem.*] M. Langorrois has found that the putrefaction and decomposition of animal matter can be prevented, even when it is exposed to the air, and in an elevated temperature, by the use of small quantities of aniline.

aniline black, *s.* A dye produced by a mixture of aniline, potassium chlorate, and cupric sulphate or a vanadium salt. It is used in calico printing.

aniline blue, *s.* Obtained by heating rosaniline with excess of aniline at 150°-160°. A hydrochloride of triphenyl-rosaniline, $C_{20}H_{16}(C_6H_5)_3N_3$.

aniline greens, *s.* The aldehyde green is obtained from aldehyde, magenta, and sulphuric acid heated together, and then poured into a boiling solution of sodium thiosulphate. The dye is precipitated by sodium acetate. The iodine green is obtained by heating aniline violet with iodide of methyl.

aniline orange, *s.* A salt of dinitroparacresol.

aniline purple, or mauve, is prepared by adding to aniline sulphate a dilute solution of potassium bichromate. It contains a base called mauveine, $C_{27}H_{24}N_4$.

aniline red [see ROSANILINE], called also MAGENTA. Obtained by heating crude aniline with arsenic acid to 140°. The presence of toluidine is necessary for its formation.

aniline violet, *s.* Obtained by heating rosaniline with ethyl iodide, a hydriodide of triethyl-rosaniline, $C_{20}H_{16}(C_2H_5)_3N_3$.

aniline yellow. [See CHRYSANILINE.]

ǎn-īl'-ī-tý, *s.* [Lat. *anilitas*, from *anilis*=pertaining to an old woman, old-womanish; *anus*=an old woman; Celtic *hen*=old.] The state of being an old woman. The state of entertaining such views and feelings as are natural to women well advanced in life.

"Since the day in which the Reformation was begun, by how many strange and critical turns has it been perfected and handed down, if not entirely without spot or wrinkle, at least without blotches or marks of *anility*."—*Sterne: Sermon on the Inauguration of K. George III.*

¶ Todd says: "*Anility* is not confined to the feminine character, as Dr. Johnson would imply. It means *dotage* in general.

ǎn'-īm-a-ble, *a.* [From Lat. *animo*=to fill with breath or air, to animate.] Capable of being animated.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðhis; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn; -tjon, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

ăn-îm-ăd-vēr'-săl, *a. & s.* [From Lat. *animadversum*, supine of *animadverto*.] [ANIMADVERT.]

1. *As adjective*: Having the faculty of perception, or the power of perceiving.

2. *As substantive*: That which has the faculty of perception; the soul.

"That lively inward *animadversal*: it is the soul itself; for I cannot conceive the body doth *animadvert*; when as objects, plainly exposed to the sight, are not discovered till the soul takes notice of them."—*More: Song of the Soul*, Notes, p. 22.

ăn-îm-ăd-vēr'-sion, *s.* [In Fr. *animadversion*. From Lat. *animadversio*=(1) the perception of an object, attention; (2) censure, punishment.]

I. Ordinary Language:

1. The act of perceiving an object; attention.

"The soul is the sole percipient which hath *animadversion* and sense, properly so called."—*Glanville*.

2. As close attention to any one's conduct is pretty sure to detect serious imperfections in it, the word acquired the secondary signification of severe censure, reproof, serious blame. This is now almost its sole meaning.

"He dismissed their commissioners with severe and sharp *animadversions*."—*Clarendon*.

3. Punishment. [See II.]

"When a bill is debating in Parliament, it is usual to have the controversy handled by pamphlets on both sides, without the least *animadversion* upon the authors."—*Swift*.

II. Technically:

Mediæv. Eccles. Law: The infliction by the civil power, at the instigation of the church, of punishment on offenders against ecclesiastical law.

"An ecclesiastical censure and an ecclesiastical *animadversion* are different things: for a censure has a relation to a spiritual punishment, but an *animadversion* has only a respect to a temporal one, as degradation, and the delivering the person over to the secular court."—*Ayliffe: Parergon*.

ăn-îm-ăd-vēr'-sive, *a.* [From Lat. *animadversum*, supine of *animadverto*.] [ANIMADVERT.] Having the power of perception.

"The representation of objects to the soul, the only *animadversive* principle, is conveyed by motions made on the immediate organs of sense."—*Glanville*.

ăn-îm-ăd-vēr'-sive-nēss, *s.* [Eng. *animadversive*; -ness.] The quality or state of perceiving; perception.

ăn-îm-ăd-vēr't, *v. i.* [Lat. *animadverto*=(1) to turn the mind to, (2) to notice, (3) to censure or punish: *animus*=the mind; *adverto*=to turn to; *ad*=to, and *verto*=to turn.]

1. To turn the mind to any person or thing; to notice.

2. To blame, to censure, to make objurgatory remarks upon.

"Certain questionable people . . . were *animadverted* upon [in an Act of Parliament]."—*Froude: Hist. of Eng.*, vol. ii., p. 434.

3. To punish.

"If the Author of the universe *animadverts* upon men here below, how much more will it become Him to do it upon their entrance into a higher state of being?"—*Grew*.

¶ *Animadvert* is followed by *upon* or *on*. (See the foregoing examples. Very rarely *against* is also used.)

"Your Grace very justly *animadverts* against the too great disposition of finding faults . . ."—*Pope: Letter to the Duke of Buckingham* (1718).

ăn-îm-ăd-vēr'-tēr, *s.* [Eng. *animadvert*; -er.] One who censures or punishes.

"God is a strict observer of, and a severe *animadverter* upon, such as presume to partake of those mysteries without such a preparation."—*South*.

ăn-îm-ăd-vēr'-tîng, *pr. par.* [ANIMADVERT.]

ăn-îm-ăd-vēr'-tîşe, *v. t.* [ANIMADVERT.] To inform.

ăn-îm-ăl, *s. & a.* [Lat. *animal*=an animal; *animale*=neut. of adj. *animalis*=possessing life. [ANIMATE.]]

A. As substantive:

I. Ordinary Language:

1. A beast, as contradistinguished from a man.

"Combativeness is the natural disposition which men and animals feel in various degrees to quarrel and fight."—*Penny Cycl.*, xviii. 16.

2. *In contempt*: A man of no intellect, or of bestial propensities.

3. *In the same sense as No. II.* (Zool.) This signification of the word includes man.

" . . . though defenseless, Man can arm himself with every variety of weapon, and become the most terribly destructive of animals."—*Owen: Classif. of the Mammalia*, p. 50.

II. Technically:

Zool.: An organic being, rising above a vegetable in various respects, especially in possessing sensibility, will, and the power of voluntary motion. Professor Owen defines an animal as an organism

which can move, which receives nutritive matter by a mouth, which inhales oxygen and exhales carbonic acid, and, finally, which develops tissues, the proximate principles of which are quaternary compounds of carbon, hydrogen, oxygen, and nitrogen. (*Owen: Paleont.*, 1860, p. 4.) Though, practically speaking, there is in general no difficulty in distinguishing an animal from a vegetable, yet the animals and plants of humble organization closely approach each other in structure, and it is not always easy to say whether a particular organism belongs to the one kingdom or the other. By his bodily organization man is an animal, though his mental and moral qualities give him an immeasurable superiority over all the other members of the animal kingdom.

B. As adjective:

1. Pertaining to an animal as opposed to a vegetable, or to an animal as distinguished from the more general term, an organized being, as, *animal functions* (q. v.).

"The animal membranes exercise the property. . ."—*Todd & Bowman: Physiol. Anat.*, vol. i., p. 54.

2. Pertaining to the inferior sentient beings as opposed to man; brutal.

"The immortal Aristotle, in his system of the animal world, excludes man from his scheme."—*Swainson: Classif. of Quadrupeds*, § 15.

3. Pertaining to those parts of our complex nature which we have in common with the inferior sentient beings, as contradistinguished from those mental, moral, and spiritual capabilities in which man on the earth stands alone.

"There are things in the world of spirits wherein our ideas are very dark and confused: such as their union with *animal* nature, the way of their acting on material beings, and their converse with each other."—*Watts: Logic*.

animal charcoal, *s.* [CHARCOAL.]

animal economy, *s.* The natural laws on which the welfare of the animal world depends, and to which, within certain limits, instinct teaches the several species to conform.

animal electricity, *s.* [GALVANISM.]

animal flower, *s.* A name often given to those radiated animals which have their tentacles in rows around their mouths, not unlike the petals of a double flower. The term has been applied specially to various species of the genus *Actinia*, which have been called, from their fancied resemblance to particular flowers, Sea Anemones, or fixed Sea-nettles. The other radiated animals which have been called animal flowers belong to the genera *Holothuria*, *Tubularia*, *Sertularia*, *Hydra*, and *Alegonia*. [ACTINIA.]

animal food, *s.*

1. Food consisting of the flesh or other portions of animals.

†2. Food designed for animals.

animal functions, *s. pl.* Functions exercised by animals. They are divided into two classes: (1) Those peculiar to and characteristic of animals, as distinguished from *organic functions*, which are common to them and vegetables. The animal functions of this first category are sensibility, or innervation, and voluntary motion, or locomotion. (2) The merely vital or vegetative functions, which are common to animals and vegetables. These are nutrition and generation. [ORGANIC FUNCTIONS.]

animal heat, *s.* The heat possessed by the higher animals, and which, so long as they retain life, they maintain, whatever the surrounding temperature may be. It is highest in birds, and lowest in reptiles and fishes.

animal kingdom, *s.* One of the three great kingdoms of visible Nature, the other two being the Vegetable and the Mineral Kingdoms. Cuvier divided the Animal Kingdom into four great sub-kingdoms: 1, Vertebrata; 2, Mollusca; 3, Articulata; 4, Radiata. Professor Owen, in his *Paleontology*, adopts the following classification: Kingdom I. Protozoa. Kingdom II. Animalia. Sub-kingdom I. Invertebrata: Province I, Radiata; 2, Articulata; 3, Mollusca. Sub-kingdom II. Vertebrata. Professor Huxley, writing in 1869, said that in the then existing state of knowledge, the Animal Kingdom required to be divided into no fewer than eight distinct groups, which he arranged thus:

VERTEBRATA.	
MOLLUSCA.	ANNULOSA.
MOLLUSCOIDA.	ANNULOIDA.
CÆLENTERATA.	INFUSORIA.
PROTOZOA.	

He could not, however, assert that all the eight groups were of equal value, or that the Infusoria, the Molluscoida, and the Annuloida would ultimately stand.

animal magnetism, *s.* A science, or art, so called because it was believed that it taught the method of producing on persons of susceptible organization effects somewhat similar to those which a magnet exerts upon iron. It is now generally denominated Mesmerism (q. v.).

animal mechanics, *s.* [MECHANICS.]

animal oat, *s.* An oat (*Avena sterilis*), which has a beard so hygrometric that, when the seeds fall off, it twists itself and moves spontaneously, when certain alterations in the weather occur. At such times it resembles a strangely-shaped insect crawling on the ground, whence its English name of Animal Oat. It is sometimes grown as an object of curiosity.

animal painter, *s.* A painter whose special taste and skill lie in the representation of animals.

animal painting, *s.* The department of painting which treats of the representation of animals.

animal spirits, *s. pl.* Nervous or vital energy, the gaiety and capability for action which arise from the possession of a sanguine temperament and a healthy physical organization.

animal strength, *s.* [STRENGTH.]

ăn-îm-ăl'-cũ-lă, *s. pl.* [The neut. pl. of Lat. *animalculum*, but not classic; compounded of *animal*, and the termination *culum*, signifying little.] Minute animals.

¶ Sometimes the word *animalcula* is mistaken by incorrect writers for a Latin noun of the first declension, and receives at their hands a plural *animalculæ*. Such an error should be carefully avoided. [ANIMALCULE.]

ăn-îm-ăl'-cũ-lăr, *a.* [Eng. &c., *animalcula*; -ar.] Pertaining or relating to animalcula.

"It rendered at once evident to the senses why air filtered through cotton-wool is incompetent to generate *animalcular* life."—*Tyndall: Frag. of Science*, 3d ed., xi. 324.

ăn-îm-ăl'-cũ-le, *s.* [Fr., from Lat. *animalcula* (q. v.). In Port. *animalculo*.] An animal so minute as to be visible only by means of the microscope. The term is applied specially to members of the classes Infusoria and Rotifera; the former called Infusorial, and the latter Wheel-animalcules. [INFUSORIA, ROTIFERA.]

" . . . Infusorial *Animalcules*."—*Owen: Comparat. Anat. of the Invertebrata* (1843), p. 17.

" . . . the Rotifera, or Wheel-animalcules."—*Huxley: Introd. to the Classif. of Animals* (1869), p. 47.

ăn-îm-ăl'-cũ-lîne, *a.* [Eng. &c., *animalcule*; -ine.] Pertaining or relating to animalcula.

¶ Not so common a term as ANIMALCULAR (q. v.).

"*Animalculine* putrefaction is the immediate cause of those diseases."—*Dr. Dwight: Trav. in New Eng.*, &c., vol. i., p. 436.

ăn-îm-ăl'-cũ-list, *s.* [Eng. &c., *animalcule*; -ist.] One who makes animalcules a special study.

ăn-îm-ăl'-ish, *a.* [Eng. *animal*; -ish.] Like an animal.

ăn-îm-ăl'-îshm, *s.* [Eng. *animal*; -ism.] The series of qualities which characterize a mere animal in contradistinction to a man.

ăn-îm-ăl'-î-tỹ, *s.* [In Ger. *animalität*; Fr. *animalité*; Ital. *animalità*.] Conformity to the animal type of structure.

"It is evident that such characters must be derived from the animal functions of sensation and motion, for these not only constitute and create an animal, but also, by their greater or less capacity, may be said in some measure to establish the degree of its *animality*."—*Griffith's Cuvier*, vol. i., p. 59.

ăn-îm-ăl'-î-ză'-tion, *s.* [Eng. *animalize*; -ation. In Fr. *animalisation*; Port. *animalisação*.] The act of making into an animal, or into animal matter; the state of being made into an animal, or into animal matter.

ăn-îm-ăl'-î-ze, *v. t.* [Eng. *animal*; -ize. In Fr. *animaliser*; Port. *animalisar*.]

1. To make into an animal; to impart animal life to.

2. To convert into animal matter.

ăn-îm-ăl'-î-zed, *pa. par. & a.* [ANIMALIZE.]

As adjective:

"But they eat, I observe, a very large proportion of fat, which is of a less animalized nature."—*Darwin: Voyage round the World*, ch. vi., p. 117.

ăn-îm-ăl'-î-zîng, *pr. par. & a.* [ANIMALIZE.]

As adjective:

" . . . the unconscious irony of the Epicurean poet on the animalizing tendency of his own philosophy."—*Coleridge: Aids to Reflection* (1839), p. 97.

ăn-îm-ăl'-nēss, *s.* [Eng. *animal*; -ness.] The quality or state of being an animal; animal existence.

ăn-îm-ăte, *v. t. & i.* [In Fr. *animer*; Sp. & Port. *animar*; Ital. *animare*. From Lat. *animo*=to fill with breath or air, to make alive. To endow with *anima*=air, a soul.] [ANIMAL.]

A. Transitive:

I. *Literally*: To endow with natural life; to impart life at first, or preserve it when imparted.

"Where searching sunbeams scarce can find a way Earth animated heaves."—*Thomson: Summer*, 296.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pîne, pît, sîre, sîr, marîne; gô, pôt, or, wôre, wôlf, wôrkh, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trỹ, Sýrian. æ, œ = ē; ey = ā. qu = kw.

II: Figuratively:

1. *Of inanimate things*: To impart the semblance of life to; to give power to; to heighten the effect of.

"Heroes in *animated* marble frown."

Pope: *Temple of Fame*, 73.

2. *Of persons*:

(a) To inspire with courage or ardor, to enliven, to stimulate.

"Thns arm'd, he *animates* his drooping bands,"

Pope: *Homēr's Iliad*, v. 606.

(b) To imbue or inspire with; to cause to be actuated by.

"They would come up to Westminster *animated* by the spirit of 1640."—*Macaulay: Hist. Eng.*, ch. viii.

B. *Intrans.*: To become lively, to revive. (*Mad. D'Arblay: Cecilia*, bk. i., ch. iv.)

ăn' -im-ă-te, *a.* The same as the participial adj. **ANIMATED** (q. v.).

"... the admirable structure of *animate* bodies."—*Bentley*.

ăn' -im-ă-těd, *pa. par. & a.* [**ANIMATE**, *v.*]

As adjective:

"Can storied urn, or *animated* bust,
Back to its mansion call the fleeting breath?"

Gray: *Elegy*.

"... the same *animated* descriptions, . . ."—*Lewis: Early Rom. Hist.*, ch. xiii, pt. i., § 1.

"... on the report there was an *animated* debate."—*Macaulay: Hist. Eng.*, ch. xxiv.

Animated Nature: That portion of Nature in which there is life, in contradistinction to that from which life is absent.

"Nature inanimate employs sweet sounds,
But *animated* Nature sweeter still,
To soothe and satisfy the human ear."

Cowper: *Task*, bk. i.

ăn' -im-ă-te-něss, *s.* [*Eng. animate; -ness.*] The state of being animated. (*Johnson.*)

ăn' -im-ă-tiŋg, *pr. par. & a.* [**ANIMATE**, *v.*]

As adjective:

"... to the sun allied,
From him they draw their *animating* fire."

Thomson: *Seasons; Summer*.

"As from a lethargy at once they rise,
And urge their chief with *animating* cries."

Pope: *Homēr's Odyssey*, bk. x., 558, 559.

Animating Principle: An English term corresponding to the Greek *psuchē*, which means (1) breath, life; (2) soul; (3) reason, (4) a living spirit, supposed to go through all the earth and the ocean. It was called by the Romans *anima mundi*. In the plural, animating principles correspond to the Greek *psuchai*. The hypothesis of Aristotle on the subject was that there were an infinite number of distinct animating principles, no two precisely identical with each other in qualities. Each of these necessarily had its corresponding body, which accounted for the great diversities among the species of animated beings existing in the world. All, however, acted under the direction of the supreme animating principle or *physis*=(1) growth, (2) outward form, (3) nature. The immortal Harvey held a somewhat similar belief, and the "*materia vitæ*" (material of life) of John Hunter, the "organic force" of Müller, and the "organic agents" of Dr. Prout are all akin to the *psuchē*, or animating principle of Aristotle. (See Todd & Bowman's *Physiol. Anat.*, vol. i., pp. 16, 17.)

ăn' -im-ă-tiŋg-lŷ, *adv.* [*Eng. animating; -ly.*] In a manner to produce animation.

ăn' -im-ă-tiŋg, *s.* [*In Fr. animation; Sp. animacion; Port. animacao; Ital. animazione; Lat. animatio, from animo=to fill with breath or life; anima=air, life.*] The act of animating; the state of being animated.

Specialty:

1. *Lit.*: The act or process of making to breathe or live for the first time, or after vital action has been suspended; also the state of having life thus imparted or revived.

"The body is one . . . much more by the *animation* of the same soul quickening the whole frame."—*Bishop Taylor: Of Repentance*, c. vi., § 2.

"*Animation* (Lat.) is the informing an animal body with a soul."—*Glossog. Nov.*

Suspended animation is a term used in the case of persons all but drowned, in whom the vital actions have temporarily ceased, and will probably do so permanently unless means be adopted for their immediate restoration.

2. *Figuratively*:

(a) *Of men or other conscious beings, singly or in combination*: The act or process of inspiring life-like energy or ardor; also the state of having such energy or ardor imparted.

"... the faction which had been prostrated and stunned began to give signs of returning *animation*."—*Macaulay: Hist. Eng.*, ch. xvi.

(b) *Of things inanimate*: The act or process of making painted or sculptured figures so life-like that they appear to the imagination as if actually alive.

ăn' -im-ă-tive, *a.* [*Eng. animate; -ive.*] Having the power to impart life or spirit.

ăn' -im-ă-tŏr, *s.* [*Lat.*] One who or that which animates or imparts life or spirit.

"... those bodies . . . conform themselves to situations wherein they best unite unto their *animator*."—*Browne: Vulgar Errors*, bk. ii., ch. 2.

ăn' -i-mē, *a.* [*Fr. animé=animated.*]

Her.: A term used when wild animals are represented with fire proceeding from their mouth and ears. It is called also *incensed*. (*Gloss. of Heraldry.*)

ăn' -i-me, *s.* [*In Ger., Sp., &c., anime.*] A resin procured from the *Hymenaea Courbaril*, a plant of the Papilionaceous sub-order. It is of a transparent amber color, an agreeable smell, and little taste. The Brazilians use it in fumigations for pains and aches arising from cold.

ăn' -im-ět-tă, *s.* [*Ital.=the part of a cuirass which covers the body in front.*]

Eccles. Ritualism: The cloth with which the cup in the eucharist is covered.

ăn' -im-ine, *s.* [*Lat. anim(a); Eng. suff. -ine.*]

Chem.: An organic base obtained from bone oil. It has not been prepared pure.

ăn' -im-iŝm, *s.* [*From Lat. anima=the principle of animal life.*] [**ANIMUS.**] The doctrine that the life of an animal arises from a spiritual cause and not from materiality.

ăn' -im-ist, *s.* One who holds the doctrines of Animism (q. v.).

ăn' -i-mŏ' fŭr-ăn' -dī (used in *Eng.* as *adv.*). [*Lat.*] With the mind or intention to steal.

***ăn' -im-ŏ se**, *a.* [*In Sp. animoso; Lat. animosus.*] Full of life and spirit; spirited.

***ăn' -im-ŏ-se-něss**, *s.* [*Eng. animose; -ness.*] The quality of being spirited. (*Johnson.*)

ăn' -im-ŏs' -i-tŷ, *s.* [*In Fr. animosité; Port. animosidade; Ital. animosità, animositade, animositate; Lat. animositas=(1) boldness, (2) impetuosity, (3) hatred; animosus=full of courage, spirited; anima=(1) wind, (2) the air, (3) breath, life. Gr. anemos=wind; Sansc. animi, anas=wind, air; an=to breathe.*]

*1. Spirit, courage, boldness, without implying the presence of the malignant element. (See ex. from Plutarch's *Morals* in Trench's *Select Gloss.*, p. 6.)

2. Irrepressible anger or hatred against one, prompting the individual who entertains it to open endeavors to injure the person against whom his spirit is so violently excited.

"*Animosity* (Lat.), stoutness, stomachfulness: *Animosities*, quarrels, contentions."—*Glossog. Nov.*

"To the evils arising from the mutual *animosity* of factions were added other evils arising from the mutual *animosity* of sects."—*Macaulay: Hist. Eng.*, ch. xi.

ăn' -im-ŭs, *s.* [*Lat.=the spiritual and rational soul in man; opposed to anima=(1) the principle of animal life, (2) the will, purpose, (3) the affections, the inclinations, the passions.*] Intention; purpose, especially of a hostile character founded on the presence of animosity in the heart.

"The lightest of these charges were symptoms of an *animus* which the Crown prosecutors would regard as treasonable."—*Froude: Hist. Eng.*, vol. iii., ch. xiv.

"During the last eighteen months there had been a serious *animus* in certain quarters against the subject races of the Porte."—*Mr. Trevelyan, M. P.: Times*, Feb. 2, 1878.

ăn' -iŋ' -gă, *s.* [*W. Indian name.*] The designation given in the West Indies to several plants, most of them Aroids. One species, if not even more than one, was formerly used in sugar refining.

ăn' -i-ŏn, ***ăn' -i' -ăn-ē**, ***ăn' -i-on-ē**, *s.* [*Gr. aniŏn, pr. par. of aneimi=to go up; ana=up, and iŏn, pr. par. of eimi=to go.*]

Electrolysis: The electro-negative ion or radical of a molecule, appearing at the anode or positive electrode in electric decomposition. It is opposed to **CATHION** (q. v.).

***ăn' -i-ŏŭs**, *a.* [*O. Fr. anieux; Lat. anxius=anxious.*] Wearisome, sorrowful; fatiguing.

"Then thenkezh Gowan ful sone
Of his *anious* uyage."

Sir Gawayne (ed. Morris), 534-5.

ăn' -is-ăl, *s.* [*From Eng., &c., anise.*] A chemical substance called also *anisic aldehyde* and *hydride of anisyl*.

ăn' -is-ătes, *s. pl.* [*From Eng., &c., anise.*]

Chem.: Salts of anisic acid.

ăn' -ise, *s.* [*In Sw., Dan., Ger., Fr., Sp., & Port., anis; Dut. anys; Lat. anisum; Gr. anison and*

anēthon, also Ionic *annēson*, *anēson*; poetic, *annē-ton*, *anēton*; later Attic, Doric, and Æolic *anison*, *annison* = dill or anise. Arab. *ainison*.] [**ANETHUM.**]

1. *The anise proper*: An umbelliferous plant, the *Pimpinella anisum*. It is cultivated in Malta and Spain for the sake of the seeds, which are imported into this and other countries. They are aromatic and carminative. Its scent tends to neutralize other smells. It is sometimes sown here for its leaves, which are used like fennel as a seasoning or garnish.

2. *The anise of Scripture*: In Gr. to [the] *anēthon*, should, it is believed, have been translated "dill," *Anethum graveolens*. [**DILL.**] It also is of the Umbelliferous order.

"... for yepay tithe of mint and *anise* and cummin, . . ."—*Matt. xxiii. 23.*

Oil of anise: A solution of *anise camphor*, or *anethol*, $C_{10}H_{12}O$, in an oil like turpentine; it solidifies at 10°. It is the essential oil of *Pimpinella anisum*. The camphor is obtained pure from alcohol by pressure and crystallization. In pharmacy it is used as a stimulant, aromatic, and carminative; it relieves flatulency, and diminishes the griping of purgative medicines.

anise-camphor, *s.* [**ANETHOL.**]

Chem.: A white crystalline substance; sp. gr. 1.014. It melts at 18°, and boils at 222°.

ăn' -i-sēed, *s.* [*Eng. ani(se); seed.*] The seed of the anise (q. v.).

aniseed-tree, *s.* [*Anise-seed tree, so called because the leaves and capsules have a strong smell of anise-seed.*] The English name of *Illicium*, a genus of Magnoliaceæ, or Magnoliads. The best known species are *I. floridanum* and *I. parviflorum*, from Florida.

ăn' -i-sětt'e de Bourdeaux Bŏr-dŏ', *s.* [*Fr.*] A liquor consisting of anise macerated in eau-de-vie.

ăn' -is' -ic, *a.* [*Eng. anise, and suff. -ic.*] Pertaining to anise or anise-seed.

Anisic acid = Methyl-paraoxybenzoic acid = hydrate of anisyl = draconic acid, $C_8H_5O_3$. A monobasic aromatic acid, obtained by the oxidation of anisic aldehyde. It crystallizes in colorless prisms which melt at 175°. It is soluble in hot water, alcohol, and ether. By distillation with lime it yields CO_2 and anisol.

Anisic alcohol: $C_8H_{10}O_2$. An aromatic alcohol obtained by treating anisic aldehyde with alcoholic potash. It boils at 250°. It crystallizes in hard white needles, which melt at 23°.

Anisic aldehyde = Anisal = Hydride of Anisyl: $C_8H_5O_2$. An aromatic yellow liquid obtained by oxidizing anisic alcohol. It is oxidized into anisic acid, and by nascent H converted into anisic alcohol; it forms crystalline compounds with alkaline acid sulphites. Also obtained by the action of dilute HNO_3 and anise-camphor. It boils at 255°.

ăn' -is-i-dī'ne, *s.* [*From Eng., &c., anise.*]

Chem.: $N.C_7H_7O.H_2$ = methylphenidine, an organic base formed by the action of sulphide of ammonium on nitranisol, it combines with acids forming salts.

ăn' -i-sŏ-dăc' -tŷl' -ēs, *s. pl.* [*Gr. anisos=unequal; an, priv., and isos=equal; (2) daktylos=a finger or a toe.*]

Zool.: Temminck's name for those insessorial birds which have toes of unequal length.

ăn' -i-sŏ-dŷn' -ă-mŏŭs, *a.* [*Gr. (1) anisos=unequal; an, priv., and isos=equal; (2) dunamis=power, strength; dunamai=to be able.*]

Bot.: Of unequal strength. (Used of monocotyledonous plants which, when they germinate, grow with greater force on one side of their axis than on the other.)

ăn' -i-sŏ' -ic äc' -id, *s.* [*From anise (q. v.).*]

Chem.: $C_{10}H_{18}O_6$. A product of the oxidation of oil of star anise.

ăn' -is-ŏl, *s.* [*Lat. anisum=anise, and oleum=oil.*]

Chemistry: $C_7H_5O=C_6H_4(CH_3).OH$. An aromatic alcohol (also called *methyl phenol*, *methyl carbolic acid*, or *dracol*) obtained by heating potassium phenate, $C_6H_5.OK$, with methyl iodide, $CH_3.I$; also

Anise (*Pimpinella Anisum*).
One-sixth natural size; plant, flower,
and ripe fruit enlarged.

bŏl, bŏy: pŏut, jŏwł; cat, çell, chorus, çhin, bench; go, gem; thin, țhis; sin, aș; expect, Xenophon, exist. ph = f.
-cian, -tian = șan. -tion, -sion = șŭn; -țion, -șion = zhŭn. -tious, -cious, -sious = șhŭs. -ble, -dle, &c. = beł, deł.

by the dry distillation of methyl salicylate, or by distilling anisic acid with excess of caustic baryta. Anisol is a colorless liquid, boiling at 152°. It dissolves in H₂SO₄, forming *sulphanisolic acid*, C₇H₅SO₄. By fuming HNO₃ there are one, two, or three atoms of H replaced by (NO₂), forming mono-, di-, or tri-*nitranisol*, which by reducing agents give corresponding basic amido-compounds; as C₇H₇(NO₂)O, *nitranisol*, gives C₇H₇(NH₂)O, *nitranisidine*. (See Watt's *Dict. Chem.*)

ăn-i-sô-mêt'-rîc, *a.* [Gr. *anisometros*=of unequal measure with: *an*, priv., *isos*=equal to; *metron*=a measure.]

Min.: Of unequal measurement.

"II. Titanite Group. "*Anisometric*."—*Dana: Min.*; 5th ed., p. 362.

"Mesotype Group. *Anisometric*."—*Ibid.*, p. 421.

ăn-i-sô-nê'-mă, *s.* [Gr. *anisos*=unequal; and (?) *nêma*=a web.]

Zool.: A genus of Infusoria belonging to the family Thecamonadina.

ăn-i-sôp'-lî-a, *s.* [Gr. *anisos*=unequal, and *hoplon*=a tool, an implement, a weapon.] A genus of lamellicorn beetles. One species, *A. horticola* (Garden Chafer or May-bug), which may be recognized by its green body and tawny elytra. It is much given to destroying thorn hedges, roses in gardens, corn in fields, in the months of May and June. Another, *A. agricola* (Field Chafer), green in color, is similarly hurtful in France and Germany.

ăn-i-sô-sçêl'-î-dæ, *s. pl.* [Gr. *anisos*=unequal; *skelos*=the leg, including the foot.] A family of bugs. The *Diactor bilineatus* has enormous expansions on the hindmost pair of legs.

ăn-i-sô-spêr'-mă, *s.* [Gr. *anisos*=unequal, and *sperma*=seed.] A genus of plants belonging to the order Cucurbitaceæ (Cucurbits). The seeds of *A. passiflora* contain a bitter oil mixed with a bland sebaceous matter and resin. Taken in small doses they are stomachic, but swallowed in larger quantities they act as purgatives.

ăn-i-sô-stêm'-ôn-oûs, *a.* [Gr. *anisos*=unequal, and Lat. *stamen*= . . . a thread.]

Bot.: Having the stamina in number unequal to the petals.

ăn-i-sôs'-tôm-oûs, *a.* [Gr. *anisos*=unequal, and *stoma*=mouth.]

Bot.: "Having unequal mouths." (Used of a calyx or corolla divided unequally.)

ăn-i-syl, *s.* [From Eng., &c., *anisc*.]

Chem.: C₃H₇O₂. An organic radical contained in anisic acid, anisyl hydride, &c.

ăn-kêr (1), *s.* [In Dut., Ger., & Dan., *anker*; Sw *ankare*.]

1. A Dutch liquid measure containing about 10¼ imperial gallons.

2. An English liquid measure for spirits, wine, &c., containing about 8¼ imperial gallons.

" . . . *ankers* of brandy."—*Macaulay: Hist. Eng.*, ch. xii.

ăn-kêr (2), *s.* [ANCHORITE.]

***ăn-kêr'-as**, *s.* Old spelling of ANCHORESS.

***ăn-kêr'-êre**, *s.* Old spelling of ANCHOR (q. v.).

ăn-kêr'-ite, *s.* [In Ger. *ankerit*. Named after Prof. Anker, of Styria.] A mineral classed by Dana under his Calcite group of Anhydrous Carbonates. Its crystals are rhombohedral; it occurs also massive, granular, or compact. The hardness is 3½ to 4; the sp. grav. 2.95 to 3.1; the luster vitreous to pearly; the color white, gray, or reddish. It is translucent, or nearly so. Its composition is carbonate of lime, 46.40 to 56.45; carbonate of magnesia, 11.85 to 36.35; protoxide of iron carbonate, 13.26 to 35.31; protoxide of manganese carbonate, 0.34 to 10.09. It is found in Styria, in Nova Scotia, &c.

ăn-kis-trô-dêş'-mûs, *s.* [Gr. *ankistrôn*=a fish-hook; *desmos*=a bond.]

Bot.: A genus of Desmidiaceæ. Character: Cells elongated, attenuated, entire, aggregated into fagot-like bundles.

ăn-kle, **ăn-cle**, *s.* [A. S. *ancle*, *ancleo*; Sw. & Dan. *ankel*; Ger. *enkel*; Dut. *enkel*.] The joint by which the foot is united to the leg.

" . . . and he brought me through the waters; the waters were to the ankles."—*Ezek.* xlvii. 3.

"For still, the more he works the more
Do his weak ankles swell."

Wordsworth: Simon Lee.

ankle-bone, **ancle-bone**, *s.* The bone of the ankle.

" . . . immediately his feet and *ancle-bones* received strength."—*Acts* iii. 7.

ankle-deep, *a.* Sunk in some semi-liquid or liquid substance as deep as the ankles.

"Hence, *ankle-deep* in moss and flowery thyme,
We mount again . . ."—*Cowper: Task*, bk. i.

ankle-joint, *s.* The joint of the ankle.

" . . . the backward position of the *ankle-joint* surface presented by the astragalus to the tibia."—*Owen: Classif. of the Mammalia*, p. 67.

ăn'-kled, *a.* [Eng. *ankle*; suffix *-ed*.] Pertaining to the ankles. (Chiefly in composition.)

"Well *ankled*, two good confident calves."—*Beaumont & Fletcher: Wit at Several Weapons*.

ăn-k'-lêt, *s.* [Dimin. of Eug. *ankle*.]

†1. A little ankle.

2. An ornament placed on the ankle as a bracelet is on the wrist.

***ăn'-kre**, *s.* [ANCHOR.]

***ăn-k'-rêss**, *s.* Old spelling of ANCHORESS.

ăn-k-ÿ-lô'sed, *a.* [ANCHYLOSED.]

ăn-k-ÿ-lô'-şis, *s.* [ANCHYLOSIS.]

ăn-k-ÿ-lôt'-ic, *a.* [ANCHYLOTIC.]

ăn-lăçe, **ăn-lăs**, *s.* [In Mediæv. Lat. *anelacium*. From Wel. *anglas*=a sword.] A falchion, a wood-knife, a dagger.

"An *anlas* and a gipsier al of silk

Heng at his gerdul, whit as morne mylk."

Chaucer: C. T., 359, 360.

"Bot Arthur with ane *anlace* egerly smyttez,
And hittez ever in the hulke up to the hiltz."

Morte Arthure (ed. Përry), 1, 148-49.

"And by his side an *anlace* hung."

Scott: Rokeby, v. 15.

ăn-na, *s.* [Maharatta *anna*; Bengali and Sansc. *ana*.] An imaginary coin used in calculations in India. It is the sixteenth part of a rupee, is in value about three cents, and is estimated to contain four pice.

ăn-na-bêr'-gîte, *s.* [From Annaberg, in Saxony, where it occurs.] A mineral placed by Dana in his Vivianite group. It is monoclinic, has capillary crystals, and is besides massive and disseminated. The color is a fine apple-green; the streak greenish-white. Composition: Arsenic acid, 36.8 to 38.90; protoxide of nickel, 35 to 37.35; oxide of cobalt, from a mere trace to 2.5; water, 23.91 to 25.5. Besides Annaberg, it is found in Dauphiny, in Connecticut, and other places.

ăn-nal, *s.* [In Fr. *annal* is=annual (used specially of plants). From Lat. *annalis*=belonging to a year; *annus*=a year.]

A. Singular (Annal).

†1. *Generally*: The singular of the word ANNALS (q. v.). [ANAL-WRITING.]

2. *Technically*. In the Roman Catholic Church: A mass said for an individual every day in the year, or annually on a particular day of each year. (*Du Cange*.)

B. Plural (Annals). [In Sw. & Dan. *annaler*; Ger. *annalen*; Fr. *annales*; Sp. *anales*; Ital. *annali*. From Lat. *annales* (pl.); rarely *annalis* (sing.)=year-books, yearly records, from *annus*=a year.]

1. *Property*: The record of historical events arranged chronologically, and divided into yearly portions. In this sense the record of the important events in the Roman State, said to have been made annually for the first six centuries of its existence by those who successively filled the high office of Pontifex Maximus, were annals.

"Their model was the official *annals* of the year kept by the Pontifex Maximus."—*Lewis: Early Rom. Hist.*, ch. ii., § 8.

2. *More loosely*: Records of historical events, or even of less important incidents, although they may not be formally divided into yearly portions. There has been considerable dispute regarding the precise difference between annals and history. Broadly speaking, annals are simple records or chronicles of events, in yearly portions or otherwise, without any effort to trace occurrences to their causes, to investigate the characters and motives of the chief actors, or to intercalate philosophical generalizations. When these elements are superadded to the bare chronicle of incidents then annals become history.

"Nor Grandeur hear with a disdainful smile
The short and simple *annals* of the poor."

Gray: Elegy.

annal-book, *s.* A history. (*Tennyson: Coming of Arthur*, 116.)

annal-writing, *s.* Writing of annals.

" . . . the distinction we have stated between history-writing and *annal-writing*."—*Penny Cyclo.*, vol. ii., p. 41.

ăn-nal-ist, *s.* [Eng. *annal*; suffix *-ist*. In Ger. *annalist*; Fr. *annaliste*; Sp. *analista*; Port. & Ital. *annalista*.] One who writes annals.

"The native historians of Rome, who were prior to Salust, Dionysius, and Livy, have been sometimes grouped together under the common designation of *annalists*."—*Lewis: Early Rom. Hist.*, ch. iii., § 11.

"The records of an *annalist* may be jejune."—*Ibid.*, ch. xiii., pt. i., § 1.

ăn-nal-ist'-ic, *a.* [Eng. *annalist*; suffix *-ic*.] Pertaining to annalists.

"Now the *annalistic* style is marked by brevity and dryness."—*Lewis: Early Rom. Hist.*, ch. xiii., pt. i. § 1.

" . . . the dry *annalistic* style of the early Roman historians."—*Ibid.*, ch. ii., § 2.

ăn-nal-ize, *v. t.* [Eng. *annal*; suffix *-ize*.] To note down as annals.

"Observe the miracle, deserving a Baronius to *annalize* it."—*Sheldon: Mir. of Antich.* (1616), p. 332.

ăn-nalş, *s. pl.* [ANAL.]

ăn-nat (Eng. & Scotch), ***ăn** (Scotch), *s.* Often in the plural, **ăn-nats**, **ăn-nâtes**. [In Ger. *annaten*; Fr. & Ital. *annate*; Sp. *anata*; Port. *anata*. From Lat. *annus*=a year.]

I. "*Primitiæ*" (First-fruits):

1. *When the Papal power was dominant*: The first year's revenues of a benefice which each new incumbent was required to remit to the papal treasury. Cowel says that first-fruits were called *annates* because paid after one year's profit of a living had been obtained. The original imposition of annates is generally attributed to John XXII. in the fourteenth century, but they existed before his time. Valuations of them were made in England in A. D. 1254 and in 1292. (See Mosheim's *Church Hist.*, Cent. xiv., pt. ii., ch. ii., § 6, Murdoch's note; also Cent. xv., pt. ii., ch. ii., § 532.)

"Though the Council of Basil damned the payment of *annats*, yet they were paid here till Henry VIII. annexed them for ever to the crown."—*Ep. Barlow: Remains*, p. 172.

2. *Since the Reformation*:

(a) *In England*: The first-fruits exacted by Henry VIII. in England, at the Reformation, were the annates of the bishoprics, which the king had dis severed from the Pope.

(b) *In Ireland*: Before the passing of the first Reform Bill the annates were applied primarily to the repair of ecclesiastical buildings, and then to the augmentation of poor livings.

II. *In the modern Church of Rome*: Masses said for a year either for the soul of a person deceased, or for that of a person living. (See Ayliffe's *Parergon*.)

ăn-nê'al, *v. t.* [A. S. *anælan*=(1) to kindle, to inflame, to light; (2) to anneal. From *ælan*=to kindle, light, set on fire, also to bake; *æt*=fire.]

I. *Literally*:

1. To heat a metal with the view of regulating its elasticity, or glass to render it less brittle, or to fix colors in it. When a metal is to be annealed it is raised to a temperature lower than the one necessary to temper it, and then allowed to cool slowly. The elasticity of the metal is thus diminished. Springs have thus imparted to them the precise measure of elasticity which is deemed the most suitable. Glass is similarly annealed. It is first heated, and then allowed to cool slowly. (See Ganot's *Physics*, 3d ed., 1868, p. 63.)

"But when thou dost *anneal* in glass thy story,
More rev'rend grows, and more doth win,
Which else shows waterish, bleak, and thin."

Herbert.

"Beneath those chambers of the Sun,
Some amulet of gems *anneal'd*
In upper fires . . ."

Moore: Paradise and the Peri.

†2. To temper by cold. (*Shenstone*.)

3. To bake. (Used of tiles.)

II. *Figuratively*: To temper the character by the heat of suffering or trial, so as to enable it to endure more without being shattered.

"The mind to strengthen and *anneal*,

While on the stithy glows the steel!"

Scott: Rokeby, i. 31.

ăn-nê'aled, *pa. par. & a.* [ANNEAL.]

"Both the poles, you find, attract both ends of the needle. Replace the needle by a bit of *annealed* iron wire, the same effects ensue."—*Tyndall: Frag. of Science*, 3d ed., xiii. 381.

ăn-nê'al-îng, ***a-nê'al-îng**, *pr. par., a., & s.* [Sometimes corrupted into NEALING.]

As substantive: The process of first heating and then cooling a metal, with the view of regulating its elasticity or tempering it. The process of similarly treating glass to render it less brittle or fix colors in it.

"Enameling and *anealing*."—*Sprat: Hist. of the Royal Soc.*, p. 286.

ăn-nêc'-tant, *a.* [From Lat. *annectens*, genit. *annectentis*, pr. par. of *annecto*=to tie to, to annex: *ad*=to, and *necto*=to bind, to tie.] Affixing, joining, annexing.

ăn-nêl-id, **ăn-nêl-ide**, ***ăn-êl-ide**, **ăn-nêl-i'-dan**, *s.* [ANNELIDA.] An animal belonging to the class Annelida. (*Huxley*, &c.)

ăn-nêl-i'-da, *s. pl.* [Lat. *annellus* or *anellus*=a little ring, dimin. of *annulus*, or *anulus*=a ring.] A class of animals belonging to the sub-kingdom

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pîne, pît, sîre, sîr, marîne; gô, pôť, or, wôre, wôlf, wôrķ, whô, sôn; mûte, cûb, cûre, unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

Articulata, the Annulosa of some naturalists. They are sometimes called Red-blooded Worms, being the only invertebrated animals possessing this character. They are soft-bodied animals, mostly living in the water, sometimes in moist earth, but never parasitically within the bodies of other animals; the higher ones possessing limbs, though of a rudimentary character, which makes them resemble centipedes; while the lower ones, like the leeches, are wholly destitute of these appendages. The respiration is effected by external branchiæ, by internal vesicles, or by the skin itself. Contractile vessels supply the place of a heart. The nervous system consists of a single or double ventral cord, furnished with ganglia at intervals, and surrounding the œsophagus above. Cuvier divided them into three orders—Tubicola, Dorsibranchia, and Abranchia; Milne-Edwards into Suctoria, Terricola, Tubicola, and Errantes; Professor Huxley into Chætophora and Discophora; and Griffith and Henfrey into Turbellaria, Suctoria (Apoda), and Chætopoda (Setigera). [ANNELATA.]

ăn-něl-î-dan, *s.* [ANNELID.]

ăn-něl-lā-ta, **ăn-ěl-lā-ta**, *s. pl.* [Lat. *anellus*, *anellus*=a little ring.] A name sometimes given to the class of animals called by Cuvier Annelida. It is thus used in the first edition of Owen's *Comparat. Anat. of the Invertebrate Animals* (1843), but in the second edition (1855) Annulata is the term used.

ăn-nětt, *s.* A name sometimes given to the Kittiwake gull, *Larus tridactylus*.

ăn-něx', *v. t.* [In Fr. *annexer*; Sp. *anexar*; Port. *annexar*. From Lat. *annexum*, supine of *annecto*=to tie on or to; *ad*=to, and *necto*=to bind to, to add to the end of anything.]

1. *Property*: To tie to the end of; to append.

2. To add something of lesser size or importance to anything else of greater size or importance existing previously. (It is often used for the addition of another kingdom or province to an empire.)

"He wished to humble the United Provinces, and to annex Belgium, Franche Compté, and Lorraine to his dominions."—*Macaulay: Hist. Eng.*, ch. ii.

"The great fiefs which, three hundred years before, had been, in all but name, independent principalities, had been annexed to the Crown."—*Ibid.*

3. To connect something with another by the relation of sequence to it, as a penalty to a crime.

"... some fatal curse annex'd,
Deprives them of their outward liberty;
Their inward lost."—*Milton: P. L.*, bk. xii.

ăn-něx', *s.* [From the verb. In Fr. *annexe*; Port. *annexa*.] Anything annexed, appended, or added.

1. *Of writings*:

"Moses did in other annexes of the law."—*Jeremy Taylor: Of the Decalogue. Works* (ed. 1839), vol. iii., p. 43.

¶ An additional stipulation to the Anglo-Turkish convention of 1878 was called an *annex*.

2. *Of buildings*: A subsidiary building added on to a main building.

ăn-něx'-ar-ỹ, *s.* [Eng. *annex*; suff. *-ary*.] Something appended; an addition.

"... of these societies, ... unto which sundry of them are no other than annexaries and appurtenances."—*Sir E. Sandys: State of Religion*.

ăn-něx'-ā-tion, *s.* [Eng. *annex*; suff. *-ation*.] The act of annexing; the state of being annexed; anything annexed.

I. *Ordinary Language*:

1. The addition of any document or writing to the end of one which is already in existence. The joining of something smaller to something greater, or something less to something more important. (Used especially of the addition of a smaller country to a greater, as the proposed annexation of Canada to the United States.)

2. The addition of one thing to another, the thing added being joined to its predecessor by the bond of logical or other sequence.

"If we can return to that charity and peaceable mindedness which Christ so vehemently recommends to us, we have His own promise that the whole body will be full of light, *Matt. vi.*, that all other Christian virtues will, by way of concomitance or annexation, attend them."—*Hammond*.

II. *Technically*:

Eng. Law: The appropriation of church lands to the Crown; also the vesting of a privilege, patronage for example, in one holding a certain office.

"How annexations of benefices first came into the Church, whether by the prince's authority, or the pope's license, is a very great dispute."—*Ayliffe: Parergon*.

"The Dean of Windsor, by an ancient annexation, is patron thereof."—*Bp. Hall: Specialities of his Life*, p. 27.

annexionist, *s.* One who is in favor of annexation.

ăn-něx'ed, *pa. par. & a.* [ANNEX, *v.*]

ăn-něx'-ing, *pr. par., a. & s.* [ANNEX, *v.*]

ăn-něx'-ion (*xion*=*kshūn*), *s.* [In Fr. *annexion*; Sp. *anexion*.] Annexation; addition.

"It is necessary to engage the fears of men, by the annexion of such penalties as will overbalance temporal pleasure."—*Rogers*.

"With the annexions of fair gems enrich'd
And deep-brain'd sonnets, that did amplify
Each stone's dear nature, worth and quality."

Shakesp.: A Lover's Complaint.

ăn-něx'-ion-ist, *a.* [Eng. *annexion*; *-ist*.] Tending to annexation.

"... with the mysterious neutrality of Germany on one, and the annexionist inclinations of Italy on the other side."—*Times*, Nov. 13, 1876.

ăn-něx'-mēnt, *s.* [Eng. *annex*; suff. *-ment*.] The act of annexing, the state of being annexed; the thing annexed.

"When it falls,
Each small annexment, petty consequence,
Attends the boist'rous ruin."

Shakesp.: Hamlet, iii. 3.

ăn-nĩ-cūt, **ăn-ĩ-cūt**, *s.* [Native term. Canarise *annekattē*, *anekatte*.]

"One of the principal *anicuts* has given way, and the waters have swept down into the plain, doing enormous damage to the crops."—*Times*, Sept. 10, 1878.

In India: A dam or mole built across a river to raise the level of the water for the purposes of irrigation, and, to a certain extent, also with the view of facilitating navigation. Such an *annicut* was some years ago constructed near the mouth of the Godavery River.

ăn-nĩ-hĩl-ā-ble (*h* silent), *a.* [Eng. *annihilate*]; *-able*.] Capable of being annihilated.

ăn-nĩ-hĩl-āte (*h* silent), *v. t.* [In Fr. *annihiler*; Sp. *aniquilar*; Port. *aniquilar*; Ital. *annichilare*. From Lat. *annihilo*: *ad*=to, and *nihil*=nothing.]

1. To reduce to non-existence in the literal sense of the word.

"There is nothing more certain in nature than that it is impossible for any body to be utterly annihilated; but that as it was the work of the omnipotency of God to make somewhat of nothing, so it requireth the like omnipotency to turn somewhat into nothing."—*Lord Bacon: Nat. Hist.*, Cent. 1, § 100.

2. To reduce anything to non-existence by dissolving it into its constituent elements, and thus destroying its distinctive character. Thus an army is annihilated if some soldiers belonging to it are slain, some taken prisoners, and the remainder so demoralized that they have scattered in all directions with no intention of again repairing to their standards.

"He proposed, he said, first to annihilate the army of Vaudemont."—*Macaulay: Hist. Eng.*, ch. xxi.

3. To annul, to abolish, to destroy the force of.

"There is no reason that any one commonwealth should annihilate that whereupon the whole world has agreed."—*Hooker*.

4. *Fig.*: To make one feel as if blotted out of existence, as by severe rebuke, the refusal of an important request, &c. (For ex. see ANNIHILATING as *adj.*)

ăn-nĩ-hĩl-āte (*h* silent), *a.* [ANNIHILATE, *v.*] Reduced to nothing; null and void.

"... then you do repute the same as vain, and annihilate."—*Oath to the Statute of Succession*, A. D. 1534.

ăn-nĩ-hĩl-ā-tēd (*h* silent), *pa. par. & a.* [ANNIHILATE, *v.*]

"Annihilated senates—Roman, too,
With all thy vices, for thou didst lay down
With an atoning smile a more than earthly crown."

Byron: Childe Harold, iv. 83.

ăn-nĩ-hĩl-ā-tiŋg, *pr. par., a., & s.* [ANNIHILATE, *v.*]

A. & B. *As present participle & adjective*: In senses corresponding to those of the verb.

"If they must mourn, or may rejoice
In that annihilating voice."

Byron: The Siege of Corinth, 24.

C. *As substantive*: The act of blotting out of existence, either by reducing to nothingness, or by resolving into its constituent parts; the state of being thus blotted out.

"... for spirits that live throughout
Vital in every part, not as frail man
In entrails, heart or head, liver or reins,
Cannot but by annihilating die."

Milton: P. L., bk. vi.

ăn-nĩ-hĩl-ā-tion (*h* silent), *s.* [Lat. *annihilatio*. In Fr. *annihilation*; Sp. *aniquilacion*; Port. *aniquilacao*; Ital. *annichilazione*.]

I. The act of blotting out of existence—

(1) By reducing to nothingness—

"The tempest cometh: Heaven and Earth unite
For the annihilation of all life.
Unequal is the strife
Between our strength and the Eternal Might!"

Byron: Heaven and Earth, i. 3.

Or (2) by resolving into its constituent elements, and rendering useless for the purpose to effect which these were combined.

II. The state of being thus blotted out of existence.

"God hath his influence into the very essence of things, without which their utter annihilation could not choose but follow."—*Hooker*.

¶ *Blank annihilation*=complete annihilation.

"... which presents not the too fugitive glimpses of past power, but its blank annihilation."—*De Quincey: Works* (ed. 1863), vol. ii., p. 118.

an-nĩ-hĩl-ā-tion-ist, *s.* One who believes in the doctrine of man's annihilation at death.

ăn-nĩ-hĩl-ā-tōr (*h* silent), *s.* [Eng. *annihilate*; suff. *-or*.] One who or that which annihilates. (In the latter sense chiefly in composition, as *smoke-annihilator*.)

ăn-nĩte, *s.* [Named from Cape Ann, in North America.] A mineral classed by Dana in his Mica group. Its hardness is 3; sp. gr., 3.169; color, black; streak, dark-green. Composition: Silica, 37.39 to 39.55; alumina, 16.66 to 16.73; sesquioxide of iron, 12.07 to 13.74; protoxide of iron, 17.48 to 19.03; potassa, 10.20 to 10.66, with smaller proportions of sesquioxide of manganese, magnesia, &c. At Cape Ann it occurs in granite.

***ăn-nĩv'-ēl-āis**, *s. pl.* [Lat. *annus*=a year.] Chantry priests, whose duty it was to say private masses at particular altars, as in Exeter Cathedral. They were called also *annualais* and *chaplains*.

ăn-nĩ-vēr'-sar-i-ly, *adv.* [Eng. *anniversary*; suff. *-ly*.] At the return of the same period of the year; annually.

"A day was appointed by public authority to be kept *anniversary* sacred unto the memory of that deliverance and victory."—*Bp. Hall: Rem.*, p. 312.

ăn-nĩ-vēr'-sar-ỹ, *a. & s.* [In Fr. *anniversaire*; Sp. *aniversario*; Port. & Ital. *anniversario*. From Lat. *anniversarius*=yearly, annual; *annĩ*=of the year, genit. of *annus*=the year, and *versum*, supine of *verto*=to turn.]

A. *As adjective*:

*1. Performed in a year.

"The heaven whirled about with admirable celerity, most constantly finishing its anniversary vicissitudes."—*Ray*.

2. Recurring once a year at a stated time; annual, yearly.

Anniversary services: Services held on annually recurring days to commemorate certain occurrences which happened on those days, or are associated with them. Most congregations of recent origin have an anniversary service to commemorate the day on which their church was opened. The name is less frequently applied to Good Friday Christmas Day, and similar Christian festivals.

B. *As substantive*:

I. *Ordinary Language*:

1. An annually recurring day on which some notable event in ecclesiastical, in national, in local, or in personal history took place, or is wont to be celebrated.

"... the memory of the rout at Allia, kept alive by a solemn anniversary, was fresh in the minds of the people."—*Lewis: Early Rom. Hist.*, ch. xiii., pt. i., § 13.

"That day was the anniversary both of William's birth and of his marriage."—*Macaulay: Hist. Eng.*, ix.

"It was near nine in the evening before the House rose. The following day was the 30th of January, the anniversary of the death of Charles I."—*Ibid.*, ch. x.

2. The celebration which takes place at such annually recurring periods.

"Donne had never seen Mrs. Drury, whom he has made immortal in his admirable *anniversaries*."—*Dryden*.

II. *Technically. In the Church of Rome*: An office for the souls of certain deceased persons, which is celebrated once a year, but which, it is held, ought to be so daily. (*Ayliffe: Parergon*.)

***ăn-nĩ-vērse**, *s.* [Lat. *anni*, genit. of *annus*=a year, and *versus*=turning; *verto*=to turn. The turning of a year.] An anniversary.

"... shall an *anniverse*

Be kept with ostentation to rehearse
A mortal prince's birthday, or repeat
An eighty-eight, or powder plot's defeat."

Hale on Christmas Day.

ăn-nĩv'-ite, *s.* [Named from the Anniver valley in the Valais.] A mineral, a variety of Tetrahedrite.

ăn-nō, *s.* [Lat. Ablative of *annus*=a year.]

Anno Domini. In the year of the Lord, *i. e.*, our Lord Jesus Christ. The time is fixed by the calculations of Dionysius Exiguus, which are erroneous, it is thought, by about four years. [DIONYSIAN ERA.] (Usually written *A. D.*)

"Stadlin's within:

She raises all your sudden ruinous storms
That shipwreck barks, and tears up growing oaks,
Flies over houses; and takes *Anno Domini*
Out of a rich man's chimney."

Middleton: Witch, i. 2.

ăđil, bōy; pōut, jōwł; cat, ɕell, chorus, ɕhin, bench; go, gem; thiz, ɕhis; sin, aɕ; expect, Xenophon, exist. ph = f. -clan, -tian = şan. -tion, -sion = şhũn; -t̃ion, -şion = zhũn. -tious, -cious, -sious = şhũs. -ble, -dle, &c. = beł, ɕel.

Anno Mundi. In the year of the world. (Usually written *A. M.*)

¶ Since Geology has proved the earth to have existed infinitely longer than was once believed, the expression *Anno Mundi*, in the old sense, has become obsolete. The dates which it furnishes are now known not to have even approximated to the truth.

ān'-nō-dā-tēd, a.

1. To proclaim, to publish as news, to make publicly known. (Followed by the objective case of the intelligence made known, or by a clause of a sentence introduced by *that*.)

"Of the Messiah I have heard foretold

By all the prophets; of thy birth at length
Announc'd by Gabriel with the first I knew."
Milton: P. R., bk. iv.

"The peal of a musket from a particular half moon was the signal which *announced* to the friends of the House of Stuart that another of their emissaries had got safe up the rock."—*Macaulay: Hist. Eng.*, ch. xiii.

†2. To give forth a judicial decision.

"Those, mighty Jove, meantime, thy glorious care,
Who model nations, publish laws, *announce*
Or life or death."—*Prior*.

ān'-nōū'ced, pa. par. & a. [ANNOUNCE.]

ān'-nōū'ce-ment, s. [Eng. *announce*; -ment.] The act of announcing; the state of being announced; the news proclaimed, published, made known, or declared.

¶ Of modern introduction into the language, *announcing* having been the term formerly employed.

"As soon as Lewis was again at Marli, he repeated to the Court assembled there the *announcement* which he had made at Saint Germain."—*Macaulay: Hist. Eng.*, ch. xxv.

ān'-nōū'n-çēr, s. [Eng. *announce*; -er. In Fr. *annonceur*.] One who announces. (Cotgrave.)

ān'-nōy, *ā-nōy'e, *ā-nōi'e, v. t. [Norm. *annoyer*, fr. *neure* or *nuire*=to hurt; Fr. *ennuyer*=to weary; *nuire*=to damage, to hurt; Ital. *annoiare*=to weary, to tire; *nuocere*=to hurt. From Lat. *noceo*=to harm or hurt.] [NUISANCE. NOXIOUS.]

1. **Lit.** Of persons or other conscious beings: To tease, to molest, to put to inconvenience, to trouble, to inflict vexation upon.

"None aventure, for wiche the knyghtis weire

Anyt all at the abiding thare."

Lancelot of the Laik (ed. Skeat), bk. i., 350, 351,

"His falous-chip abasit of that thing,

And als therof anyt was the king."

Ibid., bk. ii., 2,243, 2,244.

"... he determined not yet to dismiss them, but merely to humble and annoy them."—*Macaulay: Hist. Eng.*, ch. iv.

2. **Fig.** Of unconscious existence:

(a) To drive or toss hither and thither.

"His limbs would toss about him with delight,
Like branches when strong winds the trees annoy."
Wordsworth.

(b) To harm, to injure.

"Salamon saith, that right as motthes in schepes flees annoyeth the clothes, and the smale wormes to the tre, right so annoyeth sorwe to the herte."—*Chaucer*.

ān'-nōy, *ān'-nōy'e, s. [From the substantive.] Annoyance. (Obsolete, except in poetry.)

"Counsel or help; and therfor telleth me

Al your annoy, for it schal be secré."

Chaucer: C. T., 14,540, 14,541.

"And, in the shape of that young boy,

He wrought the castle much annoy."

Scott: The Lay of the Last Minstrel, iii. 21.

ān'-nōy'-ānce, s. [Eng. *annoy*; -ance.]

1. The act of annoying, molesting, or teasing.

"For the further annoyance and terror of any besieged place, they would throw into it dead bodies."—*Wilkins*.

2. The state of being annoyed, molested, or teased.

"... a government which has generally caused more annoyance to its allies than to its enemies."—*Macaulay: Hist. Eng.*, ch. xx.

3. That which annoys, molests, or teases.

"*Prud.* Can you remember by what means you find your annoyances, at times, as if they were vanquished?"—*Bunyan: P. P.*, pt. i.

***ān'-nōy'-fūl, *ā-nōi'-fūl, a.** [Eng. *annoy*; full.] Eminently capable of inflicting annoyance.

"For al be it so, that al taryng be *anoiful*, algates it is not to repreve in geving of jugement, ne in vengeance taking, when it is suffisant and reasonable."—*Chaucer: Melibeus*.

ān'-nōy'-ing, pr. par. & a. [ANNOY, v.]

***ān'-nōy'nte, v. t.** [ANOINT.]

***ān'-nōy'-oūs, *ā-nōy'-oūs, a.** [Eng. *annoy*; -ous.] Troublesome, fitted to produce annoyance.

"Ye han cleped to your conseil a gret multitude of people, ful chargeant and ful *anoyous* for to here."—*Chaucer: Melibeus*.

ān'-nū-al, a. & s. [In Fr. *annuel*; Sp. *anual*; Port. *anual*; Ital. *annuale*. From Lat. *annualis*=a year old; *annus*=a year. "*Annus* was synonymous with *annulus*, and originally meant a ring or circle, like *circus* and *circulus*." (*Lewis: Astron. of the Ancients*, ch. i., § 3.) The old form of *annus* was *amnus*, as in *solemnis*. (*Key: Philol. Essays*, 1863, p. 260.)]

A. As adjective:

I. Ordinary Language:

1. Requiring just a year to finish; performed exactly in a year.

"That waits thy throne, as through thy vast domain,
Annual, along the bright ecliptic road."

Thomson: Seasons; Summer.

2. Occurring or returning every year.

"To Castile came the *annual* galleons laden with the treasures of America."—*Macaulay: Hist. Eng.*, ch. xxiii.

3. Fulfilling its function and running its course; or being born, living and dying within a period often falling short of, but in no case exceeding, a year. (See II. 3, and B. 1.)

"Every tree may, in some sense, be said to be an *annual* plant, both leaf, flower, and fruit proceeding from the coat that was superinduced over the wood the last year."—*Ray*.

¶ The Old English word which *annual* partly displaced when it came into the language was *yearly*. (*Barnes: Early English*, p. 104.)

II. Technically:

1. **Astronomy:**

Annual Equation. [EQUATION.]

Annual Parallax. [PARALLAX.]

Annual Variation. [VARIATION.]

2. **Botany and Gardening:**

(a) *Annual leaves*, called also *deciduous leaves*, are those which fall in the autumn, as those of most of our common trees. (*Lindley*.)

(b) *Annual rings*: Concentric rings or circles seen when exogenous stems are cut across transversely. Though generally indicating annual additions to the woody growth, yet there are rare and abnormal cases in which a tree may produce two of them in a year.

(c) *Annual plants*. [B. 1.]

B. As substantive:

1. **Ord. Lang. Botany and Gardening:** A plant which is sown, grows up, flowers, sheds its seeds, and dies, all within the compass of one year, or, more probably, of the portion of the year extending from spring to autumn.

"Now is the time to procure and sow (under glass) the seeds of all the choicest *annuals*. . . . Asters of varieties, balsams, zinnias, and stocks are quite indispensable."—*Hortic. Record*, March 1, 1877.

2. A book published only once a year, and probably about Christmas.

¶ See also ANNUAL.

***ān'-nū-āl-āis, s. pl.** [Eng. *annual*.] The same as ANNIVALEIS (q. v.).

ān'-nū-āl-ist, s. [Eng. *annual*; -ist.] One who edits or writes in an annual.

ān'-nū-āl-ly, adv. [Eng. *annual*; -ly.] Year by year, every year.

"... an army for which Parliament would *annually* frame a military code, . . ."—*Macaulay: Hist. Eng.*, ch. xxiii.

***ān'-nū-ar-ŷ, a.** [In Fr. *annuaire*; Port. *anuario*=a book published once a year.] Annual.

"Supply anew

With *annuary* cloaks the wandering Jew."

John Hall: Poems, p. 10.

***ān'-nū-el, *ān'-ū-ēll, s.** [Fr. *annuel*=annual.] A mass to be said annually, or the money to pay for it. [ANNUAL, A. 2.]

"To hauen hir to our hous and henten gif y mighte
An *Anuell* for myn owen [yse] to helpen to clothe."
Pierce the Plowman's Crede (ed. Skeat), 413, 414.

ān'-nū-el-lēr, s. [From Fr. *annuel*=annual.] A priest who sings anniversary masses for persons deceased.

"In London was a prest *annueller*

That therein dwelled hade many a year."

Chaucer: C. T., 12,940.

ān'-nū-ī-tant, s. [Eng. *annuity*; -ant.] One who receives or is entitled to receive an annuity.

"As the *annuitants* dropped off, their annuities were to be divided among the survivors, till the number of survivors was reduced to seven."—*Macaulay: Hist. Eng.*, ch. xix.

The term *Annuity* properly signifies a sum of money payable annually, for a certain length of time, or forever; and implies *pensions*, *salaries*, *rents*, and so on.

A *Certain Annuity* is one payable for a specified length of time.

A *Perpetual Annuity* is one that is to continue forever.

A *Contingent Annuity* is one whose beginning or termination depends on some contingent event—as the birth or death of a person.

An *Annuity in Arrears* is one whose payments have not been made when due, but allowed to accumulate with interest.

The *Amount* of an annuity in arrears, is the sum of all the payments due, and the interest thereon.

The *Present Worth* of an annuity is such a sum as would amount to its final value, at the given rate, for the given time.

To find the *Amount* of an annuity in arrears at Simple Interest:

Multiply the product by the number of payments due, and to the product add the ANNUAL interest on the several payments.

Find the amount of an annual salary of \$1,000, in arrears for 5 years, at 6 per cent. simple interest?

Ans., \$5,600.

Sum of 5 payments, \$1,000=\$5,000

Int. on \$1,000 for ten years= 600

Amount, \$5,600

The first payment becomes due at the end of the first year, consequently draws interest for 4 years; the second payment for 3 years; the third for 2 years, and the fourth for 1 year. Now 4+3+2+1 years' interest equals 10 years' interest.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sire, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

an-nū-i-tŷ, s. [Fr. *annuité*; Ger. *annuität*, from Lat. *annus*=a year.]

A. Ordinary Language: A fixed sum of money paid yearly.

Specially: A yearly allowance.

"He was generally known to be the son of one earl, and brother to another, who supplied his expense beyond what his annuity from his father would bear."—*Clarendon*.

Law: Under the Roman law annuities were sometimes granted by will, the obligation of paying them being imposed upon the heir. Borrowers in the Middle Ages were frequently obliged to grant annuities in lieu of interest, the exaction of which by creditors was forbidden as usury; and the practice received the Papal sanction in the fifteenth century.

an-nūl', v. t. [In Fr. *annuler*; Sp. *anular*; Port. *annullar*; Ital. *annullare*; Eccles. Lat. *annullo*; from *ad*=to, and *nullum*, accus. neut. of *nullus*=none.]

*1. To reduce to nothing. (Used of persons as well as things.)

"Truly the like y' han might to do good, and done it not, y^e crown of worship shall be take from hem, with shame shall they be annulled."—*Chaucer: Test of Love*, bk. iii.

"Light, the prime work of God, to me is extinct, And all her various objects of delight Annul'd, which might in part my grief have eased."—*Milton: Samson Agonistes*.

2. To abrogate, to make void, repeal, nullify, or abolish a law, a legal decision, an obligation, arrangement, or a custom deriving its validity from constituted authority; also to nullify a gift, grant, or promise by whomsoever made.

"... that he should assume the power of annulling some judgments and some statutes."—*Macaulay: Hist. Eng.*, ch. xiii.

"How in an hour the power which gave annuls Its gifts, transferring fame as fleeting too."—*Byron: Ch. Har.*, iii. 18.

"... all subsisting debts shall be forthwith annulled, and all insolvent debtors, reduced to slavery by their creditors, shall be liberated."—*Lewis: Early Rom. Hist.*, ch. xii., pt. 1., § 16.

an-nū-lar, a. [Fr. *annulaire*; from Lat. *annularis* or *anularis*=pertaining to a signet ring; *annulus* or *anulus*=a ring.] In the form of a ring; ringed; wearing a ring, as *annular finger*. (*Beaumont: Psyche*, 50.)

1. *Min.* An *annular crystal* is a hexagonal prism with six, or an octagonal prism with eight, marginal faces disposed in a ring about its base, or one or other of these prisms truncated on all its terminal edges.

2. *Astron.* An *annular eclipse* of the sun is an eclipse in which the whole of the moon is seen upon the sun's disc. The moon, however, in certain positions being too small to cover the disc, the sun appears in a form more or less resembling a ring. At other times the moon is so situated as to be able to produce a total eclipse of the greater luminary. (*Herschel: Astron.*, 5th ed., 1853, § 425.) An *annular nebula* is a nebula of a form suggestive of a ring. Such nebula exist, but are among the rarest objects in the heavens. A nebula of this character has been resolved by Lord Rosse's powerful telescope into a multitude of minute stars, with filaments of stars adhering to the edges. (*Ibid.*, 10th ed., § 875.)

Annular Eclipse.

3. *Anat.* Any portion of the human frame which approaches the form of a ring.

"That they might not in bending the arm or leg rise up, he has tied them to the bones by annular ligaments."—*Cheyne*.

Annular protuberance: The same as the *Pons Varolii*. It is called also the *Isthmus encephali*, and the *Nodus encephali*.

4. *Arch.* **Annular vault:** A vaulted roof supported on circular walls.

an-nū-lar-lŷ, adv. [Eng. *annular*; -ly.] In the form of a ring.

an-nū-lar-ŷ, a. [Lat. *annularis*, *annularius*.] In the form of a ring or rings.

"Because continual respiration is necessary, the wind-pipe is made with annular cartilages, that the sides of it may not flag and fall together."—*Ray*.

an-nū-lā-ta, s. pl. [From Lat. *annulatus*, or *annulatus*=furnished with a ring; *annulus* or *anulus*=a ring.] A class of annulose animals—the same which was called by Cuvier the *Annelida*. [*ANNE-LIDA*.]

an-nū-lāte, **an-nū-lā-tēd**, a. [See *ANNULATA*.]

I. Ord. Lang.: Furnished with rings, or made of a series of rings; marked with ring-like furrows or depressions.

"This group [of antelopes] is distinguished by having heavy, thick, annulated horns."—*Penny Cycl.*, ii. 89.

II. Technically:

1. *Zool.*: Pertaining to the class *Annulata*, Cuvier's *Annelida*, or, like them, having the body formed of a series of rings.

2. *Bot.*: Ringed, surrounded by elevated or depressed bands; as the roots of some plants or the cupulæ of several oaks.

3. *Her.*: Having a ring or annulet. (Used specially of a cross with its extremities thus fretted.)

an-nū-lā-tion, s. [From Lat. *annulatus*=ringed.]

Bot., &c.: A ring or circle.

an-nū-lēt, s. [In Fr. *annelet*; Ital. *aneletto*; from Lat. *annulus* or *anulus*=a ring.]

I. Architecture:

1. A small fillet, one of several encircling the capital of a Doric column, just under the ovolo or echinus, as shown in the illustration. They are also called *fillets* and *listels*. Their number varied, being three, four, or five, according to the taste of the architect.

2. A narrow flat molding common to other parts of the column which it encircles.

II. Her.: A ring borne on an escutcheon. (In heraldic descriptions the color of the annulet must always be expressed.)

**(a)* Formerly it stood as the symbol of nobility and jurisdiction, being the gage of the royal favor and protection. (See *ANNULUM ET BACULUM*.)

**(b)* Now it is the mark of distinction which the fifth son in a family bears on his coat of arms.

an-nū-lēt-tŷ, a. [Eng. *annulet*; -y.] Pertaining to an annulet; annulated, or ringed. (*Gloss. of Arch.*)

an-nū-lā-ble, a. [Eng. *annul*; -able.] Capable of being annulled, repealed, or abrogated.

an-nū-l-ment, s. [Eng. *annul*; -ment.] The act of annulling.

an-nū-lōi-da, s. pl. [Lat. *annulus* or *anulus*=a ring; and *eidōs*=form, appearance.] In Professor Huxley's classification, one of the eight primary groups into which he divides the Animal Kingdom. He places it between the *Annulosa* and the *Infusoria*. He includes under it (1) the *Trematoda*, or Flukes; (2) the *Tœniada*, or Tape-worms and Bladder-worms; (3) the *Turbellaria*; (4) the *Acanthocephala*; (5) the *Nematoidea*, or Thread-worms; and (6) the *Rotifera*, or Wheel Animalcules. But he thinks it not improbable that the *Annuloida* will require ultimately to be merged in the *Mollusca*.

an-nū-lō-sa, s. pl. [Lat. *annulus* or *anulus*=a ring. A sub-kingdom of the Animal Kingdom, corresponding with Cuvier's *Articulata*. The word *Articulata*, signifying *jointed*, is not a sufficiently distinctive term, for the Vertebrated animals are also jointed. *Annulosa*, signifying *ringed*, is decidedly better, for the animals ranked under this sub-kingdom have their skeleton, which is external, composed of a series of rings. They are divided into *Chætognatha*, *Annelida*, *Crustacea*, *Arachnida*, *Myriapoda*, and *Insecta*, these classes being ranged in an ascending order. The last four are further grouped together under the designation *Arthropoda* (q. v.).]

an-nū-lō-saŷ, s. pl. [*ANNULOSA*.] An English term corresponding to the Latin *Annulosa* (q. v.).

an-nū-lō-se, a. [*ANNULOSA*.]

1. *Gen.*: Ringed.

2. *Spec.*: Pertaining to animals of the sub-kingdom *Annulosa*.

"The body is always divided into rings or transverse joints; from which circumstance naturalists have agreed to call them *annulose* or *ringed* animals."—*Swainson & Shuckard: Hist. and Classif. of Insects* (1840), p. 1.

an-nū-lūm ēt bāc-ū-lūm, ac. sing. of two Lat. substantives with copulative et. They are in the accusative because the preposition *per* is understood. [Lat.=by means of) a ring and a staff or crosier.] [*ANNULUS*.] A ring and pastoral staff or crosier formerly delivered by kings to bishops on their election. These were designed, it was said, to confer the temporalities annexed to the spiritual office; but Pope Gregory VII. and his successors contended that the symbols adopted were not those of secular, but of sacred office. The papal views on the

subject ultimately prevailed; and the Emperor Henry V., with the other European sovereigns, agreed to confer investitures not *per annulum et baculum*, but *per sceptrum*, by the scepter, the undoubted symbol of temporal authority.

an-nū-lūs (plur. **an-nū-lī**), s. [Lat.=a ring.]

I. Bot.: (1) The thickened longitudinal ring which partially surrounds the sporangia of ferns. (*Lindley*.) (2) The elastic external ring with which the brim of the sporangium in mosses is furnished. (*Ibid.*) (3) That part of the veil in fungi which, remaining next to the stipes, surrounds it like a loose collar. (*Ibid.*)

II. Anatomy:

1. *Gen.*: Anything resembling a ring.

"They [the horns of the Nyl-ghau (*Antelope picta*)] are perfectly smooth and without annuli."—*Penny Cycl.*, ii. 75.

2. *Technically.* **Annulus ovalis:** A thick fleshy ring nearly surrounding the *fossa ovalis*, a depression on the middle of the septum in the right auricle of the heart.

III. Astron.: The "ring" of light left during a solar eclipse, when the sun's disc is almost covered by the dark body of the moon. [*ANNULAR*, 2.]

"... an annular eclipse, a phenomenon to which much interest is attached by reason of some curious optical phenomena first observed by Mr. Bailly at the moment of the forming and breaking of the *annulus*, like beads of light alternating with black thread-like elongations of the moon's limb, known by the name of 'Bailly's beads.'"—*Herschel: Astron.*, 10th ed. (1869), § 425.

an-nū-mēr-āte, v. t. [Lat. *annumero*=to count out to, to pay; *ad*=to, and *numero*=to number.] To add a number to a former one.

an-nū-mēr-ā-tion, s. [Lat. *annumeratio* or *adnumeratio*, from *annumero*.] Addition to a former number.

an-nūn-çī-ade, s. [Fr.]

Church Hist.: A religious order of women founded by Queen Jane of France, wife of Lewis XII., and confirmed by the Pope in 1501 and 1517. It was called also the order of the ten virtues or delights of the Virgin Mary, and was designed to honor these with beads and rosaries.

an-nūn-çī-āte, **an-nūn-tī-āte** (tī as shī), v. t. [In Sp. *anunciar*. From Lat. *annuntio*, *annuncio*; *ad*=to, and *nuntio*=to announce; *nuntius*=a messenger.]

1. *Gen.*: To announce; to proclaim tidings of an important character.

"Let my death be thus *annunciated* and shewn forth till I come to judgement."—*Ep. Bull: Corrupt. of the Church of Rome*.

2. *Spec.*: To announce, as the angel did to the Virgin Mary, that she was about to become the mother of the long-promised Messiah.

"There should he see his blessed Saviour's conception *annuntiated* by the angel, March 25."—*Ep. Hall: Rem.*, p. 33.

"... they who did *annunciate* unto the blessed Virgin the conception of the Saviour of the world . . ."—*Pearson on the Creed*, Art. 9.

an-nūn-çī-ā-tēd, **an-nūn-tī-ā-tēd**, ***an-nūn-çī-āte** (tī as shī), *pa. par.* & *a.* [*ANNUNTIATE*.]

"Lo Sampson, whiche that was *annunciate*, By thangel, long er his nativite."

Chaucer: C. T., 15,501-2.

an-nūn-çī-ā-tion, s. [In Fr. *annonciation*; Sp. *anunciacion*; Ital. *annunziazione*. From Lat. *annuntiatio*, *annunciatio*.]

I. Gen.: Announcement; promulgation of important tidings.

"The *annunciation* of the Gospel."—*Hammond's Sermons*, p. 573.

II. Specially:

1. The announcement by the angel to the Virgin that she was about to become the mother of the Divine Saviour.

"And the angel came unto her and said, Hail thou that art highly favored, the Lord is with thee, blessed art thou among women. . . . Fear not, Mary; for thou hast found favor with God, and behold thou shalt conceive in thy womb, and bring forth a son, and shalt call his name Jesus."—*Luke* ii. 27-31.

"Upon the day of the *Annunciation*, or Lady-day, meditate on the incarnation of our blessed Saviour; and so upon all the festivals of the year."—*Ep. Taylor*.

"The most prevalent of these was the year commencing on the festival of the *Annunciation* of the Virgin, or Lady-day, March 25, which was generally used in England from the 15th century till the abolition of the old style in 1752."—*Lewis: Astron. of the Ancients*, chap. i., § 6.

2. An appellation given by the Jews to a portion of the Passover ceremonies.

Annunciation-day, s. The 25th of March, the day on which the Episcopal and Romish churches celebrate the angel's annunciation of the Saviour's approaching birth to the Virgin Mary. It is called also Lady-day.

an-nūn'-cī-ā-tōr, s. [In Ital. *annunziatore*; from Lat. *annuntiātor*.]

1. *Gen.*: One who announces.

*2. *Eccles.*: An officer in the church at Constantinople whose duty it was to inform the people of the festivals about to be celebrated.

3. *Electrical*: An apparatus for announcing a call from one room to another. Used very largely in hotels.

an-nūn'-cī-ā-tōr-ŷ, a. [Eng. *annunciator*; -y.] Containing an announcement; giving intelligence.

ān'-nūs, s. [Lat.] A year. The ablative *anno* occurs in such expressions as *Anno Mundi*, contracted *A. M.*=in the year of the world; *Anno Domini*, contracted *A. D.*=in the year of our Lord.

Scotch Law. *Annus deliberandi* (a year for deliberating): A year allowed an heir to deliberate whether or not he will enter on possession.

a-nō'-a, s. [A name found in the MSS. of Governor Loten.] A sub-genus of ruminating animals provisionally placed by Col. Hamilton Smith under Antelope. The typical species is the *A. depressicornis*, a quadruped resembling a small buffalo, found gregariously in the mountains of the Island of Celebes.

a-nō'-bī-ūm, s. [Gr. *anō*=up, upward, . . . aloft; *bioō*=to live.] A genus of beetles belonging to the family *Ptinidae*. It contains the well-known Death-watch insects, *A. striatum*, *A. tessellatum*, &c.

ān-ō-cā-thar'-tic, a. [Gr. *anō*=up, upward, and *kathartikos*=(1) fit for cleansing, (2) purgative; *kathairō*=to purify, to cleanse; *katharos*=clean, pure.] Purging upward; emetic.

***ān-ō-čys'-tī**, s. pl. [Gr. *anō*=up, upward, and *kustis*=bladder.] An old division of *Echinidae*, comprising those species which have the vent on the dorsal surface. The others were *Pleurocysti*, with the vent marginal; and *Calocysti*, with the vent on the under surface. Fleming divided the *Anocysti* into two sections: (1) Vent ventral, in the axis of the body; genera, *Cidara*, *Echinus*, *Clypeus*. (2) Vent lateral, above the margin; genera, *Cassidula* and *Nucleolites*.

ān'-ō-dāl, a. [Eng. *anod(e)*; -al.] Pertaining to an anode; electrically positive.

ān'-ōde, s. [Gr. *anodos*=a way up; *ana*=up, and *hodos*=a way, a road.]

Electrolysis: The name given by Faraday to what is called by Daniell the *zincode*, and by various other writers the *positive pole* of an electric battery; or, more precisely, the "way" or path by which the electric current passes out and enters the electrolyte on its way to the other pole. It is a platinum plate occupying the same place in the decomposing cell that a zinc plate does in an ordinary cell of a battery. The other plate corresponding to the second platinum one in an ordinary cell is called by Faraday the *cathode* or *kathode*, by Daniell the *platinode*, and by many other writers the *negative pole*. The term is also used for the terminal at which the current enters a vacuum tube, as distinguished from the *cathode*, at which the current leaves. [CATHODE-RAYS.]

ān-ōd'-ic, a. [Eng. *anod(e)*; -ic.]

1. Pertaining to an anode; anodal.

2. Proceeding upward; applied to the upper edges of leaves arranged in ascending spirals.

ān'-ō-dōn, **ān-ō-dōn'-ta**, s. [Gr. *anodonta*, neut. sing., and *anodonta*, neut. plur. of *anodous*=toothless; *an*, priv., and *odous*, genit. *odontos*=a tooth.]

1. A genus of fresh-water molluscs belonging to the family *Unionidae*, or *Naïdes*. The ordinary English name of them is Swan-mussel. Woodward, in 1851, estimated the known recent species at fifty, and those found in a fossil state at five, the latter from the Eocene formation. Tate raises the former number to 100, and the latter to eight. *A. cygneus* is the river-mussel.

2. A genus of serpents destitute of teeth. They belong to the family *Dasypeltidae*. One species, the *Dasypeltis scabra*, or Rough Anodon, feeds on eggs, which it sucks. It is found in Southern Africa. [Wood: *Nat. Hist.*, p. 135.]

ān'-ō-dŷne, s. & a. [In Fr. *anodin*; Sp., Port., & Ital. *anodino*. From Gr. *anōdunos*=free from pain; *an*, priv., and *odunē*=grief, pain.]

A. As substantive:

1. *Med.*: A medicine which alleviates pain, though, if given in too large doses, it induces stupor.

† Garrod arranges anodynes with narcotics and soporifics together, thus: Class II. Medicines whose principal effects are upon the nervous system. Sub-class I. Medicines acting especially upon the brain proper; but probably also upon other portions of the central nervous system. Order 1. Exhilarants. Order 2. Narcotics, Anodynes, and Soporifics. Order 3. Anæsthetics. Opium is soporific and anodyne; while belladonna is anodyne and anti-spasmodic.

2. *Fig.*: Anything designed to mitigate the pain produced by the consciousness of guilt; an opiate for the conscience.

B. As adjective: Mitigating or assuaging pain.

" . . . whilst *anodyne*, emollient, or gently laxative enemata should be administered."—Dr. Joseph Browne: *Cyclop. Pract. Med.*, vol. ii., p. 228.

ān'-ō-dŷ-noūs, a. [Gr. *anōdunos*=(1) free from pain; (2) mitigating pain.] Having the qualities of an anodyne; mitigating pain of body, or stilling inquietude of mind. (Coles.)

***ā-nōg'**, a. [A. S. *genog*, *genoh*=sufficiently, abundantly, enough.] [ENOUGH.]

an-ōint, ***an-ōy'nte**, ***an-nōy'nte**, v. t. [Fr. *oindre*, pa. par. *oint*. In Sp. & Port. *ungir*, *untar*; Ital. *ungere*. From Lat. *ungo* or *unguo*.]

I. Literally:

1. To pour oil upon. This may be—

(1.) *For purposes not specially sacred.*

"But thou, when thou fastest, *anoint* thine head, and wash thy face."—Matt. vi. 17.

(2.) *For sacred purposes, and specially for consecration of a person, place, or thing.* Under the Old Testament economy this was done in the case—

(a) *Of Jewish priests.*

"Then shalt thou take the *anointing* oil, and pour it upon his [Aaron's] head, and *anoint* him."—Exod. xxix. 7.

(b) *Of Jewish and other kings.*

"Samuel also said unto Saul, The Lord sent me to *anoint* thee to be king over his people, over Israel."—1 Sam. xv. 1.

" . . . and when thou comest, *anoint* Hazael to be king over Syria."—1 Kings xix. 15.

(c) *Of Jewish prophets.*

" . . . and Elisha the son of Shaphat of Abelmeholah shalt thou *anoint* to be prophet in thy room."—1 Kings xix. 16.

(d) *Of the tabernacle and its utensils.* (For the *anointing* of the tabernacle, see Exod. xl. 9; for that of the altar of burnt-offering, see ver. 10; and for that of the laver and its foot, see ver. 11.)

2. To smear with some more or less viscous substance, which need not be oil.

(1.) *For purposes not specially sacred.*

" . . . he *anointed* the eyes of the blind man with the clay."—John ix. 6.

"*Anointed* let me be with deadly venom,
And die, ere men can say—God save the Queen!"
Shakesp.: *Richard III.*, iv. 1.

* (2.) *For sacred purposes.*

"That had ben blessed before wyth bischopes hondes,
and wyth besten blod busily *anointed*."—*Alliterative Poems: Cleanness* (ed. Morris), 1,445-6.

II. Figuratively:

1. *Very seriously:*

(1.) To set solemnly apart to sacred office, even when oil was not actually poured upon the head.

" . . . thy holy child Jesus, whom thou hast *anointed*."—Acts iv. 27.

(2.) To adopt the means of obtaining spiritual discernment.

" . . . and *anoint* thine eyes with eye-salve, that thou mayest see."—Rev. iii. 18.

*2. *Jocosely*: To give a good beating to.

"Then thay put hym hout, the kyng away fly,
Which so well was *anointed* indede,
That no sleue ne pane had he hole of brede."
The Romans of Partenay (ed. Skeat), 5,652-4.

an-ōint-ēd, ***an-ōy'nt-ēd**, ***an-nōy'nt-ēd**, pa. par., a., & s. [ANOINT.]

A. & B. As past participle and adjective: In senses corresponding to those of the verb.

"Thou [Tyre] art the *anointed* cherub . . ."—Ezek. xxviii. 14.

C. As substantive:

I. An anointed king. Used—

1. Literally:

(a) *Of any Jewish king* [ANOINT, I. 1, (2), (b)]; the customary phrase being "the anointed of the Lord," or, "the Lord's anointed."

"The breath of our nostrils, the *anointed* of the Lord, was taken in their pits."—Lam. iv. 20.

"And David said unto him, How wast thou not afraid to stretch forth thine hand to destroy the Lord's *anointed*?"—2 Sam. i. 14.

(b) *Of an English or other sovereign.* In this sense the term is applied with latent sarcasm to those despotic rulers who have largely exercised what has been termed "the right divine of kings to govern wrong."

"Still harder was the lot of those Protestant clergymen who continued to cling, with desperate fidelity, to the cause of the Lord's *anointed*."—Macaulay: *Hist. Eng.*, chap. xii.

2. Figuratively:

(a) Cyrus, as executing the Divine commissions of conquering Babylon and releasing the Jews from captivity.

"Thus saith the Lord to his *anointed*, to Cyrus, whose right hand I have holden, to subdue nations before him."—Isa. xlv. 1.

(b) Christ, the Messiah, the former appellation being from Greek, and the latter from Hebrew; both signifying *Anointed*. (John i. 41.)

"But let us wait; thus far He hath perform'd,
Sent His *anointed*."—Milton: *P. R.*, bk. ii.

†II. An anointed prophet. (Lit. & fig.) [ANOINT, I. 1, (2), (c).]

"Saying, Touch not mine *anointed*, and do my prophets no harm."—1 Chron. xvi. 22; Ps. cv. 15.

an-ōint'-ēr, s. [Eng. *anoint*; -er.] One who at the moment is engaged in anointing, or whose office is to anoint.

1. In a general sense.

" . . . and the sinner also an *anointer*."—Strauss: *Life of Jesus* (Transl. 1846), § 90.

2. *Church Hist.* (See the example.)

"At Watlington, in Oxfordshire, there was a sect called *Anointers*, from their anointing people before they admitted them into their communion."—Dr. Plot's *Oxfordshire*, ch. xxxviii. (Grey: *Notes on Hudibras*, iii. 2.)

an-ōint'-ing, pr. par., a., & s. [ANOINT.]

A. As present participle: In senses corresponding to those of the verb.

B. As adjective. Used—

1. *Of the person applying the oil.*

" . . . the *anointing* woman. . . ."—Strauss: *Life of Jesus* (Transl. 1846), § 90.

2. *Of the oil applied.*

" . . . spices for *anointing* oil, . . ."—Exod. xxv. 6.

" . . . This shall be an holy *anointing* oil unto me throughout your generations."—Ibid., xxx. 31.

C. As substantive:

1. *Lit.*: The act of anointing; the state of being anointed for ordinary or for sacred purposes.

"Their bathings and *anointings* before their feasts, their perfumes and sweet odors in diverse kinds at their feasts."—Hakewill: *Apology*, p. 390.

" . . . for their *anointing* shall surely be an everlasting priesthood throughout their generations."—Exod. xl. 15.

2. *Fig.*: The reception of spiritual benefit, even when no actual application of oil has taken place.

"But the *anointing* which ye have received of him abideth in you, and ye need not that any man teach you: but as the same *anointing* teacheth you of all things, and is truth, and is no lie, and even as it hath taught you, ye shall abide in him."—1 John ii. 27.

an-ōint'-ment, s. [Eng. *anoint*; -ment.] The act of anointing; the state of being anointed. (Lit. & fig.)

" . . . of his holy *anointment* from God the Father, which made him supreme bishop of our souls, . . ."—Milton: *Animadv. Rem. Def.*

ān'-ōl'-is, s. [From *Anoli*, or *Anoalli*, the name given to the Anolis in the Antilles.] The same as the Anolius of Cuvier. A genus of Saurians belonging to the family *Iguanidae*. Various species exist, some of which have been removed to other genera. All are American. Two of the best known are the Green Carolina Anolis (*A. principalis*), and the Red-throated Anolis, a native of the American continent and the West India islands.

ān-ōm'-al, s. [Fr. *anomal*=anomalous.] An anomalous verb or other word. (Ogilvie.)

an-ōm'-a-lī-pēd, **an-ōm'-a-lī-pōde**, a. & s. [In Ger. *anomalopedisch*. From Gr. *anōmalia*=anomaly, and Lat. *pes*, genit. *pedis*, or Gr. *pous*, genit. *podos*=foot.]

A. As adjective: Having an anomalous foot; having the middle toe united to the exterior one by three phalanges, and to the interior one by a single phalanx only.

B. As substantive: A bird with toes thus constituted.

an-ōm'-al-īsm, s. [Formed by analogy, as if from a Greek *anōmalisma*.] [ANOMALOUS.] An irregularity, an anomaly.

an-ōm'-al-is'-tic, **an-ōm'-al-is'-tī-cal**, a. [In Ger. *anomalistisch*; Fr. *anomalistique*; Port. *anomalístico*.] Pertaining to what is anomalous or irregular.

Astronomy:

Anomalistic Period: The time of revolution of a planet in reference to its line of apsides. In the case of the Earth, the period is called the *anomalistic year*. (G. F. Chambers: *Astron.*, Gloss.)

Anomalistic year: A year consisting of 365 days, 6 hrs., 13 min., 49'3 secs. It exceeds the sidereal year by 4 min., 39'7 secs., because, owing to a slow

"And how long was the anomalous government planned by the genius of Sanicroft to last."—*Macaulay: Hist. Eng.*, ch. x.

an-ōm-al-ous-lŷ, *adv.* [Eng. *anomalous*; *-ly*.] In an anomalous manner.

"Eve was not solemnly begotten, but suddenly framed and anomalously proceeded from Adam."—*Browne: Vulgar Errors*, bk. v., ch. v.

an-ōm-a-lŷ, *s.* [In Ger. & Fr. *anomalie*; Sp. *anomalía*, *anomalidad*. From Gr. *anōmalia* = unevenness, irregularity, deviation from rule; *anōmalos* = uneven, irregular; *a*, *an*, priv., and *homalos* = even, smooth; *homos* = one and the same.] [ANOMALOUS.]

A. Ordinary Language:

Gen.: Deviation from rule; irregularity.

"As Professor Owen has remarked, there is no greater anomaly in nature than a bird that cannot fly."—*Darwin: Origin of Species*, ch. v.

"The truth is that the dispensing power was a great anomaly in politics."—*Macaulay: Hist. Eng.*, ch. ii.

B. Technically:

I. Aston.: The deviation in a planet's course from the aphelion or apogee. It is of two kinds, the *true* and the *mean anomaly*. The true is that which actually takes place. The mean is the angular motion which would have been performed had the motion in angle been uniform instead of the motion in area. (Herschel: *Astron.*, 5th ed., § 499.)

Astron. Eccentric Anomaly: "An auxiliary angle employed to abridge the calculations connected with the motion of a planet or comet in an elliptic orbit. If a circle be drawn, having its center coincident with that of the ellipse, and a diameter equal to the transverse (major) axis of the latter; and if from this axis a perpendicular be drawn through the true place of the body in the ellipse to meet the circumference of the circle, then the eccentric anomaly will be the angle formed by a line drawn from the point where the perpendicular meets the circle to the center, with the longer diameter of the ellipse." (Hind.)

Describe the circle A B C D, so that its center L shall coincide with that of the ellipse, A E C F, in which the planet P moves, and its diameter A C be the longer axis of the ellipse. Let S be the position of the sun in one of the foci of the ellipse, then A is that of the planet when in perihelion, and C that which it occupies when in aphelion. Join P S, then the angle P S L is the *true anomaly*. Proximity to the sun made the planet travel more quickly at A than at C. If the rate had been uniform, it would not have reached P. Let it be supposed that it would have been only at E, then A S E is its *mean anomaly*. Let fall P R a perpendicular to A C from P; produce it in the other direction to B in the circumference of the circle; join B L, then A L B is the *eccentric anomaly*. In calculating the motion of the moon, the earth is supposed to be at S, as it is also held to be when inquiry is made into the apparent course of the sun through the ecliptic.

2. Music: A small deviation from a perfect interval, in tuning instruments with fixed notes; a temperament.

ān-ō-mē'-aṅṣ, ān-ō-mē'-aṅṣ, *s. pl.* [Gr. *anomoios* = unlike; *an*, priv., and *homoios* = like.] *Church Hist.:* A sect who are reported to have held that Christ was a created being, and possessed of a nature unlike that of God. Their leader was Eunomius, secretary to Aëtius. He was made Bishop of Cyzicum in A. D. 360, and died about 394. The Anomeans were considered extreme Arians. They were condemned by the Semi-Arians at the Council

of Seleucia in A. D. 359, but they soon afterward retaliated at the Council or Synod of Constantinople.

ān-ō'-mī-a, *s.* [Gr. *anomoios* = unlike (Woodward); *anomia* = lawlessness (Owen).] A genus of molluscs belonging to the Ostreidae, or Oyster family. They are found attached to oyster and other shells, and frequently acquire the form of the surface with which they are in contact. They are not eatable. In 1875 Tate estimated the known recent species at twenty, and the fossil thirty-six, the latter from the Oolite upward. The *A. Ehippium* is the saddle-shell. It is a beautifully thin and elegantly waved shell. It inhabits the British seas.

ān-ō'-mī-a-dæ, *s. pl.* [From the typical genus *Anomia* (q. v.).] A family of Conchiferous Molluscs, recently separated from Ostreidae. Tate includes under it the genera *Anomia*, *Placunomia*, *Placuna*, *Carolia*, *Placunopsis*, and *Placenta*.

ān-ō'-mīte, *s.* [From Eng. *anomia* (q. v.), and *-ite*.] A fossil *anomia*.

ān-ōm-ō-dōn'-tī-a, *s. pl.* [Gr. *anomos* = lawless; *a*, priv., *nomos* = . . . law, and *odontos* = a tooth. "Having lawless teeth." In Professor Owen's classification, the fifth order of the class Reptilia, or Reptiles. He includes under it two families, *Dicnyodontia* and *Cryptodontia*.

ān-ō-mē'-aṅṣ. [ANOMEANS.]

ān-ōm-ūr'-a, *s. pl.* [Gr. *anomos* = without law; *oura* = tail.]

Zool.: A sub-order of Decapod Crustaceans, intermediate between Macrura and Brachyura, differing from the former in the absence of an abdominal fan-shaped fin, as also of natatory feet; and from the latter in generally possessing appendages attached to the penultimate segment of their abdomen. The sub-order is divided into the families Paguridae, Hippidae, Raninidae, Homolidae, and Dromiidae (q. v.). Its best known representatives are the Hermit Crabs (Paguridae).

ān-ōm-ŷ, *s.* [Gr. *anomia* = lawlessness; *a*, priv., and *nomos* = law.] Breach or violation of law; lawlessness.

"If sin be good, and just, and lawful, it is no more evil, it is no sin, no *anomy*."—*Bramhall against Hobbes*.

a-nōn', ***a-nō'on**, *adv. & v. i.* [A. S. *on* = in; *an* = one. Junius, Horne Tooke, &c., supply *minute*, and make *anon* mean primarily "in one minute." Webster believes it should be in continuation, in extension, applied first to extension in measure, and then by analogy to time. He quotes the Saxon Chronicle, A. D. 1022, where it is stated that a fire "weax on lengthe up an on to tham wolcne," which he freely renders, "increased in continuation to the clouds." See also, he adds, A. D. 1127. Morris brings *anon* from A. S. *anane*, *onane* = in one moment. (*Alliterative Poems, Gloss.*) In Bosworth's A. S. Dict. *anon* is singly, and *on-an* = in one, once for all, continually.]

A. As adverb:

1. Quickly, speedily, at once, in a short time.

"And hastily for the provost they sent.
He came anon, without tarrying."
Chaucer: C. T., 15, 027-28.

"Fyrst of my hyre my lorde con mynne,
I watsh payed anon of al and sum."
Alliterative Poems: Pearl (ed. Morris), 582-3.

"But Simon's wife's mother lay sick of a fever, and anon they tell him of her."—*Mark* i. 30.

¶ *Anon, sir* = Immediately, presently, sir; or as the phrasenow is, "Coming, sir," was the customary answer of waiters in the Elizabethan age, when called to attend on a guest. (Nares.)

"Like a call without *Anon, sir*,
Or a question without an answer."
Witts Recreations, sign. T. 7.

"Th' *Anon, sir*, doth obey the call,
Speak in the Dolphin, speak in the Swan,
Drawer: *Anon, sir, Anon.*" *Ibid.*

2. At other times. (Opposed to *sometimes*.)

"Full forty days he pass'd, whether on hill
Sometimes, *anon* in shady vale, each night,
Or harbor'd in one cave, is not reveal'd."
Milton: P. R., bk. i.

Ever and anon: Every now and then.

B. As verb intransitive: To hasten.

"I most anon, sethens it is your wille."
Chaucer: C. T., 4, 702.

a-nō'-nā, *s.* [In Dut. & Sp. *annona*, *anona*. From Lat. *annona* = the year's produce, grain; *annus* = a year. Probably named "grain" on account of the nourishing qualities found in the fruit. Corrupted from the Malay *manoa*, pronounced, in the Banda islands, *menona*.] The typical genus of the order of plants called *Anonaceæ*, or *Anonads*. It contains the Custard Apple (*A.*

squamosa), the Sour-sop (*A. muricata*), the Bullock's Heart (*A. reticulata*), and the Cherimolia (*A. cherimolia*), &c. The seat of the genus is properly the warmer parts of America, but the species now named are cultivated in India, where the Custard Apple is called *Sectaphul* (that is, *Sectas* fruit), and the Bullock's Heart, *Ramphul*, that is, *Ramas* fruit. *A. palustris* is the corkwood of Jamaica. A species of *Anona* grew in *Anona Squamosa* (Custard Apple.) Britain during the Eocene period, its seeds being found fossil in the London clay of Sheppey. The seeds of *A. squamosa* are highly acrid and poisonous. Powdered and mixed with flour made from grain (*Cicer arietinum*), they are used by the natives of India for washing their hair. In Brazil corks are made from the root of *A. palustris*, and the light white wood of *A. sylvatica* is employed by turners; while the fruit of the last-named species is eaten at deserts.

ān-ō-nā'-cē-æ (Mod. Lat.), **a-nō'-nāds** (Eng.), *s. pl.* [From the typical genus *Anona* (q. v.).] An order of exogenous plants classed by Lindley under his Banales, or Ranal Alliance. They have six petals, hypogynous stamens generally indefinite in number, numerous ovaries, and a many-carpeled, succulent, or dry fruit, and alternate simple leaves without stipules. They are trees or shrubs occurring in the tropics of both hemispheres. In 1846 Lindley estimated the known species at 300. Most have a powerful aromatic taste and smell, and the flowers of some are highly fragrant. Some have a succulent and eatable fruit. [ANONA.]

***an-ōn'-dēr** (Eng. & Scotch) ***ān-ōn'-ēr**, ***ān-ūnd'-ēr** (Scotch), *prep.* [A. S. *an* = in; *onder* = Eng. *under*.] Under.

"Ther nis non beters *anonder* sunne."

King Horn (E. E. T.), 567.

"Then the Bible *anunder* his arm took he."

Hogg: Mountain Bard, p. 19.

ān-ō-nŷm, *s.* [Greek *anōnumos*. See ANONYMOUS.]

1. An anonymous person.
2. An assumed or false name.

ān-ōp-lō-thē're, *s.* [ANOPLOTHERIUM.] The English name—

(1.) *Spec.:* Of the *Anoplotherium commune*.

"... the aquatic cloven-hoofed animal which Cuvier has called *Anoplothere*."—*Owen: Brit. Foss. Mammals and Birds* (1846), p. xviii.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, ðem; thin, ðhis; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = șan. -tion, -sion = șūn; -ñion, -șion = zhūn. -tious, -cious, -sious = șūș. -ple, -dle, &c. = beł, deł.

(2) *Gen.*: Of any fossil mammal belonging to the same family.

Cervine Anoplothere: *Dichobune Cervinum*. [DICHOBUNE, ANOPLOTHERE.]

ăn-ôp-lô-thêr'-i-dæ, *s. pl.* [ANOPLOTHERIUM.] A family of mammals belonging to the order Pachydermata. All are extinct. [ANOPLOTHERIUM.]

ăn-ôp-lô-thêr'-i-um, *s.* [From Gr. *an*, priv., *hoplon*=a weapon, and *thêrion*=beast. "Unarmed beast." The name refers to the absence of such natural weapons as tusks, long and sharp canine teeth, horns or claws.] The appellation given by Cuvier to a genus of hoofed quadrupeds found in the middle Eocene gypsum of the Paris basin. It is the type of the family Anoplotheridæ (q. v.). A curious peculiarity of the Anoplotherium genus, shared only by man, is that the incisors and canine teeth were so equally developed that they formed one unbroken series with the premolars and true molars. The *A. commune* was about four and a-half feet long, or with the tail, eight feet. It is found not merely in the vicinity of Paris, but also in the contemporary Eocene strata of Hampshire and the Isle of Wight. [ANOPLOTHERE.] (Owen: *Brit. Foss. Mamm. and Birds*, pp. 4-32-439.)

Skeleton of Anoplotherium.

ăn-ôp-lô-thêr'-ôid, *a. & s.* [From Eng. &c., *anoplotherium* (q. v.), and Gr. *eidos*=form.]

1. *As adjective (Palæont.)*: Resembling the Anoplotherium.

2. *As substantive (Palæont.)*: An animal resembling the Anoplotherium.

ăn-ôp-lûr'-a, *s. pl.* [Gr. *an*, priv.; *hoplon*=a tool, . . . a weapon, arms; *oura*=tail. Having unarmed tails.]

Zool.: An aberrant order of insects, sometimes termed from their parasitic habits Parasitica or Epizoa. They have six legs, no wings, and either two simple eyes or none. They undergo no proper metamorphosis, though there is a certain semi-transformation when they shed their skins. They are parasitic upon mammals and birds, and are generally termed lice. There are two sub-orders: (1) Haustellata, or Rhyncota, having a mouth with a tubular, very short fleshy haustellum, and (2) Mandibulata, or Mallophaga, in which the mouth is provided with two horny mandibles.

ăn-ôp'-sý, *s.* [Gr. *an*, priv., and *ôps*=the eye.] *Med.*: Absence of sight, want of vision; blindness.

ăn'-ô-rêx-ý, *s.* [In Fr. *anorexie*; Port. *anorexia*; Gr. *anorexia*: *an*, priv., and *orexis*=a longing or yearning after anything; *oregô*=to reach, to stretch out.]

Med.: Want of appetite.

ta-nor'-mal, *a.* [In Fr. *anormal*.] [ABNORMAL.]

ăn-orth'-ic, *a.* [Gr. *an*, priv., and *orthos*=straight . . . right, as a right angle.] Irregular; abnormal.

Crystallog.: A term applied to all crystals which do not belong to the more regular systems, *i. e.*, which do not fall under the cubical, the pyramidal, the rhombohedral, the prismatic, or the oblique systems. (Phillips: *Min.*, ed. 1852, p. 9.) The Anorthic is called also the Triclinic, the Doubly Oblique, and the Tetarto-prismatic system. [TRICLINIC.] (See Dana's *Min.*, 5th ed, 1875, p. xxvi.)

ăn-orth'-ite, *s.* [In Ger. *anorthit*. From Gr. *an*, priv., and *orthos*=direct, straight; suff. *-ite*. So named in 1823 by Rose from its "anorthic," or what would now be called triclinic, crystals.] [ANORTHIC.] A mineral placed by Dana under his Feldspar group of Unisilicates. Anorthite occurs crystallized or massive. Its hardness is 6-7; sp. gr. 2.66-2.78; luster of ordinary faces vitreous, of cleavage planes inclining to pearly color, white, grayish, or reddish. It is transparent or translucent, has a conchoidal fracture, and is brittle. Composition: Silica, 41.78 to 47.63; alumina, 28.63 to 37.5; lime, 8.28 to 19.11; magnesia, 0.29 to 5.87; sesquioxide of iron, .07 to 4.0; potassa, 0.25 to 6.58; soda, 0.27 to 3.35; and water, 0.31 to 5.03. The varieties recognized by Dana are (1) Anorthite proper, which occurs in Italy among the old lavas of Monte Somma, at Mount Vesuvius, and on the Isle of Procida. It has been called also Christianite and Biotite. Thiorsite is the same species from the plain of Thiorsa, near Hecla, in Iceland. (2) Indianite, from India. (3) Amphodelite, from Finland and Sweden, called also Lepolite. It includes Latrobite, from Labrador, and apparently Tankite from Norway. Besides these, Linseite and Sundvikite

are altered Anorthite. Dana numbers Cyclopite, Barsowite, and Bytownite as if they, too, were not properly distinct from Anorthite.

ăn-orth'-ô-scôpe, *s.* [Gr. *an*, priv.; *orthos*=straight; *skôpeô*=to look at.]

Optics: An instrument for producing a particular kind of optical illusion by means of two opposite disks rotating rapidly. The hinder disk, which is transparent, has certain distorted figures painted upon it. The other one, which is in front of that now described, is opaque, but is pierced with a number of narrow slits, through which the figures on the disk behind it may be viewed.

ăn-ôş'-mî-a, *s.* [From Gr. *a*, priv., and *osmê*=smell.]

Med.: Absence of the sense of smell. When it exists, which is but rarely, it is a congenital defect, or arises from disease or from the subjection of the olfactory to strong stimuli.

ta-n-ôs-tôm-ô-sis, *s.* [ANASTOMOSIS.]

ăn-ôs'-tôm-ús, *s.* [From Gr. *anô*=above, and *stoma*=the mouth.] A genus of fishes belonging to the Salmon family.

ăn-ôth'-êr (Eng.), **ăn-îth'-êr** (Scotch), *a.* [Eng. *an*, other; A. S. *an*=one, and other.] [OTHER.]

1. Not the same; different.

"But my servant Caleb, because he had another spirit with him . . ."—Numb. xiv. 24.

"When the soul is beaten from its station, and the mounds of virtue are broken down, it becomes quite another thing from what it was before."—South.

*2. Otherwise.

4. Any other.

" . . . discover not a secret to another."—Prov. xxv. 9.

5. Not one's self.

"Let another man praise thee, and not thine own mouth."—Prov. xxvii. 2.

6. It is sometimes used when the two entities compared belong to different categories, whereas in its more normal senses *another* implies that they are of the same kind.

"I am the Lord: that is My name; and My glory will I not give to another, neither My praise to graven images."—Isa. xlii. 8.

¶ (1) *One to another*, or *one another* (Eng.)=*ane anither* (Scotch), is used reciprocally.

"Then they that feared the Lord spake often one to another."—Mal. iii. 16.

"This is my commandment, That ye love one another."—John xv. 12.

"There has been mony a blythe birling—for death and drink-draining are near neighbors to *ane anither*."—Scott: *Bride of Lammermoor*, ch. xxiii.

2. *You're another*: The *tu quoque* of the uneducated classes. Davies gives an example from Udal: *Roister Doister*, iii. 5.

**another-gaines*, *a.* Of another kind.

"If my father had not plaid the hasty fool, I might have had another-gaines husband than Dametas."—Sidney.

**another-gates*, *s.* Of another kind. [OTHER-GATES.]

"And his bringing up another-gates marriage than such a minion."—Lyly: *Mother Bombe*, i.

"A good report maketh the bones fat, saith Solomon; and that, I ween, is another-gates manner, than to make the face shine."—Bp. Sanderson: *Sermons*.

"Hudibras about to enter

Upon another-gates adventure."

Butler: *Hudib.*, iii. 428.

**another-guess*, *a.* (Corrupted from *another-guise*.) [Eng. *another*, and Fr. *guise*=manner, way, corresponding in meaning to the Eng. & A. S. *wise* appended to a word, as *likewise*.] Of another kind. (Vulgar.)

"Oh Hocus! where art thou? It used to go in another-guess manner in thy time."—Arbuthnot.

another-guise, *a.* [ANOTHER-GUESS.]

a-nôt'-ta, *s.* [ARNOTTO.]

***a-noû'-ên**, *adv.* Above.

"And sette hit on his swerde,

Anoune at than orde."

King Horn (E. E. T.), 623-4.

***a-noû'-rne-ment**, *s.* [ANORNE.] Ornament.

"The hous and the anournementes he hyghtled togeder." *Alliterative Poems*; Cleanthess (ed. Morris), 1,290.

***a-nôye**, *v. t.* [Old form of ANNOY (q. v.).] To hurt.

"Who badde foure spirits of tempest

That power han to noyen land and see,

Bothe north and south, and also west and est,

Anoyen neyther londe, see, ne tree?"

Chaucer: *C. T.*, 4,913-14.

ăn'-sæ, *s. pl.* [The pl. of Lat. *ansa*=a handle, a haft.]

Astron. *Ansæ of Saturn's ring*: The projections or arms of the ring on each side of the globe of the planet. (Hind.) They were so called by Galileo

"David Deans believed this and many other such ghostly encounters, and victories on the faith of the *Ansans*, or auxiliaries of the banished prophets."—Scott: *Heart of Mid-Lothian*, ch. xv.

An-sär'-i-anş, *s. pl.* [ASSASSIN.]

ăn'-sâ-têd, *a.* [Lat. *ansatus*=having a handle; from *ansa*=a handle.] Furnished with a handle or handles of some kind or other.

ansated cross (*crux ansata*), *s.* The handled Tau cross, uniformly found in the hands of the old Egyptian deities, being regarded as the symbol of life. It was called in Coptic *ankh*=life.

Ansated Cross.

***ânse**, *s.* [Lat. *ansa*=a handle.] One of the handles of a cannon.

anse de pa'-nî-er, *s.* [Fr.] [SURBASED.]

ăn'-sêr, *s.* [Lat. *anser*; Ger. *gans*; O. H. Ger. *kans*; Eng. *gander*, *goose*; Gr. *chên*; Sansc. *hansa*.]

1. *Zool.*: A genus of natatorial or swimming birds, the typical one of the sub-family Anserinæ. It contains the geese. Several species are found in this country. [GOOSE.]

†2. *Astron.*: A portion of the constellation called by Hevelius *Vulpecula et Anser* (the Fox and Goose). It belongs to the northern hemisphere, is placed over the Eagle, immediately under the star Albireo, or *Beta Cygni*, with a little one called the Arrow between. It is rarely met with in modern star-maps.

ăn'-sêr-â-têd, *a.* [Lat. *anser*=goose; Eng. *-ated*.]

Heraldry: An *anserated cross* is one with its extremities shaped like the heads of lions, eagles, or similar animals.

ăn'-sêr-êş, *s. pl.* [The pl. of Lat. *anser*=a goose.] The third of Linneus's six orders of Birds. The species are characterized by smooth beaks, broadest at the point, covered with smooth skin, and denticulated. The toes are web-footed. The tibie are short and compressed. It includes the birds now called Natatores, or Swimmers. [NATATORES.]

ăn'-sêr-in-æ, *s. pl.* [ANSER.] A sub-family of Anatidæ (Ducks), containing the Geese.

ăn'-sêr-ine, *a.* [Lat. *anserinus*.] Pertaining to the Anseres, or Geese; resembling a goose; framed on the model of a goose; after the manner of a goose.

" . . . a flattened beak like that of a duck, which is used in the *anserine* manner to extract insects and worms from the mud."—Owen: *Classific. of the Mammalia* (1859), p. 27.

***ăn'-seýne**, *s.* [ENSEINYIE.]

***ăn-slâ'ight** (*gh* silent), *s.* [ONSLAUGHT.] An onslaught, an attack, an affray.

"I do remember yet that *anslaight*, thou wast beaten, And fled'st before the butler."

Beaumont & Fletcher: *Mons. Thomas*, ii. 2.

an'-swêr, ***an'-swêre**, ***an'-swêr-en**, ***ând'-swêre** (Eng.), ***ăn'-swîr** (Scotch), (*w* silent), *v. t. & i.* [A. S. *answarian*, *andswarian*, *andswerian*=to answer: *and*, inseparable prep. like Gr. *anti*, denoting opposition in reply, in return; and *swaran*=to answer, cognate with *swerian*=to swear. [SWEAR.] In Sw. *svara*, and in Dan. *svare* and *ansvare*=to answer.]

A. Transitive:

I. Literally:

1. To reply to a question formally put to one. (In this and some of the following senses *answer* may

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pîne, pît, sîre, sîr, marine; gô, pôt, or, wôre, wôlf, wôrkw, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

be followed by an objective of the person replied to, by an objective of the communication made, or by both together.)

"And he him *answerede* modi and bold."

Story of Gen. and Exod. (ed. Morris), 2,728.

"The baptism of John, was it from heaven or of men? *answer* me."—*Mark* xi. 30.

"But he *answered* her not a word."—*Matt.* xv. 23.

(See also the example under No. 3.)

¶ In the authorized version of Scripture the expression occurs, "answered him and said."

"And Peter *answered* him and said, . . ."—*Matt.* xiv. 28.

2. To reply to a statement of facts, or an argument, whether given forth verbally, in writing, or by means of the press. *Spec.*, to attempt in whole or in part to refute it.

"This reasoning was not and could not be *answered*."—*Macaulay: Hist. Eng.*, ch. xiv.

3. To reply to an accusation; to endeavor to rebut it.

"And the high priest arose and said unto him, *Answerest* thou nothing? What is it which these witness against thee?"—*Matt.* xxvi. 62.

4. To sing in alternate parts, or in any other way to alternate with another person in what he or she is saying or doing.

"And the women *answered* one another as they played, and said, Saul hath slain his thousands, and David his ten thousands."—*1 Sam.* xviii. 7.

(Apparently one choir sung, "Saul hath slain his thousands," and a second one finished the sentence by adding, "And David his ten thousands.")

"With piercing shrieks his bitter fate she moans,

While the sad father *answers* groans with groans."

Pope: Homer's Iliad, bk. xxii., 514, 515.

"So spake the mournful dame: her matrons hear,

Sigh back her sighs, and *answer* tear with tear."

Ibid., 662, 663.

5. To solve an arithmetical, mathematical, or other question or problem proposed to one.

II. Figuratively:

1. To make a suitable return for anything said or done. Thus, to answer a prayer or petition is, if it be deemed right, to grant what it solicits: to answer the door-bell is to go and ascertain who has rung it, and what his object is in visiting the house; to answer a legitimate claim on one's purse is to pay it; to answer an evil doer or evil deeds is to punish him or them; to answer an enemy's fire in battle is to fire back at him.

"Thou calledst in trouble, and I delivered thee; I *answered* thee in the secret place of thunder."—*Ps.* lxxxi. 7.

"I the Lord will *answer* him by myself. And I will set my face against that man, and will make him a sign and a proverb, and will cut him off from the midst of my people."—*Ezek.* xiv. 7, 8.

2. To stand accountable for; to incur the penalty of.

"Shall he that contendeth with the Almighty instruct Him? he that reproveth God, let him *answer* it."—*Job* xl. 2.

"In thine own person *answer* thy abuse."

Shakesp.: 2 *Henry VI.*, ii. 1.

" . . . who studies day and night

To *answer* all the debt he owes unto you,

Even with the bloody payments of your deaths."

Shakesp.: 1 *Henry IV.*, i. 3.

"Let his neck *answer* for it, if there is any martial law in the world."—*Ibid.*, *Henry V.*

3. To be suitable for; to be capable of being employed for; to serve for.

" . . . money *answereth* all things."—*Eccl.* x. 19.

4. To correspond to or with.

"Weapons must needs be dangerous things if they *answered* the bulk of so prodigious a person."—*Swift: Gulliver's Travels*.

"Still follow Sense, of ev'ry art the soul,

Parts *answ'ring* parts shall slide into a whole."

Pope: Moral Essays, Epistle IV., 65, 66.

5. To be opposed to, to face.

"Fire *answers* fire; and, by their paly beams,

Each battle sees the other's umber'd face."

Shakesp.: *Henry V.*; *Chorus*.

B. Intransitive:

I. *Literally*: To reply verbally, or in writing, to a question, a call, a summons, a judicial charge, a petition, or a prayer.

"And he said unto him, Thou hast *answered* right . . ."—*Luke* x. 28.

"The Lord called Samuel, and he *answered*, Here am I."—*1 Sam.* iii. 4.

"Then Paul stretched forth the hand, and *answered* for himself."—*Acts* xxvi. 1.

"But there was no voice, nor any that *answered*."—*1 Kings* xviii. 26.

¶ In the English Bible the expression "answered and said" is common.

"But he *answered and said* unto him that told him, Who is my mother? and who are my brethren?"—*Matt.* xii. 48.

Once it is used anomalously, in the sense of *made a statement*, no question having preceded it: "The king *answered and said* unto Daniel" (*Dan.* ii. 26). Daniel had not previously to this addressed the king. (See also *Acts* v. 8.)

II. Figuratively:

1. To reply to any of these by deeds rather than words.

" . . . and the God that *answereth* by fire, let Him be God."—*1 Kings* xviii. 24.

2. To speak for, to vindicate, to witness for.

"So shall my righteousness *answer* for me in time to come."—*Gen.* xxx. 33.

"I have ever been of opinion, that, if a book can't *answer* for itself to the public, 'tis to no sort of purpose for its author to do it."—*Pope: Letter to the Hon. J. C.* (1711).

3. To be held responsible for, to be liable for, to be accountable for; to satisfy any demands which justice may make concerning (one's actions).

"Those many had not dared to do evil,

If the first man that did th' edict infringe,

Had *answer'd* for his deed."

Shakesp.: *Measure for Measure*, ii. 2.

4. To be suitable for, to serve for, to succeed.

" . . . the trial in great quantities doth not *answer* the trial in small; and so deceiveth many."—*Bacon*.

"Jason followed her counsel, whereto, when the event had *answered*, he again demanded the fleece."—*Raleigh*.

5. To correspond to or with.

"Dol. Hear me, good madam:

Your loss is as yourself, great; and you bear it

As *answering* to the weight."

Shakesp.: *Antony and Cleopatra*, v. 2.

"As in water face *answereth* to face, so the heart of man to man."—*Prov.* xxvii. 19.

6. To sound in return, as in the case of the response from an echo.

"The woods shall *answer*, and their echo ring."

Pope: Pastorals; Summer, 16.

7. To vibrate to the touch, or otherwise act reciprocally to.

"Say, do'st thou yet the Roman harp command?

Do the strings *answer* to thy noble hand?"

Dryden.

an'-swēr, *an'-swēre, *an'-swar, *ānd'-swēre (w silent), s. [A. S. *andswaru*. In Sw. & Dan. *svar*.]

A. Ordinary Language:

I. Literally:

1. *Gen.*: A reply to a question, command, call, entreaty, address, or argument.

"Ef[t] this *andswere*, ben ut gon,

Moysees forth and Aaron."

Story of Gen. and Exod. (ed. Morris), 3,081, 3,082.

"So watzh al samen her *answar* soght."

Alliterative Poems; Pearl (ed. Morris), 517.

"Now advise, and see what *answar* I shall return to him that sent me."—*2 Sam.* xxiv. 13.

"At my first *answer* no man stood with me, but all men forsook me."—*2 Tim.* iv. 16.

(b) A reply in an oral debate to the allegations of an opponent, or a publication in reply to another publication.

(c) The solution of an arithmetical question or a geometrical problem, the former at least being generally proposed in the form of a question.

II. Figuratively:

1. A return for anything said or done.

" . . . the *answer* was given by a volley of musketry."—*Darwin: Voyage round the World*, ch. iv.

2. One thing produced by another; an effect viewed as proceeding from a certain specified cause.

"Contraction is an *answer* to stimulus."—*Todd & Bowman: Physiol. Anat.*, vol. i., p. 174.

3. Account to be rendered to justice.

"He'll call you to so hot an *answer* for it,

That you shall chide your trespass."

Shakesp.: *Henry V.*, ii. 4.

4. The reverberated sound of an echo.

B. *Technically (Law)*: The formal defense made by an accused person against the charge brought against him, or the formal reply of one side in a lawsuit to the allegations of the other. Also the appearance for such defense.

†answer-jobber, s. One who makes a business of writing answers.

"What disgusts me from having anything to do with *answer-jobbers* is, that they have no conscience."—*Swift*.

an'-swēr-a-ble (w silent), a. [Eng. *answer*; -able.]

1. That to which a more or less satisfactory answer can be given.

2. Responsible, liable to be called to account for, liable for.

"For the treaty of Dover the king himself is chiefly *answerable*."—*Macaulay: Hist. Eng.*, ch. ii.

3. Correspondent, similar, like.

"It was but such a likeness as an imperfect glass doth give; *answerable* enough in some features and colors, but erring in others."—*Sidney*.

4. Proportionate to, commensurate to or with.

" . . . and twenty cubits was the length, and the height in the breadth was five cubits, *answerable* to the hangings of the court."—*Exod.* xxxviii. 18.

5. Suitable.

" . . . it was a violent commencement, and thou shalt see an *answerable* sequestration."—*Shakesp.*: *Othello*, i. 3.

"If *answerable* style I can obtain

Of my celestial patroness."—*Milton*.

6. Equal, sufficient to meet.

"There be no kings whose means are *answerable* unto other men's desires."—*Raleigh*.

an'-swēr-a-ble-ness (w silent), s. [Eng. *answerable*; -ness.] The quality of being answerable.

"To shew therefore the correspondency and *answerableness* which is between this bridegroom and his spouse," &c.—*Harmer: Transl. of Beza*, p. 196.

an'-swēr-a-blŷ (w silent), adv. [Eng. *answerable*; -ly.] Proportionally, correspondingly.

"It bears light sorts into the atmosphere to a greater or lesser height, *answerably* to the greater or lesser intensity of the heat."—*Woodward*.

an'-swēred (w silent), pa. par. & a. [See *ANSWER*, v.]

an'-swēr-ēr (w silent), s. [Eng. *answer*; -er.] One who answers to a question, or who replies in a controversial manner to a writing or publication.

"I know your mind, and will satisfy it: neither will I do it like a niggardly *answerer*, going no further than the bounds of the question."—*Sidney*.

"It is very unfair in any writer to employ ignorance and malice together, because it gives his *answerer* double work."—*Swift*.

an'-swēr-īng, *an'-swēr-ŷng (w silent), pr. par., a. & s. [*ANSWER*, v.]

"Discret sche was in *answeryng* alway."

Chaucer: C. T., 13,463.

" . . . while all the Greeks around

With *answering* sighs return'd the plaintive sound."

Pope: Homer's Iliad, bk. iv., 184, 185.

" . . . for an *answering* sign,

That the good Cross doth hold its lofty place

Within Valencia still."

Hemans: Siege of Valencia.

an'-swēr-less (w silent), a. [Eng. *answer*; suffix -less.] Without an answer, either as not yet having been replied to, or as not capable of being answered. (*Byron*.)

ānt, *āunt, *ām̃t, *ām'-ēt, *ēm'-ēt, ēm'-mēt, s. [According to Junius, the Eng. word *ant* is derived from Eng. *emmet*, A. S. *æmette*; Trench considering the successive steps of the process to have been *emmet*, *emet*, *amet*, *ant*, and *ant*. (*Trench: Eng. Past and Present*, pp. 198 to 200.) A. S. *æmete*, *æmette*, *æmetta*, *æmytta*, *emetete*, *emette*; Ger. *ameise*.]

1. *Ord. Lang. & Entom.*: The name given to certain small, but singularly intelligent and industrious insects well known in this and other lands. They are classed by naturalists under Heterogyna, the first tribe of aculeated Hymenoptera. Ants live in society like the more common species of wasps and bees. Like them, also, their polity consists of three kinds of individuals, males, females, and neuters, the last-named being probably abortively-formed females. The males are winged during the whole course of their existence, the females only during the pairing season, and the neuters not at all. The males and females meet not on the ground, but in the air. Soon afterward the males, which cannot do much for themselves, having neither stings nor even mandibles, perish of cold or other hardships. The females, on the contrary, immediately after meeting with the other sex in the air, lose or actually pull off their wings, are found by neuters, and become the object of their tender care. The neuters are the most numerous class of ants, and do nearly the whole work of the community. Specially, they carry the eggs, the larvæ and the cocoons from place to place in the nest, as the temperature and moisture vary; they feed the larvæ with liquid disgorged from the stomach, and besides open the cocoons for them when they are ready to emerge as perfect insects. Hence the neuters are sometimes called workers or *nurse-ants*. Sir John Lubbock says that ants can distinguish colors, being particularly sensitive to violet. They have very delicate smell, but apparently no hearing. The different species present curious analogies to the earlier stages of human progress—the hunting and pastoral, and even the agricultural. There are various genera and species of ants, differing in habits and methods of operation. Some, like *For-*

mica sanguinaria and *F. cœspitumum*, have been called Mining-ants; others, as *F. flava*, produce a kind of masonry; while *F. rufa*, the Wood-ant, similarly addresses itself to carpentry. Finally, some ants keep aphides as graziers do milch cows, on account of a secretion which they yield; and others hold slaves, the eggs, larvæ, and pupæ of which they have captured in war. Of these the most notable is the Amazon-ant. [AMAZON, No. 4. See also HETEROGYNA, FORMICA, MYRMICA ATTA, &c.]

¶ The ant of Scripture, Heb. *nemalah*, Sept. *murmex*, Vulg. *formica*, seems correctly translated.

"Go to the ant, thou sluggard; consider her ways, and be wise."—Prov. vi. 6.

"The ants are a people not strong, . . ."—Prov. xxx. 25.

2. Popularly: The White Ant [TERMITES], which is not a genuine ant at all, but a neuropterous insect. [ANT-HILL.]

ant-bear, s. The name generally given in Demerara to the Great Ant-eater, *Myrmecophaga jubata*. [ANT-EATER, MYRMECOPHAGA.]

ant-eater, s.

1. The English name of the animals belonging to the genus *Myrmecophaga* of Linnaeus. [Gr. *murmex*=an ant, and *phagos*=a glutton; *phagein*=to eat.] They have a lengthened muzzle terminated by a small, toothless mouth, from which they protrude a

long, thread-like tongue, covered with viscous saliva. This they thrust into the nests of termites, or those of ants proper, sucking the animals which adhere to it up into their mouths. Their claws are strong, and are used for tearing to pieces the structures erected by the Termites. Among the species may be enumerated the *M. jubata*, the Great or Maned Ant-eater, which has four toes before and five behind, and the *M. didactyla*, the Little or Two-toed Ant-eater. Both are South American.

The Scaly Ant-eaters are of an allied genus, *Manis*. They derive their English name from the fact that they are covered with thick scales, which give them the superficial appearance of reptiles. The Short-tailed *Manis*, *M. pentadactyla*, Linn., is found in Bengal and the Indian Archipelago, and *M. tetradactyla* in Africa. The proper and Scaly Ant-eaters belong to the mammalian order of Edentata, or toothless animals. To the same order belong the Cape Ant-eaters (*Orycteropus Capensis*). [AARDVARK.] Prof. Owen considers it remarkable that "not a trace of a Scaly Ant-eater, recent or extinct, has been discovered in South America, where the Edentate order is so richly represented by other generic and specific forms." (Owen: *British Fossil Mammals and Birds*, 1846, p. xxxix.)

The Porcupine Ant-eater, or Aculeated Ant-eater (*Echidna Hystrix*), is not closely allied to the species new mentioned, but is one of the Monotremata. [ECHIDNA.]

2. The King of the Ant-eaters: A bird, the *Turdus rex* of Gmelin, and *Corvus grallarius* of Shaw, now *Grallaria rex*. [ANT-CATCHER, ANT-THRUSHES.]

ant-eggs, ants' eggs, s. pl.

1. Accurately: The eggs of ants. They are of different sizes and in small parcels, so that they can be moved from place to place.

2. Popularly, but erroneously: The elongated egg-looking bodies which ants when disturbed seem so anxious to carry off. They are not eggs, but cocoons. They have been recommended as food for the nightingale and other birds, and have been extensively used for feeding pheasants and partridges.

ant-hill, s. & a. [In A. S. *æmete-hyll*, *æmette-hyll*.]

A. As substantive:

1. The mounds or hillocks raised by some species of ants proper.

"Put blue flowers into an ant-hill, they will be stained with red; because the ants drop upon them their stinging liquor, which hath the effect of oil of vitriol."—Ray.

2. The much more remarkable erections made by different species of termites (white ants). In most cases the descriptions of unscientific travelers refer to these rather than to the constructions of the ants proper. The nest of the African *Termes bellicosus* is described by Sparrmann as rising ten or twelve feet above the surface of the earth. Its shape is that of a sugar-loaf. Externally it is covered with a broad cap, while inside it is divided

into a multitude of chambers. The *T. atrox* and the *T. mordax* build nests two feet high with conical roofs, called turreted nests. [WHITE ANT and TERMES.]

B. As adjective: In various respects presenting the characteristics of an ant-hill like those just described; small, petty.

" . . . all things that do pass,

Upon this ant-hill earth!"

Thomson: *Castle of Indolence*, i. 49.

ant-hillock, s. Nearly the same as ANT-HILL (q. v.), but smaller.

"Those who have seen ant-hillocks . . ."—Addison.

ant-like, a. Like an ant.

ant-lion, s. The English name of a genus of insects. [MYRMELEON.] It belongs to the order Neuroptera, and has gauzy wings like a dragon-fly, from which, however, it may be at once distinguished by having longer antennæ. The species are

The Ant-lion.

called Ant-lions from the extraordinary habits of their larvæ, which construct a funnel-shaped pitfall in the sandy or dusty ground, at the bottom of which they bury themselves all but their antennæ. When ants or other insects are hurrying along they are apt to miss their balance and tumble into the pitfalls, where they are at once devoured. It is said that when they do not quite lose their equilibrium on the brink of the abyss, they are helped into the jaws of death by a shower of sand or dust flung up from below. Ant-lions occur in the south of Europe, in India, &c.

ant-thrushes, ant-catchers, ant-eaters, s. pl. Names given to the several species of birds placed by Illiger under his genus *Myiothera*, and some of its immediate allies. They belong to the family Turdidae, and the sub-family Formicatinæ, called *Myotherinæ* by Swainson. They live on insects, especially on ants. They are found in both continents, but those of the Old World have the more brilliant plumage. The names Ant-thrushes or Ant-catchers are preferable to that of Ant-eaters, used in Griffith's *Cuvier*, vol. vi., 399, as the latter designation has long been pre-occupied for various mammalian animals.

*ant, conj. [AND.] And.

"Twin-wifing ant twin-manslaght."

Story of Genesis and Exodus (ed. Morris), 485.

ān't, conj. A contraction for *and it*, or *and if it*; as "*an't* please you"—if it please you. (Johnson.)

ān'-tā, s. [Lat.] (1) The sing. of ANTÆ (q. v.). (2) The Brazilian name of the American Tapir (*Tapirus Americanus*).

ānt-āc'-īd, *ānt'-ī-āc'-īd, a. & s. [Gr. *anti*=in opposition to, and Eng. *acid* (q. v.).]

1. As adjective: Diminishing acidity; alkaline.

Pharm. Ant acid or Alkaline Medicines: Agents designed to diminish acidity in the frame by increasing its alkalinity. For instance, they relieve heartburn, which is produced by an over-acid state of the alimentary canal, increase the alkalinity of the blood, alter the urine and other secretions. In Garrod's classification *alkaline* or *antacid medicines* are the second order of his first class (medicines which act upon the blood); these again ranking under his first division (internal remedies). He divides Alkaline or Antacid Medicines into (1) Direct Alkaline Remedies; (2) Direct but not remote Antacids, at least upon the urine; and (3) Remote Alkaline Remedies.

"All animal diet is alkaliescent or *anti-acid*."—Arbuthnot.

2. As substantive: An antacid or alkaline remedy. (See the adjective.)

"Oils are *anti-acids*, so far as they blunt acrimony; but as they are hard of digestion, they produce acrimony."—Arbuthnot.

"It will be seen that a subdivision of these medicines is made into direct and remote antacids."—Garrod: *Materia Medica*, 3d ed., p. 386.

ān-tāc'-rīd, a. [Gr. *anti*=opposed to; *acid* (q. v.).] Fitted to correct acrimony.

ān'-tā, s. pl. [Lat. In Ger. *anten*; Fr. *antes*; Sp. *antas*; Ital. *ante*.]

Roman architecture: Pillars on either side of a door, or pilasters terminating the side walls of tem-

ples when they are prolonged beyond the faces of the end walls. [ANTES.]

ān-tāg'-ōn-īsm, s. [In Fr. *antagonisme*; Port. *antagonismo*. From Gr. *antagōnisma*=a struggle with another.] [ANTAGONIZE.] Contest with; opposition to. (Often preceded by *in*, and followed by *to*.)

"Trustees have abandoned their old attitude of exclusiveness and antagonism."—Times, Sept. 17, 1873.

" . . . new wars, fresh antagonisms."—Echo, Sept. 16, 1873.

ān-tāg'-ōn-īst, s. & a. [In Fr. *antagoniste*; Sp. Port. & Ital. *antagonista*. From Gr. *antagōnistēs*=an adversary, opponent, rival.]

A. As substantive:

I. Ordinary Language:

1. A person who combats against one in a public contest or in battle.

"The earldom of Shrewsbury had been bestowed, in the fifteenth century, on John Talbot, the antagonist of the Maid of Orleans."—Macaulay: *Hist. Eng.*, ch. viii.

2. A controversial opponent; a person encountering one on the field of public disputation.

"Mr. Locke was a philosopher; his antagonist, Stillingfleet, Bishop of Worcester, was a man of learning."—Goldsmith: *The Bee*, No. viii.

II. Technically:

Anatomy: That which counteracts. (Used specially of muscles which, like the flexor and extensor muscles of the arm, operate in counteraction of each other, and, between them, produce the needful motions of the limb.)

"Muscles opposed in action are called *antagonists*."—Todd & Bowman: *Physiol. Anat.*, vol. i., p. 169.

B. As adjective: In conflict with; opposed to in nature or in action.

" . . . the nature of the two antagonist forces by which the productiveness of agricultural industry is determined."—J. S. Mill: *Political Economy* (1848), vol. i., bk. i., ch. xii., § 3, p. 224.

" . . . the antagonist schools of philosophy."—Herbert Spencer: *Psychol.*, 2d ed., vol. ii., § 417, p. 389.

ān-tāg'-ōn-īs'-tic, *ān-tāg'-ōn-īs'-tick, ān-tāg'-ōn-īs'-tic-al, a. [Eng. *antagonist*; -ic, -ical.]

1. In personal conflict or contention with.

"It may be too, i' the ordinance of nature;
Their valors are not yet so combatant,
Or truly *antagonistic*, as to fight,
But may admit to hear of some divisions
Of fortitude, may put 'em off their quarrel."

B. Jonson: *Magn. Laßp.*

2. Opposed in action to.

" . . . the action of the external and internal intercostals must be *antagonistic*."—Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 399.

ān-tāg'-ōn-ī-ze, v. t. [Gr. *antagōnizomai*=to struggle against: *anti*=against, and *agōnizomai*=to contend for a prize.] [AGONIZE.] To contend against in combat or in controversy; to oppose in action.

" . . . the brain and spinal cord are surrounded by fluid, the pressure of which, probably, *antagonizes* that which must be exerted through the blood-vessels."—Todd & Bowman: *Physiol. Anat.*, vol. i., p. 297.

ān-tāg'-ōn-ī-zed, ān-tāg'-ōn-ī-şed, pa. par. [ANTAGONIZE.]

ān-tāg'-ōn-ī-z-īng, ān-tāg'-ōn-ī-ş-īng, pr. par. [ANTAGONIZE.]

" . . . there is some *antagonizing* principle at work capable for a time of making head against the law."—J. S. Mill: *Pol. Econ.*, bk. i., ch. xii., § 3.

" . . . but the *antagonizing* agency, . . ."—Ibid.

ān-tāg'-ōn-ỹ, s. [Gr. *antagōnia*.] A struggling against in combat; contest or controversy with; opposition to.

" . . . the incommunicable *antagony* that is between Christ and Belial, . . ."—Milton: *Doct. and Discipl. of Divorce*, i. 8.

ān-tāl'-gic, a. & s. [Gr. *anti*=opposed to; *algos*=pain.]

A. As adjective: Fitted to alleviate pain; anodyne.

B. As substantive: A medium fitted to alleviate pain; an anodyne. (Johnson.)

ān-tāl'-kal-ī, s. [Gr. *anti*=opposed to; Eng. &c., *alkali*.] A chemical agent which has the property of neutralizing an alkali. Nearly all the acids can do so.

ān-tāl'-kal-ī-ne, s. [Gr. *anti*=opposed to; Eng. &c., *alkali*; -ine.]

Med.: A remedy designed to neutralize an alkali, or counteract an alkaliescent tendency in the system. The same as ANTALKALI (q. v.).

*ān-tān-a-clā'-sis, s. [In Ger. *antanaclasis*. From Gr. *antanaclasis*=(1) a reflection of light, of heat, or of sound; (2) the use of a word in a differ-

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; eȳ = ā. qu = kw.

ant sense: *anti*=against; *ana*= . . . again, and *klasis*=a breaking; *klaō*=to break off.]

Rhetoric:

1. A figure by which a word is repeated in a sentence, but in a different, if not even in a contrary, sense from that in which it was used on the first occasion. As, *In thy youth learn some craft, that in old age thou mayest get thy living without craft.* In the first clause it may be observed that *craft* means handicraft or business, and in the second, *trickery*.

2. The returning, after a parenthesis, to the same words which were previously employed. By doing so the structure of the sentence is made more clear.

**ăn-tăn-a-gō-gē*, s. [In Ger. *antanagoge*. From Gr. *antanagō*=to lead up against; or *anti*=against, and *anagōgē*=a leading up.] [ANAGOGÉ.]

Rhet.: A figure by which, when the accusation of one's adversary is felt to be unanswerable, he is declared to have done the same thing which he charges against one, or at least to have acted quite as badly.

ăn-tăph-rō-diș-i-ăc, a. & s. [Gr. *anti*=against, and *aphrodisiakos*=belonging to venery; *aphrodisios*=belonging to love or venery.] [APHRODITIC.]

ăn-tě-căm-ēr-a. [ANTI-CAMERA.]

ăn-tě-çē-dă-ně-ōūs, a. [Lat. *antecedo*=to go before.] Antecedent in point of time; preceding another event.

"Admit that, which as capable of *antecedaneous* proof may be presupposed."—Barrow: *Sermons*, ii. 407.

ăn-tě-çē-de, v. t. [In Sp. *anteceder*. From Lat. *antecedo*=to go before; *ante*=before, and *cedo*=to go.] To precede in point of time.

"It seems consonant to reason that the fabric of the world did not long *antecede* its motion."—Hale.

ăn-tě-çē-dençe, *ăn-tě-çē-den-çy*, s. [From Lat. *antecedentia*=a going before; *antecedens*, pr. par. of *antecedo*=to go before.] A going before in point of time.

" . . . those relations of *antecedence* and sequence."—Herbert Spencer: *Psychol.* (2d ed., 1872), vol. ii., p. 63.

"Let the collections of the last *antecedency* be observed."—Hacket: *Life of Archbp. Williams* (1693), p. 168.

Astron. *In *antecedence* [Lat. in *antecedentia*]: A term formerly used in describing what is now called the retrograde motion of a planet, that is, its motion from east to west.

ăn-tě-çē-dent, a. & s. [In Fr. *antécédent*; Sp., Port. & Ital. *antecedente*. From Lat. *antecedens*=going before, pr. par. of *antecedo*=to go before.]

A. As adjective: Preceding in point of time; prior to.

" . . . derived their doctrines from antecedent writers."—Duke of Somerset: *Christian Theology and Modern Scepticism*, xxx. 131.

"Prud. I ask, then, if there was ever anything that had a being antecedent to or before God?"—Bunyan: *Pilgrim's Progress*, pt. ii.

B. As substantive:

I. Ordinary Language:

1. (Sing.) Gen.: That which goes before in point of time.

"A duty of so mighty an influence that it is indeed the necessary antecedent, if not also the direct cause, of a sinner's return to God."—South.

2. (Plur.) Spec.: The events of a person's bygone history sought out to test his present character or pretensions, and afford assistance in forecasting his future action. (Used sometimes also of public events instead of persons.)

" . . . and it was trebly necessary to act in the matter with entire openness, owing to so many questionable antecedents."—Froude: *Hist. Eng.*, vol. iv., p. 133.

II. Technically:

1. Grammar: An antecedent is a word going before a relative pronoun, and to which that relative points back. In the connected clauses, "Then Saul, who also is called Paul," *Saul* is the antecedent to the relative *who*.

"Which is likewise used for restrictive purposes, or to limit or explain its antecedent."—Bain: *Eng. Gram.* (1863), p. 23.

2. Logic: That part of a conditional proposition on which the other depends. (*Whately*.) The other part is called the *consequent*. In the sentence, "If thou faint in the day of adversity thy strength is small," the words "If thou faint in the day of adversity" are the antecedent, while those which remain, viz., "thy strength is small," are the consequent.

3. Mathematics:

(a) Gen.: "That term or quantity which the mind considers first in comparing it with another." (*Glossographia Nova*.)

(b) Specially (Plur.): The first and third terms in a series of four proportionals. The second and fourth are consequents. Thus, if A : B : : C : D, then A and C are antecedents, and B and D consequents. (See Euclid, Bk. V., Def. 12.)

4. Med. Antecedent signs: The signs or symptoms which precede the attack of any particular disease.

ăn-tě-çē-děnt'-al, a. [Eng. *antecedent*; -al.] Pertaining to what is antecedent, or goes before.

Math. *Antecedental method:* A method of investigating universal comparison and general geometrical proportion, published by Mr. James Glenie in 1793. It is derived from an examination of the antecedents of ratios having given consequents, and a given standard of comparison in the various degrees of augmentation and diminution which they undergo by composition and decomposition.

**ăn-tě-çē-děnt'-tia* (tia as *shī-a*), s. [Lat., but not classic.] Antecedence.

*In *antecedentia*. In antecedence. [ANTECEDENCE.]

ăn-tě-çē-dent-lý, adv. [Eng. *antecedent*; -ly.] Previously; before, in point of time.

" . . . an agrarian law, which, *antecedently* to a division, dispossessed patrician squatters."—Lewis: *Early Rom. Hist.* (1855), ch. xii., pt. iv., § 68, p. 295.

ăn-tě-çēs-sōr, **ăn-tě-çēs-sōr* (Eng.), **ăn-tý-çēs-sōr*, **ăn-tě-çēs-sōr*, **ăn-tě-çēs-tre* (Scotch), s. [In Sp. *antecesor*; Ital. *antecessor*. From Lat. *antecessor*=one who goes before; *ante*=before; *cedo*=to go.] One who goes before another. Specially—

1. An ancestor.

"For in Charlemain time *antecessour* had she,
When Charlemain had conquered truly
The hole erldome and contre by werre myghty."
The Romans of Partenay (ed. Skeat), 6,359-61.

2. A predecessor in an office or estate.

"And his cruell *antecessoures* also,
By whom to greuous torment put we be."
The Romans of Partenay (ed. Skeat), 4,786-7.

"The successor seldom prosecuting his *antecessor's* devices."—Sir E. Sandys: *State of Religion*.

ăn-tě-çhăm-běr, **ăn-ti-çhăm-běr*, s. [In Fr. *antichambre*; Ital. *anticamera*.]

1. Lit.: An outer chamber or room in which people wait before being admitted to the inner or chief apartment.

"When the host was elevated there was a strange confusion in the *antechamber*."—Macaulay: *Hist. Eng.*, chap. iv.

2. Fig.: The mouth, viewed as the entrance to some of the interior parts of the physical frame.

" . . . the mouth, the *antechamber* to the digestive canal."—Todd & Bowman: *Physiol. Anat.*, vol. i., p. 434.

"The empress has the *antechambers* past,
And this way moves with a disorder'd haste."
Dryden: Aurungzebe, ii. 1.

ăn-tě-çhăp-el, s. [Eng. *ante* (from Lat.), in compos.=before; and Eng. *chapel*.] The part of a chapel which lies between the western wall and the choir-screen. (*Gloss. of Arch.*)

" . . . the *antechapel* of Trinity College chapel."—Warton: *Life of Bathurst*, p. 190.

ăn-tě-çians, s. pl. [In Fr. *antécians*; Sp. *antecos*; Lat. pl. *anteci*. From Gr. *antoiikos*=living in an opposite latitude: *anti*=opposite to, and *oikeō*=to dwell; *oikos*=a house.]

Geog. & Astron.: A term applied to two persons or two communities living the one north, the other south, of the equator, on the same meridian of longitude and the same parallel of latitude. Taking the whole course of the year, both parties have the same length of day; only it is winter with the one while it is summer with the other. [ANTISCIAN.]

ăn-tě-Cōl-ūm'-bī-an, a. [Eng. *ante* (from Lat.), in compos.=before; Eng. *Columbian*, from Christopher Columbus, the navigator.] Previous to the time of Columbus; before the discovery of America.

ăn-tě-cūr-sōr, s. [Lat. *ante*=before, and *cursor*=a runner; from *cursum*, supine of *curro*=to run. (1) A forerunner; a precursor; one whose arrival presages the coming of some other person or persons. (2) One of the advanced guard or pioneers in front of an army.] A forerunner.

đol, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şhın; -tion, -şion = zhın. -tious, -cious, -sious = şhüş. -ble, -dle, &c. = bel, del.

ăn-tě-dāte, *s.* [Eng. *ante* (from Lat.), in compos.=before; and *date*, *s.* In Fr. *antedate*; Sp. *antedata*.] A date preceding another date; a prior date.

"Why hath not my soul these apprehensions, these presages, these changes, those *antedates*, those jealousies, those suspicions of a sin, as well as my body of a sickness?"—*Donne: Devotions*, p. 10.

ăn-tě-dāte, *v. t.* [Eng. *ante* (from Lat.), in compos.=before; and *date*, *v.* In Ger. *antedatiren*; Fr. *antedater*; Sp. *antedatar*; Ital. *antedatare*.]

1. To date a document earlier than the time at which it was actually written for fraudulent or other purposes.

"As the error *antedates* the event by twenty years, . . ."—*Lewis: Early Rom. Hist.*, ch. xii., pt. iv., § 62.

2. To cause an event to come at an earlier date than it otherwise would have done, by removing the hindrances which postpone its arrival.

"But for the long contest with France, the most beneficent domestic legislation of our time might have been *antedated* by perhaps half a century."—*Times*, November 24, 1876.

3. To anticipate the arrival of an event before its actual coming, and feel and act as if it were already passing.

"Controls, decides, insults thee every hour,
And *antedates* the hatred due to Pow'r."

Pope: Satire, 1,740.

ăn-tě-dā-těd, *pa. par. & a.* [ANTEDATE, *v.*]

ăn-tě-dā-ting, *pr. par.* [ANTEDATE, *v.*]

ăn-tě-dī-lū-vī-ai, *a.* [ANTEDILUVIAN.] The same as ANTEDILUVIAN, *a.* (q. v.)

ăn-tě-dī-lū-vī-an, *a. & s.* [In Ger. *antediluvianisch*; Fr. *antediluvien*; Port. *antediluviano*; Ital. *antediluviano*.] From Lat. *ante*=before, and *diluvium*=a or the deluge.]

A. As adjective:

1. *Lit.*: Before the deluge; relating to the persons, the events, or the period before the Noachian deluge.

"The text intends only the line of Seth, conducive unto the genealogy of our Saviour and the *antediluvian* chronology."—*Browne: Vulgar Errors*.

"These huge reptiles, surrounded by the black lava, the leafless shrubs, and large cacti, seemed to my fancy like some *antediluvian* animals."—*Darwin: Voyage round the World*, ch. xvii.

2. *Fig.*: Rude and primitive, such as may be supposed to have existed before the deluge, in the in fancy of manufactures and other departments of civilization.

" . . . above all, the whole system of traveling accommodations was barbarous and *antediluvian* for the requisitions of the pampered south."—*De Quincey's Works* (ed. 1863), vol. ii., pp. 162, 163.

B. As substantive: One who lived before the deluge.

"We are so far from repining at God, that He hath not extended the period of our lives to the longevity of the *antediluvians*, that we give him thanks for contracting the days of our trial."—*Bentley*.

***ăn-tě-făct**, *s.* [Lat. *ante*=before; *factum*=something done.] Something done before another. (Opposed to *postfact*.)

"Some have published that there is a proper sacrifice in the Lord's Supper to exhibit Christ's death in the post-fact, as there was a sacrifice to prefigure in the old law the *antefact*."—*Copie of the Proceedings of some Divines* (1641), p. 2.

ăn-tě-fix'-æ, **ăn-tě-fix'-ēs**, *s. pl.* [In Fr. *antefixes*; Ital. *antefisse*; Lat. *antefixæ*.]

Arch.: Ornamental tiles, placed on the cornices and eaves of ancient buildings, where each ridge of tiling terminated. They were designed to conceal the ends of the ordinary tiles. (*Gloss. of Arch.*)

ăn-tě-Gōth'-ic, *a.* [Lat. *ante*=before; Eng. *Gothic*.] Previous to the rise of the Gothic architecture.

" . . . the style which belongs to the Roman or *Ante-Gothic* architecture, . . ."—*Longfellow: Intro.*, *Skeleton in Armor*.

ăn-tě-lōpe, *s.* [In Dut. & Port. *antelope*; Dan., Ger. & Fr. *antelope*.] From Gr. *antholops*=a species of antelope (a word used by Eustathius, who wrote about A. D. 1160); *anthos*=a flower, . . . brightness; *l*, euphonic (?); *ops*=the eye. "Brightness of eye." [ANTILOPE.]

A. Ordinary Language:

1. *Lit.*: The English equivalent of the large zoological genus *Antelope*, or sub-family *Antilopina*. For its scientific characters see the former of these two words. Most antelopes are deer-like animals of great elegance. They have large lustrous eyes; are swift of foot, and take enormous leaps, when flying from a foe, when wishing to clear a bush or other obstacle in their path, or in the exuberance of their activity, apparently for very wantonness. The species referred to by Moore in the examples quoted

is the common Indian antelope (*Antelope cervicapra*, Pallas), common in the Deccan and other parts of Europe. [SASIN.]

"Our sands are bare, but down their slope

The silver-footed antelope

As gracefully and gaily springs

As o'er the marble courts of kings."

Moore: Lalla Rookh; Light of the Haram.

2. *Fig.*: Comparisons of a person beloved to an antelope are common in the erotic poetry connected with Eastern Europe.

B. Technically:

Her. The heraldic antelope: An antelope drawn in a conventional way to gratify heraldic taste. It is distinguished from the natural antelope, which is one in which the artist has aimed at a genuine imitation of nature.

ăn-tě-lō-pīne, *a.* [Eng. *antelope*; -ine.] Pertaining to an antelope, or to the antelope genus or family. In Griffith's *Cuvier* "the antelopine group" is a sub-genus of the great genus *Antelope*.

ăn-tě-lū-can, *a.* [Lat. *antelucanus*=before day-break: *ante*=before, and *lux*, genit. *lucis*=light.] Held before daylight. A term specially applied to the religious services held in the early ages of Christianity before daylight, to shield the worshipers from persecution, or to afford convenience to those who were not their own masters, and could not attend a congregation during working hours. There was a fascination to some minds about such meetings, which were continued after the necessity which had first brought them into existence had passed away.

"There the Jupiter of exemplary honor and magnificence, there the Phosphorus of piety and antelucan devotion."—*Bp. Hall: Rem.*, p. 44.

"All manner of antelucan laborers, who make provision for the flesh, make the flesh their provision."—*Gayton: Notes on Don Quixote*, iii. 6.

ăn-tě-ēm-blēt'-ic, *a.* [Gr. *antemballō*=to make an inroad in turn, to attack in turn; *anti*=corresponding to; *emballō*=to throw in; *en*=in; *ballō*=to throw.] Bestowed in reparation of a loss.

"Offenses against antembletic trust."—*Bowring: Bentham's Principle of Morals and Legisl.*, ch. xviii., Note 4, § liv.

ăn-tě-mēr-īd'-ī-an, *a.* [Lat. *ante*, and Eng. *meridian*.] Before the time at which the sun comes to the meridian, that is, before noon.

¶ It is usually contracted into *a. m.* or *A. M.*

ăn-tě-m-ēt'-ic, *a. & s.* [Gr. *anti*=against, and Eng. *emetic* (q. v.).]

1. *As adjective*: Fitted to act in a manner opposite to that in which an emetic does; in other words, fitted to check, instead of produce, vomiting. (*Quincey*.) The same as ANTI-EMETIC, *adj.* (q. v.).

2. *As substantive*: A medicine fitted to check vomiting. The same as ANTI-EMETIC, *s.* (q. v.)

ăn-tě-mō-sā'-ic, *a.* [Lat. *ante*=before, and Eng. *Mosaic*.] Before the time of Moses.

ăn-tě-mūn'-dāne, *a.* [Lat. *ante*, and Eng. *mundane*.] Before the creation of the world.

ăn-tě-mū-r-al, *s.* [In Sp. *antemural*, *antemurala*, *antemuro*; Ital. *antemurale*.] From Lat. *ante*=before, and *murus*=a wall.] A barbican consisting of a high and strong wall with turrets built in front of the gateway in old castles, and designed for its defense.

ăn-tě-nāt-ēd, *a.* [Lat. *ante*=before; and *natus*, *pa. par.* of *nascor*=to be born.] Before the proper time.

ăn-tě-Nī-çē-ne, *a.* [Lat. *ante*, and Eng. *Nicene*.] Before the meeting of the first Christian council which took place at Nice in A. D. 325. (The term is applied to the first three Christian centuries, but not to any period of greater antiquity.)

ăn-tě-n-æ, *s. pl.* [Lat. *pl.* of *antenna*=a sail-yard; Fr. sing. *antenne*; Port. *pl.* *antennas*; Ital. sing. *antenna*.]

Entom.: The organs of insects, placed nearly in the same position as horns in ruminating quadrupeds. The antennæ are two in number, and are perhaps always present, though in some few genera they are so inconspicuous that these have been considered acerous [ACEROUS], or "without horns," while to the great mass of insects the term *dicerous* [DICEROUS], "two-horned," has been applied. The antennæ vary greatly in length, in form, in texture, and in the number of joints which they possess. They are organs of touch and probably of hearing.

ăn-tě-n'-nāl, *a.* [Lat. *antenna*; Eng. -al.] Pertaining to the antennæ of an insect, or an animal of similar organization.

" . . . the antennal nerve . . ."—*Owen: Invertebrata* (1843), Lect. xvi., p. 211.

ăn-tě-n-ā-r'-ī-a, *s.* [Lat. *antenna*=(1) a sail-yard; (2) one of the two horn-like appendages to the head of an insect. The *Antennaria* genus of plants

is so called from the resemblance which the hairs of the pappus in the sterile florets bear to the antenna of an insect.]

Botany:

1. Everlasting, a genus of plants belonging to the order Asteraceæ, or Compositæ. The *A. dioica*, Mountain Everlasting, or Cat's Foot, is indigenous to, and the *A. margaritacea*, or Pearly Everlasting of North America, naturalized in, Britain. The former, which is abundant on mountain-heaths, has cottony stems and white or rose-colored flowers. The latter, called in France and elsewhere *immortelles*, are often made into wreaths to be laid on the graves of deceased relatives. They may be often seen either in their natural hue, or dyed of bright colors, as ornaments in rooms.

2. A fungus of the tribe Physomycetes. The species may be seen hanging from the roof of wine vaults and enveloping the casks and bottles below.

ăn-tě-n-ā-r'-ī-ūs, *s.* [Lat. *antenna*=a sail-yard.]

Zool.: A genus of spiny-finned fishes akin to the Fishing Frogs (*Lophius*). The Walking-fish (*A. hispidus*) is an exceedingly grotesque-looking animal. It is a native of the Indian seas.

ăn-tě-n-īf'-ēr-ō-ūs, *a.* [Lat. *antenna*=a sail-yard; *fero*=to bear.] Bearing antennæ.

ăn-tě-n-ī-form, *a.* [Lat. *antenna*=a sail-yard; *forma*=form, shape.] Shaped like the antenna of an insect.

ăn-tě-n-ū-l-ā-r'-ī-a, *s.* [Lat. *antenna*, the dimin. -ul, and the suff. -aria.] A genus of Zoöphytes belonging to the family Sertulariadae. It includes the two species, *A. antennina* and *A. ramosa*.

ăn-tě-nūm-bēr, *s.* [Lat. *ante*, and Eng. *number*. In Sp. *antenombre*.] A number preceding another one.

"Whatsoever virtue is in numbers for conducting to consent of notes, is rather to be ascribed to the *ante-number* than to the entire number, as that the sound returneth after six or after twelve, so that the seventh or thirteenth is not the matter, but the sixth or the twelfth."—*Bacon*.

ăn-tě-nūp'-tial, *adj.* [Lat. *antenuptialis*.] Before marriage.

ăn-tě-p-āg-mēnt (Eng.), **ăn-tě-p-āg-mēn'-tūm** (Lat.), *s.* [Lat. *antepagamentum*=the jamb of a door: *ante*=before, in front of, and *pagamentum*=a joining together; *pag*, root of *pango*=to fasten or fix.]

Architecture:

1. One of the jambs of a door.

2. The ornamented architrave of a doorway.

¶ The plural may be *antepagments* or *antepagmenta*. The latter is the more common.

ăn-tě-p-ās'-chāl, *a.* [Lat. *ante*=before, and *paschalis*=pertaining to the passover or to Easter; from *pascha*, in Gr. *pascha*=the passover; Heb. *pesach*=indulgence, immunity from punishment, but more frequently (1) the paschal lamb, (2) the festival of the passover; *pasach*=to pass over (Exod. xii. 27).]

1. Before the passover.

2. Before Easter, which nearly coincided in time with the passover.

"The dispute was very early in the Church concerning the observation of Easter; one point whereof was, concerning the ending of the *antepaschal* fast, which both sides determined upon the day they kept the festival."—*Nelson: Fasts and Festivals*.

ăn-tě-p-āst, *s.* [In Ital. *antipasto*. Lat. *ante*=before, and *pastus*, *pa. par.* of *pasco*, *pavi*, *pastum*=to feed.] A foretaste.

ăn-tě-p-ēn'-dī-ūm (Lat.), **ăn-tě-p-ēnd**, **ăn-tī-p-ēnd** (Scotch), *s.* [Mediæv. Lat. *antependium*.] The frontal of an altar [FRONTAL]; a rest or screen for covering the front of an altar. It is used in some Roman Catholic churches, especially on festival days.

"Item, one antepend of black velvet."—*Coll. Inventories* (1542). (*Jamieson*.)

ăn-tě-p-ēn'-ūl't (*pl.* **ăn-tě-p-ēn'-ūl'-tī-m-ə**), *s.* [In Fr. *antépénultième*; Sp., Port. & Ital. *antepenúltimo*; Lat. *ante*=before, and *penultimus* or *penultimus* (*s.*) the penult, (*a.*) the last but one; *pene* or *pene*=almost, and *ultimus*=the last.] The syllable before the penultimate one. As the penultimate one is next to the last, the antepenultimate is two from the last, as *cin* in *vaccination*. The word is really only a shortened form of the following.

ăn-tě-p-ēn'-ūl'-tīm-āte, *a. & s.* [In Fr. *antépénultième*.]

A. As adj.: Pertaining to the last syllable but two. (*Crabb*.)

B. As subst.: The last syllable but two.

ăn-tê-r-î-ôr, *ăn-tê-r-î-ôur, a. [Lat. *anterior*=before, preceding. In Fr. *antérieur*; Sp. & Port. *anterior*; Ital. *anteriore*.]

I. *Ordinary Language*:

1. Situated before anything in place. (In this and the second signification it is opposed to *posterior*.) (For example, see No. II.)

2. Preceding in time.

II. *Technically*: Used chiefly in sense No. I., in Anatomy, Zoology, Botany, and Science generally.

"Hence, if after the *anterior* face has received the heat from one radiating source, a second source, which we may call the compensating source, be permitted to radiate against the posterior face . . ."—Tyndall: *Frag. of Science* (3d ed.), viii. 4, p. 181.

In *Anatomy*:

Anterior chamber of the eye. [CHAMBER, EYE.]

Anterior or frontal "horn" of the brain. [HORN.]

Anterior pillars of the fornix. [PILLARS, FORNIX.]

Anterior pyramids of the brain. [PYRAMID.]

ăn-têr-î-or-î-tỹ, s. [Eng. *anterior*; -ity. In Fr. *antériorité*; Sp. *anterioridad*; Port. *anterioridade*; Ital. *anteriorità*.] The state of being before in place or in time.

"Our poet could not have seen the prophecy of Isaiah, because he lived 100 or 150 years before that prophet; and this *anteriority* of time makes this passage the more observable."—Pope: *Iliad*, xix., note, v. 93.

ăn-tê-r-î-ôr-lỹ, adv. [Eng. *anterior*; -ly.] In an anterior situation.

"Anteriorly the presphenoid narrows to a sharp vertical edge."—Flower: *Osteol. of the Mammalia* (1870), p. 123.

ăn-têr-ô, in compos. [From Lat. *anterior*=which is before; *ante*=before.]

antero-lateral, a. That which is anterior, and also lateral; that is, to the side.

"All that is anterior to the posterior horn [of the gray crescent belonging to the spinal cord] is called the *antero-lateral column*."—Todd & Bowman: *Physiol. Anat.*, vol. i., p. 256.

antero-posterior, a. Commencing in the anterior part of an organic structure and continued through it, so as to appear also on the posterior part, or in a direction from behind forward.

"When the medulla oblongata is divided vertically along the median plane, a series of fibers is seen to form a septum between its right and left half. These fibers take a direction from before backward; and appear to connect themselves with the posterior olivary fibers. They are limited inferiorly by the decussating fibers. Cruveilhier proposes for them the name *antero-posterior* fibers. They appear to belong to the same system as the arciform fibers."—Todd & Bowman: *Physiol. Anat.*, vol. i., p. 269.

ăn-tê-rôm, s. [Eng. *ante* (from Lat.), in compos.=before, and Eng. *room*.] A room before or in front of another one.

"An anteroom in the Duke's palace."
Shakesp.: *Two Gent. of Ver.*, Stage Dir.

ăn-têr-ô's, s. [Gr. *anterôs* or *Anterôs*=return-love, love for love. (*Personified*.)] (1) A "god" who avenged slighted love; (2) a "god" who struggled

against Eros, the personification of love. In Latium *Anteros* signified a kind of amethyst (*Pliny*).] A being poetically imagined to struggle against love.

ăn-tê-stôm-ach, s. [Eng. *ante* (fr. Lat.), in compos.=before, and *stomach*.]

An anterior cavity leading into the stomach. It occurs in birds which feed on fishes.

"In birds there is no mastication or comminution of the meat in the mouth, but it is immediately swallowed into a kind of *antestomach*, which I have observed in piscivorous birds."—Ray.

ăn-tê-têm-ple, s. [Eng. *ante* (from Lat.), in compos.=before, and *temple*.] (For def. see example.)

"Of the ancient churches there was a twofold division. If we take it in the stricter sense, it includes only the buildings within the walls, which were the "narthex" or *antetemple*, where the penitents and catechumens stood; the "naos" or temple, &c."—*Christian Antiquities*, i. 229.

***ăn-tê-teûme, s.** [ANTHEM (?).] (Scotch.)

***ăn-tê-vêrt, v. t.** [Lat. *antevertō*=to take one's turn before another; *ante*=before, and *verto*=to turn.] To prevent.

"To *antevert* some great danger to the public, to ourselves, to our friend, we may and must disclose our knowledge of a close wickedness."—Bp. Hall: *Cases of Conscience*, Add C. 3.

ăn-tê-vêrt-îng, pr. par. & s. [ANTEVERT.]

As substantive: Preventing, prevention.

"It is high time to mourn for the *anteverting* of a threatened vengeance."—Bp. Hall: *Rem.*, p. 157.

ăn-tê-vîr-gîl'-î-an, a. [Gr. *anti*=against; Eng. *Virgilian*=pertaining to the poet Virgil.]

ăn-thê-mor-rhăg'-îc, a. [Gr. *anti*=against, and *haimorrhagikos*=pertaining to hæmorrhage; *haimorrhagia*=hæmorrhage; *haima*=blood, and *rhêgnumi*=to break or break through; 2 aor. *errhagên*.]

Pharm.: Deemed of use against hæmorrhage, meaning a flux of blood.

ăn-thê-lî-on, s. [Gr. *anthêlios*=a later form of *antêlios*=opposite to the sun; but it is now used for *instead of the sun*: *anti*=instead of, and *hêlios*=the sun.] A mock sun; the representation, by an optical deception, of one or more pseudo-suns in the sky besides the actual one.

ăn-thê-lix, s. [Gr. *anti*=opposite to, and *helix*=anything spiral; *helix*=twisted, curved; *helissō*=to turn round or about; *eileō, eilō*=to roll up.]

Anat.: The curved elevation within the helix or rim of the external portion of the ear. It surrounds the concha or central cup. Above it bifurcates so as to include a fossa. (Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 66.)

ăn-thêl-mîn'-tîc, a. & s. [In Fr. *anthelmintique*; Port. *anthelmintico*; Gr. *anti*=against, and *helmins*, genit. *helminthos*=a worm, especially a tapeworm.]

1. *As adjective*: Capable, or believed to be capable, of killing and expelling intestinal worms from the human frame.

2. *As substantive*: A medicine given against intestinal worms. The chief intestinal worms found in the human body are the Long Thread Worm (*Trichocephalus dispar*) in the upper part of the large intestines; the Common Tape-worm (*Tenia soleum*), the Broad Tape-worm (*Bothriocephalus latus*), and the Large Round Worm (*Ascaris lumbricoides*), in the small intestines; and the Maw or Thread Worm (*Oxyuris* or *Ascaris vermicularis*), in the rectum. Of these the most frequent are the common tapeworm, the large round worm, and the maw or thread worm. Garrod makes anthelmintics, defined as substances which have the power of destroying the life of entozoa in the alimentary canal, the fourth order of his Class IV., Sub-class I., and subdivides it into Direct Anthelmintics, or Vermicides; Indirect Anthelmintics, or Vermifuges; and Worm Preventives. Among direct anthelmintics may be enumerated oil of male fern, oil of turpentine,

koussou, kamela, and bark of pomegranate root; of vermifuges, calomel, scammony, jalap, gamboge, and castor-oil; and of worm preventives, sulphate of iron or other ferruginous salts, quassia, and nuxvomica. (Garrod: *Mat. Med.*)

ăn-thêm, *ăn-thême, *ăn-tê-thême, *ăn-tê-tême, *ăn-têm (Eng.), *ăn-tê-teûme (Scotch), s. [In A. S. *antefen*=a hymn sung in alternate parts, an anthem; O. Fr. *anthame, antene, antienne, antevne*; Prov. *antifena, antifona*; Sp. & Ital. *antifona*; Low Lat. *antiphona*; from Gr. *antiphōnon*=an antiphon, an anthem; *antiphōnos*=sounding contrary, . . . responsive to: *anti*=opposite to, contrary to; *phōnē*=a sound, a tone.]

*1. *Originally*: A hymn sung "against" another hymn; in other words, a hymn in alternate parts, the one sung by one side of the choir, the other by the other.

"Anthem, a divine song sung alternately by two opposite choirs and choruses."—Glossog. Nov., 2d ed. (1719).

[See also example under ANTHEM-WISE.]

2. *Now*: A portion of Scripture or of the Liturgy, set to music, and sung or chanted. There are three kinds of anthems: (1) A verse anthem, which in general has only one voice to a part; (2) a full anthem with verse, the latter performed by single voice, the former by all the choir; (3) a full anthem, performed by all the choir. Anthems were introduced into the English Church service in the time of Queen Elizabeth, and among those who have distinguished themselves in this kind of composition, may be mentioned Tallis, Farrant, Orlando Gibbons, Blow, Purcell, Michael Wise, Jeremiah Clark, Croft, Greene, Boyce, Nares, as well as many modern writers.

" . . . the thanksgiving sermons and thanksgiving anthems."—Macaulay: *Hist. Eng.*, ch. xxiii.

anthem-wise, adv. After the manner of an anthem.

"Several quires placed one over against another, and taking the voice by catches, *anthem-wise*, give great pleasure."—Bacon: *Essays, Civ. and Mor.*, ch. xxxvii.

ăn-thêm-îs, s. [In Fr. *anthemis*; Lat. *anthemis*; and Gr. *anthemis*=chamomile; *antheō*=to blossom; *anthos*=a blossom, a flower. The anthemism is so called apparently from the copiousness of its bloom.] A genus of plants belonging to the order Asteraceæ, or Compositæ. It contains the Common Chamomile (*A. nobilis*). The flower-buds constitute the chamomile of the shops. Cattle eat it with avidity. As a medicine it is tonic and stimulating. A warm infusion of it excites vomiting. The true chamomile plant has a fine smell, in this differing from another common species of anthemism, the *A. cotula*, or "Stinking Chamomile." The latter plant, moreover, is erect, whereas the former is prostrate.

ăn-thêr, s. [In Fr. *anthère*; Lat. *anthera*=a medicine composed of flowers; Gr. *anthêros*=flowery, blooming; *antheō*=to blossom, to bloom; *anthos*=a blossom, a flower.]

Bot.: An organized body constituting part of a stamen, and generally attached to the apex of the filament. As a rule, it is composed of two parallel lobes or cells; sometimes, however, there are four, and sometimes only one. The cells are united by the connective, and contain pollen. When the time for shedding it arrives, the anthers burst generally by a longitudinal fissure from the base to the apex, but in some plants in other ways. The anther is the *theca* of Grew, the *capsula* of Malpighi, the *apex* of Ray, the *testiculus* or *testis* of Vaillant, the *capitulum* of Jungius, and the *spermatocystidium* of Hedwig.

Anther-dust: The pollen from an anther. It constitutes a yellow dust, which, when it falls from the atmosphere, has often been mistaken for a shower of sulphur. It is very copious in the Coniferæ.

ăn-thêr-âl, a. [Eng. *anther*; -al.] Pertaining to a single anther of a plant, or to the anthers collectively.

ăn-thêr-ê'-a, s. [From Lat. *anthera*.] [ANTHER.] A genus of moths of the family Bombycidae. The *A. Paphia* is the Tusser or Tusseh of the Bengalese, which furnishes a kind of (silk used by the natives of India in the manufacture of cloth for dresses.

Antes at Herculaneum.

Anthers.

1. Geranium lucidum. 2. Lime.
3. Lily.

bôil, bôy; pout, jôwî; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. ph = f.

ăn-thěr-ĩ-cũm, s. [In Dut. *anthericum*; Fr. *anthéric*; Sp., Port., & Ital. *anteriorico*, *anthericos*; Gr. *antherikos*.] A genus of plants belonging to the order Liliaceæ, or Lilyworts. The *A. ramosum* is considered to be diuretic.

ăn-thěr-ĩd-ĩ-ũm (plur. **ăn-thěr-ĩd-ĩ-ũ**), s. [Lat. *anthera*, and dimin. *-idium*.]

Bot.: A term used by some cryptogamic botanists in describing certain obscure organs in the Mosses, Jungermanniaceæ, and Hepaticæ. In mosses the antheridia are cylindrical, articulated, clavate membranous bodies opening by an irregular perforation at the apex, and discharging a mucus granular fluid. Some contain spermatie animalcules apparently vibrios. Organs somewhat similar are found in Jungermanniaceæ and Hepaticæ in the axillæ of the perichætal leaves. Lindley objects to the word *antheridia*, as suggesting an analogy with *anthers*, properly so called, which has not been made out.

ăn-thěr-ĩf-ěr-ũs, a. [Lat. *anthera*; and *fero* = to bear.] Bearing anthers.

ăn-thěr-ũg-ẽn-ũs, a. [Eng. *anther*, and Gr. *geinomai* = to be engendered.] Engendered from anthers. Applied to such double flowers as have anthers transformed on the principles of morphology into petals.

ăn-thěr-ũd, a. [Eng. *anther*, and Gr. *eidōs* = appearance.] Presenting the appearance of an anther.

ăn-thěr-ũz-ũd, s. [Gr. *anthēros* = flowery, blooming; *zōōn* = a living being, an animal; *eidōs* = appearance.] A spermatozooid; one of the minute bodies in the antheridia of cryptogamic plants, analogous to spermatozoa in animals. [SPERMATOOID.]

"... and with the Algæ, &c., by the locomotive power of the antherozooids."—Darwin: *Descent of Man*, pt. ii., chap. viii.

ăn-thēs-ĩs, s. [Gr. *anthēsis*, the same as *anthē* = a blossom.]

Botany: The time when a flower opens.

Ăn-thēs-tēr-ĩ-ũn, s. [Gr. *Anthēstērion*.] The sixth month of the Athenian year. It was so called because within it there occurred the three days' festival of Dionysos (Bacchus), which was called Anthesteria. The month consisted of twenty-nine days, and corresponded to the latter part of November and the first part of December.

ăn-thĩ-a, s. [From Lat. *anthias*.] [ANTHIAS.] A genus of large predatory beetles belonging to the family Brachnidae. The *A. sulcata* is a native of Senegal.

ăn-thĩ-as, s. [Lat. *anthias*; Gr. *anthias* = a fish (Labrus or Serranus *anthias*).] A genus of spiny-finned fishes belonging to the Percidæ, or Perch family.

ăn-thĩd-æ, s. pl. [ANTHUS.] In the arrangements of Yarrell and others, a family of Dentirostral Birds. [ANTHUS.]

ăn-thĩ-stĩr-ĩ-a, s. [Gr. *anthistēmi* = to stand against. Named from its very stiff stubble.] A genus of plants belonging to the order Gramineæ, or Grasses. The *A. australis* is the Kangaroo-grass of Australia. It is used for fodder, as is the *A. ciliata* in India.

ăn-thũ-bĩ-an, s. [Gr. *anthos* = a blossom, a flower, and *bios* = course of life.] An animal passing its existence on flowers.

ăn-thũ-car-pĩ, s. pl. [Gr. *anthos* = a blossom, a flower, and *karpos* = fruit.] Lindley's fourth class of fruits. He calls them also Collective Fruits, and defines them as those of which the principal characters are derived from the thickened floral envelopes. They are divided into *single* and *aggregated*: the former including the fruits called Diclesium and Sphalerocarpium, and the latter those termed Syconus, Strobilus, and Sorosis.

ăn-thũ-carp-ũs, a. [ANTHOCARPI.] Pertaining to the order of fruits called Anthocarpia.

ăn-thũc-ěr-ũs, s. [Gr. *anthos* = a flower; *keras*, genit. *keratos* = horn.]

Botany: The typical genus of the family Anthoceroteæ (q. v.). *A. lævis* is found in wet places in this country.

ăn-thũ-cěr-ũt-ěr-æ, s. pl. [ANTHOCEROS.]

Botany: A tribe of Hepaticæ.

ăn-thũ-ohæ-r-a, s. [Gr. *anthos*, and *chairō* = to rejoice; rejoicing in flowers.] The name given by Vigors to a genus of insessorial birds belonging to the family Meliphagidæ, or Honey-eaters. The *A. carunculata* of Australia, called by the natives Goo-gwar-ruck, in imitation of its harsh note, and by the settlers Wattled Honey-eater or Brush Wattlebird, frequents the Banksias when they are in flower.

ăn-thũ-sỹ-a-nē, **ăn-thũ-cỹ-an-ĩne**, **ăn-thũ-kỹ-an**, **ăn-thũ-cỹ-an-ĩn**, s. [Gr. *anthos*, and *kuanos*, adj. = dark-blue; *kuanos*, s. = a dark-blue substance.]

Bot.: A blue matter, which Macquart considers to be produced from chlorophyll by the abstraction of water. It is an extractive matter, soluble in water, but not in alcohol. It is stained red by acids, and green by alkalies. It forms the bases of all blue, violet, red, brown, and many orange flowers.

ăn-thũ-dĩ-ũm, s. [Gr. *anthōdēs* = like flowers, flowery, from *anthos* = a blossom, a flower, and *eidōs* = appearance.]

Bot.: The inflorescence seen in the Compositæ. It is the *cephalanthium* of Richard, the *calathis* of Mirbel, and the *calathium* of Nees von Esenbeck.

ăn-thũ-leũ-çĩn, s. [Gr. *anthos* = a flower, and *leukos* = bright . . . white.] The white coloring matter in plants.

ăn-thũ-lite, s. [Gr. *anthos* = a blossom, a flower, and *lithos* = a stone.] A mineral—a variety of Amphibole (q. v.). Dana sums up its constituent elements in calling it Magnesia-Iron Amphibole. It graduates into kupferrite, under which Dana places part of the German *antholith*, assigning another portion of it to anthophyllite.

ăn-thũ-lũg-ĩ-cal, a. [Eng. *anthology*; -ical.] Pertaining to anthology.

ăn-thũl-ũgỹ (1), s. [In Sw. *anthologi*; Dan., Ger., & Fr. *antologie*; Sp. *antologia*; Port. *anthologia*; Gr. *anthologia* = (1) a flower-gathering, (2) a collection of poems: *anthos* = a flower, and *legō* = . . . to gather.]

1. **Gen.**: A gathering of flowers in a metaphorical sense; a collection or gathering together of passages of flower-like beauty from Greek, Roman, or indeed from any classic authors. Though some of these might be in prose, yet the great majority were, as was natural, in poetry, which might be grave or gay, it mattered not; what, above all, was needful was, that whatever the subject treated of, some one prominent thought should be expressed in terse and felicitous language. [EPIGRAM.]

"They are very different from the simple sepulchral inscriptions of the ancients, of which that of Meleager on his wife, in the Greek *anthology*, is a model and masterpiece."—Dr. Warton: *Essay on Pope*, ii. 472.

2. **Spec.** In the Greek Church: A collection of devotional pieces.

ăn-thũl-ũg-ỹ (2), s. [From Gr. *anthos* = a flower; *logos* = a discourse.] A discourse about flowers; a dissertation on flowers.

"*Anthology* (Gr.), a discourse or treatise of flowers."—Glossog. Novæ, 2d ed.

ăn-thũl-ỹz-a, s. [In Dut. *antholyza*; Fr. *antholise*. From Gr. *anthos* = a blossom, a flower, and *lussa* = rage, madness. The flower remotely resembles the mouth of an animal which may be supposed full of rage and about to bite.] A genus of plants belonging to the order Iridaceæ, or Irids.

ăn-thũ-mā-nĩ-a, s. [Gr. *anthos* = a flower, and *mania* = mania; *mainomai* = to rage.] A mania for flowers.

ăn-thũ-mỹ-ĩ-a, s. [Gr. *anthos* = a blossom, a flower, and *muia* = a fly.] A genus of flies, of which one of the best known is the *Anthomyia Brassicæ* (Cabbage-Fly). Its larvæ feed on the roots of cabbages, turnips, &c. In the adult state the male and female are so unlike that they might be mistaken for different insects. Another species, the *A. trimaculata*, the Three-spotted Anthomyia, when in the larva state, also feeds on the roots of turnips; so likewise does the *A. radicum*, or Root Turnip-Fly; while the *A. tuberosa* attacks the tubers of potatoes. (Curtis.) Many species of the genus occur in this country. [ANTHOMYZA.]

ăn-thũ-mỹz-a, s. [Gr. *anthos* = a flower, and *muzō* = (1) to murmur with closed lips, (2) to suck.] The name given by some entomologists to the dipterous genus more commonly called Anthomyia (q. v.).

ăn-thũ-mỹ-zĩ-dæ, s. pl. [ANTHOMYZA.] A family of dipterous insects, of which Anthomyia is the typical genus.

Ăn-thũ-nĩ-anş (h silent), s. pl. [From the monk Anthony.]

Church Hist.: An order of monks said to have been founded by St. Anthony about A. D. 324.

Ăn-thũn-ỹ's fire (h silent), s. [SAINT ANTHONY'S FIRE, ERYSIPELAS.]

ăn-thũph-ĩl-a, s. pl. [Gr. *anthos* = a blossom, a flower, and *philos* a. = (1) beloved; (2) poet., loving, fond; s., a friend.] "Flower lovers." A division of Hymenopterous insects established by Latreille, and still recognized. It contains the Bees. [BEE.] It is divided into two families, Apidæ and Andrenidæ.

ăn-thũph-ør-a, s. [Gr. *anthos* = a flower, and *phoreō* = to bear or carry.] A genus of Bees, family Apidæ. *A. retusa* is the Mason-bee (q. v.).

ăn-thũ-phũre (Eng.), **ăn-thũph-ør-ũm** (Mod. Lat.) s. [From Gr. *anthophoros* = bearing flowers; *anthos* = a flower, and *phoreō* = to bear.]

Botany: The name given by De Candolle to the lengthened internode below the receptacle in Caryophyllæ which bears the petals and stamina at its summit. (Lindley: *Introd. to Botany*.)

ăn-thũph-ỹl-lite, s. [In Dan. & Sw. *anthophyllit*. Schumacher, as quoted by Dana, says that it was derived from Lat. *anthophyllum* = the clove, and so named from its clove-brown color.] A mineral placed by Dana under his Amphibole group and sub-group of Bisilicates. It is orthorhombic, and usually lamellar or fibrous massive; the hardness is 5.5; the sp. gr., 3.1-3.22; the luster, pearly; color, brownish-gray, yellowish-brown, or brownish-green. It is translucent, or nearly so, brittle, and possesses double refraction. Composition: Silica, 56 to 56.74; alumina, 2.65 to 3; protoxide of iron, 13 to 14.13; protoxide of manganese, 0.91 to 4.0; magnesia, 23 to 24.35; lime, 1.51 to 2; and water, 1.67 to 2.38. Occurs in mica schist in Norway.

Hydrous anthophyllite: According to Dana, an altered asbestiform tremolite.

ăn-thũph-ỹl-lĩt-ĩc, a. [Eng. *anthophyllite*; -ic.] Pertaining to anthophyllite; containing more or less of it in composition with some other substance.

ăn-thũr-ĩsm, (Eng.), **ăn-thũr-ĩş-mũs**, s. [Gr. *anthesis* = a counter-definition; *anti* = against, and *horismos* = (1) a marking out by boundaries; (2) the definition of a word: from *horizō* = to divide or separate.]

Logic & Rhetoric: A counter definition; a definition different from, and counter to, that made by one's adversary.

ăn-thũ-sĩd-ěr-ĩte, s. [From Gr. *anthos* = a blossom, a flower; *sidēros* = iron.] A mineral placed by Dana in the Appendix to his Bisilicates. It occurs in fibrous tufts, or feathery-looking flowers. The hardness is 6.5; the sp. gr., 3; the luster, silky; the color, yellow, yellowish-brown, or white. Composition in one specimen: Silica, 60.3; sesquioxide of iron, 35.7; and water, 4. Found in the province of Minas Geraes, in Brazil.

ăn-thũ-sũ-mā, s. [Gr. *anthos* = . . . a flower, *sōma* = a body.] A genus of Entomostracans. [ANTHOSOMADÆ.]

ăn-thũ-sũ-mā-dæ, s. pl. [ANTHOSOMA.] A family of Entomostracans, of the order Siphonostomata, and the tribe Pachycephala.

ăn-thũ-spēr-mẽ-æ, s. pl. [Gr. *anthos* = . . . flower, and *sperma* = seed.] A section of the Cinchonaceous order of plants.

ăn-thũ-spēr-mũm, s. [In Fr. *anthosperme*; Sp., Port., and Ital. *antospermo*; Gr. *anthos* = a flower, and *sperma* = seed.] A genus of plants belonging to the order Cinchonaceæ, or Cinchonads. *A. æthiopicum* is the Ethiopian amber-tree. [AMBER-TREE.]

ăn-thũ-tăx-ĩs, s. [Gr. *anthos* = a flower, and *taxis* = an arranging; *tassō* = to arrange.]

Botany: The arrangement of flowers in the several kinds of inflorescence.

ăn-thũ-tỹpe, s. [Gr. *anthos* = a blossom, a flower, and *typos* = a blow, the mark of a blow, . . . a type, &c.] [TYPE.] A generic term for papers impregnated with the colored juices of flowers, used for photographic purposes.

ăn-thũ-xăn-thĩne, s. [Gr. *anthos* = a flower, and *xanthos* = yellow.] The yellow coloring matter in plants. It is an extractive resinous substance, soluble partly in water and partly in alcohol or ether. Treated with sulphuric acid it becomes blue. [ANTHOCYANE.] (Lindley: *Introd. to Bot.*)

ăn-thũ-xăn-thũm, s. [In Sp. & Ital. *antoxanto*; Gr. *anthos* = a flower, and *xanthos* = yellow, because the flower-spikes are yellowish, especially when old.] A genus of plants belonging to the order Gramineæ, or Grasses. It has but two stamina, whereas three is all but the universal number among grasses. The *A. odoratum*, or Sweet-scented Vernal Grass, flowers in May and June. The sweet scent is more conspicuous when the plant is dying than when it is fresh. It has been attributed to benzoic acid.

ăn-thũ-zũ-a, s. pl. [Gr. *anthos* = a flower, and *zōōn* = a living being, an animal.] A class of Zoophytes now more commonly called Actinozoa (q. v.). Johnston divides his Zoophytes into Anthozoa and Polyzoa, the former again subdivided into Hydroida, Asteroidea, and Helianthoida. (Johnston: *Brit. Zoophytes*, 1867.) Another classification places under the Anthozoa the eight following families: Actiniadæ, Zoanthidæ, Xeniidæ, Alcyonidæ, Pennatulidæ, Tubiporidæ, Caryophyllidæ, and Gorgoniadæ.

ăn-thũ-çũne, s. [Gr. *anthrax*, genit. *anthrakos* = coal.]

Chemistry: $C_{14}H_{10} = C_6H_4 < \begin{array}{c} CH \\ | \\ CH \end{array} > C_6H_4$. Obtained

by the fractional distillation of the coal tar boiling above 360°. It crystallizes in monoclinic plates; it is slightly soluble in alcohol, but dissolves readily

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôt, or, wôre, wôlf. wôrck, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trỹ, Sýrian. æ, œ = ê; ey = â. qu = kw.

benzene; it melts at 213°, and boils at 362°. It can be formed along with benzyl-toluene by heating in sealed tubes to 180° a mixture of benzyl chloride and water.

ān-thrāç'-i-dæ, *s. pl.* [ANTHRAX.] A family of dipterous insects belonging to the section Tanystomata, but having shorter probosces than its immediate allies.

ān-thrā-çite, *s.* [From Gr. *anthrakitēs*=resembling, or of the nature of, coal; *anthrax*, genit. *anthrakos*=coal.] In Dana the first variety of Mineral coal. Called also Glimmer coal. Hardness 2 to 2.5; sp. gr. 1.32 to 1.7; luster submetallic, iron-black, often iridescent. It contains from 80 to 94 per cent. of carbon, and burns with a pale, feeble flame.

Free-burning anthracite: A variety of anthracite intermediate between the typical kind and bituminous coal.

ān-thrā-çit'-ic, *a.* [Eng. *anthracite*; suff. *-ic*.] Pertaining to anthracite; composed in whole or in part of anthracite.

ān-thrāç'-it-ous, *a.* [Eng. *anthracite*; *-ous*.] The same as ANTHRACITIC (q. v.). (*Edin. Rev.*)

ān-thrāç'-ōn-ite, *s.* [From Gr. *anthrax*=coal.] A mineral, a variety of Calcite. The name has been specially applied to—

1. Black marble; marble colored by the carbonaceous matter arising from the remains of the animal and vegetable organisms inhabiting the old sea from which the carbonate of lime forming the calcite was derived. Marbles of this type are called also Lucullan and Lucullite (q. v.).

2. Black bituminous fetid limestone. From their odor they have been named also Swinestones and Stinkstones.

ān-thrā-cō-thēr'-i-ūm, *s.* [Gr. *anthrax*, genit. *anthrakos*=coal or charcoal; and *therion*=a beast, especially one of the kinds hunted; properly dimin. from *thēr*=a wild beast, a beast of prey.] A fossil mammal of the Pachydermatous order, named from the fact that it was first found in tertiary lignite or brown coal.

"The Dinotherium and Narrow-toothed Mastodon, for example, diminish the distance between the Lophiodon and Elephant; the *Anthracotherium* and Hippophysis that between Chæropotamus and Hippopotamus."—*Owen: British Fossil Mammals and Birds* (1846), pp. xxi, xxii.

ān-thrāç-ō-xēn'-ite, **ān-thrāç-ō-xē-ne**, *s.* [In Ger. *anthracoxen*; Gr. *anthrax*=coal; *xenos*=foreign, a foreigner; suff. *-ite*=Gr. *itēs*=of the nature of.] A mineral classed by Dana in his sixth, a yet unnamed group of Oxygenated Hydrocarbons. It is obtained as a black powder from a resin-like mineral between layers of coal in Bohemia. Its composition is, carbon 75.274, hydrogen 6.187, and oxygen 18.539. It is insoluble in ether.

ān-thrān-il'-ic, *a.* [Gr. *anthrax*=coal; Eng. &c., *anil*=a plant.] [ANIL.]

anthranilic acid. [CARBANILIC ACID.]

ān-thrā-quin'-ōne=oxyanthracene, *s.*

Chemistry: $C_{14}H_8O_2 = C_6H_4 < \begin{array}{c} CO \\ | \\ | \\ OC \end{array} > C_6H_4$.

Obtained by boiling anthracene with dilute H_2SO_4 and potassium dichromate. It crystallizes from hot nitric acid in pale yellow needles, melting at 273°.

ān-thrāx, *s.* [In Fr. *anthrax*; Port. *anthraz*; Gr. *anthrax*=coal or charcoal, . . . a carbuncle.]

*1. *Old Med.*: A carbuncle.

2. *Entom.*: A genus of dipterous insects, the type of the family Anthracidæ (q. v.).

ān-thrīs'-cūs, *s.* [Lat. *anthriscus* (Pliny); Gr. *anthrískos*=the southern chervil (*Scandix australis*).] A genus of plants belonging to the order Apiaceæ (Umbellifers).

ān-thrōç'-ēr-a, *s.* [Gr. *anthrax*=coal; *keras*=a horn.] A genus of hawk moths, Sphingides, the typical one of the family Anthroceridæ.

ān-thrō-çēr'-i-dæ, *s. pl.* [ANTHROCERA.] A family of Sphingides. The species fly by day, and are brightly and beautifully colored. The Burnet Moths and the Green Forester belong to the family. It is called also Zygaenidæ.

ān-thrōp'-ic, *a.* [Gr. *anthrōpikos*.] Man-like, resembling man; human.

ān-thrōp'-i-dæ, *s. pl.* [Gr. *anthrōpos*=a man.] In Prof. Huxley's classification the first family of the order Primates, which stand at the head of the class Mammalia. There is but one species, the *Homo sapiens*, or Man. The dentition

is as follows: Incisors, $\frac{2-2}{2-2}$; canines, $\frac{1-1}{2-2}$; premolars, $\frac{2-2}{3-3}$; molars, $\frac{3-3}{3-3}$ =32. In the Simiadæ there is some-

times the same dentition, though in other cases the premolars are $\frac{3-3}{3-3}$ in place of $\frac{2-2}{2-2}$. The hallux is

nearly as long as the second toe, and is susceptible of being moved both backward and forward only to a

very limited extent, whereas in the Simiadæ it is much more mobile. In Man the arms are shorter than the legs, while in the Simiadæ they may be either longer or shorter. After birth in Man the legs grow faster than the rest of the body, while in the Simiadæ they do not. Man's stature is erect, while the natural attitude of the apes and monkeys is on all fours. (Prof. Huxley's *Classification of Animals*, p. 99.) Man has a higher facial angle and a brain of greater volume than the monkeys, and his mental and moral powers are infinitely greater.

ān-thrō-pō-gēn'-i-sis, *s.* [Gr. *anthropos*=man, and *genesis*=generation.] The genesis or evolution of man, racially or individually.

ān-thrō-pō-glōt, (*Eng.*), **ān-thrō-pō-glōt'-tūs** (*Mod. Lat.*), *s.* [Gr. *anthrōpoglōssos*, in Attic *anthrōpoglōttos*=speaking man's language; *anthrōpos*=man, and *glōssa*, in Attic *glōtta*=the tongue.] An animal possessing a tongue, *i. e.*, speech remotely resembling man's. Example, the imitative species of the Parrot family of Birds.

ān-thrō-pōg'-raph-ŷ, *s.* [Gr. *anthrōpos*=man, and *graphē*= . . . a description; *graphō*=to grave, . . . to write. A writing about man. A description of man.] A science which investigates the geographical distribution of mankind, noting the physical character, the languages, the customs, and the religious tenets and observances of the several races distributed over the globe. When the historic element receives prominence, anthropology becomes ethnography or ethnology. It is a branch of the great science of Anthropology (q. v.).

ān-thrō-pōid, *a.* [Gr. *anthrōpoidēs*=in the shape of a man; *anthrōpos*=a man, and *eidōs*= . . . form; from *eidō*=to see.] Resembling man; a term applied especially to the apes, which approach the human species in the following order: 1st (most remote), the gibbons; 2d, the orangs; 3d, the chimpanzee; and 4th (nearest), the gorilla. (*Owen: Classif. of the Mammalia*, 1859, p. 84.)

" . . . only in the very highest and most *anthrōpoid*, viz., the gorilla and the chimpanzee."—*Owen: Classif. of the Mammalia*, p. 78.

ān-thrō-pōi'-dēs, *s.* [ANTHROPOID.] A genus of wading birds, belonging to the sub-family Gruinæ. *A. virgo* is the Numidian Crane.

ān-thrōp'-ō-līte, *s.* [Gr. *anthrōpos*=man; and *-līte*=Gr. *lithos*=a stone.] Man petrified, as in the Guadalupe specimen now in the British Museum.

ān-thrō-pō-lōg'-i-cal, *a.* [In Ger. *anthropologisch*; from Gr. *anthrōpologos*=speaking or treating of man.] (For an extended investigation of the etymology, see Prof. Turner in Brit. Assoc. Rep. for 1871, pt. ii., pp. 144-146.) Pertaining to the science of anthropology.

ān-thrō-pōi'-ōg-ist, *s.* [In Ger. *anthropolog.*] One who cultivates the science of anthropology.

" . . . the comparative study of the arts of different races, in different conditions of culture, must continue to hold a prominent place amongst the researches of *anthropologists*."—*Col. Lane Fox: British Assoc. Rep. for 1872*, pt. ii., p. 171.

ān-thrō-pōi'-ō-gŷ, *s.* [In Ger. & Fr. *anthropologie*; Port. *anthropologia*. From Gr. *anthrōpos*=man; and *logos*= . . . discourse.]

I. *Natural science*:

1. *Gen.*: The science of man in the widest sense of the term. The word *anthropology* has been variously defined as: "The doctrine of anatomy; the doctrine of the form and structure of the body of man." "A discourse or description of a man or of a man's body." Kant gave a much wider range than this to the subject in his *Anthropologie*, published about the year 1798, as he had previously done orally in his university lectures. Finally, its aim is "to study man in all his leading aspects, physical, mental, and historical; to investigate the laws of his origin and progress; to ascertain his place in nature, and his relation to the inferior forms of life." In this sense ethnology is a department of anthropology.

2. *Spec.*: The science which investigates the relation in which man stands to the inferior animals. In this sense ethnology is a cognate science to anthropology.

ān-thrō-pō-mān-cŷ, *s.* [Gr. *anthrōpos*=a man, and *manteia*=power, or mode of divination; *manteuomai*=to divine; *mantis*=one who divines, a seer.] Fancied divination by examining the inward parts of a human being.

ān-thrō-pō-mēt'-ric, *a.* [ANTHROPOMETRY.] Of, or pertaining to, anthropometry.

ān-thrō-pōm'-ē-trŷ, *s.* [Gr. *anthrōpos*=man, and *metron*=a measure.] The measuring or measurement of man, that is, of man's bodily frame. However, not the body, but "the mind's the standard of the man."

ān-thrō-pō-morph'-ic, *a.* [Gr. *anthrōpomorphos*=of human form; *anthrōpos*=man, and *morphē*=form.] Pertaining to anthropomorphism.]

ān-thrō-pō-morph'-ism, *s.* [In Ger. *anthropomorphism*; Fr. *anthropomorphisme*; Port. *anthropomorphismo*; Gr. *anthrōpomorphia*=human form; *anthrōpos*=man, and *morphē*=form, shape.]

Properly: The attributing of a human form to God. When this is really done it is a gross degradation of the divinity, and is condemned in Scripture. But when the only anthropomorphism is the use of metaphorical phrases, such as the arm of the Lord (Ps. lxxvii. 15), or His eyes (Ps. xi. 4), or His ears (Ps. xxxiv. 15), to make abstract ideas more readily conceivable, the practice has the countenance of Scripture itself. There are thus in this sense a legitimate and an illegitimate anthropomorphism.

"*Anthropomorphism* is always connected with anthropathism."—*Smith & Wace: Dict. Christ. Biog.*, vol. i., p. 119.

ān-thrō-pō-morph'-ist, *s.* In Ger. *anthropomorphist*.] One who really or apparently attributes to God the human form, or thoughts, emotions, or passions like our own.

ān-thrō-pō-morph'-ite, *s. & a.* [In Fr. *anthropomorphite*; Port. *anthropomorphita*; Gr. *anthrōpomorphos*=of human form.]

A. *As substantive*:

I. *Ordinary Language*: One who attributes to God the human form, or thoughts, emotions, and passions like our own.

" . . . though few profess themselves *anthropomorphites*, yet we may find many amongst the ignorant of that opinion."—*Locke*.

II. *Technically*:

1. *Church Hist. (pl.)*: A sect which arose in Egypt in A. D. 395, and became prominent in the fifth century. They were a subdivision of the Acephali, who again sprung from the Monophysites or Eutychemians. They held anthropomorphism in a gross form. Many individuals also in the Church catholic, and in the sects which had sprung from it, entertained a similar belief. (*Mosheim: Ch. Hist.*, Cent. V., pt. ii., ch. v., § 20.)

"The *Anthropomorphites* who swarmed among the monks of Egypt and the Catholics of Africa . . ."—*Gibbon: Decline and Fall*, ch. xlvii.

2. (*Plur.*) A party (they had scarcely the coherence of a sect) which existed in Italy and elsewhere in the tenth century. They supposed that God possesses a human form, and sits upon a golden throne.

B. *As adjective*: Attributing to God human form, thoughts, or emotions.

"Multitudes could swallow the dull and coarse *anthropomorphite* doctrines."—*Glanville: Præxist of Souls*, ch. iv.

ān-thrō-pō-morph-it'-ic, **ān-thrō-pō-morph-it'-i-cal**, *a.* [Eng. *anthropomorphite*; *-ic*, *-ical*.] Pertaining to anthropomorphism, or to the Anthropomorphites.

ān-thrō-pō-morph-it-ism, *s.* [Eng. *anthropomorphite*; *-ism*.] The system of doctrines characteristic of the Anthropomorphites; an anthropomorphism. [ANTHROPOMORPHISM.]

ān-thrō-pō-morph'-ōse, *v. t.* [Gr. *anthrōpos*=a man, and *morphōō*=to form, to give shape to.] One would expect this verb to mean to change *into* the form of a man; but Davies gives an example from Howell (*Parley of Beasts*, p. 3), in which it evidently=to change *from* the form of a man into that of a beast.

ān-thrō-pō-morph'-ōus, *a.* [In Fr. *anthropomorphe*. From Gr. *anthrōpomorphos*.] Possessed of a form resembling that of man.

"Mr. Lyell, however, in 1830, had remarked that the evidence of the total absence of the *Anthropomorphous* tribe [the *Quadrupana*] was inconclusive."—*Owen: Brit. Fossil Mammals and Birds*, p. 2.

ān-thrō-pō-pāth'-ic, **ān-thrō-pō-pāth'-i-cal**, *a.* [Gr. *anthrōpopathēs*=with human feelings.] Pertaining to human feelings; having human feelings.

ān-thrō-pō-pāth'-i-cal-lŷ, *adv.* [Eng. *anthropopathical*; *-ly*.] In a manner to show the possession of human feelings.

ān-thrō-pōp'-a-thism, *s.* [Eng. *anthropopathy*; *-ism*.] The same as ANTHROPOPATHY (q. v.). (See example under ANTHROPOMORPHISM.)

ān-thrō-pōp'-a-thŷ, ***ān-thrō-pōp'-a-thŷ**, *s.* [In Ger. *anthropopathie*. From Gr. *anthrōpopatheia*=humanity; *anthrōpos*=a man, and *pathē*=a passive state, or *pathos*=anything that befalls one, . . . suffering, emotion; aor. inf. of *paschō*=to receive an impression.]

1. Human feeling, humanity.

"Two ways then may the Spirit of God be said to be grieved, in Himself, in His saints; in Himself, by an *anthropopathie*, as we call it; in his saints, by a *pathie*; the former is by way of allusion to human passion and carriage."—*Bp. Hall: Rem.*, p. 106.

2. *Theol.*: The attributing of human thoughts, emotions, or passions to God. As in the case of

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðhis; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shün; -tjon, -gion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del.

anthropomorphism, this may be legitimate or illegitimate. It is the former if done only figuratively; it is the latter if done really.

(a) *Figuratively*: "And it repented the Lord that he had made man on the earth, and it grieved him at his heart" (Gen. vi. 6).

(b) *Really*: "Thou thoughtest that I was altogether such an one as thyself" (Ps. l. 21).

ăn-thrō-pōph'-a-gī, *s. pl.* [Plural of Lat. *anthropophagus*; Gr. *anthrōpophagos* = a man-eater; *anthrōpos* = man, and *phagein*, from **phagō*, now made 2 aor. inf. of *esthō* = to eat. In Fr. *anthropophage*.] Man-eaters. Cannibals, people feeding on human flesh.

ăn-thrō-pō-phāg'-i-cal, *a.* [Eng. *anthropophagy*; -ical. In Fr. *anthropophage*; Port. *anthropophago*.] Pertaining to anthropophagy; eating human flesh.

ăn-thrō-pōph'-a-gīn'-i-an, *s.* [From Lat. *anthropophagus* (ANTHROPOPHAGI), and the dignified suff. -*inian*; Shakespeare's design being to frame in ridicule a word "of learned length and thundering sound."] A cannibal.

"Go knock and call, he'll speak like an *anthropophaginan* unto thee; knock, I say."—Shakesp.: *Merry Wives*, iv. 5.

ăn-thrō-pōph'-a-goūs, *a.* [In Fr. *anthropophage*. From Gr. *anthrōpophagos*.] Man-eating, cannibal.

ăn-thrō-pōph'-a-gy', *s.* [In Fr. *anthropophagie*. From Gr. *anthrōpophagia*.] Man-eating, cannibalism.

ăn-thrō-pōs'-cōp-ỹ, *s.* [Gr. *anthrōpos* = man, and *skopia* = . . . a looking out; *skopeō* = to look at or after.] An attempt to discover the mental and moral tendencies of any one by studying his bodily characteristics.

ăn-thrō-pōs'-ō-phỹ, *s.* [Gr. *anthrōpos* = man, and *sophia* = skill, higher knowledge, wisdom.] The knowledge of man; the acquisition of wisdom (if such a thing is possible) by the study of mankind.

ăn-thrō-pōt'-ōm-ist, *s.* [Gr. *anthrōpos* = man, and *tōmis*, or *tomeus* = one who cuts.] One who cuts up or dissects a man; an anatomist.

" . . . the large mass of transverse white fibers called 'corpus callosum' by the anthropotomist."—Owen: *Classification of the Mammalia*, p. 22.

ăn-thrō-pōt'-ōm-ỹ, *s.* [Gr. *anthrōpos* = man, and *tōmē* = . . . a cutting; *temnō* = to cut.] The anatomy of man; *i. e.*, the dissection of the human body.

ăn-thrō-pūr'-gic, *a.* [Gr. *anthrōpourgōs* = making man; but intended by Bentham to signify operated on by man; *anthrōpos* = man; **ergō* = to do work.] (For def. see example.)

"Thus Natural History and Natural Philosophy are respectively represented by Physiurgic Somatology and Anthropurgic Somatology; the one signifying the science of bodies, in so far as operated upon in the course of nature, without the intervention of man; the other, the science of bodies so far as man, by his knowledge of the convertible powers of nature, is able to operate upon them."—Bowring: *Bentham's Works*, Intro., § 6, vol. i., p. 16.

ăn-thūs, *s.* [Lat. *anthus*; Gr. *anthos*, masc. = a small bird like a bunting (not *anthos* = a flower, which is neut.).]

Zool.: A genus of birds, the typical one of the family Anthidae, in the Dentirostral tribe, but with affinity, shown by their lengthened hind toe, to the genus *Alauda* (Lark) in the Conirostral one. Some place the genus *Anthus* under the Motacillinae, a sub-family of Sylviidae, or Warblers. The species are called in English Titlarks or Pipits. The *A. arboreus*, or Tree Pipit; the *A. pratensis*, or Meadow Pipit; the *A. petrosus*, or Rock Pipit; and the *A. Ricardi*, or Richard's Pipit belong to the order.

ăn-thỹl-lis, *s.* [In Fr. *anthyllide*; Sp. & Ital. *antillide*; Gr. *anthos* = a flower, and *ioulos* = (1) first growth of the beard, (2) down on plants. So called from its downy calyces.] A genus belonging to the Papilionaceous sub-order of the Fabaceae, or Leguminous plants. It contains one species, the *A. vulneraria*, or Common Kidney Vetch, called also Lady's Fingers. It grows chiefly in the vicinity of the sea. It has from five to nine leaflets and

Anthyllis Vulneraria.

crowded heads of generally red flowers. The roots of a foreign species, the *A. Hermannia*, are diuretic.

ăn-thỹp-nōt'-ic, *a. & s.* [ANTI-HYPNOTIC.]

ăn-thỹp-ō-chōn'-drī-ac, *a. & s.* [ANTIHYPOCHONDRIAC.]

ăn-thỹ-pōph'-ōr-a, *s.* [ANTI-HYPOPHORA.]

ăn-thỹs-tēr'-ic, *a. & s.* [ANTI-HYSTERIC.]

ăn-tī, *prefix* (1). For *antic* (?) in the word ANTI-MASK (q. v.).

ăn-tī, *prefix* (2).

A. [From Gr. *anti*, prep., original meaning = over against . . . ; hence = opposed to. In Greek compo. = (1) over against, opposite to, (2) against, in opposition to; (3) one against another, mutually; (4) in return; (5) instead; (6) equal to, like; (7) corresponding to, counter. (*Liddell & Scott's Greek Lexicon*.) The Greek *anti* = over against, against, is essentially the same word as the Latin *ante* = before; hence there are in Lat. *anticipo* (B.); in Ital. *anticomere* = a forerunner, *antidata* = antedate, *anti-camera* = antechamber; in Sp. *Antechristo*; in Fr. *Antechrist*, *antidate*, *antichambre*; and in Eng. *anticipate* (B.; see also ANTE). The root is *ant*; Sansc. *anti* = opposite, facing.]

1. The opposite of, as *anticlimax*.

2. Opposed to: as *Antichrist*, *antidote*.

¶ (a) Compound words having as one of their elements the Gr. prefix *anti* are infinite in number. We do not profess or indeed desire to give a complete list. Those which are still loosely compacted together, being generally spelled with a hyphen, follow as compounds under *anti*; while those in which the union has been more complete, the hyphen being generally dropped, are arranged as primary words. In the case of the former, the usage of authors or printers (it is uncertain which) with regard to the employment of capital letters varies in three ways:—

(1) There may be one capital commencing the word *Anti*, as *Anti-arminian*. (*Bishop Barlow*.)

(2) There may be one, but beginning the second of the two words in the compound, as *anti-Realism*, *anti-Realistic* (*Herbert Spencer*); *anti-Gallican* (*De Quincey*); *anti-English* (*Froude*); *anti-Republican* (*Times* newspaper).

Or (3) each of the words united may begin with a capital, as *Anti-Judaic* (*Milman*); *Anti-Laudism* (*Carlyle*.)

(b) With in the word *withstand*, and *gain* in *gain-say*, are equivalents in signification, though not in etymology, to the Greek *anti*.

†**B.** [From Lat. *ante* = before, as *anticipate*, in Lat. *anticipo* = to take beforehand; *ante* = before, and *capio* = to take.] Before, beforehand, as *anticipate*. (See etymology of B.)

anti-abolitionist, *s.* One opposed to a party in the United States which, when slavery existed there, sought its abolition; or, more generally, one opposed to the abolition of slavery in any country where it still lingers.

anti-American, *a.* Opposed to the American people or their aims.

anti-apostle, *s.* One opposed to the apostles.

"The cardinals of Rome are those persons which may be fitly styled *anti-apostles* in the Romish hierarchy."—Potter: *On the Numb.* 666, p. 96.

anti-Arminian, *s.* One opposed to the Arminian tenets.

" . . . and many bad characters cast on good men, especially on the *anti-Arminians* . . ."—Ep. Barlow: *Remains*, p. 181.

anti-attrition, *s.* Any thing which opposes attrition, as, a mixture for lubricating machinery.

anti-centenarianism, *s.* [Gr. *anti*, and Eng. *centenarianism*, from Lat. *centum* = a hundred, and *annus* = a year.] Opposition to the assertion that the persons from time to time reported to have died aged a century or more had really attained to that age.

"*Anti-centenarianism*."—Heading of a paragraph in the *Times*, Thursday, January 8, 1874.

anti-chamber. [ANTECHAMBER.]

anti-corn-law, *s.* [Gr. *anti* = against, and Eng. *Corn Law*.] Opposition to the Corn Law or laws. The Anti-Corn-Law League was formed in Manchester, England, on the 18th of September, 1838, and ultimately became a most powerful organization, carrying agitation everywhere. The Corn Laws having been abolished on June 26, 1846, the reason for the continued existence of the League ceased, and it dissolved itself on the 2d of July of the same year.

anti-docetæ, *a.* Opposed to the Docetæ, a Gnostic sect [DOCETÆ], or to their religious tenets. (See example under *anti-Gnostic*.)

anti-dynastic, *a.* Opposed to the reigning dynasty in any particular country.

" . . . but the leaders of the popular movement belong to the *anti-dynastic* faction of the Opposition."—*Daily Telegraph*, October 8, 1877: *Vienna Correspondence*.

anti-English, *a.* Opposed to the English or their aims.

"The *anti-English* party were in the ascendant."—Froude: *Hist. Eng.*, ch. xix, vol. iv., p. 168.

anti-Gallican, *s.* Opposed to the "Gallican," *i. e.*, the French aims or aspirations.

"One of the cardinals, he [Coleridge] tells us, warned him, by the Pope's wish, of some plot, set on foot by Bonaparte, for seizing him as an *anti-Gallican* writer."—*De Quincey's Works* (ed. 1863), vol. ii., p. 95.

anti-Gnostic, *a.* Opposed to Gnosticism or to the Gnostics.

anti-imperialist, *s.* One opposed to imperialism; specifically, one who opposes the retention of the Philippines and other islands acquired from Spain as dependencies of the United States.

anti-Jacobin, *s.* One opposed to the principles and procedure of the Jacobins in the first French Revolution.

"Then grew a hearty *anti-Jacobin*."

Byron: Vision of Judgment, 97.

¶ The word is best known as the title of a famous satirical Tory periodical (1798-1821), the principal contributors to which were Gifford, Hookham Frere, and Canning.

anti-Judaic, *a.* Opposed to what is Jewish.

" . . . the *anti-Judaic* party in Alexandria, of which Apion was no doubt a worthy representative."—*Milman: Hist. of Jews*, 3d ed., vol. i., note to p. 70.

anti-Laudism, *s.* Opposition on the part of the Puritans to the doctrine and discipline of Archbishop Laud.

" . . . *Anti-Laudisms*, Westminster Confessions."—*Carlyle: Heroes and Hero-Worship*, Lect. VI.

anti-national, *a.* Opposed to the aims, the procedure, or what are believed to be the interests of one's nation.

" . . . could have attended the most ultra professions of *anti-national* politics."—*De Quincey's Works* (ed. 1863), vol. ii., p. 178.

anti-principle, *s.* A principle opposed to another principle which has been previously specified.

anti-prophet, *s.* An opponent of prophets or of prophetic revelation.

"Well therefore might St. John, when he saw so many *anti-prophets* spring up, say, 'Hereby we know that this is the last time.'"—*Mede: Apostasy of the Later Times*, p. 88.

anti-Realism, *s.*

Metaphys.: The system of speculative belief opposed to that of realism; nominalism.

"And thus is Realism negatively justified: any hypothetical uncertainty it may have is incomparably less than that of *Anti-Realism*."—*Herbert Spencer: Psychol.*, 2d ed., vol. ii., § 491.

anti-Realistic, *a.*

Metaphys.: Opposed to what is realistic; nominalistic, nominalist.

" . . . that contradiction which the *Anti-Realistic* conception everywhere presents."—*Herbert Spencer: Psychol.*, 2d ed., vol. ii., § 469, p. 486.

" . . . we proceeded to value by it the Realistic and *Anti-Realistic* conclusions."—*Ibid.*, p. 491.

anti-Republican, *a.* Opposed to Republican institutions and their advocates or defenders.

"For the simple reason that he and the Duc de Broglie and the *anti-Republican* party are determined not to resign the power which they accidentally hold."—*Times*, November 16, 1877.

anti-Roman, *a.* Opposed to Roman aims.

"But at this crisis the *anti-Roman* policy was arrested in its course by another movement."—*J. A. Froude: Hist. Eng.*, ch. vi., vol. ii., p. 12.

anti-Socialist, *a.* Opposed to the Socialists.

"The debate on the *anti-Socialist* Bill commenced in to-day's sitting of the German Parliament."—*Times*, Sept. 17, 1878.

anti-Tribonian, *s.* A person opposed to the great jurist Tribonian.

Plural: A sect, the distinctive peculiarity of which was this opposition.

ăn-tī-ăç'-id, *a. & s.* [ANTACY.]

ăn-tī-ă-dēs, *s. pl.* [The plu. of Gr. *antias*, genit. *antiados* = one of the glands of the throat when swollen; *antos* = opposite to; from *anti*.]

Anatomy: The tonsils.

ăn-tī-ă-dī'-tis, *s.* [Gr. *antias*; and suff. *itis* = inflammation.] [ANTIADÉS.]

Med.: Inflammation of the tonsils.

ăn-tī-ăph-rō-diş'-i-ăc, **ăn-tī-ăph-rō-diş'-i-ă-cal**, *a.* [ANTAPHRODISIAC.]

ăn-tī-ăr, or **ăn-tī-jăr**, *s.* [ANTIARIS.] A poison made from the upas-tree of Java. *Antiaris toxicaria*.

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hère, camel, hêr, there; pîne, pît, sîre, sîr, marine; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite. cûr, râle, fûll: trę Sýrian. æ. œ = ē; ey = ā. qu = kw.

ăn-ti-ăr'-ine, s. [ANTIARIS.] The active principle in the poison of the upas-tree. [ANTIARIS.] It is obtained from the inspissated juice of the plant in shining whitish crystals, soluble in water.

ăn-ti-ăr'-is, s. A genus of plants belonging to the order Artocarpacæ, or Artocarpads. The *A. toxicaria* is the famous upas-tree of Java. [UPAS.] The antiar poison is made from it. Its exceedingly deleterious properties arise from its containing strychnine. A shirt made from it, if insufficiently prepared, excites much itching.

Antiaris Toxicaria.

ăn-ti-ăr-thrit'-ic, a. & s. [ANTARTHRETIC.] **ăn-ti-ăsth-măt'-ic**, s. [Gr. *anti*=against; Eng. *asthmatic*.] A medicine used against asthma. [ANTASTHMATIC.] "Anti-asthmatics (Gr.) are medicines against the shortness of breath."—Glossog. Nova.

ăn-ti-băc-chi'-ūs, s. [In Fr. *antibacchique*; Sp. *antibaquo*; Port. *antibacchio*; Ger. & Lat. *antibacchius*. From Gr. *antibakcheios*.] *Prosody*: A reversed Bacchius, that is, a foot like the Bacchius of three syllables, but differing from it in this respect, that whereas the Bacchius has the first syllable short and the last two long, as in *bē | ā | tē*, the Antibacchius has the first and second syllables long and the third short, as in *āū | dī | rē*.

ăn-ti-bar'-bar-ōūs, a. [Gr. *anti*=against, and Eng. *barbarous*.] Against what is barbarous. *Used*—(a) Of books like those of Erasmus, Nizolus, and Cellarius, directed against the use of barbarisms in the Latin or in other tongues. (b) Of the use of an unknown tongue in divine service. Peter de Moulin employed it in this sense.

ăn-ti-băş-il'-i-can, a. [(1) Gr. *anti*=against, opposed to; and Lat. *basilica*=a building in the forum with double colonnades, used as a court of justice and as an exchange. ăn-ti-brăch'-i-āl (*ch* guttural), a. [Lat. *antibrachialis*.] [ANTIBRACHIUM.] Pertaining to the forearm.

" . . . the peculiar length of arm in those 'long-armed apes' is chiefly due to the excessive length of the antibrachial bones."—Owen: *Classif. of Mammalia*, p. 78.

ăn-ti-brăch'-i-ūm (*ch* guttural), s. [From Lat. *ante*=before; and *brachium*, Gr. *brachion*=the arm, especially the forearm, from the hand to the elbow.] The forearm.

" . . . the forearm, or antibrachium."—Flower: *Os-teol. of the Mammalia* (1870), p. 214.

Ăn-ti-bŭr'-ghĕrs (*h* silent), s. pl. [Gr. *anti*=against, and Eng. *burghers*.]

Church History: A Scottish sect which arose in 1747. A certain oath having been instituted in Edinburgh, Glasgow, and Perth, to be taken as a criterion of burghership, many members of the Associate Synod, or Secession Church, considered its terms to be such that they could not conscientiously take it. Others declared that they could. The Secession in consequence split into distinct bodies—the "Burghers," who took the oath, and the "Antiburghers," who refused it. Another schism ultimately followed, owing to the conflict between progressive and conservative ideas; and thus there were produced four distinct denominations—viz.,

the Old Light Burghers, the New Light Burghers, the Old Light Antiburghers, and the New Light Antiburghers. Most of these are now merged in the United Presbyterian Church, and their old denominations are becoming obsolete. (Burton: *Hist. Scotland*.)

ăn-tic, ***ăn-ticke**, ***ăn-tike**, a. & s. [In Sw. *antik*, adj.=(1) antique, ancient, (2) antic; subst.=(1) an antique, (2) an antic; Dan. *antik*, adj.=(1) antique, (2) antic; Fr. *antique*=(1) ancient, (2) antiquated; Sp. *antiquo*=(1) antique, ancient, (2) antic; Port. *antigo*, adj.=antique, ancient; subst.=an antique; Ital. *antico*=antique, ancient; Lat. *antiquus*=antique, ancient. The English *antic* was originally the same word as ANTIQUE (q. v.).]

A. As adjective:

1. Antique, ancient; old.

"At the nether end were two broad arches upon three antique pillars all of gold . . ."—Hall: *Hen. VIII.*, an. 18. (Trench.)

2. Old-fashioned, antiquated; out of date, and therefore grotesque.

"A foule deform'd, a brutish cursed crew,
In body like to antique work devised
Of monstrous shape, and of an ugly hew."
Harrington: *Ariost.*, vi. 61. (Nares.)

3. Grotesque, odd, ludicrous, without any reference to antiquity.

"With frolic quaint their antic jests expose,
And tease the grumbling rustic as he goes."
Byron: *Hours of Idleness*; *Childish Recollections*.

"The prize was to be conferred upon the whistler that could go through his tune without laughing, though provoked by the antic postures of a merry-andrew, who was to play tricks."—Addison.

B. As substantive:

I. Of persons.

1. A person or being of hoar antiquity, out of harmony with modern manners, and left by people in society as much as possible to himself.

" . . . within the hollow crown
That rounds the mortal temples of a king
Keeps Death his court; and there the antic sits."
Shakesp.: *Rich. II.*, ii. 2.

2. A merry-andrew, a buffoon; one who dresses up fancifully, adopts odd postures, and says what he deems smart things, with the object of eliciting half-pence from those who behold his tricks.

"Fear not, my lord, we can contain ourselves,
Were he the veriest antic in the world."
Shakesp.: *Taming of the Shrew*, Ind.

II. Of things. Generally in the plural:

1. Works of art, specially architecture, sculpture, or painting produced by the ancients; antiques. [ANTIQUÉ.]

2. Grotesque representations, odd imagery or devices. [ANTI-MASK.]

"A work of rich entail and curious mold,
Woven with antickes and wyld ymagery."
Spenser, *F. Q.*, II. vii. 4.

"For e'en at first reflection, she espies
Such toys, such anticks, and such vanities."
Davies.

3. Odd tricks.

"And fraught with anties as the Indian bird
That writhes and chatters in her wiry cage."
Wordsworth: *Excursion*, bk. vi.

ăn-tic, **ăn-tick**, v. t. [From the substantive.] To cause to assume the appearance of an antic.

"Mine own tongue
Splits what it speaks; the wild disguise hath almost
antick'd us all."—Shakesp.: *Ant. and Cleop.*, ii. 7.

1. As adjective: Used against a burning fever of whatever kind.

2. As substantive: A medicine used against burning fevers.

ăn-ti-čhām-bēr. [ANTECHAMBER.]

ăn-ti-čheir, s. [Gr. *antichēir*=the thumb; from *anti*=opposed to, and *chēir*=the hand.]

Anat.: The thumb; so called from being opposed to the rest of the hand.

***ăn-ti-čhrē'-sis**, s. [Gr. *anti-chrēsis*=reciprocal usage: *anti*=in return, and *chrēsis*=a using, an employment; *chraomai*=to consult or use an oracle, to use; *chraō*=to furnish what is needful.] *Old Law*: A mortgage.

ăn-ti-christ, **Ăn-ti-christ**, s. [In A. S. *Antecrist*, *Anticrist*; Sw., Dan., Dut., & Ger. *Antichrist*; Fr. *Antechrist*; Sp. & Port. *Antechristo*; Ital. *Anticristo*; Lat. *Antichristus*. From Gr. *Antichristos*: *anti*=instead of, or=against (see Trench's *Synonyms of the New Testament*, pp. 115-120; *Christos*=Christ.)

1. Gen.: Any one who denies the Father and the Son; or who will not confess that Jesus Christ is come in the flesh; or who, leaving the Church, pretends to be the Christ (or Messiah), and thus becomes a rival and enemy of Jesus, the true Christ, as in the following examples.

"He is antichrist, that denieth the Father and the Son."—1 John ii. 22.

"For many deceivers are entered into the world, who confess not that Jesus Christ is come in the flesh. This is a deceiver and an antichrist."—2 John 7.

"Little children, it is the last time; and as ye have heard that antichrist shall come, even now are there many antichrists; whereby we know that it is the last time. They went out from us, but they were not of us . . ."—1 John ii. 18, 19; compare with Matt. xxiv. 3-5, Mark xiii. 1-5, Luke xxi. 5-8.

2. Spec.: One who should preëminently stand forth as the antagonist of Christ, and should be a sufficiently prominent personage to become the theme of prophecy; or if anti be held to mean *instead of* [see etymology], then the characteristic of Antichrist will be a supercession of Christ, not an avowed antagonism to him. If, when St. John says, "Ye have heard that antichrist shall come," he refers to the rival and opponent of God described by St. Paul in 2 Thess. ii., then Antichrist is to be identified as the "man of sin," "the son of perdition, and that Wicked," of verses 3, 8. Many Protestant controversial writers, from Luther downward, have applied the name Antichrist in this specific sense to the Papacy. (See the example from Bishop Hall, as a specimen of a multitude more scattered over the whole extent of English and Scotch theological literature.)

"Anti-christ, which was conceived in the primitive times, saw the light in Boniface the Third, and was grown to his stature and akme in Gregory the Seventh."—Bp. Hall: *Hon. of the Marr. Clergy*, 3, § 6.

ăn-ti-christ-i-an, a. & s. [Gr. *anti*=against; Eng. *Christian*. In Fr. *antichrétien*; Port. *antichristao*; Ital. *anticristiano*.]

1. As adjective: Opposed to Christianity, or pertaining to the Antichrist of New Testament prophecy.

"That despised, abject, oppressed sort of men, the ministers, whom the world would make antichristian, and so deprive them of heaven."—South.

2. As substantive: One opposed to Christianity, or a follower of the prophetic Antichrist.

"A new heresy, as the antichristians and priests of the breadden God would persuade and make their credulous company to believe."—Rogers: *On the Creed*, Pref.

"To call them Christian Deists is a great abuse of language; unless Christians were to be distributed into two sorts, Christians and No-Christians, or Christians and Anti-Christians."—Waterland: *Ch.*, p. 63.

ăn-ti-christ-i-an-ism, s. [Eng. *antichristian*; -ism. In Fr. *antichristianisme*.] Opposition to Christianity in an individual, a party, or a speculative tenet.

"Have we not seen many whose opinions have fastened upon one another the brands of antichristianism?"—More: *Decay of Piety*.

bôil, bôy; pôut, jowl; cat, çell, chorus, çhin, bench; go, gem; thin, ðis; sin, aş; expect, Xenophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şŭn; -tŭon, -şion = zhŭn. -tious, -cious, -sious = şŭş. -ble, -dle, &c. = beł, deł.

ăn-ti-christ-i-ăn-i-tỹ, s. [Gr. *anti*=against; Eng. *Christianity*.] Opposition or contrariety to Christianity in an individual, a party, or a speculative tenet. (In use identical with the previous word.)

"They breed grief of mind in a number that are godly-minded, and have *Antichristianity* in such detestation that their minds are martyred with the very sight of them in the Church."—*Hooker: Eccl. Pol.*, bk. iv., § 3.

ăn-ti-christ-i-ăn-i-ze, v. t. [Eng. *antichristian*; -ize.] To turn from Christianity those who previously accepted its doctrines.

ăn-ti-chrôn-i-cal, a. [Gr. *anti*=against, and *chronikos*=pertaining to time; *chronos*=time.] Opposed to or out of the proper chronological date.

ăn-ti-chrôn-i-cal-lỹ, adv. [Eng. *anti-chronical*; -ly.] In a manner that is opposed to proper chronology.

ăn-ti-chrôn-i-ism, s. [In Ger. *antichronism*.] Deviation from proper chronology; the placing events in wrong order of time.

"Our chronologies are by transcribing, interpolation, misprinting, and creeping in of *antichronisms*, now and then strangely disordered."—*Selden: On Drayton's Poly-ob.*, Song 4.

ăn-tich-thôn, s. [Gr. *anti*=on the opposite side of, and *chthôn*=country.] One of the Antipodes. (*Bp. Hall: Works*, v. 478.)

ăn-ti-ç-i-pant, a. [Lat. *anticipans*, pr. par. of *anticipo*=to take beforehand, to anticipate.] [ANTICIPATE.] Anticipating, in anticipation of.

Med.: A term used of periodic fevers or other diseases in which the paroxysms arrive earlier than their normal period, the successive intervals of respite diminishing from day to day.

ăn-ti-ç-i-pâte, v. t. & i. [In Ger. *tantizipiren*; Fr. *anticiper*; Sp. *anticipar*; Port. *anticipar*; Ital. *anticipare*. From Lat. *anticipo*=to take beforehand; *ante*=before, and *capio*=to take, from the root *cap*.]

A. Transitive:

1. To take before another person has had time to do so, and thus preclude his gaining possession at all. Or to perform a work before he has had time to execute it, and thus render his services in the matter needless; to be beforehand with one.

"... he would probably have died by the hand of the executioner, if indeed the executioner had not been anticipated by the populace."—*Macaulay: Hist. Eng.*, ch. xx.

"Anticipated rents, and bills unpaid,
Force many a shining youth into the shade."
Cowper: Retirement.

2. To say or do anything before the appropriate, or at least the normal, time for it has come.

(a) In a speech or literary composition, to say or write anything before the time or place at which it should appropriately be introduced.

(b) To carry out an expected command before it is given, or conjectured wishes before they are uttered in speech.

"The dinner served, Charles takes his usual stand,
Watches your eye, anticipates command."
Cowper: Truth.

"... would have done wisely as well as rightly by anticipating the wishes of the country."—*Macaulay: Hist. Eng.*, ch. xxi.

3. To realize a future event, and feel as one would if it had already arrived; or simply to expect a future event to happen.

"Timid men were anticipating another civil war."—*Macaulay: Hist. Eng.*, ch. xviii.

B. Intransitive: To say or write anything before the time or place at which it should appropriately be introduced into a speech or literary composition.

"I find I have anticipated already, and taken up from Boccaccio before I come to him; but I am of the temper of kings, who are for present money, no matter how they pay it."—*Dryden.*

ăn-ti-ç-i-pă-téd, pa. par. & a. [ANTICIPATE.]

***ăn-ti-ç-i-pă-tê-lỹ**, adv. [Eng. *anticipate*; -ly.] By anticipation.

"It may well be deemed a singular mark of favor that our Lord did intend to bestow upon all pastors, that he did anticipately promise to Peter."—*Barrow: On the Pope's Supremacy.*

ăn-ti-ç-i-pă-ti-ng, pr. par. & a.

"... an active and anticipating intelligence."—*Owen: Classif. of Mammalia*, p. 62.

ăn-ti-ç-i-pă-tion, s. [In Fr. *anticipation*; Sp. *anticipacion*; Port. *anticipação*, *antecipação*; Ital. *anticipazione*. From Lat. *anticipatio*=(1) a pre-conception, an innate idea; (2) the first movements of the body in infancy; (3) *Rhet.*, occupation, prolepsis: from *anticipo*=to anticipate.]

A. Ord. Lang.: The act of anticipating; the thing anticipated.

Specially:

1. The act of forming a preconceived notion of any being, person, or thing; the formation of an

opinion before the grounds on which it can be safely based are known; the thing thus preconceived, a prejudice.

"What nation is there, that, without any teaching, have not a kind of *anticipation*, or preconceived notion of a Deity?"—*Denham.*

"Of the great error of inquiring knowledge in *anticipations*. That I call *anticipations*, the voluntary collections that the mind maketh of knowledge, which is every man's reason."—*Bacon: Interpr. of Nature*, ch. xv.

2. The act of saying, writing, or doing something before the natural time for giving attention to it has arrived.

"The golden number gives the new moon four days too late by reason of the aforesaid *anticipation*, and our neglect of it."—*Holder.*

3. The act of realizing a future event, and feeling or acting as one would do if it had actually arrived. The act of foreseeing, or at least of expecting a future event, or providing for a future necessity.

"But whose achievements, marvelous as they be, Are faint anticipations of a glory
About to be revealed."
Robert Browning: Paracelsus.

B. Technically:

1. *Med.*: The attack of a fever before its usual time.

2. *Painting*: The expression of an expected action.

3. *Logic*: A presumption, prejudice, or preconceived opinion. It is called also pre-conception, presentation, or instinct.

4. *Epicurean Philosophy*: The first idea or definition of anything.

5. *Rhetoric*: A figure, called also Prolepsis (q. v.).

6. *Music*: The obtrusion of a chord upon a syncopated note to which it forms a discord.

ăn-ti-ç-i-pă-ti-ve, a. [Eng. *anticipate*; -ive.] Anticipating, containing an anticipation.

ăn-ti-ç-i-pă-tôr, s. [Lat. *anticipator*; Ital. *anticipatore*.] One who foresees, or at least expects, a future event.

ăn-ti-ç-i-pă-tôr-ỹ, a. [Eng. *anticipator*; -y.] Anticipating, foreseeing, forecasting; containing or implying an anticipation of some future event.

"... and this distinguished geologist concluded by the remarkable anticipatory observation that ..."
Owen: British Fossil Mammals and Birds (1846), p. 2.

***ăn-ti-ck**, s. [ANTIC.]

ăn-ti-clî-max, s. [Gr. *anti*=opposite to, or the opposite of; and *klimax*=a ladder or staircase ...; *Rhet.*, a climax.]

Rhet.: The opposite of a climax. As in a climax the ideas increase in grandeur as the sentence advances, so in the anti-climax they sink lower and lower as the sentence proceeds. The effect in the former case is sublime; in the latter, ridiculous. The example of an anti-climax most frequently given (and there could scarcely be a better one) is the following:—

"Next comes Dalhousie, the great god of war,
Lieutenant-col'nel to the Earl of Mar."

"... more tolerant of avowed indifference toward his own writings, and, finally (if the reader will pardon so violent an *anti-climax*), much more ready to volunteer his assistance in carrying a lady's reticule or parasol."—*De Quincey's Works* (ed. 1863), vol. ii., p. 232.

ăn-ti-clî-nal, a. & s. [Gr. *anti-klinō*=to lean on again; *anti*=against, and *klinō*=to make to bend or slant.]

A. As adjective:

1. *Geol.*: So situated that the strata dip from it in opposite directions.

"... one of the anticlinal ridges of the Jura."—*Lyell: Manual of Geol.*, ch. v.

Anticlinal axis or *anticlinal line*: An imaginary line on the two sides of which the strata dip in opposite directions. The two sloping sides of the roof of a house resemble strata in an anticlinal position, and the ridge running lengthwise along the roof is like an anticlinal axis or line. Anticlinal is con-

Section of Anticlinal Strata.

trasted with synclinal (q. v.). In the majority of cases an anticlinal axis forms a ridge, and a synclinal one a valley; but there are exceptions to this rule.

2. *Anat.*: Presenting a certain remote resemblance to a geological anticlinal axis.

Anticlinal vertebra: A vertebra which has an upright spine toward which the others are directed.

B. As substantive: The same as an anticlinal axis or line (q. v.).

"The Silurian and Devonian rocks are thrown up into a number of narrow anticlinals."—*Duke of Argyll: Q. J. Geol. Soc.*, vol. xxiv., p. lxx.

B. As substantive. [In Sp. *antidotario*=a dispensary; Mediæv. Lat. *antidotarium*.]

1. A book giving directions as to the preparation of the several medicines.

"Ant. Guianerius in his *antidotary* hath many such."—*Burton: Anat. of Melancholy*, p. 36.

2. A dispensary, a place where medicines are dispensed.

ăn-ti-đo-te (Eng.), **ăn-ti-đo-tum** (Lat.). [In Fr. *antidote*; Sp., Port., & Ital. *antidoto*; Lat. *antidotum*. From Gr. *antidoton*=a remedy, an antidote; properly the neut. of a *đj. antidotos*=given as a remedy; *anti*=against; and *dotos*=given; *đidōmi*, to give.]

I. Ordinary Language:

1. *Lit.*: In the same sense as II. (*Med.*)

"... to find the antidotum for this disease is impossible."—*Report on the State of Ireland, 1515. (State Papers, vol. ii., p. 18.)*

"And the antidotes for poisons."
Longfellow: The Song of Hiawatha, xv.

2. *Fig.*: Whatever acts or is designed for the counteraction of any evil.

"Mac. . . . Canst thou
With some sweet oblivious antidote
Cleanse the stuff'd bosom of that perilous stuff
That weighs upon the heart?"

Shakesp.: Macbeth, v. 3.

"In guid time comes an antidote
Against sic poison'd nostrum."
Burns: The Holy Fair.

II. Technically:

Med.: A medicine designed to counteract the influence of poison introduced by any means into the system. In Garrod's classification, *Antidotes* figure as Order 1 of his Division III. He discriminates them into *direct* and *indirect* antidotes; the former neutralizing or destroying the poison against which they are prescribed on meeting it in the system, the latter counteracting its injurious physiological effects. He gives a classified list of the more common poisons, with their respective antidotes. It commences with "(a) *Acids* counteracted by magnesia, chalk, and dilute solutions of alkaline carbonates; (b) *Alkalies and Alkaline earths*, to which the antidotes are, first, vinegar and water, or, second, oil; (c) *alkaloids*, against which should be administered finely divided animal charcoal."

ăn-ti-đo-te, *v. t.* [From the substantive.] To give as a remedy against poison (*lit. & fig.*). It may be followed—

(a) By an objective of the person to whom the remedy is administered:

"... antidote thyself against the idolatrous infection of that strange woman's breath, whose lips yet drop as an honeycomb."—*More: Against Idolatry*, ch. x.

Or (b) by an objective of the poison administered, or the thing containing the poison.

"Either they were first unhappily planted in some place of ill and vicious education, where the devil and his agents infused such diabolical filth and poison into their hearts, that no discipline or advice, no sermons or sacraments, could ever after antidote or work it out."—*South: Sermon*, vi. 367.

"Fill us with great ideas, full of heaven,
And antidote the pestilential earth."

Young: Night Thoughts, 9.

Antiloimics (plur.): Medicines of the kind now described, such as chlorine, nitric acid, muriatic acid, &c.

ăn-tĩ-lõ-ô-pẽ, s. [For etym. see ANTELOPE.] A genus of ruminating animals belonging to the family Bovidae. They have more or less cylindrical horns, often annulated, and, in some cases, sub-orbital sinuses and inguinal pores. Linnæus placed the few species known to him partly under his genus *Capra* (Goats), and partly under *Cervus* (Stags), and they have a certain affinity with both those genera of animals. They make an approach also to oxen and sheep. The size of the genus has caused it to be broken up into numerous sections or sub-genera. Col. Hamilton Smith has *Dicranocerine*, *Aigocerine*, *Orygine*, *Gazelline*, *Antelopine*, *Reduncine*, *Oreotragine*, *Traguline*, *Raphicerine*, *Tetracerine*, *Cephalophine*, *Neotragine*, *Tragelaphine*, *Nemorhædine*, *Rupicaprine*, *Alpocerine*, and *Anoine* groups of Antelopes—seventeen in all. (*Griffith's Cuvier*, iv., 162 to 294. In vol. v., 322 to 355, the *Oreotragine*

group being suppressed, the remaining sixteen become sub-genera *Dicranoceros*, *Aigoceros*, *Oryx*, *Gazella*, &c.) Some, again, have made Antelope not a genus, but a sub-family Antelopinae, or even a family Antilopidae or Antelopidae, and have elevated the sections or sub-genera into genera quite distinct from each other. The great metropolis of the extended genus Antelope is Southern Africa. Of sixty-nine species recorded by Professor Wagner, twenty-five occur in that locality, and twenty-nine in other parts of Africa, making fifty-four from the whole of that continent. Among the species found in Southern Africa are the Ourebi or Oribi (*A. scoparia*, Schreber); the Steenbok (*A. tragulus*, Lichtenstein); the Klippspringer (*A. oreotragus*, Forster; *Oreotragus saltatrix*, Smith); the Koodoo (*A. strepsiceros*, Pallas; *Strepsiceros koodoo*, Smith); the Boshbok (*A. sylvatica*, Sparrmann); the Rheebok (*A. capreolus*, Licht.); the Duikerbok (*A. mergens*, Blainville); the Kleenbok (*A. perpusilla*, Smith); the Springbok (*A. euchore*, Forster); the Blessbok (*A. pygarga*, Pallas); the Gemsbok (*A. oryx*, Pallas); the Blaibok (*A. leucophæa*, Pallas); the Canna, the so-called Eland=Elk of the Cape Dutch (*A. oreas*, Pallas); the Caama or Hartbeest (*A. caama*, Cuv.); the Gnu or Gnou (*A. gnu*, Gmelin; *Catoblepas gnu*, Smith); the Brindled Gnu (*A. gorgon*, Smith). Pringle alludes to several of these species, but "the gazelle" of which he speaks is not that of Northeastern Africa.

"By valleys remote where the oribi plays,
Where the gnu, the gazelle, and the hartbeest graze,
And the gemsbok and eland unhunted recline
By the skirts of grey forests o'erhung with wild vine."
Pringle: *Ajar in the Desert*.

Among the antelopes from other parts of Africa may be mentioned the Madoqua (*A. Saltiana*, Blainville), a dwarf species from Abyssinia; the Gazelle (*A. dorcas*, Pallas), (*Gazella dorcas*), from Egypt and Barbary; the Addax (*A. addax*, Lichtenstein; *Oryx addax*, Smith), widely spread; the Abu-harte (*A. leucoryx*, Pallas) [UNICORN], in Senaar and Kordofan; the Bekr-el-Wash (*A. bubalus*, Pallas), from Barbary; and the Bush Antelope (*A. silvicultrix*, Afzelius; *Cephalophus silvicultrix*, Smith), from Sierra Leone. Next to Africa, Asia, including the Eastern Archipelago, is the most important habitat of the genus. The Sasin or Common Antelope of India is *A. cervicapra*, Pallas; and in the same country the Nylghau (*A. picta*, Pallas; *Portax picta*, Smith); the Chickara (*A. quadricornis*, Blainville; *Tetracerus chickara*, Leach), &c. Other species are in Western Asia, Thibet, Sumatra, but none appear to exist in Australia or Madagascar. In Europe there is a typical one—the Saiga (*A. colus*, Smith), found in Roumania, Poland, and Russia, and one of a more aberrant character, with affinities to the goats—the Chamois (*A. rupicapra*, Pallas; *Rupicapra vulgaris*, Smith), in the Alps, Pyrenees, Carpathians, and the mountains of Greece. America has only two undisputed species—the Rocky Mountain goat (*Haploceros montanus*); and the cabrit or pronghorn (*Antilocapra americana*), and is found in the western part of North America. It is very difficult to procure.

¶ Some of the above species of antelope have other designations than those now given. The Springbok is now frequently called *Gazella euchore*; the Blessbok, *Gazella albifrons*; the Blaibok (blue antelope) *Gazella leucophæa*; the Eland, *Boselaphus oreas* or *Oreas canna*; the Brindled Gnu (bastard wild beast), *Catoblepas gorgon*; the Addax, *Addax nasomaculata*; the Chickara, *Tetracerus quadricornis*; the Saiga, *Colus saiga* or *Antilocapra saiga*; and the Chamois, *Rupicapra tragus*.

ăn-tĩ-lõp'-i-dă, ăn-tĩ-lõp'-i-dă, s. pl. [From *Antelope* (q. v.), and *Antelope* (q. v.).]

Zool.: In some classifications a family of ruminants, with its type Antelope (q. v.).

ăn-tĩ-lõ-pĩ'-nă, s. pl. [ANTELOPE.] A sub-family of Bovidae. If the various sub-genera of the old genus Antelope be raised to the rank of independent genera, then it becomes needful to point out their affinity for each other by grouping them into a sub-family, naturally designated Antelopinae. [ANTELOPE, GAZELLE, &c.]

ăn-tĩ-lõ-pĩne, a. [From *antilope* (q. v.).] Pertaining to an antelope.

"We have here another instance of wool on the skin of an antilopine species."—*Griffith's Cuvier*, vol. iv., p. 197.

***ăn-tĩ-lõ-quĩst, s.** [Gr. *anti*=against, and Lat. *loquor*=to speak.] A person who speaks against or contradicts any person or statement. (*Bailey*.)

ăn-tĩ-mă-nĩ-ăc, ăn-tĩ-mă-nĩ-ă-cal, a. [Gr. *anti*=against, and Eng. *maniac*, *maniācal*.] Suitable to be employed in cases of mania.

ăn-tĩ-mask, *ăn-tĩ-masque, s. [Eng. *antic* (q. v.), and *mask*. In Fr. *masque*.] A secondary mask, or masque, designed as a contrast to the principal one; a ridiculous interlude dividing the parts of the more serious one.

"Let anti-masks not be long; they have been commonly of fools, satyrs, baboons, wild men, antics, beasts, spirits, witches, ethiopes, pigmies, turquets, nymphs, rustics, cupids, statues, moving and the like, . . . As for angels, it is not comical enough to put them in anti-masks . . ."—*Bacon: Essays, Civ. and Mor.*, ch. xxxvii.

"On the scene he thrusts out first an anti-masque of bug-bears."—*Milton: Ans. to Eik. Bas.*, xx.

ăn-tĩ-mă-sõn, s. [Eng. *anti*; *mason*.] One actively opposed to Freemasonry.

ăn-tĩ-mă-sõn'-ic, *ăn-tĩ-mă-sõn'-ic-ăl, a. [From Gr. *anti*=against, and Eng. *masonic*.] Opposed to Freemasonry.

ăn-tĩ-mă-sõn-rỹ, s. [Gr. *anti*=against, and Eng. *masonry*.] In active opposition to Freemasonry. In New York State, in 1826, a man called Morgan was carried off and not again seen. As he was believed to be writing a book disclosing the secrets of Freemasons, they were suspected of his abduction, and anti-masonry, for some years afterward, was the badge of a party polling many votes at elections.

***ăn-tĩ-masque, s.** [ANTI-MASK.]

ăn-tĩ-măt-rĩ-mõ'-nĩ-ăl, a. [Gr. *anti*=against, and Eng. *matrimonial*.] Against matrimony.

ăn-tĩ-mõn'-arch-ist, s. [Gr. *anti*=against, and Eng. *monarchist*.] One opposed to monarchy.

"Dennis Bond, a great Oliverian and *anti-monarchist*, died on that day; . . ."—*Life of A. Wood*, p. 115.

ăn-tĩm'-õn-âte, s. [Eng. *antimon(y)*; *-ate*.] A salt of antimonious acid. [ANTIMONIATE.]

Min.: Dana has as the third division of his "Ternary Oxygen Compounds," "Phosphates, Arsenates, Antimonates, Nitrates," the first subdivision of which is headed "Phosphates, Arsenates, Antimonates, . . ." For its sections see PHOSPHATES.

antimonate of lead, s. A mineral, called also BINDHEIMITE (q. v.).

ăn-tĩm'-õn-ët-tëd, a. [ANTIMONIURETTED.]

ăn-tĩ-mõ-nĩ-âl, a. & s. [In Fr., Sp., & Port. *antimonial*; Ital. *antimoniale*.]

A. As adjective: Pertaining to antimony; made of antimony, consisting of antimony; containing more or less of antimony.

"Though *antimonial* cups prepar'd with art,
Their force to wine through ages should impart;
This dissipation, this profuse expense,
Nor shrinks their size, nor wastes their stores
immense." *Blackmore*.

"They were got out of the reach of *antimonial* fumes."—*Grew*.

B. As substantive: A medicine in which antimony is a leading ingredient.

antimonial arsenic, s. A mineral containing above ninety per cent. of arsenic; the other element in its composition being antimony. It is found in radiated reniform masses in California.

antimonial copper, s. A mineral, called also Chalcostilbite (q. v.).

antimonial copper glance, s. A mineral, called also Bournonite (q. v.).

antimonial nickel, s. A mineral, called also Breithauptite (q. v.).

***antimonial ochre**, s. An obsolete name for two minerals, Cervantite and Stibiconite (q. v.).

antimonial powder, s.

Pharm.: A medicine consisting of oxide of antimony one ounce, and phosphate of lime two ounces. It is used as a substitute for James' powder.

antimonial silver, s. A mineral, called also Dyscrasite (q. v.).

antimonial silver blende, s. A mineral, called also Pyrrargyrite (q. v.).

antimonial wine, s.

Pharm.: A wine consisting of forty grains of tartarated antimony (tartar emetic) dissolved in twenty ounces of sherry wine. Cups used to be made of antimony, and the liquid became medicinal.

ăn-tĩ-mõ-nĩ-ate, s. [Eng. *antimony*; *-ate*.] *Chem.*: A salt of antimonious acid. [ANTIMONATE.]

ăn-tĩ-mõ-nĩ-â-tëd, a. [Eng. *antimony*; suff. *-ated*.] Tinctured naturally or prepared artificially with antimony.

Antimoniated galena: A variety of galena occurring in the Dufton mines in the north of England.

ăn-tĩ-mõn'-ic, a. [Eng. *antimony*; *-ic*.] Pertaining to antimony or containing antimony.

Antimonic chloride, or *antimony pentachloride*, SbCl₅, is obtained as a colorless volatile fuming liquid by passing excess of chlorine over the metal or the trichloride. On distillation it decomposes into SbCl₃ and Cl₂.

Antimonic tetroxide, or *antimonoso-antimonic oxide*, Sb₂O₄ or Sb₂O₃.Sb₂O₅, obtained by heating the metal or trioxide. It is a yellow infusible non-volatile powder, insoluble in acids, but dissolves in alkalis.

Antimonic oxide, Sb₂O₅. Obtained by the action of HNO₃ on the metal. It is a yellow insoluble powder, which by heat is converted into the tetroxide. Its hydrate forms salts called *antimoniates*; those formed from the hydrates of the trioxide are called *antimonites*. By adding water to antimonic chloride, Sb₂Cl₅, a hydrate is precipitated called *metantimonic acid*, H₄Sb₂O₇. The acid *sodium metantimoniate*, Na₂H₂Sb₂O₇·6H₂O, is insoluble in water.

ăn-tĩ-mõn'-ide, s. [Eng. *antimony*; suff. *-ide*.] [ANTIMONIURETTED.]

ăn-tĩ-mõn'-if-êr-ouš, a. [Mediæv. Lat. *antimonium*, and Class. Lat. *fero*=to bear.] Bearing antimony.

Antimoniferous galena. [ANTIMONIATED GALENA.]

ăn-tĩ-mõ-nĩ-ouš, a. Containing as one of its ingredients antimony.

Antimonious chloride, or *antimony trichloride*, SbCl₃, called also *butter of antimony*. By dissolv-

ing the metal or the sulphide in strong HCl, and distilling the liquid, SbCl₃ volatilizes and forms a white crystalline mass.

Antimonious oxide, or *antimony trioxide*, Sb₂O₃. Obtained by decomposing SbCl₃ with an alkaline carbonate. It is a colorless powder, crystallizing in octohedra; it becomes yellow when heated, melts at red heat, and volatilizes in a close vessel, but absorbs oxygen from the air, and becomes Sb₂O₄. Antimonious oxide dissolves in cream of tartar, forming tartar emetic, or potassium antimony tartarate, 2(C₄H₄K(SbO)₆)·H₂O.

Antimonious sulphide, Sb₂S₃, occurs native as a lead-gray, shining, crystalline, brittle mineral; sp. gr. 4.6; easily fusible, and a good conductor of electricity. It is used in horse medicine and in Bengal lights. When precipitated by H₂S it is an orange-red powder, which is soluble in ammonium sulphide. *Kermes mineral* is a mixture of Sb₂S₃ and Sb₂O₃. *Sulph-antimonites* are compounds of Sb₂S₃ with basic sulphides.

Antimony pentasulphide, or *antimonic sulphide*, Sb₂S₅, is a yellow-red powder obtained by decomposing sodium sulphantimoniate, Na₃SbS₄, a crystalline substance.

ăn-tĩ-mõn'-ite, s. [Eng. *antimony*, and suff. *-ite* (q. v.). In Ger. *antimonit*.] A mineral, the same as STIBNITE (q. v.).

ăn-tĩ-mõ-nĩ-ũm, s. [Latin, but not classical.] Antimony.

ăn-tĩ-mõ-nĩ-ur-ët-tëd, **ăn-tĩ-mõn-ët-tëd**, a. [Eng. *antimony*; suff. *-uretted*, *-ettèd* (q. v.).] Mingled with antimony fumes. (Applied to gaseous antimony in combination with another gas.)

Antimoniuretted hydrogen, or *antimonious hydride*, or *stibine*, SbH₃. Obtained by the action of HCl on zinc, in the presence of an antimony salt. It is a colorless gas, burning with a white flame, liberating Sb₂O₃. At red heat it deposits metallic antimony; passed through a solution of AgNO₃, it deposits a black precipitate of SbAg₃.

ăn-tĩ-mõn-õ-phỹl'-lite, s. [Ger. *antimon*; Gr. *phyllon*=leaf, and suff. *-ite*.] A mineral occurring in thin angular six-sided prisms. Its precise locality is unknown. It was originally named by Breithaupt. Dana considers that it is probably the same as VALENTINITE (q. v.).

ăn-tĩ-mõn'-ỹ, s. [In Ger. *antimon*, *antimonium*; Sw. & Mediæv. Lat. *antimonium*; Fr. *antimoine*, from *anti*=against, and *moine*=monk; Sp., Port. & Ital. *antimonio*. The name is said to have arisen from the fact or allegation that the celebrated alchemist Basil Valentine, who was a German monk, having observed that hogs fattened on antimony, administered some of it to render a similar service to his fellow-monks, but found the well-meant prescription attended by fatal results. The narrative has a somewhat mythic air. Hence Morin derives it from Gr. *anti*=against, and *monos*=alone, because it is not found alone; an improbable etymology. In Class Lat. *stibium* or *stimmi*, Gr. *stimmi*, is =antimony, or rather sesquisulphuret of antimony.]

I. Chemistry: Antimony is a triad metallic element, but in some less stable compounds it appears to be pentad. Symbol, Sb.; atomic weight, 122; sp. gr., 6.8; melting-point, 450°. It can be distilled, but takes fire when strongly heated in the air, forming Sb₂O₃. Antimony is a bright bluish-white, brittle, easily pulverized metal, which occurs as Sb₂S₃, and as *cervantite*, Sb₂O₄; also as *valentinite* and *senarmontite*, Sb₂O₃. The metal is obtained by heating the sulphide with half its weight of metallic iron, or with potassium carbonate. It is oxidized by nitric acid, forming Sb₂O₅. Type metal is an alloy of lead with twenty per cent. of antimony. Finely powdered antimony takes fire when thrown into chlorine gas. It forms three oxides: (1) Antimony Trioxide, or Antimonious Oxide; (2) Antimonic Tetroxide, or Antimonoso-antimonic Oxide; and (3) Antimonic Oxide. (See these words.) Antimony also forms bases with alcohol radicals, as *Trimethylstibine*, Sb(CH₃)₃. Salts of antimony are used in medicine; in large doses they are poisonous. Antimony is detected by the properties of its sulphide, chloride, and of SbH₃. It is precipitated by metallic zinc and iron from its solutions as a black powder. Copper is covered by a metallic film. Antimony salts, when fused on charcoal with Na₂CO₃, give a white incrustation and a brittle metallic bead, converted by nitric acid into a white oxide soluble in a boiling solution of cream of tartar. Antimony is precipitated by hydric sulphide, H₂S (see ANALYSIS), as an orange-red powder, sulphide of antimony, Sb₂S₃, which is soluble in sulphide of ammonium, again precipitated by hydrochloric acid. With potash the solution of trichloride of antimony gives a white precipitate of the trioxide, soluble in large excess. Ammonia gives the same precipitate, which is insoluble in large excess; but if tartaric acid is present these precipitates dissolve easily. A liquid containing antimony salts, treated by zinc and dilute sulphuric acid, yields antimoniuretted hydrogen, SbH₃, which

burns with a bluish tinge. A deposit of antimony takes place on a cold porcelain plate held in the flame. This metallic film may be destroyed from arsenic by dissolving it in *aqua regia*, and the solution treated with H₂S, which gives the characteristic orange sulphide. Or moisten the metallic film with nitric acid, evaporate the acid without boiling, a white deposit of trioxide of antimony remains, which gives a black spot with ammonio-nitrate of silver. A film of arsenic treated in the same way gives either a yellow precipitate of arsenite or a red-brown precipitate of arseniate of silver.

II. Mineralogy: Antimony occurs native, occasionally alloyed with a minute portion of silver, iron, or arsenic. Its crystals are rhombohedral; hardness, 3-3.5; sp. gr., 6.62 to 6.72; its luster is metallic; its color and streaks tin white. It is very brittle. It occurs in Sweden, Germany, Austria, France, Borneo, Chili, Mexico, Canada, and New Brunswick.

Arsenical antimony: A mineral, called also Allemontite (q. v.).

Butter of antimony: A name formerly given to the *trichloride*, or *antimonious chloride*, the formula of which is SbCl₃. It is a white highly crystalline mass, very deliquescent. It is used as a caustic for foot-rot in sheep.

Female antimony. [MALE ANTIMONY.]

Glass of antimony: An impure oxide of antimony fused.

Gray antimony: A mineral, called also Stibnite (q. v.).

Male antimony: A trivial name sometimes given to a specimen of antimony ore in which veins of a red or golden color occur, while one in which they are wanting is denominated Female Antimony.

Native antimony: A mineral more usually called simply Antimony (q. v.).

Oxide of antimony, *oxyd of antimony*. [ANTIMONY OXIDE.]

Plumose ore of antimony, *plumose antimonial ore*: (1) A mineral, called also Jamesonite. [FEATHER ORE.] (2) Stibnite (q. v.).

Red antimony: A mineral, called also Kermesite (q. v.).

Saffron of antimony: A compound of oxide and sulphide of antimony. Its formula is SbO₃.2SbS₃. It occurs also as a mineral, and is then called *red antimony ore*.

Sulphid of antimony, *sulphuret of antimony*: A mineral, called also Stibnite (q. v.).

White antimony: A mineral, called also Valentinite (q. v.).

III. Pharmacy:

Black antimony consists of native sulphide of antimony fused and afterward powdered. It is not itself used as a drug, but is employed in preparing tartar emetic, sulphurated antimony, and terchloride of antimony. It is given to horses as an alterative powder: two parts of sulphur, one of saltpeter, and one of black antimony. It is used in the preparation of Bengal signal lights: six parts of saltpeter, two of sulphur, and one of black antimony.

Chloride of antimony: SbCl₃. A solution of it is used as a caustic and escharotic; it is never given internally.

Sulphurated antimony consists of a sulphide of antimony with a small admixture of oxide of antimony. It enters into the composition of compound calomel pills.

Tartarated antimony. [TARTAR EMETIC.]

antimony blende, **antimony bloom**, s. A mineral. The same as VALENTINITE (q. v.).

antimony glance, s. A mineral, called also Stibnite (q. v.).

antimony ochre, s. A mineral, in part Cervantite and in part Volgerite. [See these words.]

antimony oxide, **oxide of antimony**, **oxyd of antimony**, s. A mineral, made by Dana the same as Valentinite, and by others synonymous with White Antimony, Senarmontite, Valentinite, Cervantite, and Kermesite (q. v.).

antimony sulphide, s. A mineral, also called Stibnite (q. v.).

ăn-tĩ-mõr'-âl-ĩsm, s. [Gr. *anti*=against, and Eng. *moralism*.] Opposition to morals.

ăn-tĩ-mõr'-âl-ist, s. [Gr. *anti*=against, and Eng. *moralist*.] An opposer of moralists or of morality, or one alleged to be so.

ăn-tĩ-mũ'-šic-âl, a. [Gr. *anti*=against, and Eng. *musical*.] Opposed to music, through inability to appreciate it, from want of ear, of early training, or both. (*American Review*.)

ăn-tĩ-nă'-tion-âl, a. [Gr. *anti*=against, and Eng. *national*.] Unpatriotic.

ăn-tĩ-něph-rit'-ic, a. & s. [Gr. *anti*=against, and *nephros*=a kidney.]

A. As adjective: Deemed of use against diseases of the kidneys.

bólł, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðhis; sin, aș; expect, Xenophon, exíst. ph = f. -cian, -tian = şan. -tion, -sion = şhñ; -tion, -şion = zhñ. -tious, -cious, -sious = şhş. -ble, -dle, &c. = beł, deł.

B. As substantive: A medicine given in diseases of the kidneys.

***ăn-tîn'-ôm-a-ç-ỹ, s.** [Gr. *anti*=instead of, and *onoma*=name.]

Gram.: A figure in which an appellative is used for a proper name.

ĂN-tĩ-nō'-mĩ-àn, a. & s. [In Ger. *Antinomier*; Gr. *anti*=against, and *nomos*= . . . law, from *nemō*=to deal out, to distribute.]

A. As adjective: Opposed to the law. Pertaining to the Antinomian sect or to their doctrine. (See the substantive.)

"It is a mad conceit of our *Antinomian* heretics, that God sees no sin in His elect; whereas He notes and takes, more tenderly, their offenses than any other."—*Bp. Hall: Rem.*, p. 233.

B. As substantive. [In Ger. *Antinomier*; a term first introduced by Luther.]

1. *Gen.*: One who holds tenets opposed to the authority of the moral law or ten commandments revealed in Scripture. From the apostolic times downward individuals misunderstanding the doctrine of justification by faith "without the deeds of the law" (Rom. iii. 21, 28), have tended to Antinomianism (Rom. vi. 15).

"That doctrine that holds that the covenant of grace is not established upon conditions, and that nothing of performance is required on man's part to give him an interest in it, but only to believe that he is justified; this certainly subverts all the motives of a good life. But this is the doctrine of the *Antinomians*."—*South: Sermons*, vii. 195.

2. *Spec. (pl.)*: A sect which originated with John Agricola, a companion of Luther, about the year 1538. He is said to have held that as the church is not now under the law, but under the gospel, the ten commandments should not be taught to the people. Enemies said that he or his followers considered that a believer might sin at his pleasure, but this is believed to have been a calumny. (*Mosheim*.)

ĂN-tĩ-nō'-mĩ-àn-ĩsm, s. [Eng. *antinomian*, and suff. *-ism*.] The system of doctrine held by the Antinomians.

"*Antinomianism* began in one minister of this diocese [Norwich], and how much it is spread, I had rather lament than speak."—*Bp. Hall: Rem.*, p. 189.

ĂN-tĩn'-ôm-ĩst, s. [Eng. *antinom(y)*; *-ist*.] An Antinomian.

"Great offenders this way are the libertines and *Antinomists*, who quite cancel the whole law of God, under the pretense of Christian liberty."—*Bp. Sanderson: Sermons*, p. 310.

ăn-tĩn'-ôm-ỹ, s. [In Fr. *antinomie*; Sp. & Port. *antinomia*; Gr. *antinomia*=an ambiguity in the law: *anti*=against, and *nomos*=law.]

I. Law:

1. *Gen.*: A contradiction between two laws of any kind, or two portions of the same law.

"*Antinomies* are almost unavoidable in such variety of opinions and answers."—*Baker*.

2. *Spec.*: A contradiction between the Code and Pandects of Justinian.

" . . . and the *antinomies* or contradictions of the Code and Pandects, still exercise the patience and subtlety of modern civilians."—*Gibbon: Decline and Fall*, ch. xliv.

"The *antinomies* or opposite laws of the Code and Pandects are sometimes the cause, and often the excuse, of the glorious uncertainty of the civil law."—*Ibid.*, Note.

II. Phil.: In the Critical Philosophy of Kant, the self-contradiction into which, as he believes, reason falls when it attempts to conceive the complex external phenomena of nature as a cosmos or world.

ĂN-tĩn'-ô-ũs, s. [Lat. *Antinous*; Gr. *Antinoos*. (See Def. I.)]

I. Classical Mythology & History:

1. One of the suitors of Penelope, Ulysses' queen.

2. A beautiful Bithynian youth, a favorite of the Emperor Adrian. He was drowned in the Nile.

II. Astronomy. An old constellation called after the second of these notabilities. It was one of the forty-eight recognized by the ancients, and is the only one of all that number which has been degraded from its pristine rank. It is now included under the Northern constellation Aquila.

ĂN-tĩ-ô'-chĩ-àn (1), a. [From *Antiochia*, now Antakia, a celebrated city on the Orontes, in Syria, built by Antiochus or Seleucus.] Pertaining to Antioch, in Syria, or any other city of the same name. (Anciently there were several.)

Chronol.: The *Antiochian epoch* was the date of the bestowal of liberty on the city of Antioch, just after the battle of Pharsalia. The Syrians dated it from 1st of October, B. C. 48; the Greeks from September, B. C. 49.

ĂN-tĩ-ô'-chĩ-àn (2), a. [From the philosopher Antiochus. See def.] Pertaining to Antiochus. The *Antiochian Sect or Academy*, sometimes called

the *fifth Academy*, was a sect or academy founded by Antiochus, a philosopher, who was contemporary with Cicero. Though nominally an Academic, Antiochus was really a Stoic in his views.

ăn-tĩ-ô'-dōnt-ăl'-gĩc, a. [Gr. *anti*=against; *odontalgia*=the toothache; *odous*, genit. *odontos*=a tooth, and *algos*=pain.] Deemed of use against the toothache. (*Castle: Lexic. Pharm.*)

ĂN-tĩ-ô'-pê, s. [Lat. and Gr.]

1. *Class. Mythology*: The wife of Lycus, king of Thebes. Her history was wild and romantic.

2. *Astronomy*: An asteroid, the ninetyeth found. It was discovered by Luther on the 1st of October, 1866.

ăn-tĩ-pæ-dō-băp'-tĩst, s. [(1) Gr. *anti*=against, and (2) Eng. *Pædobaptist*, from Gr. *pais*, genit. *paidos*=a child, and *baptizō*=to baptize.] Opposed to pædobaptists or their procedure in baptism.

ăn-tĩ-pă'-păl, a. [Gr. *anti*=against, and Eng. *papal*, from Lat. *papa*=(1) a father; (2) (in ecclesiastical writers), a bishop, or specially, the pope.] Opposed to the Pope or the doctrines of the Romish church.

" . . . to turn the current, and conciliate the *antipapal* party . . ."—*Froude: Hist. Eng.*, ch. xxi., vol. iv., p. 331.

ĂN-tĩ-pă'-pĩsm, s. [In Ger. *antipapismus*. From Gr. *anti*=against, and Lat. *papa*=a father, . . . the pope.] Opposition to the Pope.

ăn-tĩ-pă'-pĩs'-tĩc, ăn-tĩ-pă'-pĩs'-tĩc-ăl, a. [Gr. *anti*=against, and Eng. *papist*, *papistical*. In Ger. *antipapistisch*.] Opposed to the Papists or to papistical doctrine or procedure.

"It is pleasant to see how the most *antipapistical* poets are inclined to canonize their friends."—*Jortin: On Milt. Lycidas*.

ăn-tĩ-pă'-ăl-lēl, s. & a. [Gr. *anti*=against, and Eng. *parallel*. In Ger. *antiparallel*.]

A. As substantive:

In Geometry (plural):

(a) Lines making equal angles with two other lines, but in the reverse order. If A B and A C be two lines, and F C and F E two others intersecting them in such a manner that the angle D B F is=D E A, and the angle C=A D E or B D F, then B C and D E are antiparallels to A B and A C, and *vice versa*. In this case A B : A C :: A E : A D :: D B : E C, and F E : F C :: F B : B F :: D E : B C.

(b) Leibnitz called any two lines antiparallel which cut two parallels so that the external angle and the internal one are together=a right angle.

B. As adjective: Acting not in the same manner, but quite in the opposite direction; running in a contrary direction.

"The only way for us, the successors of these ignorant Gentiles, to repair those ruins, to renew the image of God in ourselves, which their idolatrous ignorance defaced, must be to take the opposite course, and to provide our remedy *antiparallel* to their disease."—*Hammond: Serm.*, p. 646.

ăn-tĩ-pă'-ă-lyt'-ĩc, a. & s. [Gr. *anti*=against, and Eng. *paralytic*; Gr. *paralytikos*=affected with paralysis (the palsy).] [PARALYSIS.]

A. As adjective: Deemed of use against the palsy.

B. As substantive: A medicine given against the palsy.

ăn-tĩ-pă'-ă-lyt'-ĩc-ăl, a. [Gr. *anti*=against, and Eng. *paralytical*.] The same as ANTIPARALYTIC, *adj.* (q. v.).

ĂN-tĩ-pă'-ă-s'-tă-sĩs, s. [Gr. *anti*=opposite, and *parastasis*=a putting aside or away; *paristēmi*=to place by or beside.]

Rhet.: The admission of one part of an opponent's argument coupled with a denial of the rest.

ăn-tĩ-pă-thêt'-ĩc, *ăn-tĩ-pă-thêt'-ĩck, ăn-tĩ-pă-thêt'-ĩc-ăl, a. [Gr. *anti*=against, and Eng. *pathetic*.] Having an antipathy or contrariety to. (It is opposed to *sympathetic*.)

"[Being] ty'd upon the sledge, a papist and a protestant in front, two and two together, being two very desperate and *antipathetic* companions, was a very ridiculous scene of cruelty."—*Icon Libell.*, p. 110.

"The circumstances of moral, religious, sympathetic, and *antipathetic* sensibility, when closely considered, will appear to be included in some sort under that of bent of inclination."—*Bowring: Bentham's Works*, vol. i., p. 24.

"The soil is fat and luxurious, and *antipathetical* to all venomous creatures."—*Howell: Vocal Forest*.

ăn-tĩ-pă-thêt'-ĩc-ăl-nēss, s. [Eng. *antipathetical*; *-ness*.] The quality or state of having a contrariety or antipathy to. (*Johnson*.)

ăn-tĩ-păth'-ĩc, a. [In Fr. *antipathique*; Sp. & Ital. *antipatico*; Port. *antipathico*; Gr. *antipathēs*=(1) in return for suffering, (2) of opposite feelings or properties.]

1. *Gen.*: Having opposite feelings.

2. *Med.*: The same as ALLOPATHIC (q. v.).

ĂN-tĩp'-ă-thĩse, v. i. [Eng. *antipath(y)*; *-ise*.] To be opposed to. (Usually followed by *against*.) (*Adams: Works*, iii. 157.)

ĂN-tĩp'-ă-thĩte, s. [Eng. *antipathy*; *-ite*.] One who has an aversion to anything.

"An *antipathite* to virtue."—*Feltham: Resolve*, 56. (*Richardson*.)

ĂN-tĩp'-ă-thoũs, a. [Eng. *antipath(y)*; *-ous*.] Having an aversion to; in contrariety to.

"As if she saw something *antipathous*

Unto her virtuous life."

Beaumont & Fletcher: Queen of Corinth, iii. 2.

ĂN-tĩp'-ă-thỹ, s. [In Dan. *antipathi*; Dut., Ger. & Fr. *antipathie*; Sp. & Ital. *antipatia*; Port. & Lat. *antipathia*, from Gr. *antipatheia*=an opposite feeling, aversion; *antipatheō*=to have an aversion; *anti*=against, and *pathein*, 2 aor. inf. of *paschō*=to suffer; also *pathos*=suffering, feeling.]

A. Ordinary Language:

1. *Of beings susceptible of emotion*: The state of feeling exactly the contrary to what another feels; the opposite of sympathy. Antipathy may be strong or weak; it may be founded on contrariety of nature, and therefore be permanent; or it may arise from something local, conventional, or temporary, in which case it may pass away. The natural result of this pronounced contrariety of feeling is a drawing back from, an aversion to, a hatred of. Though really a distinct meaning from the former, the two are so closely connected that they are scarcely ever dis severed. Antipathy is used—

(a) Of man to man.

"*Antipathy*; ill will, viz., toward this or that particular individual."—*Bowring: Bentham's Works*, vol. i., p. 218.

"*Antipathy* or resentment requires always to be regulated, to prevent its doing mischief."—*Ibid.*, vol. i., p. 11.

"The personal and perpetual *antipathy* he had for that family . . ."—*Goldsmith: The Bee*, No. viii.

(b) Of man to any of the inferior animals, or of them to him, or to each other.

"*Antipathies* are none. No foe to man
Lurks in the serpent now: the mother sees,
And smiles to see, her infant's playful hand
Stretch'd forth to dally with the crested worm,
To stroke his azure neck, or to receive
The lambent homage of his arrowy tongue."

Cowper: Task, bk. vi.

(c) Of man to an inanimate thing, or to what is abstract in place of concrete.

"A man may cry out against sin, of policy; but he cannot abhor it but by virtue of a godly *antipathy* against it."—*Bunyan: The Pilgrim's Progress*, pt. i.

¶ Hatred is entertained against persons; antipathy is felt to persons or things; and repugnancy to actions which one is called on to perform.

2. *Of inanimate things, or of abstractions*: Mutual repulsion, as that of oil and water, or certain other chemical substances to each other, or, figuratively, of good and evil.

"All concords and discords of music are, no doubt, sympathies and *antipathies* of sounds."—*Bacon: Nat. Hist.*, Cent. iii., § 278.

"Another ill accident is, if the seed happen to have touched oil, or anything that is fat, for those substances have an *antipathy* with nourishment of water."—*Ibid.*, Cent. vii., § 669.

"Ask you what provocation I have had?

The strong *antipathy* of good to bad.

When truth or virtue an affront endures,

Th' affront is mine, my friend, and should be yours."

Pope: Epilogue to Satires.

¶ Formerly *antipathy* might be followed by *with*; now *to*, *against*, or *for* is used. (See the examples already given.)

B. Technically:

1. *Med.*: Internal horror and distress on the perception of particular objects, with great restlessness or with fainting. (*Copland: Dict. Pract. Med.*, 1858.)

2. *Painting*: Contrast degradation of colors. The mixing of incongruous colors, such as purple with yellow, or green with red, the result being that the brilliancy of the respective colors is destroyed.

ĂN-tĩ-pă-trĩ-ôt'-ĩc, a. [Gr. *anti*=against, and Eng. *patriotic*.] Opposed to patriotic conduct.

ăn-tĩ-pă-trĩ-ô-tĩsm, s. [Gr. *anti*=against, and Eng. *patriotism*.] Unpatriotic conduct. (*Carlyle*.)

ăn-tĩ-pê-dō-băp'-tĩst, s. [ANTIPÆDOBAPTIST.]

ăn-tĩ-pêr-ĩ-ôđ'-ĩc, a. [Gr. *anti*=against, and Eng. *periodic*.]

A. As adjective: Designed to counteract periodic fevers.

" . . . the *antiperiodic* remedies, such as quinine or arsenical solution."—*Dr. Joseph Browne: Cycl. Pract. Med.*, vol. ii., p. 224.

B. As substantive: A medicine designed to cure diseases, like intermittent fever, which return at periodic times. They consist (a) of various remedies

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pîne, pît, sîre, sîr, marîne; gô, pôť, or. wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trỹ, Sýrian. æ, œ = ê; ey = â. qu = kw.

derived from the cinchona tree, viz., "bark," the salts of quinine, quinidine, cinchonine, and cinchonidine; (b) of arsenical solution; (c) of the sulphate of zinc; and (d) of various bitters and combinations of them, with aromatics. Garrod combines "antiperiodics" with "nervine tonics," and places them as the second order of his Class II., Sub-class 3.

"... and if the antiperiodic be employed in this cure."—Dr. Joseph Browne: *Cycl. Pract. Med.*, vol. ii., p. 227.

ăn-tĩ-pěr-i-stāl'-sīs, s. [Gr. *anti*=against, and *peristaltikos*=claspings and compressing; *peristellō*=to dress, to clothe: *peri*=around, and *stellō*=to set, to send.] Resistance to the peristaltic motion of the bowels. [PERISTALTIC.]

"But Dr. Brunton has very ably shown that there is no antiperistalsis of the bowels under these circumstances."—Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 237.

ăn-tĩ-pěr-i-stāl'-tĩc, a. [Gr. *anti*=against, and Eng. *peristaltic*. In Fr. *peristaltique*; Port. *antiperistaltico*.] Opposed to peristaltic (q. v.), or pertaining to antiperistalsis. [PERISTALTIC.]

"... an inverted direction of the action of the muscular tissue of the intestines (*antiperistaltic* action)."—Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 237.

ăn-tĩ-pěr-is-ta-sīs, s. [In Ger. *antiperistase*; Sp. *antiperistasis*; Gr. *antiperistasis*: *anti*=against, and *peristasis*=a standing round, . . . circumstance; *peristēmī*=to stand round; *peri*=round about, and *histēmī*=to make to stand.] A term used by Aristotle and others to signify the heightening of any quality by the reaction produced in it by the action of its opposite. Thus in warm countries the influence of even hot air blowing on water in porous vessels is to cool the water. So also an unjust attack on one's character will often raise instead of impairing it.

¶ Bacon uses the Greek accusative.

"... which is that they term cold or hot per antiperistasin, that is, environing by contraries."—Bacon: *Works* (ed. 1765), vol. i.; *Colors of Good and Evil*, ch. vii., p. 441.

ăn-tĩ-pěr-i-stāt'-ic, a. [Gr. *anti*=against, and Eng. *peristatic*. Pertaining to antiperistasis. (Ash.)

ăn-tĩ-pēs-tĩ-lēn'-tial, a. [Gr. *anti*=against, and Eng. *pestilential*. In Fr. *antipestilentiel*; Sp. *antipestilencial*.] Counteracting pestilential influences; checking contagion and infection.

"Perfumes correct the air before it is attracted by the lungs; or, rather, antipestilential unguents, to anoint the nostrils with."—Harvey on the Plague.

ăn-tĩ-phǎr-i-sā'-ic, a. [Gr. *anti*=against, and Eng. *pharisaic*.] Against the Pharisees, their tenets or procedure.

"... the antipharisaic discourse, Matt. xxiii."—Strauss: *Life of Jesus* (transl. 1846), § 117.

ăn-tĩ-phar'-mĩc, a. Counteractive of poison; antidotal.

ăn-tĩ-phĩl-ō-sōph'-ĩ-cal, a. [Gr. *anti*=against, and Eng. *philosophical*. In Fr. *antiphilosophique*.] Opposed to philosophy.

ăn-tĩ-phĩl-ō-gĩs'-tĩ-an, s. [Gr. *anti*=against, and *phlogizō*=to set on fire, to burn; *phlox*=a flame.] One opposed to the old doctrine of Phlogiston (q. v.).

ăn-tĩ-phĩl-ō-gĩs'-tĩc, ***ăn-tĩ-phĩl-ō-gĩs'-tĩck**, a. & s. [Gr. *anti*=against, and Eng. *phlogistic*.]

A. As adjective:

1. Med.: Tending to counteract burning heat; antifebrile.

"I soon discovered . . . under what circumstances recourse was to be had to the lancet, and the antiphlogistic regimen."—Sir W. Fordyce, on the Muriatic Acid, p. 8.

"... and the antiphlogistic remedies alone persevered in."—Dr. Joseph Browne: *Cycl. of Pract. Med.*, vol. ii., p. 227.

2. Chem.: Opposed to the old doctrine of phlogiston. [PHLOGISTON.]

B. As substantive: A medicine designed to counteract phlogistic tendencies.

"It is both nunctuous and penetrating, a powerful antiphlogistic, and preservative against corruption and infection."—Bp. Berkeley: *Stris*, 59.

ăn-tĩ-phōn, s. [ANTIPHONY.]

ăn-tĩph'-ōn-al, a. & s. [Eng. *antiphon*; -al.]

A. As adjective: Pertaining to antiphony. [ANTIPHONY (2).]

"Antiphonal singing was first brought into the Church of Milan in imitation of the custom of the Eastern churches."—Bingham: *Christian Antiquities* (ed. 1855), vol. v., p. 13.

"He [Calvin] thought that novelty was sure to succeed, that the practice of antiphonal chanting was superstitious," &c.—Warton: *Hist. Eng. Poet.*, iii. 164.

B. As substantive: The same as ANTIPHONARY (q. v.).

"... to bring and deliver unto you all antiphonals, missals, grayles, processions," &c.—Burnet: *Hist. Reformed Records*, pt. ii., bk. i., 47.

ăn-tĩph'-ōn-ār-ỹ, ***ăn-tĩph'-ōn-ēre**, ***ăn-tĩph'-ōn-ēr**, **ăn-tĩph'-ōn-ār** (Eng.), **ăn-tĩ-phōn-ār'-ĩ-ũm** (Mediæv. Lat.), s. [In Fr. *antiphonaire*, *antiphonier*; from Gr. *antiphōnos*=(1) an accord in the octave; (2) an antiphon, an anthem.] A service-book compiled by Pope Gregory the Great. It comprised all the invitatories, responsories, collects, and whatever else was sung or said in the choir except the lessons. From the responses contained in it, it was sometimes called *responsorium*. Similar compilations, or books of anthems, also received the name of antiphonaries. [ANTHEM.]

"He O alma redemptoris herde syngne,
As children lerned her antiphonere."

Chaucer: C. T., 14,930.

ăn-tĩ-phō-nēt'-ic, a. [Gr. *anti*=opposite, and Eng. *phonetic* (q. v.).] Answering to, rhyming. (Barham: *Ingoldsby Legends*; *Cynotaph*.)

ăn-tĩ-phōn'-ic, **ăn-tĩ-phōn'-ic-al**, a. [Eng. *antiphon*; -ic; -ical. In Gr. *antiphōnos*.] Pertaining to antiphony.

"... they sung in an antiphonical way."—Wheatley on the Common Prayer, p. 161.

ăn-tĩph'-ōn-ỹ, **ăn-tĩ-phōn**, ***ăn-tĩ-phō-na**, s. [In Ger. *antiphonie*; Ital. *antifona*; Gr. *antiphōnēō*=to sound in answer: *anti*=against, and *phōnēō*=to sound; *phōnē*=a sound.]

1. Opposition or contrariety of sound.

"True it is that the harmony of music, whether it be in song or instrument, hath symphony by antiphony (that is to say), the accord ariseth from discord and of contrary notes is composed a sweet tune."—Holland: *Plutarch*, p. 186. (Richardson.)

2. The alternate chanting or singing in a cathedral, or similar service by the choir, divided into two parts for the purpose, and usually sitting upon opposite sides. It is sometimes used also when the parts are repeated instead of sung. Antiphony differs from symphony, for in the latter case the whole choir sing the same part. It also differs from responsorium, in which the verse is spoken or sung by only one person instead of many.

"In antiphons thus tune we female complaints."

Old Play, vii. 497. (Nares.)

"These are the pretty responsories, these are the dear antiphonies, that so bewitched of late our prelates and their chaplains with the goodly echo they made."—Milton: *Areop*.

"Then came the epistle, prayers, antiphonies, and a benediction."—Macaulay: *Hist. Eng.*, ch. xiv.

"... when the antiphonies are chanted, one party singing, with fury and gnashing of teeth."—Le Quincey: *Works* (ed. 1863), vol. ii., Note, pp. 180-1.

3. The words given out to be sung by alternate choirs.

"... this [alternate psalmody] for its division into two parts, and alternate answers, was commonly called antiphony."—Bingham: *Christian Antiquities* (ed. 1855), vol. v., p. 13.

4. A composition made of several verses taken from different psalms, the expressions of sentiment in which are appropriate to the occasion for which the antiphony is prepared.

ăn-tĩph'-ra-sīs, s. [In Ger. & Fr. *antiphraise*; Sp. *antifrasís*; Port. *antifrase*, *antiphraisís*; Gr. *antiphrazis*, from *antiphrazō*=to express by antithesis or negation: *anti*=against, and *phrazō*=to intimate.]

Rhet. & Gram.: The use of words in a sense contrary to their ordinary one. In Greek the change was of words with an evil sense into those with a good meaning, but in English it may also be an exchange of good for bad.

"You now find no cause to repent that you never dipt your hands in the bloody high courts of justice, so called only by antiphrazis."—South.

ăn-tĩ-phrās'-tĩc, **ăn-tĩ-phrās'-tĩc-al**, a. [Gr. *antiphraastikos*.] Pertaining to antiphrazis.

ăn-tĩ-phrās'-tĩc-al-ly, adv. [Eng. *antiphraastical*; -ly.] In an antiphraastic manner; in the form of speech called antiphrazis.

"The unruliness of whose pen, and the virulency thereof, none hath more felt than myself, as well in his book of Mitigation as in his (*antiphraastically* so called) Sober Reckoning."—Bp. Morton's *Discharge*, p. 206.

ăn-tĩ-phthĩs'-ic, **ăn-tĩ-phthĩs'-ic-al** (ph silent), a. [Gr. *anti*=against, and *phthisikos*=consumptive: *phthisis*=consumption; *phthiō*=to decay.] Given against consumption. (*Glossog. Nov.*, 2d ed.)

ăn-tĩ-pōd-ăg'-ric, a. & s. [Gr. *anti*=against, and *podagricos*=gouty; *podagra*=(1) a trap for the feet, (2) gout (Lat. *podagra*=gout): *pous*, genit. *podos*=a foot, and *agra*=hunting.]

A. As adjective: Deemed of use against the gout.

B. As substantive: A medicine given against the gout; an antarthritic.

ăn-tĩp'-ōd-al, a. & s. [Eng. *antipod(e)*; -al. In Port. *antipodal*.]

A. As adjective: Pertaining to the antipodes, or the part of the world which they inhabit.

B. As substantive: One inhabiting the other side of the world from that in which the speaker or writer is. [ANTIPODES.]

"The Americans are antipodals unto the Indians."—Browne.

ăn-tĩ-pōde, **ăn-tĩ-pōde** (sing.); **ăn-tĩp'-ō-dēs**, **ăn-tĩp'-ō-dēs** (plur.), s. [In Sw. & Dan. *antipoder* (pl.); Ger. *antipoden* (pl.); Fr. *antipode* (sing.), *antipodes* (pl.); Sp. & Port. *antipoda* (sing.); Ital. *antipodi* (pl.); Lat. *antipodes* (pl.); Gr. *antipodes*, pl. of *antipous* (a word first introduced by Plato)=with the feet opposite. From *anti*=opposite to, and *pous*=a foot; *podes*=feet.]

¶ Rare in the singular, common in the plural.

I. Lit. (plur.): People who, from their situation on the globe, have their feet opposite to those of the speaker or writer who applies to them the term antipodes. For example, if Greenwich Observatory is in lat. 51° 28' N., and long. 0° E. or W., then the antipodes, if any exist, of the astronomers at Greenwich must be sought in lat. 51° 28' S. and long. 180° E. or W. That point falls in the ocean S. E. of New Zealand, near Antipodes Island. Those who are our antipodes have seasons exactly like those of ours, but reversed in time, their shortest day being our longest, their winter our summer, and *vice versa*.

II. Met.: Something exactly and completely opposed or opposite to another.

ăn-tĩp'-ō-dē'-an, a. & s. [Eng. *antipode(s)*; suff. -an.]

A. As adj.: Pertaining to the antipodes.

B. As subst.: One who lives at the antipodes.

ăn-tĩ-pōi'-sōn, s. [Gr. *anti*=against, and Eng. *poison*.] An antidote to poison of some kind or other.

"In venomous natures, something may be amiable: poisons afford antipoisons: nothing is totally or altogether uselessly bad."—Browne: *Christ. Mor.*, xxviii. 1.

ăn-tĩ-pōpe, s. [Gr. *anti*=against, and Eng. *pope*. In Fr. *antipape*; Sp. & Ital. *antipapa*.] One who usurps the popedom, in opposition to the individual elected in the normal way.

"This house is famous in history for the retreat of an antipope, who called himself Felix V."—Addison.

ăn-tĩ-pōp'-u-lar, a. [Gr. *anti*=against, and Eng. *popular*.] Against the interests or opinions of the people.

"The last two tables are the work of the second decemvirs, whose government was antipopular."—Lewis: *Cred. Early Rom. Hist.*, ch. xii., pt. iii., § 54.

ăn-tĩ-pōrt, s. [In Ital. *antiporta*, *antiporto*, from Gr. *anti*=opposite to, and Lat. *porta*=a city gate, a gate.] An outer gate; an outer door.

"If a Christian or Jew should but lift up the antiport, and set one step into it, he profaned it."—Smith: *Mann. of the Turks*, p. 75.

ăn-tĩ-prăc'-tĩce, v. i. [Gr. *anti*=against, and Eng. *practice*.] To oppose.

ăn-tĩ-prē-lăt'-ic, ***ăn-tĩ-prē-lăt'-ick**, **ăn-tĩ-prē-lăt'-ic-al**, a. [Gr. *anti*=against, and Eng. *prelatic*; -ical.] Opposed to prelatists or to prelacy.

"The rooters, the antiprelatic party, declaim against me."—Sir E. Dering: *Speeches*, p. 161.

ăn-tĩ-priēst, s. [Gr. *anti*=against, and Eng. *priest*.] One opposed to priests.

"While they are afraid of being guided by priests, they consent to be governed by antipriests."—Waterland: *Ch.*, p. 28.

ăn-tĩ-priēst'-craft, s. [Gr. *anti*=against, and Eng. *priestcraft*.] Opposition to priestcraft.

"I hope she [the Church of England] is secure from lay bigotry and antipriestcraft."—Burke: *Speech on the Claims of the Church*.

ăn-tĩ-psor'-ic (p silent), a. [From Gr. *anti*=against, and Eng. *psoric*. From Lat. *psora*, Gr. *psōra*=the itch or the mange; *psaō*, or *psōō*=to rub. In Fr. *antipsorique*.] Thought to be useful in cases of the itch.

A. As substantive: One opposed to the Puritans or to Puritanism.

"... Dr. Samuel Parker, famous for his tergiversation with the times, now an *antipuritan* in the extreme."—*Warton: Notes to Milton's Smaller Poems*, p. 501.

B. As adjective: Opposed to Puritanism.

"... the purification of our lighter literature from that foul taint which had been contracted during the *antipuritan* reaction."—*Macaulay: Hist. Eng.*, ch. xiv.

ăn-ti-pyr-ēt'-ic, *a. & s.* [Gr. *anti*=against, and Eng. *pyretic*. From Gr. *pyretos*=(1) fiery heat, (2) fever; *pyr*=fire. In Port. *antipyretico*.]

A. As adj.: Deemed of use against fever.

B. As substantive: A medicine given against fever.

ăn-ti-pyr'-ic, *a.* Opposed to suppuration.

ăn-ti-pyr'-in, *s.* An antipyretic (*q. v.*).

ăn-ti-quār'-i-an, *a. & s.* [In Sw. *antiquarie*, *s.*; Dan. *antiquarist*, *a.*, *antiquarius*, *s.*; Ger. *antiquar*, *s.* From Lat. *antiquarius*, *a. & s.*]

A. As adjective: Pertaining to antiquarians or to antiquity; antique, old.

B. As substantive:

1. An antiquary.

"Thus Cincius is described by Livy as being a diligent *antiquarian*, in relation to events prior to his own age."—*Lewis: Early Rom. Hist.*, ch. ii., § 8.

2. A large kind of drawing paper.

ăn-ti-quār'-i-an-ism, *s.* [Eng. *antiquarian*; suff. *-ism*.] Love of antiquities or of antiquarian research.

"I used to despise him for his *antiquarianism*."—*Warburton*, Letter 221.

***ăn-ti-quār'-ism**, *s.* [Eng. *antiquar(y)*; *-ism*.] The same as ANTIQUARIANISM (*q. v.*).

"... a question above *antiquarism*."—*Browne: Hydriothaphia*.

ăn-ti-quar-ỹ, *s. & a.* [In Ger. *antiquar*; Fr. *antiquaire*; Sp., Port. & Ital. *antiquario*; from Lat. *antiquarius*, *s. & a.*]

A. As substantive:

1. Originally: A keeper of the *antiquarium* or cabinet of antiquities.

2. A student of antiquity, or rather of the relics, such as inscriptions, old buildings, manuscripts, &c., which antiquity has left behind.

"With sharpen'd sight pale *antiquaries* pore,
Th' inscription value, but the rust adore."—*Pope*.

B. As adjective: Antique, old.

"Here's Nestor,
Instructed by the *antiquary* times;
He must, he is, he cannot but be wise."
Shakesp.: Troilus and Cressida, ii. 3.

ăn-ti-quāte, *v. t.* [In Port. *antiquar*. From Lat. *antiquatus*, *pa. par.* of *antiquo*=to restore a thing to its former condition.] To render anything out of date, and therefore presumably less valuable than once it was. To render obsolete. When a law becomes antiquated it is rarely put in force, if indeed it is not swept from the statute-book.

"The growth of Christianity in this kingdom might reasonably introduce new laws, and *antiquate* or abrogate some old ones, that seemed less consistent with the Christian doctrines."—*Hale*.

[The verb is rarely used except in its past participle.

ăn-ti-quā-tēd, *pa. par. & a.* [ANTIQUATE.]

As adjective:

1. Out of date, obsolete, of less value than formerly; superseded, abrogated.

"Almighty Latium, with her cities crown'd,
Shall like an *antiquated* fable sound."—*Addison*.

2. Made to imitate antiquity.

"In reading a style judiciously *antiquated*, one finds a pleasure not unlike that of traveling on an old Roman way."—*Pope: Homer's Odyssey*, Postscript.

†3. Old, but in nowise out of date.

"The *antiquated* earth, as one might say."
Wordsworth: Sonnet to a Friend (1807).

ăn-ti-quā-tēd-ness, **ăn-ti-quāte-ness**, *s.* [Eng. *antiquated*, *-ness*; *antiquate*, *-ness*.] The quality or state of being out of date, obsolete, or superseded.

"... that no one may pretend *antiquateness* of the Old Testament."—*Appendix to Life of Mede*, xli.

ăn-ti-quā-tion, *s.* [Lat. *antiquatio*=an abrogating, an annulling; from *antiquo*, *v. t.*] The act or process of rendering obsolete; the state of being

rendered obsolete. *Spec.*, used of the antiquation of a law, which is properly its repeal or abrogation, but is sometimes more loosely used for the refusal to pass it when it appears as a bill for discussion.

"You bring forth now, great queen, as you foresaw,
An *antiquation* of the salique law."
Cartwright: Poem to the Queen.

"Reason is a law
High and divine, engrav'd in every breast,
Which must no change nor *antiquation* know."
Beaumont: Psyche, xv. 164.

"... *antiquation*, which is the refusing to pass a law."—*Ency. Lond.*

ăn-ti-que, ***ăn-ti-que**, *a. & s.* [In Ger. *antik*, *a.*, *antike*, *s.*; Fr. *antique*, *a. & s.*; Ital. *antico*, *s.* From Lat. *antiquus*=former, old, ancient; *ante*=before.]

A. As adjective:

1. Ancient, old, that has long existed. It may be used (*a*) in the geological sense=of an age measured by millions of years; or (*b*) historically=prior to the birth of Christ; or (*c*) mediæval; or (*d*) having been long in existence compared with others of its kind. [ANCIENT, ANTIQUITY.]

"... a rock very different in age from the *antique* and crystalline gneiss of Scotland and Scandinavia."—*Murchison: Siluria*, ch. xiv.

"The seals which we have remaining of Julius Cæsar, which we know to be *antique*, have the star of Venus over them."—*Dryden*.

"Huge convent domes with pinnacles and towers
And *antique* castles seen through drizzling showers."
Wordsworth: Descriptive Sketches.

"Ye distant spires, ye *antique* towers."
Gray: View of Eton.

2. Old-fashioned, antiquated.

"The first, if I remember, is a sort of a buff waistcoat, made *antique* fashion, . . ."—*Goldsmith: The Bee*, No. ii.

3. Odd, antic. (See ANTIC, which was originally the same word as *antique*.)

"And sooner may a gulling weather-spy,
By drawing forth heav'n's scheme, tell certainly,
What fashion'd hats, or ruffs, or suits, next year
Our giddy-headed *antique* youth will wear."
Donne.

B. As substantive, it is frequently used in the plural ANTQUES=such busts, statues, vases, &c., as have come down from classic antiquity, and are prized for their value as works of genius and art no less than for the light they throw on the life of the Old World.

"Misshapen monuments and maim'd *antiques*."
Byron: Eng. Bards and Scotch Reviewers.

ăn-ti-que-ly, *adv.* [Eng. *antique*; *-ly*.] In an antique way; after the fashion of antiquity.

ăn-ti-que-ness, *s.* [Eng. *antique*; *-ness*.] The quality of being antique.

"We may discover something venerable in the *antiqueness* of the work."—*Addison*.

ăn-ti-ques, *s. pl.* [ANTIQUÉ.]

ăn-ti-qi-tār'-i-an (*ui=wī*), *s.* [Eng. *antiquit(y)*; *-arian*.] One who praises bygone days; a mediævalist. (*Milton: Of Ref. in Eng.*, bk. i.)

ăn-ti-qi-ti-ēs (*ui=wī*), *s. pl.* [ANTIQUITY.]

ăn-ti-qi-ti-ỹ, ***ăn-ti-qi-ti-ē** (*ui=wī*), *s.* [Fr. *antiquité*, from Lat. *antiquitas*, *antiquus*=ancient.]

A. Singular:

1. The state of having existed long ago; the state of being ancient.

1. *By the geological standard*: Vast and uncertain age.

"... inferiority in position is connected with the superior *antiquity* of granite."—*Lyell: Manual of Geol.*, 4th ed., ch. xxxiv.

Antiquity of man: The specific term applied to the hypothesis now generally accepted by geologists and other scientific investigators as correct, that man came into being not later than the glacial period, if indeed he did not exist in pre-glacial times. From the historic point of view this makes him very "antique," though by the geological standard the date of his birth is exceedingly modern. (*Lyell: Antiquity of Man*.)

2. *By the historic standard*:

(*a*) Ancient times, especially those from the earliest known period to the fall of the Roman empire.

"I mention Aristotle, Polybius, and Cicero, the greatest philosopher, the most impartial historian, and the most consummate statesman of all *antiquity*."—*Addison*.

(*b*) Sometimes the word in this sense is used much more vaguely.

"From a period of immemorial *antiquity* it had been the practice of every English government to contract debts."—*Macaulay: Hist. Eng.*, ch. iii.

3. *By the standard of human or other life or existence*. *Ludicrously*: Old age.

"Par. Hadst thou not the privilege of *antiquity* upon thee—"
Shakesp.: All's Well that Ends Well, ii. 3.

II. The ancients, the people who lived during the times mentioned under No. 2.

"Wherefore doth vaine *antiquitie* so vaunt,
Her ancient monuments of mightie peeres?"
Spenser: Sonnet on Scanderbeg.

B. Plural: Antiquities signify such coins, inscriptions, statues, weapons, sepulchral urns, ruined edifices, nay, even manuscripts, as have come down to us from the classical and other nations of antiquity, or from the early period of our own country's history. They are valued as confirming, checking, or enlarging the information given by historians, or in some cases as laying the basis for reconstructing the most outstanding events connected with nations or periods regarding which ordinary histories are silent.

"So of histories we may find three kinds: Memorials, Perfect Histories, and *Antiquities*; for memorials are history unfinished, or the first or rough draughts of history; and *antiquities* are history defaced, or some remnants of history which have casually escaped the shipwreck of time."—*Bacon: Adv. of Learn.*, bk. ii.

ăn-ti-rhœ'-a, *s.* [Gr. *anti*=against; *rhœ*=to flow. Named from being used against hæmorrhage.] A genus of plants belonging to the order Cinchonaceæ (Cinchonads). The species are found in Mauritius and Bourbon. The root and bark of the *A. verticillata* are believed to be very astringent.

ăn-ti-rhœ-măt'-ic (*h* silent), *a. & s.* [Gr. *anti*=against, and Eng. *rheumatic*.]

1. *As adjective*: Deemed of use against rheumatism.

2. *As substantive*: A medicine given against rheumatism.

ăn-ti-rêv-ô-lû'-tion-ar-ỹ, *a.* [Gr. *anti*=against, and Eng. *revolutionary*. In Fr. *antirévolutionnaire*.] Opposed to political, and especially to sanguinary, revolution.

"... to disgorge their *antirevolutionary* pelf."—*Burke: Regicide Peace*.

ăn-ti-rêv-ô-lû'-tion-ist, *a.* [Gr. *anti*=against, and Eng. *revolutionary*.] One opposed to revolution or to revolutionary parties.

"... the apartment called by the *antirevolutionists*, 'the plotting parlor.'"—*Guthrie: Eng.*

ăn-ti-rhî-nũm (*h* silent), *s.* [In Sp., Port. & Ital. *antirrhino*. From Lat. *antirrhinon*, a plant, *Lychnis githago* (?); Gr. *antirrhinon*=snap-dragon: *anti*=compared with; *rhîs*, genit. *rhînos*=the nose. Nose-like.] Snapdragon. A genus of plants

Antirrhinum Majus.

1. Upper portion of a plant of *Antirrhinum majus* (Snapdragon). 2. Corolla cut open, showing stamens. 3. Ripe fruit.

belonging to the order Scrophulariaceæ, or Figworts. The *A. Orontium*, or Lesser Snapdragon, and the *A. majus*, or Great Snapdragon, are included in this genus.

ăn-ti-rũ-mor, *v. t.* [Gr. *anti*, and Eng. *rumor*.] To spread a report contrary to one generally current. (*Fuller: Ch. Hist.*, III. viii., § 14.)

ăn-ti-săb-ba-tă-r-i-an, *s.* [Gr. *anti*=against, and Eng. *Sabbatarian*.] One who holds that the Jewish Sabbath was part of the ceremonial rather than of the moral law, and that, in its essential character, it is different from the "Lord's Day" of the New Testament.

"The *antisabbatarians* hold the Sabbath day, or that which we call the Lord's day, to be no more a Sabbath: in which they go about to violate all religion; for take away the Sabbath, and farewell religion."—*Pagitt: Heresiography*, p. 119.

ăn-ti-să-bi-an, *a.* [Gr. *anti*=against, and Eng. *Sabian* (*q. v.*).] Opposed to Sabianism, that is, to the worship of the heavenly bodies. (*Faber*.)

ăn-ti-să-ěr-dō-tal, *a.* [Gr. *anti*=against, and Eng. *sacerdotal*.] Opposed to the priestly office or procedure.

"The charge of such sacerdotal craft hath often been unjustly laid by *antisacerdotal* pride or resentment."—*Waterland: Ch.*, p. 58.

ăn-ti-schô-lă-s'-tîc, *a.* [Gr. *anti*=against, and Eng. *scholastic*.] Opposed to what is scholastic. (*S. T. Coleridge*.)

ăn-ti-sci'-aŋs (*Eng.*), **ăn-ti-sci'-i** (*Lat.*), *s. pl.* [In Fr. *antiscien*; Lat. *antiscii*; Gr. *antiskioi*; *anti*=opposite, and *skia*=a shadow.]. [ANTŒCI.] *Geog. & Astron.*: Two sets of people, whose shadows at the same moment fall in opposite directions. The parties south of the tropic of Capricorn are always antiscians to those north of the tropic of Cancer, and *vice versa*.

ăn-ti-scor-bû'-tîc, ***ăn-ti-scor-bû'-tîck**, *a. & s.* [Gr. *anti*=against, and Eng. *scorbutic*; Ger. *antiscorbutisch*; Fr. *antiscorbutique*; Sp., Port. & Ital. *antiscorbutico*.]

A. As adjective: Deemed of use against scurvy. (*Glossog. Nov.*, 2d ed.)

B. As substantive: A medicine deemed of use against scurvy.

ăn-ti-scor-bû'-tîc-al, *a.* [Eng. *antiscorbutic*; -al.] [ANTISCORBUTIC.]

ăn-ti-scrip'-tû-ral, *a.* [Gr. *anti*=against, and Eng. *scriptural*.] Opposed to Scripture.

ăn-ti-scrip'-tû-rîsm, *s.* [Gr. *anti*=against, and Eng. *scripture*; -ism.] Opposition to Scripture.

ăn-ti-scrip'-tû-rîst, *s.* [Gr. *anti*=against, and Eng. *scripturist* (q. v.).] One opposed to Scripture.

Ăn-ti-Sêm'-ite, *s.* One who is opposed to the social or political influence of Jews, or who favors the suppression of Judaism or the persecution of Hebrews by political methods.

Ăn-ti-sêm-it'-ic, *a.* Pertaining to, or having the characteristics of, Anti-Semitism.

Ăn-ti-sêm-it-îsm, *s.* Political or social antagonism to the Jews, as manifested in Germany, Russia, and Austria, beginning about 1878.

ăn-ti-sêp'-sis, *s.* [Gr. *anti*=against, and *sêpsis*=putrefaction, from *sêpō*=to make rotten.] The exclusion of microbes or bacteria from wounds, &c., by the use of antiseptics or other means in order to prevent putrefaction, infection, or blood-poisoning. The antiseptic treatment usually is as follows: The wound is first cleaned with soap and water and an antiseptic mixture consisting of bichloride of mercury solution 1-4000, mixed with carbolic acid solution 1-200, is applied. Iodoform gauze is then put on, then plain gauze, cotton and the bandage.

ăn-ti-sêp'-tîc, ***ăn-ti-sêp'-tîck**, *a. & s.* [In Ger. *antiseptisch*; Fr. *antiseptique*; Port. *antiseptico*; Gr. *anti*=against, and *sêptos*=putrid, decayed; *sêpō*=to make rotten or putrid.]

A. As adjective: Counteracting the tendency to putrefaction.

B. As substantive: A substance which has the effect of counteracting the tendency to putrefaction. Garrod makes "Disinfectants and Antiseptics" the second order of his "Division III. Chemical agents used for other than their medicinal properties." Antiseptics prevent chemical change by destroying the putrefactive microbes or bacteria, the chemical composition of the body still in many cases remaining the same; while disinfectants decompose and remove the infectious matter itself. Antiseptics are called also *COLYTRICS* (q. v.). Among them may be named carbolic acid, alcohol, sulphurous acid, chloride of sodium (common salt), corrosive sublimate, arsenic, &c.

antiseptic surgery, *s.* Surgery in which the danger of putrefaction or blood-poisoning is guarded against by means of antiseptics (q. v.).

ăn-ti-sêp'-tîc-al, *a.* [Eng. *antiseptic*; -al.] Pertaining to an antiseptic; counteracting the tendency to putrefaction.

ăn-ti-slă'-vêr-ÿ, *a. & s.* [Gr. *anti*=against, and Eng. *slavery*.]

1. As adjective: Opposed to slavery.

2. As substantive: Antagonism to slavery.

ăn-ti-sô'-cial (*cial*=*shâl*), *a.* [Gr. *anti*=against, and Eng. *social*. In Fr. *antisocial*.]

1. Opposed to mingling in society; disposed to solitude.

2. Opposed to the principles on which society is founded.

ăn-ti-spăs'-îs, *s.* [In Port. *antispase*; Gr. *antispasis*=a drawing back of the humors of the body; *antispao*=to draw the contrary way: *anti*=against, and *spao*=to draw.]

Med.: The revulsion of any fluid in the body from one part to another.

ăn-ti-spăs-môd'-îc, ***ăn-ti-spăs-môd'-ick**, *a. & s.* [From Gr. *anti*=against, and Eng. *spasmodic*. In Fr. *antispasmodique*; Port. *antispasmodico*. From Gr. *antispasmos*=an antispasmodic: *anti*=back, and *spasmos*=(1) a drawing, (2) a convulsion; *spao*=to draw.]

A. As adjective: Deemed of use against spasms or convulsions.

B. As substantive: A medicine designed to counteract or allay spasms. Garrod makes antispasmodics the first order of his Sub-class 3. They are of two kinds: (1) Direct Antispasmodics, or Spinal Tonics, of which the chief are assafoetida, valerian, musk, castor, various oils, camphor, &c.; (2) Indirect Antispasmodics, as conium, bromide of potassium, salts of silver, hydrocyanic acid, belladonna, stramonium, henbane, opium, chloroform, &c. (*Garrod: Materia Medica*.)

ăn-ti-spăst, **ăn-ti-spăs'-tûs**, *s.* [Lat. *antispastus*; Gr. *antispastos*=an antispast; from *anti*=to draw the contrary way: *anti* and *spao*=to draw.]

Prosody: A foot consisting of four syllables, the first and fourth short, and the second and third long: as *mē | dūl | lō | sūs*.

ăn-ti-spăs'-tîc, ***ăn-ti-spăs'-tîck**, *a. & s.* [From Gr. *anti*=against, and Eng. *spastic* (q. v.); or from Gr. *antispastos*=drawn in contrary directions.]

A. As adjective:

***I. Medicine**:

1. Pertaining to antispasms; believed to cause a revulsion of fluids from one part of the body to the other.

2. Antispasmodic.

II. Prosody: Pertaining to an antispast.

B. As substantive:

1. A medicine believed to cause a revulsion of fluids from one part of the body to the other. (*Glossog. Nova*.)

2. Antispasmodic.

ăn-ti-splē-nêt'-îc, ***ăn-ti-splē-nêt'-ick**, *a. & s.* [Gr. *anti*=against, and Eng. *splenetic*.]

A. As adjective: Deemed of use against diseases of the spleen.

B. As substantive: A medicine given against diseases of the spleen.

"Antisplenetics open the obstructions of the spleen."—*Floyer*.

ăn-tis'-tă-sis, *s.* [In Ger. *antistase*; Gr. *antistasis*=standing against, opposition: *anti*=against, and *stasis*=(1) a placing, (2) a standing; *histēmi*=to make to stand.]

Rhetoric: A defense of any action on the ground that what was done was the lesser of two evils.

ăn-tis-tēs (plural **ăn-tis-tî-tēs**), *s.* [Lat.] (1) A president of any kind; (2) a high-priest.

"He tells what the Christians had wont to do in their several congregations, to read and expound, to pray and administer, all which he says the *præstōs*, or *antistes*, did."—*Milton: Of Prel. Episcopacy*.

"Unless they had as many *antistites* as presbyters."—*Ibid*.

ăn-tis'-trô-phê, **ăn-tis'-trô-phÿ**, *s.* [In Ger. & Fr. *antistrophe*; Port. *antistrophe*, *antistrophe*. From Gr. *antistrophê*=a turning about; *antistrephō*=to turn to the opposite side: *anti*=opposite to, and *strephō*=to twist, to turn.]

I. Ancient Choruses and Dances:

1. The returning of the chorus, exactly answering to a previous strophe, except that now they moved from left to right, instead of from right to left.

2. The lines of the poem or choral song sung during this movement.

"It was customary, on some occasions, to dance round the altars, whilst they sung the sacred hymns, which consisted of three stanzas or parts; the first of which, called *strophe*, was sung in turning from east to west; the other, named *antistrophe*, in returning from west to east; then they stood before the altar and sung the *epode*, which was the last part of the song."—*Potter: Antiq. of Greece*, bk. ii., ch. 4.

II. Rhetoric: The figure of retortion.

III. Logic: Aristotle's designation for the conversion or transposition of the terms of a proposition.

IV. Grammar: An inverted construction.

V. Relation of one thing to another.

"The latter branch touching impression, hath not been collected into art, but hath been handled dispersedly; and it hath the same relation or *antistrophe* that the former hath."—*Bacon: Adv. of Learn.*, bk. ii.

ăn-ti-strôph'-îc, *a.* [Eng. *antistrophe*; -ic.] Pertaining to an antistrophe.

ăn-tis'-trô-phôn, *s.* [Gr. *antistrophos*=turned opposite ways, set over against, and hence correlative.]

"That he may know what it is to be a child, and yet to meddle with edged tools, I turned his *antistrophon* upon his own head."—*Milton: Apol. for Smeetyminnus*.

ăn-ti-strô-măt'-îc, *a. & s.* [Gr. *anti*=against, and Lat. *struma*=a scrofulous tumor; *struma*.]

A. As adjective: Counteracting or mitigating the struma, that is, the scrofulous constitution.

B. As substantive: A medicine believed to have some effect in counteracting or mitigating the strumous constitution.

"I prescribed him a distilled milk, with *antistrumatics*, and purged him."—*Wiseman*.

ăn-ti-strô-môus, *a.* [ANTISTRUMATIC.] The same as ANTISTRUMATIC (q. v.).

ăn-ti-sÿph-î-lît'-îc, *a.* [Gr. *anti*=against, and Eng. *syphilitic*. In Fr. *antisiphilitique*.] Believed to be of use against syphilis. (*Castle: Lexicon Pharm.*)

Ăn-ti-tăc'-tă, **Ăn-ti-tăc'-tēs**, *s. pl.* [Latinized from Gr. *antitassō*=(1) to range in battle, (2) to counteract, to resist: *anti*=against, and *tasso*=to arrange.]

Church Hist.: A Gnostic sect who maintained that not God but a creature had created evil.

ăn-ti-tar-tăr'-îc, *a.* [Gr. *anti*=against, and Eng. *tartaric*.] Opposed to TARTARIC (q. v.).

antitartaric acid. An acid differing from tartaric acid in this remarkable respect, that whereas the latter turns the plane of polarization to the right, this does it to the left. If the two be mixed together they lose all influence on polarized light.

ăn-ti-thē'-îsm, *s.* [Gr. *anti*=against, and Eng. *theism*. Or from *antitheos*, *a.*, in the sense of opposed to God; for in Homer it means god-like, equal to the gods.] Opposition to God or to belief in His existence.

ăn-ti-thē'-ist, *s.* [Gr. *anti*=against, and Eng. *theist*.] One who opposes the belief in a God. The antitheist is a more decided opponent of theism than the atheist.

ăn-ti-thē-ist'-îc-al, *a.* [Gr. *anti*=against, and Eng. *theistical*. Or Eng. *antitheist*; -ical.] Opposed to theism; antagonistic to the belief in God.

ăn-ti-thē-ist'-îc-al-lÿ, *adv.* [Eng. *antitheistical*; -ly.] After the manner of an antitheist; with vigorous opposition to faith in God.

ăn-tith'-ên-ar, *s.* [Gr. *anti*=against, and *thenar*=the palm of the hand, the sole of the foot.]

Anat.: One of the muscles which extend the thumb.

ăn-tith'-ê-sis (pl. **ăn-tith'-ê-sēs**), *s.* [In Sw. *antithes*; Dan. & Ger. *antithese*; Fr. *antithèse*; Sp. *antitesis*, *antiteto*; Port. *antithese*, *antithesis*; Ital. *antitesi*; Gr. *antithesis*=opposition, from *antitithēmi*=to set against, oppose: *anti*=against, and *tithēmi*=to set or place.]

Rhet.: Sharp opposition or contrast between word and word, clause and clause, sentence and sentence, or sentiment and sentiment, specially designed to impress the listener or reader.

"Macaulay's writings are full of antitheses, of which the following may serve as examples: as, 'He had covertly shot at Cromwell, he now openly aimed at the Queen.' (*Hist. Eng.*, ch. v.) 'But blood alone did not satisfy Jeffreys; he filled his coffers by the sale of pardons.' (*Ibid.*, ch. xvii.)

"Antithesis or opposition."—*Coleridge: Aids to Reflection* (1839), p. 129.

"... the habitual *antithesis* of prose and poetry, fact and fiction."—*Herbert Spencer*, 2d ed., vol. ii., p. 532, § 491.

"Athene, the man-goddess, born from the head of Zeus, without a mother, and without feminine sympathies, is the *antithesis* partly of Aphrodite."—*Grote: Hist. of Greece* (1846), vol. i., pt. i., ch. i., p. 74.

"The plural is still in the Greek form *antitheses*."

"I see a chief who leads my chosen sons,
All arm'd with points, *antitheses*, and puns."

Pope.

ăn-ti-thêt', *s.* [ANTITHETON.] An opposite statement or position.

ăn-tith'-ê-tă, *s. pl.* The plural of ANTITHETON (q. v.).

ăn-ti-thêt'-îc, **ăn-ti-thêt'-îc-al**, *a.* [In Fr. *antithétique*; Sp. *antitetico*. From Gr. *antithētikos*.]

A. Ordinary Language: Pertaining to or marked by the presence of an antithesis.

"The antithetical group of cases."—*Herbert Spencer: Psychology*, 2d ed., vol. ii., p. 55, § 293.

B. Technically:

***Old Chem.** *Antithetic or polar formulæ* are formulæ written on two lines instead of one. In the upper line are placed all the negative constituents, and in the lower the positive. This method of notation was proposed by Dr. Graham. In this

system potash has the formula $\frac{O}{K}$ instead of K. O;

sulphuric acid $\frac{O_3}{S}$ instead of SO₃. There is no anal-

ogy to an algebraic fraction. It does not mean that O, formerly multiplied by K, is now divided; and the algebraist unacquainted with chemistry must be on his guard against giving the apparent fractions this meaning. The formulæ now given are altered in the new notation.

bôil, **bôÿ**; **pôut**, **jôwl**; **cat**, **çell**, **chorus**, **çhin**, **bençh**; **go**, **gem**; **thin**, **thîs**; **sin**, **aş**; **expect**, **Xenophon**, **exist**. **ph = f**.
-cian, **-tian** = **shan**. **-tion**, **-sion** = **shün**; **-tîon**, **-şion** = **zhün**. **-tious**, **-cious**, **-sious** = **shūs**. **-ble**, **-dle**, &c. = **beł**, **deł**.

Ān-ti-thēt'-ic-al-ly, *adv.* [Eng. *antithetical*; *-ly*.] In an antithetical manner; with sharp contrasts.

Ān-tith'-ē-tōn, *s.* [Lat. & Gr. *antitheton*.] An antithesis.

In the plural: Antitheta; in the *Instructions for Oratory*, (1661) erroneously made *antithetas*.

Ān-ti-tōx'-ic, *a.* [Pref. *anti-*, and Eng. *toxic*.] Protecting against poison; antidotal. "The serum of animals vaccinated against a very virulent venom, such as that of a cobra, is perfectly *antitoxic* to the poisons of all kinds of serpents, and even scorpions."—*Brit. Med. Jour.*, Aug. 1896.

Ān-ti-tōx'-in, *s.* Virus used as a preventive of or remedy for poisoning by toxin.

¶ The name is especially applied to anti-diphtheritic serum, which is used hypodermically as a preventive of, or cure for, diphtheria. It is obtained by repeated injections of diphtheritic bacterial toxin into a horse or other animal, until immunized against the disease. The serum of the animal thus immunized is *antitoxin*. In a report of the American Pediatric Society (1897) on 1704 cases in private practice, it is pointed out that "before the use of *antitoxin* it was estimated that 90 per cent. of laryngeal cases required operation, whereas now with the use of *antitoxin* only 39 per cent. require it"; and that "before the use of *antitoxin*, 27 per cent. recovered; now 73 per cent. recover, and this in the severest type of diphtheria." See **SERUM-THERAPY**.

Ān-tit'-ra-gūs, *s.* [Gr. *anti*=opposite to, and Lat. *tragus*, Gr. *tragos*.] [TRAGUS.] A portion of the external ear opposite the tragus and beneath the cochlea.

Ān-ti-trin'-i-tā-r-i-ān-ism, *s.* [Gr. *anti*=against, and Eng. *trinitarianism*.] The creed of which the chief feature is a denial of the doctrine of the Trinity.

Ān-tit'-rō-pāl, **Ān-tit'-rō-poūs**, *a.* [Gr. *anti*=opposite to, and *tropos*=a turn, direction; *trepō*=to turn.]

Bot.: A term applied to an embryo which is inverted so as to have the radicle at the extremity of the seed most remote from the hilum. The sacs of the ovule are in no degree inverted, but have their common point of origin at the hilum, the raphe and chalaza being necessarily invisible.

Ān-ti-typ'-al, *a.* [Eng. *antitype*(e); *-al*.] Of the nature of an antitype (q. v.).

Ān-ti-typē, *s.* [In Sp. *antitipo*; Gr. *antitypos*=(1) repelled by a hard body; echoed, echoing; (2) corresponding as the stamp to the die: *anti*=opposite to, and *typos*=(1) a blow, (2) that which is produced by a blow; *typōō*=to impress, to stamp; *typōō*=to strike.]

1. *Gen.*: That which corresponds to something else, as a stamp does to the die by which it was struck off.

2. *Theol.*: He or that which in the New Testament corresponded exactly to the types of the Old—namely, Christ or His atoning death.

3. Among the ancient Greek fathers, and in the Greek liturgy: A term applied to the symbols of bread and wine in the sacrament.

Ān-ti-typ'-ic-al, *a.* [Gr. *anti*=against, and *typical*; or Eng. *antitype*, and *-ical*.] Pertaining to an antitype.

Ān-ti-typ'-ic-al-ly, *adv.* [Eng. *antitypical*; *-ly*.] In an antitypical way; by antitype.

Ān-ti-typ'-poūs, *a.* [Eng. *antitype*; *-ous*.] The same as **ANTITYPICAL** (q. v.).

Ān-ti-vāc-cin-ā'-tion, *s.* [Gr. *anti*=against, and Eng. *vaccination*.] Opposition to vaccination.

Ān-ti-vāc-cin-ā'-tīen-ist, *s.* [Eng. *antivaccination*; *-ist*.]

1. One opposed to vaccination, as believing it to be injurious to the human frame.

"... to describe *antivaccinationists* as a 'school' is to push satire to the verge of cruelty."—*Times*, Nov. 13, 1876.

2. One who, though deeming vaccination beneficial, is yet opposed to the law which renders it compulsory, as believing that such an enactment is inconsistent with proper civil liberty.

Ān-ti-vā-rī'-ōl-oūs, *a.* [Gr. *anti*=against, and Eng. *variolous*, from Mediæv. Lat. *variola*=smallpox.] Thought to be protective against smallpox.

Ān-ti-vēn-ē-r-ē-al, *a.* [Gr. *anti*=against, and Eng. *venereal*. In Ger. *antivenerisch*; Fr. *antivénérien*; Port. & Ital. *antivenereo*.] Believed to counteract or resist venereal poison.

"... you will scarce cure your patient without exhibiting *antivenereal* remedies."—*Wiseman*.

Ānt'-jār, *s.* [From *antiar* or *antschar*, its Javanite name.] A poison made from the upas tree of Java, *Antiaris toxicaria*. [ANTIARIS.]

Ānt'-lēr, *s.* [Fr. *andouiller*=a brow-antler.]

1. Properly the first branch, but now used for any ramification of the horns on the head of a stag or

similar animal. The lowest furcation, that nearest the head, is called the *brow-antler*; and the branch next above it, the *bes-antler*.

"... huge stags with sixteen antlers."—*Macaulay: Hist. Eng.*, ch. vii.

"Richardson figures a pair of antlers of the wild reindeer with twenty-nine points."—*Darwin: Descent of Man*, pt. ii., ch. xvii.

"Grown old they grow less branched, and first lose their *brow-antlers*, or lowest furcations next to the head."—*Browne*.

2. A moth, the *Charæas* or *Cerapteryx graminis*. It is of the family Noctuidæ. It is of a brown color with a white line on the upper wings, and a row of black marks at the apex of each. The caterpillar, which is brown with yellow streaks, feeds on grass.

Antler Moth.

Ānt'-lēred, *a.* [Eng. *antler*; *-ed*.] Furnished with antlers.

"The antler'd monarch of the waste,
Sprung from his heathery couch in haste."

Scott: Lady of the Lake, i. 2.

Ānt'-lī-a, *s.* [Lat. *antlia*=a machine for drawing water; a pump; Gr. *antlia*=(1) the hold of a ship, (2) bilge-water.]

Entom.: The spiral proboscis of the Lepidopterous order of insects. It "is formed by the elongated slender maxillæ, still characterized by the minute palpi at their base. The inner margins of the maxillæ are concave, and the edges of the channels are in close contact, or are confluent so as to form a canal along which the juices of the flowers can be pumped up into the mouth. The large labial palpi defend the antlia when it is retracted and coiled up." (Owen: *Comp. Anat. Invert. Animals*.)

Antlia, *s.* [See preceding.]

Astron.: An abbreviation for Antlia Pneumatica (the Air-pump), one of the Southern constellations introduced by Lacaille.

Ānt'-lī-ā'-ta, *s. pl.* [Mod. Lat.=furnished with a sucker, like a pump.] The name given by Fabricius to the Dipterous order of insects; but as *antlia* is now confined to the spiral sucker of the Lepidoptera, *Antliata*, as a synonym for *Diptera*, would be misleading.

Ānt'-līng, *s.* [Eng. *ant*; dimin. suff. *-ling*.] A young ant. (McCook: *Agric. Ant of Texas*, p. 20.)

Ānt'-ō'-cī (Lat.), **Ānt'-ō'-cī-ang**, **Ānt'-ē'-cī-ang** (Eng.), *s. pl.* [Gr. plur. of *antoikos*=living in an opposite latitude; *anti*=opposite to, and *oikos*=to inhabit, from *oikos*=a house.] Persons living in the same latitude north and south of the equator, as well as in the same longitude. The identity of longitude makes them have exactly the same hours, but the difference of N. and S. in the latitude causes the seasons of the one to be opposite to those of the other, and the length of any day in the one to be exactly equal to the same night of the other. [ANTISCIAANS.]

Ānt'-ōn-ō-mā'-sī-a (Lat.), **Ānt'-ōn-ō-mā'-sŷ** (Eng.), *s.* [Ger. *antonomasie*; Fr. *antonomase*; Lat. *antonomasia*; Gr. *antonomasia*=(1) a different name; (2) see def.; *antonomazō*=to name instead; *anti*=instead of, and *onomazō*=to name; *onoma*=name.] The designating of a person not by his actual surname, but by his office, rank, dignity, or even by his trade, his country, &c.; as, His Honor, the Honorable so and so, Member of Congress, the learned counsel, the great commander, the shameless mendicant, "a Daniel come to judgment."

Ānt'-ōn-ō-mās'-tīc-al-ly, *adv.* [From Lat., Gr., & Eng. *antonomasia* (q. v.).] In a way to involve the rhetorical figure antonomasia.

Ān'-tō-nŷm, *s.* [Gr. *anti*=against, opposite; *onoma*=a name, a word.] A word expressing the reverse of any other word; the opposite to a synonym: thus *bad* is an antonym of *good*.

"Antonyms and synonyms."—Title of book by C. J. Smith. (1870.)

Ānt'-ō-sī-ān'-dri-an, *s.* [Gr. *anti*=against, and *Osiander*.] One of a religious party opposed to Andrew Osiander, a theological professor at Königsberg from 1548, who called that redemption which Luther regarded as justification, and that justification which the great German reformer demominated sanctification. The Antosiandrians were strongly Lutheran.

Ānt'-ō-zōne, *s. & a.* [Gr. *anti*=against; and Eng., &c., *ozone* (q. v.).]

1. *As substantive*: In the opinion of Schönbein, a permanently positive variety of oxygen, opposed to

ozone, which he holds to be a permanently negative one. Inactive oxygen he considers to be a produce of the union of the two. Meissner agrees with him, and states that ordinary oxygen is resolved by electrification into ozone and antozone; the former is absorbed by iodide of potassium, pyrogallie acid, &c., while the latter remains unabsorbed. Antozone has been found by Engler and Nasse to be nothing but hydrogen peroxide, H₂O₂. (Watts: *Chem.*, Suppl. II.)

"The dark violet-blue fluor of Wölsendorf, Bavaria, afforded Schrötter 0.02 per cent. of ozone, which Schönbein showed to be antozone."—*Dana: Min.*, 5th ed., p. 124.

2. *As adjective*: Pertaining to antozone, *s.* (q. v.)

"Its strong antozone odor [that of Antozonite] is said often to produce headache and vomiting in the miners."—*Dana: Min.*, 5th ed., p. 124.

Ānt'-ō-zō'n-ite, *s.* [Eng. &c., *antozone* (q. v.), and suff. *-ite*.] A mineral, a variety of Fluorite or Fluor. Dana divides Fluor into (1) Ordinary; (2) Antozonite of Schönbein. The latter is a dark violet-blue mineral, found at Wölsendorf, in Bavaria. [ANTOZONE.]

***Ān'-tre**, *s.* [Fr. *antre*; Lat. *antrum*=a cave.] A cave, a cavern, a den.

"With all my travel's history,
Wherein of antres vast, and deserts idle,
It was my bent to speak."—*Shakesp.: Othello*, i. 3.

Ān'-trim-ō-lite, *s.* [Named from Antrim, in Ireland, where it is found; suffix *-ite*=Gr. *lithos*=a stone.] A variety of Mesolite. Its hardness is 3.5-4; its sp. gr., 2.096.

Ān'-trūm, *s.* [Lat.=a cave.]

1. *Anat.*: A term used for several parts of the body which have a cave-like appearance. Thus *antrum pylori* is the great concavity of the stomach approaching the pylorus; *antrum buccinosum* is the cochlea of the ear, and *antrum genæ* is the maxillary sinus.

2. *Bot.*: A name given by Mænoch to the kind of fruit called by Lindley *Pomum*, an apple or pome.

A'-nū, *s.* [Assyrian.]

Assyrian Myth.: The first great deity of the upper Triad: *Anu*=Heaven; *Elu* or *Bel*=Earth; and *Hea*=Hades. The Accadians regarded him as the spirit or fetish of heaven; while the Assyrians elevated him to the high position of the Greek Zeus or the Latin Jupiter. (Boscawen: quoted in Mr. W. R. Cooper's *Archaic Dict.*, 1876.)

A-nū'-bīs, *s.* [Old Coptic (?).]

1. An Egyptian god represented with the head of a dog, or rather of a jackal. Mr. Cooper describes him as the chief deity presiding over the mummied or other dead.

"The brutish gods of Nile as fast,
Isis, and Orus, and the dog Anubis haste."

Milton: Odes, i.

2. *Zool.* *Anubis zerda*, the Sabora of the Arabs, and the *Megalotis famelicus* of naturalists, is a fennec found in Kordofan, and believed by Professor Krötschmer to be the animal taken for a jackal on Egyptian temples and on the catacombs of Thebes. (Jardine: *Naturalist's Library*, vol. iv. (Dogs), p. 235.)

Ā-nūs, *s.* [Fr. *anus*; Lat., m.] The fundament.

a-nū's-wā-ra, **a-nū's-wār**, *s.* [Sanskrit.]

Philol.: A nasal sound given to certain letters in the Indian languages.

"Secondly, this *anuswāra* is in most languages pronounced as a distinct . . . nose intonation."—*Beames: Compar. Gram. of the Aryan Lang. of India*, vol. i. (1872), p. 296.

Ān'-vīl, ***ān'-vīle**, ***ān'-vīld**, ***ān'-vīlt**, *s.* [A. S. *anfilt*, *ænfilt*. In Dan. *ambolt*; Dut. *aanbeeld*, from *aan*=to, at, in, upon; and *beeld*=image, statue, figure. On this etymology an anvil is that on which things are built or fashioned. So in Latin, *incus* is

Anvil.

from *incudo*=to forge with a hammer, to fabricate; *in*=upon, and *cudo*=to strike, beat, pound, or knock. An anvil, then, is that on which anything is fabricated by being struck.]

1. A mass of iron or other material, smooth above, on which a smith hammers into the required form

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

the metal which he has previously softened by heating it in a furnace.

"So dreadfully he did the *anvil* beat,
That seem'd to dust he shortly would it drive."
Spenser: F. Q., IV. v. 37.

2. Anything on which blows are laid.

"Here I clip
The *anvil* of my sword, and do contest
Hotly and nobly."—*Shakesp.: Coriol.*, iv. 5.

To be on the *anvil*, means to be contemplated, to be in process of preparation, to be in process of being hammered into presentable shape by public discussion or private conference. (It is used especially of measures sought to be carried into law.)

"Several members of our house, knowing what was upon the *anvil*, went to the clergy and desired their judgment."—*Swift*.

ăn'-vîl, *v. t.* [From the substantive.] To fashion on an anvil.

¶ Used chiefly in the *pa. par.* (q. v.).

ăn'-villed, *pa. par.* Fashioned on an anvil.

"... with all care put on
The surest armor *anvil'd* in the shop
Of passive fortitude."

Beaumont & Fletcher: Lover's Progress, iv. 1.

ănṣ-î-e-tŷ, *s.* [In Fr. *anxiété*; Port. *anxiedade*; Ital. *ansietà*; Lat. *anxietas*, from *anxius*.] [ANXIOUS.]

1. *Ord. Lang.*: Trouble, solicitude, or mental distress, on discerning the seeming approach of a future event which it is believed will, on its arrival, inflict on one loss, injury, or sorrow, and which one fails clearly to see any practicable means of averting.

"Another week of *anxiety* and agitation passed away."—*Macaulay: Hist. Eng.*, ch. viii.

2. *Med.*: Lowness of spirits, restlessness, with uneasiness of the stomach.

"In *anxieties* which attend fevers, when the cold fit is over, a warmer regimen may be allowed; and because *anxieties* often happen by spasms from wind, spices are useful."—*Arbuthnot*.

anxious (ănṣ-shŭs), ***ang-us-sus**, *adj.* [In Fr. *anxieux*; Sp. & Ital. *ansioso*; Port. *anxioso*; Lat. *anxius*, from *ango*=to press tightly, to strangle.] [ANGER.]

1. Very much troubled or solicitous about some future event of a nature likely to be painful to one, and which one knows no means of averting.

"Whaune thou lest him the cupe iseo
Wel *angussus* he wile beo."
Floriz and Blaunchefur (ed. Lumby), 365-6.

"Our days are number'd, let us spare
Our *anxious* hearts a needless care."

Cowper: Guion's Love of God.

2. Inspiring anxiety; such as cannot be contemplated without some measure of doubt and fear.

"An *anxious* duty! which the lofty site,
Far from all public road or beaten way . . ."
Wordsworth: Excursion, bk. v.

"And, reading here his sentence, how replete
With *anxious* meaning, heavenward turn his eye!"
Cowper: Bill of Mortality (1788).

3. Eagerly desirous (to do something).

"He sneers alike at those who are *anxious* to preserve, and at those who are eager for reform."—*Macaulay: Hist. Eng.*, ch. ii.

¶ *Anxious* is followed by a verb in the infinitive, or by *about*, *concerning*, or *for*, of the noun designating the object of solicitude.

"No writings we need to be solicitous about the meaning of, but those that contain truths we are to believe, or laws we are to obey; we may be less *anxious* about the sense of other authors."—*Locke*.

¶ The phrase *anxious* of is rare or obsolete.

"*Anxious* of neglect, suspecting change."—*Granville*.

anxiously (ănṣ-shŭs-lŷ), *adv.* [Eng. *anxious*; -ly.] In an anxious manner, solicitously.

"... and the members asked each other *anxiously* whether it was likely that the Abjuration and money bills would be passed before he died."—*Macaulay: Hist. Eng.*, ch. xxv.

anxiousness (ănṣ-shŭs-něss), *s.* [Eng. *anxious*; -ness.] The state or quality of being anxious.

"... her cards, to which she returns with no little *anxiousness* till two or three in the morning."—*Addison: Spectator*, No. 79.

any, ***anie**, ***ani** (ăn'-ŷ), *a.* [A. S. *ænig*, *æneg*, *æng*=any, any one; from *an*=one, and suff. -ig=Eng. -ic=having. In Dut. *enig*; Ger. *einige*.] At least one, if not even a few. *Used*—

1. As a singular:

(a) Of persons or living existences, not excluding the Supreme Being himself. (It is used in opposition to *no* or *none*.)

"And David said, Is there yet *any* that is left of the house of Saul, that I may show him kindness for Jonathan's sake?"—2 *Sam.* ix. 1.

"Is there a God beside me? yea, there is no God; I know not *any*."—*Isa.* xlv. 8.

(b) Of things, in the most extensive sense; an amount small, but not precisely defined of anything; some.

"The was of hin fer ear bi-foun,
Or *ani* werldes time boren."

Story of Genesis and Exodus (ed. Morris), 47, 48.

"They loved armes, and knighthood did ensew,
Seeking adventures where they *anie* knew."
Spenser: F. Q., IV. ii. 46.

"There be many that say, Who will shew us *any* good?"—*Ps.* iv. 6.

2. As a plural: Any living beings, any persons, any things.

"... if he found *any* of this way, whether they were men or women, he might bring them bound unto Jerusalem."—*Acts* ix. 2.

anybody (ăn'-ŷ-bōd-ŷ), *s.* [Eng. *any*; *body*.] Any person.

"His Majesty could not keep any secret from *anybody*."—*Macaulay: Hist. Eng.*, ch. xii.

¶ While the expression "anybody," spelled as one word, is applied to persons, as in the foregoing example, "any body" standing as two distinct words, is used only of material things, as the human body, a planet, &c.

anywhile, any while (ăn'-ŷ-while), *adv.* [Eng. *any* and *while*.] Any time; for any length of time.

"... and calling unto him the centurion, he asked him whether he had been *any while* dead."—*Mark* xv. 44.

anywhither, any-whither (ăn'-ŷ-whith-êr), *adv.* [Eng. *any* and *whither*.] To any place.

"This [profit] is the bait, by which you may inveigle most men *anywhither*."—*Barrows: Works*, i. 9.

anywise, any-wise, any wise (ăn'-ŷ-wîse), *adv.* [Eng. *any*; *wise*.] In any way, in any manner, in any respect; to any extent.

"How can he be *any-wise* rich, who doth want all the best things, . . . ?"—*Barrow: Works*, i. 16.

¶ When *any wise* are made separate words the preposition *in* may be put before them.

"And if he that sanctified the field will *in any wise* redeem it . . ."—*Lev.* xxvii. 19.

A-ō'-ni-an, *a.* [From *Aonia*: see definition.]

1. *Lit.*: Pertaining to the region of Aonia, in Boeotia, said to be inhabited by the Aones, descendants of a son of Neptune. It contained the mountains Helicon and Cithæron, sacred to the Muses, who from their supposed residence in the district were called Aonides.

2. *Fig.*: Pertaining to the Muses.

"And they are sure of bread who swink and toil;
But a fell tribe th' *Aonian* hive despoil."

Thomson: Castle of Indolence, ii. 2.

ā-or-ist, *s. & a.* [In Ger. *aoristus*; Fr. *aoriste*; Sp., Port., & Ital. *aoristo*; Gr. *aoristos*=an aorist; from adj. *aoristos*=without boundaries, from *a*, priv., and *horizō*=to separate by a boundary; *horos*=a boundary.]

A. As substantive (*Greek Grammar*): A tense expressing time of an indefinite date or character. In English the phrase "He went" is properly an aorist, as no information is given as to when the action spoken of was performed. Greek verbs have two aorists, a first and a second; but, as a rule, only one of them is generally used.

B. As adjective: Like an aorist; indefinite in time.

ā-or-is-tic, ā-or-is-tic-al, *a.* [In Ger. *aoristisch*; from Gr. *aoristikos*=pertaining to an aorist; indeterminate, like an aorist.]

1. Pertaining to an aorist.

2. Like an aorist, indefinite in point of time.

a-or'-ta, *s.* [In Fr. *aorte*; Sp. & Port. *aorta*; Gr. *aortē*=(1) *In pl.*, the lower extremities of the wind-pipe; (2) *later & sing.*, the aorta (see def.). From *aeirō*=to lift.] The largest artery in the human body, and the main trunk of the arterial system itself. It takes its departure from the upper part

of the left ventricle of the heart, whence it runs upward and to the right, at that part of its progress being called the ascending aorta; then it turns to the left, passes the spinal column, and bending downward forms the arch of the aorta. Continuing its course along to the left of the spine, it is called the descending aorta. Passing through the aperture in the diaphragm into the abdomen, it becomes the abdominal aorta. Finally, it bifurcates about the fourth pair of lumbar vertebrae, and forms the two primitive iliac arteries. Upward from the heart the ramifications are numerous and exceedingly important. The aorta has three valves called the sigmoid or semi-lunar valves, to prevent the reflux of the blood into the heart.

a-or'-tal, *a.* [Eng. *aorta*; suff. -al.] Relating to the aorta; aortic.

a-or'-tic, *a.* [Eng. *aorta*; suff. -ic.] Pertaining to the aorta.

Aortic arch, or **Arch of the aorta**: The name applied to that downward bend of the aorta which takes place just after that great artery has turned to the left, passing in front of the spinal column.

Aortic bulb: The first portion of the ventricle whence an artery springs. It is dilated and surrounded by muscular fibers.

ā-or-tī'-tis, *s.* [Gr. *aortē*=the aorta; *itis*=inflammation.]

Med.: A disease; inflammation of the aorta.

ā-ō'-tēs, *ā-ō'-tūs (*Humboldt*), *s.* [Gr. *a*, priv., and *ous*, genit. *ōtos*=the ear.] A genus of very short-eared monkeys belonging to the family Cebidae, or American monkeys with prehensile tails. The *A. invirgatus* of Humboldt inhabits the thick forests adjacent to the Cassiquiare and the Upper Orinoco.

a'-ōū-dād, *s.* [Native name.] The *Ammotrogus tragelaphus*, a remarkable species of sheep, with certain affinities to the goats. It is of a reddish-brown color, with much long hair hanging down from the front of the neck and the base of the fore legs. It has long powerful horns, and is fierce in character. It inhabits mountainous regions in Abyssinia and Barbary.

a-pā'ce, *adv.* [Eng. *a*=on, at, and *pace*.] With a pace, at a pace; that is, at a quick pace; speedily. (Applied to things in motion, actions done quickly, or events in a state of rapid progression.)

"*Apace* he shot, and yet he fled *apace*."

Spenser: F. Q., II. xi. 27.

"Kings of armies did flee *apace*."—*Ps.* lxxviii. 12.

ăp'-a-gō-gē, ăp'-a-gō-gŷ, *s.* [In Ger., &c., *apagoge*. From Gr. *apagōgē*=(1) a leading away; (2) a taking back or home; (3) payment; (4) bringing a delinquent taken in the act before the magistrate, also the process against him; (5) *In Logic*, see below.]

1. *Logic*: The Greek term for what is now called, from Latin, *abduction*, a kind of argument in which the greater extreme is unquestionably contained in the medium one, but the medium not so obviously contained in the lesser extreme as to render it unnecessary to establish this by proof. Thus, Whatever God has revealed is true. But God has revealed the doctrine of the incarnation: therefore it is a true doctrine.

2. *Math.*: A progress or passage from one proposition to another, by employing one previously demonstrated to establish the truth of others.

ăp-a-gōg'-i-cal, *a.* [Eng. *apagoge*; -ical.] Pertaining to *apagoge*.

Math.: An *apagogical demonstration* is a demonstration of the truth of a proposition by proving the absurdity in which one is landed who proceeds on the supposition of its being incorrect. Its more usual name is a *reductio ad absurdum*. (*Dyche*.)

ăp'-a-gō-gŷ, *s.* [APAGOGÉ.]

ap-ăg'-ŷ-noŭs, *a.* [Gr. *hapax*=once, and *gynē*=a woman.]

Bot.: Fructifying but once; monocarpic.

***a-pā'id, *ăp-pā'yed, *a-pā'yed, *a-pā'yde, a-pā'yd**, *pa. par.* [APAY.] Satisfied, pleased, paid.

"... thy toils, but ill *apaid*."

Thomson: Castle of Indolence, i. 66.

"... he was so well *apayd*."

Chaucer: C. T., 11,852.

"Whan that oure pot is broke, as I have sayd,
Every man chyt, and halt him evel *apayde*."

Ibid., C. T., 12,848-49.

"... thay holde hem nought *apayed*, as saith the book, of soden fleissch that was to hem offred, but thay tooke by force the fleissch that is raw."—*Ibid.*: *The Peresones Tale*.

"... and thou art well *appay'd*."

Shakesp.: Tarquin and Lucrece.

ăp'-a-like, *s.* [American name.] A large fish of the Herring family, the *Megalops Cyprinoides*. It is called also Savalle. It is occasionally twelve feet long. The *A. filamenteux*, an Asiatic species, is also sometimes termed Apalike.

bōl, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. ph = f.
-cian, -tian = şan. -tion, -sion = şún; -tion -şion = zhún. -tious, -cious, -sious = şhş. -ble, -dle, &c. = bəl, dəl.

*a-pā'lled, *pa. par.* [APPALLED.]
 āp'-an-āge. [APPANAGE.]
 āp'-ān'-thrōp-ŷ, *s.* [Gr. *apanthrōpia* (see def.): *apo*=from; *anthrōpos*=man.] An aversion to man; distaste for the society of man; love of retirement.

a'-par, a'-par-a, *s.* [A South American name.] A name occasionally given to the three-banded Armadillo, *Dasypus Apar*. It is one of the digging Edentata, and lives in Brazil and Paraguay.

"The *apar*, commonly called *mataco*, is remarkable by having only three movable bands, the rest of its tessellated covering being nearly inflexible."—*Darwin: Voyage round the World* (ed. 1870), ch. v.

*a-pār'-ailed, *a-pār'-al-īt, *pa. par. & a.* [AP-PARELLED.]

*a-pār-a's-tūr, *a-pār-a's-tēur, *adj.* [From O. Fr. *apparoutre*=to appear; *aparissent*=apparent (?).] Applicable, congruous to. (Scotch.)

"... and indeed it is *aparasteur* to this purpose we have in hand."—*Acts Jas. VI.* (1609), p. 421. (*Jamieson*.)

ap-ar'-gī-a, *s.* [Gr. *apargia*, probably a kind of succory; *apo*=from, and *argia*=idleness; meaning that the weed, whatever it was, sprung up in consequence of the idleness of the husbandman. Had he been industrious, he would have cut short its existence at the outset.] A genus of plants belonging to the order Asteraceæ (Composites), and the sub-order Cichoraceæ. In some respects they have a remote resemblance to the Dandelion.

āp-a-rīth-mē'-sis, *s.* [Gr. *arithmēsis*=a counting over; *apo*=from, and *arithmēsis*=counting; or from *arithmēō*=to count over; *apo*=from, and *arithmēō*=to count; *arithmos*=a number.]
Rhet.: Enumeration.

a-part, *adv.* [From Fr. *à part*=to one side; *aparté* (in dramas)=aside; Sp. *aparte*; Port. *à parte*; Ital. *da parte*.]
 1. In a state of physical separation from, at a greater or less distance in place removed from.

"And when He had sent the multitudes away, He went up into a mountain *apart* to pray."—*Matt.* xiv. 23.

"This seems to have actually taken place at about the same period in Southern Patagonia and Chili, though these places are a thousand miles *apart*."—*Darwin: Voyage round the World* (ed. 1870), ch. xvi.

2. In a state of separation, mentally viewed; as two distinct ideas are separated in thought. Distinctly, separately.

"Wisdom and Goodness are twin-born, one heart Must hold both sisters, never seen *apart*."
Couper: Expostulation.

"Yet we Europeans all know how difficult it is to distinguish *apart* the sounds in a foreign language."—*Darwin: Voyage round the World* (ed. 1870), ch. x, p. 206.

3. To the exclusion of, putting aside, omitting all reference to, not taking into account.

¶ Used with *from*: as, *apart from* all this.

4. In a state of moral separation.

"But know that the Lord hath set *apart* him that is godly for himself."—*Ps.* iv. 3.

*a-part', *v. t.* [APART, *adv.*] To put an end to, to stop. (*Sackville: Induction*, st. 14.)

āp-ar-thrō'-sis, *s.* [From Gr. *aparthroomai*=to be jointed; *apo*=from, and *arthrōs*=to fasten by a joint; *arthron*=a joint.]

Anat.: An articulation which admits of free motion. It is called also *abarticulation*.

a-part-mēnt, *s.* [Ger. *apartement*, from Fr. *appartement*, from *à part*=aside, apart, separately; Sp. *apartamento*; Port. *apartamento*=separation, division; *apartar*=to part, to separate; Ital. *apartamento*.] [PART.]

*I. Originally: As its etymology, *a-partment*, imports, a partitioning out; a separation of a part of a house required for the accommodation of a family or an individual. (Though this sense is obsolete in English, it is still retained in many foreign languages.)

II. Now:

1. A suite of rooms separated from the rest for the same special purpose.

"The word *apartment* meaning, in effect, a compartment of a house, already includes, in its proper sense, a suite of rooms; and it is a mere vulgar error, arising out of the ambitious usage of lodging-house keepers, to talk of one family or one establishment occupying *apartments*, in the plural. The queen's *apartment* at St. James, or at Versailles, not the queen's *apartments*, is the correct expression."—*De Quincey's Works* (ed. 1863), vol. ii., Note, p. 238.

2. A single room.

"The walls of the principal *apartments* were finely sculptured with fruit, foliage, and armorial bearings, and were hung with embroidered satin."—*Macaulay: Hist. Eng.*, ch. iii.

a-part-mēnt house, *s.* A house separated into several distinct apartments for the accommodation of different families.

*a-pa'ssed, *a-pa'st, *pret.* Old forms of PASSED, PAST (q. v.).

a-pāt'-ēl-ite, *s.* A yellow mineral resembling Copiapite, found in small friable nodules or balls at Meudon and Auteuil. Composition: Sulphuric acid, 42.90; sesquioxide of iron, 55.30; water, 3.96=100.16. (*Meillet; quoted by Dana*.)

āp-a-thēt'-ic, *āp-a-thēt'-ick, āp-a-thēt'-ic-al, *a.* [From Gr. *a*, priv., and *pathētikos*=subject to feeling.] Destitute of feeling; not susceptible of deep emotion.

"I am not to be *apathetic*, like a statue."—*Harris: Treatise of Happiness*.

āp'-a-thīst, *s.* [Eng. *apath(y)*; -ist. In Ital. *apatista*.] A person destitute of feeling.

āp-a-thīs'-tīc-al, *a.* [Eng. *apathist*; -ical.] Pertaining to one destitute of feeling; apathetic.

"Fontenelle was of a good-humored and apathistical disposition."—*Seward: Anecdotes*, v. 252.

āp'-a-thŷ, *s.* [In Dan. *apathi*; Ger. & Fr. *apathie*; Port. & Lat. *apathia*; Ital. *apatia*, from Gr. *apatheia*=want of passion or feeling; *apathēs*=without suffering; *a*, priv., and *pathos*=anything that befalls one; also suffering, feeling, passion; *pathein*, 2 aor. infin. of *paschō*=to suffer.] Want of feeling, deadness of the emotions, a calm and unruffled temper, produced, not by the dominancy of conscience or an iron will over violent emotions, but by the natural feebleness of the latter. Unruffled tranquility of mind produced in such a way is not a virtue, but a defect.

"Of good and evil much they argued then
 Of happiness and final misery,
 Passion and *apathy*, and glory and shame."
Milton: Paradise Lost, ii. 564.

"The helpless *apathy* of Asiatics."—*Macaulay: Hist. Eng.*, ch. xiv.

¶ *Apathy* may be produced in any mind temporarily by despair.

"Monmouth had passed from pusillanimous fear to the *apathy* of despair."—*Macaulay: Hist. Eng.*, ch. v.

āp'-a-tīte, *s.* [From Gr. *apataō*=to deceive, and suff. -ite. So called because it has often been mistaken for other minerals.] An important mineral classed by Dana as the type of the "Apatite" group of his Anhydrous "Phosphates, Arsenates, Antimonates." The crystals are hexagonal and often hemihedral. The hardness is 5, or less frequently 4.5; the sp. gr. 2.92 to 3.25; the luster vitreous; the streak white; the color sea-green, violet, blue, white, gray, various reds, or brown. Apatite may be transparent, translucent, or opaque. Composition: Phosphate of lime, 91.13 to 92.31; chloride of calcium, 15 or less to 4.28; and fluoride of calcium, 4.59 to 7.69. It occurs chiefly in metamorphic crystalline rocks. It is found in Cornwall, in Devonshire, and in Cumberland; in Ireland, and in many places abroad. Dana divides it into—Var. 1. Ordinary: (a) Asparagus Stone, with which is associated Moroxite, (b) Lasurapatite, (c) Francolite; 2. Fibrous Concretionary, Stalactitic, specially Phosphorite; 3. Earthy Apatite, specially Osteolite; 4. Fluorapatite; 5. Chlorapatite. In addition to these there is Pseudo-apatite. Akin to Apatite are (A.) Phosphatic Nodules, generally called from their origin Coprolites; (B.) Staffelite of Stein; (C.) Guano; (D.) Epiphosphorite; (E.) Talc-apatite; (F.) Hydro-apatite. (See these words.) (*Dana: Min.*, 5th ed., 530-5.)

āp-a-tŭr-a, *s.* [Gr. *apatē*=craft, deceit, and *oura*=tail.] A genus of butterflies belonging to the family Nymphalidæ. There is one British species, *A. iris*, called, from its color and gorgeousness, the

Apatura Iris.

Purple Emperor. The male has dark-brown wings, changing in certain lights into very rich purple blue, whence the name *iris*=rainbow. Wilkes called it the "Purple Highflyer," from its mounting to a great elevation in the sky. [EMPEROR.]

apaumé, apaumée, appaumée (pron. a-pā'u-mé), *a.* [Fr.]

Her.: Appalled. (Used of a hand open so as to exhibit the palm.)

a-pā'y, *v. t.* [Lat. *pacare*=to satisfy, to quiet.] To please, to satisfy. (Used chiefly in the past participle.) [APAID.]

"For that faire Ladies love: past perils well *apay*."
Spenser: F. Q., IV. ix. 40.

*a-pā'yd, *a-pā'yde, *a-pā'yed, *pa. par.* [APAID.]

A. P. C. N. [Lat. =*anno post Christum natum*=in the year after the birth of Christ.]

āpe, *s.* [A. S. & Sw. *apa*; Icel. *ape*; O. Icel. *api*; Dan. *abe*, *abekat*; Dut. *aap*, *naaper*; Ger. *affe*; O. H. Ger. *affo*; Gael. *apa*, *apag*; Wel. *ab*, *epa*; Malabar & Sansc. *kepi* or *kefi*, (*s.*) a monkey, (*adj.*) swift, active.]

A. Ordinary Language:

I. Originally: Any member of the Quadrumanous or Monkey order.

"We shall lose our time,
 And all be turned to barnacles or to apes,
 With foreheads villainous low."
Shakesp.: Tempest, iv. 1.

¶ This extended sense is not yet extinct: thus the monkey (*Pithecius inuus*) brought to the rock of Gibraltar from Africa is called the Barbary "ape," though, scientifically viewed, it is not an ape at all.

II. Later:

1. Literally:

(a) Any monkey remarkable for its imitativeness or for antic manners.

(b) *The Ape of Scripture* (1 Kings x. 22; 2 Chron. ix. 21), Heb. *qoph*, pronounced *koph*, Sept. *pithēkos*, Vulg. *simia*, is a species of tailed Indian monkey. The Heb. *qoph*, plur. *qophim*, which occurs in the above passages, is simply the Malabar and Sanscrit word *kepi* naturalized. (See the etymology.)

(c) A tailless monkey. (This sense of the word has come into use since the time of Ray.) (B. Zool.)
 2. Fig.: A human being prone, like the monkey tribe, to imitation or mimicry.

"The apes of him who humbled once the proud."
Byron: Child Harold, iv. 95.

¶ (a) *To lead apes in hell* is an expression applied occasionally in old writers to a woman who dies unmarried.

"But 'tis an old proverb, and you know it well,
 That women dying maids lead apes in hell."
(Lond. Prodigal, i. 2. Wright: Dict. Obs. & Pro. Eng.)

(See also Shakesp., *Taming of the Shrew*, ii. 1.)
 (b) *To put an ape into one's hood or cap*: To make a fool of one.

"The monk put in the mannes hood an ape,
 And in his wyves eek, by seint Austyn."
Chaucer: C. T., 14,851-2.

B. Technically:

Zoology (Plur.): The highest, or anthropoid section of the order Quadrumana, or Monkeys—that which forms the connecting link between the lower animals and man. ANTHROPOID, ANTHROPIDÆ.] They have the teeth of the same number, and for a time of the same form as those of man, but when full maturity is reached the canines become almost as prominent as in the feline race. There is no tail; nor are there cheek-pouches. There may or there may not be callosities on the hinder parts. They are four-handed rather than four-footed. They hobble on the ground, but are splendid climbers of trees. The facial angle is about 65°, almost equal to that of some negroes; but the least intellectual of mankind are inconceivably before the highest of the monkey race. The apes are the only Simiadae in which the hyoid bone, the liver, and the cœcum exactly resemble those of man. They constitute the first section of the Simiadae. The species are the gorilla and the chimpanzee from tropical Africa, and the orang-outang and the gibbons from the great Asiatic islands Sumatra, Borneo, and Java. [GORILLA, CHIMPANZEE, &c.]

Ape.

Sea Ape: A species of Shark, the *Alopias vulpes*. It is called in English by several names, the Thresher, the Fox-shark, and the Sea-fox. [THRESHER.]

ape-like, *a.* Like an ape.

"Some unusually wise *ape-like* animal."—*Darwin: Descent of Man*, vol. i. (1871), pt. i., ch. i.

āpe, *v. t.* [From the substantive.] To imitate in a servile manner, as an ape mimics the outward

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

actions of man without having mind enough to comprehend the thoughts which give those actions significance. Or to imitate in a more rational way.

"Profusion *apes* the noble part
Of liberality of heart,
And dullness of discretion."

Cowper: *Friendship*.

"Thus, while I *ape* the measure wild
Of tales that charmed me yet a child."

Scott: *Marmion*, Introd. to Canto iii.

ape-man, *s.* *Pithecanthropus erectus*. A supposed form of animal constituting the "missing link" between man and the apes. [PITHECANTHROPI.]

[Much discussion has arisen among anthropologists respecting the discovery (in 1896) in a volcanic deposit in Java, among relics of extinct mammals of the Pliocene age, of the fossilized bones of an ape-like being, whose calvaria resembles that of a gibbon, but whose skull capacity is estimated to have been much larger than that of any known anthropoid ape, and equal to that of some negro skulls. Manouvrier, of Paris, and Marsh, of Yale, believe that the bones possibly represent an intermediate link.

a-pē'ak, ***a-pē'ek**, *adv.* [Eng. *a*; *peak*. In Fr. *pic*=the peak of a mountain; *à pic*=vertically.] [PEAK.]

I. *Ordinary Language*:

1. In a position to pierce.
2. Formed with a point; pointed.

II. *Naut.*: Perpendicular. Thus the anchor is said to be *apeak* when the stem of the ship is brought directly over it by drawing in the cable.

***ā-pē'-qē**, *s.* [Eng. *A B C*.] The same as ABECE. [*Prompt. Parv.*]

***a-pē'che**, *v. t.* [APPEACH.]

āped, *pa. par.* [APE, *v.*]

āpe'-dōm, *s.* [Eng. *ape*; *-dom*.] Apes collectively; the condition of being an ape.

***a-pē'ek**, *adv.* [APEAK.]

a-pē'i-bā, *s.* [Brazilian name.] A genus of plants belonging to the order Tiliaceæ (Linden blooms). There are twelve species found in the warmer parts of America. *Apeiba Petoumo*, in Panama called cortega, is used for making cordage, and *A. Tibourbou* is employed in the construction of the raft-boats called in Brazil jangadas.

***a-pē'ire**, *v. t. & i.* [APPAIRE.]

***a-pē'le**, *s.* A peal. [PEAL, *s.*] [*Prompt. Parv.*]

A-pēl'-lites, **A-pēl'-lē-ang**, *s. pl.* [From *Apelles* (Gr. *Apellēs*), a follower of the Gnostic Marcion.]

Church History: A sect in the second century who affirmed that Christ received from the four elements a body which He rendered back before His ascension.

a-pēl'-lous, *a.* [Gr. *a*, priv., and Lat. *pellis*=skin.] Destitute of skin.

Āp'-ēn-nine, *adj.* Pertaining to the Apennines (*q. v.*).

Āp'-ēn-nīnes, *s. pl.* [Lat. *ad*=to; *penninus*, connected with Celtic *pen* or *ben*=mountain-top.] The name of a chain of mountains extending through Italy.

a-pēp'-sŷ, ***a-pēp'-sŷe**, *s.* [In Fr. *aepsie*; Gr. *apepsia*=indigestibility, indigestion, from *apeptos*=uncooked, undigested; *a*, priv.; *peptos*=cooked; *peptō*, or *pessō*=to soften, to boil, to cook.] Indigestion.

ā-pēr (1), *s.* [Eng. *ape*; *-er*. In Dut. *naaper*.] One who apes or mimics.

ā-pēr (2), *s.* [Lat. *aper*=a wild boar.]

***a-pēr-ans**, *s.* [APPEARANCE.]

***a-pē're-mēnt**, *s.* [APPAIRE.] An injury. [*Prompt. Parv.*]

a-pēr'-i-ent, *a. & s.* [Lat. *aperiens*=opening, *pr. par.* of *aperio*=to open.]

A. *As adj.*: Opening the bowels to a slight extent in constipation; laxative, deobstruent.

B. *As subst.*: A medicine prescribed to open the bowels gently; a gentle purgative, a laxative, a deobstruent.

"By combining tonics with *aperients*."—*Cycl. Pract. Med.*, ii. 623.

a-pēr'-i-tive, *a. & s.* [In Fr. *apéritif*; Sp. *aperitivo*, from Lat. *aperio*=to open.]

A. *As adj.*: Opening the bowels; laxative, deobstruent. [APERIENT.]

B. *As subst.*: An aperient medicine.

***ā-pērn**, *s.* [APRON.]

ā-pērn-ēr, *s.* [O. Eng. *apern*=apron, and suff. *-er*.] One who wears an apron; a drawer.

"We have no wine here, methinks; where's this *aperner*?"—*Chapman: May-day*, iii. 4.

***āp-ēr-tē'yn**, *v. i.* [APPERTAIN.]

***ap-ēr'-tion**, *s.* [Lat. *apertio*.]

1 & 2. The act of opening; the state of being opened.

"The plenitude of vessels, otherwise called the plethora, when it happens, causeth an extravasation of blood, either by ruption or *apertion* of them."—*Wise-man*.

3. An aperture made through anything; an opening, a gap.

"The next now in order are the *apertions*; under which term I do comprehend doors, windows, staircases, chimneys, or other conduits; in short, all inlets or outlets."—*Wotton*.

āp-ērt'-lŷ, ***āp-ērt'-lŷe**, ***a-pērt'-liche**, ***a-pērt'-e-liche** (*ch* guttural), *adv.* [Eng. *apert*; *-ly*.] Evidently, plainly.

"Eornen al of red blod romynge a-boute;
Al priueliche his peyne *aperiliche* he saith."

Joseph of Aramathie (ed. Skeat), 275, 276.

"... though he seth wel *apertly*, that it is agenst the reverence of God."—*Chaucer: Persones Tale*.

a-pērt'-ness, *s.* [Eng. *apert*; *-ness*.] The quality of being open; openness; frankness.

"The freedom or *apertness* and vigor of pronouncing, and the closeness of muffling and laziness of speaking, render the sound different."—*Holder*.

†ap-ērt'-ōr, *s.* [Lat.=opener.]

Anat.: A term applied to the muscle which raises the upper eyelid. *Levator* is, however, the more common appellation which it receives.

āp'-ēr-tiure, *s.* [In Sp. & Port. *abertura*; Ital. *apertura*. From Lat. *apertura*.]

A. *Ordinary Language*:

1. & II. The act of opening; the state of being opened.

1. *In a literal sense*:

2. *Figuratively*. *Spec.*, explanation.

"It is too much untwisted by the doctors, and, like philosophy, made intricate by explications, and difficult by the *aperture* and dissolution of distinctions."—*Taylor*.

III. A thing or place opened; an opening, a hole.

1. *Literally*:

2. *Figuratively*:

"... and to him who treads
Rome for the sake of ages, Glory sheds
Her light through thy sole *aperture*."

Byron: *Childe Harold*, iv. 148.

B. *Technically*:

1. *Anatomy, Zoology, Botany, &c.*:

(a) The aperture of a univalve shell is the opening or mouth. In mollusks which feed on vegetable matter it is entire; while in those which are animal feeders it has a notch or canal. In some families it has an *operculum* or cover. The margin of the aperture is called the *peristome*.

(b) Any other opening.

"... the back *aperture* of the nostrils."—*Owen: Classif. of Mammal.*, p. 29.

2. *Optics*: The diameter of the object-glass of a refracting telescope, or the speculum or mirror of a reflector. The larger the aperture (*i. e.*, the area of the surface through which the light is transmitted, or from which it is reflected), the greater is the power of the telescope to penetrate into space and consequently bear higher magnifying powers. The apertures of Sir W. Herschel's celebrated reflecting telescopes were 7, 12, 18, and 48 inches; while those of the Earl of Rosse are 3 and 6 feet. Very powerful refracting telescopes with large apertures have been recently constructed, the great refractor at the United States Observatory at Washington being 26 inches. Within the last few years silvered-glass parabolic mirrors of the Newtonian form have been constructed with large apertures and short focal length, thus rendering these instruments exceedingly convenient for use. Sir W. Herschel's 18-inch metallic speculum, used for examining the nebulae and Milky Way, had a focal length of 20 feet; modern telescopes, with silvered-glass mirrors, have been constructed of the same aperture, but with a focal length of not more than 7 feet. Thus a larger aperture is now a more valuable feature in a telescope than great focal length, the unwieldy tubes formerly used being entirely dispensed with.

"'Aperture' always means the clear space which receives the light of the object; the diameter of the object-glass in achromatics, or the large speculum in reflectors, exclusive of its setting."—*Webb: Celestial Objects*, 3d ed. (1873), p. 1.

Angular aperture (in microscopes): The amount of light transmitted by the objective, and consequently the distinctness of the image afterward magnified by the lenses forming the eye-piece. When an objective of the largest angular aperture is employed, the more delicate markings of the object under examination, invisible when objectives of less angular aperture are used, are seen with great distinctness. [OBJECTIVE.]

3. *Geom.*: The space between two right lines which meet in a point and form an angle.

āp'-ēr-ŷ, *s.* [Eng. *aper*; *-y*.] An aping; servile imitation. (*Coleridge*.)

a-pēt'-al-æ, *s. pl.* [In Fr. *apétale* (sing.), *apét-elé* (sing.). From Gr. *a*, priv., and *petalon*=a leaf.] Plants without petals. A sub-class of Exogenous plants; the others being Polypetalæ and Apetalæ. [APETALOUS EXOGENS.]

a-pēt'-al-ous, **†a-pēt'-al-ō'se**, *a.* [APETALÆ.]

Botany: Without petals.

a-pēt'-al-ous-ness, *s.* [Eng. *apetalous*; *-ness*.] The state or quality of being destitute of petals. (*Johnson*.)

ā'-pēx (plur. *ā'-pī-çēs* or *ā'-pēx-ēs*), *s.* [Lat. *apex* (pl. *apices*)=the top of anything.]

A. *Ordinary Language*: The tip, top, or summit of anything. (*Glossog. Nova*, 2d ed.)

B. *Technically*:

I. *Geom.*: The angular point opposite to the base of a triangle, of a cone, &c.

II. *Nat. Science*: The top of anything.

Specially:

1. *Zool.*: The top of a shell.

2. *Botany*:

(a) The tip of a leaf, the spot on the summit of a pericarp where the style was inserted, or any other part of a plant terminating in a point.

(b) A name given by the old botanists to what we now call a stamen.

āph, *prefix*. [From Gr. *aph*, the preposition *apo*=from, modified by an aspirate immediately following it, as *aphorisma*=aphorism, the derivation of which is *apo*=from, and *horizō*=to divide or separate from.]

āph-æ'r-i-sis, **āph-ē'r-i-sis**, *s.* [In Fr. *aph-èrese*; Sp. *aféresis*; Port. *apheresis*; Lat. *aphæresis*; Gr. *aphairesis*, from *aphaireō*=to take away; *apo*=from, and *haireō*=to take away.]

Gram.: A figure which drops a letter or syllable at the commencement of a word, as *'tis*, for *it is*; *'gan*, for *began*.

āph-ān'-ē-site, *s.* [In Fr. *aphanèse*, from Gr. *aphanēs*=unseen, unmanifest, and suff. *-ite*.] A mineral, called also Clinoclase (*q. v.*).

āph-ān'-ip'-tēr-a, *s. pl.* [Gr. (1) *aphanēs*=unseen, invisible; *a*, priv., and *phanēnai*, 2 aor. infin. of *phainomai*=to come to light, to appear; pass. of *phainō*=to bring to light; and (2) *pteron*=a feather, a wing.] An order of wingless insects, called by De Geer Suctoria, and by Leach Siphonaptera. They have a sucker of three pieces, and a true metamorphosis. The thorax is distinctly separated from the abdomen, and two horny plates mark the spots where in the higher insects wings would be. It contains the Pulicidæ, or Fleas. [FLEA, PULICIDÆ, PULEX.]

†āph-ān'-is'-tic, *a.* [Gr. *aphanistikos*=destroying, putting out of sight; *aphanizō*=to make unseen; *aphanēs*=unseen; *a*, priv., and *phanēnai*, 2 aor. pass. of *phainō*=to cause to appear.]

Min.: Faint, obscure, not clear.

āph-ān'-ite, *s.* [In Ger. *aphanit*; from Gr. *aphanēs*=unseen, invisible, unmanifest, obscure; *a*, priv., and *phainō*=to cause to appear. So called because the granulations of which it consists are not distinctly visible.]

Min. & Geol.: A rock, called also Corneine. The absence of distinct granulations distinguishes it from Diabase.

a-phā'-si-a, *s.* [Mod. Lat. from Gr. *aphasia*=speechlessness.] Loss or impairment of the power of expressing or comprehending the conventional signs of language. Aphasia may be either motor or sensory. *Motor* or *ataxic* aphasia consists of an inability to express one's ideas in speech, owing to a lack of coördination of the muscles of the mouth. *Sensory* or *amnesic* aphasia consists of the loss of memory for words, and may manifest itself by an inability to recall words necessary to express one's ideas, or to understand spoken, written, or printed words. It may exist alone or in association with motor aphasia. See Acatasthesia, Acatasthesia, Agrammatism, Agraphia, Alalia, Alexia, Amnesia, Anarthria, Aphonia, Ataxaphasia, Ataxophemia, Paraphasia, Word-blindness, Word-deafness.

a-phē'-ti-ōn, **†a-phē'-li-ūm**, *s.* [In Fr. *aphélie*; Gr. *apo*=from; and *hēlios*=the sun.]

Astron.: Literally, away from the sun. As the planets move in elliptic orbits, and not in circles, they are necessarily at a greater distance from the sun at one part of their course than at another. When as far away from the sun as they can go, they are said to be in *aphelion*, and when as near to the luminary as possible, in *perihelion*. [See APOGEE, PERIGEE.]

āph-ēn'-gē-scōpe, *s.* [Gr. *aphengēs*=without light, and *skopeō*=to look at, to behold.] A modification of the magic lantern for exhibiting opaque objects, such as cartes-de-visite, movement of watches, coins, &c.

bōll, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðis; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = șan. -tion, -sion = șhŷn; -țion, -șion = zhŷn. -tious, -cious, -sious = șhŷs. -ble, -dle, &c. = beł, deł.

ăph-ēr-ē-se, s. [Fr. *aphérèse*.] A mineral the same as LIBETHENITE (q. v.).

ăph-ēr-ē-sis, s. [APHÆRESIS.]

a-phē-ta, s. [Arabic (?).]

Astrology: The name of a planet which was imagined to be the giver or disposer of life in a nativity.

a-phēt'-ic-al, a. [Eng. *Apheta*; -ical.] Pertaining or relating to the so-called planet Apheta (q. v.).

ă-phī-dæ, **ăph-i-dæ**, s. pl. [APHIS.] Leach's name for the family of Homopterous insects, of which Aphis is the type.

ă-phī-dēs, **ăph-i-dēs**, s. pl. The plural of APHIS (q. v.). Shuckard and Swainson made Aphides the third tribe of the order Hemiptera.

"... in the *Aphides* the male insects are unequivocal and numerous."—Owen: *Invertebr. Animals*, Lect. xviii.

a-phid'-i-an, a. & s. [Mod. Lat. *aphis*, genit. *aphidis*=a plant-louse.]

1. As adjective: Pertaining or relating to an aphis, or plant-louse.

"... the acquisition of the distinct sexes, and the procreation by impregnated ova by the perfect Medusæ, are phenomena essentially analogous to those of *Aphidian* generation."—Owen: *Invertebrate Anim.*, Lect. xviii.

2. As substantive: An insect of the tribe Aphidii, the family Aphidæ, or the genus Aphis.

a-phid'-i-i, s. pl. [Mod. Lat. *aphis*, genit. *aphidis*.] Cuvier's name for the family of Hemipteros (or Homopterous) insects, of which Aphis constitutes the type. He made it the second family of the Homopterous Hemiptera, and the fourth of the whole order. He included under it Psylla, Thrips, and other genera, besides Aphis proper. [APHIS.]

a-phid-iph'-ă-gī, s. pl. [Mod. Lat. *aphis*, and Gr. *phagos*=a glutton; *phagein*=to eat.] The name given by Cuvier and others to a family of insects, ranked as the second of the Trimerous section of Beetles. The name is given because the appropriate food of the insects which it contains are aphides. Instead of Aphidiphagi, the family is now designated Coccinellidæ. It contains the "lady-birds."

a-phid'-i-ūs, s. [From Mod. Lat. *aphis*, genit. *aphidis*.] A genus of ichneumons, of which one species, *A. avenæ*, preys on the aphis of the oat and other analogous species, while a second, *A. rapæ*, does so on that of the turnip.

a-phid-iv'-ôr-ous, a. [Mod. Lat. *aphides*, and Lat. *voro*=to swallow whole, to devour.] Devouring aphides.

"The larva of the syrphi, or, as they have been called, *aphidivorous* worms."—Griffith: *Cuvier*, vol. xv., p. 760.

ă-phīl-ân-thrōp-ŷ, s. [Gr. a, priv. and *philanthrōpia*=philanthropy.]

1. Want of love to mankind; the opposite of philanthropy.

2. Med.: The first stage of melancholy, when solitude is preferred to society.

ă-phīs, **ăph-is** (plur. **ă-phī-dēs**, **ăph-i-dēs**), s. [Mod. Lat.]

Entom.: Plant-louse. A genus of insects, the typical one of the family Aphidæ. It contains those soft pulpy little animals, winged or wingless, and with long antennæ, which are seen beneath the leaves, or in curled-up leaves, or in the axils of many plants, or even on the roots of some. Sometimes, as in the case of the elm, their destructive operations upon a leaf raise a gall of considerable size. The species are very numerous, and are generally called after the plants on which they feed, as *A. rosæ*, the aphis of the rose; *A. fabæ*, the bean aphis; *A. brassicæ*, the cabbage fly; *A. humuli*, the hop fly. They are exceedingly prolific, but are kept within bounds by various insects, especially by the Coccinellidæ, or Lady-birds, of which they are the appropriate food. They drop a fluid called honeydew [HONEY-DEW], which is so grateful to the ants, that the latter, to receive it, tend them like milch cows. The mode of propagating their race is the abnormal one described as ALTERNATION OF GENERATIONS, METAGENESIS, and PARTHENO-GENESIS (q. v.). The winged aphides, confessedly perfect insects, bring forth a wingless race, apparently mere larvæ, and which, therefore, it might be thought, would be incapable, while thus immature, of bringing forth young. In certain cases they do it, however, and their offspring are winged, and as perfect as their grandparents. This alternation of generations, or *metagenesis*, with its attendant partheno-genesis (or birth from virgins) in every second generation, goes on for nine or ten generations, by which time the season is over. The last aphides of the year are fully formed and winged, and deposit eggs, which are hatched in spring.

aphis-sugar, s. Honey-dew, the honey-like substance secreted by aphides. [APHIS, HONEY-DEW.]

"Honey-dew, or *aphis-sugar*, and the honey of the bee are intermediate between animal and vegetable organs."—Penny Cycl., vol. xxiii., p. 225.

ă-phlō-gis'-tic, **ă-phlō-gis'-tic**, a. [Gr. *aphlogistos*=not inflammable; a, priv., and *phlogistos*=set on fire, burned; *phlogizō*=to set on fire; *phlox*, genit. *phlogos*=flame; *phlego*=to burn.] Without flame.

Aphlogistic lamp, or **flameless lamp**: A lamp formed by winding a coil of fine platinum wire loosely round the lower part of the wick of a spirit lamp. When the flame is extinguished the coil will continue in a state of ignition till the spirit is consumed.

ă-phō-nī-a, **ăph-ōn-ŷ**, s. [In Fr. *aphonie*; Gr. *aphōnia*; from a, priv., and *phōnē*=to produce a sound; *phōnē*=a sound.]

Med.: Inability to speak, loss of voice, dumbness.

"In cases of *aphonia*, where the vocal chords cannot be made to vibrate freely..."—Max Müller: *Science of Language*, 6th ed., vol. ii. (1871), p. 127.

"*Aphony* (Gr.), want of voice."—Glossog. Nov., 2d. ed.

a-phō-r'-i-a, s. [Gr. *aphoria*; from *aphoros*=not bearing; a, priv., and *phoros*=bearing, . . . fruitful; *pherō*=to bear.] The absence of bearing, unfruitfulness; barrenness.

ăph-ôr-îsm, s. [In Ger. *apherism*; Fr. *aphorisme*; Sp. and Ital. *aforismo*; Port. *aphorismo*. From Gr. *aphorismos*=(1) a separation; (2) a definition, also an aphorism; *aphorizō*=to mark off by boundaries; *apo*=from, and *horizō*=to separate from as a boundary; *horos*=a boundary.] A short detached pithy sentence, containing a maxim or wise precept, deduced from the general experience of mankind. (See example under APHORIZE.)

"Solomon became enabled, not only to write those excellent parables or *aphorisms*, concerning divine and moral philosophy, but also . . ."—Bacon: *Advanc. of Learning*.

ăph-ôr-îs-măt'-ic, **ăph-ôr-îs-mic**, a. [Eng. *aphorism*; -atic; -ic.] Pertaining to an aphorism or aphorisms; containing an aphorism. (Ogilvie.)

ăph-ôr-îs-mēr, s. [Eng. *aphorism*; -er.] One who habitually quotes aphorisms.

"We may infallibly assure ourselves, that it will as well agree with monarchy, though all the tribe of *aphorismers* and politicasters would persuade us there be secret and mysterious reasons against it."—Milton: *Of Ref. in England*, bk. 2.

***ăph-ôr-îs-mîng**, a. [Eng. *aphorism*; -ing.] Overbearing unduly by the use of aphorisms.

"There is no art that hath been more cankered in her principles, more soiled and slabbered with *aphorisming* pedantry, than the art of policy."—Milton.

ăph-ôr-îst, s. [Eng. *aphoris(m)t*.] A compiler of aphorisms.

"He took this occasion of farther clearing and justifying what he had written against the *aphorist*."—Nelson: *Life of Ep. Bull*, p. 246.

ăph-ôr-is'-tic, **ăph-ôr-is'-tic-al**, a. [Eng. *aphorist*, -ic, -ical; or *aphoris(m)*, -tic, -tical. In Fr. *aphoristique*; Port. *aphoristico*.] [APHORISM.] Pertaining to an aphorism; in the form of an aphorism; in short, detached sentences like an aphorism.

"... because the style of his conversation is less flowing and diffusive—less expansive—more apt to clothe itself in a keen, sparkling *aphoristic* form."—De Quincey: *Works* (ed. 1863), vol. ii., p. 232.

ăph-ôr-is'-tic-al-ly, adv. [Eng. *aphoristical*; -ly.] In the form of an aphorism.

"These being carried down seldom miss a cure, as Hippocrates doth likewise *aphoristically* tell us."—Harvey.

ăph-ôr-i'-ze, v. i. [Gr. *aphorizō*=(1) to mark out by boundaries; (2) to limit, to define.] To utter or write an aphorism.

"In order to get the full sense of a word, we should first present to our minds the visual image that forms its primary meaning. Draw lines of different colors round the different counties of England, and then cut out each separately, as in the common play-maps that children take to pieces and put together, so that each district can be contemplated apart from the rest, as a whole in itself. This twofold act of circumscribing and detaching, when it is excited by the mind on subjects of reflection and reason, is to *aphorize*, and the result an aphorism."—Coleridge: *Aids to Reflection* (ed. 1839), pp. 16, 17.

ăph-rīte, s. [Gr. *aphros*=foam, and suff. -ite (Min.) (q. v.).]

Min.: A variety of Calcite, sometimes called also Earth Foam, and by Kirwan Silvery Chalk. Dana considers that the harder and more sparry specimens approach argentite, and the softer ones chalk.

ăph-rī-zīte, s. [In Ger. *aphrisit*; Gr. *aphrizō*=to foam; *aphros*=foam, and suff. -ite.] A variety of the mineral called Tourmaline. It is found in the Harz mountains.

ăph-rō-dīs'-i-ac, ***ăph-rō-dīs'-i-äck**, a. & s. [In Port. *aphrodisiaco*; from Gr. *aphrodisia*=venery; *aphrodisios*=belonging to love or venery. From *Aphrodite*=Venus.] [APHRODITE.]

1. As adjective: Exciting or tending to excite venereal desire.

2. As substantive: A provocative to venery. Garrod makes Aphrodisiacs the second order of his Division I., Sub-class 5. He divides them into *direct* and *indirect*. Among the former are nux vomica, strychnia, cantharides; and among the latter, blood tonics and nervine tonics. (Garrod: *Materia Medica*, 3d ed., p. 415.)

ăph-rō-dīs'-i-ac-al, **ăph-rō-dīs'-ic-al**, a. [Eng. *aphrodisiac*, in full or contracted; suffix -al.] The same as APHRODISIAC, adj. (q. v.).

ăph-rō-dīs'-i-an, a. [APHRODISIAC.] Pertaining to love or venery. Davies gives an example from C. Reade (*Cloister and Hearth*, ch. lvi.).

ăph-rō-dī-ta, **ăph-rō-dī-tē**, s. [Gr. *Aphrodītē*, a name of Venus, given because it was believed that she sprung from the *aphros*, or foam of the sea.]

Zool.: A genus of Annelids, the typical one of the family Aphroditidæ. The Sea-mouse is the *Aphrodita aculeata*. The scales on its back are covered and concealed by a substance resembling tow, which arises from the sides. These also give rise to groups of strong spines, which pierce through the tow, and are not merely brilliant in hue, but vary that hue according as the light falls on them, so as to exhibit the various rainbow colors. From this exceeding brilliance, coupled with its connection with the sea, in the deep water of which it resides, it has come to be known by one of the epithets of Venus, while its oval form and tow-covered skin have led to its being denominated the Sea-mouse.

ăph-rō-dīte, s. [In Ger. *aphrodit*, from Gr. *aphros*=foam, and suff. -ite, or from *Aphrodītē*=Venus, in allusion to her as foam-born.] A mineral placed by Dana in his Sepiolite group of Bisilicates. It is a soft opaque mineral, of a milk-white color. One specimen contained silica, 51.55; magnesia, 33.72; protoxide of manganese, 1.62; protoxide of iron, 0.59; alumina, 0.20; water, 13.52. It is found in Sweden. [APHRODITA.]

ăph-rō-dīt'-i-dæ, s. pl. [APHRODITA.] A family of Annelida; the second of the order Errantia. Their dorsal surface has on it a double row of large membranous scales attached to the alternate segments, between which appear the beautiful bristles of the feet. [APHRODITA.]

ăph-rōph'-ôr-a, s. [Gr. *aphrophoros*=foam-bearing; *aphros*=foam, and *phoros*=bearing; *pherō*=to bear or carry.] A genus of insects belonging to the order Homoptera, and the family Cercopidæ. The *Aphrophora spumaria* (formerly called *Tettigonia spumaria*) is the Cuckoo-spit Frog-hopper, the insect the larva of which envelops itself in froth. There are other species, as the *A. bifasciata*, which is common in gardens. When come to maturity the Aphrophoras leap well.

ăph-rō-sid'-ēr-ite, s. [From Gr. *aphros*=foam; *sidēros*=iron, and suff. -ite.] A doubtful mineral akin to Pyrochlorite. It is a soft, ferruginous chlorite, of dark olive-green color, found in Germany.

ăph'-thā (pl. **ăph'-thæ**), s. [In Fr. *aphte*; Port. *apthta* (sing.); Lat. *apthæ* (pl.); Gr. *apthta* (sing.); *apthtai* (plur.), from *haptō*=to fasten . . . to kindle, to set on fire, to inflame.]

Med.: One of the numerous white-looking specks or vesicles which sometimes appear on the tongue and palate, whence they gradually diffuse themselves over the mouth and fauces. There are three varieties: (1) The *Aphtha infantum*, or milk-thrush; (2) the *A. maligna*; and (3) the *A. chronica*. The first variety is an idiopathic disorder, chiefly attacking infants brought up by hand; the second and third are symptomatic of other diseases. The aphtha which frequently appear in the mouth in advanced stages of consumption generally precede dissolution by about a week or a fortnight.

¶ The term *aphtha anginosa* is sometimes applied to a variety of sore throat.

ăph-thāl-ōse, **ăph-thīt'-al-ite**, s. [Gr. *aphthitos*=undestroyed, unperishable; a, priv., and *phthino*, or *phthio*=to decay, with *hals*=salt.] A mineral classed by Dana under his Celestite group. It is called also Arcanite, Glasserite, Vesuvian Salt, and Sulphate of Potash. One specimen was composed of potash, 54.1, and sulphuric acid, 45.9=100. It is a bluish-white or greenish-white mineral, with vitreous luster, and a saline taste, found on Mount Vesuvius.

ăph'-thōng, s. [Gr. *aphthongos*=voiceless; a, priv., and *phthongos*=the voice; *phthengomai*=to speak loud or clear.] A letter or letters left unsounded when a word is pronounced.

ăph'-thōn-ite, s. [From Gr. *aphthonos*=without envy, bounteous, plentiful; a, priv., and *phthonos*=envy, and suff. -ite.] A mineral; a variety of Tetrahedrite. It is of a steel-gray color, and is found in Sweden.

ăph'-thouſ, a. [Eng. *apth(a)*; -ous.]

1. Pertaining to apthæ.

"... so long as the *aphthous* specks retain their purely white color, little danger need be apprehended."—Cyclo: *Pract. Med.*

fâte, fât, färe, amidst, whât, fâll, father; wē, wēt, hère, camēl, hēr, thère; pine, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rûle, fûll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

2. *Botany*: Resembling something covered with little ulcers.

a-phŷl'-læ, *s. pl.* [Gr. *aphyllos*=leafless: *a*, priv.; *phyllos*=a leaf.]

Bot.: Plants destitute of leaves. (A term sometimes applied to Thallogens, from the absence in them of all proper leaves.)

a-phŷl'-louš, *a.* [APHYLLE.]

Bot.: Destitute of leaves.

ā-pī-ā-čĕ-æ, *s. pl.* [UMBELLIFERS.]

ā-pī-ā-r-ī-an, *a.* [From Lat. *apiarius*=relating to bees, and suff. *-an*.] Relating to bees.

ā-pī-ar-ist, *s.* [Lat. *apiarius*=a bee-keeper.] A bee-keeper; one who keeps bees.

Apiary.

ā-pī-ar-ŷ, *s.* [Lat. *apiarium*=a bee-hive; *apis*=a bee.] A shed or stand for bee-hives.

"Those who are skilled in bees, when they see a foreign swarm approaching to plunder their hives, have a trick to divert them into some neighboring *apiary*, there to make what havoc they please."—*Swift*.

ā-pī-cal, *a.* [From Lat. *apex*, genit. *apicis*=the tip or top.] Pertaining to the tip, top, or vertex of a cone, a triangle, a leaf, &c.

ā-pī-čĕš, **ā-pĕx-ĕš**, *s. pl.* The Latin and English forms of the plural of *APEX* (q. v.).

***a-pick'-päck**, *adv.* Astride on the back, as a child is sometimes carried. [PICK-A-BACK.]

ā-pic'-ul-āte, **ā-pic'-ul-ā-tĕd**, *a.* [Mod. Lat. *apiculus*, dimin. of *Class. Lat. apex*.]

Bot.: Pointed; terminating abruptly in a little point. It differs from mucronate in this respect, that the point constitutes a part of the limb, instead of arising wholly from a costa.

ā-pī-cŭl-tŭre, *s.* [Lat. *apis*=a bee, and *cultura*=tilling, cultivating, tending.] The "culture" or tending of bees; bee-keeping.

"To those acquainted with German and American *apiculture*, it is a well-known fact that we are at least a century behind these nations in this important art."—*Rev. George Raynor*, in *Times*, October 1, 1875.

ā-pic'-u-lŭs, *s.* [In Lat., an unclassical dimin., from *apex*.]

In *Bot.*: A small point, used especially of cases in which the midrib projects beyond the leaf, so as to constitute a small point, or when a small point is suddenly and abruptly formed.

ā-pī-dæ, *s. pl.* [From Lat. *apis*=a bee.] A family of insects, the typical one of the Hymenopterous sub-tribe Anthophila, the tribe Aculeata, and the order Hymenoptera itself. The Apidæ have an elongated tongue; while the Andrenidæ, the other family of Anthophila, have the trunk short and blunt. It contains the social bees, *Apis*, *Bombus*, &c., with some of the solitary ones, as *Xylocopa*.

a-piĕ-čĕ, **a-piĕ-čĕ**, *adv.* [Eng. *a*, and *piece*.] Each. To each.

"The golden spoons were twelve, full of incense, weighing ten shekels *apiece*."—*Numb.* vii. 86.

"... the modern invention of printing poems for pence *a-piece*, has brought the nose-gays of Parnassus to bear the same price."—*Pope: Letter to H. Cromwell*, March 7, 1709.

ā-pī-ō-crīn-ī-tĕš, *s.* [From Gr. *apion*=a pear, *krinon*=a lily, and Eng. suffix *-ite*=Gr. *lithos*=stone. Literally, pear-shaped lilies of stone.] Pearencrinites, a genus of Encrinurites somewhat resembling a pear in form. Specimens of the *A. rotundus* are found at Bradford, with the stumps of their stems still standing on the great oolite in which they grew, though their articulations have been broken off, and now lie scattered through the stratum above, which is of clay.

ā-pī-ōn, *s.* [Gr. *apiōn*=not fat; *a*, priv., and *pīōn*=fat.] A genus of Weevils (*Curculionidæ*), the larvae of the several species of which are very injurious in clover fields. The *A. apicans* preys,

when in the grub state, on the flowers of the purple clover (*Trifolium pratense*); the *A. flavipes* on those of the Dutch clover (*T. repens*); the *A. assimile* chiefly on the sulphur-trefoil (*T. ochroleucum*); and the *A. pomonæ* on the tare (*Vicia sativa*).

Ā-pīs (1), *s.* [Lat. *Apis*; Gr. *Apis*, genit. *Apios*.] An Egyptian deity, the same as Osiris. He was worshiped under the form of an ox, white in color, with black spots.

"He blamed Dryden for sneering at the Hierophants of *Apis*."—*Macaulay: Hist. Eng.*, ch. xiv.

ā-pīs (2), *s.* [Lat. *apis* or *apes*, genit. *apis*=a bee.]

1. *Entom.*: The typical genus of the family Apidæ, and the Hymenopterous tribe Anthophila. The workers have the first articulation of the posterior tarsi in a long square; it is moreover furnished at its internal face with silky down, divided into transverse bands. The *A. mellifica*, from Lat. *mellificus*, *a*=honey-making (*mel*=honey, and *facio*=to make), is the Hive-bee. [BEE.]

2. *Astron.*: A small constellation in the Southern Hemisphere, first named by Halley. It is called also *Musca*, literally—the Fly, but in this case rendered "the Bee." [MUSCA.]

ā-pish, *a.* [Eng. *ap(e)*; *-ish*. In Ger. *apisch*.]

1. Prone to imitate in a servile manner, as an ape might do; hence, also, foppish, affected.

"Report of fashions in proud Italy,
Whose manners still our tardy *apish* nation
Limps after, in base imitation."

Shakesp.: Richard II., ii. 1.

2. Playful, wanton, like an ape; hence, also, silly, trifling, insignificant.

"And *apish* folly, with her wild resort
Of wit and jest, disturbs the solemn court."

Prior.

"And this is but *apish* sophistry . . ."—*Glanville*.

ā-pish-lŷ, *adv.* [Eng. *apish*; *-ly*.] In an *apish* manner; with servile imitation; foppishly, conceitedly, playfully, with silly trifling.

ā-pish-nĕss, *s.* [Eng. *apish*; *-ness*.] The quality of being *apish*. Mimicry, playfulness, insignificance.

a-pīs'-tĕš, **a-pīs'-tōš**, **a-pīs'-tŭš**, *s.* [Gr. *apistos*=faithless, not to be trusted: *a*, priv., and *pistos*=faithful. So called because a strong suborbital spine jutting out from the cheek of the fish so designated becomes a perfidious weapon.] A genus of spiny-finned fishes belonging to the family Triglidae. They are of small size, and are somewhat allied to Blennius. They rise into the air like ordinary flying-fish. Ehrenberg seeing the abundance in the Red Sea of the *A. israelitorum*, or Sea-locust, supposed that it might be the Scriptural quail. [QUAIL.]

†a-pīt'-pāt, *adv.* [Eng. *a*; *pit*; *pat*. A word the sound of which is designed to imitate the movement or action which it describes.] Palpitating, or palpitatingly; beating with more than average force. Applied to the heart; more usually in the form *PITPAT*.

"O there he comes. Welcome, my bully, my back! . . . my heart has gone *apitpat* for you."—*Congreve*.

ā-pī-ŭm, *s.* [In Sp. *apio*; Ital. *appio*; Lat. *apium*

=parsley (?)

or wild celery

(?); Gr. *apion*

= (1) a pear,

(2) parsley:

ap, *ab*, or *av*

in various

languages =

water, as

Punjaub =

the five

waters.]

Celery. A

genus of

plants, the

typical one

of the order

Apiaceæ, or

Umbellifers.

The *A. grave-*

olens, Small-

age, or Wild

Celery, grows

in marshy

places, especially

near the sea. It

is the original

of the garden

celery. [CELERY.]

A. petroselinum

is the well-known

parsley. [PARSLEY.]

āp'-jōhn-ite, *s.* [Named after Apjohn, who analyzed it.] A mineral, placed by Dana under his Alum and Halotrichite groups. It occurs in white fibrous or asbestiform masses at Lagoa Bay, in South Africa. Composition: Sulphuric acid, 32.97; alumina, 10.65; sesquioxide of manganese, 7.33; water, 48.15; sulphate of magnesia, 1.08=100.

***a-plā'čĕ**, ***a-plā's**, *adv.* [Eng. *a*; *place*.] In one's place, before all.

"Ther men anon forth *aplace* hir brought,
Fair melusine, enmyddes the chapel,"
The Romans of Partenay (ed. Skeat), 932-3.

Apium Graveolens.

1. Part of the inflorescence.

2. Flower. 3. Root-leaf, and base of stem.

4. Ripe fruit.

āp-lān-āt'-īc, *a.* [From Gr. *a*, priv., and *planāō*=to cause to wander; from *planē*=wandering.] Not wandering; destitute of aberration.

Aplanatic lens: One which, could it be constructed, would so refract all the rays of light incident upon it, whether they entered it in a direction parallel to its axis, or converged to, or diverged from, a point in that axis, as to make them all ultimately meet in a single point or focus. More than one form of lens would be aplanatic could it be made with mathematical exactness, different media being employed to render it achromatic. Lenses can at present be made only approximately aplanatic, and tables are therefore constructed to show how, with a given refractive index, the aberration of the focus may be reduced to a minimum. [ABERRATION, ACHROMATIC.]

a-plās'-tīc, *a.* [Gr. *aplastos*=unmolded, unshapen.] Not plastic; incapable of being easily molded into shape. [PLASTIC.]

***a-plī'ght** (*gh* silent), *adv.* [A. S. *a*=on; *plīht*=(1) a pledge, (2) danger, obligation.] As if bound by obligation; faithfully.

"Hu ihc hire boghte *aplight*

For seuesithe of golde hire wight."

Floriz and Blaunchefur (ed. Lumby), 649-50.

a-plōč'-ēr-īne, *a.* [APLOCERUS.] Pertaining to the sub-genus Aplocerus. Col. Hamilton Smith makes the Aplocerine group one of the sub-divisions of the great genus Antelope (q. v.). (*Griffith's Cuvier*, vol. iv., p. 285.)

a-plōč'-ēr-ŭs, *s.* [Gr. *haplos*; from *haploos*=simple, and *keras*=horn.] A sub-genus of Antelope. The species are American. In character they approach the goats.

a-plomb', *s.* [Fr. from *à*=to, and *plomb*=lead.] Downrightness of manner; self-possession; coolness.

āp-lō'me, *s.* [In Ger. *aplome*; from Gr. *haplos*=simple. The name was given by Haty because a cube is simpler than a dodecahedron. (See def.)] A mineral; a variety of Manganesian Lime, Iron Garnet. It is usually of a deep-brown or orange-brown color. It is opaque. It is harder than quartz. Like the garnet, it is crystallized in the form of a dodecahedron, with rhomboidal planes; but these are striated parallel with the lesser diagonal, which, in Haty's opinion, indicates that the primitive form of the crystal is a cube. Found on the banks of the Lena, in Siberia, also in Saxony.

āp-lō-nō-tŭš (*Latin*), *s.* [Gr. *haploos*=simple, and *nōtos*=the back.] A genus of lizards of the family Iguanidæ. The Aplozone, *A. Ricardi*, is of a blackish-brown color, with spots of tawny brown. The back is without scales, but has small granules, and along its summit a shallow crest.

a-plŭs'-tre, ***a-plŭs'-tĕr**, *s.* [Lat. *aplustre*; Gr. *aplaston*.] An ornament affixed to the stern, or sometimes to the prow of ancient vessels. It was made of wood, and resembled the tail of a fish. A staff or pole rose from it with a riband or streamer at the top.

"The one holds a sword in her hand, to represent the Iliad, as the other has an *aplustre*, to represent the Odyssey, or voyage of Ulysses."—*Addison*.

a-plŭs'-trŭm, *s.* [APLUSTRE.] A genus of shells of the family Bullidæ. They have oval ventricose, highly-colored shells, with their spire wide and depressed. In 1851, Woodward estimated the species at ten.

***a-plŷ'**, *v. t.* [Old form of *PLY* (q. v.).] To ply; bend. [APPLY.]

"Which lightly ne wold to bow ne *aply*."

The Romans of Partenay (ed. Skeat), 4, 187.

a-plŷš'-ī-a, *s.* [Gr. *aplysia*=filthiness; *aplysia*, *pl.*; Lat. *aplysia*=a kind of sponge, so called from its dirty color.] A genus of mollusks, the typical one of the family Aplysiadæ. The species have an oblong convex flexible and translucent shell, with a posterior slightly incurved apex. The animals are oval, with four tentacles. They are called Sea-hares. They inhabit the laminarian zone of the sea, and when molested discharge a violet fluid. Tate, in 1875, estimated the known recent species at forty-two, with one or two more doubtfully identified from the Tertiary formation.

a-plŷš'-ī-a-dæ, *s. pl.* [APLYSIA.] A family of molluscous animals, the third of the Tectibranchiate section of the Gasteropodous order Opisthobranchiata. The shell is wanting or rudimentary, and the animal slug-like. It contains the genera Aplysia, Dolabella, &c.

a-pnœ'-a, *s.* [Gr. *apnoia*=want of wind, a calm: *a*, priv., and *pneō*=to blow, to breathe.]

Med.: Absence or great feebleness of breath, as in the case of swoon.

āp'-ō, in composition. [Gr. *apo*; Sansc. *apa*; Lat. *ab* or *abs*; Goth. *af*; Ger. *ab*; Eng. *of*, *off*.] A Greek prefix occurring in many English words originally from the Greek. It generally signifies from.

bōll, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem, thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shŭn: -tion, -sion = zhŭn. -tious, -cious, -sious = shŭs. -ble, -dle, &c. = bĕl, dĕl.

a-pōc'-a-lŷpse, ***a-pōc'-a-lŷpse**, *s.* [In Ger. *apokelyse*; Fr. & Port. *apocalypse*; Sp. *apocalipsis*; Ital. *apocalisse*, *apocalissi*. From Lat. *apocalypsis*; Gr. *apokalupsis*=an uncovering, a revelation; *apokaluptō*=to uncover: *apo*=cessation from, and *kalyptō*=to cover.]

1. *Gen.*: An uncovering, disclosing, or revealing of what was before hid.

"The vates poet with his melodious *apocalypse* of Nature."—*Carlyle: Heroes and Hero-worship*, Lect. iii.

2. *Specially*:

(a) The vision or visions recorded in the last book of the Bible.

"Oh, for that warning voice which he, who saw
The *apocalypse*, heard cry in heaven aloud."

Milton: P. L., bk. iv.

(b) The last book in the Bible, which receives both its Latin and its Greek name from the fact that its contents mainly consist of a revelation or apocalypse of future events previously hidden from mental cognizance. [REVELATION.]

†a-pōc'-a-lŷpt, *s.* [Gr. *apokaluptō*=to uncover.] The author of the Apocalypse. (*Coleridge*.) (*Reid*.)

a-pōc'-a-lŷp'-tīc, ***a-pōc'-a-lŷp'-tīc**, *a. & s.* [In Fr. *apocalyphtique*; Sp. *apocaliptico*; Port. *apocaliptico*. From Gr. *apokaluptikos*=fitted for disclosure.]

1. *As adjective*: Pertaining to a revelation, or containing one. Especially belonging to the revelation made in the last book of the Bible.

"It was concluded by some, that Providence designed him the *apocalyphtick* angel which should pour out one of the vials upon the beast."—*Spenser on Prodigies*, p. 314.

The *Apocalyphtic number*, 666. (Rev. xiii. 18.)

2. *As substantive*: One who makes an apocalyptic communication.

"The divine *apocalyphtick*, writing after Jerusalem was ruined, might teach them what the second Jerusalem must be; not on earth, but from heaven, *Apoc.* xxi. 2."—*Lightfoot: Miscell.*, p. 107.

a-pōc'-a-lŷp'-tīc-al, *a.* [Eng. *apocalyphtic*; -al.] The same as APOCALYPTIC, *a.* (q. v.).

a-pōc'-a-lŷp'-tīc-al-lŷ, *adv.* [Eng. *apocalyphtical*; -ly.] In a manner that is apocalyphtic.

ăp-ō-car'-pī, *s. pl.* [Gr. *apo*=from, and *karpos*=fruit.]

Bot.: The 1st class in Dr. Lindley's classification of Fruits. The fruit is simple: that is, the ovaria are strictly simple; a single series only being produced by a single flower. Some are one or two seeded, viz., Utricleus, Achæmium, and Drupa; and the rest many-seeded, viz., Folliculus, Legumen, and Lomentum. [APOCARPOUS.] (*Lindley: Introd. to Bot.*)

ăp-ō-car'-poŷs, *a.* [APOCARPI.]

Bot.: A term applied to the carpels of a compound pistil when they are either wholly or partly distinct. Example: Caltha. It is opposed to SYNCARPOUS (q. v.).

ăp-ō-că-tăs'-tă-sīs, *s.* [Gr. *apokatastasis*=complete restoration; *apokathistēmi*=to re-establish: *apo*, intensive, and *kathistēmi*=to set down; *kata*=down, and *histēmi*=to make to stand, to set. Or *apo*=from, and *katastasis*=a settling, appointing.]

1. *Astron.*: The period of a planet; the time which it takes to return to the same apparent place in the heavens from which it moved on its seemingly erratic course.

2. *Med.*: The cessation or subsidence of morbid or other symptoms. (*Parr.*)

ăp-ō-čă-s, *s.* [Gr. *apochē*.] A receipt, a quit-tance. (*Hacket: Life of Williams*, i. 25.)

ăp-ō-čă-thar'-sīs, *s.* [Gr. *apokatharsis*=a thorough cleansing; *apokathairō*=to cleanse thoroughly: *apo*, intens., and *katharsis*=cleansing, from *kathairō*=to cleanse; *katharos*=pure.]

Med.: A purgation, a discharge downwards. Sometimes less properly applied to vomiting.

ăp-ō-čă-thar'-tīc, *a. & s.* [Gr. *apo*, here redundant; and *cathartic* (q. v.).]

As adjective: Cathartic.

As substantive: A cathartic. [APOCATHARSIS.] (*Hooper: Med. Dict.*)

ăp-ō-čăn-ō'-sīs, *s.* [Gr. *apokenōsis*=an emptying; *apokenō*=quite to empty: *apo*, intensive, and *kenō*=to empty out, to drain; *kenos*=empty. Or from *apo*, and *kenōsis*=an emptying, a discharge.]

Med.: A discharge. A term applied by Dr. Cullen to a discharge with blood. It is limited to hemorrhages, in contradistinction to those which are attended with fever. (*Parr.*)

***ăp-ō-clăsm**, *s.* [Gr. *apoklasma*, see def.; *apo-klaō*=to break off: *apo*=from, and *klaō*=to break.]

Med.: The breaking away of any part of the body.

ăp-ō-cō-dě-ine, *s.* [Gr. *apo*=from, and Eng. *codeine* (q. v.).]

Chem.: C₁₈H₁₉NO₃. An organic base obtained by heating a solution of codeine hydrochloride with ZnCl₂. It is a mild emetic.

a-pōc'-ōp-āte, *v. t.* [In Sp. *apocopar*. From Gr. *apokopos*=cut off; *apokoptō*=to cut off: *apo*=from, and *koptō*=(1) to strike, (2) to cut off.] To cut off.

Spec. In Grammar: To cut off the last letter or syllable of a word. Often in the pa. par. (q. v.).

a-pōc'-ōp-āte, **a-pōc'-ōp-ā-těd**, *pa. par. & a.* Cut off, as the last letter or last syllable of a word. Thus, in Heb. *yigēl* is the apocope fut. for *yigleh*, the full form of the future of the Heb. verb *galah*=to uncover, to reveal.

a-pōc'-ōp-ā-tīng, *pr. par.* [APOCOPATE, *v.*]

a-pōc'-ōp-ē, **ăp-ōc'-ōp-ŷ**, *s.* [In Fr., Sp., & Lat. *apocope*; Gr. *apokopē*=a cutting off; *apokoptō*=to cut off.] [APOCOPATE.]

1. *Gram.*: A figure by which the last letter or syllable of a word is cut away, as in Lat. *ingeni* for *ingenii*.

2. *Surg.*: The cutting away of any soft part of the body. (*Parr.*)

a-pōc'-rīš-ā-r-ī-ūs, **a-pōc'-rīš-ār-ŷ**, **ăp-ō-crīš-ī-ā-r-ī-ūs**, *s.* [Lat. *apocrisarius*, *apocrisarius*. From Gr. *apokrisis*=(1) a separating, (2) an answer; *apokrinō*=to separate, (middle) to answer: *apo*=from, and *krinō*=to separate.]

Eccles.: A delegate or deputy sent out by a high ecclesiastical dignitary; as a legate or a nuncio may be by the Pope. (*Spelman*.)

ăp-ō-crūš'-tīc, *a. & s.* [Gr. *apokroustikos*=able to drive off; *apokrouō*=to beat off: *apo*=from, and *krouō*=to strike, to smite. Or *apo*=from, and *kroustikos*=fit for striking.]

A. As adjective (Med.): Repellent.

B. As substantive (Med.): A repellent; a medicine operating with a repellent or astringent effect

a-pōc'-rŷ-phă, ***a-pōc'-rī-phă**, *s.* [In Fr. *apocryphe*. Properly the neut. pl. of the Lat. adj. *apocryphus*; Gr. *apokryphos*=hidden. Applied to books, it means (1) of unknown authorship; (2) fabulous, untrustworthy; from Gr. *apokruptō*=to hide from: *apo*=from, and *kruptō*=to hide.]

A. In the Early Christian Church: (1) Books published anonymously. (2) Those suitable for private rather than public reading. (3) Those written by an apostle or other inspired author, but not regarded as part of Scripture. (4) The works of heretics.

B. In English now:

I. Literally:

1. *Spec.*: The following fourteen books:

I. 1 Esdras; II. 2 Esdras; III. Tobit; IV. Judith; V. Additions to Esther; VI. The Wisdom of Solomon; VII. Ecclesiasticus, called also the Wisdom of Jesus, the son of Sirach; VIII. Baruch; IX. The Song of the Three Holy Children; X. The History of Susanna; XI. Bel and the Dragon; XII. The Prayer of Manasseh, King of Judah; XIII. 1 Maccabees; and XIV. 2 Maccabees.

Most of the above-mentioned books were composed during the two centuries immediately preceding the birth of Christ, though some were penned, or at least interpolated, at a later period. They were written not in Hebrew or Aramaean, but in Greek; and the Jews never accorded them a place in the Old Testament canon. They were inserted in the Septuagint, and thence passed to the Latin Vulgate. The Christian fathers were divided in sentiment as to their value and the relation they stood to the canonical Old Testament books; Jerome dealing with them in a free, enlightened, and discriminating manner; while Augustine and others were much less independent. The question whether or not they were inspired remained an open one till the Reformation. Wycliffe, whose mind was cast in what we should now call a wonderfully Protestant mold, was against them; so was Luther; and yet more strongly, Calvin, with his followers. To uphold their waning authority, the Council of Trent, on the 8th of April, 1546, placed them on an equal level with Scripture, anathematizing all who held the contrary opinion. Portions of them are in the New as well as in the Old Lectionary of the English Church; but the sixth of the Thirty-nine Articles explains that "the other Books" [the fourteen enumerated], "as Hierome saith, the Church doth read for example of life and instruction of manners, but yet doth it not apply them to establish any doctrine." The Westminster Confession of Faith, the formulated creed of the Presbyterian Church regards them as simply human writings, and denies them all authority. The several apocryphal books are of unequal merit. 1st Maccabees is a highly valuable history; while Bel and the Dragon is a monstrous fable. Taking them as a whole, they throw much light on the religious opinions and the political state of the Jews before the advent of Christ, and explain not a little which else would be obscure in the New Testament. The Greek Church prohibits their use.

We hold not the *Apocrypha* for sacred, as we do the holy Scripture, but for human compositions."—*Hooker*.

2. *Gen.*: Any productions of similar character to the apocryphal books of the Old Testament. Writing regarding gospels of this nature, Strauss says—

"In several *apocryphas* . . ."—*Strauss: Life of Jesus* (Transl.), vol. i. (1846), p. 209.

II. *Fig.*: Untrustworthy statement, myth, fable.

"Every account of the habits of a wild animal obtained at second-hand from the reports of aborigines has its proportion of *apocrypha*."—*Owen: Classif. of Mammal*, p. 91.

a-pōc'-rŷ-phăl, *a. & s.* [Eng. *apocryphal* (a); -al. In Dan. *apocryphiste*; Dut. *apocryfe*; Ger. *apocryphisch*; Fr. *apocryphe*; Sp. & Ital. *apocrifo*; Port. *apocrypho*.]

A. As adjective:

*I. *Formerly*. In the *Early Church*: Anonymous, unpublished, uninspired, heretical. [APOCRYPHA.]

"Jerome, who saith that all writings not canonical are *apocryphal*, uses not the title *apocryphal* as the rest of the Fathers ordinarily have done; whose custom is so to name, for the most part, only such as might not publicly be read or divulged."—*Hooker*.

II. *Now*:

1. Pertaining to the fourteen books collectively denominated the Apocrypha.

¶ *Apocryphal Controversy*: A controversy which arose about 1821 as to whether the British and Foreign Bible Society were acting rightly in binding the Apocrypha between the two Testaments of the Bibles which they issued, this practice having been adopted in order to render the sacred volume more acceptable in Roman Catholic countries or districts. The anti-Apocryphal party ultimately prevailed over their opponents. About 1826 the Apocrypha was altogether excluded from the Society's Bible. [APOCRYPHA.]

2. Of doubtful authority; mythic, fabulous.

"The passages to which it refers are, however, in part from *apocryphal* or fictitious works."—*Lewis: Early Rom. Hist.*, ch. iii., § 2, vol. i., p. 73.

B. As substantive: One of the fourteen books named under APOCRYPHA, B., I. 1., or any literary production of similar pretensions and character.

"Nicephorus and Anastasius . . . upon this only account (as Usher thinks), because they were interpolated and corrupted, did rank these epistles in the number of *apocryphals*."—*Hanmer: View of Antiquity*, p. 419.

a-pōc'-rŷ-phăl-ist, *s.* [Eng. *apocryphal*; -ist.] An admirer of the Apocrypha, a defender of the Apocrypha. (*Penny Cyclop.*)

a-pōc'-rŷ-phăl-lŷ, *adv.* [Eng. *apocryphal*; -ly.] With doubtful authority or authenticity; mythically.

a-pōc'-rŷ-phăl-něss, *s.* [Eng. *apocryphal*; -ness.] The quality of being of doubtful authority, if not even indisputably fabulous.

†a-pōc'-rŷ-phăc-al, *a.* [Eng. *apocryphal* (a); -ical.] The same as APOCRYPHAL.

a-pōc'-rŷ-phŷ, *v. t.* [Lat. *apocryphus*, and *fio* used as pass. of *facio*=to make.] To render doubtful.

ăp-ō-čŷ-nă'-čě-æ, *s. pl.* [APOCYNUM.] An order of plants, the English Dog-banes. Lindley places them under his Gentianal alliance, and the Asclepiadaceæ, or Asclepiads, under his Solanale one, thus separating two orders which in nature are closely akin. Both have mono-petalous corollas, with five stamens, the fruit in follicles, and the juice milky; but they differ in the details of the sexual apparatus. In 1846, Lindley estimated the known species of Apocynaceæ at 566, since increased to about 600. Of 100 known genera only one, *Vinca*, is found in England; the rest inhabit warmer countries than ours.

ăp-ō-čŷ-nŷm, *s.* [In Fr. *apocin*; Sp. & Ital. *apocino*; Gr. *apokunon*, a plant, *Cynanthus erectus*: *apo*=from, and *kuōn*=dog. Literally, *from dog or dog away*; meaning, from which dogs must be kept away, since it is poisonous to them.] Dog's-bane. A genus of plants, the typical one of the family Apocynaceæ. The species are not very beautiful. The North American Indians use the fibers of the bark of *A. cannabinum* and *hypericifolium* as a substitute for those of hemp in manufacturing cordage, linen cloth, &c. *A. androsæmifolium* is the Fly-trap of North America. [FLY-TRAP.]

ăp-ōd-ă, *s. pl.* [Gr. *apoda*, neut. pl. of *apous*, genit. *apodos*=without feet.]

*1. *Zool.*: Aristotle's third section of Zootoka, or air-breathing vivipara. It included the Whales, which the Stagirite, with remarkable scientific accuracy, ranked with the warm-blooded quadrupeds.

2. The second order of the class Amphibia, or Batrachia. The body is like that of an earthworm, and is quite destitute of feet. The order contains but one family, the Cæciliadæ (q. v.).

fâte, fât, färe, amidst, whât, fáll, father; wē, wět, hère, camēl, hēr, thêre; pīne, pīt, sire, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cŭb, cŭre, unite, cŭr, rŭle, fŭll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

3. According to Professor Müller, a group of fishes belonging to the sub-order Physostomata. It is so called because the ventral fins are wanting. It contains three families, the Murenidae, or Eels, the Gymnotidae, and the Symbranchidae.

řap-ō-dăc-rýt'-ic, řap-ō-dăc-rýt'-tick, s. [Gr. *apodakrutikos*=calling forth tears; *apodakruō*=to shed many tears: *apo*, intensive, and *dakruō*=to weep; *dakru*, or *dakruon*=a tear.]

Pharmacy: A medicine tending to produce tears.

"Apodacrysticks (Gr.). Medicines that provoke tears."—*Glossog. Nova*, 2d ed.

řap-ōd-ăl, a. & s. [APODA.]

A. As adjective:

1. *Gen.*: Without feet.

2. *Ichthy.*: Without ventral fins.

B. As substantive: Used specially in the second and third senses given under APODA (q. v.).

Plural: The English equivalent for APODA (q. v.).

řap-ōd-an, řap-ōd-on, s. [Eng. *apode*; -an.] An animal destitute (a) of feet, or (b) of ventral fins. [APODA.]

řap-ōde, s. [APODA.] The same as APODAL (q. v.).

řap-ōd-ēs, s. pl. [Gr. *apodes*, the pl. of *apous*, genit. *apodos*=without feet.]

1. *Gen.*: Animals without feet.

*2. *Spec.*: Linnæus's first order of Fishes. He placed under it the genera destitute of ventral fins. The assemblage was not wholly a natural one.

řap-ō-dic'-tic, řap-ō-dic'-tick, řap-ō-dic'-tic-ăl, a. [Lat. *apodicticus*; Gr. *apodeiktikos*, *apodeiknumi*=to point away from, . . . to demonstrate: *apo*=from, or intensive; and *deiknumi*=to bring to light, . . . to show, . . . to prove. Or *apo*, and *deiktikos*=able to show.] Demonstrative; capable of being established on demonstrative evidence. (The term was introduced by Aristotle, and has been used in modern times by Kant and others.)

"The argumentation is from a similitude, therefore not *apodictic*, or of evident demonstration."—*Robinson: Eudoca*, p. 23.

"Holding an *apodictical* knowledge and an assured knowledge of it; verily, to persuade their apprehensions otherwise were to make an Euclid believe that there were more than one center in a circle."—*Browne: Vulgar Errors*.

řap-ō-dic'-tic-ăl-lŷ, adv. [Eng. *apodictical*; -ly.] With complete mathematical demonstration; irrefragably.

"Mr. Mede's synchronisms are *apodictically* true to any one that has but a competency of wit and patience to pursue them."—*Dr. H. More: Myst. of Godl.*, p. 175.

ă-pōd'-i-dă, s. pl. [APUS.] A family of Entomostracans of the order Phyllopora. The typical genus is Apus.

řap-ō-dī-ōx'-is, s. [Gr. *apodiōkō*, fut. *apodiōxomai*=to chase away: *apo*=from, away; *diōkō*=to make to run, to pursue.]

Rhet.: A figure in which a particular argument is rejected with indignation.

řap-ō-dix'-is, s. [Latin; from Gr. *apodeixis*=a showing forth, . . . demonstration; *apodeiknumi*=to show forth.] [APODICTIC.] Demonstration; the establishment of a proposition on absolutely irrefragable evidence.

***řap-ōd-on, s.** [APODAN.]

řap-ō-dōg'-ŷn-ōūs, a. [Gr. *a*, priv.; *pous*=a foot; and *gunē*=woman.]

Bot.: A name given by Richard to disks which do not adhere to the base of an ovary.

ăp-ōd'-ō-sīs, s. [Lat. *apodosis*; Gr. *apodosis*=a giving back . . . In *Gram.* (see def.); Gr. *apo*=from, and *dosis*=a giving; from *didōmi*.]

Gram.: The chief clause in a conditional sentence, that intimating the consequence which will ensue if the condition expressed in the subordinate clause which preceded it, called the protasis, be realized. In the sentence, "If ye shall ask anything in my name, I will do it" (John xiv. 14), the *protasis* is, "If ye shall ask anything in my name," and the *apodosis*, "I will do it." Some grammarians extend the terms *protasis* and *apodosis* to antecedent and consequent clauses, even when the sentences to which they belong are not conditional.

" . . . it is observed by Jaspis that the Apostle has put only two members of the comparison, when there should properly have been four, omitting one in the *protasis* and another in the *apodosis*."—*Bloomfield: Greek Test.* (1841); *Comment on Rom.* vi. 4.

řap-ō-dŷ-tēr'-i-ŷm, s. [Lat. *apoditerium*; Gr. *apodutērion*; from *apoduō*=to strip off: *apo*, priv., and *duō*=to get into, to put on.]

1. *Classical antiquity*: A room where one stripped before going into the bath.

2. *Now*: Any room used for the purposes of robing and unrobing.

řap-ō-gēe, řap-ō-gē-ŷm, řap-ō-gă-ŷm, řap-ō-gē-on, řap-ō-gă-on, s. [In Fr. *apogée*; Sp., Port., & Ital. *apogeo*. *Apogeeum* and *apogæum* are properly the neut. of adj. *apogæus*, and *apogeeon* and *apogæon* are Latinized from the Gr. *apogaion*, neut. of adj. *apogaios*, also *apogeios*, and *apogeos*=from land, or the earth (*Astron.*, in apogee: see def.): *apo*=from, and *gaios*=on land; *gaia*=land: from *gē*=land, also the earth.]

1. *Astron.*: The point in the orbit of any planet at which it is the greatest distance from the earth. When a corresponding term was introduced by the ancients, they proceeded on the supposition that the earth was the center of the solar system, and therefore measured from it. The sun, therefore, was at a certain time said to be in apogee. The term is still used, but in general it is more correctly stated, not that the sun is in apogee, but that the earth is in aphelion [APHELION]; in other words, measurement is made from the sun as the center, not from the earth. The moon, again, being the satellite of the earth, is appropriately said to be at a certain time in apogee. The lunar apogee circulates in about nine and a half years.

"It is yet not agreed in what time, precisely, the *apogeeum* absolveth one degree."—*Browne: Vulgar Errors*.

" . . . while on the other hand the sun is most remote (in *apogee*, or the earth in its aphelion)."—*Herschel: Astron.*, § 388a. See also §§ 406 and 687.

2. *Fig.*: As high above one, or as far from a person or thing as it is possible to be.

"Thy sin is in his *apogeeon* placed ;

And when it moveth next must needs descend."

Fairfax.

řap-ō-geū'-sīs, s. [Gr. *apogeusis*; from *apogeuma*=to take a taste of anything: *apo*=from, and *geuō*=to give a taste of. Or *apo*=from, and *geusis*=the sense of taste; from *geuō*.] The same as AGEUSTIA (q. v.). (*Parr.*)

řap-ō-gī-ă-tŷ-ra, řap-ō-gī-ă-tŷ-ra, s. [APOG- GIATURA.]

řap-ō-gōn, s. [Gr. *apōgōn*=beardless: *a*, priv., and *pōgōn*=beard.] A genus of spiny-finned fishes of the Percidae, or Perch family. A Mediterranean species is called *A. rex mullorum*=the king of the mullets. It is red, with a black spot on each side of the tail. It is three inches long. Another species is the *A. fasciatus*, or Banded Mullet, of the Feejee Islands.

řap-ō-grăph, s. [Lat. *apographon*; Gr. *apographōn*=a copy; from *apographō*=to write off, to copy: *apo*=from, and *graphō*=to write.] A transcript; a copy. (*Blount.*)

***řap-ōg'-ra-phăl, a.** [Eng. *apograph*; -al.] Pertaining to an apograph.

"Parallel places—nowhere else extant but in these apocryphal *apographal* pieces, either as citations out of, or allusions to, them."—*Dr. Lee: Dissert. Theol.* (1752), vol. ii., p. 104.

řap-ō-jōve, s. [Gr. *apo*=from, and Eng. *Jove*=Jupiter; from Lat. *Jovis*, genit. of *Jupiter*.]

Astron.: The point in the orbit of any one of Jupiter's satellites at which it is as far from the planet as it can go. A word framed on the model of APOGEE and APHELION (q. v.). It is opposed to PERIJOVE.

ă-pō-lar, a. [Gr. *a*, priv., and Eng. *polar*.] Not polar.

Anat.: Pertaining to nerve-cells which send out no fiber. Kölliker at first maintained their existence, but afterward thought they might be unipolar cells, with the issuing fiber in some way hidden from view.

"Some writers still insist upon the existence of 'apolar' and 'unipolar' nerve-cells in many parts of the nervous system, although the results of observation positively prove the existence of two fibers in the case of cells which had previously been regarded as unipolar and *apolar*."—*Beale: Bioplasm* (1872), § 243.

"See also my paper on the structure of the so-called *Apolar*, *Unipolar*, and *Bipolar* Nerve Cells. *Phil., Trans.*, 1863."—*Ibid.*, § 273.

***řap-ō-lēp-sŷ, řap-ō-lēp'-sīs, s.** [Gr. *apolēpsis*=(1) a taking back, a recovery; (2) an intercepting, a cutting off; from *apolambanō*=fut. *apolēpsomai*=to take or receive from: *apo*=from, and *lambanō*=to take. Or *apo*=from, and *lēpsis*=a taking hold; from *lambanō*.]

Old Med.: An obstruction of the blood; a retention or suppression of urine or any other natural evacuation. (*Parr. & c.*)

"Apolepsy (Gr.). The interception of blood and animal spirits."—*Glossog. Nov.*, 2d ed.

Ă-pōl-lin-ă-r-i-an, s. [Lat. *Apollinaris*=pertaining to Apollo.] Pertaining to or connected with Apollo.

Apollinarian games. Certain games instituted among the Romans in the year 212 B. C., after the Battle of Cannæ, and celebrated by means of scenic representation.

Ă-pōl-lin-ă-r-i-anŷ, Ă-pōl-lin-ă-r-ists, s. pl. [From Apollinaris the Younger, Bishop of Laodicea in the latter part of the fourth century.] The followers of the Apollinaris mentioned, who contended for the divinity of Christ against the Arians, but taught that Christ assumed only a human body endowed with a sentient, but not an intellectual, soul. He believed that the divine nature in Christ supplied the place of a rational human soul. His views seem to have tended in the direction of those afterward held by Eutyches. They were condemned by the Council of Constantinople in A. D. 381.

Ă-pol-lin-a'-ris wa-ter, s. An effervescing table water obtained from a mineral spring in Apollinarisburg, near Bonn, Prussia.

Ă-pōl'-lō, s. [Lat. *Apollo*; Gr. *Apollōn*.]

Classic Myth.: The god of poetry, music, medicine, archery, and augury. He is usually represented as a handsome young man, beardless, and with long hair on his head, which, moreover, is crowned with laurel, and surrounded by rays of light. In his right hand he bears a bow and arrows, and in his left a harp.

"And all *Apollo's* animating fire."

Thomson: The Seasons; Winter.

The Apollo Belvedere:

A celebrated statue of Apollo, so called from having been placed in the Belvedere of the Vatican by Pope Julius II. It was found in the ruins of ancient Antium, now *Capo d'Anzo*, about the end of the fifteenth or the beginning of the sixteenth century, and was sculptured probably about the time of Nero. Byron gives a beautiful description of this famous statue in *Childe Harold*, iv., 141-163.

Ă-pōl-lōn'-i-cōn, s.

[Lat. *Apollo*; Gr. *Apollōn*, the god of music, &c.; Gr. suffix *-ikon* = Eng. *-icon*.] The name given to a very powerful chamber-organ, exhibited in London in 1817, giving the combined effect of a complete orchestra. It was so constructed that it might be self-acting, or might be played upon in the usual manner by means of keys.

Ă-pōl'-lŷ-ōn, s. & a. [Gr. *Apolluōn*, the pr. par. of *apollumi*, or *apolluō*=to destroy utterly.]

A. As substantive: Destroyer. The Greek name applied in Rev. ix. 11 to the "angel of the bottomless pit," called in Hebrew *Abaddon* (q. v.). Bunyan introduces it into the *Pilgrim's Progress* as the name of a fiend.

B. As adjective: Destructive.

"But he [Kant] had no instincts of creation or restoration within his *Apollyon* mind."—*De Quincey's Works* (ed. 1863), vol. ii., p. 58.

Ă-pōl'-lŷ-ōn-ist, s. [Eng., &c., *Apolluon*; -ist.] One who follows or is subject to Apollyon. *Spec.*, the "locusts" of Rev. ix.

"The Locusts or *Apollyonists*."—*Phineas Fletcher: Poems* (ed. Grosart), ii. 63-107.

ă-pōl-ō-gēt'-ic, *ă-pōl-ō-gēt'-ick, ă-pōl-ō-gēt'-ic-ăl, a. [Fr. *apologétique*; Port. & Ital. *apologetico*; Lat. *apologeticus*; Gr. *apologētikos*=fit for a defense.]

†1. Spoken or written in defense of a person, a faith, an opinion, &c., and not intended to imply the smallest admission of error. [APOLOGETICS.]

"With the advance of theology, general Apologetics tends to disappear, and in its stead comes an *apologetic* introduction justifying each of the fundamental doctrines of dogmatics."—*Ency. Brit.*, 7th ed., ii. 189.

2. Acknowledging slight error which, passed over in silence, might give just offense.

" . . . speak in a subdued and *apologetic* tone."—*Macaulay: Hist. Eng.*, ch. xviii.

"I design to publish an essay, the greater part of which is *apologetical*, for one sort of chymists."—*Boyle*.

ă-pōl-ō-gēt'-ic-ăl-lŷ, adv. [Eng. *apologetical*; -ly.] In apologetical language, in an apologetical tone; by way of apology.

" . . . has been *apologetically* explained by the supposition . . ."—*Strauss: Life of Jesus*, vol. ii., § 67, p. 32.

ă-pōl-ō-gēt'-ics, s. [In Ger. *apologetik*.] [APOLOGETIC.] The department of theology which treats of the establishment of the evidences and defense of the doctrines of a faith.

Christian apologetics, generally called simply *Apologetics*, treats of the evidences of Christianity, and seeks to establish the truth of the Bible and the doctrines deduced from it.

The Apollo Belvedere.

bōil, bōŷ; pōut, jōw1; cat, çell, chorus, çhin, bench; go, gem; thin, țhis; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = șan. -tion, -sion = șhŷn; -țion, -șion = zhŷn. -tious, -cious, -sious = șhŷs. -ble, -dle, &c. = bēl, dēl.

ăp-ô-lôg'-ic-al, *a.* [Eng. *apolog(ue)*; *-ical*.] Of the nature of an apologue. (Adams: *Works*, ii. 166.)

a-pôl-ô-gî'se. [APOLOGIZE.]

a-pôl-ô-gîst, *s.* [In Fr. *apologiste*; Sp. & Port. *apologista*.] One who defends a faith, an institution, a practice, a deed, &c. *Spec.*, one who defends Christianity, or the character and proceedings of its professors. (Cowper: *Expostulation*.)

a-pôl-ô-gîze, a-pôl-ô-gî'se, *v. t. & i.* [Gr. *apologizomai*=to reckon up, to give an account.]

*I. Transitive: To defend.

II. Intransitive: To make an acknowledgment of a greater or smaller amount of error (generally the latter) as a moderate atonement for an injury done one. (It is sometimes followed by *for*, and an objective case.)

"To apologize especially for his insolent language to Gardiner."—Froude: *Hist. Eng.*, vol. iii., ch. xvii., p. 70.

¶ Sometimes a person apologizes for a deed requiring far graver treatment.

"... to apologize for a judicial murder?"—Macaulay: *Hist. Eng.*, ch. xiv.

a-pôl-ô-gî-zêr, a-pôl-ô-gî-sêr, *s.* [Eng. *apologize*, *apologise*; *-er*.] One who defends a person, a faith, an institution, &c.: an apologist.

"His apologisers labor to free him: laying the fault of the errors fathered upon him unto the charge of others."—Hammer: *View of Antiquity*, p. 239.

ăp-ôl-ôgue, *s.* [In Ger. *apolog*; Fr. *apologue*; Sp., Port., & Ital. *apologo*; Lat. *apologus*; from Gr. *apologos*=(1) a long story, a tale; (2) a fable, like Æsop's; (3) an account; Gr. *apo*=from, and *logos*=discourse; meaning that an apologue is a discourse drawn from (a fable).] A fable designed to convey to, and impress upon, the mind some moral truth. It resembles a parable, but differs in this respect, that, whereas the event narrated in the parable is within the limits of probability, and might have happened, if indeed it has not actually done so, the apologue is bound by no such restraints; it can draw for its speakers and actors on the brute creation, or even on inanimate nature. The prodigal son (Lake xv. 11-32) and the ewe lamb (2 Sam. xii. 1-14) are properly parables; while the story of the trees electing a king (Judge. ix. 7-20) is an apologue.

"The Senate having decided in favor of a conciliatory course, sent Menenius Agrippa as their envoy to the seceders, who addresses to them the celebrated apologue of the Belly and the Limbs."—Lewis: *Early Rom. Hist.*, ch. xii., pt. i., § 16.

ăp-ôl-ô-guêr, *ăp-ôl-ô-gêr, *s.* [Eng. *apologue*; *-er*.] One who utters apologues.

"A mouse, saith an apologist [apologuer], was brought up in a chest, there fed with fragments of bread and cheese."—Burton: *Anat. of Mel.*, p. 559.

"Why may not a sober apologist [apologuer] be permitted, who brings his burthen to cool the conflagrations of fiery wits?"—Waterhouse: *Apology for Learning*, &c., p. 258.

a-pôl-ô-gÿ, *a-pôl-ô-gie, *s.* [In Fr. *apologie*; Sp., Port., Ital., & Lat. *apologia*; Gr. *apologia*=a defense, a speech in defense; *apo*=from, and *logos*=a word, language, . . . discourse; *legô*= . . . to speak.]

¶ I. The act of making a defense against an accusation; vindication, without its being implied that in this there is anything hollow or unsatisfactory; also the defense made.

¶ Used specially of the defense of Christianity and its professors, against opponents and calumniators, made by several of the early Fathers. Thus, Justin Martyr wrote two "Apologies"—one about A. D. 150, and the other after 160; Athenagoras one in 177, and Tertullian in 198; as did Melito, Quadratus, Miltiades, Aristides, and Tatian in the same century. Many works of a similar character were subsequently published, though not always, or even generally, under the same title. Various modern writers have used the term *Apology* in the old sense: thus, Bishop Richard Watson was author of an "Apology for Christianity," and an "Apology for the Bible." So also the department of theology once generally termed "Evidences of Christianity" is now technically denominated *Apologetics* (q. v.).

"We have, among other works of his [Justin Martyr's], two *Apologies* for the Christians."—Mosheim: *Church Hist.*, Cent. i., pt. ii., ch. ii., § 5.

2. An admission of a fault; generally one of no great magnitude, for which this slight humiliation is held sufficient to atone. Sometimes it is so small that the apology for it approaches a full vindication, and sometimes, as in cases of libel, so grave that, even when the apology is accepted, the whole expenses of the trial-at-law are cast on the person who acknowledges himself to have erred.

¶ Crabb considers that "there is always some imperfection, supposed or real, which gives rise to an apology;" that "a defense presupposes a consciousness of innocence more or less;" that "a justification is founded on the conviction that only

of entire innocence, but of strict propriety;" that "exculpation rests on the conviction of innocence with regard to the fact." "Excuse and plea are not grounded on any idea of innocence; they are rather appeals for favor resting on some collateral circumstance which serves to extenuate: a plea is frequently an idle or unfounded excuse, a frivolous attempt to lessen displeasure." He adds that "Excuse and plea, which are mostly employed in an unfavorable sense, are to *apology*, *defense*, and *exculpation*, as the means to an end; an *apology* is lame when, instead of an honest confession of an unintentional error, an idle attempt is made at *justification*; a *defense* is poor when it does not contain sufficient to invalidate the charge; a *justification* is nugatory when it applies to conduct altogether wrong; an *excuse* or a *plea* is frivolous or idle, which turns upon some falsehood, misrepresentation, or irrelevant point." (Crabb: *Eng. Synonyms*.)

ăp-ô-mê-côm-ê-têr, *s.* [APOMECOMETRY.] An instrument for measuring objects at a distance.

ăp-ô-mê-côm-êt-rÿ, *s.* [Gr. *apo*=from; *mêkos*=length, and *metreô*=to measure; *metron*=a measure.] The measuring or measurement of objects at a distance. (Dyche.)

ăp-ô-môr-phine, *s.* [Gr. *apo*=from, and Eng. *morphine* (q. v.).]

Chem.: C₁₇H₁₇NO₂. An organic base obtained by heating morphine or codeine in a sealed tube to 150°, with excess of HCl. Apomorphine is soluble in alcohol and ether, and is precipitated by caustic potash and ammonia. It gives a dark-violet liquid with F₂Cl₆. It is an emetic, in small doses.

*ap-ôn'e, prep. [UPON.]

ăp-ô-nê-crô-sis, *s.* [Gr. *aponekrôsis*=a becoming quite dead; *aponekrô*=to kill utterly, especially by cold; *apo*=from, and *nekroô*=to kill; *nekros*, *s.*=a dead body, adj.=dead.]

Med.: Complete death.

ăp-ô-neür-ôg'-ra-phÿ, *s.* [Gr. *aponeurôsis*, and *graphê*=a delineation, . . . a description.] [APONEUROSIS.]

Med.: The department of medical science which treats of aponeurosis.

ăp-ô-neür-ô-sis, ăp-ô-neür-ô-sÿ, *s.* [In Fr. & Port. *aponevrose*; Gr. *aponeurôsis*=the end of muscle, where it becomes tendon (Galen); *aponeuroô*=to change into a tendon; *apo*=from, and *neuroô*=to strain the sinews; *neuron*=a sinew, a tendon.] The expansion of a tendon into a membrane, lamina, or fascia. Aponeuroses occur in connection with the voluntary muscles.

"... attached by their extremities, through the medium of tendon, *aponeurosis*, or some form of the fibrous tissue."—Todd & Bowman: *Physiol. Anat.*, vol. i., p. 150.

ăp-ô-neür-ô-t'-ic, *a.* [In Fr. *aponevrotique*; Port. *aponevrotico*.] [APONEUROSIS.] Pertaining to aponeurosis.

"Aponeurotic tendinous expansions."—Todd & Bowman: *Physiol. Anat.*, i. 71.

ăp-ô-neür-ô-t'-ôm-ÿ, *s.* [Gr. (1) *apo*=from; (2) *neurotômos*=cutting sinews; *neurotômeô*=to cut the sinews; *neuron*=a sinew, and *temnô*=to cut.] The dissection of an aponeurosis (q. v.).

ăp-ôn-ô-gê'-tôn, *s.* [In Fr. *aponoget*. An incomplete anagram of the word POTOMAGETON (q. v.).] A plant belonging to the order Naiadaceæ, or Naiads. The species are aquatics, ornamental in an aquarium. In India the tuberous roots of *A. monostachyon*, or simple-spiked Aponogeton, are eaten by the natives like potatoes.

ăp-ô-pêm-p'-tic, *a. & s.* [Gr. *apopemptos*=sent forth, dismissed; *apopempô*=to send off, to dismiss; *apo*=from, and *pempô*=to send.]

A. As adjective:

Classic Poetry: Pertaining to a hymn addressed to a stranger on his departure from a place to his own country, or to the gods when they were fabled to be about to return to their habitation.

B. As substantive: A hymn used on such occasions.

a-pôph'-a-sis, *s.* [In Fr. *apophase*; Gr. *apophasis*=a denial, a negation; *apophêmi*=(1) to speak out plainly; (2) to say no, to deny; *apo*=from, and *phêmi*=to declare.]

Rhet.: A figure by which a speaker formally declines to take notice of a point, with the probable effect of making the imagination of his audience so to work on what he has ostentatiously declined to bring forward, as to cause them to be more affected by it than if he had spoken out plainly.

ăp-ô-phlêg-măt'-ic, *a. & s.* [Gr. *apo*=from, and *phlegma*=(1) flame, (2) inflammation, (3) phlegm; from *phlegô*=to burn.]

A. As adjective: Designed to expel phlegm by the nostrils.

B. As substantive: A medicine designed or fitted to cause the flow of serous or mucous humor from the nostrils. Some stimulatives have this effect.

ăp-ô-phlêg'-ma-tîsm, *s.* [In Ger. *apophlegmatismus*; Gr. *apophlegmatismos*; *apophlegmatizô*=to purge away phlegm; *apo*=from, and *phlegma*=a flame, inflammation, phlegm.] A medicine specially designed to expel phlegm from the blood.

"... and so it is in *apophlegmatism* and gargarisms, that draw the rheum down by the palate."—Bacon: *Nat. Hist.*, Cent. i., § 38.

ăp-ô-phlêg'-ma-tîz-ant, *s.* [Gr. *apophlegmatizô*=to expel phlegm.] An apophlegmatic (q. v.). (Quincy.)

ăp-ô-phthêgm, ăp-ô-thêgm (*ph* and *g* silent), *s.* [In Ger. *apophthegma*; Fr. *apophthegme*; Sp. *apoteigma*; Port. *apophthegma*, *apothegma*; Ital. *apoteigma*; Gr. *apophthegma*, *apothengomai*=to speak one's opinion plainly, to utter an apophthegm; *apo*=from, and *phthengomai*=to utter a sound, to speak out. Or Gr. *apo*=from, and *phthegma*=a voice, from *phthengomai*.] A terse pointed saying; a maxim expressed in few but weighty words; a brief pithy remark uttered by a distinguished character, or on a notable occasion.

"So again in his book, *Apophthegms*, which he collected, we see that he esteemed it more honor to make himself but a pair of tables, to take the wise and pithy words of others, than to have every word of his own to be made an *apophthegm*, or an oracle, as vain princes, by custom of flattery, pretend to do."—Bacon: *Adv. of Learning*, bk. i.

ăp-ô-phthêg-măt'-ic, ăp-ô-thêg-măt'-ic, ăp-ô-phthêg-măt'-ic-al, ăp-ô-thêg-măt'-ic-al (*ph* & *g* silent), *a.* [Gr. *apophthegmatikos*.] Sententious.

ăp-ô-phthêg'-ma-tîst, ăp-ô-thêg'-ma-tîst, *s.* [Gr. *apophthegmatos*, genit. of *apophthegma*, and Eng. suffix *-ist*; from Gr. *istês*=one who.] One who collects or composes apophthegms.

ăp-ô-phthêg'-ma-tî'ze, ăp-ô-thêg'-ma-tî'ze, *v. i.* [Formed like APOPHTHEGMATIST (q. v.), but with Eng. suffix *-ize*=to make, instead of *-ist*.] To utter apophthegms.

ăp-ô-ph'-ÿ-gê, ăp-ô-ph'-ÿ-gÿ, *s.* [In Ital. *apofigi*; Lat. *apophyges*; Gr. *apophugê*=(1) an escape or place of refuge; (2) Arch. (see def.). *apophugô*=to flee from; *apo*=from, and *phugô*=to flee. Or *apo*=from, and *phugê*=flight, escape.]

Arch.: The small curve at the top of a column by which its shaft joins its capital. It is sometimes called the spring of the column. Originally it was the ring which bound the extremities of wooden pillars to keep them from splitting, imitated in stone-work. The same name is given to the corresponding concavity connecting the bottom of a pillar with the fillet at its base.

"Apophyge in architecture is that part of a column where it seems to fly out of its base, like the process of a bone in a man's leg, and begins to shoot upward."—Glossog. Nova, 2d ed.

ăp-ô-ph'-ÿl-lite, *s.* [In Ger. *apophyllit*; Gr. (1) *apo*=from; (2) *phyllon*=a leaf; and (3) suffix *-ite* (Min.) (q. v.).] Apophyllite was so called by Haüy from the tendency to exfoliate. A tetragonal mineral, called also Ichthyophthalmite, classed by Dana as the type of an Apophyllite group of Unisilicates. The hardness is 4.5 to 5; the sp. gr. 2.3 to 2.4; the luster of the face of the crystal terminating the low prism, pearly; that of the sides, vitreous. Color, white or grayish; occasionally with greenish, yellowish, rose-red, or flesh-red tint. It is generally transparent; is brittle, and has feeble double refraction. It is a "hydrated calceopottassic silicate;" its composition being—silica, 51.60 to 52.69; lime, 24.71 to 25.86; potassa, 4.75 to 5.75; water, 15.73 to 16.73; and fluorine, 15.73 to 16.67. It occurs chiefly in amygdaloid, though occasionally in granite and gneiss. It is found at Ratho, near Edinburgh, and in Fife, Dumbarton, and Inverness-shires. It occurs in Europe, in India, in Siberia, in America, in Australia, and elsewhere. Dana subdivides it into Ordinary (1) Oxhaverite; (2) Teselite; (3) Leucocyclite, and places with it also Xylochlore.

a-pôph'-ÿ-sis, ăp-ô-ph'-ÿ-sÿ, *s.* [Gr. *apophysis*=an offshoot; *apophuô*=to put forth as an offshoot, (passive) to grow; *apo*=from, and *phuô*=to bring forth.]

1. Anat.: The process of a bone.

"Processes of bone have usually their own centers of ossification, and are termed epiphyses until they are finally joined to the main part, after which they receive the name of apophyses."—Todd & Bowman: *Physiol. Anat.*, i. 116.

2. Bot.: A sporangium in mosses, which is regularly lengthened. It occurs in most species of the genus *Splachnum*.

3. Arch.: The same as APOPHYGE (q. v.).

fâte, fât, färe, ămidst, whât, fáll, father; wê, wêt, hêre, camêl, hêr, thêre; pîne, pît, sîre, sîr, marîne; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

ăp-ō-plăn-ē-sīs, *s.* [Gr. *apoplanēsis*, see def.; *apoplanāō*=to make to digress. Or *apo*=from, and *planēsis*=a making to wander; *planāō*, fut. *planēsō*=to make to wander; *planē*=a wandering.] *Rhet.*: A digression.

ăp-ō-plēc'-tīc, ***ăp-ō-plēc'-tīck**, *a. & s.* [In Fr. *apoplectique*; Sp., Port., & Ital. *apopletico*; Lat. *apoplecticus*; Gr. *apoplēktikos*.]

A. As adjective: Relating to apoplexy.

"Soon after he had risen from table, an *apoplectic* stroke deprived him of speech and sensation."—*Macaulay: Hist. Eng.*, ch. xvii.

B. As substantive: A person afflicted with apoplexy.

"Rasis, the Arabic physician, hath left it written as I have it from Quistorpius, that it was ordained by a law, that no *apoplectics*, who foamed about the mouth, should be buried till after seventy-two hours."—*Knatchbull: Tr.*, p. 77.

***ăp-ō-plēc'-tīc-al**, *a.* [Eng. *apoplectic*; -*al*.] The same as APOPLECTIC, *adj.* (q. v.).

"In an *apoplectical* case he found extravasated blood making way from the ventricles of the brain."—*Derham*.

ăp-ō-plēxed, *a.* [Old Eng. *apoplex* (APOPLEXY); -*ed*.] Affected with apoplexy.

"... But, sure, that sense
Is *apoplex'd*: for madness would not err."

Shakesp.: Hamlet, iii. 4.

ăp-ō-plēx-ŷ, ***ăp-ō-plēx-ŷe**, ***ăp-ō-plēx**, *s.* [In Fr. *apoplexie*; Sp. *apoplegia*; Ital. *apoplessia*; Ger., Port., & Lat. *apoplexia*; Gr. *apoplēxia*=(1) a being disabled in mind, stupor; (2) the bodily disease described below; from *apoplēktos*, *apoplēssō*=to disable in body or mind. Or *apo*=from, and *plēxis*=a stroke, a blow; *plēssō*=to strike, to smite.]

1. Med.: A serious malady, coming on so suddenly and so violently that anciently any one affected by it was said to be *attonitus* (thunder-struck), or *sideratus* (planet-struck). When a stroke of apoplexy takes place, there is a loss of sensation, voluntary motion, and intellect or thought, while respiration and the action of the heart and general vascular system still continue. The disease now described is properly called *cerebral apoplexy*, the *cerebrum* or brain being the part chiefly affected. Another malady has been called not very happily *Pulmonary Apoplexy*. It is the Pneumo-hemorrhagia of Andral, and consists of an effusion of blood into the parenchymatous substance of the lung, like that into the substance of the brain in cerebral apoplexy.

"P. Humph. This *apoplex* will, certain, be his end."

Shakesp.: 2 Henry IV., iv. 4.

2. Fig.: Anything that dulls the senses and paralyzes action in the frame.

"Peace is a very *apoplexy*, lethargy, muddled, deaf, sleepy, insensible."—*Shakesp.: Coriolanus*, iv. 5.

ăp-ō-pnīx'-is (*p* often silent), *s.* [From Gr. *apopnigō*=to choke. Or *apo*, intens., and *pnixis*=strangling, smothering; *pnigō*=to choke.]

Med.: Suffocation,

ăp-or-ē'-tīn, *s.* [Possibly *apo*=from, and *rhētīnē*=resin gum.] A resin obtained by chemical process from extract of rhubarb.

ă-pō-r-ī-a, **ă-pō-r-ŷ**, *s.* [Lat. *aporia*; Gr. *aporia*=being "without passage," involved in difficulty; *aporos*=without passage, difficult; *a*, priv., and *poros*=means of passing, . . . a pathway.]

1. Rhet.: Perplexity, real or affected, on the part of a speaker as to what to choose from the great abundance of matter lying ready to his hand. Specially perplexity where to begin, where to end, what to say, and what, though well worthy of being stated, to pass by. *Aporia* is used also for the real or affected perplexity felt by a speaker in coming to a decision on points of difficulty in connection with which there are various ways open to choose. The following sentence, quoted from Cicero in Smith's *Rhetorick*, is an excellent example of an *aporia*:—"Thus Cicero says, Whether he took them from his fellows more impudently, gave them to a harlot more lasciviously, removed them from the Roman people more wickedly, or altered them more presumptuously, I cannot well declare." (Smith's *Rhetorick*.)

2. Med.: Restlessness; uneasiness occasioned by obstructed perspiration, or any stoppage of the natural secretions. (*Parr.*)

***ă-pōr-ō-brān'-chī-anŷ**, *s. pl.* [Gr. *a*, priv., *poros*=a pore, and *branchion*=(1) a fin, (2) a gill.] *Zool.*: Latreille's name for an order of Arachnida (Spiders), characterized by the absence of respiratory pores (stigmata) on the body.

ă-pō-r-ōi, **ă-pō-r-īme**, *s.* [APORIA.] A perplexing problem.

¶ The *Glossog. Nova* has the form *aporime*.

ăp-or-rhā'-is, *s.* [Gr. *aporrhais*=a shell; *aporrhēō*=to flow from: *apo*=from, and *rheō*=to flow.] Spour-shells. A genus of gasteropodous mollusks belonging to the family Cerithiadae. In 1875, Tate

estimated the recent species of *Aporrhais* at four, and the fossil ones doubtfully at above two hundred, the latter ranging from the Lias to the Chalk.

***ăp-or-rhē'-a**, *s.* [Gr. *aporrhōia*, *aporrhōē*=(1) a flowing off, a stream; (2) an emanation; *aporrhēō*=to flow from: *apo*=from, and *rheō*=to flow.] An emanation; an effluvium.

"The reason of this he endeavors to make out by atomical *aporrhōas*; which, passing from the cruentate weapon to the wound, and being incorporated with the particles of the salve, carry them to the affected part."—*Glanville: Scopsis*.

***ăp-ō-sēp'-ī-dīn**, *s.* [Gr. *apo*=from, and *sēpedōn*=rotteness, decay; *sēpō*=to make rotten.]

Chem.: A crystallized substance obtained from impure cheese. It is impure leucine (q. v.). (*Watts.*)

ăp-ō-sī-ō-pē'-sīs, ***ăp-ō-sī-ōp'-ē-sŷ**, *s.* [Lat. *aposiopesis*; Gr. *aposiōpēsis*=(1) a becoming silent; (2) see def.; *aposiōpaō*=to be silent after speaking: *apo*=from, and *siōpaō*=to be silent or still. Or *apo*=from, and *siōpēsis*=silence; from *siōpaō*.]

Rhet.: A term used to describe the reticence which a speaker occasionally employs from delicacy of feeling, from forbearance, from the fear of consequences if he give utterance to all that he thinks, from being overcome by emotion, or when he designs, by pretending to pass over something, really to call attention to it more forcibly than if he had treated of it formally. From one of these causes a speaker will occasionally omit part of a sentence, as our Saviour, under the influence of emotion, does in Luke xix. 42.

"... such *aposiopeses* being frequent in language dictated by grief or strong emotion."—*Bloomfield: Greek Test.* Note on Luke xix. 42.

ăp-ō-sīt'-ī-a, **ăp-ōs'-it-ŷ**, *s.* [Gr. *apositia*=distaste for food; *apositos*=having eaten nothing, without appetite: *apo*=from; *sitos*=wheat corn grain, . . . bread.] A loathing of food.

¶ *Apositia* is in Parr, and *aposity* in *Glossog. Nova*, 2d ed.

ăp-ō-sīt'-īc, *a.* [Gr. *apositikos*: *apo*=away from, *sitos*=wheat, . . . food.]

Med.: Taking away or diminishing the appetite for food.

ăp-ō-spāŷ'-ma, **ăp'-ō-spāŷm**, *s.* [Gr. *apospasma*=that which is torn off; *apospaō*=to tear or drag away: *apo*=from, and *spaō*=to draw out, . . . to tear.] The separation of one part from another; a violent irregular fracture of a tendon, a ligament, &c.

¶ Parr has the form *apospasma*, and the *Glossog. Nova*, 2d ed., *apospasm*.

ă-pōs'-ta-čŷ, *s.* [APOSTASY.]

ăp-ō-stās'-ī-a, *s.* [Gr. *apostasis*=a standing away from.] [APOSTASY.]

Botany: A genus of Orchids, the type of the *Apostasiads* (q. v.). The anthers are distinct from each other, and the style is quite free from the stamina, whereas in ordinary orchids these are combined. There are two species found in the East Indies.

ăp-ō-stās'-ī-ā'-čē-æ (*Bot. Latin*), **ăp-ō-stās'-ī-ădŷ**, *s. pl.* [APOSTASIA.]

Botany: An order of Endogenous plants belonging to the Orchidalliance. They differ from Orchidaceæ proper in having a three-celled fruit, with loculicidal dehiscence, and in the style being altogether free from the stamina for the greater part of its length. They occur in damp woods in the hotter parts of India. In 1847, Lindley estimated the known species at five.

ă-pōs'-ta-sīs, *s.* [Gr. *apostasis*=a standing away from.]

***Old Medicine**:

1. A suppurative inflammation, throwing off the peccant humors left by fever or other diseases.

2. Transition from one disease to another.

ă-pōs'-ta-sŷ, **ă-pōs'-ta-čŷ**, ***ă-pōs'-ta-sīe**, *s.* [In Ger. & Fr. *apostasie*; Sp., Port., Ital., & Lat. *apostasia*; Gr. *apostasia*, a later form for *apostasis*=a standing away from—hence, defection, revolt; *aphistēmi*=to put away (in passive, to stand away): *apo*=from, and *histēmi*=to make to stand. Or *apo*=from, and *stasis*=a placing, setting; from *histēmi*.]

A. Ord. Lang.: A defection from real or imagined allegiance. *Specially*—

1. Direct rebellion against God or His authority.

"The affable archangel had forewarn'd
Adam, by dire example, to beware
Apostasy, by what befell in heaven
To those apostates."—*Milton: P. L.*, bk. vii.

2. The abandonment of a religious faith which one has previously held, or a church with which one has been previously connected.

"The canon law defines *apostasy* to be a willful departure from that state of faith which any person has professed himself to hold in the Christian church."—*Ayliffe: Parergon*.

3. The abandonment of a political party with which one has hitherto acted.

B. Technically:

***Med.**: It is sometimes used as the rendering of the Greek term *apostasis* (q. v.).

ă-pōs'-tāte, ***ăp-ō-sta'-ta**, *s. & a.* [In Ger. & Fr. *apostat*; Sp., Port., Ital., & Lat. *apostata*. Gr. *apostatēs*=(1) a runaway slave, a deserter, a rebel; (2) see below; *apostateō*=to stand aloof.] [APOSTATIZE.]

A. As substantive:

1. A rebel against the Divine authority; one who has cast off the allegiance which he owes to God.

"High in the midst, exalted as a god,
The *apostate* in his sun-bright chariot sat."

Milton: P. L., bk. vi.

2. One who abandons the religion which he has previously professed, or the church with which he has before been connected. In the Church of Rome one is also deemed an apostate who, without a legal dispensation, quits a religious order which he has entered.

"And whoso passed that point
Was *apostata* in the order."

Piers Plowman, 667-8. (*Trench.*)

"The character of *Apostate* has injured the reputation of Julian."—*Gibbon: Decl. and Fall*, ch. xxiii.

3. One who similarly abandons his political creed or party.

"If a name be found where it ought not to be, the *apostate* is certain to be reminded in sharp language of the promises which he has broken and of the professions which he has belied."—*Macaulay: Hist. Eng.*, ch. xv.

B. As adjective: Rebel; rebellious. One who has cast off the allegiance which he owes to God, or has abandoned a faith formerly held, or a church, or a political party to which he previously adhered.

"So spake the *apostate* angel . . ."—*Milton: P. L.*, bk. i.

***ă-pōs'-tāte**, *v. i.* [From the substantive. In Sp. & Port. *apostatar*; Ital. *apostatare*.] To apostatize.

"Perhaps some of these *apostating* stars have, though themselves true, let their miscarriage make me heedful."—*Bp. Hall: Occus. Medit.* (*Richardson.*)

ăp-ōs-tāt'-īc-al, *a.* [Lat. *apostaticus*; Gr. *apostatikos*.] Pertaining or relating to an apostate.

"To wear turbants is an *apostatical* conformity."—*Sandys*.

ă-pōs-ta-tī'ze, **ă-pōs-ta-tī'se**, *v. i.* [Eng. *apostate*; -*ize*. In Fr. *apostasier*; Sp. & Port. *apostatar*; Lat. *apostato* (Cyprian); Gr. *apostateō*=to stand aloof from, . . . to fall off from: *apo*=from, and *histēmi*=to make to stand. Or *apo*=from, and *statizō*, poet. for *histēmi*.]

1. To rebel against God. [APOSTATE, *s. & a.*]

2. To abandon a faith which one has previously held, or desert a church with which one has been formerly connected.

"Another had not indeed yet *apostatized*, but was nearly related to an apostate."—*Macaulay: Hist. Eng.*, ch. ix.

3. Similarly to abandon a political faith which one has held, or desert a political party with which one has acted.

ă-pōs-ta-tī'-zīng, **ă-pōs-ta-tī'-ŷīng**, *pr. par.* [APOSTATIZE.]

Logic (*lit.*=from that which is after): An argument which reasons backward from effects to causes, from observed facts to the law of nature which explains them, or in some similar way. If one infer, from marks of design in nature, that there must be a Designer, the argument is one *à posteriori*. It is opposed to the *à priori* argument, which more ambitiously attempts to reason out new facts from previously ascertained laws of nature, or from abstract conceptions. Though this latter process will sometimes brilliantly anticipate discovery, yet it is liable to lead one astray; and the immense advance made during the last two centuries by physical science has arisen mainly from its resolute adherence to the *à posteriori* method of reasoning. A. Ordinary Language:

1. **Lit.**: The official designation of twelve or (Paul included) of thirteen men, appointed by Jesus as His messengers, deputies, envoys, or ambassadors to the world. The Greek word *apostolos* occurs in a more general sense in various passages of the New Testament: as in John xiii. 16, where it is rendered, "he that is sent;" and in Philipp. ii. 25, and 2 Cor. viii. 23, where it is translated "messenger." In an ambiguous passage in Rom. (xvi. 7) the English word *apostle* may possibly be used in the same sense: "Salute Andronicus and Junius my kinsmen, and my fellow-prisoners, who are of note among the apostles." Probably, however, the meaning is not "which apostles are of note," but "who are highly regarded among or by the apostles." Of the thirteen, twelve were designed specially for the Jews, and the remaining one, the most distinguished and successful of the whole, for the Gentiles. The twelve seem to have had but little culture in their early life; but Paul had the highest education which the age could afford. Among the special qualifications of an apostle, one was that he must have been an eye and ear witness of the miracles and teaching of Christ from the commencement to the close of His ministry (John xv. 27; Acts i. 21, 22); or, at the very least, must have seen Him once with the bodily eyes (1 Cor. ix. 1; xv. 8, 9). Another was, that he must have been divinely called to the high office he was to fill (Matt. x. 1-42; Mark i. 16-20; ii. 14; iii. 14; Luke v. 27; vi. 13; Acts i. 24-26; 1 Cor. i. 1; Gal. i. 1, &c.). The power of working miracles, though not confined to the apostles, also went far toward proving apostleship (see 2 Cor. xii. 12, &c.). The special work of the apostles was to be "ambassadors for Christ" (2 Cor. v. 20), and to teach [Gr. *mathēteusate*=make disciples of] all nations, baptizing them in [Gr. *eis*=into] the name of the Father, the Son, and the Holy Ghost. With this commission a promise was given them of the presence and guidance of their Divine Master through all succeeding time (Matt. xxviii. 19, 20).

"The apostel Poule unto the Romayns writeth . . ."—Chaucer: *The Tale of Melibeus*.

"And when it was day, he called unto him his disciples; and of them he chose twelve, whom also he named apostles."—Luke vi. 13.

2. **Fig.**: By preeminence, Jesus Christ, as sent forth on a divine mission by His Heavenly Father.

" . . . consider the Apostle and High Priest of our profession, Christ Jesus."—Heb. iii. 1.

3. A missionary who has labored with zeal and success, like that of the old apostles, to convert a kingdom to Christ.

"On account of his vast labors in propagating Christianity among the Germans, Boniface has gained the title of the Apostle of Germany."—Mosheim: *Ch. Hist.*, Cent. VIII., pt. i., ch. i., § 4.

¶ Similarly John Elliot has been called the "Apostle of the Indians;" Judson, "the Apostle of Burmah;" Father Mathew, "the Apostle of Temperance," &c.

4. **Sarcastically**: A preacher or pastor unfit for his office.

"From such apostles, O ye mitered heads,
Preserve the Church! and lay not careless hands
On skulls that cannot teach and will not learn."
Cowper: *Task*, bk. ii.

B. Technically:

1. **Church History**:

(a) [APOSTOLI.]

(b) In the "Catholic Apostolic," or Irvingite Church: The highest of the four ecclesiastical grades, the others being Prophets, Evangelists, and Pastors. The "Apostles" ordain by the imposition of hands, interpret mysteries, and exercise discipline. [CATHOLIC.]

2. **Law**: The rendering sometimes given of the Latin word *Apostolæ*=letters of dismission given to an appellant. They state his case, and declare that the record will be transmitted. (The term is used chiefly in Civil and Admiralty law.)

Apostles' Creed. The well-known creed beginning, "I believe in God, the Father Almighty," and ending with the words "the life everlasting. Amen." For many centuries it was attributed to the Apostles, but historical criticism has shown that it arose some time after their age, and probably not all at one period. It is found in its present form in the works of Ambrose, Bishop of Milan, from 374 to 397. [CREED.]

apostles' coats. Coats worn by performers at the miracle plays of the Middle Ages. (*Lee: Gloss.*)

Apostles' Islands. A group of twelve islands at the Pacific end of the Straits of Magellan.

apostle spoons. Spoons of gilded silver, the handle of each ending in the figure of an Apostle.

Apostle Spoons.

They were the usual present of sponsors at baptisms. (*Nares.*)

"And all this for the hope of two apostle spoons, to suffer! and a cup to eat a caudle in! for that will be thy legacy."—B. Jonson: *Bartholomew Fair*, i. 3.

(See also *Shakesp.*: *Henry VIII.*, v. 2.)

apostleship (**a-pōs'-el-shīp**), *s.* [Eng. *apostle*; suffix *-ship*. In Dut. *apostelshap*.] The office or dignity of an apostle.

"That he may take part of this ministry and apostleship, from which Judas by transgression fell, . . ."—Acts: i. 25.

a-pōs'-tōl-ate, *s.* [In Fr. *apostatat*; Sp. & Port. *apostolado*; Ital. *apostolato*; Lat. *apostolatus*=the office of an apostle.]

1. The office or dignity of an apostle.

"Himself [St. Paul] and his brethren in the apostolate."—Killingbeck: *Serm.*, p. 118.

2. The office or dignity of the Pope, or, more rarely, of an ordinary bishop.

A-pōs'-tōl-i, *s. pl.* [Lat.=Eng. *apostles*.]

Church Hist.: An ascetic sect founded by Gerhard Sagarelli, of Parma, who was afterward burnt in that city in the year 1300. They were opposed to the possession of property, and to marriage, but were attended by spiritual sisters. (*Mosheim: Ch. Hist.*, Cent. xiii., pt. ii., ch. v., § 14.) [APOSTOLICI.]

āp-ōs-tōl'-ic, *āp-ōs-tōl'-ick, *āp-ōs-tōl'-ique, a. & s. [In Fr. *apostolique*; Sp., Port., & Ital. *apostolico*; Lat. *apostolicus*; Gr. *apostolikos*.]

A. As adjective:

1. Pertaining or relating to the apostles; derived directly from the apostles; agreeable to the doctrine or practice of the apostles.

"He follow'd Paul: his zeal a kindred flame,
His apostolic charity the same."—Cowper: *Hope*.

2. Pertaining or relating to the Papacy. [See APOSTOLICAL.]

Catholic Apostolic Church: The Irvingite church. [CATHOLIC.]

His Apostolic Majesty: A title first conferred by Pope Sylvester II. on Duke Stephen of Hungary. It was acquired by the ruling sovereign of Austria when Hungary became subject to him, and is still used by the Austrian emperor.

B. As substantive:

Plural. **Church Hist.** [APOSTOLICI.]

Apostolic Canons. Eighty-five ecclesiastical laws, the compilation of which was fraudulently attributed to Clement of Rome. They were brought together subsequently to his time, but give valuable information regarding the discipline of the Greek and other Oriental churches in the second and third centuries. (*Mosheim: Ch. Hist.*, Cent. i., pt. ii., ch. ii., § 19.)

Apostolic Churches. Churches first established by the apostles, especially those of Rome, Alexandria, Antioch, and Jerusalem. Afterward the term obtained a less precise meaning.

Apostolic Clerks. A religious association founded by John Columbinus, a nobleman of Siena, and abolished by Clement IX. in 1668. (*Mosheim: Ch. Hist.*, Cent. xiv., pt. ii., ch. ii., § 35.)

Apostolic Constitutions. Certain voluminous directions regarding ecclesiastical discipline and worship; also fraudulently attributed to Clement, but which did not obtain their final form till about the fourth century. (*Mosheim: Ch. Hist.*, Cent. i., pt. ii., ch. ii., § 19.)

apostolic delegate, *s.* The permanent representative of the pope in a foreign country. The title is frequently confounded with that of *ablegate*, which is properly applicable only to the pope's temporary representative for some special function.

Apostolic Fathers. Those Christian fathers or writers who lived so early that they had opportunities of holding intercourse either with the apostles or their immediate disciples. They were Clement of Rome (Clemens Romanus), Ignatius, Polycarp, Barnabas, and Hermas. (*Mosheim: Ch. Hist.*, Cent. i., pt. ii., ch. ii., §§ 20, 21.)

Apostolic party. A fanatical Roman Catholic party which figured in the history of Spain from 1819 till 1830, when it became merged in the Carlists.

apostolic sees. Sees said to have been founded by the apostles; specially Antioch, Ephesus, and Rome. (*Lee: Gloss.*)

apostolic succession. The claim made by most episcopally-ordained clergymen and bishops that they constitute links in an unbroken chain of similarly ordained persons, the first of whom were set apart to their sacred functions by the apostles themselves. Those who hold that view most tenaciously generally combine with it the opinion that only clergymen who are in the line of this spiritual succession are entitled to the pastoral office in the Christian Church, all others simply usurping the functions of the ministry.

āp-ōs-tōl'-ic-al, *a.* [Eng. *apostolic*; *-al*.] The same as APOSTOLIC, *adj.* (q. v.).

"They acknowledge not that the Church keeps any thing as *apostolical* which is not found in the apostles' writings, in what other records soever it be found."—Hooker.

"The Pope had been requested to give his *apostolical* sanction to an arrangement so important to the peace of Europe."—Macaulay: *Hist. Eng.*, ch. xxiii.

āp-ōs-tōl'-ic-al-ly, *adv.* [Eng. *apostolical*; *-ly*.] After the manner of the apostles.

†āp-ōs-tōl'-ic-al-nēss, *s.* [Eng. *apostolical*; *-ness*.] Apostolicity (q. v.). (*Johnson.*)

Āp-ōs-tōl'-ī-cī, Āp-ōs-tōl'-ics, *s. pl.* [Lat. *Apostolici* (pl.); Eng. *Apostolics* (pl.).]

Church Hist.: More than one ascetic sect which arose in France in the twelfth century. Their tenets were almost the same as those afterward held by Sigarelli. [APOSTOLI.] St. Bernard contended against them strenuously. (*Mosheim: Ch. Hist.*, Cent. xii., pt. ii., ch. v., § 15.)

†āp-ōs-tōl'-ī-cīm, *s.* [Eng. *apostolic*; *-ism*.] Apostolicity (q. v.). (*J. Morison.*) (*Reid.*)

āp-ōs-tōl'-ic-ī-tỹ, *s.* [Eng. *apostolic*; *-ity*.] The quality of being apostolic. (*Faber.*)

a-pōs'-trō-phē, *a-pōs'-trō-phỹ, *a-pōs'-trō-phūs, *s.* [In Sw. *apostrof*; Dan. *apostroph*; Sp. *apostrofe*; Port. *apostrophe* (Rhet.), *apostrofo* (Gram.); Ital. *apostrofe* (Rhet.), *apostrofo* (Gram.); Fr. & Lat. *apostrophe*; Gr. *apostrophē*=(1) a turning away; (2) *Rhet.*, an apostrophe; *apostrophos*=as *adj.*, turned away from; as *subst.*, an apostrophe (*in gram.*); *apostrophō*=to turn back; *apo*=from, and *strophō*=to twist, to turn. Or the rhetorical apostrophe may be from *apo* and *strophē*=a turning; *strophō*=to turn.]

A. In the forms apostrophe and *apostrophy:

Rhetoric: A figure of speech by which, according to Quintilian, a speaker turns from the rest of his audience to one person, and addresses him singly. Now, however, the signification is wider, and is made to include cases in which an impassioned orator addresses the absent, the dead, or even things inanimate, as if they were present and able to hear and understand his words. When Jesus, in the midst of an address to his apostles in general, suddenly turned to Peter and said, "Simon, Simon, behold, Satan hath desired to have you, that he may sift you as wheat" (Luke xxii. 24-37), the apostrophe was in the Quintilian sense. The following are examples of the same figure in the wider meaning:—

(a) Living, but absent.

(b) Dead.

"My mother, when I learn'd that thou wast dead,
Say, wast thou conscious of the tears I shed?"

Cowper: *On Receipt of my Mother's Picture*.

(c) Inanimate.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trỹ, Sýrian. æ, œ = ē; ey = ā. qu = kw.

B. In the forms apostrophe and *apostrophus:

1. *Gram.*: The substitution of a mark like this (') for one or more letters omitted from a word, as *tho'* for *though*, *'Twas* for *It was*, *king's* for *kinges*. (See No. 2.)

2. The mark indicating such substitution, especially in the case of the possessive. The old possessive singular was *es*, and the apostrophe stands for the omitted *e*. Thus Chaucer has the "Knights," "Monkes," and the "Clerkes" Tales, for what now would be written the "Knight's," "Monk's," and "Clerk's" Tales. The old spelling is preserved in the word Wednesday=Woden's day=Woden's day. The name *apostrophe* is given also to the mark in the possessive plural, as *brethren's*, *assassins'*.

"Many laudable attempts have been made by abbreviating words with *apostrophes*, and by lopping polysyllables, leaving one or two words at most."—*Swift*.

¶ Two apostrophes (") are usually employed to mark the ending of a quotation, the commencement of the quotation being indicated by inverted commas ("); thus—

The Mosaic narrative commences with a declaration that "In the beginning God created the heaven and the earth."—*Buckland: Geol.*, vol. i., p. 20.

More rarely only one is used, thus—

The note of interrogation must not be used after *indirect* questions; as, 'he asked me who called.'—*Bain: Eng. Gram.* (ed. 1874), p. 203.

When there is a quotation within a quotation, one apostrophe is generally employed, thus—

"I say that the Word of God containeth whatsoever things may fall into any part of man's life. For, as Solomon saith in the second chapter of the Proverbs, 'My son, if thou receive my words,' &c., 'then thou shalt understand justice and judgment, and equity, and every good way.'"—*T. C.*, quoted in Note to *Hooker's Eccles. Pol.* (ed. 1841), p. 232.

ăp-ôs-trôph'-ic, a. [Eng. *apostrophe*; -ic.]

1. Pertaining to the rhetorical figure denominated an apostrophe.

2. Pertaining to an apostrophe. (Used in grammar and in poetry in lieu of a letter or letters omitted.) (*Murray*.)

a-pôs-trô-phî'ze, v. t. & i. [Eng. *apostroph(e)*; -ize. In Fr. *apostropher*; Port. *apostrophar*; Ital. *apostrofare*.]

A. Transitive:

1. To address one or more persons after the manner of a rhetorical apostrophe; to turn from an audience in general to a single person in it; or, to address the absent, the dead, or things inanimate as if able to listen to one's impassioned words.

"There is a peculiarity in Homer's manner of *apostrophizing* Eumæus, and speaking of him in the second person; it is generally applied only to men of account."—*Pope*.

2. To contract a word by omitting a letter or letters, or to mark such an omission by inserting an apostrophe.

B. Intransitive: To use the rhetorical figure called *apostrophe*.

"... the learned world *apostrophizing* at my untimely decease, ..."—*Goldsmith: The Bee*, No. iv.

¶ For its derivatives also see the spelling commencing APOPTH.

ăp'-ô-thêm, s. [Gr. *apotithêmi*=to put away; *apo*=from, away; *tithêmi*=to put or place.] The name given by Berzelius to the insoluble brown deposit which forms in vegetable extracts exposed to the air. It is a mixture of various substances, and not a proper chemical compound. (*Watts*.)

a-pôth-ê-ô'-sis, s. [In Ger. *apothéose*; Fr. *apothéose*; Sp. *apoteosis*; Port. *apoteosis*, *apothéose*; Ital. *apoteosi*; Lat. *apoteosis*; Gr. *apothêsis*, from *apothêô*=to deify; *apo*=away, and *thêô*=to deify; *thêos*=God.] The deification of a human being; the elevating to the rank of the "gods" of a person who was remarkable for virtue, for heroism, or even for audacious vice. Temples were then built to the new divinity, priests appointed, sacrifices offered, and probably festivals instituted. The Romans called apotheosis consecration, and were accustomed in this way to honor their deceased emperors. It still exists in India and other pagan countries. The French Revolution was regarded by many of the ardent spirits of that time as the apotheosis of Liberty.

"... according to which, that which the Grecians call *apoteosis*, and the Latins *relatio inter divos*, was the supreme honor which man could attribute unto man."—*Bacon: Adv. of Learn.*, bk. i.

a-pôth-ê-ô'-sî'ze, v. t. [Eng. *apothéos(is)*; -ize.] To grant one an apotheosis; to deify one, to elevate one to the rank of the "gods." (*Bacon*.)

If the former spelling is the correct one, then Spelman considers that it may be from Lat. *ab appendendo*, from being (something) which should be appended to (meaning to younger sons, for their support). If the spelling should be *appanagium*, then probably it is from Lat. *appanare*=to furnish with bread; *ad panem*=for bread, that is, for sustenance. This is the preferable etymology.]

I. Literally:

1. Properly, lands assigned as portions to the younger sons, or sometimes the brothers of the French king, who in general took their titles from the appanages which they held. Under the first two dynasties of French kings, the sons of the monarch divided his dominions among them. Afterward the kingdom was assigned to the eldest, and appanages to the others. Then the dominant power of the latter princes was so circumscribed that their appanages could not be willed away to any one, or descend to females, but, on the failure of male issue, were made to revert to the crown; and finally, on the 22d of November, 1790, the power hitherto possessed by the crown of granting appanages was taken away, and provision made for the younger sons of the royal family by grants from public funds. During the earlier period of the existence of French appanages, they were divided into *royal* and *customary*; the former being those granted to the king's brothers, and not allowed to be possessed by, or descend to, females; and the latter granted to the king's sisters, and consequently under no such restriction.

A. As adjective:

I. *Ordinary Language*:

1. That may be seen, visible, in sight, in view, or coming in sight, appearing. (Opposed to secret, hidden, or concealed.)

"Large foliage, overshadow'ng golden flowers,
Blown on the summit of th' *apparent* fruit."

Cowper: Task, bk. iii.

2. Plain, obvious, indubitable. (Opposed to doubtful.)

"The main principles of reason are in themselves *apparent*."—*Hooker*.

3. Open, evident, known. (Opposed to suspected.)

"As well the fear of harm, as harm *apparent*,
In my opinion ought to be prevented."

Shakesp.: Richard III., ii. 2.

4. Seeming. (Opposed to real or true.) As seems to the senses in contradistinction to what reason indicates.

"... to live on terms of civility and even of *apparent* friendship."—*Macaulay: Hist. Eng.*, ch. xv.

¶ This is the most common use of the word, especially in scientific works.

"... the real diameters must be to each other in the proportion of the *apparent* ones."—*Herschel: Astronomy*, 5th ed., § 463.

II. *Technically*:

1. *Optics, Astron., &c.* [For the *Apparent Altitude, Diameter, Magnitude, Figure, Motion, Place, and Distance* of an earthly or heavenly body see

2. *Horology, Astron., &c.* [For *Apparent Time*, see TIME.]

3. *Law*: With rights or prospects not likely to be set aside by any contingency but death. Opposed to presumptive. This is the use of the word in the phrase *heir apparent*, the import of which is, that the person so designated will be entitled to succeed to the estate, if he survive its present possessor. An heir presumptive, on the contrary, though at present the nearest in succession, may have his hope defeated by the birth of a nearer heir. (See *Blackstone's Commentaries*, bk. ii., ch. 14.)

B. As substantive: *Apparent* is used elliptically for *heir apparent*.

"Prince. My gracious father, by your kingly leave,
I'll draw it as *apparent* to the crown."

Shakesp.: 3 Henry VI., ii. 2.

ap-pär-ent-ly, adv. [Eng. *apparent*; -ly.]

*1. Plainly, clearly. (Opposed to doubtfully.)

"With him will I speak mouth to mouth, even *apparently*, and not in dark speeches."—*Numb.* xii. 8.

2. Seemingly.

"They found the Emperor himself *apparently* frank."—*Froude: Hist. Eng.*, vol. iv., p. 375.

ap-pär-ent-ness, s. [Eng. *apparent*; -ness.] The state of being apparent; the quality of being perceivable.

ap-par-i'-tion, s. [In Fr. *apparition*; Sp. *aparicion*; Port. *aparicao*; Ital. *apparizione*. From Lat. *apparitio*= (1) service, attendance; (2) domestic, from *appareo*=to become visible, to appear.] [APPEAR.]

I. *Ordinary Language*:

1. The state of becoming visible; visibility, appearance.

"It was also observed that he was troubled with *apparitions* of hobgoblins and evil spirits; ..."—*Bunyan: Pilgrim's Progress*, pt. i.

2. A person who, or a thing which, suddenly, and perhaps unexpectedly, becomes visible; an appearance.

"Fitz-James looked round—yet scarce believed
The witness that his sight received;
Such *apparition* well might seem
Delusion of a dreadful dream."

Scott: Lady of the Lake, v. 11.

"A thousand blushing *apparitions* start
Into her face; a thousand innocent shames
In angel whiteness bear away those blushes."

Shakesp.: Much Ado about Nothing, iv. i.

3. *Spec.*: A so-called ghost, specter, or hobgoblin; also a spirit of any kind from the unseen world.

"That, if again this *apparition* come,
He may approve our eyes, and speak to it."

Shakesp.: Hamlet, i. 1.

II. *Technically*:

Astron.: A term applied to the appearance in the heavens of a comet, or to the visible ascent above the horizon of a star previously beneath it; or in the shining forth of one which, though up, was before left unlightened from being occulted or eclipsed by another heavenly body. In the latter case it is opposed to *Occultation* (q. v.).

"The intervals of these successive *apparitions* being 75 and 76 years, Halley was encouraged to predict its [the comet's] reappearance about the year 1759."—*Herschel: Astronomy*, 5th ed., § 567.

"A month of *apparition* is the space wherein the moon appeareth; deducting three days wherein it commonly disappeareth, and this containeth but twenty-six days and twelve hours."—*Browne: Vulgar Errors*.

Circle of apparition: That part of the heavens in any given latitude within which the stars are always visible. It is opposed to the *Circle of occultation*.

"All celestial objects within the circle of perpetual *apparition* come twice on the meridian, above the horizon, in every diurnal revolution, 'once above and once below the pole.'"—*Herschel: Astronomy*, 10th ed., § 125.

ap-par-i'-tion-al, a. Pertaining to or resembling an apparition.

ap-pär'-i-tör, s. [In Fr. *appariteur*; Ital. *apparitore*; Lat. *apparitor*=a public servant, such as a lictor, a writer, or a priest; from *appareo*=to appear.]

1. A petty officer in a civil or criminal court who assists in carrying out the decisions of the judges. In ecclesiastical courts, one who carries summonses.

"They swallowed all the Roman hierarchy, from the pope to the *apparitor*."—*Ayliffe: Parergon*.

2. In other institutions: The beadle or similar functionary.

I. Literally:

Law & Ordinary Language:

1. An application for the transfer of a cause or suit from an inferior to a superior court or judge. It differs from a *writ of error* in two respects: (1) That an appeal may be brought on any interlocu-

tory matter, but a writ of error only on a definite judgment; (2) that on writs of error the superior court pronounces the judgment, while on appeals it gives directions to the court below to rectify its decree. (*Blackstone's Comment.*, bk. iii., ch. 4.)

2. The right of carrying a particular case from an inferior to a superior judicatory.

"But of those rights the trustees were to be judges, and judges without appeal."—*Macaulay: Hist. Eng.*, ch. xxv.

*3. Formerly: Private prosecutions for heinous offenses, *e. g.*, the murder of a near relative, larceny, rape, arson, mayhem, &c., from which one's self has suffered, or for treason against the state. If the prosecutor failed to establish the accusation, he was punished. In some cases the person who appealed was an accomplice in the act which he denounced. (*Blackstone's Comment.*, bk. iv., ch. 23.)

"Hast thou according to thy oath and band
Brought hither Henry Hereford, thy bold son,
Here to make good the boist'rous late *appeal*
Against the Duke of Norfolk?"

Shakesp.: *Richard II.*, i. 1.

"... the most absurd and odious proceeding known to our old law, the *appeal* of murder."—*Macaulay: Hist. Eng.*, ch. xxv.

4. A summons to answer to a charge.

"Nor shall the sacred character of king
Be urg'd to shield me from thy bold *appeal*;
If I have injur'd thee, that makes us equal."

Dryden.

II. Figuratively:

1. The referring of a controverted statement or argument to one in whose judgment confidence is placed, or to the verdict of public opinion, or to God.

"From the injustice of our brother men—
To him *appeal* was made as to a judge;
Who, with an understanding heart, allay'd
The perturbation; listen'd to the plea:
Resolved the dubious point, and sentence gave."

Wordsworth: *Excursion*, bk. ii.

"The casting up of the eyes and lifting up of the hands is a kind of *appeal* to the Deity, the author of wonders."—*Bacon*.

2. Recourse, resort.

"... not to denounce all preparations for battle and all *appeals* to arms."—*Times*, Nov. 24, 1876.

ap-pê'al-a-ble, *a.* [Eng. *appeal*; -able.]

Law:

1. Of cases: Which may be appealed; which is of such a character that permission will be given to the person against whom the verdict has gone in the inferior court to appeal to a superior one.

"To clip the power of the council of state, composed of the natives of the land, by making it *appealable* to the council of Spain."—*Howell: Letters*, I. ii. 15.

2. Of persons: Who may be called on by appeal to answer to a charge.

A. As *pr. par.*: (See the verb.)

B. As *adj. (Spec.)*: Imploring; mutely soliciting. (*Scott: Rokeby*, v. 8.)

ap-pê'al-îng-ness, *s.* [Eng. *appealing*; -ness.] Beseechingness. (*G. Eliot: Daniel Deronda*, ch. xxxv.)

ap-pê'ar, ap-pê're, a-pê're, a-piê're, *v. i.* [In Fr. *apparaitre*, *apparoir*; Sp. *aparacer*; Port. *apparecer*; Ital. *apparire*; Lat. *apparere*, from *ad*, and *pareo*=to come forth, to appear.]

I. Literally:

1. To become visible to the eye, to come in sight.

"... Let the waters under the heaven be gathered together unto one place, and let the dry land *appear*."—*Gen.* i. 9.

2. To be visible to the eye, to be in sight.

"... so that things which are seen were not made of things which do *appear*."—*Heb.* xi. 3.

II. More or less figuratively:

1. (In a sense analogous to that of coming in sight.)

(a) To be manifested to; as God, Christ, an angel, or a heavenly portent may be to man.

"Tho nicht efter that *aperede* an ongel of heuen in here slepe ine metinge, and hem seide and het."—*Old Kentish Sermons* (ed. Morris), p. 27.

"In that night did God *appear* unto Solomon."—*2 Chron.* ii. 7. (See also *Mark* xvi. 9; *Exod.* iii. 2; *Matt.* ii. 7; and *Rev.* xii. 1.)

(b) To arise as an object of distinction among mankind.

"Ages elapsed ere Homer's lamp *appeared*,
And ages ere the Mantuan swan was heard."

Cowper: *Table Talk*, 556.

(c) Formally to present one's self before a person, or at a place, as at a sacred spot for worship, or before a judge in a court of law, whether as the accused person, as the prosecutor, or as an advocate.

"When all Israel is come to *appear* before the Lord thy God in the place which He shall choose . . ."—*Deut.* xxxi. 11.

"... we must all *appear* before the judgment-seat of Christ . . ."—*2 Cor.* v. 10.

"... to *appear* in the presence of God for us."—*Heb.* ix. 24.

"One ruffian escaped because no prosecutor dared to *appear*."—*Macaulay: Hist. Eng.*, ch. xii.

(d) To become visible to the eye of reason; to be fully established by observation or reasoning.

"... from the way in which they at first acquitted themselves, it plainly *appeared* that he had judged wisely in not leading them out to battle."—*Macaulay: Hist. Eng.*, ch. xiv.

2. (Analogous to the sense of being visible.) To present the semblance of, to resemble:

(a) Its being implied that, notwithstanding this, the reality is absent.

"Even so ye also outwardly *appear* righteous unto men, but within ye are full of hypocrisy and iniquity."—*Matt.* xxiii. 28.

(b) Without its being implied that the resemblance is unreal.

"... the signature of another plainly *appeared* to have been traced by a hand shaking with emotion."—*Macaulay: Hist. Eng.*, ch. xiv.

¶ *Appear* is sometimes used impersonally: *e. g.*; "it appears to him," "it appeared that . . ." (See *ex.* under II. 1, d.)

*ap-pê'ar, *s.* [From the verb.] Appearance.

"Here will I wash it in this morning's dew,
Which she on every little grass doth strew,
In silver drop, against the sun's *appear*."

Fletcher: *Faithful Shepherdess*.

ap-pê'ar-ance, *ap-pê'r-auce, *a-pê'r-ans, *s.* [Fr. *appareance*; Sp. *apariencia*; Ital. *appareanza*, from Lat. *apparentia*.]

A. Ordinary Language:

I. The state of coming in sight.

1. *Literally:*

(a) In an ordinary way.

"... choice cider from the orchards round the Malvern Hills made its *appearance* in company with the Champagne and the Burgundy."—*Macaulay: Hist. Eng.*, ch. xxiii.

(b) Supernaturally, as a spirit may do to the bodily eye.

"I think a person terrified with the imagination of specters more reasonable than one who thinks the *appearance* of spirits fabulous."—*Addison*.

2. *Figuratively:*

(a) Entry into the world, into society, or a particular company or place. Or entry in a particular character.

"Do the same justice to one another which will be done us hereafter by those who shall make their *appearance* in the world, when this generation is no more."—*Addison*.

*(b) Visibility to the mind's eye; probability, likelihood.

"There is that which hath no *appearance*, that this priest being utterly unacquainted with the true person, according to whose pattern he should shape his counterfeit, should think it possible for him to instruct his player."—*Bacon*.

II. That which becomes visible.

1. A vision.

"Bot so befell hyme that nyght to meit
An *aperans*, the wich one to his spreit."
Lancelot of the Lake (ed. Skeat), bk. i., 363-4.

2. The aspect presented when a person or thing becomes visible; mien.

"His external *appearance* is almost as well known to us as to his own captains and counsellors."—*Macaulay: Hist. Eng.*, ch. vii.

"She knew not he was dead. She seem'd the same
In person and *appearance*."

Wordsworth: *Excursion*, bk. i.

"As the *appearance* of the bow that is in the cloud in the day of rain, . . ."—*Ezek.* i. 28.

3. A phenomenon; the latter word, and not *appearance*, being that now commonly used by men of science.

"The advancing day of experimental knowledge discloseth such *appearances* as will not lie even in any model extant."—*Glanville: Sceptis*.

4. Semblance, as opposed to reality; or outward show, as opposed to internal hollowness.

"... to answer them which glory in *appearances*, and not in heart."—*2 Cor.* v. 12.

"Under a fair and beautiful *appearance* there should ever be the real substance of good."—*Rogers*.

5. Semblance, without its being implied that there is unreality.

"... there stood before me as the *appearance* of a man."—*Dan.* viii. 15.

bôil, bôy; pout, jowl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şün;

-tion, -şion = zhün. -tious, -cious, -sious = şüş. -ble, -dle, &c. = bəl, dəl.

6. *Plural*: Circumstances collectively fitted to produce a bad, or to produce a good, impression.

"Appearances were all so strong,
The world must think him in the wrong."
Swift.

To save appearances, or to keep up appearances, is to make things look externally all right, when in reality they are to a greater or less extent wrong.

B. Technically:

Law: Formal presentation of one's self in a court in answer to a summons received, to answer any charges which may have been brought against one. A person who does so is said to *put in* or to *make an appearance*. (See *Blackstone's Comment.*, bk. iii., ch. 19.)

"I will not tarry, no, nor evermore
Upon this business my appearance make
In any of their courts."
Shakesp.: *Henry VIII.*, iii. 4.

Perspective: The representation or projection of a figure, a body, or any similar object upon the perspective plane.

ap-pē-ar-ēr, *s.* [Eng. *appear*; -*er*.] One who or that which appears.

"That owls and ravens are ominous *appearers*, and presignify unlucky events, was an augural conception."
—*Browne*.

ap-pē-ar-īng, *pr. par. & a.* [APPEAR.]

As present participle & adj.: In senses corresponding to those of the verb.

"We see the *appearing* buds . . ."
Shakesp.: *2 Henry IV.*, i. 3.

ap-pē-ar-īng, *s.* [APPEAR.] The state of becoming visible; appearance.

" . . . until the *appearing* of our Lord Jesus Christ."
—*1 Tim.* vi. 14.

ap-pē-aš-a-ble, *a.* [Eng. *appease*; -*able*.] Not implacable; capable of being appeased.

ap-pē-aš-a-ble-nēss, *s.* [Eng. *appeasable*; -*ness*.] The quality of being appeasable. The opposite of implacableness.

ap-pē-aše, *v. t.* [Fr. *apaiser*; O. Fr. *apaissier*, *apaissier*; Prov. *apasiar*; from Lat. *ad*=to, and *paco*=to appease, quiet.] [PEACE.] Properly, to make peace where agitation before existed; as—
*1. To quiet or calm the agitated deep.

"By his counsel he *appeaseth* the deep, and planteth islands therein."
—*Eccles.* xliii. 23.

2. To dispel anger or hatred, and tranquilize the heart previously perturbed by one or both of these passions; to cause one to cease complaining.

" . . . I will *appease* him with the present that goeth before me."
—*Gen.* xxxii. 20.

"Now then your *plaint appease*."
Spenser: *F. Q.*, I. iii. 29.

¶ Formerly it was sometimes used reflexively.

"And Tullius saith: Ther is no thing so commendable in a gret lord, as whan he is debonaire and meeke, and *appesith* him lightly."
—*Chaucer: Melibeus*.

3. To tranquilize the conscience and make it cease from troubling.

" . . . and peace
Of conscience, which the law by ceremonies
Cannot *appease* . . ."
—*Milton: P. L.*, bk. xii.

4. To satiate a clamorous appetite, and by satiety make its cravings cease.

"The stock of salted hides was considerable, and by gnawing them the garrison *appeased* the rage of hunger."
—*Macaulay: Hist. Eng.*, ch. xii.

ap-pē-ašed, *pa. par. & a.* [APPEASE.]

ap-pē-aše-mēnt, *s.* [Eng. *appease*; -*ment*.]

1. The act of pacifying.
2. The state of being pacified.
3. An article or guarantee of peace.

"Being neither in numbers nor in courage great, partly by authority, partly by entreaty, they were reduced to some good *appeasements*."
—*Hayward*.

ap-pē-aš-ēr, *s.* [Eng. *appease*; -*er*.] One who appeases; one who pacifies; a peace-maker.

ap-pē-aš-īng, *pr. par. & a.* [APPEASE.]

ap-pē-aš-īve, *a.* [Eng. *appease*; suffix -*ive*.] Having the tendency to appease; quieting.

***ap-pē-le**, *v. t.* [APPEAL, *v. t.*]

ap-pēl-lan-čy, *s.* [Lat. *appellans*=appealing.]

1. Appeal. (*Todd*.)
2. Capability of appeal. (*Todd*.)

ap-pēl-lant, ***ap-pē-al-ant**, *a. & s.* [In Dan. & Dut. *appellant*; Fr. *appellant*; Sp. *apalante*; Ital. *appellante*. From Lat. *appellans*, *pr. par.* of *appello*=to call upon.]

A. As adjective: Appealing.

"The party *appellant* [shall] first personally promise and avow, that he will faithfully keep and observe all the rites and ceremonies of the Church of England," &c.—*Const. and Canons Eccl.*, 98.

B. As substantive:

I. Ordinary Language:

1. One who calls out or challenges another to single combat.

"These shifts refuted, answer thy *appellant*,
Though by his blindness maim'd for high attempts,
Who now defies thee thrice to single fight."
Milton: *Samson Agonistes*.

†2. One who stands forth as a public accuser of another before a court of law.

"Come I *appellant* to this princely presence.
Now, Thomas Mowbray, do I turn to thee."
Thou art a traitor and a miscreant."
Shakesp.: *Richard II.*, i. 1.

3. One who appeals from an inferior to a superior court or judge. In this sense it is opposed to *appellee* or *respondent*.

"An appeal transfers the cognizance of the cause to the superior judge; so that, pending the appeal, nothing can be attempted in prejudice of the *appellant*."
—*Ayliffe: Parergon*.

II. Technically:

Church History: A term applied in the eighteenth century to the Jansenists and others who appealed to a general council against the bull "Unigenitus" launched by Pope Clement XI. against the translation into French of the New Testament, with notes, by Paschasius Quesnel. (*Mosheim: Church Hist.*, Cent. xviii., §§ 10, 11.)

ap-pēl-late, *a. & s.* [Lat. *appellatus*, *pa. par.* of *appello*=to call upon.] [APPEAL.]

A. As adjective:

1. To which there lies an appeal.

" . . . by assenting or dissenting to laws and exercising an *appellate* jurisdiction."
—*Blackstone: Comment.*, Introd., § 4.

*2. Against whom an appeal is taken.

" . . . and the name of the party *appellate*, or person against whom the appeal is lodged."
—*Ayliffe: Parergon*.

3. In any other way pertaining to an appeal.

B. As substantive: The person appealed against.

ap-pēl-lâte, *v. t.* [APPELLATE, *a. & s.*] To name, to call. (*Southey: The Doctor*, ch. cxxxvi.)

ap-pēl-lā-tion, *s.* [In Ger. & Fr. *appellation*; Sp. *apelacion*; Port. *apellação*; Ital. *appellazione*, *appellagione*=an appeal. From Lat. *appellatio*=(1) an accosting, (2) an appeal, (3) a naming; from *appello*=to call.]

1. The act of appealing; an appeal.

"Father of gods and men by equal right,
To meet the God of Nature I *appeale*."
* * * * *

And bade Dan Phœbus scribe her *Appellation* seal."
Spenser: *F. Q.*, VII. vi. 35.

2. A name, a designation, that by which any person or thing is called.

"Several eminent men took new *appellations* by which they must henceforth be designated."
—*Macaulay: Hist. Eng.*, ch. xi.

ap-pēl-la-tīve, *a. & s.* [In Dan. & Ger. *appellativum*, *s.*; Fr. *appellatif*, *a. & s.*; Sp. *apelativo*, *a. & s.*; Port. & Ital. *appellativo*. From Lat. *appellativus*.]

A. As adjective: Common as opposed to proper. (Used especially in grammar.) (See the substantive.)

"Nor is it likely that he [St. Paul] would give the common *appellative* name of Books to the divinely inspired Writings, without any other note of distinction."
—*Bp. Bull: Works*, ii. 401.

B. As substantive:

1. *Gen.*: An appellation, a name, a designation.

" . . . that the kingdom of Christ may not only be in us in name and form, and honorable *appellatives*, but in effect and power."
—*Jeremy Taylor: Exposition of the Lord's Prayer: Works* (1839), vol. iii., p. 74.

2. *Grammar*: A common, as opposed to a proper name. Thus *bird*, *plant*, *rock*, *star*, are appellatives; but *Chicago*, *Shakespeare*, and the plant *Venus* are not so.

"Words and names are either common or proper. Common names are such as stand for universal ideas, or a whole rank of beings, whether general or special, these are called *appellatives*; so fish, bird, man, city, river, are common names: and so are trout, eel, lobster, for they all agree to many individuals, and some to many species."
—*Watts: Logic*.

ap-pēl-la-tīve-lŷ, *adv.* [Eng. *appellative*; -*ly*.] As appellatives do or are; after the manner of appellatives: as, "he is a perfect Goliath," meaning, he is a man of gigantic stature.

" . . . the fallacy lieth in the Homonymy of Ware, here not taken from the town so named, but *appellatively* for all vendible commodities."
—*Fuller: Worthies; Hertfordshire*. (*Richardson*.)

ap-pēl-la-tīve-nēss, *s.* [Eng. *appellative*; -*ness*.] The quality of being appellative.

" . . . reduce the proper names in the genealogies following to such an *appellativeness* as should compose a continued sense."
—*Fuller: Worthies; Suffolk*. (*Richardson*.)

ap-pēl-la-tōr-ŷ, *a.* [Lat. *appellatorius*=relating to an appellant or an appeal.] Containing an appeal, in any of the senses of that word.

"An *appellatory* libel ought to contain the name of the party appellant."
—*Ayliffe: Parergon*.

ap-pēl-lē'e, *s.* [Lat. *appello*= . . . to appeal.]

Law:

1. The defendant in a case appealed from a lower to a higher court.

2. *Eng. Law*: The defendant against an accusation brought by a private person. [APPEAL, *s.*, No. 3.]

"In this case he is called an approver or prover probator, and the party appealed or accused is called the *appellee*."
—*Blackstone: Comment.*, bk. iv., ch. 25.

ap-pēl-lor, **ap-pēl-lor'**, *s.* [Lat. *appellator*.]

1. *Eng. Law*: One who accuses another person, called the *appellee*, of a crime, and prosecutes him before a criminal court.

"If the *appellee* be acquitted, the *appellor* (by virtue of the statute of Westm. 2, 13 Edw. I., c. 12) shall suffer one year's imprisonment, . . ."
—*Blackstone: Comment.*, bk. iv., ch. 23.

†2. One who carries a case from an inferior to a superior court. Not used in this sense now; the word appellant being used instead.

¶ When *appellor* and *appellee* are used together they are generally both accented on the last syllable.

ap-pēn-āge, *s.* [APPANAGE.]

ap-pēnd, *v. t.* [Fr. *appendre*; Ital. *appendere*; Lat. *appendo*=to weigh to; *ad*=to, and *pendo*=to suspend as weights, to weigh.]

1. To hang to or upon.
2. To add one thing as an accessory to another.

" . . . and *appended* to them a declaration attested by his sign-manual, and certifying that the originals were in his brother's own hand."
—*Macaulay: Hist. Eng.*, ch. vi.

ap-pēnd-āge (*āge*=īg), *s.* [Eng. *append*; -*age*. In Fr. *apanage*.] [APPEND.]

1. *Ordinary Language*: Something added or appended to another, but not properly constituting a portion of it. [APPANAGE.]

" . . . and such his course of life,
Who now, with no *appendage* but a staff, . . ."
Wordsworth: *Excursion*, bk. i.

"The tail is, however, by no means an invariable *appendage* of comets."
—*Herschel: Astron.*, 5th ed., § 557.

"They began to consider the crown of France as a mere *appendage* to the crown of England."
—*Macaulay: Hist. Eng.*, ch. i.

2. *Bot. (pl.)*: Certain superficial processes appended to the stems, leaves, calyces, &c., of plants; as hairs, prickles, thorns, glands, tubercles, dilations or expansions of parts, utricles, pitchers, &c. [APPENDICULATE.]

ap-pēn-dançe, **ap-pēn-dēnçe**, ***ap-pēn-dēn-čy**, *s.* [Fr. *appendance*.] Anything appended or annexed.

"When we see and hear of high titles, rich coats, ancient houses, long pedigrees, glittering suits, large revenues, we honor these (and so we must do) as the just monuments, signs, and *appendances* of civil greatness."
—*Bp. Hall: Rem.*, p. 29.

"Battell with his *appendances*."
—*Withals: Dictionarie* (1608). (*Halliwel: Cont. to Lexic.*)

"Abraham bought the whole field, and by right of *appendancy* had the cave with it."
—*Spelman*.

ap-pēn-dant, *a. & s.* [Fr. *appendant*, *pa. par.* of *appendre*.] [APPEND.]

A. As adjective:

Ordinary Language:

1. *Lit.*: Hanging to or upon.

2. *Fig.*: Annexed to, dependent upon, concomitant to, pertaining to, though not intimately.

" . . . the lateut irregularity, which is certainly *appendant* to ordinary litigations."
—*Jeremy Taylor: Works* (ed. 1839), vol. iii., p. 60.

B. As substantive: Anything attached to another one, as an accidental or accessory, not an essential, part of it.

"Pliny gives an account of the inventors of the forms and *appendants* of shipping."
—*Hale: Origin of Mankind*.

ap-pēn-dēd, *pa. par. & a.* [APPEND.]

***ap-pēn-dēn-čy**, *s.* [APPENDANCE.]

***ap-pēn-dī-cāte**, *v. t.* [Lat. *appendix* (acc. *appendicem*), and Eng. suff. -*ate*.] [APPENDICLE.] To append, to add to.

"In a palace there is the case or fabric of the structure, and there are certain additaments, as various furniture, and curious motions of divers things *appendicated* to it."
—*Hale*.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

řap-pěn-dĩ-cā-tion, s. [Eng. *appendicate*; -ion.] An appendage, an adjunct; something annexed.

"There are considerable parts and integrals, and pendications unto the *mundus spectabilis*, impossible to be eternal."—Hale.

ap-pěn'-dĩ-čěš, s. pl. The Latin plural of APPENDIX (q. v.).

ap-pěn-dĩ-čĩ-tĩs, s. [Eng. *appendix*; *itis*.] *Path.*: Inflammation of the vermiform appendix of the cœcum. It usually, if not always, is due to insufficient circulation of blood in the appendix, which causes inflammation and consequent gangrene in the tissue of the part. [APPENDIX, B. I. 1.] There is a popular notion that appendicitis is caused by a grape seed or some other foreign substance lodging in the vermiform appendix, but in the thousands of operations which have taken place there is not one authenticated case of a foreign substance, such as a seed, being found in the appendix. The great liability of the part to disease is due entirely to its low order of vital resistance, and the fact that it is situated in one of the most vital parts of the body renders it very difficult of treatment. Its normal position is in the peritoneal cavity, to the right of the center of the abdomen. But in rare instances it has been found on the left side, and, still more rarely, otherwise displaced. This discovery, made very recently, has made extreme care necessary in locating the trouble before using the knife. The surgeons now regard the operation for its removal as one of the most simple, but to obtain the best results it should take place a few hours after the patient begins to suffer from the disease. In fact, the sooner the operation is performed the better are the chances of recovery, while if neglected death is sure to follow promptly, or after lingering miseries from the deadly poison permeating the system and coming to the surface in abscesses. Until a comparatively recent period the frequent and fatal part played by the vermiform appendix, and especially in septic peritonitis, had not been understood by the medical profession. That was the reason that septic peritonitis was generally succeeded by the death of the sufferer soon after the symptoms were well established. When it was once proved that the poison which produced septic peritonitis came from the breaking down or decay of the appendix, the very root of one of man's worst physical foes was laid bare. Further practice established beyond a doubt that in a large majority of cases the appendix could be removed by a simple surgical operation and the patient restored to vigorous health if the disease was discovered in time and correctly diagnosed.

ap-pěn'-dĩ-cle, s. [Lat. *appendicula*, dimin. from *appendix*.] A small appendage.

ap-pěn-dĩc'-u-lar, a. [Lat. *appendicula*; Eng. suff. -ar.] Constituting or otherwise pertaining to a small appendage.

"The endo-skeleton is divided into an axial portion, belonging to the head and trunk, and an appendicular portion, belonging to the limbs."—*Flower: Osteol. of Mammalia* (1870), p. 9.

Appendiculate.

- A. 1. Scutellaria galericulata (Skullcap).
2. Calyx. B. 1. Salsola Kali (Saltwort).
2. Segment of the Calyx.

ap-pěn-dĩc'-u-lâte, a. [Bot. Lat. *appendiculatus*; from Class. Lat. *appendicula*=a small appendage, dimin. of *appendix* (q. v.).]

Botany: A term applied to a leaf, leaf-stalk, calyx, or a portion of a plant, when this is furnished with an appendage or appendages. Examples: the expansions or dilatations in the calyces of Scutellaria and Salsola. (Lindley: *Introd. to Bot.*)

ap-pěn'-dĩng, pr. par. [APPEND.]

ap-pěn'-dĩx (plural formerly **ap-pěn'-dĩ-čěš**, now generally **ap-pěn'-dĩx-ěš**), s. [In Dan. *ap-pendix*; Fr., Port., & Ital. *appendice*; Sp. *apendix*. From Lat. *appendix*, pl. *appendices*=(1) that which hangs to anything; (2) anything annexed, an appendage.]

A. Ordinary Language:

1. Anything appended or added to another one more important than itself.

"he cherubim were never intended as an object of worship, because they were only the *appendices* to another

thing. But a thing is then proposed as an object of worship, when it is set up by itself, and not by way of addition or ornament to another thing."—*Stillington*.

2. An adjunct or concomitant.

3. (Now almost exclusively.) A longer or shorter supplement appended to a book.

B. Technically. As a Latin word, with the Latin plural appendices.

I. Anatomy:

1. (Sing.) *Appendix cœci vermiformis*: A worm-like looking process about three inches long, rather more than the thickness of a goose-quill, which hangs down into the pelvis from the inner and posterior part of the cœcum. (Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 216.)

2. (Plur.) *Appendices epiploicæ* (that is, resembling the epiploon or great omentum): Small processes containing fat which are attached to the colon. (Ibid., p. 218.)

3. (Plur.) *A. pyloricæ* (Pyloric follicles): Tubular prolongations from the interstices of fishes. (Ibid., p. 218.)

II. Botany:

1. (Sing.) Anything attached to another part, especially the back, when dilated and compressed, of one of the horn-like processes attached to the corona in some plants. It is also called *ala* (wing). (Lindley: *Introd. to Botany*.)

2. (Plur.) A name given by Fuchs to the shoots thrown up from the subterranean part of the stem of some endogenous plants, such as the pine-apple. He called them also *ADNATA* and *ADNASCENTIA*. (Lindley: *Introd. to Bot.*)

ap-pě-nse, a. [Lat. *appensus*, pa. par. of *appendo*=to weigh to.]

Bot.: Hung up, like a hat upon a pin; but very different in meaning from *pendulous*.

***ap-pě-se**, v. t. [APPEASE.]

***ap-pěr-čě'ive**, ***ap-par-čě'yve**, ***a-pěr-čě'ive**, ***a-par-čě-iũy**, ***a-pěr-cě-yũe**, v. t. [Fr. *apercevoir*.] To perceive, to comprehend.

ăp-pěr-čěp'-tion, s. [Lat. *ad*=to, and Eng. *perception*.] Perception which makes itself its object; self-consciousness, consciousness.

***ap-pěr'-ĩl**, s. [Old form of Eng. *PERIL* (q. v.).] Peril; danger.

"Let me stay at thine *apperil*, Timon."

Shakesp.: *Timon of Athens*, i. 2.

ăp-pěr-tă'in, ***ăp-pěr-tě'yne**, ***ăp-ěr-tě'yne**, ***ap-pěr-tě'in**, v. i. [In Fr. *appartenir*; Ital. *appartenere*; Lat. *appertinco*=to belong to: *ad*=to, and *pertineo*=to hold through, to extend through or to; *per*=through, and *teneo*=to hold.] To belong to by nature, by natural right, or by divine or human appointment, or as a partisan by his own choice belongs to his chief.

"Sire," quod he, 'as to us sirurgiens *appertieneth*, that we do to every wight the beste that we can.'"—Chaucer: *The Tale of Melibeus*.

ăp-pěr-tă'in-ĩng, ***ăp-pěr-tě'yn-ỹng**, pr. par., a. & s. [APPERTAIN.]

A. As present participle & adjective: In the same sense as the verb.

"Rom. Tybalt, the reason that I have to love thee
Doth much accuse the *appertaining* rage
To such a greeting."

Shakesp.: *Romeo and Juliet*, iii. 1.

B. As substantive: That which belongs to; that which pertains to.

***ăp-pěr-tă'in-měnt**, s. [Eng. *appertain*; -ment.] That which belongs to one on account of his rank, dignity, or in any other way.

ăp'-pět-enčę, **ăp'-pět-en-čỹ**, s. [In Fr. *appétence*; Sp. *apetencia*; Port. *apetencia*; Ital. *appetenzza*; Lat. *appetentia*, from *appetens*, pr. par. of *appeto*=(1) to approach, (2) to seek after: *ad*=to, and *peto*=(1) to go to, (2) to seek for.]

1. Of man or other sentient beings: Instinctive desire or impulse to perform certain actions. *Spec.*, lustful or other appetite or desire.

"Of lustful *appetence*, to sing, to dance,

To dress, and troll the tongue, and roll the eye."

Milton: *P. L.*, bk. xi.

2. Of things not sentient: The tendency bodies show to make certain approaches to each other, as in the case of chemical attraction.

řap'-pět-ent, a. [In Ital. *appetente*, from Lat. *appetens*, pr. par. of *appeto*.] Desirous of gratifying appetite; lustful, or eagerly desirous of anything.

"Knowing the earl to be thirsty and *appetent* after glory and renown."—Sir G. Buck: *Hist. of K. Richard III.*, p. 60.

ăp-pět-ĩ-bĩl'-ĩ-tỹ, s. [Eng. *appetible*; -ity.] The quality of being fitted to call forth appetite or desire.

"That elicitation which the schools intend, is a deducing of the power of the will into act, merely from the *appetibility* of the object; as a man draws a child after him with the sight of a green bough."—Bramhall against Hobbes.

ăp-pět-ĩ-ble, a. [In Sp. *apetecible*; Ital. *appetibile*; Lat. *appetibilis*, from *appeto*.] [APPETITE.] Fitted to excite some one of the appetites; fitted to call forth desire; desirable.

"Power both to slight the most *appetible* objects, and to control the most unruly passions."—Bramhall against Hobbes.

ăp-pě-tĩte, ***ăp-pě-tĩt**, s. [In Sw. *aptit*; Dan. & Ger. *appetit*; Fr. *appétit*; Sp. *apetito*; Port. *appetite*; Ital. *appetito*; Lat. *appetitus*=(1) an attack, (2) a passionate desire for anything; from *appeto*.] [APPETENCE.]

A. Subjectively:

I. Lit. Of sentient beings:

1. *Ord. Lang. & Mental Phil.*: One or those desires which arise chiefly from the body, and which man shares with the inferior animals. These are the desire for meat and drink, and the sexual impulse. (In this sense often in the plural.)

"Fal. Oh, she did so course o'er my exteriors with such a greedy intention, that the *appetite* of her eye did seem to scorch me up like a burning-glass!"—Shakesp.: *Merry Wives of Windsor*, i. 3.

"Supple and flexible as Indian cane,
To take the bend his *appetites* ordain."

Cowper: *Hope*.

¶ Hooker thus distinguishes between Appetite and Will: "... the Will, properly and strictly taken, ... differeth greatly from that inferior natural desire which we call *Appetite*. The object of *Appetite* is whatsoever sensible good may be wished for; the object of *Will* is that good which Reason doth lead us to seek. Affections, as joy, and grief, and fear, and anger, with such like, being, as it were, the sundry fashions and forms of *Appetite*, can neither rise at the conceit of a thing indifferent, nor yet choose but rise at the sight of some things. Wherefore it is not altogether in our power, whether we will be stirred with affections or no: whereas actions which issue from the disposition of the Will are in the power thereof to be performed or stayed. Finally, *Appetite* is the Will's solicitor, and the Will is *Appetite*'s controller; what we covet according to the one, by the other we often reject; neither is any other desire termed properly Will, but that where Reason and Understanding, or the show of Reason, prescribeth the thing desired." (Hooker: *Eccles. Pol.*, bk. i., ch. vii., §3.)

2. *Spec.*: The desire for food, which in excess leads to gluttony.

"Schal ben his sause maad to his delyt
To make him have a newe *appettit*."

Chaucer: *C. T.*, 13,960-61.

"When thou sittest to eat with a ruler, consider diligently what is before thee, and put a knife to thy throat, if thou be a man given to *appetite*."—Prov. xxiii. 1, 2.

"... their *appetite* became keen ..."—Macaulay: *Hist. Eng.*, ch. xvi.

3. Vehement desire for anything.

"They contained much that was well fitted to gratify the vulgar *appetite* for the marvelous."—Macaulay: *Hist. Eng.*, ch. ix.

II. *Fig. Of things*: A tendency to go together; as by gravity, cohesion, or chemical affinity.

"It is certain that in all bodies there is an *appetite* of union and evitation of solution of continuity."—Bacon: *Nat. Hist.*, Cent. iii., § 293.

B. Objectively: The object of vehement desire.

"Ha! Melusine, my hertes *Appetite*,

Fair lady, my hert, my loue, my plesance."

The Romans of Partenay (ed. Skeat), 2,896-97.

A. Ordinary Language:

I. Literally:

1. A well-known fruit; also the tree on which it grows. The fruit is that of the *Pyrus malus*, or Crab-apple, when modified and improved by long cultivation or grafting. [APPLE-TREE.] The apple was known to the classical nations of antiquity, the Greeks calling it *mēlon*, Doric *malon*, and the Latins *malon*. These words, however, with the analogous Latin one, *pomum*, were properly generic terms, comprehending several kinds of fruit. The varieties

of the apple amount to thousands rather than hundreds, and they may be multiplied almost indefinitely by artificially applying the pollen of one to the stigma of another.

"Ac quane here apples ripe ben."

Story of Genesis and Exodus (ed. Skeat), 1, 129.

"If the matter depended alone upon me,
His apples might hang till they dropp'd from the tree,"
Cowper: *Pity Poor Africans*.

2. Scripture: Probably the fruit of the Citron-tree (*Citrus medica*). [APPLE-TREE.]

" . . . comfort me with apples . . ."—Song of Solomon ii. 5.

*3. Apple of love: What is now called the LOVE APPLE (q. v.). It is the common tomato (*Lycopersicon esculentum*).

"Apples of love are of three sorts, . . ."—Mortimer: *Husbandry*.

4. Apple of Sodom: A plant growing near the Dead Sea, thus described by Josephus:

" . . . and the traces [or shadows] of the five cities are still to be seen, as well as the ashes growing in their fruits, which fruits have a color as if they were fit to be eaten; but if you pluck them with your hands they dissolve into smoke and ashes."—Whiston: *Josephus' Wars of the Jews*, bk. iv., ch. viii., § 4.

Apple of Sodom (*Solanum Sodomeum*).

1. Branch in flower (one-fourth natural size). 2. Ripe fruit.

Some suppose the description to refer to the *Solanum Sodomeum*, a plant of the Nightshade genus, and others to the *Calotropis procera*, one of the Asclepiads.

II. Figuratively:

1. Apple of the eye: The pupil of the eye, called apple probably from its rotundity.

"Keep my commandments, and live; and my law as the apple of thine eye."—Prov. vii. 2.

2. Apple of discord: Anything, not necessarily an apple, or even a fruit, which, introduced into a nation, church, family, or other society, produces dissension among its members. The expression is founded on the classical myth that Eris, the goddess of strife, on one occasion flung into a meeting of the gods and goddesses a golden apple inscribed with the words, "For the fairest." It produced great jealousy among the female deities, of whom three—Juno, Minerva, and Venus—contended for it, the last-named being the successful competitor.

B. Technically:

1. Bot. Apple or Pome: The English name given by Lindley to the kind of fruit called Pomum (q. v.).

2. Her. Apple of Grenada: The Pomegranate (*Punica granatum*). (*Gloss. of Her.*)

" . . . when he appointed the foundations of the earth . . ."—Prov. viii. 29.

3. To nominate by competent authority to an office; or to do temporary service. (Followed by two objectives—one of the person nominated, and the other of the office.)

" . . . to appoint me ruler over the people of the Lord . . ."—2 Sam. vi. 21.

4. To allot, to assign, or adjudge to one a portion, wages, or an office or dignity. (Followed—

(a) By an objective of the thing given, and to or unto before the person receiving it:

"And I appoint unto you a kingdom, as my Father hath appointed unto me."—Luke xxii. 29.

(b) By two objectives; there being an ellipsis of the to or unto.)

" . . . and appoint him his portion with the hypocrites."—Matt. xxiv. 51.

" . . . Appoint me thy wages, and I will give it."—Gen. xxx. 28.

5. To command, to enjoin.

" . . . and ordain elders in every city, as I had appointed thee."—Titus i. 5.

6. To equip, to supply, to furnish with all things necessary to efficiency.

"The English, being well appointed, did so entertain them, that their ships departed terribly torn."—Hayward.

II. The state of being appointed.

III. That to which one is appointed, or which is appointed to one. (Gen. & Spec.)

Specially:

1. A situation, an office.

2. Equipment, dress, furniture, arms, armament.

"They have put forth the haven: further on, Where their appointment we may best discover, And look on their endeavor."—Shakesp.: Antony & Cleopatra, iv. 10.

¶ Sometimes it is used in the plural.

"A fish was taken in Polonia: such an one as represented the whole appearance and appointments of a bishop."—Gregory: Posth. (1650), p. 123.

*3. (Plur.) Certain allowances paid to one in virtue of his holding a particular office; perquisites.

"Tyrconnel began to rule his native country with the power and appointments of lord lieutenant, but with the humbler title of lord deputy."—Macaulay: Hist. Eng., ch. vi.

B. Technically (Law):

1. A device for a charitable use. (Blackstone: Comment., bk. ii., ch. 23.)

2. An instrument or deed deriving validity from a previous deed, and operating as a conveyance by limiting or altering previous uses.

Power of appointment: The technical name given to the earlier of the two deeds just mentioned—that which gives force to the other.

*ap-pōrt, v. i. [Fr. apporter.] To bring, to conduce, to import.

*ap-pōr-tēr, s. [Fr. apporter=to bring, to convey; Ital. apportare; Lat. apporto=to bring or carry to: ad=to, and porto=to carry (spec., something heavy).] One who imports or carries anything from one place to another, or from one country to another.

¶ Now IMPORTER (q. v.).

"This makes only the apporters themselves, their aiders, abettors and assistants, traitors; not those who receive it at second hand."—Hale: Hist. Pl. Cr., ch. 20.

ap-pōr-tion, v. t. [Lat. ad=to, and portio=a portion.] [PORTION, PART.]

Ord. Lang. & Law: To mete out in just proportions; to share among several persons or several things in suitable proportion.

"Christ proportions several degrees of punishment in the other world, which he apportions to the degrees of death which had ever been among the Jews."—Jeremy Taylor: Works (ed. 1839), vol. iii., p. 40.

ap-pōr-tion-āte, v. t. [Eng. apportion; -ate.] To apportion. (Hacket: Life of Williams, p. 275.)

ap-pōr-tion-āte-nēss, s. [Eng. apportion; -ate, -ness.] The quality of being in just proportion to something else.

"There is not a surer evidence of the apportionateness of the English liturgy to the end to which it was designed, than the contrary fates which it hath undergone."—Hammond: Pref. to View of the New Directory.

ap-pōr-tioned, pa. par. & a. [APPORTION.]

ap-pōr-tion-ēr, s. [Eng. apportion; -er.] One whose business it is to apportion.

ap-pōr-tion-ing, pr. par. [APPORTION.]

ap-pōr-tion-mēnt, s. [Eng. apportion; -ment.]

Ord. Lang. & Law: The act of meting out anything, the rent of a house, for instance, in just proportions among several owners. The distributing anything among several persons according to their just claims; also, the state of being so meted out.

"It is even possible to conceive that in this original apportionment, compensation might be made for the injuries of nature."—J. S. Mill: Polit. Econ., vol. i., bk. ii., ch. i., § 2.

ap-pō'se, v. t. [Fr. apposer=to affix, to put to; Port. appor; Lat. appono=to put at or near to.] [APPOSITE.]

1. To apply to.

"By malign putrid vapors, the nutriment is rendered unapt of being apposed to the parts."—Harvey.

2. To question, to examine.

¶ Now written POSE (q. v.).

"Which hem apposed, and knew alle here entente."—Chaucer: C. T., 12, 291.

" . . . to the end they may be apposed of those things which of themselves they are desirous to utter."—Bacon.

ap-pō'-sēr, s. [Eng. appose; -er.]

I. Gen.: One who questions another or others. (Now POSER.)

āp'-pō-sīte, a. [Lat. appositus, pa. par. of appono=to put or lay at or near, to apply to: ad=to, and pono=to put.]

*1. Added. (Glossog. Nova, 2d ed.)

2. Peculiarly applicable to; suitable to time, place, persons, and circumstances.

"The duke's delivery of his mind was not so sharp, as solid and grave, and apposite to the times and occasions."—Wotton.

"This contrast, not unsuitable to life, Is to that other state more apposite."

Wordsworth: Excursion, bk. v.

āp'-pō-sīte-lŷ, adv. [Eng. apposite; -ly.] In an apposite manner; fitly, suitably, appropriately.

"He . . . quoted the New Testament appositely."—Macaulay: Hist. Eng., ch. xxiii.

āp'-pō-sīte-nēss, s. [Eng. apposite; -ness.] The quality of being apposite; fitness, suitability, appropriateness.

"Judgment is either concerning things to be known, or of things done, of their congruity, fitness, rightness, appositeness."—Hale: Origin of Mankind.

ap-pō-sī-tion, s. [In Ger. & Fr. apposition; Sp. aposicion; Port. apposição; Ital. apposizione; from Lat. appositio.]

A. Ordinary Language:

1. The act of placing to or adding to.

2. The state of being placed to or added to.

" . . . certain bones, placed more or less in apposition with it."—Flower: Osteol. of Mammalia, p. 12.

B. Technically:

Gram.: The placing of two nouns or pronouns which are in the same case in juxtaposition with each other, without, however, connecting them by a conjunction. The word placed in apposition to the other does not so much add a completely new idea to that conveyed by the first one, as it explains that first. Examples: "She walks a queen," "It is I," "Hamlet, Prince of Denmark." In these sentences queen is in apposition with she, I with it, and Prince with Hamlet. She, I, and Prince are all in the nominative case.

ap-pō-sī-tion-al, a. [Eng. apposition; -al.] Relating to apposition; in apposition.

ap-pōs'-ī-tive, a. [Eng. apposit(e); -ive.] Apposite.

"The words in the parenthesis being only appositive to the words going immediately before."—Knatchbull: Tr., p. 42.

ap-pōy'nt, v. t. [APPOINT.]

ap-prāi'se (1), *ap-prī'ze, *ap-prī'se, v. t. [Fr. apprécier=(1) to value, (2) to appreciate, to estimate; O. Fr. apreiser, apreiser, apriesier, aproisier; Sp. apreciar; Port. apreciar; Ital. apprezzare; Lat. appretio=(1) to value, to appraise, (2) to purchase, (3) to appropriate: ad=to, and pretio=to prize; pretium=price.] [APPRIZE, APPRECIATE, PRICE, and PRIZE.] To value any kind of property, especially by means of persons acting under the authority of the law, or by mutual agreement of the parties concerned.

" . . . to apprise all the goods that were in the house."—Bp. Hall: Account of Himself.

†ap-prāi'se (2), v. t. [Formed from Eng. praise (q. v.).] To praise. (Poetic.)

"Appraised the Lycian custom, . . ."

Tennyson: The Princess, ii.

ap-prāi'sed (1), *ap-prī'zed, *ap-prī'sed, *ap-prī's-īt, pa. par. [APPRAISE (1).]

†ap-prāi'sed (2), pa. par. [APPRAISE (2).]

ap-prāi'se-mēnt, *ap-prī'se-mēnt, s. [Eng. appraise; -ment.]

1. Ord. Lang.: The act of appraising; the state of being appraised; that at which anything is appraised. (Dyche.)

ap-prāi's-ēr, *ap-prī's-ēr, *ap-prī'z-ēr, s. [Eng. appraise; -er.] One whose occupation it is to appraise property. The appellation is given chiefly to brokers of household furniture, but is also applied to all, of whatever calling, who in fact appraise property of any kind. (Dyche.)

fāte, fāt, fāre, amidst, whāt, fāll, father, wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

ap-prā'is-īng, *ap-prī's-īng, *ap-prī'z-īng,
pr. par. & s. [APPRAISE (1).]

As substantive: The act of valuing by means of persons authorized to do so.

***ap-prē-cā'-tion, s.** [Lat. *ad*=to, and *precatio* a praying, a prayer; from *precor*=to speak as a suppliant, to ask or beg for.] Prayer or supplication to or for.

"Such shall be the fervent *appreciations* of your much devoted friend."—*Bp. Hall: Remains*, p. 404.

***ăp'-prē-ca-tōr-ŷ, a.** [Lat. *ad*=to, and *precatorius*=pertaining to prayer.] Relating to prayer or supplication.

"... how forcible shall we esteem the (not so much *apprecatory* as declaratory) benedictions of our spiritual fathers, sent to us, out of heaven."—*Bp. Hall: Cases of Conscience*, iii. 9.

ap-prē'-cī-a-ble (or *cī=shī*), *a.* [In Fr. *appréciable*.]

1. Capable of being estimated and its value ascertained.

(a) Used in a general sense.

"Equally conclusive and more readily *appreciable* proof . . ."—*Owen: British Fossil Mammals and Birds*, p. xxiii.

(b) Used specially of a quantity which, though small, is yet large enough to enable it to be ascertained, or at least estimated.

"... the derivative oscillation (as it may be termed) will be imperceptible in one case, of *appreciable* magnitude in another, . . ."—*Herschel: Astron.*

"... the difference between the sexes in the amount of scarlet is so slight that it can hardly make any *appreciable* difference in the danger incurred."—*Darwin: The Descent of Man*, pt. ii., ch. xv.

2. Worthy of being appreciated, valuable.

ap-prē'-cī-āte, *ap-prē'-tī-āte (or *cī, tī=shī*), *v. t.* [In Fr. *apprécier*; Sp. *apreciar*; Port. *apreciar*; Ital. *apprezzare*; Lat. *appretio*.] [APPRAISE.]

1. To value at a proper price. *Spec.*, to estimate at a high price or value. (*Lit. & Fig.*)

"... utterly incapable of *appreciating* his higher qualities."—*Macaulay: Hist. Eng.*, ch. xv.

"... the mental culture necessary in order to *appreciate* Homer, . . ."—*Gladstone: Studies on Homer*, vol. i., § iii., p. 25.

2. To estimate anything, even though the element of price enter into it only remotely; to comprehend, to understand, accurately to conceive.

"... to enable us to *appreciate* the action of an organ in health."—*Todd & Bowman: Physiol. Anat.*, vol. i., *Introd.*, p. 31.

Crabb considers that while *appraise* and *appreciate* both signify to value, *appraise* is used in a literal, and *appreciate* in a figurative, sense. One *appraises* goods, he *appreciates* and does not *appraise* the characters of men. To *estimate* a thing is to get the sum of the value by calculation; to *esteem* anything is to judge its actual and intrinsic value. *Estimate* is used either literally or figuratively; *esteem*, only in a moral sense. One *estimates* losses by fire, he *esteems* the character of a good man.

ap-prē'-cī-ā-tēd (or *cī=shī*), *pa. par. & a.* [APPRECIATE.]

ap-prē'-cī-ā-tīng (or *cī=shī*), *pr. par.* [APPRECIATE.]

ap-prē'-cī-ā'-tion, *ap-prē'-tī-ā'-tion (or *cī* and *tī* as *shī*), *s.* [In Fr. *appréciation*; Port. *apreciação*.] [APPRECIATE.] The act of estimating anything at its just value, especially if that be a high one; the state of being so valued; the price, valuation, or estimate set upon it.

"Sorrow for sin—in *appreciation* they would ever have to be excessive."—*Dr. Playfere: The Power of Prayer* (1617), p. 58.

"... a defective *appreciation* of colors."—*Herbert Spencer*, 2d ed., vol. ii., p. 249, § 353, Note.

ap-prē'-cī-ā-tīve (or *cī* as *shī*), *a.* [Eng. *appreciate*; -ive. In Fr. *appréciatif*; Port. *apreciativo*.] Having, containing, or implying appreciation for. (*Goodrich & Porter*.)

ap-prē'-cī-ā-tōr-ŷ (or *cī* as *shī*), *a.* [Eng. *appreciate*; -ory.] The same as APPRECIATIVE (q. v.). (*Goodrich & Porter*.)

ăp-prē-hēnd', v. t. & i. [In Fr. *appréhender* & *apprehendre*; Sp. *aprehender*; Port. *aprehender*, *aprender*; Ital. *apprendere*=to learn, to conceive; Lat. *apprehendo*=(1) to seize, (2) to allege, (3) to comprehend; *ad*=to, and *prehendo*=to take hold of, to seize. From Lat. *præ*=before, and the same root which appears in A. S. *hentan*, *gehentan*=to take hold of, to pursue.]

A. Transitive:

I. Of physical action: To take hold of, to grasp, to seize; especially to seize a criminal with the view of bringing him to justice.

"There is nothing but hath a double handle, or at least we have two hands to *apprehend* it."—*Taylor*.

"And when he had *apprehended* him, he put him in prison, . . ."—*Acts* xii. 4.

II. Of mental action: To seize, grasp, or lay hold of an idea or a conception; to entertain an emotion.

1. *Of mental conceptions:*

(a) To interpret, to understand but somewhat doubtfully.

"What was spoken metaphorically may be *apprehended* literally. What was spoken ludicrously may be *apprehended* seriously."—*Macaulay: Hist. Eng.*, ch. v.

(b) To believe, to be of opinion.

"... to do what they conscientiously *apprehended* to be wrong?"—*Macaulay: Hist. Eng.*, ch. xi.

2. *Of emotion:* To dread the approach of some evil; to look forward with anxiety to a coming event.

"Here, therefore, the opposition had more reason than the king to *apprehend* violence."—*Macaulay: Hist. Eng.*, ch. ii.

¶ In this sense it is sometimes used impersonally.

"It was *apprehended* that, if he were now armed with the whole power of the Crown, he would exact a terrible retribution for what he had suffered."—*Macaulay: Hist. Eng.*, ch. xiii.

B. Intransitive:

1. Partially to understand.

2. To think, conceive, entertain an opinion. (Generally followed by *that*.)

¶ (1) *Apprehend* in the sense classed above as II., 1 (a) is a much weaker word than *comprehend*. Every one *apprehends* much which he does not *comprehend*.

(2) When *apprehend* is used in the sense classed as No. II., 1 (b), it may be contrasted with the verbs *to conceive*, *to suppose*, and *to imagine*. According to Crabb, to *apprehend* is simply to take an idea into the mind, as children do; to *conceive* an idea is to form it after reflection, as is done by adults. To *apprehend* and to *conceive* are applied only to reality, while to *suppose* and *imagine* are used of things which may exist only in the imagination. *Apprehend* expresses the weakest kind of belief. A man is said to *conceive* that on which he forms a direct opinion; what one *supposes* may admit of a doubt, what one *imagines* may be altogether improbable or impossible, and that which cannot be *imagined* may be too improbable to be believed. (*Crabb: Eng. Synon.*)

(3) When *apprehend* is used in the sense classed as No. II., 2, it may be contrasted with the verbs *to fear* and *to dread*. These rise above each other in force after the manner of a climax in the order *apprehend, fear, dread*. We *apprehend* an unpleasant occurrence; we *fear* a misfortune; we *dread* a calamity. Moreover, *apprehend* respects things only; *fear* and *dread* relate to persons as well as things. (*Crabb: Eng. Synon.*)

(4) More (*Sleep of the Soul*, ii. 28) uses the form *apprend*, probably *metri gratia*.

ăp-prē-hēnd'-ēr, s. [Eng. *apprehend*; -er.] One who apprehends in any of the senses of that verb.

"Gross *apprehenders* may not think it any more strange, than that a bullet should be moved by the rarefied fire."—*Glanville*.

ăp-prē-hēnd'-īng, pr. par., a., & s. [APPREHEND.]

A. As pa. par. & adj.: In senses corresponding to those of the verb.

B. As substantive: Apprehension.

"... to issue a proclamation for the *apprehending* of Ludlow."—*Macaulay: Hist. Eng.*, ch. xv.

ăp-prē-hēn'-sī-ble, a [Lat. *apprehensibilis*.]

*1. Able to be comprehended or included; comprehensible, in a literal sense.

"The north and southern poles are incommunicable and fixed points, whereof the one is not *apprehensible* in the other."—*Browne: Vulgar Errors*.

2. Able to be apprehended, in a *lit.* or *fig.* sense.

"... in reality it exacts so powerful an effort on the part of the reader to realize visually, or make into an *apprehensible* unity, the scattered elements and circumstances of external landscapes painted only by words . . ."—*De Quincey: Works* (ed. 1863), vol. ii., p. 173.

ăp-prē-hēn'-sion, s. [In Fr. *appréhension*; Port. *aprehensao*; Lat. *apprehensio*, from *apprehensum*, supine of *apprehendo*.] [APPREHEND.]

I. The act or power of apprehending.

1. *Physically:* The act of laying hold of, grasping, or seizing with the hands or in some similar way, and especially of seizing a criminal to bring him to justice. [PREHENSION.]

"A lobster hath the chely or great claw of one side longer than the other, but this is not their leg, but a part of *apprehension*, whereby they seize upon their prey."—*Browne: Vulgar Errors*.

2. *Mentally:*

(a) The act of mentally grasping or laying hold of, especially the act of laying hold of an idea without studying it in its various relations so as to comprehend it. [COMPREHEND.]

"Simple *apprehension* denotes no more than the soul's naked intellection of an object, without either composition or deduction."—*Glanville*.

"And acts in that obedience, he shall gain
 The clearest *apprehension* of those truths,
 Which unassisted reason's utmost power
 Is too infirm to reach!"
Wordsworth: Excursion, bk. v.

(b) Opinion, belief, founded on sufficient or resting on doubtful evidence.

"... the unpardonable guilt of murder, which, in his *apprehension*, was aggravated rather than excused by the vice of intoxication."—*Gibbon: Decline and Fall*, ch. xli.

(c) The power or faculty by which man mentally apprehends.

"What a piece of work is a man! . . . in action, how like an angel! in *apprehension*, how like a god!"—*Shakesp.: Hamlet*, ii. 2.

II. The state of being apprehended, or being under the influence of apprehension.

1. The state of being seized, grasped, or laid hold of; seizure.

"See that he be convey'd unto the Tower:
 And go we, brothers, to the man that took him,
 To question of his *apprehension*."
Shakesp.: 3 Henry VI., iii. 2.

"Corn. True or false, it hath made thee Earl of Gloster. Seek out where thy father is, that he may be ready for our *apprehension*."—*Shakesp.: King Lear*, iii. 5.

2. Foreboding of evil, suspicion that something unpleasant is about to happen; fear.

"But Mackay's gentle manner removed their *apprehension*."—*Macaulay: Hist. Eng.*, ch. xliii.

III. That which is apprehended; an object of apprehension.

"... a foolish extravagant spirit, full of forms, figures, shapes, objects, ideas, *apprehensions*, motions, revolutions."—*Shakesp.: Love's Labor's Lost*, iv. 2.

ăp-prē-hēn'-sive, a. [Fr. *appréhensif*; Sp. *apprehensivo*; Port. *apprehensivo*; from Lat. *apprehensum*, supine of *apprehendo*=to seize, or lay hold of.]

I. Of intellect:

*1. Cognizant of, acquainted with.

"She, being an handsome, witty and bold maid, was both *apprehensive* of the plot and very active to prosecute it."—*Fuller: The Profane State*, bk. v., c. 5

(See *Trench, Glossary*, 7. 8.)

2. Quick to understand.

"Nourish'd imagination in her growth,
 And gave the mind that *apprehensive* power
 By which she is made quick to recognize
 The moral properties and scope of things."
Wordsworth: Excursion, bk. i

II. Of emotion:

1. *Gen.*: Keenly susceptible of feeling in general.

"Thoughts, my tormentors, armed with deadly stings,
 Mangle my *apprehensive* tenderest parts."
Milton: Samson Agon.

2. *Spec.*: Entertaining suspicion or slight fear of present or foreboding of future danger.

"... a man insatiably greedy of wealth and power, and yet nervously *apprehensive* of danger."—*Macaulay: Hist. Eng.*, ch. xxiii.

ăp-prē-hēn'-sive-lŷ, adv. [Eng. *apprehensive*; -ly.] In an apprehensive manner; with apprehension.

ăp-prē-hēn'-sive-nēss, s. The quality of being apprehensive; fearfulness, dread.

"Whereas the vowels are much more difficult to be taught, you will find, by falling upon them last, great help by the *apprehensiveness* already gained in learning the consonants."—*Holder*.

***ăp-prēnd', v. t.** [APPREHEND, v., ¶ (4).]

ap-prēn'-tīce, *ap-prēn'-tise, *ap-prēn'-tŷs, s. [In Fr. *apprenti*, as *s*=an apprentice; as *adj.*=apprenticed; from *apprendre*=to learn; O. Fr. & Prov. *apprentis, apprentiz*; Sp. *aprendiz*=an apprentice; *aprender*=to learn; Low Lat. *aprenticius*=an apprentice; Class. Lat. *apprendo* (poetic)=*apprehendo*=to seize, . . . to comprehend.] [APPREHEND.]

1. *Ordinary Language & Law:* A young man, or young woman, who has been bound by indentures to serve a particular master or mistress for a certain term of years; the master again, on his side, covenanting to maintain the apprentice, and teach him or her the trade of which he makes profession.

"... a kindly man, who became attached to the little fellow, and in due time made him [Faraday] his *apprentice* without fee."—*Tyndall: Frag. of Science*, 3d ed., xii. 349.

bōil, bōŷ; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aŷ; expect, Xenophon, exist. ph=f. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bəl, dəl

2. In old Law-books: Advocates or barristers under sixteen years' standing were called Apprentices (*Apprenticii ad legem*). After sixteen years they became sergeants (*servientes ad legem*). (*Blackstone: Comment.*, bk. iii., ch. 3.)

apprentice fee, *v. t.* [From the substantive.] To bind as an apprentice or as apprentices.

ap-prén'-ticed, *pa. par. & a.* [See APPRENTICE, *v.*]

"Him portion'd maids, *apprentic'd* orphans blest,
The young who labor, and the old who rest." Pope.

***ap-prén'-tice-hôod**, *s.* [Eng. *apprentice*, and suffix *-hood*.] Apprenticeship.

"Must I not serve a long *apprenticehood*
To foreign passages, and in the end,
Having my freedom, boast of nothing else
But that I was a journeyman to grief?"

Shakesp.: Rich. II., i. 3.

ap-prén'-tice-ship, *s.* [Eng. *apprentice*, and suffix *-ship*.]

1. *Strictly*: The term of years for which one is bound as an apprentice; also the state or condition of an apprentice.

¶ The duration of apprenticeships varies in different countries. They seem to have been unknown among the old Romans. In England they are incidentally mentioned in an Act of Parliament in 1338, but they were then so common that their origin must be sought at a long prior date. By the "Statute of Apprenticeship," 5 Eliz., c. 4, it was enacted that no person should for the future exercise any trade, craft, or mystery at that time exercised in England, unless he had previously served an apprenticeship to it of at least seven years. The judges of the higher courts of law gave as narrow an interpretation as they could to this repressive enactment. Adam Smith (*Wealth of Nations*, bk. i., ch. x., pt. ii., and bk. iv., ch. ii.) denounced it; and the Act 54, Geo. III., c. 96, swept it away. Optional apprenticeship, however, still flourishes in England, and is the common method of learning a handicraft. The enforcement of apprenticeship was never carried out to the same extent in Ireland and in Scotland as in England. France, Germany, and Italy have all at one time or other had compulsory apprenticeships, though in the first-named country they were abolished during the Revolution of 1789.

"... during his *apprenticeship* he [Faraday] found his appetite for knowledge provoked and strengthened by the books he stitched and covered."—*Tyndall: Frag. of Science*, 3d ed., xii. 349.

2. *Loosely*: The time during which one is learning a profession, or acquiring skill in anything, even though he may not be formally bound by indentures to a master.

"He had never, he said, served an *apprenticeship* to the military profession."—*Macaulay: Hist. Eng.*, ch. vii.

ap-prén'-tice-îng, *pr. par.* [APPRENTICE, *v.*]

***ap-prén'-tis-âge**, *s.* [Fr. *apprentissage*; Sp. *aprendizaje*.] The state or condition of an apprentice; apprenticeship (*lit. & fig.*)

"... than to be utterly without *apprentisage* of war."—*Bacon: Observ. upon a Libel* (1592).

âp-préssed', **âp-prést'**, *a.* [From Lat. *adpressum* (*adpressum*), supine of *adprimere* (*adprimere*)=to press to: *ad*=to, and *premo*=to press.]

Bot.: Pressed to anything else; as, for instance, hairs pressed closely to the stem of a plant. [AD-PRESSED.] (*Loudon: Cycl. of Plants; Gloss.*)

***âp-pré-ti-âte** (tî as shî), *v. t.* [APPRECIATE.]

âp-pré-ti-â-tion (tî as shî), *s.* [APPRECIATION.]

***ap-prî'se**, ***ap-prî'ze**, *s.* [In Fr. *appriser*=the formal notice sent to an inferior judge of the decision come to by a superior one; from *appris*, *pa. par.* of *apprendre*=to learn, to teach.] [APPREHEND.] Notice, information.

"Then I praised him for to saie
His will, and I it wolde obeie,
After the forme of his *apprize*."

Gower: Conf. Amantis, bk. i.

ap-prî'se (1), ***ap-prî'ze** (1), *v. t.* [From *apprise*, *s.* (q. v.).] To inform, to make aware, to bring to the notice of.

"Herman! I command thee,
Knock, and *apprize* the Count of my approach."

Byron: Manfred, iii. 3.

ap-prî'se (2), *v. t.* [*APPRIZE (2).]

ap-prî'sed (1 & *2), *pa. par.* [APPRIZE (1 & *2).]

ap-prî's-îng (1 & *2), *pr. par.* [APPRIZE (1 & *2).]

ap-prî'ze (2), **ap-prî'se** (2), *v. t.* Modified form of APPRAISE (q. v.).

***ap-prî'zed** (1 & 2), *pa. par.* [*APPRIZE (1 & 2).]

ap-prî'ze-ment, ***ap-prî'se-ment**, *s.* [APPRAISEMENT.]

ap-prî'z-ēr, ***ap-prî's-ēr**, *s.* [APPRAISER.]

***ap-prî'z-îng**, *pr. par.* [APPRIZE (1).]

***ap-prî'z-îng**, *pr. par. & s.* [APPRIZE (2).]

As substantive (Scotch Law): Formerly, an action by which a creditor sought permission to take the estates of his insolvent debtor. Adjudications have now been substituted in lieu of apprizings.

ap-prô'ach, ***ap-prô'che**, ***ap-prô'ch**, *v. i. & t.* [Fr. *approcher*, from *proche*=near; Prov. *aprop-char*, from *propi*=near; Ital. *aprossimarsi*; Old Ital. *approciare*; Low Lat. *approprio*, from Lat. *ad*=to, and *prope*=near.]

A. Intransitive:

1. *Of place*: To advance to the immediate vicinity of, to draw near.

"Daunger vaine it were to have assayd
That cruell element, which all things feare,
Ne none can suffer to *approchen* neare."

Spenser: F. Q., III. xi. 22.

"Wherefore *approched* ye so nigh unto the city when ye did fight?"—2 Sam. xi. 20.

2. *Of time*: To draw near, to be not far off.

"Behold, thy days *approach* that thou must die."—Deut. xxxi. 14.

3. *Figuratively*:

(a) *Gen.*: To draw near to in other respects; as in aim, in attainments, or in intellectual or moral character.

"To have knowledge in all the objects of contemplation, is what the mind can hardly attain unto; the instances are few of those who have, in any measure, *approched* toward it."—Locke.

(b) *In Scripture (Spec.)*: To have near access of a spiritual kind to God.

"I will cause him to draw near, and he shall *approch* unto me: for who is this that engaged his heart to *approch* unto me? saith the Lord."—Jer. xxx. 21.

B. Transitive:

†1. *Really transitive*: To cause to draw near.

"By plunging paper thoroughly in weak spirit of wine, and *approching* it to a candle, the spirituous parts will burn without harming the paper."—Boyle.

2. *Only apparently so, there being an ellipsis of to*: To draw near to in place, in time, or in any other way.

"It was indeed scarcely safe to *approch* him [that is (to) him]."—*Macaulay: Hist. Eng.*, ch. vii.

"He was an admirable poet, and thought even to have *approched* Homer."—Temple.

ap-prô'ach, ***ap-prô'che**, *s.* [From the verb. In Fr. *approche*.]

A. Ordinary Language:

I. The act of drawing near in place or in other ways.

"The Pastor learn'd that his *approach* had given
A welcome interruption to discourse."

Wordsworth: Excursion, bk. v.

"... a nearer *approach* to the human type."—Owen: *Classif. of the Mammalia*, p. 85.

II. The state of being brought near in place, in time, or in other ways.

"Poets sang with emulous fervor the *approach* of the golden age."—*Macaulay: Hist. Eng.*, ch. iii.

III. That by which one draws near; means or liberty of drawing near.

1. *Lit.*: A road, a street, an avenue, or other way by means of which one can draw near to a place.

"We should greatly err if we imagined that the road by which he entered that city [Cork] bore any resemblance to the stately *approach* which strikes the traveler of the nineteenth century with admiration."—*Macaulay: Hist. Eng.* ch. xii.

[See also B. 1, *Fortif.*]

2. *Fig.*: Liberty of drawing near; access.

"Honor hath in it the vantage-ground to do good; the *approach* to kings and principal persons, and the raising of a man's own fortunes."—Bacon.

B. Technically:

1. *Fortification (Plur.)*:

(a) *Gen.*: The works thrown up by an army for its protection while it is moving forward to attack a fort or other military post. Among these are the first, second, and third parallels, epaulements, with and without trenches, redoubts, places of arms, saps, galleries, and lodgments. *James: Military Dict.*

¶ A signification analogous to this has found its way into poetry.

"... Sextus Pompeius

Makes his *approaches* to the port of Rome."

Shakesp.: Antony and Cleopatra, i. 3.

"Against beleagur'd heav'n the giants move:
Hills pil'd on hills, on mountains mountains lie,
To make their mad *approaches* to the sky."

Dryden.

Counter approaches are trenches carried on by the besieged against those of the besiegers.

(b) *Spec.*: Attacks.

"... so soon we shall drive back

Of Alcibiades the *approaches* wild."

Shakesp.: Timon of Athens, v. 1.

2. *Geom. Curve of equal approach*: A curve of such a form that a body descending it, under the impulse of gravity, makes equal approaches in equal times to the surface of the ground.

3. *Algebra. Method of approach*. [See APPROXIMATION, B.]

4. *Gardening*. [APPROACHING.]

ap-prô'ach-a-ble, *a.* [Eng. *approach*; *-able*.] Capable of being approached.

"... a region essentially mythical, neither *approchable* by the critic nor measurable by the chronologist."—*Grote: Hist. Greece*, pt. i., ch. i.

ap-prô'ach-a-ble-ness, *s.* [Eng. *approachable*; *-ness*.] The characteristic of being approachable.

ap-prô'ached, ***ap-prô'ched**, *pa. par.* [APPROACH, *v.*]

ap-prô'ach-ēr, *s.* [Eng. *approach*; *-er*.] One who approaches, one who draws near.

"Thou gav'st thine ears like tapsters, that bid welcome
To knaves and all *approchers*."

Shakesp.: Timon of Athens, iv. 3.

ap-prô'ach-îng, *pr. par., a., & s.* [APPROACH, *v.*]

A. & B. As present participle and participial adjective: In senses corresponding to those of the verb.

"Unable to discern the signs of *approaching* reaction."—*Macaulay: Hist. Eng.*, ch. ii.

C. As substantive:

1. *Gen.*: A drawing near, an approach.

"A young Venetian, one that comes before
To signify the *approaching* of his lord."

Shakesp.: Merchant of Venice, ii. 9.

2. *Gardening*: The grafting of a shoot or a small branch of one tree into another without detaching it from the parent stock. It is called also *engrafting by approach* or *by inarching*.

ap-prô'ach-lëss, *a.* [Eng. *approach*; *-less*.] Having no means of approach.

ap-prô'ach-mënt, *s.* [Eng. *approach*; *-ment*.] The act of drawing near; the state of being brought near.

"As for ice, it will not concrete but in the *approachment* of the air, as we have made trial in glasses of water, which will not easily freeze."—*Browne: Vulgar Errors*.

âp-prô-bâte, *v. t.* [APPROBATE, *a.*] To express approval of.

"Mr. Hutchinson *approved* the choice."—*J. Eliot*.

Scots Law: The term *approve* is generally used along with *reprobate*, to which it is opposed. To *approve* and *reprobate* is to attempt to take advantage of those portions of a deed which are in one's favor, while repudiating the rest. This is not legally admissible. If a person *approve*, approve, or assent to portions of a deed, and take legal advantage of this assent, he must accept the deed as a whole; he cannot "reprobate," repudiate, or reject the portions of it which he dislikes.

âp-prô-bâte, *a.* [Lat. *approbatus*, *pa. par.* of *approbo*, *-avi*, *-atum*=to approve: *ad*=to, and *probo*=to try, test, judge, to prove. . . . to approve; from *probus*=good, excellent.] Approved.

"All things contained in Scripture are *approved* by the whole consent of all the clergy of Christendom."—*Sir T. Elyot: Governour*, fol. 206.

âp-prô-bâ-tëd, *pa. par.* [APPROBATE, *v.*]

âp-prô-bâ-tîng, *pr. par.* [APPROBATE, *v.*]

âp-prô-bâ-tîon, ***âp-prô-bâ'-cion**, *s.* [In Fr. *approbation*; Sp. *aprobacion*; Port. *aprovação*; Ital. *approbazione*, *approvazione*; Lat. *approbatio*=(1) an approving, an assenting to, (2) proof, confirmation; from *approbo*=(1) to approve, (2) to prove.] [APPROBATE, APPROVE, PROVE.]

I. The act of approving or of proving.

1. *Of approving*:

(a) *By words, or in any other way*: Commendation, praise, approval.

"Many, therefore, who did not assent to all that the king had said, joined in a loud hum of *approbation* when he concluded."—*Macaulay: Hist. Eng.*, ch. xxiii.

"Animals manifestly feel emulation. They love *approbation* or praise."—*Darwin: Descent of Man*, vol. i., pt. i., ch. ii., p. 42.

(b) *Tacitly*: The act of approving of one's self, of another, or of others, within the secret recesses of the heart; liking, satisfaction, pleasure, complacency.

"I am very sensible how much nobler it is to place the reward of virtue in the silent *approbation* of one's own breast than in the applause of the world."—*Melmoth: Pliny; Letters*, bk. i., lett. 2.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pîne, pît, sîre, sîr, marine; gô, pôť, or. wôre, wôlf, wôrġk, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

*2 The act of proving; attestation, support, proof.

"For God doth know how many now in health
Shall drop their blood in *approbation*
Of what your reverence shall incite us to."
Shakesp.: Henry V., i. 2.

II. The state of being approved.

**Spec.*: The state of being on probation; a novitiate in the Roman Catholic Church before being hopelessly committed to the secluded life of a monk or nun.

"This day my sister should the cloister enter,
And there receive her *approbation*."
Shakesp.: Meas. for Meas., i. 2.

ăp'-prô-bă-tive, *a.* [In Fr. *approbatif*; Port. *approbativo*.] Containing, expressing, or implying approval of; commendatory, laudatory. (*Cotgrave*.) [APPROBATORY.]

†ăp'-prô-bă-tor, *s.* [Lat. *adprobator*, *approbator*. In Fr. *approbateur*; Ital. *approvatore*.] One who approves.

"Accept them for judges and *approbators*."—*Evelyn: Mem. and Letters*.

†ăp'-prô-bă-tor-ŷ, ***ăp'-prô-bă-tor-ŷe**, *a.* [Eng. *approve*; -*ory*.] Expressing or implying approbation; commendatory, laudatory.

"... after the *approbatorie* epistle of Cardinal Turrecremate . . ."—*Sheldon: Miracles of Antichrist*, p. 300.

***ăp-prô-che**, *v. t.* [APPROACH.]

***ăp-prô-čh-ě-and**, *pr. par.* [Northern dialect *pr. par.* of APPROCHE (q. v.).] Proximate, in the vicinity. (*Scotch*.)

"... it was equal in gloire of armes to my town *approcheand*."—*Bellend.: T. Levins*, p. 17.

***ăp-prômpt**, *v. t.* [Lat. *ad*, implying addition to, and Eng. *prompt* (q. v.).] To prompt, to stimulate, to question.

"Neither may these places serve only to *aprompt* our invention, but also to direct our inquiry."—*Bacon: Learning*, bk. ii.

***ăp-prô'of**, *s.* [From Eng. *approve*.]

1. Approval, approbation.

"O most perilous mouths,
That bear in them one and the self-same tongue
Either of condemnation or *approof*!"
Shakesp.: Meas. for Meas., ii. 4.

2. Proof, trial, experience.

"... Sister, prove such a wife
As my thoughts make thee, and as my farthest band
Shall pass on thy *approof*."
Shakesp.: Antony and Cleopatra, iii. 2.

ăp-prôp'-ēr-âte, *v. t.* [Lat. *approperatus*, *pa. par.* of *appropero*=to hasten.] To hasten, to accelerate, to set forward.

***ăp-prô-pîn-quâte**, *v. i.* [Lat. *appropinquo*=to draw near: *ad*=to, and *propinquo*=to bring near; *propinquus*=near; *prope*=near.] To draw near to, to approach.

ăp-prô-pîn-quă-tion, *s.* [Lat. *appropinquatio*; Sp. *apropinquacion*.] A drawing near, an approach.

"There are many ways of our *appropinquation* to God." *Bp. Hall: Remains*, p. 90.

***ăp-prô-pîng'ue**, *v. i.* [Lat. *appropinquo*=to draw near.] To draw near, to approach. (Intended to be in a ludicrous sense, though the subject is exceedingly serious.)

¶ In the example there is an ellipsis of *to*, which makes the verb look transitive. It means (to) an end.

"Mortal crisis doth portend
My days to *appropinque* an end."

Butler: Hudibras, i.

***ăp-pro-pre**, *v. t.* [See def.] Original form of APPROPRIATE, *v.* (q. v.).

"His awen ioyes, les and mare,
That til hymself sal be *appropried* there."
Hampole: Prick of Consc., 9,346.

ăp-prô'-prî-a-ble, *a.* [Eng. *appropri(ate)*; -*able*.] Which may be appropriated.

"This conceit, applied unto the original of man and the beginning of the world, is more justly *appropriable* unto its end."—*Browne: Vulgar Errors*.

ăp-prô'-prî-âte, *v. t.* [APPROPRIATE, *a.*]

A. Ordinary Language:

I. Literally:

1. To transfer to one's self money, property, or other tangible thing, which one previously held in common with others, or even which was wholly theirs.

"... other the y-halyede stedes thet byeth *apropred* to gaodes seruise."—*Ayenbite* (ed. Morris), p. 40.

"... he spoke of merchandise as well as provisions captured and *appropriated*."—*Froude: Hist. Eng.*, vol. iv., p. 407.

2. To set aside part of what is one's own for a special purpose.

"As for this spot of ground, this person, this thing, I have selected and *appropriated*, I have inclosed it to myself and my own use: and I will endure no sharer, no rival, or companion in it."—*South*.

3. To set apart or designate a sum of money to be expended for a particular purpose.

II. Figuratively:

1. To take or attempt to take to one's self a natural or spiritual advantage designed to be common to many others.

"... to themselves *appropriating*
The Spirit of God, promised alike, and given
To all believers."—*Milton: P. L.*, bk. xii.

"A liberty like his, who, unimpeach'd
Of usurpation, and to no man's wrong,
Appropriates nature as his Father's work,
And has a richer use of yours than you."
Couper: The Task, bk. v.

2. To assign a specific meaning to words which previously were general in their signification.

"He need but be furnished with verses of sacred Scripture; and his system, that has *appropriated* them to the orthodoxy of his church, makes them immediately irrefragable arguments."—*Locke*.

B. Technically:

Eng. Law: To annex the fruits of a benefice to a spiritual corporation. [APPROPRIATION, B., 1.]

"Before Richard II., it was lawful to *appropriate* the whole fruits of a benefice to any abbey, the house finding one to serve the cure."—*Ayliffe*.

ăp-prô'-prî-ate, *a. & s.* [From Lat. *appropriatus*, *pa. par.* of *approprio*: from *ad*=to, and *proprio*=to appropriate; *propius*=one's own; perhaps from *prope*=near. In Fr. *approprié*.] [APPROPRIATE, *v.*]

1. Properly: Pertaining to something previously shared in common, but now rendered the property of an individual.

2. Suitable, fit, becoming, well adapted to the circumstances.

"... with *appropriate* words

Accompanied, . . ."
Wordsworth: Excursion, bk. vii.

B. As substantive: Special function or aim.

"The Bible's *appropriate* being (as itself tells us) to enlighten the eyes and make wise the simple."—*Boyle: On the Style of Holy Scrip.*, p. 44.

ăp-prô'-prî-ă-téd, *pa. par. & a.* [APPROPRIATE, *v.*]

"... in an *appropriate* spot."

Wordsworth: The Excursion.

ăp-prô'-prî-ate-lŷ, *adv.* [Eng. *appropriately*; suffix -*ly*.] In an appropriate manner; fitly, suitably, pertinently, properly. (*Todd*.)

ăp-prô'-prî-ate-ness, *s.* [Eng. *appropriate*; -*ness*.] The quality of being appropriate.

"The *appropriateness* of this particular charge was a fresh cause of suspicion."—*Froude: Hist. Eng.*, vol. iv., p. 542.

ăp-prô'-prî-ă-tiŷ, *pr. par.* [APPROPRIATE, *v.*]

ăp-prô'-prî-ă-tion, *s.* [In Fr. *appropriation*; Sp. *apropiacion*; Port. *apropriacao*; Ital. *appropriazione*; Lat. *appropriatio*.] [APPROPRIATE, *v.*]

A. Ordinary Language:

I. The act of appropriating.

1. *Lit.*: The act of taking that to one's self which one previously held in common with others, or of applying anything to a special purpose.

"The first of these modes of *appropriation*, by the government, is characteristic of the extensive monarchies which from a time beyond historic record have occupied the plains of Asia."—*J. S. Mill: Polit. Econ.*, Prelim. Remarks, p. 14.

2. *Fig.*: The act of mentally assigning to a general idea a limited or specific meaning.

"The mind should have distinct ideas of the things, and retain the particular name, with its peculiar *appropriation* to that idea."—*Locke*.

II. The state of being appropriated.

III. That which is appropriated.

"... and thus were most if not all, the *appropriations* at present existing, originally made, being annexed to bishoprics, prebends . . ."—*Blackstone: Comment.*, bk. ii., ch. 11.

IV. The act of designating or setting apart anything, especially money, for a particular purpose or use.

V. That which is set apart for a particular purpose.

B. Technically (*Eng. Law*):

1. The transference to a religious house, or spiritual corporation, of the tithes and other endowments designed for the support of religious ordinances in a parish; also these when transferred. When the monastic bodies were in their glory in the

Middle Ages, they begged, or bought for masses and obits, or in some cases even for actual money, all the advowsons which they could get into their hands. In obtaining these they came under the obligation either to present a clergyman to the church, or minister there in holy things themselves. They generally did the latter, and applied the surplus to the support and aggrandizement of their order. On the suppression of the monasteries in the reign of Henry VIII., the appropriated advowsons were transferred to the king, and were ultimately sold or granted out to laymen, since called *impropriators*. (*Blackstone: Comment.*, bk. i., ch. 11.)

2. *Appropriation of payments*: The application by a creditor of money received from a debtor, who owes him several accounts, to that particular one which he (the creditor) thinks fit to reduce or liquidate.

ăp-prô'-prî-a-tive, *a.* [Eng. *appropriate*; -*ive*.] Appropriating; involving the appropriation of something.

ăp-prô'-prî-ă-tôr, ***ăp-prô'-prî-ě-tar-ŷ**, *s.* [Lat. *appropriator*, *appropriator*.]

I. Of the form APPROPRIATOR only.

Gen.: One who appropriates anything.

II. Of either form.

Eng. Law: A spiritual corporation which has had annexed to it the tithes of a benefice; or the individual at the head of such a corporation. Also a layman who has such tithes transferred to him; but in this latter case the term commonly used is *impropriator*, meaning one who, not a sacred personage, improperly holds church funds or lands.

"... a vicar has generally an *appropriator* over him, entitled to the best part of the profits, to whom he is in fact perpetual curate, with a standing salary."—*Blackstone: Comment.*, bk. i., ch. 2.

"Let me say one thing more to the *appropriaries* of benefices."—*Spelman*.

ăp-prô'-v-a-ble, *a.* [Eng. *approve*; -*able*.] Able to be approved of, meriting approval.

"The solid reason or confirmed experience of any man is very *approvable* in what profession soever."—*Browne: Vulgar Errors*.

ăp-prô'-v-a-ble-ness, *s.* [Eng. *approvable*; -*ness*.] The quality of being worthy of approbation.

ăp-prô'-v-al, *s.* [Eng. *approve*; -*al*.] Approbation.

¶ Dr. Johnson calls this "a word rarely found," but since his time it has completely revived.

"There is a censor of justice and manners, without whose *approval* no capital sentences are to be executed."—*Temple*.

***ăp-prô'-v-ançe**, *s.* [Eng. *approve*; -*ance*.] Approval, approbation.

"As parents to a child complacent deign
Approvance, the celestial Brightness smil'd."
Thomson: Liberty, pt. iv.

ăp-prô've, ***ăp-preŷ'e** (*Eng.*), ***ăp-prî'v'e** (*Scotch*), *v. t. & i.* [In Fr. *approuver*; Prov. *aprobar*, *aproar*; Sp. *aprobar*; Port. *aprovar*; Ital. *approbare*; Lat. *approbo*=(1) to approve, (2) to prove: *ad*=to, and *probo*=to try, test, . . . to be shown to be good; *probus*=good.] [APPROBATE, PROVE.]

A. Transitive:

I. Ordinary Language:

1. To be pleased with.

(a) More or less formally to express satisfaction with, or liking for, or complacency with regard to any statement, measure, or person.

"His deep design unknown, the hosts *approve*
Atrides' speech."

Pope: Homer's Iliad, bk. ii., 173, 174.

(b) To like, to feel satisfied with, to be pleased with, even when there is no outward or formal expression of such inward complacency.

"He seemed to seek in every eye
If they *approved* his minstrelsy."

Scott: Lay of the Last Minstrel, i. 31.

2. To prove.

†(a) To establish the truth of any proposition by reasoning; to attempt to show that it is worthy to be accepted; hence, to assent to it.

"In religion,
What damned error, but some sober brow
Will bless it, and *approve* it with a text!"
Shakesp.: Merchant of Venice, iii. 2.

†(b) To prove by actual experience; to test, to try, to show, to exhibit.

"... In all things ye have *approved* yourselves to be clear in this matter."—2 Cor. vii. 11. (See also Acts ii. 22; 2 Cor. vi. 4.)

"During the last three months of his life he had *approved* himself a great warrior and politician."—*Macaulay: Hist. Eng.*, ch. xiii.

(c) To commend one's self to another person or being by worthy deeds.

"Study to shew thyself approved unto God, a workman that needeth not to be ashamed."—2 Tim. ii. 15.

II. Technically:

Military Law: The confirmation by a superior officer or functionary of the sentence come to by a court-martial.

"The colonel or commanding officer *approves* the sentence of a regimental court-martial . . . The governor or other commanding officer of the garrison *approves* the sentence [of a garrison court-martial]."—James: *Milit. Dict.*, 4th ed. (1816), p. 141.

B. Intransitive: To express or to feel approbation. (Generally followed by *of*. Milton put an infinitive after it, but this is now obsolete.)

"Avaux listened, wondered, and *approved*."—Macaulay: *Hist. Eng.*, ch. xii.

"Why hast thou, Satan, broke the bonds prescribed To thy transgressions? and disturb'd the charge Of others, who *approve* not to transgress."

Milton: *Paradise Lost*, bk. iv.

ap-prô'ved, *ap-prô-v-ÿd, pa. par. & a.

A. As past participle:

"Chaucer . . . most *approve*d in counsaylinge . . ."—Chaucer: *Melibeus*.

B. As participial adjective:

"Our public hives of puerile resort, That are of chief and most *approved* report."

Cowper: *Tirocinium*.

"Claud. Not to be married, Not to knit my soul to an *approved* wanton."

Shakespeare: *Much Ado*, iv. 1.

ap-prô've-mënt, s. [Eng. approve; -ment.]

I. Ordinary Language:

1. The act of approving, approbation, approval; the state of being approved.

"It is certain that at the first you were all of my opinion, and that I did nothing without your *approvement*."—Hayward.

*2. Improvement. (II., Law, 1.)

II. Law:

1. The improvement of lands by enclosing a portion of them for purposes of cultivation.

"For it is provided by the Statute of Merton, 20 Hen. III., c. 4, that the lord may *approve*, that is, enclose and convert to the uses of husbandry (which is a melioration or *approvement*) any waste grounds, woods, or pastures, in which his tenants have common *appendant* to their estates; provided he leaves sufficient common to his tenants, according to the proportion of their land."—Blackstone: *Comment.*, bk. iii., ch. 16.

ap-prô-v-ër, s. [Eng. approve; -er. In Ger. prüfer; Sp. aprobador.]

A. Ordinary Language:

1. One who approves of any person or thing.

"He that commends a villain is not an *approver* only, but a party in his villainy."—South: *Sermons*, viii. 190.

2. One who makes trial.

"Their discipline, Now mingled with their courage, will make known To their *approvers* they are people, such That mend upon the world."

Shakespeare: *Cymbeline*, ii. 4.

II. One who approves or appeals, that is, confesses a felony, at the same time betraying his accomplices, in the hope of obtaining pardon to himself. The reason why he is called *approver* (in Lat. *probator*=prover) is that he has to prove what he alleges. Any person whom he accuses is called an appellee. It is felony in a jailor to force a man to turn *approver*. (Blackstone: *Comment.*, bk. iv., chaps. 10 and 25.)

" . . . his testimony would have far greater weight with a jury than the testimony of a crowd of *approvers* swearing for their necks."—Macaulay: *Hist. Eng.*, ch. xxi.

ap-prô-v-îng, pr. par. [APPROVE.]

"That, pledged on earth and seal'd above, Grows in the world's *approving* eyes, In friendship's smile and home's caress."

Moore: *Lalla Rookh*; *The Fire-Worshippers*.

ap-prô-v-îng-lÿ, adv. [Eng. approving; -ly.] In a manner to ensure approval.

***ap-prôx-i-mant, a. [In Ital. *aprossimante*; from Lat. *aproximans*, pr. par. of *aproximo*.] [APPROXIMATE, v.] Approaching.**

ap-prôx-i-mate, a. [Lat. *aproximatus*, pa. par. of *aproximo*.]

A. Ordinary Language: Nearest to, next to.

"These receive a quick conversion, containing *aproximate* dispositions unto animation."—Browne: *Vulgar Errors*.

B. Technically:

1. *Math., Chem., Music, and Science generally:* Making a near approach to exactness, but not quite exact. Used with regard to quantities which cannot be ascertained with absolute accuracy.

" . . . the *aproximate* concord of an octave."—Airy: *On Sound* (1868), p. 262.

2. *Zoology:*

(a) In the same sense as No. 1.

"Although hardly one shell, crab or fish is common to the above-named three *aproximate* faunas of Eastern and Western America, and the eastern Pacific islands."—Darwin: *Origin of Species*, ch. xi., p. 348.

(b) *Of teeth:* So arranged in the face as to leave no obvious interstices between them.

ap-prôx-i-mâte, v. t. & i. [From *aproximate*, adj. (q. v.). In Fr. *aproximer*; Port. *aproximar*; Ital. *aprossimare*; all from Lat. *aproximo* (Terullian); *ad*=to, and *proximo*=to approach; *proximus*=nearest, the superl. of *prope*=near.]

A. Trans.: To cause to draw near, to make to approach.

"The favor of God, embracing all, hath *aproximated* and combined all together; so that now every man is our brother, not only by nature, as derived from the same stock, but by grace, as partakers of the common redemption."—Barrow: *Works*, i. 241.

B. Intrans.: To draw near, to approach.

"Among such five men there will be one possessing all the qualifications of a good workman, one bad, and the other three middling, and *aproximating* to the first and the last."—Burke: *Thoughts on Scarcity*.

ap-prôx-i-mâ-tëd, pa. par. & a. [APPROXIMATE, v.]

A. As past participle: Brought near; made to approach.

B. As adjective (Bot., &c.): Near together. (Loudon: *Cycl. of Plants*, Gloss.)

ap-prôx-i-mâte-lÿ, adv. [Eng. *aproximate*; -ly.] So as to draw near or approach, as a calculation which cannot be made with perfect exactness, but to which an approach is practicable.

" . . . prolonged movements of *aproximately* contemporaneous subsidence."—Darwin: *Voyage round the World*, ch. xvi.

" . . . marks of *aproximately* the same shape. . ."—Ibid., *Descent of Man* (1871), pt. ii., ch. xvi.

"In both cases the pressure may be represented at least *aproximately* by the formula."—Prof. Airy: *On Sound*, pp. 19, 20.

ap-prôx-i-mâ-tîng, pr. par. [APPROXIMATE, v.]

ap-prôx-i-mâ-tion, s. [In Ger. & Fr. *aproximation*; Sp. *aproximacion*; Port. *aproximação*; Ital. *aprossimazione*; from Lat. *aproximo*.] [APPROXIMATE, v.]

A. Ordinary Language:

1. The act of approaching; approach, drawing near in any way.

"Unto the latitude of Capricorn, or the winter solstice, it had been a spring; for unto that position it had been in a middle point, and that of ascent or *aproximation*."—Browne: *Vulgar Errors*.

2. The state of being near; nearness, proximity.

" . . . our access to such temptation, whose very *aproximation* is dangerous."—Jeremy Taylor: *Exposition of the Lord's Prayer*.

"In the principal events there is an *aproximation* to an agreement."—Lewis: *Early Rom. Hist.*, ch. xii., pt. i., § 14.

B. Technically:

1. *Geometry, Algebra, Arithmetic, &c.:*

1. *Implying motion toward:* A continued approaching nearer and nearer to a quantity or magnitude which cannot be determined with absolute precision.

2. *Implying rest:* A quantity or magnitude presenting as near an approach as is practicable to the unattainable one. (See 1.)

II. Biol.: An approach in structure, indicating affinity.

"This *aproximation*, also, is more especially marked in the larger development of the innermost of the five digits of the foot in the chimpanzee."—Owen: *Classif. of the Mammalia*, p. 67.

III. Med.: Communication of a disease by contact. *Spec.*, a ridiculous and now obsolete method of attempted cure of a disease by transferring it by contact to an animal, or even a vegetable, placed in the immediate proximity to the diseased person. (Parr.)

IV. Surgery: The bringing of a fractured portion of the skull into immediate and dangerous proximity to the dura mater. (Parr.)

ap-prôx-i-mâ-tive, a. [Eng. *aproximate*; -ive. In Ger. *aproximativ*; Fr. *aproximatif*.] Approaching, containing an approach.

"This statement is, of course, only *aproximative* and subject to modification in detail."—World, N. Y.

ăp-pui' (pui=pwî), ăp-puy' (puy=pwê), s. [Fr. *appui*=support.] Support.

***A. [Of the form *appuy*.] Support. (Scotch.)**

"What *appuy* or of whom shall she have, being forsakes of her own and old friends."—Letters of Lethington, in Keith's *Hist.*, p. 233. (Jamieson.)

B. [Of the form *appui*.] (Eng.)

Technically:

1. *Mil.:* Any particular given point or body upon which troops are formed, or by which they are marched in line or column. This point is called, after the example of the French, the "*point d'appui*." (James: *Military Dict.*)

2. *Horsemanship:* The stay upon the hand of a rider; the horse's sense of the action of the bridle in the horseman's hand.

"A full *appui* is a firm stay upon the hand; and a more than full *appui* is exhibited when a horse is stopped with some suddenness and decision, but still so that he does not force the rider's hand. (Ibid.)

***ăp-pÿlle, s. Old form of APPLE.**

***ăp-pÿl-môÿ, *ăp-pÿl-môçe, *ăp-pÿl-môşe, s. [O. Fr. *appul*=apple, and A. S. *mos*=food.]** A dish in cookery, of which apples appear to have been the principal ingredient. (Boucher & Prompt. Parv.) The following is a recipe for it:—"Take apples, and seeth hem in water; drawe them through a strynour; take almande mylke and honey, and flo'r of rye, saffron and powderfort, and suet, and seeth it stonding (i. e., boil it to so thick a consistence that a spoon or anything of that sort will stand in it)." (Pegge: *Forme of Curry*, No. 79.) (Boucher.)

ăp-pÿlse, s. [In Ital. *appulso*; from Lat. *appulsus*, s.=a driving to; also a landing, . . . an arrival; *appulsus*, pa. par. of *appello*, *appuli*, *appulsum*=to drive to; *ad*=to, and *pello*=to push or strike; to drive.]

***1. Ordinary Language:** A striking against.

"An hectic fever is the innate heat kindled into a destructive fire through the *appulse* of saline steams."—Harvey.

2. *Astron.:* The approach of a planet or a fixed star to the meridian, or to conjunction with the sun or the moon.

"All the stars, it is true, occupy the same interval of time between their successive *appulses* to the meridian or to any vertical circle."—Herschel: *Astron.*, § 143.

ap-pÿl'-sion, s. [Lat. *appulsus*, pa. par. of *appello*.] [APPULSE.] The same as APPULSE (q. v.).

ap-pÿl'-sive, a. [Eng. *appulise*; -ive.] Causing bodies to suffer an appulse.

ap-pÿl'-sive-lÿ, adv. [Eng. *appulsive*; -ly.] In an appulsive manner, so as to cause an appulse.

***ap-pÿr'-chase, v. t. [PURCHASE, v.]** To obtain, to procure. (Scotch.)

" . . . which he *appurchased* by his moyen."

(Pittscottie.) (Jamieson.)

ap-pÿr'-tën-ânçe, *ap-pÿr'-tën-ânçe, s. [O. Fr. *apurtenance*; Fr. *appartenance*; Ital. *appartenenza*. From Lat. *appertinens*, pa. par. of *appertineo*=to belong to; *ad*=to, and *pertineo*=to hold through; to pertain to; *per*=through, and *teneo*=to hold.] That which belongs to any person or thing; that which, though perhaps loosely connected with another thing, still pertains to it, or is a part or an appendage of it. (It is followed by *of* or *to*.) [APPERTAIN and PURTENANCE.]

"Can they, which behold the controversy of divinity, condemn our enquiries in the doubtful *appurtenances* of arts, and receptaries of philosophy?"—Browne: *Vulgar Errors*.

"Come then: the *appurtenance* of welcome is fashion and ceremony . . ."—Shakespeare: *Hamlet*, ii. 2.

" . . . for we see globes, astrolabes, maps, and the like, have been provided as *appurtenances* to astronomy and cosmography, as well as books."—Bacon: *Advanc. of Learn.*, bk. ii.

ap-pÿr'-tën-ânt, ăp-pÿr'-tîn-ënt, a. & s. [O. Fr. *apurtenaunt*; Fr. *appartenant*; from Lat. *appertinens*, pr. par. of *appertineo*=to belong to.] [APPURTENANCE.]

A. As adjective: Pertaining to, belonging to.

B. As substantive: That which belongs to a person or thing; an appurtenance.

"You know how apt our love was to accord, To furnish him with all *appertinents* Belonging to this honor."

Shakespeare: *Henry V.*, ii. 2.

a-pră-și-a, s. [Gr. *aprasia*=want of purchasers; a, priv., and *pipraskō*=to sell.] A genus of lizards belonging to the family Gymnophthalmidae. The extremities are almost entirely wanting. The *A. pulchella*, the only species, inhabits Australia.

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pîne, pît, sîre, sîr, marîne; gô, pôt, or, wöre, wôlf, wôrkh, whô, sôn; mûte, cûb, cûre, unite, cûr, râle, füll; trÿ, Sÿrian. æ, œ = ē; ey = ā. qu = kw.

řap-ři-câte, *v. i.* [Lat. *apricor* and *aprico*, *v. t.*, from Lat. *apricus*. In Ital. *aprico* = (1) open, uncovered, (2) sunny.] To bask in the sun.

"Positively not sunning, but mooning himself—*apricating* himself in the occasional moonbeams." — *De Quincey: Works* (ed. 1863), vol. ii., p. 229.

řap-řiç-i-tř, *s.* [Lat. *apricitas*.] Sunshine.

řap-ři-côt, ***řa-brři-côck**, ***řab-ři-côt**, ***řap-ři-côck**, *s.* [In Ger. *abricose*; Fr. *abricot*; Arm. *brigosen*; Wel. *bricyllen*; Sp. *albaricoque*; *albar* = white; Ital. *albicocca*; Lat. *albus* = white, and *cocum* = a berry; Gr. *kokkos* = a kernel.] In Dioscorides *praiokokion*. From Lat. *præcoquis*, *præcoquus*, or *præcox* = early ripe.] A fruit—that of the *Prunus armeniaca*; also the tree on which it grows. It is not settled that it came, as the Latin specific name would imply, from Armenia. It is wild in Africa and in the Caucasus, where the mountains in many places are covered with it; it is found also in China and some other countries. It is esteemed only second to the peach.

"Gard. Go, bind thou up yon dangling *apricocks*."

Shakesp.: King Richard II., iii. 4.

"And Basra dates, and *apricots*,
Seed of the sun, from Iran's land."

Moore: L. R.: The Light of the Haram.

apricot-color, *a.* [In Lat. *armeniacus*.] Yellow, with a perceptible mixture of red. (*Lindley: Introd. to Bot.*)

apricot-tree, *s.* [Eng. *apricot*; tree. In Ger. *abricosenbaum*; Fr. *abricotier*; Ital. *albicocco*.] [APRICOT.] The tree on which the apricot grows.

řA-prřil, *s. & a.* [In Sw., Dan., Dut., & Ger. *April*; Fr. *Avril*; Irish *Abrail*; Gael. *Giblean*; Corn. *Ebril*; Wel. *Ebrill*; Sp. & Port. *Abril*; Ital. *Aprile*; Lat. *Aprilis*. Generally regarded as a contraction of *aperilis*; from *aperio* = to open. Opening month; the month in which plants open. But Sir Cornewall Lewis says: "The derivation of *Aprilis* from *aperire* overlooks the fact that with a year of 304 days, April would not always have been a spring month." Another etymology connects it with *aphros* = foam, from which Venus, to whom the month was sacred, was said to have sprung.] [APHRODITE.]

A. As substantive:

1. *Lit.*: Now the fourth month of the year, though when Aprilis was first introduced into Rome by the mythic Romulus it was the second. The Anglo-Saxons called it Easter-monath = Easter month. During April the sun is technically said to pass through Aries and Taurus, but the precession of the equinoxes makes him really traverse portions of Pisces and Aries.

"'Twas April, as the bumpkins say,
The legislature called it May."

Cowper: A Fable.

2. *Fig.*: The commencement of love; the spring-tide of affection.

"Ant. The April's in her eyes: it is love's spring,
And these the showers to bring it on."

Shakesp.: Ant. and Cleop., iii. 2.

"Sweet April! many a thought
Is wedded unto thee, as hearts are wed:
Nor shall they fail till, to its autumn brought,
Life's golden fruit is shed."

Longfellow: An April Day, st. 8.

B. As adjective:

1. *Lit.*: Belonging to the fourth month of the year.

"Oh, how this spring of love resembleth
The uncertain glory of an April day;
Which now shows all the beauty of the sun,
And by and by a cloud takes all away!"

Shakesp.: Two Gentlemen of Verona, i. 3.

2. *Fig.*: Promising warmth.

"... men are April when they woo, December when they wed." — *Shakesp.: As You Like It*, iv. 1.

April-fool, *s.* One sent upon a bootless errand, or otherwise made a fool on the 1st of April.

April-fool-day, *s.* The first day of April. [ALL-FOOLS'-DAY.]

"I do not doubt but it will be found that the balance of folly lies greatly on the side of the old first of April; nay, I much question whether infatuation will have any force on what I call the false April-fool-day." — *The World*, No. 10.

řa-prři-ř-r-l, *used as adj. or adv.* [Latin, literally = from that which is before. The *a*, though really Latin, is generally marked *ř*, as if it were French.]

†1. *Logic*: [A method of reasoning forward from an hypothesis to its legitimate consequence, or from a known or imagined cause to an effect. It is essentially the same as deduction, while the *řa posteriori* method is the equivalent of induction. A *řa priori* reasoning is quite trustworthy in mathematics; for the data being hypothetical, error cannot arise if the ratiocination be properly conducted. In metaphysics, intuitions assumed as the starting-point for reasoning rest on an *řa priori* foundation. In natural theology we reason *řa priori* when we infer the divine origin of the universe from the theory of an intelligent Creator; we reason *řa poste-*

riori when we infer the existence of an intelligent Creator from the works of creation. [A POSTERIORI, DEDUCTION, INDUCTION.]

"Thus the conception of the decomposition of compound molecules by the waves of æther comes to us recommended by *řa priori* probability." — *Tyndall: Frag. of Science*, 3d ed., x.

2. *Ord. Lang.*: Prior to investigation; before thinking seriously of a question.

***řa-prři-se**, *v. t.* [Fr. *pris*, pa. par. of *prendre* = to take, to seize.] To take.

"The riche prince was there *aprised*,
He suffred to be circumcised."

Festivals of the Church (ed. Morris), 230-31.

***řa-prři-se** ***řa-prři-se**, *s.* [O. Fr. *emprise* = an enterprise.] An enterprise.

"For Alisaunder's gret *aprise*."

Alisaunder, 353. (*Boucher*.)

"Hyt war a fayr *apryse*."

Lyl Discon, 1,596. (*Boucher*.)

řa-prřon, ***řa-përn**, ***řa-prřon** (Eng.), **řa-p-përn** (N. of Eng.), *s.* [In Gael. *aparan*, *aparran*; Ir. *aprun* (these three are from the English); Fr. *napperon* = a small tablecloth, put over the great one, to protect the latter from stains (*Litttré*); *nappe* = a tablecloth; Old Fr. *naperon*, which Wedgwood, partly following Roquefort, considers to be the intensive of *nape* = a cloth, as *napkin* is the diminutive; Old Fr. *apronnaire* = a woman's apron; *apponier* = a blacksmith's apron. Low Lat. *nappa*, *nappa* = napkin. Thus, *n* is now missing from the word apron, arising from the false division of the article and the noun; thus a *napron* was incorrectly written an *apron*. Cf. *adder*.] [NAPERY.]

A. Ordinary Language:

1. A cloth, a piece of leather, or anything similar, tied round the waist, and hanging down before —

(a) To keep the clothes clean while work is being done.

"Prince. How might we see Falstaff, and not ourselves be seen?"

Poins. Put on two leather jerkins and aprons, and wait upon him at his table as drawers." — *Shakesp.*: 2 Hen. IV., ii. 2.

Or (b) for delicacy.

"... and they sewed fig-leaves together, and made themselves aprons." — *Gen.* iii. 7.

2. A piece of leather, oil-cloth, or similar material used to shield persons riding in vehicles in stormy weather.

3. *The apron of a goose*: The fat skin covering the belly of a goose.

B. Technically:

1. *Gunnery*: A square plate of lead, placed over the touchhole of a cannon, to preserve it clean and open, and keep the powder inside dry. (*Dyche, James, &c.*)

2. *Naval Architecture*:

(a) A piece of curved timber fixed immediately above the foremost end of the keel.

(b) A platform raised at the entrance of a dock, against which the dock-gates are shut.

8. *Mech.*: The piece that holds the cutting tool in a planing machine. (*Goodrich & Porter*.)

4. *Plumbing*: A strip of lead which leads the drip of a wall into a gutter: a *flashing*.

apron-lining, *s.*

House Carpentry: The cover of the apron-piece (q. v.).

apron-man, *s.* A man wearing an apron; a term, designed to be somewhat contemptuous, for an artisan.

"You have made good work,
You, and your apron-men." — *Shakesp.: Coriol.*, iv. 6.

řa-prřon, *a.* [Eng. *apron*; -ed.] Wearing an apron. (*Pope: Essay on Man*, iv. 197.)

***řa-prřon-eër**, *s.* [Eng. *apron*; -eer.] A tradesman. Contemptuously applied by the Cavaliers to the Parliamentarians. (*D'Urfey: Collin's Walk*, iii.)

řapropos (řa-prřo-pō), *adv. & adj.* (Fr. *ř*, and *propos* = (1) a thing said in conversation, (2) speech, (3) purpose, design, (4) *pl.*, idle talk.

A. As adverb:

1. Opportunely, seasonably, by the way.

2. As bearing upon the subject, as suggested by; by the way. (See example under B. 2.)

† Frequently followed by *ř*; as, *řapropos of this, &c.*

B. As adjective:

1. Opportune, seasonable.

2. Appropriate, bearing on the matter in hand; to the point.

"Our Friend Dan Prior told (you know)

A tale extremely *řapropos*."

Pope: Imitations of Horace; Sat. vi. 153-4.

řapse, řa-prř-sis (pl. řa-prř-si-dëř or řa-prř-sëř), *s.* [In Ger. *apside*; Fr. *apside* (Arch.), *apside* (Astron.); Sp. & Port. (pl.) *apsides* (Astron.); Ital. *apside*; Lat. *absis*, genit. *absidis*; or *apsis*, genit. *apsidis*, Gr. *hapsis* = Ionic *apsis* = (1) a joining, a fastening, (2) the felloe of a wheel or the wheel itself; hence, also, a bow, an arch, a vault; *haptō* = to fasten or bind to.]

† I. *Carriage Building*: The felloe or exterior rim or circumference of a wheel. (See etym.)

II. *Architecture*:

1. *Gen.*: The arched room of a house, an oven, &c.

2. *Specially*:

(a) A semi-circular or polygonal and generally dome-roofed recess in a building. Several apses exist in some mediæval churches, the episcopal throne being against the center of the wall of one, the principal altar in front of a second, and smaller altars in others. They exist also in the temples of antiquity. (*Gloss. of Architecture*.)

Apsæ.

(b) The bishop's seat or throne, called also *Exedra* and *Tribune*.

III. *Art.*: A reliquary or case in which the reputed relics of saints were placed.

IV. *Astron.* [See APSIDES.]

řa-prř-si-dal, *a.* [Lat. *apsidis*, genit. of *apsis*; and Eng. suffix *-al* = pertaining to.] [APSE.]

1. Pertaining or relating to an architectural apse or apsis.

"Gloucester Cathedral crypt, with aisle and three radiating *apsidal* chapels." — *Gloss. of Arch.*, p. 29.

2. Relating to the apsides of the moon or of the primary planets.

řa-prř-si-dëř, *s. pl.* The plural of APSE or APSIS (q. v.).

I. *Generally*:

II. *Technically (Astron.)*: The two points in the elliptic orbit of a planet where it is at the greatest and at the least distance respectively from the body around which it revolves. The moon moving in an elliptic orbit around the earth, which is situated in one of the foci, is at what was anciently called its higher apse when it is in apogee, and at its lower one when it is in perigee. Similarly, the primary planets, including the earth and comets, moving in elliptic orbits around the sun, which is situated in one of the foci, pass through their higher apse when they are in aphelion, and their lower one when in perihelion. It is the same with the satellites of Jupiter when they are in apoiove and periove.

Line of the apsides: The line connecting the two apsides of a primary or secondary planet. Were it not for a motion of the apsides, it would exactly coincide with the major or longer axis of the ellipse. Let A D B be the orbit of the moon, of which the eccentricity has been purposely exaggerated, and let c be the earth; then A and B are the two lunar apsides.

Progression of the moon's apsides: A slow movement in the position of the apsides of the moon, produced by the perturbing attraction of other heavenly bodies. It is about 3°

of angular motion in one revolution of the moon, and in the same direction as her progression in her orbit. The apsides of the primary planets are also to a certain extent perturbed.

Revolution of the moon's apsides: The movement of the apsides around the entire circumference of the ellipse, which takes place in 3232'5753 mean solar days, or about nine years.

Libration in planetary apsides: A movement sometimes forward and sometimes backward in the apsides of Venus and Mercury, from perturbations caused by other heavenly bodies.

āp'-sis, s. [APSE.]

āpt, āpte, a. [In Fr. *apte*; Sp. & Port. *apto*; Ital. *atto*. From Lat. *aptus*=(1) fitted or attached to; (2) bound or tied together, connected; (3) suitable: *apto*=to fit; Gr. *haptō*=to fasten or bind to; Sansc. *āp*=to go to, to obtain.]

¶ Not used in the first or second senses of the Lat. *aptus*, but only in the third or figurative one.

I. Fit, suitable, proper.

"Long frieze mantles, resembling those which Spenser had, a century before, described as meet beds for rebels and apt cloaks for thieves . . ."—*Macaulay; Hist. Eng.*, ch. xii.

II. Having a tendency to.

1. *Of things:* Liable to.

"Things natural, as long as they keep those forms which give them their being, cannot possibly be apt or inclinable to do otherwise than they do."—*Hooker*.

2. *Of persons:* Having a disposition to, prone to, inclined to. (Used of persons.)

III. Quick, ready.

"I have a heart as little apt as yours."

Shakesp.: Coriol. iii. 2.

IV. Qualified for; with a natural genius, or acquired skill and knowledge for, or both.

"Apt to teach."—1 *Tim.* iii. 2; 2 *Tim.* ii. 24.

***apt-tinding, a.** [Eng. *apt*; A. S. *tendan, tyndan*=to tind, to set on fire.] Having a tendency to ignite.

"Incessantly th' apt-tinding fume is tost
Till it inflame."

Sylvester's Du Bartas. (Wright: Dict. Obs. & Prov. Eng.)

***āpt, v. t.** [From the adjective. In Port. *aptar*; Lat. *apto*.]

***I. Lit.:** To place in close proximity to, as if fitted or adjusted to.

"They sit so apted to her."—*Beaum. & Flet.* (1647).

II. Figuratively:

1. To suit, to adapt, to fit.

"We need a man that knows the several graces
Of history, and how to apt their places."

Ben Jonson.

"Delivers in such apt and gracious words
That aged ears play truant at his tales."

Shakesp.: Love's Labor's Lost.

2. To dispose, to prepare.

"The king is melancholy,
Apted for any ill impressions."

Denham: Sophy.

***āpt'-a-ble, a.** [Eng. *apt*; -able.] That may be adapted.

***āp-tāte, v. t.** [Lat. *aptatus*, pa. par. of *aptor*=to be made fit.]

Astrol.: To render apt, fit, or suitable.

"To aptate a planet is to strengthen the planet in position of house and dignities to the greatest advantage, in order to bring about the desired end."—*Bailey*.

***āp-tēd, pa. par.** [APT, v.]

āp-tēn-ō-dy'-tēs, s. [(1) Gr. *aptēn*=(1) unfledged, (2) unable to fly: *a*, priv., and *ptēnos*=feathered, winged; *ptēnai*, aor. inf. of *petomat*=to fly; (2) *duēs*=a diver; *duō*=to enter, to plunge into.]

Ornith: A genus of swimming birds, classed by some under the family Alcidae, and by others under that of Spheniscidae. It contains the penguins of the Southern hemisphere. Their wings are rudimentary, with only vestiges of feathers, and their feet so far behind that when on shore they have to sit or stand bolt upright. When pursued, however, they can manage to make way quickly by using their wings as an anterior pair of legs. The water is their natural element, in which they live, and they move in it with much agility. They are web-footed diving birds. Example, *A. Patagonica*, a species as large as a goose, seen standing in large flocks on barren shores near the Straits of Magellan, and here and there as far as New Guinea.

āp-tēr-a, s. pl. [Neut. plur. of Gr. *apteros*=wingless: *a*, priv., and *pteron*=a wing; *petomat*=to fly.]

Zool.: Linnæus's name for his seventh and last order of Insecta. This order contained a heterogeneous assemblage of six-footed insects proper—spiders, crabs, and centipedes. Any entomologists who now retain it limit it to the wingless orders of

insects proper—the Anoplura, the Mallophaga, the Thysanura, and the Aphaniptera, which, however, are now not placed in a single category, owing to the fact that the Aphaniptera differ from the rest in undergoing metamorphosis.

āp-tēr-āl, a. [In Fr. *aptère*; Port. *aptero*. From Gr. *apteros*=wingless.] [APTERA.]

†1. (Lit.) **Zool.:** Without wings like those of a bird or insect.

2. (Fig.) **Arch.:** Not having columns on the sides. (Used of temples or similar buildings.)

āp-tēr-āns, s. pl. [APTERA.] The English equivalent for APTERA (q. v.).

āp-tēr-ō-nō-tūs, s. [Gr. *apteros*= . . . finless, and *notos*, or *nōton*=the back.]

Zool.: A genus of American fishes of the Eel family. They have on their back not a fin, but a soft, fleshy filament couched in a furrow. They have an affinity to Gymnotus.

āp-tēr-oūs, a. Gr. *apteros*=wingless. In Fr. *aptère*; Port. *aptero*.] [APTERA.]

1. **Zool.:** Wingless.

"Cuvier and Latrille divide the Apterous insects into three tribes: the Suctoria (Fleas); the Parasita (Lice), and the Thysanoura."—*Owen: Invertebrata*, Lect. xvi.

2. **Bot.:** Without membranous, wing-like expansions. *Loudon: Cycl. of Plants; Gloss.*

āp-tēr-yg'-ī-dæ, s. pl. [APTERYX.]

Zool.: A family of Cursorial Birds, with some affinities to the Struthionidae, or Ostriches, but differing in their lengthened bill, their short legs, their possession of a short hind toe with a strong claw, and finally by their wings being quite rudimentary.

āp-tēr-yx, s. [Gr. *a*, priv., and *pteryx*, genit. *pterygos*=a wing.]

Zool.: A genus of birds, the typical one of the family Apterygidae. Two species are known—the *A. australis* and *A. Mantelli*, both from New Zealand. The natives call the former, and probably also the latter, Kiwikiwi, which is an imitation of

Apteryx.

their peculiar cry. The *A. australis* is somewhat less in size than an ordinary goose. It runs when pursued, shelters itself in holes, and defends itself with its long bill; but unable as it is to fly, its fate, it is to be feared, will soon be that of the dodo—it is now almost extinct.

***āp-thāne, s.** Another spelling of ABTHANE. (Scotch.)

āp-tī-tūde, s. [In Fr. *aptitude*; Sp. *aptitud*; Port. *aptidao*; Ital. *attitudine*; Lat. *apto*=to fit; *aptus*=fit.]

1. Fitness, suitableness, adaptation. *Used—*

(a) *Of things:*

"The mutual aptitude of seed and soil."

Wordsworth: Excursion, bk. v.

(b) *Of persons:* Competence for, natural genius or acquired skill for learning or for doing any particular thing.

" . . . he seems to have had a peculiar aptitude for the management of irregular troops."—*Macaulay: Hist. Eng.*, ch. xii.

2. Tendency toward, proneness to. (Used of man and other animated beings, as well as of things inanimate.)

"The aptitude of the Cheiroptera, Insectivora, and certain Rodentia to fall like Reptiles into a state of true torpidity . . ."—*Owen: Classif. of the Mammalia*, p. 34.

***āp-tī-tū-dīn-āl, a.** [From Eng. *aptitude*.] Possessing aptitude for.

***āp-tī-tū-dīn-āl-ly, adv.** [Eng. *aptitudinal*; -ly.] In an aptitudinal manner.

āpt-ly, adv. [Eng. *apt*; -ly.]

1. Fitly, suitably; with proper adaptation, correspondence, or connection.

"In his wild notes seem aptly met

A strain of pleasure and regret."

Scott: Rokeby, ii. 29.

2. Pertinently, justly.

"Irenæus very aptly remarks, that those nations who were not possessors of the gospels, had the same accounts of our Saviour which are in the Evangelists."—*Addison*.

3. Quickly, readily. (*Johnson*.)

āpt'-nēss, s. [Eng. *apt*; -ness.]

1. Fitness, suitableness.

"The nature of every law must be judged of by the aptness of things therein prescribed, unto the same end."—*Hooker*.

2. Tendency. *Used—*

(a) *Of things inanimate:*

"Some seeds of goodness give him a relish of such reflections as have an aptness to improve the mind."—*Addison*.

(b) *Of animated beings:* Propensity, proneness.

" . . . their aptness to superstition."—*Jeremy Taylor: Of the Decalogue. Works* (ed. 1839), vol. iii., p. 14.

3. Quickness, readiness.

"What should be the aptness of birds in comparison of beasts to imitate speech? may be enquired."—*Bacon*.

āp-tōte, s. [Lat. *aptota*, neut. plur.; Gr. *aptōta*, neut. pl. of *aptōtos*, adj.=without cases: *a*, priv., and *ptōsis*=(1) a falling, (2) a case; *peptōka*, 2 perf. of *ptōō*=to fall.]

Grammar: A noun "without cases," that is, an indeclinable noun.

āp-ty'-chūs, s. [Gr. *a*, priv., and *ptuchos*, genit. of *ptux*=a fold, leaf, layer, or plate.]

Palæont.: A fossil body now regarded as the operculum of Ammonites (q. v.). Before their nature was understood they were called Trigonelites, Lepadites, and various other names.

ā-pūs, s. [Gr. *apous*=footless, without feet: *a*, priv., and *pous*=a foot.]

1. **Zool.:** A genus of Entomostracans, the typical one of the family Apodidae. They have the carapace of one piece, and completely enveloping the anterior part of the animal. Though the name implies that they are footless, yet they have about sixty pairs of feet.

2. **Astron.:** One of Lacaille's twenty-seven Southern constellations. Its English name is "the Bird of Paradise," that animal being once erroneously supposed to be destitute of feet. [PARADISE.]

āp-ŷ-rēt'-ic, a. [In Fr. *apyretique*; Gr. *a*, priv., and *puretikos*=feverish; *puretos*=burning heat, . . . fever; *puressō*=to be feverish, to be in a fever; *pur*=fire . . .] Free from fever.

āp-ŷ-rēx-y, āp-ŷ-rēx'-ī-a, s. [In Fr. *apyrexie*; Port. & Mod. Lat. *apyrexia*; Gr. *apurexia*; *a*, priv., and *puressō*.] [APYRETIC.] The intermission or the abatement of a fever.

āp-ŷ-rite, s. [In Ger. *apyrit*; Gr. *apuros*=without fire: *a*, priv., and *pur*=fire; Eng. suffix -ite, denoting quality.]

Min.: An unimportant variety of Tourmaline not now retained.

āp-ŷ-roūs, a. [In Fr. *apyre*; Lat. *apyros*; Gr. *apuros*=without fire: *a*, priv., and *pur*=fire. Incombustible; not able to be altered by the greatest amount of heat to which, in the present state of scientific knowledge, it can be subjected.

¶ An *apyrous* body is not the same as a *refractory* one. In the former the heat produces no perceptible change; while the latter may be in various ways altered, though not fused.

aqua supercarbonatis sodæ. Water of supercarbonate of soda.

aqua tofana. [From an infamous Italian woman called Tofana, who lived about the middle of the seventeenth century, and is said to have poisoned more than 600 people by means of a deadly preparation she had discovered. A preparation in which the main ingredient is crystallized arsenic in solution. Modern chemistry very easily detects the presence of arsenic in the stomach and intestines of one poisoned by it, and renders the rise of a second Tofana all but impossible.]

aqua vegeto-mineralis. Vegeto-mineral water.

aqua vitæ. [Lit.=water of life. In Dan. *aqua rit*.] A term applied to distilled spirits by its votaries, to indicate their belief that it has the power of imparting life to those who worship with sufficient frequency at its shrine. The same creed was held by those who first coined the words *Whiskey*, *Usquebaugh*, *Eau de Vie*, and *Geneva* (q. v.). Some extend the term *aqua vitæ* to spirits of wine and brandy, while others apply it to spirituous liquor distilled from malt, as contradistinguished from brandy, which they limit to liquor procured from wine or the grape.

"Alas! alas!—Help! help! my lady's dead!—

O, well-a-day, that ever I was born!

Some *aqua vitæ*, ho! My lord! my lady!"

Shakesp.: *Romeo and Juliet*, iv. 5.

A-quâ'r-i-ang, A-quâ'r-i-i, s. pl. [Lat. *aquarii*, from *aquarius*=of or relating to water; *aqua*=water.]

Church Hist.: Christians in the primitive church who used water instead of wine in the Lord's Supper. Some of them did so from holding sentiments like those now entertained by total abstainers, while others, employing wine at the evening communion, used water in the morning one, lest the smell of wine might betray their assemblies to persecuting foes.

a-quâ'r-i-üm, s. [Lat.=a watering-place for cattle; *aqua*=water.] An artificial tank, pond, or vessel, filled with salt or fresh water, and used, in the former case chiefly for the purpose of keeping alive marine animals in circumstances which render it easy to study their habits, and in the latter for cultivating aquatic plants. The most wonderful aquarium in the world was that of the Fisheries department of the World's Columbian Exposition held in Chicago in the summer of 1893.

A-quâ'r-i-üs, s. [In Sp., Port., & Ital. *Aquario*; from Lat. *aquarius*= (1) a water-carrier, (2) an inspector of conduits or water-pipes, (3) a constellation. (See 1 & 2.) From *aquarius*=of or relating to water.]

In Astronomy:

1. The eleventh of the twelve ancient zodiacal constellations, now generally called *signs of the zodiac*. It is generally quoted as "Aquarius, the Water-bearer."

2. A division of the ecliptic—that between 300° and 330° of longitude, which, on account of the precession of the equinoxes, has gradually advanced from the constellation Aquarius, once within those limits. The sun enters this part of his course about the 21st of January, at which time there are generally copious rains in Italy, whence the name Aquarius = the water-bearer or waterman. (Herschel: *Astron.*, §§ 380, 381.) It is marked thus ☿.

"A constellation in the watery sign,
Which they *Aquarius* call."

Cleveland: *Poems*, &c., p. 17.

ā'-qua-tint, **ā'-qua-tin'-ta**, *s. & a.* [In Ger. *aquatinta*; Fr. *aqua-tinta*, *aqua-tinte*; Lat. *aqua*=water, and Ital. *tinta*=a dye, a tincture.]

A. As substantive: A kind of engraving, so called from its resemblance to water-color drawings. The most approved method of practicing it is to first trace the outline of the proposed picture on a copper-plate by means of an etching needle or other sharp instrument. Next, the etching ground is removed, and the plate thoroughly cleaned with whitening and water. The plate is then placed in a flat tin or earthen vessel in an inclined position, and on it is poured a solution of resinous matter, prepared in rectified spirits of wine. When dry, the design is drawn upon it with the bursting-ground [BURSTING-GROUND], and the plate is varnished and dried. Some clear water is then applied to it, and finally, the design is bit into the copper by two successive applications of dilute nitric acid.

B. As adjective: Pertaining to the kind of engraving now described.

"... method of producing the *aquatint* ground."—*Rees: Cyclop. ii.*, "*Aquatinta*."

duit raised on pillars for the conveyance of drinking water to a city. Of all the nations of antiquity, the Romans were the great builders of aqueducts. No fewer than twenty of these erections converged on the capital during its palmy days; while there were many more in the provincial parts of the empire. Magnificent ruins of some of these still remain, the best of them in the Campagna around Rome; the others, in portions of France, Spain, Italy, Sicily, Greece, Asia, and Africa, once occupied by important cities and towns.

Appius Claudius Cæcus, while censor, advised and constructed the first Roman aqueduct, as well as the *Appian way*, about 312-308 B. C. There are now some remarkable aqueducts in Europe: that at Lisbon is of great extent and beauty; that at Segovia has 129 arches; and that at Varsailles is three miles long, and of immense height, with 242 arches in three stories. The stupendous aqueduct on the Ellesmere canal, in England (1007 feet in length, and 126 feet high), was completed by T. Telford, and opened Dec. 26, 1805. The Lisbon aque-

duct was completed in 1738, and the Croton aqueduct, near New York, was constructed between 1837 and 1842. The aqueduct to supply Marseilles with water was commenced in 1830. An aqueduct to supply London with water from the Welsh lakes was proposed by Mr. J. F. Bateman in 1865. The Washington Aqueduct was founded in 1856, and has cost about \$3,500,000. It collects the Potomac water by a line of stone dams at the Great Falls, and conducts it to Washington by an aqueduct sixteen miles in length, or eleven miles from the Great Falls of the Potomac to the distributing reservoir, and five miles from the latter to the capital. Its capacity is about 70,000,000 gallons per day. On the line of this work are eleven tunnels and six bridges, the chief of which is over Cabin John Creek, a stone structure 100 feet in height, and having a single span of 220 feet.

B. (Chiefly of the form aqueductus):

A. cochlea, the aqueduct of the cochlea. [**COCHLEA**.] A funnel-shaped canal in the ear. It leads to the jugular fossa, and is supposed to afford a passage for a small vein. (*Todd & Bowman, Physiol. Anat.*, vol. ii., pp. 74, 75.)

A. Fallopii, the aqueduct of Fallopius. A channel in the ear near the tympanum. (*Ibid.*, vol. ii., p. 70.)

A. Sylvii, the aqueduct of Sylvius. A channel in the brain, connecting the third and fourth ventricles. (*Ibid.*, vol. ii., p. 289.)

A. vestibuli: A canal running from the vestibule of the internal ear to the posterior surface of the pars petrosa of the temporal bone.

ā'-quē-ōūs, *a.* [In Fr. *aqueux*; Sp., Port., & Ital. *aqueo*; from Lat. *aqua*=water.]

A. Ordinary Language:

1. Consisting wholly or in large measure of water. [**B. 1.**]

2. Made by the addition of water.

3. Deposited from water. [**B. 4.**]

B. Technically:

1. **Meteorol. Aqueous vapor:** The water which, on evaporating from the earth, goes to constitute clouds.

"The leaves of the plants absorb both the carbonic acid and the aqueous vapor of the air."—*Tyndall: Frag. of Science*, 3d ed., iv. 87.

2. **Anat. Aqueous humor:** A humor of the eye filling up the space between the cornea and the crystalline lens. It is partially divided by the iris into an anterior and posterior chamber. The former is the larger, and has the cornea in front, the iris behind, and a portion of the ciliary ligament on its circumference.

"The aqueous humor of the eye consists very nearly of water. Berzelius states that all its other constituents taken together do not amount to so much as one-fiftieth part of the whole. Of these, more than half is chloride of sodium, and the rest is extractive matter, soluble either in water or alcohol."—*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 36.

3. **Chem.** [**A. 2.**]

4. **Geol. Aqueous rocks:** Rocks originally deposited from water, whence they are sometimes called *aqueous deposits*. As what is deposited is sediment of some one kind or other, they are also termed *sedimentary rocks*, and as, unless too much metamorphosed, they contain the now fossilized remains of the animals which lived in the water, and the plants which grew or were carried into it, they are denominated *fossiliferous rocks*. Finally, as the sediment successively deposited from the water tended to arrange itself in layers or strata, the rocks

thus formed are called *stratified rocks*. (*Lyell Geology.*) A great part of the science of geology has been built up on the careful study of aqueous rocks, the relative order of their disposition, and their fossil contents.

ā-quif'-fō-lī-ā'-cē-æ, *s. pl.* [Lat. *aquifolia*, *aquifolium*.] Hollyworts. An order of monopetalous plants ranked by Lindley under his Gentianall Alliance. It consists of trees or shrubs with coriaceous leaves, small axillary flowers, and fleshy indehiscent fruit with from two to six seeds. The common holly, *Ilex aquifolium*, is the type of the order. In 1846 Lindley estimated the number of known species at 110.

ā-quif'-fō-lī-ūm, *s.* [Lat. *aquifolium*, or *aquifolia*=the holly-tree, or the Scarlet Holm (*Ilex aquifolium*); *aquifolius*, *adj.*=having pointed leaves.] A plant-genus from which the Holly order is called *Aquifoliaceæ*. (Now ranked under *Ilex*.)

ā'-quif'-orm, *a.* [Lat. *aqua*=water, and *forma*=form, shape.] In the form of water.

āq'-uīl-ā (**āq'-uīl**=**āk'-wīl**), *s.* [Ital. & Lat. *aquila*=an eagle, perhaps from the root *ac*=sharp, swift.]

1. **Zool.**: A genus of rap-torial birds, the typical one of the Aquilinæ, or Eagle, a sub-family of Falconidæ. The species have not that strong tooth in their bills which the falcons possess, and are feeblers for their size, less courageous and less predatory than the falcons proper. Two species occur in England, the *A. chrysaetos*, or Golden Eagle, and the *A. naevia*, or Spotted Eagle. [**EAGLE**.]

2. **Astron.**: One of the twenty ancient Northern constellations. Within it is included also the constellation Antinous, the only one of forty-eight recognized by the ancients which modern astronomers have merged in another one. [**ANTINOUS**.]

āq'-uīl-ār-ī-ā (**āq'-uīl** as **āk'-wīl**), *s.* [From Lat. *aquila*=an eagle.] [**AGALLOCH**.] A genus of plants, the typical one of the order Aquilariaceæ (q. v.). Aloes-wood, Agila-wood, or Eagle-wood, is the inside of the trunk of the *Aquilaria ovata*, and *A. Agallocha*. [**ALOES-WOOD**, **AGILA-WOOD**.]

āq'-uīl-ār-ī-ā'-cē-æ (**āq'-uīl**=**āk'-wīl**), *s. pl.* [**AQUILARIA**.] An order of plants classed by Dr. Lindley under his Rhamnales, or Rhamnal Alliance. They have the calyx turbinate or tubular, with its orifice furnished with ten or five bearded scales, which are really stamens. Corolla, 0; stamens, ten or five, in the latter case opposite the segments of the calyx; style, 0, or conical and thread-shaped; stigma, large, simple; ovary, superior, one-celled; seeds, one on each placenta, or one abortive. Trees with alternate entire shining leaves without stipules. Habitat, the East Indies. In 1847, Dr. Lindley estimated the known species at ten.

āq'-uīl-āte (**āq'-uīl**=**āk'-wīl**), *v. t.* [From Lat. *aquila*=an eagle.]

Her.: To adorn with eagles' heads. (Used chiefly, if not exclusively, in the *pa. par.*)

ar'-a-bā, s. [Hindustani, &c.] A wheeled carriage, a gun-carriage, a kind of cart used in Eastern journeys or campaigns.

ar-a-bā'-tā, s. [Native name.] An American monkey (*Myctes stramineus*).

Ār-a-bēs'que (que=k), ***Ār-a-bēs'k'**, s. & adj. [As substantive: In Dut. *Arabesken* (pl.); Ger. *Arabeske* (sing.); Fr. *Arabesque* (sing.); Port. *Arabescos* (pl.); Ital. *Arabesco*, *Rabesco* (sing.); terms all implying that the style of ornamentation so designated originated with the Arabs, whereas it seems to have sprung up first among the Romans.]

A. As substantive:

Arch.: A style of ornamentation in which are represented men, animals (the latter consisting of mythic as well as actual forms); plants, with leaves, flowers, and fruit; mathematical figures, &c.; the whole put together in a whimsical way, so that, for instance, the animals not merely rest upon the plants, but grow out of them like blossoms. There are three kinds of Arabesque:—1st (and oldest), that of the Romans, without the animals. They occur in the mural paintings at Pompeii, Herculaneum, and other places. 2d. That of the Arabs, also without the animals. This is well seen in the Alhambra. 3d. The Christian Arabesque, with the figures introduced. It appears in illuminated medieval manuscripts and elsewhere.

Arabesque Panel.

B. As adjective (in Fr. *Arabesque*.)

†1. *Gen.*: Pertaining to Arabia or its inhabitants.

"Though a follower of the Arabian school, the assiduity with which he [Achillini] cultivated anatomy has rescued his name from the inglorious obscurity in which the Arabesque doctors have in general slumbered."—*Ency. Brit.*, 7th ed., ii. 756.

2. *Spec.*: Consisting of, or pertaining to, the kind of ornaments called Arabesques. [See A., as substantive.]

"A kind of ornament, which may be called Arabesque, was much used in the domestic architecture of this country in the sixteenth and seventeenth centuries."—*Gloss. of Arch.*

Ār-ā-bī-ān, a. & s. [Eng. *Arabi*(a); -an.]

A. As adjective: Pertaining to Arabia.

"... the rigor of the Arabian laws, . . ."—*Goldsmith: The Bee*, No. iv.

B. As substantive: An Arab, a native of Arabia.

"... neither shall the Arabian pitch tent there."—*Isa.* xiii. 20.

Arabian Architecture. [See MOHAMMEDAN ARCHITECTURE.]

Ār'-ab-ic, ***Ār'-ab-ick**, a. & s. [In Eng. *Arab*, -ic; Ger. *Arabisch*; Fr. *Arabique*; Port. *Arabico*; Lat. *Arabicus*.]

A. As adjective: Pertaining to Arabia, or to the language prevailing there.

"What way was there taken for spreading his [Pocock's] *Arabick* translation of Grotius de Veritate Religionis Christianæ?"—*Worthington to Hartlib*, Epist. 7.

"Gum arabic, or gnm acacia, is an exudation from various species of acacia."—*Treas. of Bot.* (ed. 1866), ii. 5.

B. As substantive: The language of Arabia or of the Arabs. It is properly the dialect of the Korishite tribe in Arabia, rendered classic by its being the language in which the Koran was composed. It is now vernacular in Arabia, Egypt, and Northern Africa, and the learned and sacred tongue of all Mohammedan countries. The numbers who at present speak it have been estimated at 100 millions, which is probably an exaggeration. Philologically viewed, Arabic is the most southerly of the Syro-Arabian family of languages, besides being itself the type of one of the three classes into which that leading family of tongues is divided. Associated with it in this relation are the living Amharic and the dead Ethiopic and Himyaritic tongues. About two-thirds of the Hebrew roots occur with slight modification in Arabic, which renders the language useful to the Biblical student, as its wide diffusion does to the missionary; while numerous chemical, alchemical, astronomical, and astrological words which arose during the brilliant, but brief, period when the Saracens aimed at intellectual as well as

political ascendancy, will always render it an object of interest to scientific men. The Arabic literature is posterior in date to the time of Mohammed.

"That Schultens had from the *Arabick* happily and satisfactorily illustrated some very obscure and difficult words of the Hebrew text, . . ."—*Parkhurst: Heb. Lex.*, Pref.

***Arabic numerals:** The first nine digits—1, 2, 3, &c.—and the cipher used in writing the number 10. Though often called Arabic, they are really of Brahmanic origin. [NUMERALS.]

Ār-āb'-ic-āl, a. [Eng. *Arab*; -ical.] Pertaining to Arabia or the Arabs. The same as the adj. ARABIC.

"Written in *Arabical* characters."—*Shelton: Don Quixote*, ii. 2, 1.

Ār-āb'-ic-āl-lŷ, adv. [Eng. *Arabical*; -ly.] After the manner of the Arabs.

"Mahomet, whose name *Arabicly* signifies deceit."—*Sir T. Herbert: Travels*, p. 321.

Ār-āb'-ī-çī, s. pl. [From Arabia, in which the sect arose.]

Church Hist.: A sect which sprung up about A.D. 207. Their distinguishing tenet was, that the soul died with the body, but revived with it at the resurrection. Origen is said to have re-converted them to the orthodox belief, and thus extinguished their separate organization.

Ār-āb'-ī-çize, v. t. [Eng. *Arabic*; -ize.] To render akin to Arabic.

"... being superseded by Hindi in its *Arabicized* form of Urdu."—*Beames: Compar. Gram. of Aryan Lang. of India*, vol. i., Introd., p. 96.

ār-ā-bid'-ē-æ, s. pl. [ARABIS.] A tribe of plants belonging to the order Brassicaceæ, or Crucifers.

ār'-a-bīn, s. [From *Arabic*, in the term *gum arabic*.] The pure soluble principle in gum arabic and similar substances. It is precipitated by alcohol and by basic lead acetate, but not by the neutral acetate. It is composed of C₁₂H₂₂O₁₁. It is isomeric with cane sugar. (*Fownes: Manuel of Chem.*, p. 689.)

ār'-a-bīs, s. [In Fr. *arabette*; Sp. *arabide*.] The Wall-cress. A genus of plants belonging to the order Brassicaceæ, or Crucifers. Five species are natives of England; the most common being the *A. hirsuta*, or Hairy Rock-cress. It has small white flowers.

Ār'-ab-īsm, s. [In Eng. *Arab*, -ism; Ger. *Arab-ism*.] An idiom or other peculiarity of languages borrowed from the Arabic.

Ār'-a-bīst, s. [Eng. *Arab*; suffix -ist.] One conversant with the Arabic language and literature.

ār'-a-ble, ***ēr'-a-ble**, a. [In Fr. *arable*; Ital. *arabile*; Lat. *arabilis*=that may be plowed; *aro*=Gr. *aroō*=to plow. In Wel. *arad* is=a plow, and *ar*=arable land; Gael. *ar*=a plow; Irish *irain*=to plow.] Capable of being plowed. Applied to land which may profitably be plowed, with the view of being sown with cereal or other crops. It is contradistinguished from land not worth plowing, but which it is thought better to leave in grass pasture, if not even in wood and moor.

"The *arable* land and pasture land were not supposed by the best political arithmeticians of that age to amount to much more than half the area of the kingdom."—*Macaulay: Hist. Eng.*, ch. iii.

Ār'-a-bō, in compos.=connected with the Arabs.

Arabo tedesco, s. [Ital. *Arabo*, and *Tedescho*=German.]

Arch.: A style of architecture blending together the Roman, Moorish, and German-Gothic.

ar-a-ca'-rī, s. [Imitated from the note of the bird.]

Zool.: The name given in Brazil to several Scansorial birds ranked as aberrant members of the Rhamphastidæ, or Toucan family. They are placed under Pteroglossus and its allied genera. They have smaller bills than the Toucans proper, and are of brighter colors, being generally green, with red or yellow on their breasts.

***ār-a'ce**, ***ār-as'**, v. t. [Fr. *arracher*=to pluck, to pick, to pull away.] To pluck out, to tear away.

"That with gret sleight and gret difficulté,

chewed, causes the tongue so to swell as to cause temporary dumbness. In 1847, Dr. Lindley estimated the known genera at twenty-six, and the species at 170. There is one species known as the *Arum maculatum*. Cuckoopint, Wake-Robin, or Lords and Ladies. [See ARUM.]

ăr-ă-çĕ-oŭs, *a.* ARACEÆ.] Pertaining to the Araceæ (q. v.).

ăr-a-chîd'-ic, *a.* [Fr. *arachide*; Eng. suffix -ic.] Pertaining to the Earth-nut (*Arachis hypogæa*). [ARACHIS.]

arachidic acid.

Chem.: $C_{20}H_{40}O_2 = C_{19}H_{39}COOH$. A monatomic fatty acid, obtained by the saponification of the oil of the Earth-nut (*Arachis hypogæa*). It crystallizes in minute scales, which melt at 75°. It is soluble in boiling alcohol and in ether.

ăr-a-chîs, *s.* [In Fr. *arachide*; Lat. *aracos*, a name applied by Pliny to a plant which had neither stem nor leaves; Gr. *arakos*, *arakis*, and later *arachos*, the name of a leguminous plant.] A genus of leguminous plants belonging to the sub-order Cæsalpinieæ. The *A. hypogæa*, the underground *Arachis* [Gr. *hupogaios* = subterranean], is thus called because the legumes are produced and matured beneath the soil. The plant is believed to have come originally from Africa, but it is now cultivated in the warmer parts both of Asia and America. The legumes are eatable. The seeds have a sweet taste, and furnish a valuable oil used for lamps and as a substitute for olive-oil. In South Carolina they are employed for chocolate.

a-răch'-nî-dă, řa-răch'-nî-dă, řa-răch'-nî-dĕş, *s. pl.* [In Fr. *araignée*; Sp. *arana*; Port. *aranha*; Ital. *aragna*, *aragno*; Lat. *araneus*, *aranea*. From Gr. *arachnēs* and *arachnē* = a spider, and *eidos* = form.]

Zool.: The class of animals which contains Spiders, Scorpions, and Mites. It belongs to the Articulata or Annulosa, and the sub-class Arthropoda, and is appropriately placed between the Crustacea on the one hand, and the Insecta on the other. The highest Crustacea have ten feet, the Arachnida eight, and the Insecta six. The Arachnida are wingless, have no antennæ, breathe by means of tracheal tubes or pulmonary sacs performing the function of lungs. As a rule, they have several simple eyes. They have no proper metamorphosis. They live in a predatory manner. Cuvier divided the class into two orders: Pulmonariæ and Tracheariæ; that is, those breathing by lungs and those breathing by tracheæ. The former include the Spiders proper and the Scorpions; the latter, the Acari (Mites) and their nearer and more remote allies. Huxley separates the Arachnida into six orders: (1) Arthrogastra, including Scorpio, Chelifer, Phrynus, Phalangium, Galeodes, &c.; (2) Araneina, or Spiders; (3) Acarina, or Mites and Ticks; (4) Fresh-water Arctisca or Tardigrada, called Water-bears; (5) Pycnogonida (Marine animals); and (6) Pentastomida (Parasites).

"Most of the *Arachnides* live on insects."—Griffith's *Cuvier*, vol. xiii. (1833), p. 384.

"... it supports the first of the four pairs of legs usually ascribed to the *Arachnida*."—Owen: *Invertebrate Animals* (1843), Lect. xix.

"The next four classes—Insecta, Myriapoda, *Arachnida*, Crustacea—without doubt also present so many characters in common as to form a very natural assemblage."—Huxley: *Classif. of Animals* (1869), p. 76.

a-răch'-nîd, *s.* [ARACHNIDA.] A member of the class Arachnida; an Arachnidan.

"... a Crustacean, an *Arachnid*, a Myriapod, or an insect ..."—Huxley: *Classif. of Animals*, p. 77.

a-răch'-nî-dan, *a. & s.* [Eng. *Arachnida*; -an.]

A. As adjective: Pertaining to the Arachnida.

B. As substantive: An animal of the class Arachnida.

"The smaller *Arachnidans* breathe, like insects, by tracheæ exclusively."—Owen: *Invertebrate Animals*, Lect. xix.

a-răch'-nî-tîs, řa-răch'-nî-dî-tîs, *s.* [Eng. *arachnoid*, and suffix -itis = Gr. -itis, implying inflammation.] [ARACHNOID.]

Med.: Names given by Martinet to a formidable malady, the inflammation of the arachnoid. Sometimes the other membranes investing the brain are also affected, in which case the disease is termed Meningitis (q. v.). It is also apt to spread to the substance of the brain. Arachnitis and Meningitis are akin to apoplexy and cerebritis, from which, however, they may be distinguished by the absence of premonitory symptoms, by the occurrence of spasmodic and convulsive symptoms on both sides of the body, and by the presence of febrile excitement without decided paralysis, followed by collapse.

a-răch'-nîd, *a. & s.* [In Fr. *arachnoide*. From Gr. *arachnēs* and *arachnē* = a spider, and *eidos* = form.]

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pîne, pît, sîre, sîr, marine; gô, pôť, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ē; ey = ā. qu = kw.

A. As adjective:

I. Anat.: Of the form or aspect of a spider's web. *Specially*—

1. Pertaining to the membrane of the brain called the Arachnoid. (Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 253.)

2. Pertaining to the tunic of the crystalline humor of the eye.

3. Pertaining to one of the coverings of the spinal marrow.

II. Botany and Biology generally: Long and loosely entangled, so as to resemble a cobweb. (Used specially of hairs in plants. Example, *Calceolaria arachnoidea*.)

B. As substantive (Anatomy):

1. The serous membrane of the cranio-spinal cavity. It adheres to the dura mater by its parietal layer, and with the intervention of the pia mater to the brain and spinal cord by its visceral layer. (Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 253.)

2. The capsule of the crystalline lens, which is a continuation of the hyaloid membrane. [ARACHNOIDES.]

arachnoid cavity. The space between the two layers of the arachnoid membrane.

arachnoid membrane. [ARACHNOID (B. 1).]

*a-răch'-nî-dĕş, *a-răch'-nî-dă, *s. pl.* [ARACHNOID.]

¶ The form *arachnoida* is in *Glossog. Nova*, 2d ed. (1719), with the meaning, "The crystalline Tunic of the eye." In Johnson's Dictionary, ed. 1773, there is *arachnoides* with the two significations given under Arachnoid (B. 1, 2). The same form is in Parr's *Med. Dict.* (1809), and even in Todd (1827).

"As to the tunics of the eye, many things might be taken notice of: the prodigious fineness of the *arachnoides*, the acute sense of the retina."—Derham.

řa-răch'-nî-dî-tîs, *s.* [ARACHNITIS.]

a-răch'-nîl'-ô-gîst, *s.* [Eng. *arachnologist* (y); -ist.] One who makes the Arachnid or Spider class of animals a special subject of study.

a-răch'-nîl'-ô-gÿ, *s.* [Gr. *arachnēs* or *arachnē* = a spider; *logos* = . . . discourse.] The department of Natural Science which treats of the Arachnid or Spider class of animals.

řar'-ack, *s.* [ARRACK.]

řa'-ra-côn, *s.* A term in alchemy, denoting copper.

ăr'-ăd, *s.* [From Lat. *arum* (q. v.).]

Bot.: A plant of the genus *Arum*, or at least of the natural order Araceæ.

Plural. Arads: The English name of the natural order Araceæ.

ăr-ă-ôm'-êt-êr, *s.* [AREOMETER.]

ăr-ă-ô-style, (1), *s. & a.* [In Fr. *aréostyle*; Lat. *areostylus*; Gr. *araistulos*: *araios* = thin, narrow, slight, . . . with intervals; *stulos* = a pillar with columns far separated.] (*Vitruvius*.)

A. As substantive:

Arch.: A kind of intercolumniation, in which the pillars are so wide apart that the intermediate spaces are each upward of three diameters of the column. This constitutes one of the five kinds of intercolumniation described by Vitruvius.

B. As adjective: Pertaining to the intercolumniation now described.

ăr-ă-ô-sÿs'-tÿle, *s.* [Gr. *araios* = thin, narrow, slight, and *sustulos* = with columns standing close.] (*Vitruvius*.)

Aræosstyle: Western Front of St. Paul's Cathedral.

Architecture: The arrangement attendant on coupled columns, as in the western front of St. Paul's Cathedral.

ăr-ă-ôt'-ics, *s. pl.* [Gr. *araïōtikos* = of or for rarefying; *araioō* = . . . to make thin; *araios* = thin.]

Med.: Remedies which rarefy the humors, and thus make it more easy for them to be carried away by the pores of the skin.

ăr-ă-ôx-êne, *s.* [In Ger. *aræoxen*; from Gr. *araïos* = thin, narrow, slight, . . . porous, spongy, and *xenos* = foreign, strange.] A mineral, the same as Dechenite (q. v.).

*ar'-ăge, *ar'-ôche, *s.* Any plant of the genus *Atriplex*. (*Prompt. Parv. & Palsg.*)

ar'-ăge, *s.* [AVERAGE.] (*Scotch.*)

a-răg'-ôn-ite, řar-răg'-ôn-ite, *s.* [From *Aragón*, in Spain, where it was first found.] A mineral with orthorhombic crystals, generally six-sided prisms, though the rectangular octohedron is considered its regular form. It occurs also globular, reniform, coralloidal, columnar, stalactitic, and incrusting. The hardness is 3.5-4; the sp. gr., 2.927 to 2.947; the luster vitreous or nearly resinous on fractured surfaces. Its color is white, gray, yellow, green, or violet; it is transparent or translucent, and brittle. The composition is carbonate of lime, 95.94 to 99.31, with smaller quantities of strontia-carbonate, &c. Dana thus divides it:—Var. 1. Ordinary: (a) Crystallized in simple or compound crystals, or in radiating groups of acicular crystals; (b) Columnar, including *Satin-spar*; (c) Massive. 2. Scaly massive. 3. Stalactitic or Stalagmitic. 4. Coralloidal. 5. Tarnovite. Mossottite and Oserskite also rank with Aragonite. It occurs in Spain, Austria, Italy, England, America, and elsewhere.

aragonite group. Dana's second group of Anhydrous Carbonates, comprising Aragonite, Manganoalcite, Witherite, Bromlite, Strontianite, and Cerussite.

ar-a-gua'-tō (gua=gwa), *s.* [South American name of Humboldt.] A species of monkey (the *Myctes ursinus*), found in South America.

*a-rā'id, *pa. par.* of ARAYE (q. v.).

*araignée, arraign (a-rā'n-yā, a-rā'n), *s.* [Fr. *araignée* = (1) a spider, (2) a cobweb.]

Fortification: A branch, return, or gallery of a mine. (*Bailey, James, &c.*)

*a-rā'ise, *a-rāy'se, *a-rê'ise, *v. t.* [A. S. *arastan* = to raise. Cognate with Gothic *urreisan* = to stand up.] To raise.

"A medicine . . . whose simple touch

Is powerful to arise King Pepin."

Shakesp: *All's Well That Ends Well*, ii. 1.

a-rā'-lî-a, *s.* [In Ger. & Fr. *aralie*; Dut. *aralia*. Derivation unknown.] A genus of plants, the typical one of the order Araliaceæ. *A. umbellifera* exudes an aromatic gum. *A. nudicaulis* is used as a substitute for sarsaparilla. The berries of *A. spinosa*, the Angelica-tree, Prickly Ash, or Toothache-tree, of America, infused in wine or spirits, are used in cases of colic, while a tincture of them is prescribed in toothache. *A. racemosa*, the spike-nard of America, is also regarded as a medicinal plant. [ANGELICA-TREE.]

a-răl'-î-ă-çĕ-æ, *s. pl.* [ARALIA.] Ivyworts. (*Lindley*.) An order of plants belonging to the Umbellal Alliance, and akin to the Apiaceæ or Umbellifers, from which, however, they differ in their many-celled fruit and their more shrubby appearance. They inhabit China, India, and America. In 1847, Dr. Lindley estimated the known species at 160.

Ăr-a-măe'-an, *a. & s.* [Heb. *ăram*, or Aram, the youngest son of Shem (Gen. x. 22); *ăram* in Heb. means *high*, from *arām* = to be high, apparently implying that the region which Aram inhabited was a high one. The term was applied to Syria and Mesopotamia.]

1. *As adjective:* Pertaining to the Aramæan territory, and especially to its language—the Aramæan or Aramaic. [ARAMAIC.]

2. *As substantive:* The language now described. [See No. 1.]

Ăr-a-măe'-an-îsm, Ăr-a-mē'-an-îsm, *s.* [Eng. *Aramæan*; -ism.] An idiom or other peculiarity of language borrowed from the Aramæan tongue.

Ăr-a-mā'-ic, *a. & s.* [From Heb. *ăramîth*, 2 Kings xviii. 26 and Dan. ii. 4 of the Heb. Bible (rendered in the Eng. version "Syrian" or "Syriack").] [ARAMAIC.]

1. *As adjective:* Pertaining to the Aramaic or Aramæan tongue. The Semitic family of languages may be divided into three classes or branches: (1) The Arabic, or Southern Semitic; (2) the Hebrew, or Middle Semitic; and (3) the Aramaic, or Northern Semitic. Under the third of these classes Prof. Max Müller ranks of living languages the Neo-Syriac; and of dead ones, (1) the Chaldee of the Masora, Talmud, Targums, and the Bible; (2) the Syriac or Peshito of the second century, A. D.; and (3) the cuneiform inscriptions of Babylon and Nineveh. (*Max Müller: Science of Lang.*)

2. *As substantive:* The language or sub-family of languages above described. [See No. 1., *adj.*]

Ar'-am-îsm, *s.* [Heb. *ăram*.] [ARAMAIC.] The same as ARAMAICISM (q. v.).

a-rā-n-ē-a, s. [Lat. *aranea*; Gr. *arachnēs* and *arachnē*=a spider.] The typical genus of the family Araneidae, the order Araneina, and the class Arachnida. It contains the domestic spider (*A. domestica*) and other species.

†a-rān-ē-i'-dā, s. pl. [ARANEINA.]

a-rān-ē-i'-dā (Mod. Lat.), **a-rā-n-ē-i'-dānš** (Eng.), s. pl. [ARANEIA.] The typical family of the class Arachnida. They have the eyes in two rows, one behind the other, the terminal claw of the mandibles directed inward, and the palpi, though long, never converted into foot-like organs. All spin for themselves a dwelling-place, and most weave webs. It contains the genera *Aranea*, *Epeira*, *Argyroneta*, &c. Their mode of life is so various that Walckenaër divides them thus:

I. Terrestres.

1. Venantes: (a) Latebricolæ, (b) Tubicolæ, (c) Cellulicolæ, (d) Cursores, (e) Saltatores.
2. Vagantes: Laterigradæ.
3. Errantes: (a) Niditelæ, (b) Filitelæ.
4. Sedentes: (a) Tapitelæ, (b) Orbitelæ, (c) Retitelæ.

II. Aquaticæ; Natantes; Aquitelæ.

†a-rā-n-ē-i'-dēs, s. pl. [ARANEINA.]

a-rā-n-ē-i'-form, a. [Lat. *aranea*=spider, and *forma*=form, shape.] Shaped like a spider.

a-rān-ē-i'-nā, **†a-rān-ē-i'-dā**, **†a-rā-n-ē-i'-dēs**, s. pl. [ARANEIA.]

Zool.: An order of Arachnida. Huxley, adopting the term Araneina, makes it the second of the six orders into which he divides that class of animals. The Araneina have the abdomen unsegmented; it is, moreover, connected with the thorax by a narrow peduncle. They breathe by means of two or more pulmonary sacs and two stigmata connected with tracheæ. They have from four to six spinnerets for the exit of the silken threads whence their webs are spun. They are sometimes called Dimerosomata. Carpenter, Dallas, &c., divide them into three families—Araneidae, Lycosidae, and Mygalidae (q. v.).

"The first family of the Pulmonary Arachnides, that of *Araneides*, is composed of the Spiders (*Aranea*, Linn)." —*Griffith's Cuvier*, xiii. 387.

"The *Araneida* do not undergo any essential change of form." —*Ibid.*, p. 440.

"The *Araneina* (or Spiders) have the abdomen not segmented." —*Huxley: Classif. of Animals*, p. 123.

a-rān-ē-ō'se, a. [Lat. *araneosus*=full of spiders' webs; *araneum*=a spider's web.] The same as ARACHNOID, *adj.* (q. v.).

a-rā-n-ē-ō's, a. [Lat. *araneum*=a spider's web.]

*1. Full of spiders' webs. (*Glossog. Nova.*)

2. Resembling a spider's web.

"The curious *araneous* membrane of the eye constricteth and dilateth it, and so varieth its focus." —*Derham*.

***a-rāng'**, s. [HARANGUE.]

a-rān'-gōēs, s. pl. [Local name.] Pierced beads of various forms made of rough carnelian, formerly imported from Bombay to be re-exported to Africa. (*McCulloch's Dict. of Comm.*)

a-rā-ram-bōy'-a, s. [Brazilian name.] A Brazilian snake, green in color. It is called also the Dog-headed Boa, or Bojubi. It is the *Xiphosoma caninum*.

***ār-as'**, v. t. [ARACE.]

a-rā'-tion, s. [Lat. *aratio*=plowing; *aro*=Gr. *aroō*=to plow.] The operation of plowing.

a-rā'-tōr, s. [In Ital. *aratore*; from Lat. *arator*=a plowman, a farmer.] A plowman, one who plows.

ār'-a-tōr-ŷ, a. [From Lat. *arator*=a plowman.] Contributing to tillage. (*Johnson*.)

a-rā'-trūm, s. [Latin=a plow.]

aratum terræ. [Literally=a plow of the land.]

Scots Law: As much land as can be tilled with one plow. (*Jacob: Law Dict.*, ed. Tomlins, 1797.)

ār-a-tūr-a tōr'-ræ. [*Lit.*=a plowing of the land.] The service which the tenant is to do for his lord in plowing the land. (*Jacob: Law Dict.*, ed. Tomlins.)

ar-āu-cā-r-i-a, s. [From the Chilian name *aracunos*. This again is called after the Araucarian tribe of Indians, or their country, Araucaria, which is between the Andes and the Pacific Ocean, about 37° S. lat., and nominally constitutes part of Chili, but is really independent.]

Bot.: A genus of plants belonging to the order Pinaceæ (Conifers) and to the family or section Abietinæ. The inflorescence is terminal; the male flowers in cylindrical spikes; and the fruit succeeding the female ones large and globular; each scale, if not abortive, bearing a single seed. The branches are verticillate and spreading, with stiff pointed

leaves. Five or six species are known; all from the Southern hemisphere. The one so common in English gardens is *A. imbricata*, a native of the mountainous parts of Southern Chili. It is of hardy constitution, scarcely requiring protection, except in very severe weather. Another species, *A. excelsa*, or Norfolk Island Pine, is a splendid tree of giant size. All the genus are ornamental from their fine and unfading foliage. Araucarian pines were abundant in Europe during the Oolitic period, associated with mammals, fishes, &c., whose nearest living analogues are now confined to Australia and the adjacent regions.

ar-āu-cā-r-i-an, a. [ARAUCARIA.]

Bot.: Pertaining or relating to the Araucaria.

"... he says it belongs to the fir tribe, partaking of the character of the Araucarian family." —*Darwin: Voyage round the World*, ch. xv.

***a-rā'ught** (*gh* guttural), *pa. par.* [ARECHE (2).]

***a-rā'y**, v. & s. [ARRAY.]

***a-rā'ye** (pret. & *pa. par.* **a-rā'id**), v. t. To afflict (?).

"The blak knyght than on to hyme-self he said:

'Remember the, how yhow haith ben araid.'"

Launcelot of the Lake (ed. Skeat), iii. 3,269-70.

a-rā'yne, *pa. par.* [ARRAY, v.] (*Scotch.*)

ar'-bal-ēst, **ar'-bal-ist**, ***ar'-bal-ēt**, ***ar'-blast**, ***ar'-cū-bal-ist**, ***ar'-cū-bal-is'-tā**, s. [In Fr. *arbalète*; O. Fr. *arbaleste*; Port. *arbalista*; Lat. *arcuballista*, from *arcus*=a bow, and *ballesta*, *balista*=a military engine for hurling stones and other missiles. Gr. *ballō*=to throw.]

1. A steel crossbow used in mediæval times. It was set in a wooden shaft, with a sling and trigger bent with a piece of iron, fitted for the purpose, and used to throw bullets, large arrows, darts, and other missiles. (*James: Mil. Dict.*)

"It is reported by William Brito, that the *arcubalista* or *arbalist* was first shewed to the French by our King Richard the First . . ." —*Camden*.

*2. A mathematical instrument, called also a *Jacob's staff*, formerly used to measure the height of stars above the horizon. (*James: Mil. Dict.*)

***ār-bal-ēs-tē-nā**, s. pl. [From Eng., &c., *arbal-est* (q. v.).] Cruciform apertures in the walls of ancient fortifications through which arrows were discharged.

ar'-bal-ēs-tēr, ***ar'-bal-is-tēr**, ***ar'-bla's-tēr**, ***ar'-cū-bal-is-tēr**, s. [Eng. *arbalist*; *arbalist*; -er. In Lat. *arcuballistarius*.] One whose weapon is the crossbow; a crossbow-man.

"When Richard was at the siege of this castle [Chaluz], an *arbalister* standing on the wall, and seeing his time, charged his steel bow with a square arrow or quarrel, making first prayer to God that he would direct the shot, and deliver the innocency of the besieged from oppression." —*Speed: Hist. of Eng.*, p. 481.

"King John was espied by a very good *arcuballister*, who said that he would soon dispatch the cruel tyrant." —*Camden: Remains*.

ar'-bī-tēr, ***ar'-bī-trōure**, s. [In Fr. *arbitre*; Sp., Port., & Ital. *arbitro*; Lat. *arbitrator*=(1) one who comes to a place, a visitor, an intruder, an eye-witness, (2) an umpire, (3) a manager. By some derived from *ar* (*ad*)=to, and the root *bit*=to come or go; but Wedgwood connects it with the Finnish *arpa*=a lot, believing the original meaning was a "lot's man," or soothsayer.]

I. Of persons:

1. *Law and Ord. Lang.*: An arbitrator, a person chosen, in most cases by mutual agreement, to decide between contending parties who do not wish to go to law. Now the term used is ARBITRATOR (q. v.).

"He would put himself into the king's hands, and make him *arbitrator* of the peace." —*Bacon*.

2. One who is so much raised above his fellows that law cannot, for the time, at least, reach him.

and who has therefore the power of absolutely deciding questions affecting the property and even the lives of others.

"But swear, impartial arbiters of right,
Swear to stand neutral, while we cope in fight."

Pope: Homer's Odyssey, bk. xviii. 64-5

II. Of things. *Fig.*: That which acts with uncontrolled influences and on a great scale.

"Next him high arbiter
Chance governs all."

Milton: P. L., ii., 909.

ar'-bī-tra-ble, a. [Lat. *arbitror*=to observe, . . . to judge; Eng. -able. In Sp. *arbitrable*.]

1. Arbitrary, settled by the will; voluntary.

"... offerings bestowed upon God by the people, either in such *arbitrable* proportion as their own devotion moveth them, or as the laws or customs of particular places do require them." —*Spelman*.

2. Determinable.

"The value of moneys or other commodities is *arbitrable* according to the sovereign authority and use of several kingdoms and countries." —*Bp. Hall: Cases of Conscience*, Dec. 1, Case 1.

***ar'-bī-trāge**, s. [Fr.] Arbitration. (*Sir William Temple*.) (*Worcester*.)

ar'-bīt-ṛā-mēnt, **ar'-bīt-rē-mēnt**, s. [From Low Lat. *arbitramentum*; Lat. *arbitror*=to observe, to judge.]

A. Ordinary Language:

I. Of persons or other intelligent beings:

1. Power or liberty of deciding; choice, decision, determination.

"... to stand or fall
Free in thine own arbitrement it lies."

Milton: P. L., bk. viii.

2. Compromise.

"Lukewarm persons think they may accommodate points of religion by middle ways and witty reconciliations, as if they would make an *arbitrement* between God and man." —*Bacon: Essays, Civ. and Mor.*, ch. iii.

II. Of things (*Fig.*): The final decision of a case, question, controversy, or struggle by the sword, by natural law, or in some similar way.

"The arbitrement is like to be bloody."

Shakesp.: King Lear, iv. 7.

"... a people who had challenged the arbitrement of the sword." —*Mr. Forsyth, M. P., Parl. Deb.*, *Times*, Feb. 17, 1877.

"The supreme importance of these characters has been proved by the final arbitrement of the battle for life." —*Darwin: Descent of Man*, pt. i., ch. iv.

B. Law: The award given by arbitrators.

ar'-bī-tra-rī-lŷ, *adv.* [Eng. *arbitrarily*; -ly.] Agreeably to one's own will or caprice without reference to the rights or the feelings of others; despotically, tyrannically.

"But the power of *arbitrarily* taking away the lives of men is infinitely less likely to be abused than the power of *arbitrarily* taking away their property." —*Macaulay: Hist. Eng.*, ch. xxiii.

ar'-bī-tra-rī-nēss, s. [Eng. *arbitrarily*; -ness.] The quality of being arbitrary, despotical, tyrannical.

"Self-regarding or dissocial moral qualities . . . 5. *arbitrariness*." —*Bowring: Bentham's Table of the Springs of Action*, Works, vol. i., p. 198.

***ar'-bī-trā-r-i-ō's**, a. [Lat. *arbitrarius*=(1) pertaining to arbitration; (2) arbitrary.] Arbitrary, despotical, tyrannical.

"These are standing and irrevocable truths; such as have no precarious existence or *arbitrarily* dependence upon any will or understanding whatsoever." —*Norris*.

***ar'-bī-trā-r-i-ō's-lŷ**, *adv.* [Eng. *arbitrarily*; -ly.] In an arbitrary manner.

"Where words are imposed *arbitrarily*, distorted from their common use, the mind must be led into misprision." —*Glanville*.

ar'-bī-tra-rŷ, a. [In Fr. *arbitraire*; Sp., Port., & Ital. *arbitrario*; Lat. *arbitrarius*=(1) pertaining to arbitration; (2) arbitrary, depending on the will; (3) unfixed, uncertain.]

A. Ordinary Language:

1. According to one's own will or caprice, and probably not defensible at the bar of reason or justice. Capricious.

"It may be perceived with what insecurity we ascribe effects, depending on the natural period of time, unto *arbitrarily* calculations, and such as vary at pleasure." —*Brown: Vulgar Errors*.

"But the detailed description of the lights on the Roman spears, in the Sabine war of 503 B. C., given by Dionysius, has all the appearance of *arbitrarily* fiction." —*Lewis: Early Rom. Hist.*, ch. v., § 11.

2. Despotical, tyrannical. (Applied to power, the deeds of a government, or to the character of a ruler.)

"The thought of establishing *arbitrarily* power, by calling in the aid of foreign arms, . . ." —*Macaulay: Hist. Eng.*, ch. ii.

"... had served the most *arbitrarily* of monarchs . . ." —*Ibid.*, ch. xxiii.

B. Technically:

Law. Arbitrary punishment: (1) A punishment left to the discretion of the judge; (2) because capital punishments are never so left, therefore it signifies also a penalty not capital.

ar-bi-trāte, v. t. & i. [In Fr. *arbitrer*; Prov., Sp., & Port. *arbitrar*; Ital. *arbitrare*; Lat. *arbitror, -atus*=(1) to observe, (2) to judge, (3) to testify, (4) to believe.]

A. Transitive:

1. To judge, to judge of.

2. To decide, settle, determine.

B. Intransitive: To decide in the capacity of an arbitrator; or, more generally, to decide, to determine.

ar-bi-trā-tion, s. [In Fr. *arbitration*; Port. *arbitração*; Lat. *arbitratio*=decision, will; from *arbitror*.] [ARBITRATE.]

A. Ordinary Language:

1. The decision of a case by means of an arbitrator. (B. 1, *Law*.)

2. Final decision of a matter in dispute or in doubt, without reference to the method by which this is effected.

B. Technically:

1. **Law:** The decision of a case not by a judge of a law court, but by an arbitrator or arbitrators, that is, by a person or persons to whom the contending parties mutually consent to submit their differences. When there are more than one, and they disagree in what is termed their award, a third person, called an umpire, is in general called in to give a final decision.

2. **Comm. Arbitration of Exchange:** The operation of converting the currency of any country into that of a second one by means of other currencies intervening between the two.

arbitration bond.

Law: A bond which is generally entered into by parties wishing to submit their differences to arbitration. It binds them to acquiesce in the award given. (*Blackstone: Comment.*, bk. iii., ch. 1.)

arbitration treaty, s. A treaty for the adjustment of differences between nations. The United States has been a party to more arbitration treaties than any other nation, having, within the last hundred years, settled by this means more than forty international disputes. Following is a table showing results of the most important of these cases:

ARBITRATION CASES WON BY THE UNITED STATES.

1794—Great Britain—St. Croix River boundary dispute. 1794—Great Britain—217 claims awarded the U. S. 1814—Great Britain—Northeastern boundary. 1818—Great Britain—for slaves carried away by British soldiers after the war of the Revolution, \$1,264,960. 1839—Mexico claims, \$671,798. 1853—Great Britain claims, \$55,000. 1857—New Granada claims, \$345,307. 1858—Chili claims, \$42,000. 1860—Costa Rica claims, \$25,000. 1862—Ecuador claims, \$94,799. 1863—Peru claims, \$31,250. 1864—Colombia claims, \$345,307. 1866—Venezuela claims, \$1,253,310. 1868—Mexico claims, \$4,000,000. 1868—Peru claims, \$150,000. 1870—Brazil claims, \$100,740. 1871—Spain claims, \$1,588,683. 1871—Great Britain, land. 1871—Great Britain, the Alabama claims, \$15,000,000. [ALABAMA.] 1874—Colombia claims, \$33,401. 1885—Spain claims, \$46,034. 1892—Venezuela claims \$141,000. 1893—Ecuador claims, \$40,000.

ARBITRATION CASES LOST BY THE UNITED STATES.

1794—Great Britain—claims for royalist losses during the war of the Revolution, \$3,000. 1851—Portugal—loss of the U. S. privateer, *General Armstrong*, destroyed in the harbor of Fayal. 1871—Great Britain—claims of British subjects for property lost in the war of the Rebellion, \$1,929,819. 1880—France—claims for property of French citizens destroyed in the war of the Rebellion, \$612,000. 1888—Denmark—Butterfield claims. 1893—Great Britain—Bering sea dispute (q. v.).

A general treaty for the arbitration of all disputes arising between the U. S. and Great Britain not involving national honor was signed at Washington by representatives of the two governments on Jan. 11, 1897, but the U. S. Senate refused to ratify it.

ar-bi-trā-tōr, *ar-bi-trā-tōre, s. [In Fr. *arbitrateur*; Sp. & Port. *arbitrador*.] From Lat. *arbitrator*=a lord, master, or ruler.]

A. Ordinary Language:**I. Of persons:**

1. A ruler or governor. (Applied by Milton to the Supreme Being.)

2. He who occupies so high a position, for the moment at least, that he can settle disputes as he himself thinks fit, and enforce the award he makes.

3. A person or even a public body invited or permitted to decide between contending parties who do not wish to go to law. [ARBITRATION.]

II. Of things: That which finally settles anything.**B. Technically:**

Law: A person chosen to settle disputes between contending parties who otherwise would probably engage in litigation; an arbiter, a referee.

ar-bi-trā-trēss, s. [The fem. form of Eng. *arbitrator*.] A female arbitrator; an arbitratress.

ar-bi-trā-trīx, s. [Lat.=a mistress, a female ruler.] A female arbitrator, an arbitratress. (*Beaumont: Psyche*, xix. 168.)

***ar-bi-tre (tre=têr), v. t.** [Fr. *arbitrer*.] [ARBITRATE.] To decide finally.

"All that shal be declared, ordeined, and arbitred, by the forsaide Archebishop, dukes, and bishoppes."—*Hall: Henry VI.* (an. 4).

***ar-bi-trée, s.** [Fr. *arbitre* = . . . will; Lat. *arbitrium*.] Free will.

"To destroyen the freedom of our arbitree, that is to say, of our free will."—*Chaucer: Boecius*, bk. v.

ar-bi-t-rē-mēt, s. [ARBITRAMENT.]

ar-bi-trēss, *ar-bŷ-trēs, s. [The fem. form of *arbiter* (q. v.).] The same as ARBITRATRESS and ARBITRATRIX. A female who acts as arbiter. (*Lit. & fig.*)

"Overhead the moon
Sits arbitress, and nearer to the earth
Wheels her pale course." *Milton: P. L.*, l. 785.

ar-blast, s. [ARBALEST.]

ar-bōl-ist, s. [Sp. *arbolista* (?).] A word occurring twice in Howell (*Dodona's Grove*, p. 11, p. 131. Probably a misprint for arborist (q. v.).

ar-bor, s. [Lat.=a tree.]

I. Bot.: A tree; that is, a vegetable having branches which are perennial, and are supported upon a trunk; in the latter respect differing from a shrub, one characteristic of which is, that its branches proceed directly from the surface of the ground without having a supporting trunk. (*Lindley: Introd. to Bot.*)

II. Mechanism:

1. The axis or spindle of a machine; as, for instance, of a crane or windmill.

2. That part of a machine which sustains the rest.

Arbor Day, s. A day appointed for the planting of trees. The custom of setting apart a certain day in the year for the encouragement of tree-planting originated in Nebraska, whose State Board of Agriculture in 1874 recommended the second Wednesday of April in each year as a day dedicated to the work. It is now an established custom in most of the States.

arbor Dianæ. (*Lit.*=the tree of Diana.) A beautiful arborescent appearance presented by silver when precipitated from its nitrate by the addition of mercury.

arbor genealogica. A genealogical tree. [GENEALOGICAL.]

arbor Saturni. [*Lit.*=the tree of Saturn.] An arborescent appearance presented by lead when a piece of zinc is suspended in a solution of acetate of lead.

arbor vitæ. [*Lit.*=the tree of life.]

1. **Bot.:** A name given to the trees belonging to the coniferous genus *Thuja*. *T. occidentalis*, or American Arbor Vitæ, is a well-known and valued evergreen.

2. **Anat.:** A dendriform arrangement which appears in the medulla of the brain when the cerebellum is cut through vertically.

ar-bōr-ē-al, a. [Lat. *arbores*(us); and Eng. suffix *-al*.] Pertaining to a tree or trees. *Spec.*, living in trees, or climbing trees.

" . . . a temperature sufficiently high for arboreal Mammalia of the four-handed order."—*Owen: British Fossil Mammals and Birds*, p. 3.

ar-bōr-ē-ous, a. [In Sp., Port., & Ital. *arboreo*.] From Lat. *arbores*=pertaining to a tree.]

1. Arborescent, becoming or being a tree. (*Loudon: Cycl. of Plants; Gloss.*)

"A grain of mustard becomes arborescent."—*Browne*.

2. Growing on a tree, as contradistinguished from growing on the ground.

"They speak properly who make it an arborescent excrecence, or rather a superplant bred of a viscous and superfluous lopp, which the tree itself cannot assimilate."—*Browne: Vulgar Errors*.

ar-bōr-ēs'-çence, s. [In Fr. *arborescence*, as if from a Lat. *arborescentia*=a growing into a tree; *arboresco*=to grow up into a tree.]

1. **Bot.:** The characteristics of a tree, as contradistinguished from those of a shrub or of an herb.

2. **Min. & Chem.:** Dendritic markings on minerals, or a tree-like appearance of chemical substances.

ar-bōr-ēs'-çent, a. & s. [In Fr. *arborescent*, from Lat. *arborescens*, pr. par. of *arboresco*=to become a tree; *arbor*=a tree.]

A. As adjective:

I. Lit. (Bot.): Properly, growing up into a tree; having a tendency to become a tree, from a shrub becoming a tree; also, less precisely, existing as a tree.

"Pandanaceæ are remarkable among arborescent monocotyledons . . ."—*Lindley: Nat. Syst. Bot.*, 2d ed. (1836), p. 361.

" . . . an arborescent grass, very like a bamboo . . ."—*Darwin: Voyage round the World*, ch. xi.

II. Fig (Physical Science and Ord. Lang.):

1. **Gen.:** Having ramifications like a tree.

" . . . they ramify in an arborescent manner."—*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 274.

2. Specially:

(a) **Min.:** Dendritic. Native copper is commonly of this form. [DENDRITIC.]

(b) **Zool.** The Arborescent Starfish: A species of starfish, the *Asterias Caput Medusæ*.

B. As substantive: A plant growing up into a tree.

" . . . sproutings, or branchings, or arborescents."—*Bacon: Physiol. Rem.*

ar-bōr-ēt, *ar-bōr-ēt, ar-bōr-ē-tūm, s. [In Ital. *arboreto*; Lat. *arboretum*=(1) a plantation, a vineyard, (2) a single tree.]

A. (Of the form arboretum.) A spot in a park, nursery, or any similar place, planted with trees, one of each kind. (*Brande.*)

B. (Of the forms arboret and arborett.) Either (a) a small grove, a place planted or overgrown with trees or shrubs, or (b) a single small tree or shrub, apparently the latter.

"No daintie flowre or herbe that growes on ground,
No arborett with painted blossoms drest,
And smelling sweete, but there it might be found
To bud out faire, and throw her sweete smells all
around." *Spenser: F. Q.*, II. vi. 12.

"Nearer he drew, and many a walk traversed
Of stateliest covert, cedar, pine, or palm;
Then voluble and bold; now hid, now seen
Among thick woven arborets, and flowers
Imborder'd on each bank," *Milton: P. L.*, bk. ix.

***ar-bōr-ic-al, a.** [Lat. *arbor*=a tree; Eng. suffix *-ical*.] Pertaining to trees.

" . . . of that arborical discourse."—*Howell: Letters*, iv. 23.

ar-bōr-i-cūl'-tūr-al, a. [Eng. *arboriculture*; *-al*.] Pertaining to the culture of trees.

ar-bōr-i-cūl'-tūre, s. [In Fr. *arboriculture*, from Lat. *arbor*=a tree, and *cultura*=cultivation.] The cultivation of trees.

ar-bōr-i-cūl'-tūr-ist, s. [Eng. *arboricultur(e)*; *-ist*.] One who cultivates trees. (*Loudon.*)

ar-bōr-i-form, a. [Lat. *arbor*=a tree, and *forma*=form.] Formed like a tree.

ar-bōr-ist, s. [Fr. *arboriste*.] One who makes a special study of trees.

"The mulberry, which the arborists observe to be long in the getting his buds."—*Howell: Vocal Forest*.

ar-bōr-i-zā-tion, s. [Fr. *arborisation*.]

Min. & Geol.: The method of forming dendritic markings on a simple mineral or on a fossil.

ar-bōr-ize, v. t. [In Fr. *arboriser*.] To form the likeness of a tree; to make dendritic markings on some simple mineral or rock.

ar-bōr-ous, a. [Lat. *arbores*=of or pertaining to a tree.] Full of trees; formed by trees.

"Under shady arborous roof."—*Milton: P. L.*, v. 137.

ar-bōr, ar-bōur, *ar-bēr, *hēr-bēr, *hēr-bēre, s. [O. Fr. *herbier*=a herbary; in O. Eng. *herber, erber*. It was first confused with A. S. *hereberge*, Icel. *herbergi*=harbor, shelter, and afterward from a supposed connection with trees, written *arbor*, as if from the Lat. *arbor*=a tree. Properly it is a garden of herbs.] A frame of laticed work, over and around which creeping and clinging plants are turned, so as to form a shady and romantic retreat; a bower.

"And so I followed till it me brought
To syht a pleasant herber well ywrought
* * * * *

And closed in all the green herbere
With sicamour was set and eglatere."
Chaucer: The Floure and the Leafe.

"There found she her (as then it did betide)
Sitting in covert shade of arbors sweet."
Spenser: F. Q., IV. viii. 9.

"From these heights
We dropp'd, at pleasure, into sylvan combs;
Where arbors of impenetrable shade,
And mossy seas, detain'd us side by side."
Wordsworth: Excursion, bk. iii.

arbor-vine, s. A species of bind-weed.

ar-bōred, a. [Eng. *arbor*; *-ed*.] Furnished with an arbor. (*Pollok.*)

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

ar-būs'-cle (cle=*kēl*), *s.* [Lat. *arbuscula* = a small tree.] A small tree.

¶ Sometimes the Latin term *arbusculus* is employed. It is not so classical as *arbuscula*. (*Lindley*.)

ar-būs'-cūl-ar, *a.* [Eng. *arbuscule*; -*ar*.] Pertaining to a small tree. (*Da Costa*.)

ar-būs'-tive, *a.* [Lat. *arbus-tivus*, from *arbus-tum* (q. v.).] Planted with shrubs or trees; containing copses of shrubs or trees. (*Bartram*.)

ar-būs'-tūm, *s.* [In Fr. *arbuste*; Sp., Port., & Ital. *arbus-tum*; Lat. *arbus-tum*, a contraction of *arbo-retum* = (1) a plantation, (2) a tree; from *arbor*, a tree.]

Bot.: A shrub, distinguished from a tree by the character that its branches rise directly from the ground without being supported on a trunk. It is called also *FRUTEX*.

ar-bū'te, *s.* [ARBUS-TUS.]

ar-bū'tē-an *a.* [Lat. *arbutus*.] Pertaining to the arbutus.

"Arbutan harrows, and the mystic van."

Evelyn: Virgil.

ar-bū'tūs (Lat.), **ar-bū'te** (Eng.), *s.* [In Dut. *arbutus*; Fr. *arbutier*; Ital. *arbuto*; from Lat. *arbutus* = the wild strawberry-tree; *arbutum*, its fruit; from *arbor* = a tree, or, according to Theis, from the Celtic or rough *austere*, and *boise* = a bush.]

A. Ord. Lang.: (Of the forms *Arbutus* and *Arbutus*.) Any plant of the genus *Arbutus*; specially, the *A. unedo*, or strawberry-tree, described under B.

"There have been in the neighborhood of Killarney specimens of the *arbutus* thirty feet high and four feet and a half round."—*Macaulay: Hist. Eng., ch. vi.* (Note.)

"In falling, clutched the frail arbutus."

Longfellow: To a Child.

Arbutus Unedo (Strawberry-tree).

1. Flower. 2. Ovary and stamen. 3. Stamen enlarged. 4. A branch in fruit. 5. Section of fruit. (Figures 1 and 4 one-third natural size.)

B. Bot.: (Of the form *Arbutus*.) Strawberry-tree. A genus of plants belonging to the order Ericaceae (Heath-worts). A species, the *A. unedo*, or *Austere Strawberry-tree*, is found, apparently wild, in the neighborhood of the Lakes of Killarney. It has panicles of large, pale greenish-white flowers and red fruit, which, with the evergreen leaves, are especially beautiful in the months of October and November.

Trailing *Arbutus*, a creeping or trailing plant (*epigaea repens*) with rose-colored blossoms, found chiefly in New England in the spring. Commonly called *May-flower*, or sometimes *ground laurel*.

ar'-bū'trēs, *s.* [ARBITRESS.]

arc, ***arck**, ***ark**, *s.* [In Fr. *arc* = an arch, an arc; Prov. *arc*; from Lat. *arcus* = a bow, . . . anything arched, a mathematical arc. Essentially the same word as the Eng. *ARCH* (q. v.).]

A. Ordinary Language:

1. An arch.

"Their rich triumphal arches which they did raise."

Spenser: Sonnet on Scanderbeg.

"Statues, and trophies, and triumphal arcs."

Milton: P. R., bk. iv.

"Turn arcs of triumph to a garden gate."

Pope: Mor. Ess., Ep. 4.

2. (In the geometric sense of the word.) [See B.] (*Met. and Fig.*)

"Your loss is rarer: for this star

Rose with you thro' a little arc

Of heaven."

Tennyson: To J. S.

"The circle of human nature, then, is not complete without the arc of feeling and emotion."—*Tyndall: Frag. of Science*, 8d ed., v. 104.

B. Technically:

1. *Geom.*: A portion of the circumference of a circle, cut off by two lines which meet or intersect it. Its magnitude is stated in degrees, minutes, and seconds, which are equal to those of the angle which it subtends. Hence, counted by degrees, minutes, and seconds, the arc of elevation and the

angle of elevation of a heavenly body are the same, and the two terms may be used in most cases indifferently. The straight line uniting the two extremities of an arc is called its chord.

"Their segments, or arcs, for the most part, exceeded not the third part of a circle."—*Newton: Optics.*

Equal arcs must come from circles of equal magnitude, and each must contain the same number of degrees, minutes, and seconds as the others.

Similar arcs must also each have the same number of degrees, minutes, and seconds, but they belong to circles of unequal magnitude.

Concentric arcs are arcs having the same center.

2. *Math. Geog.*: An arc of the earth's meridian, or a meridional arc, is an arc partly measured on the surface of the earth from north to south, partly calculated by trigonometry. Such arcs have been measured in Lapland; in Peru; from Dunkirk, in France, to Barcelona, in Spain; at the Cape of Good Hope, and from Shanklin Down, in the Isle of Wight, to Balta, in Shetland. It was by these measurements that the earth was discovered to be an oblate spheroid. (*Airy's Pop. Astron.*, and *Herschel's Astron.*)

3. *Astron.*: (For arc of elevation, see *ANGLE*. For *Diurnal Arc*, *Nocturnal Arc*, &c., see *DIURNAL*, *NOCTURNAL*, &c.)

4. *Mech. Phil.*: Arc of vibration (in a pendulum); The arc in which it vibrates.

5. *Electricity*. Voltaic arc: A luminous arc, which extends from one pencil of charcoal to another, when these are fixed to the terminals of a battery in such a position that their extremities are one-tenth of an inch apart. (*Ganot: Physics*, transl. by Atkinson, 3d ed.)

arc-lamp, *s.* A lamp in which the light is produced by a voltaic arc.

arc-lights, *s.* Light produced by the voltaic arc.

ar'-ca, *s.* [Lat. *arca* = a chest.] A genus of Conchiferous Molluscs, the typical one of the family *Arcae*. The shell is strongly ribbed, or cancellated, hinge straight, with very numerous transverse teeth. They are universally distributed, but are commonest in warm seas. They inhabit the zone from low water to 230 fathoms. In 1875 Tate estimated the known recent species at 140, and the fossil ones at 400, the latter commencing with the Lower Silurian rocks. Of the recent species, *A. Noe*, *A. tetragona*, *A. lactea*, *A. varidentata*, and *A. barbata* occur in England. The fossil species are found in the United States, Europe, and Southern India.

ar-ca-bū-cē-ro, *s.* [Sp.] A musketeer.

"Here in front you can see the very dint of the bullet. Fired point-blank at my heart by a Spanish *arcabucero*."—*Longfellow: Courtship of Miles Standish*, i.

ar'-ca-dæ, *s. pl.* [ARCA.] A family of Conchiferous (bivalved) Molluscs. They have the shell regular and equilateral, its hinge with a long row of slender, comb-like teeth. It contains the genera *Arca*, *Cucullæa*, *Pectunculus*, *Avicula*, *Leda*, &c.

ar-cā-de, *s.* [In Sw. *arkad*; Ger. *arkade*; Fr. *arcade*; Sp., Port. *arcada*; Low Lat. *arcata*; from Class. Lat. *arcus* = a bow, an arch.] [ARCH.]

Architecture:

1. *Properly*: A series of arches sustained by columns or piers. They may be open or may be closed by masonry behind: thus the small arches built into the walls of some cathedrals are genuine examples of the arcade proper.

¶ An arcade differs from a colonnade in this respect, that while the columns of the former support arches, those of the latter sustain straight architraves. (*Gloss. of Arch.*)

Arcade.

"He had probably, after the fashion of his craft, plied for customers under the arcades of the Royal Exchange."—*Macaulay: Hist. Eng., ch. xxi.*

" . . . a goodly spot,
With lawns, and beds of flowers, and shades
Of trellis-work in long arcades."

Wordsworth: White Doe of Rylstone, iv.

2. *Less accurately*: The arches and piers dividing the body of a building from its aisles. (*Gloss. of Arch.*)

3. A long arched gallery lined on both sides with shops. (*P. Cycl.*)

4. *Loosely*: Any gallery or passage with shops, though not arched.

ar-cā'-dēd, *a.* [Eng. *arcade*; -*ed*.] Furnished with an arcade. (*Penny Mag.*)

Ar-cā'-dī-an, *a. & s.* [In Ger. & Fr. *Arcadien*; Lat. *Arcadius*; from the country *Arcadia*, said to be named after Arcas, a son of Jupiter and Callisto.]

A. As adjective: Pertaining to Arcadia, a country in the heart of the Peloponnesus, the inhabitants of which were reckoned as simple, ignorant, and stupid, but happy.

"The poor, inured to drudgery and distress,
Act without aim, think little, and feel less,
And nowhere but in feign'd Arcadian scenes,
Taste happiness, or know what pleasure means."

Cowper: Hope.

B. As substantive:

1. An inhabitant of Arcadia.

"The Arcadians speak of Jupiter himself."

Cowper: Transl. from Virgil, Æneid, bk. viii.

2. A name sometimes assumed by persons in modern times who imitated or affected to imitate Arcadian simplicity.

" . . . the wits even of Rome are united into a rural group of nymphs and swains under the appellation of modern Arcadians."—*Goldsmith: Polite Learning*, ch. iv.

ar-cā'-nā, *s. pl.* [Pl. neut. of Lat. *arcanus*.] [ARCANUM.]

***ar-cā-ne**, *a.* [Lat. *arcanus* = shut up, closed; from *arca* = a chest.] Hidden, concealed, secret.

"Have I betray'd thy arcane secrecy?"

Tragedy of Locrine, v. 4.

" . . . the arcane part of Divine wisdom, . . ."—*Bp. Berkeley: Siris*, § 269.

ar'-cā-nīte, *s.* [From Lat. *arcantum duplicatum*, one of the names given to it by the alchemists.] The name of a mineral, the same as *Arthitalite* and *Glaserite* (q. v.).

ar-cān'-nā, *s.* A kind of red chalk used by carpenters to color their lines.

ar-cā-nūm, *s.* [Lat. *arcantum*, neut. sing. of adj. *arcantus*, neut. pl. *arcana*. In Ger. & Fr. *arcantum*; Sp., Port., & Ital. *arcano*.]

1. *Gen.*: Anything hidden, a secret. Anything difficult to explore. (Generally in the plural, *arcana* = secrets.)

" . . . which, until traced by Newton up to this their origin, had ranked among the most inscrutable arcana of astronomy."—*Herschel: Astron.* (5th ed.), § 230.

II. *Specially:*

1. *Med.*: An undivulged remedy, or what passes for such.

2. *Alchemy & Old Chem.*: A mysterious operation.

arc-bōū'-tant, **arç-bōū'-tant** (ant=ang), *s.*

[Fr. *arc-boutant*, *arc-bouter* = to buttress: *arc* = a bow, an arch; *bout* = end, extremity.]

Arch.: An abutment. "An arch-formed prop which connects the walls of the upper and central portions of an aisled structure with the vertical buttresses of the outer walls." (*Glossary of Architecture*.) It is called also a *flying buttress*, because it passes through the air over the roof of the side aisles.

***ar'-cē-tŷr**, *s.* [Lat. and Old Eng. *ars* = art.] One who learns or teaches art. (*Prompt. Parv.*)

arçh (1), ***arçhe**, *s.* [In Fr. *arche*; Sp., Port., & Ital. *arco*; Low Lat. *arca*; Class. Lat. *arcus* = (1) a bow, (2) the rainbow, (3) anything arched or curved, . . . a mechanical arc, (4) an architectural arch.] [ARC.]

A. Ordinary Language:

¶ I. An arc of a circle.

"The mind perceives that an arch of a circle is less than the whole circle, as clearly as it does the idea of a circle."—*Locke*.

II. (In the architectural sense.) [B., I.]

"To build, to plant, whatever you intend,

To rear the column, or the arch to bend."

Pope: Moral Essays, Epistle iv. 47-8.

"Bid the broad arch the dang'rous flood contain."

Ibid., 199.

"Arches on arches! as it were that Rome,
Collecting the chief trophies of her line,
Would build up all her triumphs in one dome
Her Coliseum stands."

Byron: Child Harold's Pilgrimage, iv. 128.

III. Any object in nature or art which is formed like an architectural arch [B., I.], or is curved like the segment of a circle.

Flying Buttresses.

bōil, bōy; pōūt, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şūn; -tion, -şion = zhūn. -tious, -cious, -sious = şūş. -ble, -dle, &c. = bēl, dēl.

1. Generally:

"It is well once to behold a squall with its rising arch and coming fury, or the heavy gale of wind and mountainous waves."—*Darwin: Voyage round the World*, ch. xxi., p. 502.

2. Specially:

(a) The rainbow.

"Beholds th' amusive arch before him fly."

Thomson: Seasons; Spring, 215.

"Triumphal arch that fills't the sky
When storms prepare to part."

Campbell: The Rainbow.

[See Triumphal Arch defined under B.]

(b) The vault of heaven, which, to a spectator on the earth, seems to be an arch of infinite span.

"What a grand and majestic dome is the sky! How is that immeasurable arch upheld?"—*Hervey: Meditations on the Starry Heavens* (1747).

"Fanning his temples under heaven's blue arch."

Wordsworth: Excursion, bk. viii.

B. Technically:

I. *Arch*.: A series of wedge-shaped stones or bricks, so arranged over a door or window in an edifice for habitation, or between the piers of a bridge, as to support each other, and even bear a great superincumbent weight.

The stones and bricks of a truncated wedge shape used in building arches are called *voussours*. The sides of an arch are called its haunches or flanks, and by old English writers of the sixteenth century its *hause*. The highest part of the arch is called its *crown*, or by the old English authors the *scheme* or *skeen*, from the Ital. *schiena*. The lowest *voussours* of an arch are called *springers*, and the central one which holds the rest together the *keystone*. The under or concave side of the *voussours* is called the *intrados*, and the outer or convex one the *extrados* of the arch. A chord to the arch at its lower part is called its *span*, and a line drawn at right angles to this chord, and extending upward to its summit, is called its *height*.

The *impost* of an arch is the portion of the pier or abutment from which the arch springs. If the height of the crown of an arch above the level of its impost is greater than half the span of the arch, the arch is said to be *surmounted*. If, on the contrary, it is less, then the arch is said to be *surbased*.

The *curved* arch was known to the Assyrians and the Old Egyptians. Sir J. G. Wilkinson considers that it existed in brick in the reign of Amenoph I., about B. C. 1540, and in stone in the time of Psammetichus II., B. C. 600. The evidence is derived from the ruins of actual buildings, but paintings appear to carry the arch back to about 2020 B. C. There is no mention of the genuine arch in Scripture, the term "arches," in Ezek. xl. 16, being a mis-translation.

The arch was brought into extensive use by the Romans, and everywhere prevailed till the twelfth century A. D. when the arch pointed at the apex, and called in consequence the pointed arch—the one so frequently seen in Gothic architecture—appeared in Europe as its rival. The forms of both curved and pointed arches may be varied indefi-

Triumphal arch: An arch erected in commemoration of some triumph. The idea has been borrowed from the ancient Romans, who erected many such structures, as those of Augustus, Titus, Trajan, and other emperors.

II. *Anat.*: The word *arch* is employed to designate various portions of the mechanism existing in the body.

"... its neural *arch*."—*Todd & Bowman: Physiol. Anat.*, ii. 597.

"... the first visceral *arch*, ... the second visceral *arch*, ... the third visceral *arch*."—*Ibid.*, p. 599.

Arches, Court of. [So named from the fact that it originally met in the church of St. Mary-le-Bow (Lat. *Santa Maria de arcubus*), literally, "of bows" or "arches," by which is meant that the roof or steeple was supported by arches. The name was retained after the court was removed, first to Doctors' Commons and then to Westminster Hall.] An ecclesiastical court of appeal for the Archbishopric of Canterbury. It has proper jurisdiction over thirteen "peculiar" parishes in London belonging to the Archbishop of Canterbury; but as the judge of the court, who is called Dean of Arches, is also the principal officer under the Archbishop, he now receives and determines appeals from the sentences of all inferior ecclesiastical courts within the province. Combined with it, or annexed to it, is the Court of Peculiars. [PECULIARS.] Appeal from both of these ecclesiastical judicatories originally lay to the King in Chancery, afterward it was to the Judicial Committee of Privy Council. (*Blackstone, Wharton, &c.*)

arch-brick, s. A brick of a wedge shape, suitable to be employed in the building of an arch.

arch-buttant, s. [ARCH-BOUTANT.]

arch-buttress, s. The same as *arc-boutant*, a flying arch. [ARCH-BOUTANT.]

arch-like, a. Like an arch.

"At this period the arteries run in *arch-like* branches."—*Darwin: Descent of Man*, pt. i., ch. i.

arch-stone, s. A stone belonging to an arch.

"... the weight of any one *arch-stone*."—*Penny Cyclop.*, ii., 261.

arch-way, s. A way under an arch.

arch-wayed, a. Provided with a way which runs under an arch.

arch-work, s. Work with the object of erecting arches.

**arch* (2), s. [ARCHE (2), ARK.]

arch, v. t. & i. [From the substantive. In Fr. *arquer*; Sp. & Port. *arquear*; Ital. *archeggiare*.]

A. Transitive:

1. To cover with an arch or arches.

2. To form into an arch or arches.

"The stately sailing swan
Gives out his snowy plumage to the gale,
And *arching* proud his neck, with oary feet
Bears forward fierce, . . ."

Thomson: Seasons; Spring.

B. Intransitive: To assume the form of an arch, or of a series of arches.

"The nations of the field and wood
Build on the wave, or *arch* beneath the sand."—*Pope*.

arch, a. [A corrupted form of *argh*. In A. S. *eargh* = inert, weak, timid, evil, wretched; Sw. *erts* = chief, first, arrant; *arg* = angry, passionate, bitter, shrewd, vehement; Dan. *arrig* = malicious, spiteful, wicked; Dut. *arglistig* = crafty, cunning; Ger. *arg* = bad, mischievous, cunning, severe. Mahn connects it with the Gr. *archos* = a chief, a commander. It is closely akin to *arrant*.] Sly, cunning; sometimes, but not always, combined with the sense of mirthful mischief, or waggishness. Used—

(a) Of persons:

"Great. Above all that Christian met with after he had passed through Vanity Fair, one By-ends was the *arch* one."—*Bunyan: Pilgrim's Progress*, pt. ii.

(b) Of a word spoken:

"... after his comic manner spoke his request with so *arch* a leer that . . ."—*Tatler*, No. 193.

"And freak put on, and *arch* word dropped . . ."

Wordsworth: Excursion, bk. vii.

arch, s., adj., and in composition:

A. As substantive: [From Gr. *archos* = a leader, a chief, a commander.] [See B., etym.] A chief, a leader.

"My worthy *arch* and patron comes to-night."

Shakesp.: King Lear, ii. 1.

B. As adjective: Either an independent word, or in composition.

In compos.: [Gr. *archi*, an inseparable prefix from the same root as *archos* = chief; *archō* = to be first, to be a leader, a commander; *archē* = beginning. In

Lat. *archi*; Low Lat. & Ital. *arci*; Port. & Sp. *arce*; Fr. *archi*; O. H. Ger. *erzi*; M. H. Ger. *erze*, *erz*; H. Ger. *erz*; Dut. *aerts*; Dan. *ark*, *arki*; Sw. *erke*; A. S. *arce*.] Chief, principal, highest, most eminent, of the first order. It is used—

(a) As an independent word.

arch-æ-ō-lō'-gŷ-an, *s.* [Eng. *archæology*; -ian.] the same as ARCHÆOLOGIST (q. v.). (*J. Murray*.) (*Worcester's Dict.*)

arch-æ-ō-lōg'-ŷc, ***arch-chaī-ō-lōg'-ŷc**, ***arch-chaī-ō-lōg'-ŷck**, **arch-æ-ō-lōg'-ŷc-al**, *a.* [In Fr. *archéologique*; Gr. *archaiologikos*; *archaios*=ancient, and *logikos*=pertaining to speech; *logos*=a word, . . . a discourse.] Pertaining to the science of archæology.

¶ The form *archaiologick* is in Todd's *Johnson's Dictionary*, while *archæologic* is absent. The latter term appears in Webster.

arch-æ-ō-lōg'-ŷc-al-lŷ, *adv.* [Eng. *archæologic*; -ally.] After the manner of archæologists. In the way recognized in archæology.

arch-æ-ōl'-ō-gŷt, ***arch-chaī-ōl'-ō-gŷt**, *s.* [In Fr. *archéologue*; Gr. *archaiologos*, *archaiologeō*=to discuss antiquities; *archaios*=ancient; *logistikos*=skilled in calculating or in reasoning.] One who makes a special study of antiquity, and especially of the ruined buildings, the inscriptions, and other relics which it has left behind. There are in London at present a British Archæological Association and a Royal Archæological Institute, besides the Society of Antiquaries, which received its charter in 1707. [ARCHÆOLOGY.]

arch-æ-ōl'-ō-gŷ, ***arch-chaī-ōl'-ō-gŷ**, *s.* [In Ger. *archæologie*; Fr. *archéologie*; Port. *archeologia*; Gr. *archaiologia*, from *archaiologeō*=to discuss things out of date; *archaios*=from the beginning, ancient; *archē*=beginning; *logos*=a discourse; *legō*=to say, speak, utter. The word came into the language in the Greek form *archaiology*, which is the word in Johnson's Dictionary. Now only the Latin spelling *archæology* is used.] The science which treats of antiquity, which it investigates by studying oral traditions, monuments of all kinds, written manuscripts [PALÆOGRAPHY], and printed books [BIBLIOGRAPHY]. The Society of Antiquaries [ARCHÆOLOGIST], at its first constitution, gave special attention to mediæval times; of late, the combined efforts of geologists and archæologists have thrown much light on the history of primeval savage man in Europe; and finally, the Society of Biblical Archæology, founded in 1870, has scientifically investigated Accadian, Assyrian, Babylonian, Jewish, Egyptian, Cyprian, and other antiquities with equal ardor and success. [ARCHÆOLOGICAL.]

arch-æ-ōp'-tēr-ŷx, *s.* [Gr. *archaios*=ancient, and *pterux*=a wing, a bird.]

Palæont.: A genus of fossil birds. A *lithographica* (*Von Meyer*) is a fossil bird allied to the Gallinacæ, but constituting a distinct order in the class of Birds in the opinion of Professor Owen. Mr. Parker makes it akin to the Palamedea, or Screamer. It has a curiously antique tail. It occurs in the Solenhofen Shale, believed to be of Upper Oolitic age.

arch-cha'-ŷc, **†arch-cha'-ŷc-al**, *a.* [In Fr. *archaïque*; Gr. *archaikos*, or *archaiikos*=old-fashioned; *archaizō*=to be old-fashioned; *archaios*=ancient; *archē*=beginning.] Pertaining to antiquity.

". . . not devoid of information to the *archæo* student."—*Way: Pref. to Prompt. Parv.* (1843), i. 7.

"It was engraved on a brazen pillar, in Greek characters of an *archaic* form, but, as it appears, was composed in the Latin language."—*Lewis: Early Rom. Hist.*, ch. v., § 7.

In Sw. *erkebishop*; Dan. *ærkebishop*; Dut. *aartsbisschop*; Ger. *erzbischof*; Fr. *archevêque*; Sp. *arzobispo*; Port. *arcebispo*; Ital. *arcivescovo*; Lat. *archiepiscopus*; Gr. *archiepiscopeos*, *archi*=chief, and *episcopos*=bishop.] [See BISHOP.] A chief bishop. The attentive reader of the Acts of the Apostles,

bōil, bōŷ; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðhis; sin, aŷ; expect. Xēnophon, exist. ph = f. -cian, -tian = shān. -tion, -sion = shŷn; -tŷon, -ŷion = zhŷn. -tious, -cious, -sious = shŷs. -ble, -dle, &c. = bēl, dēl.

noting that nearly the whole missionary energy of St. Paul was expended upon the cities and chief towns rather than on the villages and the country districts, will be prepared to learn that there were flourishing churches in the leading centers of population, while as yet nearly all other parts remained "pagan." [PAGAN.] So strong, however, was the evangelistic spirit prevailing, that in due time every one of the first-formed churches was surrounded by a number of younger and less powerful congregations which it had called into being. The pastors of these new churches being called "bishops," that term no longer appeared a dignified enough appellation for the spiritual chief of the mother church, and about A. D. 340 the Greek title of *archiepiscopos* [=Eng. *archbishop*], was introduced to meet the difficulty. Two archbishops figure at the Council of Ephesus, in 431, and in subsequent centuries the designation became common over Christendom.

In England the early British churches were, in large measure, swept away by the Anglo-Saxon invaders, who were heathens, and the country consequently required to be re-converted. The great southern center from which this was done was Canterbury, then the capital of Kent, where King Egbert gave Augustine, the chief missionary, a settlement. In the north, York, the chief town of Northumbria, where King Edwin built a shrine for Paulinus, became the great focus of operation for that part of England; hence the two archbishoprics now existing are those of Canterbury and of York. The prelate who occupies the former see is Primate of all England, while his brother of York is only Primate of England, the superiority of the see of Canterbury, long contested by that of York, having been formally settled in A. D. 1072. The former is the first in dignity after the princes of the blood; the latter is not second, but third, the Lord Chancellor taking precedence of him in official rank. An archbishop is often called a Metropolitan. He exercises a certain supervision over the bishops, and receives appeals against their decisions in matters of discipline.

"A secular assembly had taken upon itself to pass a law requiring *archbishops* and bishops, rectors and vicars, to abjure, on pain of deprivation, what they had been teaching all their lives."—*Macaulay: Hist. Eng.*, ch. xiv.

ar'ch-bîsh-ôp-rîc, s. [In Fr. *archevêche*; Ital. *arcivescovado*=archbishop; and Eng. suffix *-ric*=territory or jurisdiction.] The office or dignity of an archbishop, or the see over which he exercises spiritual authority.

"Several months were still to elapse before the *archbishopric* would be vacant."—*Macaulay: Hist. Eng.*, ch. xiv.

ar'ch-bûtl'er, s. A chief butler, an officer of the old German empire who presented the cup to the emperor on solemn and state occasions.

ar'ch-çhan'-çêl-lôr, s. [Eng. *arch*; *chancellor*. In Fr. *archichancelier*.] A chief chancellor. An officer of high rank who formerly presided over the secretaries of the court. Under the first two races of French kings, when their kingdom consisted of Germany, Italy, and Arles, there were three arch-chancellors—viz., the archbishops of Mentz, Cologne, and Treves.

"The seals of the triple kingdom were borne in state by the archbishops of Mentz, Cologne, and Treves, the perpetual *archchancellors* of Germany, Italy, and Arles."—*Gibbon: Decline and Fall*, ch. xlix.

ar'ch-dâp'-i-fêr, s. [ARCHIDAPIFER.]

ar'ch-dêa-côn, ***ar'che-dêkne** (or **con=kn**), s. [Eng. *arch*, and *deacon*; A. S. *arcediacon*; Dan. and Ger. *arkidiaconus*; Dut. *aartsdeken*; Fr. *archidiaque*; Sp. *arcediano*; Port. *arcediogo*; Ital. *arcidiacono*; Lat. *archidiaconus*; Gr. *archidiaconos*; *archi*=chief, and *diaconos*=deacon.] [DEACON.] A chief deacon. The first institution of deacons [Gr. *diakonoi*=servants, waiting-men, ministers, messengers] is recorded in Acts vi. They were elected to discharge such half-secular functions as raising and distributing alms to the poor, thus leaving the apostles free for purely spiritual work. It may be assumed that when meetings of the deacons took place, some one presided over them, and if this chairman was one of themselves, he would naturally be called in Greek *archidiaconos*, in Eng. archdeacon. The president of the deacons' meeting would require to be often in conference with the pastor; and when people meet, mind will affect mind, altogether apart from the relative dignity of the men brought in contact with each other. The archdeacon gradually gained in power, and becoming what was called "the bishop's eye," was often dispatched on confidential missions to different parts of the diocese, there probably being about him a pliability wanting in the *chorepiscopi*=country, coadjutor or suffragan bishops. The survival of the fittest took place, and the archdeacon ended by superseding the more dignified but less bending functionaries. The same drama was re-enacted on English soil between the archdeacons and the rural deans, the latter, who were at first

higher in position than their rivals, being now regarded as inferior to them in rank; an ordinary, or full dean, however, as contradistinguished from a rural dean, is admittedly superior to an archdeacon. There were in December, 1878, seventy-six archdeacons in the English Church, who give assistance to the bishops, and have under them 610 rural deans exercising an unpaid supervision over the clergy. The emoluments of the archdiaconates being but trifling, the occupants of the office generally hold also other preferments. They are empowered to hold a court, the lowest in the scale, from which there lies an appeal to the bishop of the diocese.

"They weren in the *archedeknes* book."

Chaucer: C. T., 6,900.

"Twenty-two deans and fifty-four *archdeacons* sate there in virtue of their offices."—*Macaulay: Hist. Eng.*, ch. xiv.

ar'ch-dêa-côn-rÿ (or **con=kn**), s. [Eng. *archdeacon*, and suffix *-ry*.] The district over which an archdeacon exercises his authority or jurisdiction; more rarely his office, or his residence.

"Every diocese is divided into *archdeaconries*."—*Blackstone: Comment.*, bk. i., *Introd.*, § 4.

ar'ch-dêa-côn-shîp (or **con=kn**), s. [Eng. *archdeacon*, and suffix *-ship*.] The office of an archdeacon.

ar'ch-dê-çêl-vêr, s. [Eng. *arch*; *deceiver*.] A chief deceiver; one pre-eminent above all others for deceit.

"He set off for London, breathing vengeance against Churchill, and learned, on arriving, a new crime of the *arch-deceiver*. The Princess Annie had been some hours missing."—*Macaulay: Hist. Eng.*, ch. ix.

ar'ch-dî-ô-çêse, s. [Eng. *arch*; *diocese*.] The locality over which the archbishop presides.

ar'ch-drû-id, s. [Eng. *arch*; *druid*.] A chief druid; the head of the ancient Druids.

ar'ch-dû-cal, a. [Eng. *arch*; *ducal*. In Fr. & Sp. *archiducal*.] Pertaining to an archduke.

"It would be difficult to enumerate all the different quarterings and armorial bearings of the *archducal* family."—*Guthrie*.

ar'ch-dûch-êss, s. [Eng. *arch*, and *duchess*. In Fr. *archiduchesse*; Sp. *archiduquessa*; Ital. *archiduchesa*.] A chief duchess. An Austrian title, applied to the daughters of the emperor.

ar'ch-dûch-ÿ, s. [Eng. *arch*; *duchy*. In Fr. *archiduché*; Ital. *arciducato*.] The territory ruled over by an archduke or archduchess.

ar'ch-dûke, s. [Eng. *arch*; *duke*. In French *archiduc*; Sp. & Port. *archiduque*; Ital. *arciduca*.] A chief duke. An Austrian title applied to the sons of the emperor.

"Philip, *archduke* of Austria, during his voyage from the Netherlands toward Spain, was weather-driven into Weymouth."—*Carew's Survey*.

ar'ch-dûke-dôm, s. [Eng. *archduke*; *-dom*.] The territory or jurisdiction of an archduke or archduchess.

"Austria is but an *archdukedom*."—*Guthrie*.

***ar'che** (1), s. [ARCH (1).]

***ar'che**, ***arch** (2), s. [Fr. *arche*=Noah's Ark, or any similar structure. Lat. *arca*=a chest, a purse.] [ARK.]

1. An ark.

"Dat *arche* was a feteles good,
Set and limed a-gen the flood."
Story of Gen. and Exod. (ed. Morris), 561-2.

2. A purse.

"Thi tenement complet and consummat.
Thyne silver and thine *arch* euacuate."
Early Scottish Verse (ed. Lumby), i. 272.

***ar'che-wold**, s. An ark-board.

"Quan he dede him in the *ar'che-wold*."
Story of Gen. and Exod. (ed. Morris), 576.

ar-chê'-al, a. [ARCHEUS.] Pertaining to, or caused by, the "archeus."

ar'ched, *pa. par. & a.* [ARCH, v.]

As participial adjective:

1. Covered with an arch.

"As she paused at the *arched* door."
Scott: The Lay of the Last Minstrel, i. 20.

2. Curved in the form of an arch.

". . . the swan with *arched* neck."
Milton: P. L., bk. vii.

3. *Her. Arched*, or *archy*, signifies that an ordinary on an escutcheon is bent or bowed.

***ar'che-di-a-cre**, s. [Fr. *archidiaque*.] An archdeacon. (*Chaucer*.)

ar'ch-ên-çêph'-al-a, s. [Gr. *archô*=to overrule; *enkephalos*=the brain; *kephalê*=the head.] A term proposed by Professor Owen for his first sub-class

of Mammalia. He included under it one order, Bimana, and a single genus, Homo, or Man. The characters he assigned to the sub-class were the overlapping of the olfactory nerves and cerebellum by the cerebral hemispheres, so that the latter constitute a third lobe; the presence of a posterior horn to the lateral ventricle, and also that of the hippocampus minor. (*Owen: Classif. of Mammalia*.)

ar'ch-êr, s. [In Fr. *archer*; Sp. *archero*; Port. *archeiro*; Ital. *arciere*, *arciere*; from Lat. *arcus*=a bow.]

1. *Ord. Lang.*: One who is skilled in the use of the bow, having acquired the art either to employ it in battle or for other purposes.

"Against him that bendeth let the *archer* bend his bow, . . ."—*Jer.* li. 3.

2. *Astron.*: The constellation Sagittarius.

"Now when the cheerless empire of the sky
To Capricorn the Centaur *Archer* yields,"

Thomson: Spring.

archer-fish, s. A fish, the *Toxotes aculator*, which shoots water at its prey. It is found in the East Indian and Polynesian seas.

archer-game, s. A game of archery. Shooting at marks with bows and arrows, for prizes or other honors.

"I must be *bonne*

To see the *archer-game* at noon."

Scott: Lady of the Lake, v. 17.

archer-man, s. One skilled in the use of the bow.

"While, to explore the dangerous glen;
Dive through the pass the *archer-men*."

Scott: Lady of the Lake, vi. 16.

archer-rank, s. A rank of archers drawn up for battle, or at least for the employment of the bow.

"Then spurs were dash'd in chargers' flanks,
They rush'd among the *archer-ranks*."

Scott: The Lord of the Isles, vi. 23.

ar'ch-êr-êss, s. [Eng. *archer*; *-ess*.] A female archer.

"The swiftest and the keenest shaft that is,
In all my quiver—

I do select; to thee I recommend it,

O *archeress* eternal!"

Fanshawe: Past. Fid., p. 143.

ar'ch-êr-ÿ, s. [Eng. *archer*; *-y*.]

1. The employment of the bow and arrows in battle, in hunting, or for other purposes. The art is of great antiquity. It is mentioned in Gen. xxi. 20, and in the Iliad and the Odyssey, besides being depicted on Egyptian monuments and Assyrian sculptures. The Philistines seem to have excelled in it, which caused David to issue orders that special instruction and training in it should be imparted to the Hebrews (2 Sam. i. 18). There were archers in both the Greek and Roman armies. In England, up to the time when gunpowder came into general use, the archers constituted some of the most formidable soldiers in the English army, several of the battles won over the Scots having been gained by their surpassing skill in the use of the bow. The weapon first employed was the arbalest, or cross-bow [ARBALEST]; afterward the long bow supplanted it, the change taking place some time before the reign of Edward II. The Scottish "Royal Company of Archers" still claim the right of acting as the Sovereign's body-guard in Scotland; but picturesque as they may look in a procession, it is to be hoped, both for their own and the monarch's sake, that they may never have to test the powers of their antique weapons against those of the breech-loading rifle.

"Had often heard the sound of glee
When there the youthful Nortons met
To practice games and archery."

Wordsworth: The White Doe of Rylstone, v.

†2. The art or skill of an archer.

"Blest seraphims shall leave their quire,
And turn Love's soldiers upon thee,
To exercise their *archery*."

Crashaw: Steps to Temple.

†3. Those who at any time or place practice archery; taken collectively the archers. (Chiefly poetic.)

"The venison free, and Bourdeaux wine,
Might serve the *archery* to dine."

Scott: Lady of the Lake, v. 25.

4. Archery as an outdoor sport is very popular in the United States.

ar'ch-êş, s. *pl.* (1). [Pl. of ARCH (1), s. (q. v.).]

1. *Entom.*: The English name given to various species of moths with arch-like zigzags on their wings.

Black arches: *Psilura monacha*, a moth of the family Bombycidae. The primary wings are grayish-

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pine, pît, sîre, sîr, marîne; gô, pôt, or, wôre, wôlf, wôrck, whô, sôn; mûte, cûb, cûre unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

white with many black spots, and four zigzags of the same color. The secondary wings are brownish-gray, spotted with black, and having a white border.

Black Arches (Psilura Monacha).

The expansion of the wing is from fifteen to eighteen lines in the male, and two inches in the female. The caterpillar is brown with gray hairs, and one black with two white spots. (Duncan, in Jardine's Naturalist's Libr.)

Green Arches: *Polia herbida*, a moth of the family Noctuidæ.

Light Arches: *Xylophasia lithoscylea*, a moth of the family Noctuidæ.

Buff Arches: *Thyatira derasa*, a moth of the family Noctuidæ, of a light yellowish-brown color, with two white oblique bands on the upper wings, and several brown or buff zigzag lines on two rows of small white arches on the lower ones. The caterpillar is yellowish-green, with dark brown spots and lines. (Duncan, in Jardine's Naturalist's Libr.)

ar'-chêt (t silent), s. [Fr. *archet*; Ital. *archetto* = the bow of a violin or a similar instrument.]

Music: à *archat* (with bow), a term applied to such musical instruments as are played with the bow. (Porter.)

ar-chê-tÿ'-pal, a. [Eng. *archetype*, -al; Lat. *archetypus*; Gr. *archetupos*.] Pertaining to an archetype, pattern or model.

"Him, who is fairer than the sons of men;
The source of good, the light *archetypal*." Norris.

¶ In the Platonic Philosophy the *archetypal world* is the idea or model of the world as it existed in the Divine mind previous to its creation.

ar'-chê-tÿpe, *tar'-chî-tÿpe*, s. [In Fr. *archétype*; Sp. *arquetipo*; Port. *archetipo*; Ital. *archetipo*; Lat. *archetypum*; Gr. *archetupon*, s., the neut. of *archetupos*=stamped as a model: *archê*=beginning, and *tupos*=a blow, . . . anything struck, . . . a model, type.]

1. *Platonic Philosophy*, and generally: The primitive type, model, or pattern on which anything is formed.

"Then it was that the House of Commons, the *archetype* of all the representative assemblies which now meet, either in the Old or in the New World, held its first sittings."—Macaulay. *Hist. Eng.*, ch. i.

" . . . this great *architype* . . ."—Bacon: *Physiol. Rem.*

2. *Minting*: The standard weight by which the others are adjusted.

3. *Comp. Anatomy*. The *archetype skeleton*: Professor Owen's name for an ideal skeleton of which those actually existing in the several classes of vertebrated animals are held to be modifications.

ar-chê-tÿp'-i-cal, a. [Eng. *archetype*; -ical.] The same as *ARCHETYPAL*. (Warburton.)

ar-chê-ÿs, s. [From Gr. *archê*=beginning . . . first principle element.] A term applied by Basil Valentine, Paracelsus, and Van Helmont to denote the regulative and conservative principles of the animal world—what is now called *vital force*.

**ar'-che-wÿves*, s. pl. [Eng. *arche*=Gr. *archi*=chief, and Old Eng. *wÿves*=wives.] Wives who aspire to govern their husbands. (Chaucer.)

arçh-hî-êr-eÿ, s. [ARCHIEREY.]

tarçh'-i-â-têr, s. [Lat. *archiater*; [Gr. *archi-atros*: from *archi*=chief, and *iatros*=a surgeon, a physician=to heal, to cure.]

1. *Anciently*: The first physician of the Roman emperor; the chief ruler in Greece, &c.

2. *Now*: It is still used in a similar sense in some Continental countries.

"I wanted not the advice and help of the *archiater*, the king's doctor."—Sir T. Herbert: *Trav.*, p. 233.

ar'-chî-cal, a. [Gr. *archikos*=pertaining to rule; *archê*=beginning, rule.] Chief, primary.

"When the brutish life leads us astray from the government of reason, and we cast away . . . that principality and *archical* rule, wherewith God hath invested us, over all our corporeal passions and affections . . ."—Hallywell: *Excel. of Mor. Vir.*, p. 48.

arçh-i-dâp'-i-fêr, *arçh-dâp'-i-fêr*, s. [Gr. *archos*=a chief; Lat. *daps*, genit. *dapis*=sacrificial or other dignified feast; *fero*=to bear. Chief food-bearer.]

In the Old German Empire: An officer whose special function it was, when the emperor was crowned, to carry the first dish of meat to table on horseback. The office belonged to the Elector of Bavaria, though claimed by the Palatine of the Rhine.

arch-i-dî-â-côn-al, a. [From Lat. *archidiaconus*; Gr. *archidiaconos*=an archdeacon.] Pertaining to an archdeacon.

"Thus, the *Archidiaconal* Courts, the Consistory Courts, the Court of Arches, the Court of Peculiars, and the Court of Delegates were revived."—Macaulay: *Hist. Eng.*, ch. vi.

arch-i-ê-pîs'-côp-a-çÿ, s. [In Fr. *archiépiscopat*.] The state of an archbishop.

"I did not dream, at that time, of extirpation and abolition of any more than his [Laud's] *archiepiscopacy*."—Sir E. Dering's *Speeches*, p. 5.

arch-i-ê-pîs'-côp-al, a. [In Fr. *archiépiscopal*; Sp. *arzobispal*; Ital. *arcivescovile*.] Pertaining to an archbishop.

"Nothing in England astonished him so much as the *Archiepiscopal* library."—Macaulay: *Hist. Eng.*, ch. xlii.

arch-i-ê-pîs'-côp-ate, s. [In Fr. *archiépiscopat*; Port. *archiepiscopado*.] The office, dignity, or jurisdiction of an archbishop; an archbishopric. (Ch. Obs.)

arch-i-ê-pîs'-cô-pâl'-i-tÿ, s. [As if from a Low Lat. *archiepiscopalitas*.] The dignity of an archbishop. (Fuller: *Ch. Hist.*, II. iii. 39.)

arçh-i-êr-eÿ, *arçh-hî-êr-eÿ*, s. [Lat. *archie-reus*; Gr. *archieus*=a chief priest: *archi*=a chief, and *hiereus*=priest, a sacrificer.] A name given in Russia to the higher ecclesiastical dignities of the Greek Church, the metropolitans, the archbishops, and the bishops. (R. Pinkerton.)

ar-chîg'-ra-phêr, s. [Gr. *archi*=chief, and *graphô*=to write.] A chief secretary. (Dr. Black.)

ar'-chîll, *ar'-göl*, *or'-chîl*, *or'-chîll*, *or'-chäl*, s. [In Fr. *archil*, *archilla*, and *orchilla*, also *Orseille des Canaries*.] Two species of lichen, the *Roccella tinctoria* and *R. fusiformis*, which grow in the Canary and Cape Verde Islands. They are found on rocks near the sea. They produce a fine but fugitive purple dye, and are largely employed for that purpose. Arriving in this country in its natural state, it is ground between stones so as to be completely bruised, but not reduced to powder. Then it is moistened with a strong spirit of urine, or with urine itself mixed with quicklime. In a few days it acquires a purplish-red, and finally a blue color. In the former state it is called *Archil*, in the latter *Lacmus* or *Litmus*. Cudbear is similarly made. Other lichens, such as the *Variolaria orcina*, the *Lecanora tartarea*, &c., are sometimes used in place of the *Roccella*.

Ar'-chî-lô'-chî-an, a. & s. [In Ger. *Archilochisch*; Lat. *Archilochius*. See the def.]

A. *As adjective*: Pertaining to the Greek satiric poet Archilochus, who flourished about 700 B. C., or to the verse which he introduced.

B. *As substantive*: A kind of verse supposed to have been invented by the Greek poet Archilochus. The "*Archilochian major*" has seven feet, the first three dactyls or spondees, the fourth a dactyl, and the fifth, sixth, and seventh trochees, as—

Nũc dẽcẽt | aũt virĩ | dĩ nĩtĩ | dũm cãpũt ãmpẽ | dĩrẽ | mÿr | tũ.

(Horace, Carm. I., iv. 9.)

The Archilochian minor has two dactyls and a cæsura, as—

Ãrbõrĩ | bãsquẽ cõ | mẽ.

(Horace, Carm. IV., vii. 2.)

Horace varies these two meters in four different ways, called the first, second, third, and fourth Archilochian meters. The first consists of a dactylic hexameter combined with an Archilochian minor; the second of a dactylic hexameter with an iambegus; the third of an iambic trimeter and an elegiambus; and the fourth of an Archilochian major, with a catalectic iambic trimeter.

Ar'-ch-i-mãge, *Arch-i-mã-gõ*, *Ar'-chĩm'-a-gũs*, s. [Gr. *archi*=chief, and *Magos*=a Magian, . . . an enchanter, a wizard.]

1. The high priest of the Median or Persian Magi. The title was assumed by Darius Hystaspes.

2. Any magician or wizard; an enchanter.

¶ The term perpetually figures in Spenser's *Faerie Queene*. Some other writers have copied it from that work.

"I will," he cry'd, 'so help me, God! destroy
That villain *Archimage*.'"
Thomson: *Castle of Indolence*, ii. 32.

arch-i-mãn'-drite, s. [In Russ. *arkhuman-drum*; Ger. *archimandrit*; Fr. *archimandrite*; Sp. Port., Ital., & Lat. *archimandrita*; Gr. *archimandritês*=*archi*=chief, *mandra*=an enclosed space, . . . a monastery.] An Eastern abbot or superior of a monastery, especially one of the first order.

"His rival Eutyches was the abbot, or *archimandrite*, or superior of three hundred monks."—Gibbon: *Decline and Fall*, ch. xlvii., vol. iv., p. 353.

¶ Formerly it was used in a somewhat wider sense, being occasionally applied to archbishops.

Arch-i-mê'-dê-an, *Ar'-chî-mê'-dĩ-an*, a. [Eng. *Archimed(es)*; -ian.] Pertaining to Archimede, a celebrated mathematician of Syracuse, who lived in the third century B. C.

Archimedean principle, or *Archimedean theorem*; *Archimedes's principle* or *theorem*: It is that a body immersed in a liquid loses a part of its weight equal to the weight of the displaced liquid. It was by this law that he discovered the amount of alloy mixed in Hiero's crown. (Ganot: *Physics*, transl. by Atkinson, 3d ed., 1868, §104.) It holds good of gases as well as liquids properly so called. (Ibid., §168.)

Archimedean Screw, *Archimedes's Screw*: A water-screw or "*cochlion*." *Cochlion* is from the Greek *kochlion*=a small snail, the shell of which it resembles, though it must be confessed very remotely, in being of a spiral form. It consisted of a spiral pipe or tube wound around a long cylinder.

Archimedean Screw.

The machine, which was originally designed for raising water from the Nile, was slanted so that one end of the spiral tube was beneath the water of the river, and the other rested on the bank. The inside of the tube really consisted of an inclined plane, down which the water flowed, though to a superficial observer it seemed to flow up in contravention of the laws of gravity. It was, of course, unable to act if slanted to the water at too high an angle. It is now disused, one serious defect which it has being that it is apt to become clogged up with weeds, mud, stones, &c., which cannot easily be removed from a tube of spiral form.

arçh'-ing, pr. par. & a. [ARCH, a.]

As participial adjective:

1. Having in it an artificial or a natural arch.

"Now driv'n before him through the *arching* rock,
Came tumbling, heaps on heaps, th'unnur'd flock."
Pope: *Homer's Odyssey*, bk. ix., 280-1.

2. Curving like an arch.

"Blue ribbons decked his *arching* mane."
Scott: *Marmion*, i. 6.

"The *arching* limes are tall and shady."
Tennyson: *Margaret*, 5.

ar'-chî-pêl'-ağ-ic, a. [Eng. *Archipelag(o)*; -ic.] Pertaining to an archipelago, and especially to the most notable one—that between Greece and Asia Minor, divided by the Ægean Sea. (Ed. Rev.) (Worcester's Dict.)

Ar'-chî-pêl'-a-gõ, s. [In Dut. & Fr. *Archipel*; Ger. *Archipel* or *Archipelagus*; Sp. & Port. *archilago*; Ital. *arcipelago*; Gr. *archi*=chief, and *pelagos*=sea; countenancing the belief that the Greeks considered the sea which washed their eastern shores, and was the chief sea to them, the chief sea also to others.]

1. The sea studded with islands which lies between Greece and Asia Minor.

" . . . the line [of Eubœan hills] is further prolonged by a series of islands in the *Archipelago*, Andros, Tenos, Myconos, and Naxos."—Grote: *Hist. Greece*, pt. ii., ch. i.

2. Any sea agreeing with the former in containing many islands.

" . . . hence, after long subsidence, this great reef would not produce one great atoll 400 miles in length, but a chain or *archipelago* of atolls, of very nearly the same dimensions with those in the Maldiva *archipelago*."—Darwin: *Voyage round the World*, ch. xx.

ar'-chîp'-pũs, s. [Gr. *Archippos*, a Greek proper name (Col. iv. 17; Philem. 2).] A fine butterfly, the *Danaus archippus*.

ar'-chî-tẽct, s. [In Dan. *architect*; Sw. *arkitekt*; Ger. *architekt*; Fr. *architecte*; Sp. *arquitecto*; Port. *architecto*; Ital. *architetto*; Lat. *architectus*, *architecton*; Gr. *architektôn*=chief artificer, (*literally*) chief carpenter: *archi*=chief, and *tektôn*=a carpenter. The word carries us back to the period when edifices were constructed chiefly of wood.]

1. *Lit.*: One who draws the plans designed to show the builders the exact dimensions, form, and

bõil, bõy; pout, jowl; cat, çell, chorus, çin, bench; go, gem; thin, ðis; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = șan. -tion, -sion = șũn; -țion, -șion = zhũn. -tious, -cious, -sious = șũs, -ble, -dle, &c. = bel, del.

arrangements of an edifice which, under his superintendence, they are engaged to erect. Among great architects may be enumerated M. Vitruvius Pollio, who seems to have lived in the time of Augustus; and in England, Inigo Jones, born about 1572, died 1652; and the very celebrated Sir Christopher Wren, who died, aged ninety-one, in 1723. He drew out the plan for the restoration of St. Paul's, and the rebuilding of many city churches destroyed in the great fire of 1666.

2. Fig.: A contriver or designer of anything. Used—

(a) Spec.: Of man.

"Chief architect and plotter of these woes;
The villain is alive in Titus' house."

Shakesp.: *Titus Andronicus*, v. 3.

"A Frenchwoman is a perfect architect in dress; she never, with Gothic ignorance, mixes the orders . . ."—*Goldsmith: The Bee*, No. ii.

(b) Of God, as the Designer of everything created.

"This inconvenience the Divine Architect of the body obviated."—*Ray: On the Creation*.

" . . . as by work

Divine the sovereign Architect had framed."

Milton: *P. L.*, bk. v.

(c) Of any animal constructing a habitation for itself by instinct, but in a style suggesting the architecture of man.

ar-chi-tect'-tive, s. [Eng. *architect*; -ive.] Used for building purposes; suitable for building purposes.

"How could the bodies of many of them, particularly the last-mentioned, be furnished with architectiv materials?"—*Derham: Physico-Theology*.

ar-chi-tect-tōn'-ic, *ar-chi-tect-tōn'-ick, a. & s. [In Ger. *architectonisch*; Fr. *architectonique*; Port. *architectonico*; Ital. *architettonico*; Lat. *architectonicus*; Gr. *architektonikos*, from *architektonēō*=to be an architect, to construct, to contrive: *archi*=chief, and *tektainomai*=to make or frame, to devise; *tektōn*=a carpenter.]

A. As adjective: Pertaining to architecture; having a genius or an instinct for architecture; skilled in architecture.

"How much will this architectonic wisdom (if I may call it), excited in framing and regulating an innumerable company of differing creatures, be recommended!"—*Boyle: Works*, v., p. 147. (*Richardson*.)

B. As substantive: The art or capacity of arranging knowledge methodically. (*Goodrich & Porter*.)

ar-chi-tect-tōn'-ic-al, a. & s. [Eng. *architectonic*; -al.]

A. As adjective: The same as ARCHITECTONIC, adj. (q. v.).

" . . . not ectypal, but archetypal, and architectonical of all."—*Cudworth: Intell. Syst.*, p. 853. (*Richardson*.)

B. As substantive: That which, in a loose sense, creates, frames, or originates anything.

"Those inferior and ministerial arts, which are subjected unto others, as to their architectonicals."—*Fotherby: Atheomastix*, p. 186.

ar-chi-tect-tōn'-ics, s. [In Ger. *architektonik*.] The science or art of architecture.

ar-chi-tect'-tor, *ar-chi-tect'-toŭr, s. [Port. & Lat.] An architect.

"Having first, like a skillful architect, made the frame, he now raises and sets it up."—*Austin: Hæc Homo*, p. 55.

" . . . merchants, pilots, seamen, architects, masons, &c."—*Gayton: Notes on Don Quixote*, iv. 11.

ar-chi-tect'-trëss, s. [Eng. *architector*; -ess.] A female architect. (*Lit. & fig.*)

"If Nature herself, the first architectress, had (to use an expression of Vitruvius) windowed your breast."—*Wotton: Remains*, p. 139.

ar-chi-tect'-tur-al (tur=tyūr), a. [Fr. *architectural*.] Pertaining to architecture. (*Mason*.)

"Plot's, though a neat engraving, and in the most finished manner of that excellent architectural sculptor, Michael Burghers, is by no means a faithful and exact representation."—*Warton: Hist. of Kiddingington*, p. 16.

ar'-chi-tect-ure (ture=tyūr), s. [In Ger. *architektur*; Fr. *architecture*; Sp. *arquitectura*; Ital. *architettura*; Port. & Lat. *architectura*, from Lat. *architectus*.] [ARCHITECT.]

1. Properly, the art of building; more specifically, the art of building human habitations, temples, or edifices of any kind, whether humble or splendid. The term is generally, however, limited to the art of erecting edifices which, besides answering their primary purpose of utility, are fitted by beauty, by symmetry, and in other ways, to please the eye and gratify the mind. About half a century ago it was common to limit the signification still farther to buildings constructed after Greek or Roman models; but this unduly narrow meaning is now abandoned. Architecture, like other arts carries out the principles of science, and must rest upon them. So continually, indeed, does it draw upon geometry, that it might almost itself be called a science. The architecture of a people is an index of their mental and moral qualities, and of the state of

civilization which they have reached. Fergusson considers it also more trustworthy than language in settling the question of race. The numerous styles of architecture, partly diverse, partly connected with each other, may be primarily divided into Ethnic and Christian. The following is a more minute classification:—In America two styles of architecture worthy of notice exist—the Mexican and the Peruvian. The rapid growth of American cities has involved the development of all classes and combinations of architecture. The culmination of this characteristic was seen at the World's Fair in Chicago in 1893, when every order of architecture was represented. The Chinese have one in Eastern Asia. In India there are two totally distinct races—an Aryan one [ARYAN], of which the Brahmans are the type, and a Turanian one, represented by the Tamuls of the Coromandel coast and Ceylon. The latter were the great builders. Fergusson recognizes in India a Buddhist, a Jaina, a Southern Hindoo, a Northern Hindoo, a Modern Hindoo, and a Cashmerian style. In Western Asia there existed, at a more or less remote period, a Phœnician, a Jewish, an Assyrian, a Babylonian, a Persepolitan or Persian, and a Sassanian type of building; while in Europe there were Pelasgian or Cyclopean, Etruscan, and Druidical or Celtic types. A celebrated style commenced in Egypt as the Egyptian style; transferred to Greece, and modified there by Assyrian, it was called Grecian, and became a model for universal imitation. Adopted by the Romans, it was called Roman. Passing from them, it gave rise in one direction to the Saracenic, Arabian or Moorsque, and in another to the Christian style, the latter with Romanesque, Gothic, and Byzantine subdivisions. [SARACENIC, GOTHIC, &c.]

The following are the leading styles of English architecture, arranged in the chronological order in which they flourished:—

	A.D.	A.D.
I. Norman	From 1066 to 1154	
II. Transition from this to the next, i. e., from I. to III.	" 1154 to 1189	
III. Early English	" 1189 to 1272	
IV. Transition from III. to V.	" 1272 to 1307	
V. Decorated	" 1307 to 1377	
VI. Transition from V. to VII.	" 1377 to 1399	
VII. Perpendicular	" 1399 to 1547	
VIII. Tudor	" 1550 to 1600	
IX. Jacobean	" 1603 to 1641	

(*Fergusson, Guilt, &c.*)

" . . . architecture, an art which is half a science, . . ."—*Macaulay: Hist. Eng.*, ch. iii.

¶ The subject now treated generally, called simply *Architecture*, is sometimes more precisely described as *Civil Architecture*, in which case there are at least two others, viz., *Military Architecture*, treating of the construction of fortifications, and *Naval Architecture*, the subject of which is the construction not merely of ships, but of harbors, docks, or ought else requisite to promote maritime enterprise. In this division the term *civil* is used vaguely, so as to include *Ecclesiastical Architecture*, but more frequently the two are made distinct.

2. The method of construction adopted in nature, which one insensibly compares or contrasts with the handiwork of man.

"The molecular attractions of the liberated carbon and hydrogen find expression in the architecture of grasses, plants, and trees."—*Tyndall: Frag. of Science*, 3d ed., iv. 87.

¶ *Heaven's architecture*=the sky.

"Them and their citty vtterly to quell

With fire which from heaven's architecture fell."

E. E. T. S., vol. 46-48, *Satira*, v., 1,667-8.

ar'-chi-tect-ure (ture as tyūr), v. t. To build.

ar'-chi-trāve, s. [In Ger. *architrav*, *architrab*; Fr. & Ital. *architrave*; from Gr. *archi*=chief, and Ital. *trave*, from Lat. *trabs*=a beam; Gr. *trapēx*, genit. *trapēkos*=a beam; *trepō*=to turn.]

Architrave:

1. The lowest portion of the entablature of a column, immediately resting on the column itself.

Architrave: Temple of Agrigentum.

The architrave is immediately surmounted by the frieze, and it again by the cornice, which is the highest portion of the entablature.

"Built like a temple, where pilasters round

Were set, and Doric pillars overlaid

With golden architrave."—*Milton: P. L.*, bk. i.

2. The ornamental molding surrounding the exterior portion of the curve belonging to an arch, or round doors, windows, &c.

3. The mantelpiece in a chimney.

*ar-chi-tri'-clīn, s. [Gr. *archi*=chief; Lat. *triclinium*; Gr. *triklinion* and *triklinos*=a couch running round three sides of a table for guests to recline on at a feast.] Master of a feast (*John ii. 18*).

" . . . the seide ure lord to tho serganz, Moveth to gidere and bereth to *Architriclin*, that was se thet ferst was i-serued."—*Old Kentish Sermons* (ed. Morris), p. 29.

¶ Morris says that this word is frequently mistaken for a proper name in early English books.

*ar'-chī-tŭpe, s. [ARCHETYPE.]

ar'-chī-vā, s. pl. [ARCHIVES.]

ar'-chī-val, a. [Lat. pl. *archiva*; Eng. suffix -al.] Pertaining to archives. (*Tooke*.)

ar'-chive (pl. ar'-chives, *ar'-chī-vā), s. [In Sw. *arkiv*; Dan. *archivet*; Dut. *archieven*; Ger. *archiv*; Fr. *archives* (pl.); Ital. *archivi* (pl.), *archivio*; Lat. *archiva*, pl. of *archivum*. There is also a Latin form *archium*; Gr. *archeion*=the town-house, the official residence of the first magistrate.]

†1. Plur.: The place in which important historical records are kept.

"Though we think our words vanish with the breath that utters them, yet they become records in God's court, and are laid up in his archives as witnesses either for or against us."—*Government of the Tongue*.

2. (a) Pl.: The records themselves. These generally consist of charters and other documents bearing on the rights, the history, &c., of a nation or of a smaller community or house.

"The Christians were able to make good what they asserted by appealing to those records kept in the Roman *archiva*."—*H. More: On Godliness*, b. 7, ch. 12, § 2. (*Trench*.)

"I shall now only look a little into the Mosaic archives, to observe what they furnish us with upon this subject."—*Woodward*.

†(b) Sing.: One such record.

"Vespasian, according to Suetonius, restored this national archive, by procuring copies from all quarters."—*Lewis: Early Rom. Hist.*, ch. v., § 9.

ar'-chī-vist, s. [In Fr. *archiviste*; Ital. *archivista*; Lat. *archeota*.] One who has charge of archives; a keeper of records. (*Rees: Cyclop.*)

ar'-chī-vōlt, ar'-chī-vōl'-tūm, s. [Fr. *archivolte*; Ital. *archivolto*; properly, a contraction for Ital. *architrave voltato* (lit.)=an architrave turned.]

1. Used by mediæval writers for a vault.
2. Used by the writers of the Renaissance for the group of concentric moldings and ornaments with which the face of a classical arch is decorated.

Archivolt of Notre Dame du Port, Clermont.

3. By some modern authors it is applied to the mass of moldings which usually occupy the faces and soffits of a mediæval arch. (*Gloss. of Arch.*)

ar'-ch-lūte, ar'-ch-ī-lūte, s. [In Fr. *archiluth*.] A long and large lute, with its bass strings lengthened after the manner of the theorbo, and each row doubled, either with a little octave or a unison. It is used by the Italians for playing a thorough bass.

ar'-ch-lŭ, adv. [Eng. *arch*; -ly.] In an arch manner; roguishly, slyly, cunningly, waggishly.

"This he archly supposes."—*Thyer: Notes to Butler's Remains*.

ar'-ch-nëss, s. [Eng. *arch*; -ness.] Slyness, cunning, roguishness, waggery.

" . . . and such a dryness and archness of humor, as cannot fail to excite laughter."—*Dr. Warton: Essay on Pope*, ii. 68.

ar'-chōn, s. [In Ger. *archont*; Fr. *archonte*; Ital. *arconte*; Lat. *archon*; Gr. *archōn*=a ruler, commander, from *archō*=to begin; *archē*=a beginning.]

1. *Civil Hist.*: Any one of the series of individuals who, when the royal authority was abolished at Athens, succeeded to the highest place in the State. At first the archonship was for life, and even hereditary, but the person elected by the people might again be deposed—"The right divine of kings to govern wrong" was not recognized. After a time the occupancy of the office was limited to ten years, and then to one year: while its duties were divided among ten persons; the first one called, by way of

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, ūnite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

pre-eminence, the *archon*; the second, the *king*; the third, the *polemarch*, or leader in war; and the other seven, the *thesmothes*, or legislators.

"Among these, the first in rank retained the distinguishing title of the *archon*, and the year was marked by his name."—*Thirlwall: Hist. Greece*, ch. xi.

¶ *Lord Archon*: A similar officer in an imaginary English government never realized.

"All the detail, all the nomenclature, all the ceremonial of the imaginary government was fully set forth, Polemarchs and Phylarchs, Tribes and Galaxies, the Lord Archon and the Lord Strategus."—*Macaulay: Hist. Eng.*, ch. iii.

2. *Church Hist.* The "Great Archon" of the *Gnostic Basilides*: A created being who was supposed to rule the world.

"There burst forth and was begotten from the cosmical seed and the conglomeration of all germs the great Archon and Head of the world."—*Hippolytus: Refut. of all Heresies*, bk. vii., ch. xi.

ar'-chōn-shīp, s. [Gr. *archōn*=archon, and Eng. suff. *-ship*.] The office of an archon, or the time during which he held office.

"Draco's *archonship*, in which his laws were enacted, is placed Ol. 39, B. C. 624."—*Thirlwall: Hist. of Greece*, ch. xi.

ar'-chōn'-tics, s. [In Ger. *archontiken*.] *Church Hist.*: A Gnostic sect, a branch of the Valentinians. They were of opinion that the world was brought into existence not by God, but by inferior "Archontes," beings themselves created. [ARCHON (2).]

**ar'ch-wīfe*, s. [ARCHEWIVES.]

ar'ch-wīse, adv. [Eng. *arch*; suffix *-wise*.] Shaped like an arch; in the form of an arch.

"The Court of Arches, so called *ab arcuata ecclesia*, or from Bow Church, by reason of the steeple or clochier thereof, raised at the top with stone pillars, in fashion of a bow bent *archwise*."—*Aylife: Parergon*.

ar'-chŷ, a. [Eng. *arch*; *-y*.]

1. *Ord. Lang.*: Arched.

"Beneath the black and archy brows shined forth the bright lamps of her eyes."—*Parthenia Sacra* (1633), Pref.

2. *Heraldry*. [ARCHED.]

ar'-cī-form, a. [Lat. *arcus*=a bow, and *forma*=form.] Shaped like a bow, curved.

"... some *arciform* fibers which cross it at its lower part . . ."—*Todd & Bowman: Physiol. Anat.*, i. 264.

**ar'-cī-tēn-ēnt*, a. [Lat. *arcitenens*, from *arcus*=a bow, and *tenens*, pr. par. of *teneo*=to hold.] Bow-bearing. (Johnson.)

ar'-cō-graph, s. [Lat. *arcus*=a bow, and Gr. *graphō*=to grave, . . . to describe.] An instrument for describing an arc without the use of a central point; a cyclograph. (Hebert.)

†*arc-tā-tion*, s. [In Fr. *arctation*; Mod. Lat. *arctatio*; Lat. *arctus*, *artus*=pressed together, close, narrow; *arcto*=to narrow, to enclose.]

†*Med.*: A narrowness or constriction of any passage in the body. (Used specially of constipation of the intestines produced by inflammation or by spasms. It is called also ARCTITUDE.)

"*Arctation*, Lat.: Streightning or crowding."—*Glossog. Nova*.

arc-tī-a, s. [Apparently from Gr. *arktos*=a bear, referring to the woolly character of the caterpillar; but Agassiz, in his *Nomenclator Zoologicus*, derives it from *arkteia*=consecration.] A genus of moths, the typical one of the family Arctiidae. *A. caja* is the well-known and beautiful Tiger-moth. Its caterpillar is the "Woolly Bear."

arc-tī-a-dæ, s. pl. [ARCTIIDÆ.]

arc-tīc, **arc-tīck*, a. [In Fr. *arctique*; Sp. & Port. *arctico*; Ital. *artico*; Lat. *arcticus*; from *arctos*, Gr. *arktos*, a bear, also the constellation Ursa Major. In Sanscrit *riksha*, from the root *ark* or *ask*=to be bright, is (1) an adjective=bright, and (2) a substantive=a bear, so called either from his bright eyes or from his brilliant tawny fur. Before the Aryans had finally separated, *riksha*=bright, applied to the plow-like constellation, had become obsolete, and the substantive *bear* remained, whence the constellation came to be called *arktos* among the Greeks, *Ursa* among the Latins, and *Bear* among ourselves. (Max Müller: *Science of Language*, 6th ed., vol. ii., p. 393.)]

1. *Properly*: Pertaining to the constellation called by the Greeks *arktos*=bear, by the Romans *Ursa*, and by ourselves *Ursa Major*, the Great Bear, the Plow, Charles' Wain, &c.

2. Pertaining to the North generally, or more specially to the region within the arctic circle.

"Man has become a denizen of every part of the globe, from the torrid to the arctic zones."—*Owen: Classif. of the Mammalia*, p. 49.

Arctic circle: A small circle of the globe, 23° 28' distant from the north pole, which is its center. It

is opposed to the antarctic circle, which is at the same distance from the south pole. (*Glossog. Nova*, &c.)

Arctic expedition: An expedition designed to explore the all but impenetrable regions surrounding the north pole. The object with which these enterprises were commenced by the English was to obtain a passage by way of the polar regions to India, Egypt being in Mohammedan hands, and fear, which now seems absolutely ludicrous, being felt that the Portuguese would successfully debar daring English seamen from using the route by the Cape of Good Hope. When the utter hopelessness of finding either a northwestern or a northeastern passage to India through the polar regions became apparent, it was felt that arctic expeditions might still profitably be sent out for purely scientific exploration, one main object now being to make as near an approach as possible to the pole. They have continued at intervals to our own times, and are not likely ever to cease. Two of the most notable events in their history which have hitherto occurred have been the discovery of the northwest passage by Captain McClure, of the *Investigator*, on the 26th of October, 1850, and the tragic deaths of Sir John Franklin and his crew, about the year 1843, the catastrophe being rendered all the more impressive to the public mind by the uncertainty which long hung over the gallant explorers' fate.

The following are the farthest points of north latitude reached by Arctic explorers, up to present date:

YEAR.	EXPLORERS.	N. LATITUDE.
1607.	Hudson.....	80° 23' 0"
1773.	Phipps.....	80° 48' 0"
1806.	Scoresby.....	81° 12' 42"
1827.	Parry.....	82° 50' 0"
1874.	Meyer (on land).....	82° 0' 0"
1875.	Markham and Parr (Nares' expedition).....	83° 20' 26"
1876.	Payer.....	83° 07' 0"
1884.	Lockwood (Greely's party).....	83° 24' 0"
1896.	Nansen.....	86° 14' 0"
1900.	Capt. Cagni (Abruzzi's expedition).....	86° 33' 0"
1906.	Lieut. Robert E. Peary.....	87° 06' 0"

In September, 1895, Lieut. Robert E. Peary, of the U. S. navy, returned from an arctic expedition, after an absence of two years. He did not get so far north as some of his predecessors, but in scientific results his expedition surpassed all others of recent years. His surveys and maps extend our knowledge of the coast northward 2 degrees. On August 13, 1896, Dr. Fridtjof Nansen, of Norway, returned from an arctic expedition after an absence of more than three years. The most northerly point reached by him was 86° 14' N. lat., or 200 miles nearer the Pole than ever reached before. In 1906 Lieutenant Peary, on another expedition, approached nearer to the goal of arctic exploration than any preceding explorer, getting within 203 miles of the Pole, or 32 miles nearer than Captain Cagni, of the Duke of Abruzzi's expedition.

Arctic fox (*Vulpes lagopus*): A species of fox found in North America within the arctic circle. It is blackish-brown in summer, but in winter has a long, thick white fur, which renders it a beautiful animal.

Arctic pole: The north pole as opposed to the antarctic or southern one. (*Glossog. Nova*.)

Arctic zone: The zone or belt of the earth between the north pole and the arctic circle.

arc-tī-çite, s. [In Ger. *arcticit*; from Gr. *arktikos*=near the Bear, arctic, northern.] [ARCTIC.] A mineral, called also Wernerite and Scapolite (q. v.).

arc-tī-i-dæ, *arc-tī-a-dæ*, s. pl. [ARCTIA.] A family of moths, comprehending the *Arctia caja*, or Tiger-moth, the *Phragmatobia fuliginosa*, and other beautiful species. The larvae are hairy, in consequence of which they are denominated Woolly Bears, or Bear Caterpillars.

"But the moths in certain families, such as the Zygaenidae, various Sphingidae, Uraniidae, some Arctiidae and Saturniidae, fly about during the day or early evening, and many of these are extremely beautiful, being far more brightly colored than the strictly nocturnal kinds."—*Darwin: Descent of Man*, vol. i., pt. ii., ch. xi., p. 396.

arc-tīs'-cā, s. pl. [Gr. *arktos*=a bear, and *iskō*=to make like.] Water-bears. [ARACHNIDA, BEAR-ANIMALCULES.]

arc-tī-tūde, s. [In Fr. *arctitude*; from Lat. *arctus*, *artus*=pressed together, narrow.] The same as ARCTATION (q. v.).

arc-tī-ūm, s. [Lat. *arktion*=a plant, the *Verbascum ferrugineum* (?), or a Lappa; Gr. *arktion*, from *arktos*=a bear; in Celt. *arth*, after which the Arctium is called, on account of its shaggy involucre.] Burdock. A genus of plants belonging to the order Asteraceæ, or Compositæ. It contains the Common Burdock, *A. lappa*, Linn.

arc-tō-gāl'-i-dæ, s. [Gr. *arktos*=a bear, and *galē*=a weasel.] A family of carnivorous Mammalia, containing the Skunks (Mephites) and some allied animals.

arc-tō-gē'-āl, a. Noting colder parts of the earth; pertaining to the arctic regions.

arc-tō-mŷs, s. [Gr. *arktos*=a bear, and Lat. *mus*=a mouse.] The Mammalia genus to which the Marmots belong. It is placed under the Rodentia. They have pointed cheek-teeth. There are several species, the *A. marmotta*, or Marmot, resident in the mountains of Europe and Asia [MARMOT], the *A. bobac* of Poland and Northern Russia, the *M. citillus*, the Zizel or Souslik, and several in America.

arc-tōp'-sis, s. [Gr. *arktos*=a bear, and *opsis*=aspect.] A genus of decapodous Crustaceans of the family Maiadæ. The *A. tetraodon* is the Four-horned Spider-crab of the British coasts.

arc-tō-stāph'-ŷ-lōs, s. [Gr. *arktos*=a bear, and *staphylē*=a bunch of grapes. Hence *arctostaphylos* means bear-grape.] The Bear Berry. A genus of plants belonging to the order Ericaceæ (Heath-worts). It has an ovule corolla, ten stamina, and a fleshy, five-celled, five-seeded fruit.

arc-tō-tīs, s. [In Fr. *arctotide*; Sp. & Port. *arctotis*; Gr. *arktos*=a bear.] A genus of plants belonging to the order Asteraceæ, or Compositæ. The species are found at the Cape of Good Hope.

Arc-tū'r-ūs, s. [In Ger. *Arktur*; Fr. *Arcture*, *Arcturus*; Port. *Arcturo*; Ital. *Arturo*; Lat. *Arcturus*; Gr. *Arktouros*, from *arktos*=bear, and *ouros*, a termination corresponding to *ward* in English, as *thyroros*=a door-ward, a doorkeeper. Hence *Arcturus* means bearkeeper.] (Max Müller.)

I. *Astronomy*:

1. A fixed star of the first magnitude, called also *Alpha Bootis*. It is one of the very brightest stars in the Northern heavens. In March, 1635, Morin saw it in the west for more than half an hour after sunrise. To find it, draw a line through the tail of the Bear four times the length of the distance between the stars Mizar and Benetnasch in the diagram below. The ancients considered it a red star. Piazzi could not find it had any parallax. Though nominally "fixed," yet it has a proper angular motion of 2'25", equivalent to 53'32 miles in a second. In 752 years it altered its latitude 5', and in twenty centuries, according to Humboldt, it has moved 2½ times the diameter of the moon's disc. In 1803, Herschel found its diameter, seen through a fog, ¼ of a second, from which he calculated its diameter to be not less than 8,000,000 leagues=48,000,000 miles. (*Arago, Herschel*, &c.)

2. The *Arcturus* of Scripture. Heb. *Ash*, Job. ix. 9; *Aish*, xxxviii. 32. Sept. *Arktouros*; Vulg. *Arcturus*. Not the star now called *Arcturus*, which stands in solitary grandeur in the sky, unaccompanied by any of his "sons," *banêha*, mentioned in Job xxxviii. 32, but the Great Bear (Ursa Major). Heb. *Ash* is formed by aphæresis from Heb. *neash*=a bier or litter. In Arabic *naasch*, cognate with the Heb. *neash*, is the name of the four stars (Gr. *Alpha*, *Beta*, *Gamma* and *Delta*) constituting the

Ursa Major and the Star Arcturus.

hinder portion of the Great Bear; while the three in the tail (Gr. *Epsilon*, *Zeta*, *Eta*) are called in Arabic *Banatnaasch*=daughters of the bier, meaning, the mourners following the bier. The last of these (Gr. *Eta*) is still designated by its Arabic name *Benetnasch* (q. v.).

"Which maketh *Arcturus*, Orion, and Pleiades, and the chambers of the south."—*Job* ix. 9.

"Canst thou bring forth Mazzaroth in his season? or canst thou guide *Arcturus* with his sons?"—*Job* xxxviii. 32.

II. *Zool.*: An isopod crustacean. Example, the *A. Baffinii*, or Baffin's Bay *Arcturus*.

ar'-cū-āte, a. [In Sp. *arqueado*, *arcuado*; Ital. *arcuato*; Lat. *arcuatus*, pr. par. of *arcuo*=to bend like a bow; *arcus*=a bow.]

Ordinary Language, Botany, &c.: Curved like a bow, or like the arc of a circle.

"... sounds that move in oblique and arcuate lines, . . ."—*Bacon: Nat. Hist.*, Cent. iii., § 224.

**ar'-cū-a-tile*, a. [Lat. *arcuatilis*=bow-shaped, from *arcuo*=to bend in the form of a bow, to curve; *arcus*=a bow.]

Nat. Science: Curved like a bow.

ar-cū-ā-tion, s. [In Fr. *arcuation*. From Lat. *arcuatus*=bent in the form of a bow; *arcuo*=to bend like a bow; *arcus*=a bow.]

A. *Ordinary Language*:

1. The act of bending any thing; incurvation.

2. The state of being bent.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, thī; sin, aş; expect, Xēnophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şūn; -tīon, -şion = zhūn. -tious, -cious, -sious = şūs. -ble, -dle, &c. = beł, deł.

B. Technically:

Gardening: The method of propagating certain trees by bending down to the ground the branches which spring from the offsets or shoots after they have been planted. Arcuation is adapted for the elm, lime, alder, and the willows, which cannot easily be raised from seed.

***ar'-cū-a-tūre, s.** [Lat. *arcuatus*=bent like a bow.] The curvature of an arch.

***ar'-cū-bal-ist, *ar'-cū-bal-ist, *ar'-cū-bal-ist-tēr, s.** [ARBALEST.]

***ar'-cū-būs, s.** [ARQUEBUS.]

ar'-cūs, s. [Lat.=a bow.]

arcus senilis. Literally, the senile arch; the arch of old men or of old age; an opacity around the margin of the cornea which constitutes one of the numerous marks of old age.

-ard, -art, -heart, as terminations. [From Ger. *hart*=hard; A. S. *heard*; Icel. *hard*; Goth. *hardus*. In M. H. Ger. and in Dutch it in general has, as an appellative, a bad meaning; but it is the reverse in O. H. Ger. proper names, as *Berinhart*, *Bernhart*=strong, like a bear; in Fr. & Eng. *Bernard*. (*Mahn*.) Bain and others consider that it was introduced into the languages of France, Spain, and Italy by the Germanic invaders, who overthrew the Roman empire.] (a) One who does, or (b) one who is: as *sluggard*=one who is slothful like a slug; *braggart*=one who brags. In the majority of cases *ard* and *art* are used in a bad sense, as *dullard*, *coward*, *laggard*, *braggart*, but this is not the case with the form *heart*.

ar-dās'-sineš, s. [*Ardassines*, plur. of Fr. *ardassine*; Sp. *ardacina*; Arab. & Pers. *ardan*=a description of raw silk.] The finest kind of Persian silk used in the French looms.

ar'-dē-a, s. [Lat. *ardea*; Gr. *erōdios*=a heron.] The typical genus of the subfamily Ardeinæ, and the family Ardeidæ. *Ardea cinerea* is the Gray Heron which is found in Europe. It is a tall bird, standing upward of three feet high, with a long black crest on the back of its neck, the feathers of its back dark in color, and those on its breast white. In summer it may be seen on the margin of lakes or rivers, and in winter on the shores of the sea, waiting for its prey, which consists of small fish, crustacea, &c.

Ardea Cinerea.

ar'-dēb, s. [In Arab. *irdab* or *urdab*.] A measure of grain containing almost eight bushels, used in the parts of Africa where the Arabs most abound.

ar-dē-i'-dæ, s. pl. [ARDEA.] A family of galatorial or wading birds. They have large, long, and strong beaks and powerful wings, yet their flight is but slow. They are migratory, frequenting the margins of lakes, or of the ocean, of the several countries in which they sojourn. The family is divided into four sub-families—the Ardeinæ, or Herons proper; the Ciconinæ, or Storks; the Tanalinæ, or Ibises; and the Plataleinæ, or Spoonbills.

ar-dē-i'-næ, s. pl. [ARDEA.] The typical subfamily of the family Ardeidæ. It contains the true Herons [ARDEA], the Bitterns, the Boatbills of South America, and their allies.

***ar-dēl-i-ō, s.** [In Fr. *ardélon*; Lat. *ardelio*, from *ardeo*=to burn.] A busy-body, a meddler.

"Striving to get that which we had better be without, *ardelios*, busy bodies as we are."—Burton: *Anat. of Melancholy*, pp. 12, 71. (*Trench*.)

ar'-den-çy, s. [In Sp. *ardentia*; Port. *ardentia*, *ardencia*; Ital. *ardenza*; from Lat. *ardens*.] [AR-DENT.]

A. Ordinary Language:

1. Lit.: Heat.

"By how much heat any one receives from the ardency of the sun, his internal heat is proportionally abated."—Sir T. Herbert: *Travels*, p. 27.

2. Fig.: Warmth of affection or of passion; ardor; vehemence of courage, zeal, &c.

"The ineffable happiness of our dear Redeemer must needs bring an increase to ours, commensurate to the ardency of our love for him."—Boyle.

B. Technically:

Naut.: The tendency of a vessel to gripe. (*Ogilvie*.)

ar'-dent, *ar-daunt, a. [In Fr. *ardent*; O. Fr. *ardant*; Sp. *ardiente*; Port. & Ital. *ardente*; Lat. *ardens*, pr. par. of *ardeo*=to burn.]

I. Of material things:

1. Burning, in a literal sense.

"... more ardent than the blaze of fire."

Cowper: *Homer's Iliad*, bk. xviii.

2. Fiery to the taste.

"... wine, tea, and ardent spirits . . ."—Macaulay: *Hist. Eng.*, ch. iii.

3. Shining, brilliant, reminding one of the reflection of fire.

"A knight of swarthy face,
High on a coal-black steed pursued the chase;
With flashing flames his ardent eyes were fill'd."
Dryden.

II. Of emotions or conduct:

1. Warm in affection, in passion, or desire.

"And death stands ardent on the edge of war."

Pope: *Homer's Iliad*, bk. xx. 28.

"Ardent and intrepid on the field of battle, Monmouth was everywhere else effeminate and irresolute."—Macaulay: *Hist. Eng.*, ch. v.

2. Inspired by warm feeling, and therefore powerful as a flame in its effects; warm or even more than warm.

"Her manner was warm and even ardent."—De Quincey's *Works* (ed. 1863), vol. ii., p. 134.

"Other leaders have inspired their followers with a zeal as ardent."—Macaulay: *Hist. Eng.*, ch. i.

ar'-dent-ly, adv. [Eng. *ardent*; -ly.] In an ardent manner; with warmth of desire or affection; with warmth of emotion generally; affectionately, passionately.

"What ardently I wish'd, I long believed."
Cowper: *On Receipt of my Mother's Picture*.

ar'-dent-ness, s. [Eng. *ardent*; -ness.] The quality of being ardent; ardor.

***ar'-dērs, *ar'-doürs, s.** Fallowings or plowings of ground. (*Coles*.)

ar-dīs-i'-a, s. [Gr. *ardis*=a point, in reference to the acute segments of the corolla.] The typical genus of the Ardisiads (q. v.). About one hundred species are known. They are ornamental plants, having fine leaves, flowers, and berries. Several have been introduced into this country from the East and West Indies. The bark of *A. colorata*, called in Ceylon *dan*, is used in that island in cases of fever and diarrhoea, besides being applied externally to ulcers. The red juice of the berries of *A. solanacea* becomes brown on paper, and retains its color permanently.

ar-dīs-i'-ā-çē-æ (Mod. Lat.), ar-dīs-i'-ādš, (Eng.) s. pl. Ardisiaceæ is the name given by Jussieu to an order of exogenous plants called by Lindley and others Myrsinaceæ (q. v.). Type, *Ardisia* (q. v.). Ardisiads is Lindley's name for the Myrsinaceæ.

ar'-dor, *ar'-dūre, s. [In Fr. *ardeur*; Sp. & Port. *ardor*; Ital. *ardore*, *ardura*; from Lat. *ardor*=(1) a burning, fire, (2) brilliancy, (3) fire of affection or passion.]

1. Lit.: Heat, as of the sun, a fire, &c.

"Joy, like a ray of the sun, reflects with a greater ardor and quickness, when it rebounds upon a man from the breast of his friend."—South.

2. Figuratively:

(a) Heat of the affections or of the passions, of courage, of zeal, &c.

"The wicked enchaufing or ardure of this sin."—Chaucer: *The Persones Tale*.

"Wounds, charms, and ardors were no sooner read,
But all the vision vanished from thy head."

Pope: *Rape of the Lock*, i. 119, 120.

"Unmov'd the mind of Ithacus remain'd,
And the vain ardors of our love restrain'd."

Pope.

"Neither his years nor his profession had wholly extinguished his martial ardor."—Macaulay: *Hist. Eng.*, ch. v.

(b) Poetically: A shining being.

"Nor delay'd the winged saint,
After his charge receiv'd; but, from among
Thousand celestial ardors, where he stood
Veil'd with his gorgeous wings, up-springing light,
Flew thro' the midst of heav'n."

Milton: *P. L.*, bk. v.

ar'-dū-i-tŷ, s. [In Sp. *arduidad*; Ital. *arduita*, *arduitade*, *arduitate*; Lat. *arduitas*=steepness; from *arduus*.] [ARDUOUS.] Arduousness. (*Johnson*.)

ar'-dū-ōūs, a. [In Fr. *ardu*; Sp., Port., & Ital. *arduo*; Lat. *arduus*=(1) steep, lofty, (2) difficult. Cognate with Gr. *orthos*=straight, or (applied to height) upright. In Erse *ard* is a height, and in Sansc. *ardva* means=raised up or lofty.]

1. Lit.: Steep and lofty; high and precipitous.

"High on Parnassus' top her sons she show'd,
And pointed out those arduous paths they trod."

Pope.

2. Involving much labor, difficult.

"To point them to the arduous paths of fame."

Pope: *Homer's Odyssey*, bk. xi., 302.

"He must have been aware that such an enterprise would be in the highest degree arduous and hazardous."—Macaulay: *Hist. Eng.*, ch. ii.

ar'-dū-ōūs-ly, adv. [Eng. *arduous*; -ly.] With great labor; laboriously.

ar'-dū-ōūs-ness, s. [Eng. *arduous*; -ness.] The quality of being high and steep, and therefore difficult to climb; or, in a more figurative way presenting difficulty.

***ar'-dūre, s.** [ARDOR.]

***are (pl. areš), s.** The old way of spelling the letter R.

"iij areš for iij Richardes that bene of noble fameš."
—*Twelve Letters to Save England* (ed. Furnivall), 21.

are. The plural of the present tense in the verb *to be*. It is used in all the three persons—we are, you are, they are. Obviously it came originally from another root than *be*. O. Northern Eng. *aron*.

"We are all one man's sons; we are true men, thy servants are no spies."—Gen. xlii. 11.

"Ye are spies; to see the nakedness of the land ye are come."—Gen. xlii. 9.

are, s. [Fr. *are*, from Lat. *area* (q. v.).] In French superficial measure, a square of which the sides are ten mètres in length.

"We prefer the form which we have employed because it is etymologically correct. Mr. Sadler seems not to know that a hectare is so called because it contains a hundred ares."—Macaulay: *Sadler's Refutation Refuted*.

a'-rê, a'-la-mî-rê, s. [Ital.] The lowest note but one in Guido's scale of music. [A-LA-MI-RE.]

"Gamut, I am, the ground of all accord,
A re, to plead Hortensio's passion;
B mi, Bianca take him for thy lord,
C fa ut, that loves with all affection."

Shakesp.: *Taming of the Shrew*, iii. 1.

***äre, adv.** [A. S. *ar*=before, early.] Before. (*O. Eng.*)

"He herde a new tiding
That he heard never are."
Sir Tristrem, 85. (*S. in Boucher*.)

är'-ē-a (pl. är'-ē-aš or är'-ē-æ), s. [In Ger. *areal*; Fr. *aire*; Ital. *aia*; Sp., Port., & Lat. *area*=(1) an open space, (2) *Med.* (see B., 4).]

A. Ordinary Language:

I. Generally:

1. Any open space, as the floor of a building, the part of a church not occupied by pews or other fixtures, the arena in an amphitheater, the stage in a theater; or, outside buildings, the open space within any inclosure.

"Let us conceive a floor or area of goodly length, with the breadth somewhat more than half the longitude."—Wotton.

"The Alban lake is of an oval figure; and, by reason of the high mountains that encompass it, looks like the area of some vast amphitheater."—Addison.

"In areas vary'd with Mosaic art,
Some whirl the disk, and some the jav'lin dart."

Pope.

2. The space inclosed within defined limits, however large or however small.

"Extensive as was the area which he governed, he had not a frigate on the water."—Macaulay: *Hist. Eng.*, ch. xxiii.

"... therefore nearly 167,000 square miles is the least space which can be distinctly discerned on the sun as a visible area."—Herschel: *Astronomy*, 5th ed. (1853) § 386.

II. Specially:

1. The inclosed space or site on which a building stands.

2. The sunken space, generally enclosed by railings, which exists in most of the larger town houses, to afford light and ingress to the servants in the floor of the house built below the level of the street.

B. Technically:

1. *Geom., Nat. Phil., Astron., &c.*: The space inclosed by the lines which bound any figure. Thus the area of a circle is the space inclosed by its circumference, the area of a triangle the space within its three sides, &c.

Measures of area are the same as square measure, such as a square inch, a square foot, a square yard, a square mile, &c.

The unit of area: The area of the square described upon the unit of length. (*Everett*.)

"If in this case L stands for length, their area is=L²."—*Everett: The C. G. S. System of Units*, ch. i., pp. 1, 5.

2. *Geol.*: Almost in the same sense as A., I. 2 (q. v.).

"... led me to conclude that the great oceans are still mainly areas of subsidence, the great archipelagoes still areas of oscillations of level, and the continents areas of elevation."—Darwin: *Origin of Species*, ch. ix.

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôť, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trÿ, Sÿrian. æ. œ = ē; ey = ä. qu = kw.

3. *Mining*: A compass of ore allotted to diggers. (*Coze*.)

4. *Med.*: Baldness, or a bald spot upon the head produced by alopecia; also alopecia itself.

5. *Anat.*: Any space in the embryo or more developed physical structure. (See also the compounds which follow.)

area-germinativa.

Anat.: The space in an egg in process of being hatched in which the first traces of the embryo appear. It is marked by an opaque roundish spot upon the germinal membrane. (*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 576.)

area-pellucida.

Anat.: A clear space which appears in the center of the germ of an egg when the latter is exposed for a few hours to hatching heat. It ultimately increases to about a line in diameter. (*Ibid.*, p. 582.)

area-vasculosa.

Anat.: An area surrounding the *A. pellucida* in an egg in which the process of incubation has commenced. (*Ibid.*, p. 583.)

area-vitellina.

Anat.: An area surrounding the *A. vasculosa* in an egg in which the process of incubation has commenced. (*Ibid.*, p. 583.)

†*a-rē'ad*, †*a-rē'ed*, †*a-rē'de* (pa. par. *ā-rēd'*, *ā-rēd'd*), *v. t.* [*A. S. arædan*=(1) to read; (2) to tell; to speak; (3) to conjecture, to prophesy, find out; (4) to elect; (5) take counsel; (6) to care for; (7) to pursue; (8) to effect.]

*1. To read.

*2. To tell, to say, to declare, to describe, to inform, to teach, to interpret, to explain. [*REDE*.]

"To whom she thus: 'What need me, Sir, to tell
That which your selfe have earst *ared* so right?'"

Spenser: F. Q., VI. iv. 28.

3. To advise, to counsel, to warn, to order.

"At those proud words that other knight begonne
To wax exceeding wroth, and him *aredd*
To turne his steede about, or sure he should be dedd."

Spenser: F. Q., III. viii. 17.

"But mark what I *areed* thee now: Avaunt;
Fly thither whence thou fleddest."

Milton: P. L., bk. iv.

*4. To guess, to conjecture.

"Of which no man couth *areden*
The nombre . . ."

Alisunder, 5, 115. (*Boucher*.)

*5. To detect as an impostor or an imposition.

"So hard this Idole was to be *ared*,
That Florimell her selfe in all mens vew
She seem'd to passe: so forged things do fairest shew."

Spenser: F. Q., IV. v. 15.

*6. To choose, to elect, to appoint, to ordain.

"Whose praises having slept in silence long,
Me, all too meane, the sacred Muse *areeds*
To blazon broade amongst her learned throng."

Spenser: F. Q., I. i. 1.

"And time and place convenient to *areed*,
In which they two the combat might darraigne."

Ibid., V. xii. 9.

† *Areed*, though generally called obsolete, is still used, though rarely, in poetry.

"Imagined in its little schemes of thought;
Or e'er in new Utopias were *ared*,
To teach man what he might be, or he ought."

Byron: Child Harold, ii. 36.

**a-rēad'*-i-nēss, *s.* [*READINESS*.]

" . . . and therefore we put in *areadiness* our army,"

—*English Manifesto*, A. D. 1542, quoted in *Froude's Hist. Eng.*

är'-ē-æ. The plural of *AREA* (q. v.).

är'-ē-äl, *a.* [*Lat. arealis*=pertaining to a threshing-floor; from *area*.] Pertaining or relating to an area.

**a-rē'are*. [*ARREAR*.]

är'-ē-ca, *s.* [*In Ger. arek (palme)*; *Fr. arec*; *Port. areca*. Said to be the Malabar or Malayalam name Latinized.] A genus of plants belonging to the order *Palmaceæ*, or *Palms*. It is the type of the section *Arecinæ*. Among the more notable species are (1) the *A. catechu*, or Betel-nut Palm, a very graceful and handsome tree cultivated in the hotter parts of Asia. It furnishes the Indian soapree or betel. The betel-nut is remarkable for its narcotic or intoxicating power; there is sometimes prepared from it a spurious catechu. [*CATECHU*.] (2) The *A. oleracea*, or Cabbage-palm, a very tall species growing in the West Indies. [*CABBAGE*.]

Areca Palm and Nut.

**a-rēç'he* (1), *v. t.* [*A. S. areccan*=to explain; pret. *areahht*.]

1. To explain.

"Crist and Seint Stevene,
Quoth Horn, *areche* thy swevene."
K. Horn, i. 668. (*Boucher*.)

2. To utter.

"Uneth he myght *areche*
O word for pure anguyshe."
Chaucer: Hist. of Beryn, i. 2,999.

**a-rēç'he* (2) (pa. par. *a-râu'ght*), *v. t.* [*A. S. areccan*, pret. *areahht*, *arehte*=to reach out, to extend, to lay hold of.]

1. To reach.

"Al that hys ax *areche* myght."
Richard, 7,039. (*Boucher*.)

2. To attain.

" . . . the tongue myghte not *areche* to speke."
Trevisa: Bartholomew de Propr. Rerum, bk. ii.

3. To strike.

"Hercules *araught* one of them named Gryneus bytween the eyen."
—*Jason, MS.*, f. 6. (*Boucher*.)

är'-ē-çī'-næ, *s. pl.* [*ARECA*.] A section or family of palms, distinguished by having either no spathe or one or more complete ones. The ovary is three-celled, and the berry one-seeded. Type, *Areca* (q. v.).

†*a-rēd'*, †*a-rēd'd*, *pa. par.* [*AREAD*.]

**a-rēd'de*, **a-rūd'de*, *v. t.* [*A. S. areddan*=to free.] To free.

" . . . *arud* us of the feondes rake."
Legend of St. Catherine; MSS. (*Boucher*.)

"That the lauedi sone *aredde*."
Hule & Nightingale (1557). (*Boucher*.)

a-rē'de, *v. t.* [*AREAD*.]

**a-rē'ed*, *s.* [*A. S. aræd*=counsel, welfare, safety.]

1. Advice.

2. A discourse.

a-rē'ek, *adv.* [*Eng. a*; *reek*.] In a reeking state. [*REEK*.]

"A messenger comes all *areek*
Mordanto at Madrid to seek."—*Swift*.

†*är'-ē-fäc'tion*, *s.* [*Fr. aréfaction*, from *Lat. arefacio*=to make dry; *areo*=to be dry, and *facio*=to make.]

1. The act of making dry.

2. The state of becoming dry.

"For all putrefaction, if it dissolve not in *arefaction*, will in the end issue into plants or living creatures bred of putrefaction."—*Bacon: Nat. Hist.*, Cent. vii., § 294.

†*är'-ē-fy*, *v. t.* [*Lat. arefacio*=to make dry.] To make dry.

"Heat drieth bodies that do easily expire . . . so doth time or age *arefy* as if in the same bodies."—*Bacon: Nat. Hist.*, § 294.

**a-rēht'e*, *s.* [*A. S. yrgtho*=(1) sluggishness, (2) fear; *earh*, *earg*=timid, cowardly.] Fear. (*Hule & Nightingale*, i. 1,794.) [*ARGH*.]

a-rē'ik, *ar-rē'ik*, *v. t.* [*A. S. areccan*=to get, to attain, to reach, to take.] To reach, to extend. [*REIK*.]

"And hedis semand to the heuin *arreik*."
Doug.: Verg., 91, 19.

**a-rê'ise*, *v. t.* [*RAISE*.] To elevate, to raise. (*Chaucer*.)

**ar'-em*, *s.* [*ARM*.]

**ar'-en*, **arne*. Plural of present tense of verb to be. [*ARE*.]

are'-na, *v.* joined with *adv.* [*Eng. are*, and Scotch *na*=no.] Are not. (*Scotch*.)

" . . . and in this present daye, when things o' that auld-waird sort *arena* keepit in mind around winter firesides as they used to be . . ."
—*Scott: Antiquary*, ch. xiv.

a-rē'-na, *s.* [*In Fr. arène*; *Sp.*, *Port.*, *Ital.* & *Lat. arena*=dry earth, sand; *areo*=to be dry.]

A. Ordinary Language:

1. *Lit.*: The floor of an amphitheater, so called from being strewed with sand, one main object of which was to absorb the blood of the gladiators "butchered to make a Roman holiday."

"My voice sounds much—and fall the stars' faint rays
On the *arena* void . . ."
—*Byron: Ch. Har.*, iv. 142.

2. *Fig.*: A field of contest, whatever its nature, as a battlefield, the position of a plaintiff or defendant in a law court, or of a controversialist in a periodical.

"But dragg'd again upon the *arena*, stood
A leader not unequal to the feud."
Byron: Lara, ii. 9.

B. Technically:

I. Architecture:

1. In the same sense as *A. 1*.
2. The amphitheater itself. (*Gloss. of Arch.*)
3. The middle of a temple, or inclosed space.

II. Med.: "Sand" or "gravel" in the kidneys.

är'-ē-nā'-çē-ō, *in compos.* Having sand in combination with some other mineral substance, as *Arenaceo-gypseous*=composed of sand, or something sandy, and gypsum.

är'-ē-nā'-çē-ōūs, *a.* [*In Fr. arénacé*; *Lat. arenaceus*.] Sandy, having more or less of sand in its composition, or partaking of the qualities of sand; in the form of sand.

Geol.: *Arenaceous* or *siliceous* rocks are those which consist very largely of sand. This sand may be loose, though it is generally cemented by siliceous, calcareous, ferruginous, or argillaceous matter into a more or less compact sandstone. (*Lyell: Elem. of Geol.*)

är'-ē-nä'r-ī-a, *s.* [*In Sp.*, *Port.*, & *Ital. arenaria*; from *Lat. arenarius*=pertaining to sand; *arena*=sand.]

1. *Botany*: Sandwort. A low tufted herb. A genus of plants belonging to the order *Caryophyllaceæ*, or *Clovesworts*, and the sub-order *Alsineæ*. There are about nine British species—four belonging to the sub-genus *Alsine*, and four to *Euarenaria*. Many of the species are Alpine; but the *A. verna*, or Vernal, the *A. sespyllofolia*, or Thyme-leaved, the *A. trinervis*, or Three-nerved Sandwort, with other species, are found upon the plain.

2. *Zool.*: A genus of *Scolopacidae* (Snipes), containing the Redshank, now called *Totanus calidris*.

är'-ē-nä'r-ī-ōūs, *a.* [*Lat. arenarius*.] Sandy.

†*ar-ē-nä'-tion*, *s.* [*Fr. arénation*; *Lat. arenatio*=the laying of fine mortar on a wall.]

Old Med.: A sand bath in which the patient sits with his feet upon hot sand, or has it sprinkled over him.

a-rēn'-dal-ite, *s.* [*In Ger. arendalit*, named from *Arendal* in Norway, near which it is found.] A mineral, a sub-variety of ordinary Epidote. It mostly occurs in dark-green crystals.

ar-ēn-dä'-tor, *s.* [*Low Lat. arendator*, *arrendator*, from *arendo*, *arrendo*=to pay rent; *arenda*=rent; *ad*=to, and *renda*=rent. (*RENT*.) In Russian *arend* is=lease, farm, rent, and in Spanish *arrendar* is=to let out to rent.]

In Livonia and other provinces of Russia: One who farms the rents or revenues. One who contracts with the Crown for the rents of the farms.

Crown-arendator: One who rents an estate belonging to the Crown. (*Tooke: Russia*, ii. 238.)

a'-rēng, *s.* [*Native Malay name*.]

1. A palm-tree, formerly called *Areng saccharifera*, but now more generally denominated *Saguerus saccharifer*. It belongs to the section *Cocoinæ*. It grows wild in the islands of Southern Asia, and is cultivated in India. It furnishes sago and wine, while its fibers are manufactured into ropes.

2. An old genus of palms, now altered into *Saguerus*. [*See 1.*]

**a-rēng'e*, *adv.* [*ARENKE*.]

är'-ē-nic'-öl-a, *s.* [*Lat. arena*=sand, and *colo*=to inhabit.] A genus of *Annelida*, the typical one of the family *Arenicolidae*. *A. piscatorum*, the *Lumbricus marinus* of Belon and Linnæus, is a worm which buries itself in the ground one and a-half or two feet in depth, betraying its lurking place, however, by leaving on the surface little cordons of sand, closing the entrance to its hole. It has a large, eyeless head, small feet at its anterior part, and fine branchiæ (gills) on its middle segments. It is about eight inches long. Fishermen call it the Lobworm, and dig it up for bait.

är'-ē-nic'-öl'-ī-dæ, *s. pl.* [*ARENICOLA*.] A family of *Annelids*, arranged under the order *Errantia*. [*ARENICOLA*.]

†*är'-ē-ni-lit'-ic*, *a.* [*Lat. arena*=sand; *Gr. lithos*=stone.] Pertaining to sandstone. (*Kirwan*.)

a-rēnk'e, *a-rēng'e*, *adv.* [*O. Eng. a*; *renke*=rank.] In a row; in a series.

"And ladde him and his monekes.

In to a well fair halle,
And sette him adoun *arenke*,
And wosche here fet alle."

MS. Harl., 2,277, f. 44b. (*Boucher*.)

är'-ē-nōse, *a.* [*Sp.*, *Port.*, and *Ital. arenoso*; *Lat. arenosus*.] Full of sand; sandy. (*Johnson*.)

är'-ē-nū-loūs, *a.* [*Lat. arenula*=fine sand; dimin. of *arena*=sand.] Full of fine sand; composed of fine-grained sand; gritty.

är'-ē-ō-lä (*Lat.*), är'-ē-ōle (*Eng.*), *s.* [*In Fr. aréole*; *Sp.* & *Port. areola*; from *Lat. areola*=(1) a small open place, (2) a small garden-bed; dimin. of *area*.] [*AREA*.]

Physical Science: Any small area; any minute surface. *Specially*—

I. Anatomy & Medicine:

1. A dark-colored circle surrounding the nipple.
2. A similar one surrounding the pock in vaccination.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðis; sin, aș; expect, Xenophon, exist. ph = f
-cian, -tian = șan. -tion, -sion = șhün; -țion, -șion = zhün. -tious, -cious, -sious = șhüş. -ble, -dle, &c. = bel, de!

3. The interstices in areolar tissue.

"... as ossification advances between the rows, these cups are of course converted into closed areolæ of bone."—*Todd & Bowman: Physiol. Anat.*, vol. i., p. 116.

II. Entom. (Pl. Areolæ): The small areas, spaces, or interstices into which the wings of insects are divided by the nervures. They are important for classification.

III. Bot.: The little spaces or areas on the surface of any portion of a plant. Thus if, as is often the case, the surface of a crustaceous lichen is cracked in every direction, then the spaces between the cracks are the areolæ.

är-ë-ö-lar, a. [Eng. areol(e); -ar.] Pertaining to an areola.

"... the cutis or areolar framework of the skin."—*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 407.

areolar tissue

1. Anat.: A tissue widely diffused through the body, and composed of white and yellow fibers, the former imparting to it strength, and the latter elasticity. The two kinds of fibers interlace with each other again and again in the most complex manner. The interstices left between them are of very unequal size, and should not be called, as for a long time they were, cells. Areolar tissue protects from injury the parts of the body in which it occurs, and when placed in the interstices of other tissues it keeps the latter from moving as freely as otherwise they would. The *cutis vera*, or true skin, is composed of it, and it abounds in the exterior parts of the muscles and in the interstices between their fibers, beneath the skin, on the surface of the pharynx, and the œsophagus. (*Todd & Bowman: Physiol. Anat.*)

"This adipose tissue is generally found associated with the areolar or connective tissue."—*Beale: Bioplasm* (1872), §182.

2. Bot.: A term occasionally applied to cellular tissue.

är-ë-ö-läte, a. [Mod. Lat. *areolatus*; from *area*.]

Phys. Science: Divided into a number of irregular squares or angular spaces.

Spec. Bot.: Pertaining to such markings as are left on the receptacles of certain composite plants when the seeds have fallen off, or to similar areolations. [AREOLA.]

Entom.: Pertaining to the small spaces into which the membranous wings of insects are divided by the nervures which traverse them.

är-ë-ö-lä-tion, s. [From Eng. *areolate*.] Any small irregular square, angular space, mesh, or cell in a tissue or other substance.

är-ë-ö-le, s. [AREOLA.]

är-ë-ö-m-ë-tër, s. [In Ger. *areometer*; Fr. *aréomètre*; Port. *areómetro*; from Gr. *araios* = (1) thin, (2) porous, and *metron* = a measure.] An instrument designed to measure the specific gravity of liquids. The simpler areometers measure only the relative weights of liquids. They consist of a tube of glass, terminated in a ball at its lower part, and divided into equal portions through its whole length. Another ball filled with mercury is soldered below to keep it vertical. The depth to which it sinks in various liquids is in the inverse ratio of their relative specific gravities. In Fahrenheit's areometer there is an adjustment by weights so that the volume of the part immersed is constant, and thus the absolute specific gravity of the liquid tested is ascertained, that of water being previously fixed.

är-ë-ö-m-ët-ri-cal, a. [In Ger. *areometrisch*; Fr. *aréométrique*.] [AREOMETER.] Related to the areometer. Measured by the areometer.

är-ë-ö-m-ët-rý, s. [In Ger. *areometrie*; Fr. *aréométrie*.] The art of measuring the specific gravity of liquids.

†är-ë-öp-a-gist, s. [Eng. *Areopag(us)*; -ist.] The same as AREOPAGITE (q. v.).

är-ë-öp-a-gite, s. [Fr. *aréopagite*; Sp., Port., Ital., & Lat. *Areopagita*; Gr. *Areiopagitēs*.] A member of the Areopagus (q. v.).

"... Dionysius the Areopagite, ..."—*Acts* xvii. 34.

är-ë-öp-a-git-ic, a. [In Ital. *Areopagítico*; Gr. *Areiopagitikos*.] Pertaining to the Areopagus.

är-ë-öp-a-git-ics, är-ë-öp-a-git-ic, subst. [From *Areopagitic* (q. v.).] A work by Milton, which he describes as a "speech for the liberty of unlicensed printing." It has been characterized by Prescott as perhaps the most splendid argument the world had then witnessed on behalf of intellectual liberty. The name is taken either from the Areopagus as the great fount of justice, or possibly from the *Areopagitica* of Isocrates.

"The truth is that the Just Vindication consists chiefly of garbled extracts from the *Areopagitica* of Milton."—*Macaulay: Hist. Eng.*, ch. xix.

är-ë-öp-a-güs, s. [Ger. *Areopag*; Fr. *Aréopage*; Sp., Port., & Ital. *Areopago*; Lat. *Areopagus*; Gr. *Areiopagos*, a hill sacred to Ares (Mars), on the west side of the Acropolis at Athens; *Areios*, adj. = pertaining to Ares or Mars; from *Arēs* = Mars, and *pagos* = a peak, a rocky hill.]

1. Spec.: The highest court at Athens, so called from the fact that its place of meeting was upon the hill of Ares (Mars' Hill). It was of great antiquity, and was said to have taken its name from the legend of Ares having been tried there by Poseidon for the murder of his son, Halirrhottus. The judges belonging to it sat in the open air. They consisted of all who had filled the archonship without having been expelled from it for misconduct. The cases which came before the court were specially those which might result in the infliction of capital punishment. When Paul pleaded the cause of Christianity before the Court of Areopagus he addressed the most august assembly which Athens could boast. (*Acts* xvii. 19, 22.)

2. Gen.: A conference or congress consisting of ambassadors or other dignified personages representing the several European powers.

är-ë-ö-stýle, s. [AREOSTYLE.]

är-ë-ö-sýs-týle, s. [AREOSYSTYLE.]

†är-ë-ö-t-ec-tön-ics, *är-ë-ö-t-ec-tön-icks, s. [In Fr. *arêotectonique*; Gr. *Areios* = devoted to Mars, martial, and *tektônikos* = practiced or skilled in building; *tektôn* = a carpenter.]

Fortification: That part of the science of fortification which teaches, or at any rate attempts to teach, how to encounter an enemy as advantageously as possible. (*Glossog. Nova*, 2d ed.)

***ar-ë-öt-ic, *ar-ë-öt-ick, a. & s.** [Gr. *araios* = (1) thin, narrow, slight, (2) porous, spongy.]

1. As adjective: Pertaining to an attenuant; having the property of dissolving viscidities. [See the substantive.]

2. As substantive: An attenuant; a medicine designed to dissolve viscidities, to promote the removal of morbid matter by means of perspiration, and healthfully to attenuate the frame.

***a-rë-re, v. t. & i.** [A. S. *aræran* = to rear up; *arænes* = a raising.]

A. Transitive:

1. To raise.
2. To excite.

B. Intransitive: To rear, to stand on the hind legs, as a horse.

är-ë-s, s. [Gr. *Arēs*.] The god of war in the Greek mythology, son of Zeus and Hero, corresponding to Mars in that of the Romans. He was worshipped principally in Thrace and Scythia. The people of Greece proper, though constantly engaged in war, seem to have paid but little attention to his worship.

"The twelve great gods and goddesses of Olympus, — Zeus, Poseidon, Apollo, Arēs, Hēphæstos, Hermēs, Hērē, Athēnē, Artemis, Aphroditē, Hestia, Dēmētēr."—*Grote: Hist. of Greece*, pt. i., ch. i.

***a-rë-se, v. i.** [A. S. *areosan* = to fall down, to perish.] To totter. (*Sevyn Sages*, i. 215.)

***a-rë-sön, *a-rë-soñ, v. t.**

[Fr. *arraisonner* = to attempt to persuade by reasons; O. Fr. *aresoner* = to interrogate, to reason; Low Lat. *arra-tionare*.]

1. To reason with; to attempt to persuade.
- "Ther foure at Rome was to areson the Pope."—*Chron.*, p. 314.
2. To interrogate. (*Sir Tristrem*, p. 34, st. 51.)
3. To censure.
4. To arraign.

***a-rëst', *a-rëst'e, s.** [ARREST.]

***a-rë-ste, *a-rë-est, *a-rë-est-ýd, *rë-est-ýd, a.** [RESTE.] Rancid or "resty," as flesh. (*Prompt. Parv.*)

The Areopagus.

Ares.

***a-rë-ste-nësse, s.** [O. Eng. *areste*; -nesse.] Rancidity. (*Prompt. Parv.*)

***a-rëst-ër, s.** Old spelling of ARRESTER. (q. v.)

***a-rës-týn, v. t.** Old spelling of ARREST. (q. v.)

är-ë-tä-ics, s. [ARETOLOGY.]

ä-rë-te, s. [Fr., from Lat. *arista* = an ear of corn; cf. *acer* and *aro*.] (See extract.)

"I have heard an *arête* described as an infinitely narrow ridge of rock with an everlasting vertical precipice on one side, and one longer and steeper on the other."—*Rev. J. F. Hardy, in Peaks, Passes, and Glaciers* (1860), p. 210.

är-ë-thū-ša, s. [Lat. *Arethusa*; Gr. *Arethousa*.]

1. Class. Myth.: One of Diana's nymphs, who was transformed into a fountain.

2. Ancient Geog.: The name of several fountains, and notably one at Syracuse.

3. Astron.: An asteroid, the ninety-fifth found. It was discovered on the 23d of November, 1867.

4. Bot.: A genus of plants belonging to the order Orchidaceæ, or Orchids. The only known species is *A. bulbosa*, found in North America.

a-rë-ti-a, s. [From Benoit Aretio, a Swiss, Professor in the University of Berne. He died in 1574.] A genus of plants belonging to the order Primulaceæ, or Primworts. The species, which are brought from Switzerland and the Pyrenees, are peculiarly suitable for rock-work.

†är-ët-öl-ö-gý, är-ë-tä-ics, s. [Gr. (1) *aretē* = manliness, virtue in the Roman sense, goodness, excellence; (2) *logos* = . . . discourse.] That part of Ethics which treats specially of virtue.

***a-rët-te, v. t.** [ARRET.]

***a-rët-týt, pa. par.** [ARRET.]

a-reu', *areghwe (a-rû) (gh silent), s. [ARGH.] Fear.

"That he not areghwe hit ne forlete."

Hule & Nightingale, 1,404. (*S. in Boucher*.)

***a-rew' (rew=rû), v. t.** [RUE, v.] To compassionate.

"Jhesu Crist arew hem sore,

And seide he wolde racche hem thore."

MS. Harl., 2,253, f. 56. (*S. in Boucher*.)

a-rew', a-rew'e (rew=rû), adv. [Old Eng. *a*, and *rew* = row.] In a row.

"Her hew

'Was wan and leane, that all her teeth arew

And all her bones might through her cheekes be red,"

Spenser: F. Q., V. xii. 29.

ar-fvëd'-sön-ite, ar-fwëd'-sön-ite, s. [In Ger. *arfvedsonit*, from *Arfwedson*, the discoverer of lithia, and Eng. suff. *-ite*.] A mineral classed by Dana under his Amphibole group and sub-group of Bisilicates. Its crystals are probably monoclinic. Its hardness is 6; its sp. gr. 3.329 to 3.589; the luster vitreous; the color pure black in masses, deep green or brown in thin scales. Composition: silica, 46.57 to 51.22; alumina, 2.00 to 3.41; protoxide of iron, 0 to 24.38; protoxide of manganese, 0.62 to 7.46; magnesia, 0.42 to 5.88; lime, 1.56 to 5.91; soda, 0 to 2.96; chlorine, 0.24; titanate acid, 2.02. It occurs in Greenland, Norway, &c.

ar'-gal, adv. [Corrupted from Lat. *ergo* = therefore.] Therefore.

"... the gallows is built stronger than the church; argal, the gallows may do well to thee."—*Shakesp.: Hamlet*, v. 1.

ar'-gal, s. [ARGOL.]

ar'-ga-li, s. The name for some species of the genus *Ovis*, or Sheep. The Asiatic Argan, *Ovis Ammon*, or *O. Argali*, which is perhaps the dishon of the Pentateuch, inhabits the mountains and steppes of Northern Asia; the *O. Pygargus*, perhaps only a variety of the former, is found in North-western America; while the *O. Tragelaphus* is indigenous to Barbary.

ar'-gänd lämp, s. [So called after Aimé Argand, a Genevese, who invented it about the year 1782.] A lamp with the wick made hollow, so as to admit air to both surfaces of the flame with the effect of much increasing the light and heat. The same principle has also been adapted successfully to gas-burners.

Ar'-gë-an, a. [Lat. *Arg(o)*; Eng. suff. *-ean*. In Lat. *argous*, from *Argo*, Jason's vessel (see ARGO).] Pertaining to the old ship Argo, that in which Jason is represented as having sailed in quest of the golden fleece.

Argand Lamp.

fäte, fät, färe, amidst, whät, fäll, father; wë, wët, hère, camël, hër, thère; pine, pît, sîre, sîr, marine; gô. pôt, or, wöre. wôlf. wôrck, whô, sôn; müte, cûb, cûre, unite, cûr, rûle, füll; trý, Sýrian. æ, œ = ë; ey = ä. qu = kw.

ar'-gěl, ar'-ghěl, s. [Mod. Syriac.] A name given in Syria and the Levant to the *Cynanchum* or *Solenostemma argel*, an asclepiadaceous plant, the leaves of which are used in Egypt for adulterating senna. (Lindley.)

ar-gē'-ma, s. [In Sp. & Lat. *argema*; Gr. *argemos*, *argemon*, and *argema*; from *argos*=shining, bright.] A small white speck or ulcer partly on the cornea, and partly on the sclerotic coat of the eye.

ar-gēm'-ō-nē, s. [Fr. *argémone*; Sp., Port., & Ital. *argemone*; Lat. *argemone*; Gr. *argemōnē*, either a kind of poppy or an adonis; from Lat. *argema*=Gr. *argema*=a small ulcer in the eye, for which the *argemone* was believed to be a proper application.] [ARGEMA.]

***A. Ordinary Language:** The wild tansy. (Minshew.)

B. Technically:

Bot.: A genus of plants belonging to the family Papaveraceae, or Poppy-worts. It has three sepals and six petals. The *A. Mexicana*, believed, as its name imports, to have come from Mexico, is now common in India and other warm countries in the Old World, as well as in the New. It has conspicuous yellow flowers. From having its calyx prickly, it is often called Mexican Thistle. The yellow juice, when reduced to consistence, resembles gamboge. It is detestive. The seeds are a more powerful narcotic than opium.

ar'-gēnt, *ar'-gēnte, s. & a. [In Fr. *argente*; Sp. *argen*; Port. & Ital. *argento*; Lat. *argentum*; Gr. *argyros*=the white metal, silver; *argos*=shining, bright; Sansc. *ragatam*=silver; *ragatas*=white; *ragārm*=to shine; *argunas*=light, from the root *arg*. The Teutons have quite a different word for silver, which is in A. S. *seolfer*, *seolfor*, *sylfor*; Sw. *silfver*; Dan. *solv*; Dut. *silver*; Ger. *silber*. Probably, therefore, the discovery of silver was not made till the Teutonic race had separated from the old Aryan nations in Central Asia, which gave origin to nearly all the European nations. Or they may have forgotten it, and after some ages re-discovered it independently.]

A. As substantive: Silver, figuratively rather than literally.

1. Ordinary Language: Used of the silvery color of certain clouds or their margins, or anything white and shining.

"And soft, reflected clouds of gold and argent!"

Longfellow: *The Golden Legend*, i.

2. Her.: Used of the silvery color on coats of arms. In the arms of princes it is sometimes called *Lune*, and in those of peers, *Pearl*. In engravings it is generally represented by the natural color of the paper. It is intended to symbolize purity, innocence, beauty, or gentleness, graces which add a luster and attractiveness to their possessor like that of silver lit up by the rays of the sun.

"He beareth gules upon his shield,

A chevron argent in the field."

Longfellow: *Tales of a Wayside Inn*, Prelude.

B. As adjective: Silvery-white, brilliant white; shining.

1. Ordinary Language:

"Or ask of yonder argent fields above,
Why Jove's satellites are less than Jove?"—Pope.

2. Technically: Used—

(a) **Zool.:** Of the scales of fishes, or of silvery markings on the wings of insects.

(b) **Her.:** The white color in the coats of arms.

ar-gēn'-tal, a. [Fr. *argental*; Ital. *argentale*.] Pertaining to silver; consisting of silver; containing silver as one of its ingredients; having silver combined with it.

ar-gēn'-tan, s. [From Lat. *argentum*=silver.] "German silver;" an alloy of nickel with copper and zinc.

ar-gēn-tā'-tion, s. [From Lat. *argentatus*=plated or ornamented with silver.] A coating with silver.

ar-gēn-tāu'-rūm, s. [Lat. *argentum*=silver, and *aurum*=gold.] "A substance, element, or form of matter having properties akin to both silver and gold," claimed to have been produced by Dr. Stephen H. Emmons, of Staten Island, N. Y., from silver coin, and by him converted into gold.

argentaurn gold, s. Gold alleged to be made from "argentaurn" or directly from silver by means of impact and very low temperature.

"Though the new element, *argentaurn*, was the connecting link by which the gold was first attained—the searchlight, as it were, pointing out the direct path—it is so unstable an element, reverting on the least provocation, so to speak, into silver, or advancing into gold, that when work on a microscopical scale progressed to commercial dimensions it was found possible to dispense with that tedious and costly process, and now the gold is made directly from Mexican silver dollars."—E. A. Fletcher, in *Frank Leslie's Popular Monthly* for Nov. 1898.

ar-gēn'-tic, a. [Lat. *argent(um)*; Eng. suff. -ic.] Pertaining or relating to silver; composed in whole or in part of silver; obtained from silver.

Chem.: Argentite salts are distinguished by giving with hydrochloric acid a white precipitate of argentic chloride (AgCl), which is insoluble in boiling water and in nitric acid, but dissolved by ammonia without blackening. Argentic sulphide (Ag_2S) is black; argentic phosphate (Ag_3PO_4) is yellow; argentic chromate (Ag_2CrO_4) is brick-red; Ag_2CO_3 is white, insoluble in water, soluble in nitric acid or in ammonia. Caustic alkalies give a brown precipitate of Ag_2O , which is soluble in ammonia. Argentic iodide (AgI) is a pale yellow color, insoluble in ammonia or in nitric acid.

Argentic chloride (AgCl) is obtained as a curdy-white precipitate by adding a soluble chloride to argentic nitrate. It is insoluble in water and in acids, but dissolves in ammonia, in potassic cyanide, and is slightly dissolved by a saturated solution of sodium chloride. When melted it looks like horn, hence it has been called *horn silver*. It is acted upon by light. The chloride, iodide, and bromide are used in photography.

Argentic nitrate (AgNO_3) is obtained by dissolving silver in nitric acid. It crystallizes in transparent anhydrous colorless tables, soluble in their own weight of cold water, and in half their weight of boiling water; it is also soluble in alcohol. When fused it is called *lunar caustic*, and is used for marking ink and to dye hair. It is used in medicine as a caustic for wounds, and is administered internally in small doses as an astringent and alternative to the mucous coats of the stomach. It also acts as a tonic; but it stains the skin a blue leaden color when it has been taken for a long time. It has been given for epilepsy.

Argentic oxide (Ag_2O) is a brown powder which is obtained by adding caustic potash to argentic nitrate. It is a powerful base, decomposed at red heat into silver and oxygen.

ar-gēn-tī'-nā, s. [From Lat. *argentum*=silver.] A genus of fishes belonging to the Salmonidae, or Salmon family. Linnæus founded it for the Argentine, described below.

ar-gēn-tine, s. [In Fr. *argentin*; Port. & Ital. *argentino*.]

A. Ordinary Language:

1. Pertaining to silver.

2. Made in whole or in part of silver.

"With an antick deaurate with letters *argentine*."
Holmes: *Fall of Rebellion*. (Boucher.)

3. Silvery in aspect.

4. Sounding with a tone like that of silver.

B. Technically:

1. **Geog. Argentine Confederation or Argentine Republic:** A South American Republic—that of La Plata—lying along and south from the great La Plata river. Its capital is Buenos Ayres. Though there are silver mines within this vast region, yet it is not after them that the territory is named. Argentine, from Sp. *argento*=silver, is simply a synonym for *plata*=silver, in the term *Rio de la Plata*=river of silver. Under the reflection of the sun's rays, every river presents a silvery aspect, the Rio de la Plata in this respect not surpassing a multitude of its compeers.

2. **Min.** [In Ger. & Fr. *argentin*.] A mineral, a pearly lamellar variety of Calcite. It is of a white, grayish, yellowish, or reddish color. [CALCITE.]

3. **Zool.:** Any species of the genus *Argentina*. *Spec.*, a small fish of brilliant aspect, the *Scopelus Humboldtii* of Cuvier, and the *Argentina Sphyræna* of Pennant and Fleming. It belongs to the Salmonidae. Yarrell, in 1836, mentioned that it had been taken three times on the British coasts.

4. **Geog.:** An inhabitant of some one of the provinces belonging to the *Argentine Confederation*; a La Platan. (B. 1.)

ar'-gēn-tite, s. [Lat. *argentum*=silver, and Eng. suff. -ite.] A mineral placed by Dana at the head of his Galena group of minerals. It occurs in isometric crystals; also reticulated, arborescent, filiform. The hardness is 2–2.5; sp. gr., 7.196–7.365; luster, metallic. It is opaque, has a sub-conchoidal fracture, and is perfectly sectile. It consists of about 12.9 parts of sulphur, and 87.1 of silver. It is found in Cornwall, also in Germany, Norway, Hungary, the Ural mountains, and America. It is closely akin to Argentopyrite and Salpaite (q. v.).

ar-gēn-tō-py'r-ite (pyr=pīr), s. [Lat. *argentum*=silver, and Gr. *pyritēs*, adj.=of or in fire; s.=pyrites; *pyr*=fire.] A mineral made a species by Walthershausen, but now shown to be a pseudomorph, composed of argentite, marcasite, pyrrhotite, and pyrrargite. Dana classes it with the first of these species.

ar-gēn'-tous, a. [Lat. *argentum*, and Eng. suff. -ous=full of. In Fr. *argenteux*; Port. & Ital. *argenteo*; Lat. *argenteus*.]

Argentous oxide is prepared by heating argentic citrate in a stream of hydrogen to 100°. The residue is mixed with potash, which precipitates the oxide as a black powder. Its salts are of no importance.

ar-gēn'-tūm (genit. ar-gēn'-tī), s. [Lat. =silver.] [ARGENT.]

Chem.: A monatomic metallic element; symb., Ag; atomic weight, 108; sp. gr., 10.5; melting point, 1023° C. A white malleable ductile metal. It is not acted upon by air or moisture. When melted it absorbs oxygen, which is liberated when the metal cools. It is scarcely acted upon by hydrochloric acid, but easily dissolved by nitric acid. It has great affinity for sulphur, and tarnishes in the air. [SILVER.]

***argentum album, s.** [Literally=white silver.] Formerly, silver coin or pieces of silver which passed for money.

***argentum Dei.** [Literally=God's silver.] "God's penny;" earnest money given to confirm a bargain.

***argentum vivum.** [Lit.=living silver.] Quick-silver, mercury.

***argh, *ergh, *arch (ch guttural), v. t.** [A. S. *eargian*.] To hesitate; to be reluctant.

"Anteor *arghet* with oustere word."

Siege of Troy, MS. (S. in Boucher.)

***arghe, *ar'-we, *ar'-ēgh, *ērke (O. Eng.), *argh, *airgh, *ērgh, *arçh, *ērçh (Scotch), (gh, ch guttural), a.** [A. S. *earg*, *earh*= (1) inert, weak, timid, evil, wretched, (2) swift, fleeing through fear; *arg*=wicked, bad; *arh*=mean; Icel. *argr*.] [ARCH, a.]

1. Timid.

"That day nought so *arghe* he es."

Nassington: *Myrrour*. (S. in Boucher.)

"And thou art as *arwe* coward."

Alisaunder, i. 3,340. (Ibid.)

2. Indolent; averse to work from timidity or other cause.

"And if that dede be not *erke*."

Romaunt of the Rose, 4,856.

ar'gh-nēs, *ar'ch-nēs, s. [O. Eng. & Scotch *argh*=arch; and Eng. suff. -ness.] (O. Eng. & Scotch.)

1. Reluctance, backwardness, sluggishness.

"*Arghnes* of goode dede to begyn."

Nassington: *Myrrour*. (S. in Boucher.)

"... and must regret their *archness* to improve such an opportunity."—Woodrow: *Hist.*, i. xxxii.

2. Sarcastically: Niggardliness.

"For *archness* to had in a grote,

He had no will to fie a vote."

Legend, Bp. S. Androis, p. 333.

ar'-gīl, s. [Fr. *argile*=clay; Sp. & Port. *argilla*, *arcilla*; Ital. *argiglia*, *argilla*; Lat. *argilla*; Gr. *argillos*, or *argilos*=white clay, potters' earth.] [ARGENT.]

1. White clay, potters' earth.

2. In compos.: Alumina.

"Clay, strictly speaking, is a mixture of silex, or flint, with a large proportion, usually about one-fourth, of alumine or *argil*."—Lyell: *Manual of Geology*, 4th ed., London, 1852, p. 11.

ar-gīl-lā'-cē-ōūs, a. [In Fr. *argilacé*; Port. *argillaceo*; Lat. *argillaceus*; from *argilla*.] Consisting in whole or in considerable measure of clay; clayey.

argillaceous rocks. Rocks into the composition of which alumina pretty largely enters. When breathed upon they give out a peculiar earthy odor, arising from alumina apparently combined with oxide of iron. Example: mud, clay, shale. (Lyell: *Geology*.)

argillaceous schist. Another name for CLAY SLATE (q. v.). (Ibid.)

ar-gīl-lif'-ēr-ōūs, a. [Fr. *argilifère*, from Lat. *argilla*=white clay, and *fero*=to bear.] Producing white clay; applied to earths abounding with argil.

†ar-gīl'-lite, s. [ARGILLYTE.]

†ar-gīl-lit'-ic, a. [ARGILLYTIC.]

ar-gīl-lō, s. [In COMBINATION.] [ARGIL.] Alumina, or clay, in chemical combination with some other mineral substance. [ARGIL.]

argillo-arenaceous, a. Containing alumina, or clay, in combination with sand. [ARENACEOUS.]

argillo-calcareous, a. Containing alumina, or clay, in combination with lime, or rather with carbonate of lime.

argillo-calcite, s. [In Ger. *argillo-kalcit*.] A mineral or rock consisting of alumina in combination with lime.

argillo-ferruginous, a. Containing alumina or clay in combination with iron. [FERRUGINOUS.] In Phillips' *Mineralogy*, 2d ed., there figures among the varieties of limestone one, the third in order.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, țhis; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = șan. -tion, -sion = șhūn; -țion, -șion = zhūn. -tious, -cious, -sious = șhūs. -ble, -dle, &c. = bēl, dēl.

called *argillo-ferruginous* limestone. Under it are included Calp, Aberthaw limestone, and blue and white lias.

ar'-gōn, s. A new element discovered by Lord Rayleigh and Professor Ramsay in 1894. Argon exists in a gaseous form in the nitrogen of the air, amounting in volume to about 4 per cent. of the nitrogen. It solidifies to white crystals, melting at -189.6° C. It has been found in a meteorite which fell in Virginia.

ar-gill-or-nis, s. [Gr. *argillos* = white clay, and *ornis* = a bird.]

Palæont. A genus of fossil birds founded by Prof. Owen on remains obtained by Mr. W. H. Shrubsole from the London clay of Sheppey. The *A. longipennis* (Owen) was probably a long-winged natatorial bird most nearly related to *Diomedea*, but exceeding the *D. exulans*, or Albatross, in size. (*Q. J. Geol. Soc.*, vol. xxxiii., 1877.)

ar-gil'-loūs, a. [Lat. *argillosus* = consisting of clay, from *argilla* = white clay. In Fr. *argileux*; Sp. *arcilloso*; Ital. *argillioso*; Gr. *argillōdes*, or *argilōdēs*.] Consisting in whole or in part of clay; pertaining to clay; derived from clay.

"Albuquerque derives this redness from the sand and argillous earth at the bottom."—Browne: *Vulgar Errors*.

ar-gil'-lyte, ar-gil'-lite, s. [Gr. *argillos* = white clay; and suff. *-lyte*, given by Dana to rocks, as contradistinguished from minerals, which receive the termination *-ite*. Both are from Gr. *itēs* = of the nature of.] Another name for Clay Slate (q. v.).

"Argillyte and talcose schist generally contain more or less of orthoclase in a crypto-crystalline or undistinguishable state."—Dana: *Min.*, 5th ed., p. 539.

ar-gil'-lyt'-ic, ar-gil'-lit'-ic, a. [Eng. *argil-lyte* (q. v.), and suff. *-ic*.]

Ar'-give, a. & s. [Lat. *Argivus*; Gr. *Argeios*.]

A. As adjective: Pertaining or relating to Argos, the capital of Argolis, in the Peloponnesus; or to the Greeks generally.

"I see thee trembling, weeping, captive led,
In Argive looms our battles to design."
Pope: *Homer's Iliad*, bk. vi., 580.

B. As substantive: A native of Argos; hence, a Greek in general.

"Lest any Argive at this hour awake."
Pope: *Homer's Iliad*, bk. xxiv., 818.

Ar'-gō, s. [Lat. *Argo*; Gr. *Argō*; from *argos* = swift.]

1. The ship, fabled by the poets to be the first vessel ever made, in which Jason and his crew sailed to Colchis in quest of the "golden fleece."
2. The constellation Argo Navis (q. v.).

Argo Navis. [Lat. = the ship *Argo*. In Sp. *Argonave*.]

Astron. A very extensive southern constellation introduced by the ancients. Its inconvenient extent has led Sir John Herschel to subdivide it into four parts, by which alteration the stars are more readily referred to. These subdivisions are Carina, Puppis, Vela, and Malus. Its principal star is Canopus (q. v.).

Ar-gō'-an, a. [Lat. *Argous*; Gr. *Argōos*.] Pertaining or relating to the good ship *Argo*.

***ar'-gōil, s.** [ARGOL (2).]

ar'-gōl (1), s. [ARCHIL.]

ar'-gōl (2), ar'-gal, ar'-gil, *ar'-gōil, s. [From the same root as *argil* (?) (q. v.).]

Comm. An impure acid potassium tartrate deposited during the fermentation of grape-juice, as it is less soluble in dilute alcohol than in water.

Ar-gōl'-ic, a. [Lat. *Argolicus*; Gr. *Argolikos*.] Pertaining or relating to Argolis, a district in the Peloponnesus.

ar-gōl'-ō-gēs, s. [Gr. *argologia*; from *argos*, contr. from *aērgos* = not working, idle; *a*, priv., and *ergon* = a work; *logos* = a discourse.] Idle speaking. (*Cockeram*.)

ar'-gōn, s. An atmospheric element discovered by Lord Rayleigh in 1894. It has a density one-fourth greater than oxygen, freezes at 312° below zero, and melts at barely 3° above that point. Its liquefying point stands between the 180° below of oxygen and the 231° below of nitrogen.

Ar-gō-naut, ar-gō-naut, ar-gō-nā'u-ta, s. [In Fr. *Argonaute*; Sp. & Port. (pl.) *Argonautas*; Ital. (pl.) *Argonauti*; Lat. (sing.) *Argonauta*; Gr. *Argonautēs*; *Argō*, the ship so called, and *nautēs* = a sailor; from *naus* = a ship.]

A. Of the form Argonaut (Argonaut in the singular, and Argonauts in the plural):

1. *Argonaut*: One of the heroes who accompanied Jason in the ship *Argo* when he sailed on his mythic voyage in quest of the "golden fleece." (Generally used in the plural, *Argonauts*.)

"... where the boxing contest took place between the King Amycus and the Argonaut Pollux."—Grote: *Hist. Greece*, pt. i., ch. xiii.

"... this was a signal to the Argonauts."—*Ibid*.

2. A cephalopod mollusk. [B., ARGONAUTA.]

B. Of the form Argonauta: A genus of cephalopod mollusks, the typical one of the family Argonautidae. The best known species is the Argonaut, or Paper

Sailor. The shell is thin and translucent. Aristotle supposed that it floated with the concave side up, the animal holding out its arms, after the manner of sails, to catch the breeze. Poets have ever since repeated the fable; but naturalists know that when the Argonaut floats the sail-shaped arms are applied closely to the sides of the shell, and when the animal crawls at the bottom the so-called boat is reversed like the shell of a snail. In 1875, Tate estimated the known species at four recent and two fossil, the latter being from the tertiary rocks.

Argonaut.

Ar-gō-nā'ut-ic, a. [Eng. *Argonaut*; *-ic*.] Pertaining to the Argonauts or their celebrated expedition.

"... the Argonautic expedition . . ."—Thirlwall: *Hist. Greece*, ch. v.

Ar-gō-nā'ut-ics, s. [ARGONAUTIC.] Any poem of which the Argonautic expedition is the theme.

ar-gō-nā'ut-i-dæ, s. pl. [ARGONAUTA.] A family of dibranchiate cephalopodous mollusks, the first of the section Octopoda or Octopods. The dorsal arms (of the female) are webbed at the extremity, secreting a symmetrical involuted shell. The mantle is supported in front by a single ridge on the funnel (*Woodward*). It contains but the single genus *Argonauta* (q. v.).

Ar'-gō Nā'-vis, s. [ARGO.]

ar'-gō-sy, ar'-gō-sie, ar-gū-sē-a, *rāg'-u-sy, s. [Ital. *una Ragusea* (nave). Ragusa itself appears in sixteenth century English as Aragouse, Aragosa, whence the natural substitution of *argusea* for *ragusea*. (*Athenæum*, March 1, 1884.)] A large vessel designed for carrying merchandise; a carrack.

"Your argosies with portly sail, . . .

Do overpeer the petty traffickers."

Shakesp.: *Merchant of Venice*, i. 1.

ar'-gōt (t silent), s. [Fr.] A term originally applied to the language in use among thieves and bad characters generally in France; now restricted to Parisian slang.

ar'-gu-a-ble, a. [Eng. *argue*; *-able*.] Which may be argued; which cannot, *primā facie*, be set aside as absurd.

"The neutralization of a certain area of arguable ground is a very clever phrase for which Lord Cairns desires theological or at least episcopal thanks."—*Daily Telegraph*, June 11, 1874.

ar'-gūe, v. t. & i. [In Fr. *arguer* = to speak against, to accuse. Prov., Sp., & Port. *arguir*; Ital. *arguire*; from Lat. *arguo*, v. t. = to make clear, prove, assert, declare; possibly from the root *arg*.] [ARGENT.]

A. Transitive:

I. Ordinary Language:

*1. [Directly from Fr. *arguer*.] (See etym.) To find fault with; to accuse; to charge with. (Often followed by *of*.)

"The false Matabrune . . . reproved her of the faults that her self had made, arguing her without a cause."—Helyas, p. 28. (*Boucher*.)

"I have pleaded guilty to all thoughts and expressions of mine, which can be truly argued of obscenity, profaneness, or immorality, and retract them."—Dryden: *Fables*

2. [Directly from Lat. *arguo*.] (See etym.)

(a) To debate a question. (See II.)

(b) To prove, to show, to evince; to exhibit by reasoning, perception, or some other satisfactory process.

"Not to know me, argues yourselves unknown."

Milton: *P. L.*, bk. iv.

(c) To persuade; to conduct by argument to a certain intellectual conclusion, or to a course of conduct.

"It is a sort of poetical logic, which I would make use of, to argue you into a protection of this play."—Congreve: *Dedication to Old Batchelor*.

II. Technically:

Law: To debate a question in law, or in fact by means of opposing counsel, each doing his best to establish his case to the satisfaction of a judge and jury.

B. Intransitive:

1. To reason in favor of a proposition or against it; to attempt to establish or refute a statement.

"'If the Convention'—it was thus that he argued—'was not a Parliament, how can we be a Parliament?'"—Macaulay: *Hist. Eng.*, ch. xv.

2. To reason with or against an opponent; to attempt to convince or silence him; or if that be not practicable, then to show others that he has been beaten in the intellectual encounter. (Followed by *against* or *with*.)

"He that, by often arguing against his own sense, imposes falsehood on others, is not far from believing himself."—Locke.

"I do not see how they can argue with any one without setting down strict boundaries."—*Ibid*.

ar'-gūed, pa. par. & a. [ARGUE, v. t.]

ar'-gu-ēr, s. [Eng. *argue*]; *-er*.] One who argues; a disputant, a controversialist.

"Men are ashamed to be proselytes to a weak arguer, as thinking they must part with their reputation as well as their sin."—Decay of Piety.

ar'-gu-fy, v. t. & i. [Eng. *argue*]; *s.*; *-fy* (q. v.).]

A. Trans. To signify. (*Shenstone*: *To a Friend*.)

B. Intrans. To argue. (*Combe*: *Dr. Syntax*, Tour, ii., c. v.)

ar'-gu-ing, pr. par., a. & s. [ARGUE.]

A. As pr. par. & a. (See the verb.)

B. As subst. Argumentation.

"It will in time

Win upon power, and throw forth greater themes

For insurrection's arguing."

Shakesp.: *Coriolanus*, i. 1.

"But what doth your arguing reprove."—*Job* vi. 26.

ar-gū'-lī-dæ, s. pl. [ARGULUS.] A family of Entomostracans belonging to the order Parasita, or, by another arrangement, to the order Siphonostomata, and the first tribe Peltoccephala. [ARGULUS.]

ar'-gu-lūs, s. [Diminutive from Gr. *argos* = . . . swift.] A genus of Entomostracans, the typical one of the family Argulidae. The *A. foliaceus* is a common parasite upon various fresh-water fishes.

ar'-gu-mēt, *ar'-gu-mēnte, s. [In Sw. *targument*; Fr. *argument*; Sp. & Port. *argumento*; Ital. *argomento*, *argomento*; Lat. *argumentum* = (1) proof, evidence; (2) a logical conclusion; (3) the subject of any written composition, theme, plot, &c.: from *arguo*.] [ARGUE.]

A. Ordinary Language:

I. The act or process of reasoning, argumentation, contention, controversy.

"Which [obstinacy], . . . though proof to argument, was easily shaken by caprice."—Macaulay: *Hist. Eng.*, ch. xii.

II. The state of being argued about: as, "while this was under argument;" meaning, while it was in the state of being argued about. As in the case of a defendant in court being argued for and about, by his legal representative.

III. That about which arguing, debate, or reasoning takes place, or the reasons adduced.

1. Gen. A theme or topic for argumentation; the subject of any reasoning, discourse, or writing.

"... what in me is dark,

Illumine; what is low, raise and support;

That to the height of this great argument

I may assert Eternal Providence,

And justify the ways of God to men."

Milton: *P. L.* bk., i.

2. Spec. The contents of any book presented as an abstract,

"The argument of the work, that is, its principal action, the economy and disposition of it, are the things which distinguish copies from originals."—Dryden.

IV. The reasons adduced in support of any assertion.

"... and fill my mouth with arguments."—*Job* xxxiii. 4.

¶ When it is not stated whether one reasons for or against a proposition, the word *argument* is followed by *about*, *concerning*, *regarding*, or some such preposition. When it is stated, then an argument to establish a proposition is said to be *for* or *in favor of* it (to it is now obsolete); and when to controvert it, then *against* is the term used.

"If the idea be not agreed on betwixt the speaker and hearer, the argument is not about things, but names."—Locke.

"The best moral argument to patience, in my opinion, is the advantage of patience itself."—Tillotson.

"This, before that revelation had enlightened the world, was the very best argument for a future state."—Atterbury.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

B. Technically:

1. *Logic*: An expression in which, from something laid down as granted, something else is deduced, i. e., must be admitted to be true as necessarily resulting from the other. Reasoning expressed in words is argument, and an argument stated at full length, and in its regular form, is a syllogism. Every argument consists of two parts—that which is proved, and that by which it is proved. Before the former is established it is called the question, and when established, the conclusion, or inference; and that which is employed to effect this result, the premises. (*Whately: Logic*, bk. ii., ch. iii., § 1.) [ARGUMENTATUM.]

2. *Astron.*: Any number or quantity by which another may be found.

Argument of latitude: The distance of a body from one of the nodes of its orbit upon which the latitude depends. [NODE.]

"Argument of the Moon's Latitude is her Distance from the Dragon's Head or Tail, which are her two nodes."—*Glossographia Nova*.

far-gu-měnt', v. i. [From the substantive. In Sw. *argumentera*; Fr. *argumenter*; Sp. & Port. *argumentar*; Ital. *argumentare*, *argumentare*.] To reason about anything.

"But yet they *argumenten* faste
Upon the pope and his estate,"

Gower: *Conf. Am.*, Prolog.

far-gu-měnt'-a-ble, a. [Eng. *argument*; -able.] Which admits of argument. (*Chalmers*.)

ar-gu-měn'-tal, a. [Lat. *argumentalis*.] Pertaining to or containing argument.

"Afflicted sense thou kindly dost set free,
Oppress'd with *argumental* tyranny;
And routed reason finds a safe retreat in thee."

Pope.

ar-gu-měn-tā'-tion, s. [Fr. *argumentation*; Sp. *argumentación*; Port. *argumentação*; Ital. *argumentazione*; Lat. *argumentatio*, from *argumentor*=to adduce proof; pa. par. *argumentatus*, from *argumentum*=an argument.]

Logic and Ordinary Language:

1. The act or process of reasoning; that is, of drawing a deductive inference from premises given, or of inductively making a generalization from a multitude of facts carefully brought together and sifted.

"*Argumentation* is that operation of the mind whereby we infer one proposition from two or more propositions premised; or it is the drawing a conclusion, which before was unknown or doubtful, from some propositions more known and evident: so when we have judged that matter cannot think, and that the mind of man doth think; we conclude that therefore the mind of man is not matter."—*Watts: Logic*.

2. The state of being argued or reasoned upon.

"I suppose it is no ill topic of *argumentation*, to show the prevalence of contempt, by the contrary influences of respect."—*South*.

3. That which contains argument, or is a topic for argument.

ar-gu-měn'-ta-tive, a. [Formed by analogy as if from Lat. *argumentativus*, from *argumentatus*, pa. par. of *argumentor*.]

I. Of things:

1. Consisting of argument, or containing argument.

"The *argumentative* part of my discourse."—*Atterbury*.

†2. Which may be adduced as an argument for. (In this sense followed by *of*.)

"Another thing *argumentative* of Providence, is that pappous plumage growing upon the tops of some seeds; whereby they are wafted with the wind."—*Ray*.

II. Of persons: Having a natural tendency to have continual recourse to argumentation; disputatious.

ar-gu-měn'-ta-tive-lý, adv. [Eng. *argumentative*; -ly.] In an argumentative manner.

"Nor do they oppose things of this nature *argumentatively*, so much as oratoriously."—*Ep. Taylor: Artificial Handsomeness*, p. 115.

ar-gu-měn'-ta-tive-něss, s. [Eng. *argumentative*; -ness.] The quality of being argumentative.

**ar-gu-měn-ti'-ze*, v. i. [Eng. *argument*; suffix -ize.] To adduce arguments, to argue. [ARGUMENTIZING.]

**ar-gu-měn-ti'-zěr*, s. [Eng. *argumentiz(e)*; -er.]

"This *argumentizer* should, to have made this story more probable, have cited this proclamation."—*Brady: Introd. to Old Eng. Hist.* (1694), p. 241.

ar-gu-měn-ti'-z-ing, pr. par. [ARGUMENTIZE.]

"... all the unmixed and *argumentizing* philosophy,"—*Mannyngham: Discourses*, p. 34.

ar-gu-měn-tum, s. [Lat.] An argument. [ARGUMENT, B. 1.] (Used in Logic.)

argumentum à posteriori. [À POSTERIORI.]

argumentum à priori. [À PRIORI.]

Argumentum ad baculum. (*Humorously*.) An appeal to the stick, as when a schoolmaster renders an argument which has produced only limited conviction among his pupils conclusive, at least to the extent of silencing gainsayers, by the use of the birch. The phrase may be employed also in a vaguer sense for any appeal to physical force; as when a French political party "descends into the streets."

argumentum ad hominem. [Lit.=argument to a, or to the, man.] An argument drawn from an appeal to the man himself; that is, founded on his professed principles, his conduct, or the concessions he has made. St. Paul's argument, in Rom. ii. 17, "Behold, thou art a Jew, and retest in the law and makest thy boast of God," &c., is an *argumentum ad hominem*.

argumentum ad ignorantiam. [Lit.=argument to ignorance.] An argument in which a too confident disputant is reminded of his ignorance. When John Foster, reasoning against atheism, reminds the man who categorically and dogmatically declares that there is no God, that his personal experience has been limited to what has occurred in one fragment of the earth, and one very brief period of time, and that possibly, had he traversed the universe and lived through a bygone eternity, he somewhere or at some time might have found proofs of the Divine existence which would have convinced even him, the argument is one *ad ignorantiam*.

argumentum ad verecundiam. [Lit.=an argument to modesty.] An appeal to a person's modesty; as if one were to say to an opponent, "Well, Louis Agassiz was of a different opinion; but perhaps you are more competent to judge than he was."

Ar'-gūs, s. [In Fr., Lat., &c., *Argus*; Gr. *Argos*, from *argos*=shining, bright, because Argus' eyes were so.]

1. *Class. Myth.*: A son of Arestor, said to have had 100 eyes, of which only two slept at one time, the several pairs doing so in succession. When killed by Mercury, his eyes were put into the tail of the peacock, by direction of Juno, to whom this bird was sacred.

† Argus was deemed a highly appropriate name to give to a vigilant watch-dog.

"Argus, the dog, his ancient master knew."

Pope: *Homer's Odyssey*, bk. xvii. 344.

2. *Zool.*: A genus of birds of the family Phasianidæ, and the sub-family Phasianinæ. It contains the *Argus*, or Argus Pheasant (*Argus giganteus*). The male measures between five and six feet from the tip of the bill to the extremity of the tail, and is an eminently beautiful bird, the quill-feathers of the wings, which often exceed three feet in length, being ornamented all along by a series of ocellated spots.

† The name *Shetland Argus* is given to a starfish (*Astrophyton scutellum*). It is called also the Basket Urchin or Sea-basket. The arms branch again and again dichotomously, so that their ultimate fibers are supposed to be about 80,000 in number.

argus-eyed, a. Very observant; allowing little that is cognizable by a momentary glance of the eye to escape one's notice. The term is used as a synonym for universal and ceaseless watchfulness.

argus-shell, s. A species of porcelain-shell, beautifully variegated with spots somewhat resembling those upon a peacock's tail.

ar-gū'te, a. [In Sp. *agudo*; Ital. *arguto*; Lat. *argutus*=(1) made clear; (2) wordy; (3) witty, sagacious; from *arguo*.] [ARGUE.]

1. Shrill.

2. Witty, sagacious.

ar-gū'te-něss, s. [Eng. *argute*; -ness.] The quality of being argute. Mental sharpness, sagacity.

"... this [Plutarch] tickles you by starts with his arguteness,..."—*Dryden: Life of Plutarch*.

Ar-gŷn'-nīs, s. [Gr. *Argynnis*, and *Argonnīs*.] (See definition 1.)

1. *Greek Mythol.*: A name of Aphrodite (Venus.) The Greeks derived it from a sacred place near the Cephissus, where a boy, Argynnus, beloved by Agamemnon, is said to have died; but Max Müller traces it remotely to the Sanscrit *arguni*=the bright or splendor, an appellation of the dawn. (*Max Müller: Science of Language*.)

2. *Entom.*: A genus of butterflies belonging to the family Nymphalidæ. The species are numerous. They are marked on the lower surface of the wings with silvery spots. The *A. Paphia*, or Silver-washed Fritillary, is one of the most common. The *A. Lathonia*, or Queen of Spain Fritillary; *A. Adippe*, or High Brown Fritillary; and *A. Aglaia* or Dark-green Fritillary also belong to this genus. (*Jardine: Nat. Lib.*, vol. xxxix., pp. 150 to 158.)

ar-gŷr-eī'-a, s. [Gr. *argyreios*=silvery.] A genus of plants belonging to the order Convolvulacæ, or Bindweeds. They have large flowers and fine silvery leaves. They occur in the East Indies.

ar-gŷr-eī'-ō'-sūs, s. [Gr. *argyreios*=of silver, silvery.]

Ichthy.: A genus of spiny-finned fishes belonging to the Scomberidæ, or Mackerel family. They are akin to the Zeus, or Dory.

ar'-gŷr-ite, s. [In Ger. *argyrit*: from Gr. *argyros*=white metal, silver, silver money, and Eng. suff. -ite.] A mineral, the same as ARGENTITE (q. v.).

ar-gŷr-ō-čēr'-a-tite, s. [Gr. (1) *argyros*=silver; (2) possibly *keratitis*=horned, from *keras*, genit. *keratos*=a horn.] A mineral, the same as Cerargyrite of Dana, and Chlorargyrite (q. v.).

ar-gŷr-ō-mŷ'-gēs, s. [Gr. *argyros*=silver, and *myzō*=to suck.] A genus of moths belonging to the family Yponomeutidæ. (*Jardine: Nat. Lib.*, vol. xl., pp. 263-4.)

ar-gŷr-ō-nē'-ta, s. [Gr. *argyros*=silver, and possibly *nētos*=heaped up, from *nēō*=to heap; or *nētos*=spun, from *nēō*=to spin.] A genus of spiders belonging to the family Araneidæ. The *A. aquatica*, or Diving Spider, weaves for itself a bell-shaped dwelling at the bottom of the water, to which it descends with its prey to devour it. It carries down air entangled among the hairs which cover its body, and sets bubble after bubble free inside its abode till there is sufficient for respiration; for, provided with lungs and not with gills, it cannot breathe after the manner of a fish in the water.

The Diving Spider.

ar-gŷr-ō-ph-īs, s. [Gr. *argyros*=silver, and *ophis*=a serpent.] Silver-snake. A genus of Saurians so like serpents in appearance that, as will be observed, the word *ophis* (serpent) enters into the composition of their name. They belong to the family Typhlopidae.

ar'-gŷr-ōse, s. [Gr. *argyros*=silver.] A mineral, the same as Argentite (q. v.).

ar'-gŷr-ŷ-thrōse, s. [Gr. *argyros*=silver, and *thrōsis*=a cord or line (?).] A mineral, the same as Pyrargyrite (q. v.).

ar'-ī-a, s. [Ital.]

Music:

I. *Gen.*: A rhythmical song as contradistinguished from a recitative one.

II. *Specially*:

1. *Formerly*: A measured lyrical piece for one or for several voices.

2. *Now*: A song intended for one voice supported by instruments. It is introduced into a cantata, oratorio, or opera. [AIR.]

Ār-ī-ād'-nē, s. [Lat. *Ariadne*; Gr. *Ariadnē*.]

1. *Class. Myth.*: A daughter of Minos, king of Crete, who, falling in love with Theseus, then shut up by her father in the labyrinth, gave him a clue by which he threaded his way out. Afterward she was the wife of Bacchus, who gave her a crown, which ultimately became a constellation called by her name.

"Not Ariadne, if you met her
Herself, could serve you with a better."

Cowper (transl. from Vincent Bourn): *The Maze*.

2. *Astron.*: An asteroid, the forty-third found. It was discovered by Pogson, on the 15th of April, 1857.

-arian, suffix. [Lat. -arius.]

As adjective: Pertaining to: as *riparian*=pertaining to the bank of a river.

As substantive: An agent, one who: as *librarian*, an agent in books, one who looks after books.

Ār-ī-an (1), a. & s. [In Ger. *Arianisch* (a.), *Arianen* (s.); Fr. *Arien*; Lat. *Arianus*; Gr. *Arianos*.]

A. As adjective: Pertaining to Arius or his doctrine. [See the substantive.]

B. As substantive: A follower of Arius, presbyter of Alexandria in the fourth century A. D., or one holding the system of doctrine associated with his name. During the first three centuries of the Christian era, what was subsequently called the doctrine of the Trinity had become the subject of controversy, chiefly in one direction; it had been decided against Sabellius that there are in the Godhead three distinct persons, whereas Sabellius had in effect reduced the three to one. [SABELLIANISM.] In the year 317, Alexander, Bishop of Alexandria, having publicly expressed his opinion that the Son of God is not only of the same dignity as the Father, but of the same essence [in Gr. *ousia*], Arius, one of the presbyters, considered this view as leaning too much to Sabellianism, and, rushing to the other extreme, he declared that the Son of God was only the first and noblest of created beings, and though

the universe had been brought into existence through His instrumentality by the Eternal Father, yet to that Eternal Father He was inferior, not merely in dignity, but in *essence*. The views of Arius commended themselves to multitudes, while they were abhorrent to still more; fierce controversy respecting them broke out, and the whole Christian world was soon compelled to take sides in the struggle. Constantine, the first Christian emperor, was then the reigning sovereign, and after he had failed by private means to restore peace and unity, he summoned a council to meet at Nice, in Bithynia, which it did in A. D. 325. It was the first general council and the most celebrated of all. It declared Christ to be *homoousios*, i. e., of the same essence as the Father, whereas Arius regarded Him as only *homoiousios*, of similar essence. The erring presbyter was deposed and exiled; but his numerous followers maintained his doctrine, and were at times so successful that each party had in turn the power, of which it had no scruple to avail itself, of using carnal as well as spiritual weapons against its adversaries; indeed, it is believed that Arius himself died by poison. It would occupy too much space to detail the vicissitudes of a highly-chequered struggle; suffice it to say that the Arians greatly weakened themselves by splitting into sects [SEMI-ARIAN], and the doctrines regarding the relation of the three Divine Personages authoritatively proclaimed at Nice were at last all but universally adopted. They may be found detailed in what are popularly termed the Nicene and the Athanasian Creeds. [NICENE, ATHANASIAN.] They were held almost without a dissentient voice through the Middle Ages, and were cordially accepted by the leading reformers. The Churches of Rome, England, and Scotland are all at one with regard to the doctrine of the Trinity, as are also the most powerful bodies of English Non-conformists. Arianism has from time to time appeared in the churches, but as a rule its adherents have sooner or later gone back to orthodoxy or forward to Unitarianism.

†**Är'-i-än** (2), *a. & s.* A rare form of ARYAN.

Är'-i-än-ism, *s.* [Eng. *Arian*; -ism. In Fr. *Arianisme*; Port. *Arianismo*.] The system of theological doctrine held and taught by Arius and his followers.

"The Suevians in Spain were first Catholic, then fell off into Arianism. It was not till the sixth century that Spain was Catholic."—*Milman: Latin Christianity*, vol. i., p. 343.

Är'-i-än-i-ze, *v. t. & i.* [Eng. *Arian*; -ize.]

A. Trans.: To render Arian in tenets; to imbue with Arianism.

B. Intrans.: To speak after the Arian manner, or according to the Arian tenets.

Är'-i-än-i-z-ing, *pa. par. & a.* [ARIANIZE.]

"These some were the Christians, that lived after the downfall of the Arianizing Vandals and the expiring of their power."—*Worthington: Miscellanies*.

är'-i-çine, *s.* [From *Arica*, the principal seaport in Southern Peru.]

Chem.: Cinchovatine, $C_{20}H_{26}N_2O_4$. An alkaloid contained in *Arica* bark and in *Cinchona ovata*.

är'-i-çite, *s.* [Apparently from Ital. *Ariccia*; Lat. *Aricia*, in Italy, near Mount Albano, where it occurs.] A mineral, the same as Gismondite (q.v.).

är'-id, *a.* [Fr. *aride*; Sp., Port., & Ital. *arido*; Lat. *aridus*=dry, from *areo*=to be dry.] Dry, parched, wanting in moisture.

"... dry sand-hillocks and arid plains, where not a single drop of water can be found."—*Darwin: Voyage round the World*, ch. v.

är'-i-das, *s.* [From some of the Indian languages.] A kind of taffeta from the East Indies woven from fibers derived from various plants.

Är'-i-däd, *s.* [Corrupted Arabic (?).] A fixed star of the first magnitude, called also *Deneb Adige* and *alpha Cygni*.

ä-rīd'-i-tŷ, *s.* [Eng. *arid*; -ity. Fr. *aridité*; Ital. *aridita*, *ariditate*, *ariditate*; Lat. *ariditas*.]

1. *Lit.:* The quality or state of being dry, aridness, dryness, drought; absence of moisture. (Used of soil, a country, of the bodily frame, or even the herbage of a plant, such as that of the genus of rushes termed *Xerotes*.)

"Salt, taken in great quantities, will reduce an animal body to the great extremity of aridity or dryness."—*Arbuthnot on Aliments*.

2. *Fig.:* Absence of proper feeling, as if the affections and other emotions had dried up.

"... no sceptical logic or general triviality, insincerity and aridity of any time and its influences, can destroy this noble inborn loyalty and worship that is in man."—*Carlyle: Heroes and Hero-Worship*, Lect. I.

ä-rīd'-i-üm, *s.* [Altered from *Iridium* (?).] The name given by Ullgren to what he believed to be a new metal in the chrome-iron ores of Rösros, in Sweden. Further examination has not confirmed his opinion. (*Graham: Chem.*, 2d ed., vol. ii., p. 59.)

***är'-ie**, *s.* [EYRIE.]

Är'-i-ēl, *s.* [Eng. *Ariel*=an airy spirit (Shakesp.: *Tempest*); Heb. *Ariel*=Lion of God; the name of a person (Ezra viii. 6), and of Jerusalem (Isa. xxix. 1, 2; Ezek. xliii. 16). But in the latter case Gesenius brings it from Arab. *ari*=fire-hearth, and Heb. *El*=God: fire-hearth of God.] A name given by Sir John Herschel to one of the interior satellites of Uranus.

Är'-i-ēs, *s.* [Lat. *aries*=(1) a ram (the animal), (2) the sign of the zodiac, (3) a battering-ram, (4) &c. . . .]

I. Astronomy:

1. The constellation Aries, or the Ram, one of the ancient zodiacal constellations, and generally called the first sign of the zodiac.

2. The portion of the ecliptic between 0° and 30° long., which the sun enters on the 21st of March (the vernal equinox). The constellation Aries, from which the region derives its name, was once within its limits, but now, by the precession of the equinoxes, it has gradually moved into the space anciently assigned to Taurus. [PRECESSION.] It is denoted by the Greek symbol, *Gamma*, which remotely resembles a ram's head. (*Herschel: Astron.*, §§ 380, 381.)

"At last from Aries rolls the bounteous sun,
And the bright Bull receives him."

Thomson: Seasons; Spring.

The first point of Aries is the spot in the heavens where the sun appears to stand at the vernal equinox. It is not marked by the presence of any star, but it is not very far from the third star of Pegasus, that called Algenib. It is the point from which the right ascension of the heavenly bodies are reckoned upon the equator and their longitudes upon the ecliptic. [RIGHT ASCENSION.] (*Airy: Popul. Astron.*, &c.)

II. Astrol.: Aries was considered a choleric or hot sign.

"In Martes face, and in his mansioun
In Aries, the colerik, the hote signe."

Chaucer: C. T., 10,364-5.

†**är'-i-ē-täte**, *v. t.* [Ital. *arietare*; Lat. *arietatum*, supine of *arieto*; from *aries*=a ram.]

1. To butt. (Used of a ram.) (*Johnson*.)

2. To strike in such a manner as a ram would do.

är'-i-ē-tä'-tion, *s.* [Lat. *arietatio*.]

I. Lit.: The act of butting like a ram.

II. Figuratively:

1. The act of battering of walls by means of a battering-ram.

"Secondly, the strength of the percussion, wherein likewise ordnance do exceed all *arietations* and ancient inventions."—*Bacon: Essays, Civ. and Mor.*, ch. lviii.

2. The act of striking against anything; quite apart from the metaphor of the ram's buttings.

"Now those heterogeneous atoms by themselves, hit so exactly into their proper residence, in the midst of such tumultuary motions and *arietations* of other particles."—*Glanville*.

är'-i-ēt-tä, *s.* [Ger. & Fr. *ariette*; Sp. & Port. *arieta*; both from Ital. *arietta*.]

Music: A short lively air, tune, or song.

ä-rīght, ***ä-rŷg'ht** (*gh* silent), *adv.* [Eng. *a, right*; A. S. *ariht*.] Rightly, directly to what is aimed at; properly, becomingly, to some good purpose; without failure of any kind.

"Fair queen, he said, direct my dart *aright*."

Dryden: Virgil's Æneid, ix. 546.

***aright-half**, ***aryght-half**, *adv.* On the right side, on the one side, on this side.

"*Arigh-half* and *aleft-half*."

Ayenbite (ed. Morris), p. 23.

är'-il, **ä-rŷl'-lŷs**, *s.* [Lat. *arillus*=a wrapper.]

Bot.: Anything which proceeds from the placenta, and does not form part of the seed itself. Before the time of Richard the term was yet more vaguely applied, as to the testa in Orchidaceæ and other plants, and the endocarp of some Rubiaceæ and Rutaceæ. The mace surrounding the seed in the Nutmeg, and the envelope enclosing the seeds of *Euonymus*, are genuine instances of the aril.

ä-rŷl'-lâte, **ä-rŷl'-lâ-têd**, **är'-illed**, *a.* [From aril (q.v.).] Furnished with an aril.

"*Arillate* seed."—*Lindley: Natural System of Botany*, p. 15.

är'-il-lôde, *s.* [ARIL.] A false aril; one not proceeding from the placenta.

är'-i-lŷs, *s.* [A proper name. (*Agassiz*.)] A genus of bugs of the family Reduviidæ. One species, the *Arilus serratus*, or Wheel-bug, is said to possess electric powers.

Är'-i-mā, **Är'-i-mān**, *s.* Another form of AHRI-MAN (q.v.).

***ar-i-men**, *v. t.* [A. S. *ariman*.] To count, to reckon.

är'-i-ō-lā'-tion, **här'-i-ō-lā'-tion**, *s.* [In Lat. *ariolatio*, or oftener *hariolatio*; from *hariolor*=to foretell; *hariolus*=a soothsayer.] Soothsaying, divination.

"The priests of elder time deluded their apprehensions with *ariolation*, soothsaying, and such oblique idolatries."—*Browne*.

Ä-rŷ-ön, *s.* [Gr. *Ariōn*.]

1. In *Greek Myth.*: The horse of Adrastus, who lived during the Theban war. It was fabled to have the power of utterance, and to foretell future events.

2. In *Zool.*: A genus of Gasteropodous Mollusks of the family Limacidae, or Slugs. The *A. ater* is the common Black Snail. Tate, in 1875, estimated the known recent species at twenty and the fossil at one, the latter from the Newer Pliocene of Maidstone. The sub-genus *Plectrophorus*, ranked under Arion, has five species, all from Tenariffe.

är'-i-ō'se, *a.* [From Ital. *arioso* (q.v.).] Characterized by melody as distinguished from harmony.

är'-i-ō-sō, *adv. & s.* [Ital. (1) lightsome, airy; (2) pretty, graceful: from *aria*=air, tune.]

A. As adverb: After the manner of an air, as distinguished from recitative.

B. As substantive:

1. A kind of melody bordering on the style of a capital air.

2. A short solo in an oratorio or opera, like an air, but not so long.

ä-rŷ'se, ***ä-rŷ'ze**, ***ä-rŷ'se** (pret. **ä-rō'se**, ***ä-rŷt**; *pa. par.* **ä-rŷ's-en**), *v. i.* [A. S. *arisan*=to arise, rise, rise up, rise again.] [RISE.]

I. To move from a lower to a higher place.

Specially:

1. To ascend as vapors do.

"Behold, there *arise*th a little cloud out of the sea, like a man's hand."—1 *Kings* xviii. 44.

2. To emerge from beneath the horizon, as the sun, the moon, or a star (*lit. & fig.*).

"The sun *arise*th, they gather themselves together, and lay them down in their dens."—*Ps.* civ. 22.

II. To assume an upright position from a sitting, kneeling, or recumbent attitude.

1. To rise from a bed or from the ground (*lit. or fig.*).

"How long wilt thou sleep, O sluggard? when wilt thou *arise* out of thy sleep?"—*Prov.* vi. 9.

"Rejoice not against me, O mine enemy: when I fall, I shall *arise*."—*Micah* vii. 8.

2. To rise from the seat with the view of engaging in some work (*lit. & fig.*).

"*Arise* ye, and depart; for this is not your rest."—*Micah* ii. 10.

3. To rise from the dead (*lit. & fig.*).

"Wherefore he saith, Awake thou that sleepest, and *arise* from the dead, and Christ shall give thee light."—*Ephes.* v. 14.

III. To swell as the waves of the sea in a storm, or a river during heavy rain.

"Thou rulest the raging of the sea: when the waves thereof *arise*, thou stillest them."—*Ps.* lxxxix. 9. (See also *Luke* vi. 48.)

IV. To be excited against; to break forth against.

1. As anger.

"And if so be that the king's wrath *arise* . . ."—2 *Sam.* xi. 20.

2. As an assailant rushing against one (*lit. & fig.*).

"... and when he [the lion? or the bear?] *arose* against me, I caught him by his beard, and smote him, and slew him."—1 *Sam.* xvii. 35.

"Let God *arise*, let his enemies be scattered."—*Ps.* lxviii. 1.

V. To advance from a lower to a higher condition with regard to social standing, freedom from trial, intellectual, moral, or spiritual advancement.

"... by whom shall Jacob *arise*? for he is small."—*Amos* vii. 2.

VI. To commence, to begin.

1. To begin, to commence, to originate; to spring up, to rise, to emerge.

"... the persecution that *arose* about Stephen."—*Acts* xi. 19.

"Nerves are said to *arise* or have their origin in the nervous center to which they are on the one hand attached . . ."—*Todd & Bowman: Physiol. Anat.*, vol. i., p. 216.

2. To begin to act a part; to rise up in a figurative sense.

"Now there *arose* up a new king over Egypt, which knew not Joseph."—*Exod.* i. 8.

***ä-rŷsh**, *s.* [Persian.] A Persian measure of length=about thirty-eight inches. It is not now in use.

fäte, fät, färe, amidst, whät, fäll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sire, sîr, marine; gô, pô, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, ûnite, cûr, rûle, fûll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

ā-rī-ġ-īng, *pr. par. & a.* [ARISE.]

"The sun's arising gleam."

Scott: Lord of the Isles, iii. 12.

***ā-rīst'**. Old pret. of verb **ARISE** (q. v.).

ā-rīs'-tā, *s.* [Lat.=an awn. In Sp. *arista*.]

Bot.: The awn or beard in grasses. It is formed by the elongated midrib of a bract, and sometimes diverges from the lamina before reaching its apex.

†ār'-īs-tarch (1), *s.* [Gr. *aristarchos*=best ruling; *aristarcheō*=to rule in the best way, from *aristos*=best, and *archō*=to rule. Or from *aristos*=best, and *archos*=a leader, from *archō*.] A ruler who is also the best man in the community. (*Ogilvie*.)

Ār'-īs-tarch (2), *s.* [In Ger. *aristarch*; Fr. *aristarque*; Sp., Port., & Ital. *aristarco*. Called after Aristarchus, a grammarian of great celebrity, who lived at Alexandria during the reign of Ptolemy Philadelphus. He had great critical acuteness, which he used in correcting Homer and the other poets.] An acute and severe critic.

Ār'-īs-tar'-chī-an, *a.* [From Aristarchus, the severe critic.] [ARISTARCH (2).] Pertaining or relating to Aristarchus, or to severe criticism.

ār'-īs-tar'-chỹ, *s.* [In Ger. *aristarchie*. From Gr. *aristos*=the best; *archē*=sovereignty.] The rule of the best; government by the best. Etymologically, almost the same in meaning as *aristocracy*.

"The ground on which I would build his chief praise, to some of the *aristarchy* and sour censures of these days, requires first an apology."—*Harrington: Brief View of the Ch. of Eng.*, p. 153.

ār'-īs-tāte, *a.* [Lat. *aristatus*, from *arista*=an awn (q. v.).] Awned; furnished with an awn or awns; bearded; as the glumes of barley and many other grasses.

ār'-īs-tōc'-rā-čỹ, ***ār'-īs-tōc'-rā-tīe**, ***ār'-īs-tōc'-rā-tỹ**, *s.* [In Sw. *aristocrati*; Dut., Ger., & Fr. *aristocratie*; Sp. & Port. *aristocracia*; Ital. *aristocrazia*; Gr. *aristokratia*=(1) the government of the best-born, (2) the rule of the best; *aristos*=the best, and *kratēō*=to be strong, mighty, or powerful; hence to rule; *kratos*=(1) strength, (2) power over.]

I. Of persons:

1. Government exercised by the best citizens in the community—in other words, by the nobles.

"As to the other forms of government, Socrates would say, 'That when the chief offices of the commonwealth were lodged in the hands of a small number of the most eminent citizens, it was called an *aristocracy*.'"—*Xenophon: Memorab. of Socrates*. (*Richardson*.)

"The word *aristocracy*, which is now made to mean men of the upper ranks, even lower than those of the nobility, means, by right, not men at all, but only a state-wielding by the nobles; and in England there is no *aristocraeteia* but that of the House of Lords."—*Barnes. Early England and the Saxon English* (1869), pp. 110, 111.

2. The nobles and other people of position and wealth in a country, taken collectively; or in a more extended sense, those who rise above the rest of the community in any important respect: thus, in addition to the aristocracy of rank, there is one of intellect, one of knowledge, one of high moral feeling, &c.

3. There is no recognition of an aristocracy of birth in the United States.

"Thus our democracy was, from an early period, the most aristocratic, and our *aristocracy* the most democratic in the world."—*Macaulay: Hist. Eng.*, ch. i.

¶ For the views and feelings of aristocracies see the following examples.

"The principle of an *aristocracy* is equality within its own body, ascendancy over all the rest of the community."—*Arnold: Hist. Rome*, vol. i., p. 66.

¶ II. Of things: Rule, dominion, domination, control, ascendancy.

"... expelling from his mind the wild democracy of passions, and establishing (according to the quaint expression of Evagrius) a perfect *aristocracy* of reason and virtue."—*Gibbon: Decline and Fall*, ch. xlv. (1846), vol. iv., p. 257.

ār'-īs-tō-crāt, *s.* [In Sw. *aristokrat*; Fr. *aristocrate*; Port. *aristocrata*.] [ARISTOCRACY.]

1. One who is a member of a small governing class in a nation, or who, even if he takes no part in government, is of high rank.

"We were thus accompanied by the two greatest *aristocrats* in the country, as was plainly to be seen in the manner of all the poorer Indians toward them."—*Darwin: Voyage round the World*, ch. xiv.

2. One who considers the best form of government to be that which places the chief power in the hands of the aristocracy of birth and rank.

3. One who really is, or at least is considered to be, despotic in temper.

"What his friends call *aristocrats* and despots."—*Burke*.

ār'-īs-tō-crāt'-īc, ***ār'-īs-tō-crāt'-īck**, **ār'-īs-tō-crāt'-īc-āl**, *a.* [Fr. *aristocratique*; Sp., Port., & Ital. *aristocratico*; Gr. *aristokratikos*.] Pertain-

ing or relating to a government conducted by the nobles or other persons of rank in the community, or pertaining or relating to those nobles or people of rank themselves.

"Four chief powers will be found on examination to influence and divide political society—the kingly, the sacerdotal, the *aristocratic*, and the democratic."—*Evans Crowe: Hist. France* (ed. 1830), vol. xx., I., p. 9.

"... which will then be the *aristocratical* branch of our legislature."—*Bowring: Bentham's Frag. on Government: Works*, vol. i., p. 280.

ār'-īs-tō-crāt'-īc-āl-lỹ, *adv.* [Eng. *aristocratically*; -ly.] In an aristocratical manner; as the aristocracy are wont to do.

"The whole Christian world, the universal Church, is by some pretended to be monarchical, or by others *aristocratically* governed."—*Hammond: Works*, vol. ii., pt. ii., p. 97. (*Richardson*.)

ār'-īs-tō-crāt'-īc-āl-nēss, *s.* [Eng. *aristocratically*; -ness.] The quality of being aristocratic.

***ār'-īs-tōc'-rā-tīe**, *s.* [ARISTOCRACY.]

†ār'-īs-tōc'-rā-tī-ze, *v. t.* [Eng. *aristocrat*; -ize.] To render aristocratic. (*Ogilvie*.)

***ār'-īs-tōc'-rā-tỹ**, *s.* [ARISTOCRACY.]

ār'-īs-tō-lō-chī-a (*Mod. Lat.*), **†ār'-īs-tō-lō-chỹ** (*Eng.*), *s.* [In Fr. *aristoloche*; Sp. *aristoloquia*; Ital. *aristolochia*, *aristologia*; Port. & Lat. *aristolochia*; Gr. *aristolochēia*=an herb promoting childbirth: *aristos*=best, and *locheia*=child-birth.]

A. Ordinary Language. (Of the form *aristolochy*.) Birthwort; any plant of the genus *Aristolochia*. [See B.]

B. Bot. (Of the form *aristolochia*.) A genus of plants, the typical one of the order *Aristolochiaceæ*, or *Birthworts*. They have curiously inflated irregular flowers, in some cases of large size; these consist of a tubular colored calyx, no corolla, six stamens, one style, and a six-celled capsular fruit, with many seeds. One species, the *A. clematis*, or Common Birthwort, a plant with pale-yellow tubular flowers, swollen at the base, is common among old ruins. Most of the *Aristolochias* are emmenagogue, especially the European species, *A. rotunda*, *longa*, and *clematis*, and the Indian *A. indica*; the last-named species is also antarthritic. *A. bracteata* is anthelmintic; when bruised and mixed with castor-oil it is used in cases of obstinate psora. *A. odoratissima*, of the West Indies, is alexipharmic. The *A. fragrantissima* of Peru is given in dysenteries, fevers, rheumatism, &c.; *A. serpentaria* (the Virginian Snake-root), besides being given in the worst forms of typhus fever, is deemed of use against snake-bite; as is also *A. trilobata*. (*Lindley*.) The *Treasury of Botany* points out that faith in the efficacy of some *Aristolochia* or other, as an antidote to the poison of serpents, prevails in America, Egypt, and India, its existence in regions so remote from each other affording strong evidence of its truth.

ār'-īs-tō-lō-chī-ā-čě-æ, *s. pl.* [ARISTOLOCHIA.]

Bot.: An order of plants placed by Lindley under his last or Asaral alliance of Perigynous Exogens. It has hermaphrodite flowers, six to ten epigynous stamina, a three or six-celled inferior ovary, and wood without concentric zones. In 1846, Lindley estimated the known species at 130. Many are climbing plants. In their qualities they are tonic and stimulating. [ARISTOLOCHIA, ASARUM.]

Ār'-īs-tōph'-an-īc, *a.* [From Greek *Aristophanēs*. (See def.)] Pertaining to Aristophanes, the Athenian comic poet, whose plays were exhibited on the stage between B. C. 427 and 388. (*North Amer. Rev.*)

Ār'-īs-tō-tē'-lī-an, *a. & s.* [Lat. *Aristoteli* (us); Eng. suffix -an.]

A. As adjective: Pertaining to Aristotle, the greatest philosopher of all antiquity, who was born in B. C. 384, and died in 322. His natal place being Stagira, now Stauros, a town of Macedonia, he is often called "the Stagyrte." He was a disciple of Plato, tutor of Alexander the Great, a highly distinguished teacher at Athens, the author of treatises on nearly every subject of human thought, and the founder of the Peripatetic Philosophy, his writings on the last-named theme and on Logic being venerated during the Middle Ages as no other book was but the Bible.

"... the *Aristotelian* collection of marvelous stories."—*Lewis: Early Rom. Hist.* (1855), ch. iii., § 12, vol. i., p. 96.

B. As substantive: One who regards Aristotle as his master. *Spec.*, an adherent of the Peripatetic Philosophy. [PERIPATETIC.]

"The *Aristotelians* were of opinion that superfluity of riches might cause a tumult in a commonwealth."—*Sir Miles Sandys: Essays*, p. 210.

Ār'-īs-tō-tē'-lī-an-īsm, *s.* [Eng. *Aristotelian*; -ism.] The peripatetic system of philosophy founded by Aristotle. [PERIPATETIC.]

Ār'-īs-tō-tēl'-īc, ***Ār'-īs-tō-tēl'-īck**, *a.* [Ital. *Aristotelico*; Lat. *Aristotelicus*.] Pertaining or relating to Aristotle. The same as ARISTOTELIAN. (q. v.)

"The *Aristotelick* or Arabian philosophy continued to be communicated from Spain and Africa to the rest of Europe chiefly by means of the Jews."—*Warton: Hist. Eng. Poetry*, i. 443.

ār'-īth-mān-čỹ, *s.* [Gr. *arithmos* = a number, and *manteia*=propheying, divination; *mantis*=a diviner, a prophet.] Pretended divination of future events by means of numbers.

ā-rīth'-mēt-īc, ***ā-rīth'-mēt-īck**, ***ā-rīth'-mēt-īcke**, ***ars'-mēt-rīke**, ***ars'-mēt-rỹk**, *s.* [In Ger. *arithmetik*; Fr. *arithmétique*; Port. *aritmética*; Sp. & Ital. *aritmetica*; Lat. *arithmetica*; Gr. *arithmētikē* (supply *technē*=art), the fem. of *arithmētikos*=of or for numbering; *arithmos*=number.] In its broadest sense the science and art which treat of the properties of numbers. This definition, however, would include Algebra, which is considered a distinct branch. Algebra deals with certain letters of the alphabet, such as *x*, *y*, *z*, *a*, *b*, *c*, &c., standing as symbols for numbers; arithmetic operates on numbers themselves, as 1, 2, 3, 4, &c. Viewed as a science, arithmetic is a branch of mathematics; looked on as an art, its object is to carry out for practical purposes certain rules regarding numbers, without troubling itself to investigate the foundation on which those rules are based.

It is variously divided, as into *Integral* and *Fractional Arithmetic*, the former treating of integers, and the latter of fractions. Integral arithmetic is sometimes called *Vulgar* or *Common Arithmetic*; and from fractional arithmetic is sometimes separated *Decimal Arithmetic*, treating, as the name implies, of decimals. There are also *Logarithmic Arithmetic* for computation by logarithms, and *Instrumental Arithmetic* for calculation by means of instruments or machines. Another division is into *Theoretical Arithmetic*, treating of the science of numbers, and *Practical Arithmetic*, which points out the best method of practically working questions or sums. *Political Arithmetic* is arithmetic applied to political economy, as is done in the statistical returns so continually presented to Parliament. Finally, *Universal Arithmetic* is a name sometimes applied to Algebra. The chief subjects generally treated under the science or art of Arithmetic are (1) Numeration and Notation; (2) Addition; (3) Subtraction; (4) Multiplication; (5) Division; (6) Reduction; (7) Compound Addition; (8) Compound Subtraction; (9) Compound Multiplication; (10) Compound Division; (11) Simple Proportion (Rule of Three); (12) Compound Proportion; (13) Vulgar Fractions; (14) Decimal Fractions; (15) Duodecimals; (16) Involution; (17) Evolution; (18) Ratios, Proportions, and Progressions; (19) Fellowship or Partnership; (20) Simple Interest; (21) Compound Interest, and (22) Position. (*Hutton*, &c.) Of these, the most important are the simple processes of Addition, Subtraction, Multiplication and Division, the judicious use of which, singly or in combination, will solve the most complex arithmetical questions.

"At the same time one of the founders of the Society, Sir William Petty, created the science of political arithmetic, the humble but indispensable handmaid of political philosophy."—*Macaulay: Hist. Eng.*, ch. iii.

Arithmetic of Infinities: The summing up of an infinite series of numbers.

ār'-īth-mēt'-īc-āl, *a.* [Eng. *arithmetical*; -al.] Pertaining to arithmetic.

"... should his comprehension of *arithmetical* principles be unquestionable."—*Herbert Spencer: Psychol.*, 2d ed., vol. ii., § 388, p. 312.

arithmetical complement. That which a number wants to make it reach the next highest decimal denomination. Thus the arithmetical complement of 4 is 6, for 4+6 are=10, and that of 642 is 358, because 642+358 are=1,000. The *arithmetical complement of a logarithm* is what it wants to make it reach 10.

arithmetical mean.

1. The number, whether it be an integer or a fraction, which is exactly intermediate between two others. Thus, 5 is the arithmetical mean between 2 and 8; for 2+8 are=10, and 5+3 are=8. To find such a mean, add the two numbers together, and divide their sum by 2; thus 2+8=10, and 10÷2=5.

2. *More loosely:* Any one of several numbers in an arithmetical ratio (q. v.) interposed between two other numbers. Thus, if 6, 9, and 12 be interposed between 3 and 15, any one of them may be called an arithmetical mean between these two numbers.

arithmetical progression. A series of numbers increasing or diminishing uniformly by the same number. If they increase, the arithmetical progression is said to be *ascending*, and if they decrease, *descending*. Thus the series 3, 6, 9, 12, 15 is an ascending arithmetical progression, mounting up by the continued addition of 3; and the series 8, 6, 4, 2, is a descending one, falling regularly by 2. [PROGRESSION.]

bōil, bōy; pōūt, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, ðhis; sin, aș; expect, Xēnophon, exist. ph = f. -cian, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

arithmetical proportion. The relation existing between four numbers, of which the first is as much greater or less than the second as the third is of the fourth; the equality of two differences or arithmetical ratios. In such cases the sum of the extremes is=that of the means. [PROPORTION.]

arithmetical proportionals. The numbers so related to each other. (The term is opposed to geometric proportionals.) [PROPORTIONAL.]

arithmetical relation. The comparison of numbers in an arithmetical progression with the view of ascertaining how much they differ from each other.

arithmetical ratio. The difference between any two numbers constituting part of a series in arithmetical progression.

ār-ith-mēt'-i-cal-ly, *adv.* [Eng. *arithmetical*; -ly.] In an arithmetical manner; after the principles of arithmetic.

"Though the fifth part of a xestes, being a simple fraction, and arithmetically regular, it is yet no proper part of that measure."—*Arbutnot: On Coins.*

ār-ith-mē-ti'-cian, *s.* [Eng. *arithmetician*; -ian.] In Fr. *arithmétique*. One skilled in arithmetic; a proficient in arithmetic.

"Gregory King, Lancaster herald, a political arithmetician of great acuteness and judgment."—*Macaulay: Hist. Eng.*, ch. iii.

ār-ith-mōc'-ra-čy, *s.* [Gr. *arithmos*=number, and *krateō*=to rule.] The rule of mere numbers. (*C. Kingsley: Alton Locke*, pref.)

ā-rith-mō-crāt'-ic, *a.* [ARITHMOCRACY.] Pertaining to an arithmocracy (q. v.). (*C. Kingsley: Alton Locke*, pref.)

ār-ith-mōm'-ē-tēr, *s.* [From Gr. *arithmos*=a number, and *metron*=a measure.] A machine which enables a person, however unskilled, to perform the operations of multiplication and division with facility, rapidity, and unfailing accuracy. The arithmometer of M. Thomas (De Colmar), highly commended by General Hannington (*Journal of Actuaries*, vol. xvi., p. 244) and by Mr. Peter Gray, F. R. A. S., and others, does more, for, in forming the product of two given numbers, it can either add that product to, or subtract it from, another given number, according to the pleasure of the operator. The machine is provided on its face with spaces for the reception of three numbers, say P, Q, and R. These being properly placed, the turning of a handle brings out the value of P+Q R or P-Q R, according as the regulator was adjusted for addition or subtraction. (See *The Arithmometer*, by Peter Gray, F. R. A. S., F. R. M. S., 1874.)

***ā-rī'the**, *v. t.* [ARREE.]

Ār-i-zō'-na, *s.* [Probably from Aztec *arizuma*=rocky country.] A Territory of the U. S. A., bounded W. by Nevada and California, N. by Utah, E. by New Mexico and S. by Texas. Area, 113,020 square miles. Set off from New Mexico and made a Territory in 1863. The Territory is rich in minerals, and the central and southeastern portions have many very fertile and productive valleys. Principal cities, Tucson, Phoenix, the capital, Tombstone, Yuma, and Prescott.

ark, ***arke**, ***arcke**, *s.* [A. S. *arc*, *erc*, *earc*; Sw., Dan., and Dut. *ark*; Ger. and Fr. *arche*; Goth. *arka*; Gael. *airc*; Prov. *archa*; Irish *airg*, *airk*; Sp., Port., Ital., and Lat. *arca*. From the same root as Lat. *arceo*=to inclose.]

I. A chest, a box, a coffer with a lid. *Specially*—

1. The ark used in Jewish worship, called the Ark of the Covenant (Num. x. 33, &c.), the Ark of the Testimony (Exod. xxx. 6), the Ark of God (2 Sam. vii. 2), the Ark of His (God's) Testament (Rev. xi. 19), the Ark of Thy (God's) Strength (Ps. cxxxii. 8), and the Ark of the Lord (1 Kings ii. 26). It was an oblong chest of acacia-wood, overlaid with gold inside and out. On its top was the mercy-seat, and inside it at first were the two tables of stone, the pot of manna, and Aaron's rod which budded (1 Kings viii. 9, and Heb. ix. 4). At each of the four corners was a ring into which staves or poles might be fitted to carry it when it required to be moved.

2. A large chest for holding meal. (*Scotch.*)

"... when we have sent awa the hail mill in the ark" when the giral."—*Scott: Old Mortality*, ch. xx.

Jewish Ark. (From Calmet.)

II. A chest-like vessel or ship. *Specially*—

1. *Literally*:

(a) Noah's ark, a chest-like vessel about the dimensions of the "Great Eastern" steamship.

"Make thee an ark of gopher-wood."—*Gen. vi. 14.*

(b) The ark made of bulrushes, rendered watertight by a coating of bitumen, in which Moses when an infant was committed to the Nile.

"... he took for him an ark of bulrushes, . . ."—*Exod. ii. 3.*

(c) *In the United States*: A large boat used on the American rivers to transport produce from place to place.

2. *Fig.*: Life.

"'But thou,' said I, 'hast miss'd thy mark,

Who sought'st to wreck my mortal ark.'"

Tennyson: The Two Voices.

ark, *v. t.* [From the substantive.] To inclose within an ark. [ARKED.]

Ar'-kan-sās (s silent), *s.* [Named from a tribe of Am. Indians.] One of the States of the U. S. A., bounded W. by the Indian Territory and Texas, N. by Missouri, E. by the Mississippi river (which separates it from the States of Tennessee and Mississippi) and S. by Texas and Louisiana. Area, 53,850 square miles. Soil fertile; cotton, corn, oats, etc., produced in abundance. Extensive lumber industries and mineral resources. Arkansas Industrial University was organized at Fayetteville, in 1871, and a good school system prevails. Principal cities, Little Rock, the metropolis and capital, Fort Smith, Pine Bluff, and Hot Springs.

Arkansas toothpick. Slang name for bowie-knife.

ark'-an-sīte, *s.* [From Arkansas, where it is found.] A mineral, a variety of Brookite (q. v.). It occurs in thick black crystals.

"The arke of his artificial day hath i-ronne

The fourthe part, of half an hour and more."

Chaucer: C. T., 4,422-3.

ark'-ēd, *pa. par. & a.* [ARK, v.]

"When arked Noah and seuen with him."

Warner: Albion's Eng., bk. i., ch. i.

ark'-ite, *s. & a.* [Eng. *ark*; -ite.]

A. *As substantive*: An inmate of the ark. (*Bryant.*)

B. *As adjective*: Pertaining or relating to Noah's ark. (*Bryant.*)

ark'-sū-tīte, **ark'-sū-dīte**, *s.* [From Arksut Fiord, in South Greenland.] A mineral classed by Dana in his Cryolite group of Fluorine Compounds. It is a white, translucent, and brittle species, with vitreous luster, except on cleavage faces, where it is pearly. Its composition is: fluorine, 51.03; alumina, 17.87; lime, 7.01; soda, 23.00; and water, 0.57, with .74 of insoluble matter.

ark'-ys, *s.* [Gr. *arkys*=a net.] A genus of spiders. The *A. lancier* is yellow with red at the sides. It is a native of South America.

†arle, ***äirle** (pl. *ärles*, *äirles*), *s.* [A. N. *earles*, *yearles* (pl.).] (Generally in the plural.) Earnest-money; money given to a person hired as a servant as an earnest that in due time the wages for which he has stipulated will be paid.

"As for Morton, he exhausted his own very slender stock of money in order to make Cuddie such a present, under the name of *arles*, as might show his sense of the value of the recommendation delivered to him."—*Scott: Old Mortality*, ch. viii.

arle-penny (sing.), **arles-penny** (pl.), *s.* A penny given for such a purpose.

***arled**, *a.* [A. S. *orl*=a welt, the border of a garment, a robe.] Ring-streaked.

"Sep or got, haswed, arled, or grei."

Story of Genesis and Exodus (ed. Morris), 1,723.

arm (1), ***arme**, *s.* [A. S. *arm*, *earm*; Sw., Dan., Dut., Mod. Ger., O. L. Ger., and O. H. Ger. *arm*; O. Fris. *erm*; O. Icel. *armr*; Goth. *arms*; Arm. *armm*; Lat. *armus*=an arm; Gr. *harmos*=a fitting, a joint; *arō*=to join, to fit together; Lat. and Gr. root *ar*=to join, to fit.]

A. *Ordinary Language*:

I. *Lit.*: The portion of the human body on either side, extending from the shoulder to the hand; the corresponding part also in a quadrumanous animal, a monkey for example. More rarely, one of the fore legs in a digitated quadruped of any kind.

"Then let my arm fall from my shoulder-blade, . . ."—*Job xxxi. 22.*

"The hair of the orang-outang is of a brownish-red color, and covers his back, arms, legs, and outside of his hands and feet."—*Griffith's Cuvier*, i. 239.

"... the arms and paws [of a squirrel, *Sciurus bicolor*] are bordered with a beautiful series of hairs."—*Ibid.*, iii. 182.

II. *Figuratively*:

1. *Of material things*: Anything which stands out from that of which it constitutes a part, as an outstretched arm does from the human body. *Specially*—

(a) A branch of a tree, especially when it is tolerably horizontal.

"A broad oak, stretching forth its leafy arms."

Wordsworth: Excursion, bk. v.

(b) The projecting supports for the human arms on the two sides of some chairs, hence called *arm-chairs*. [ARM-CHAIR.]

(c) [See B. 2, *Naut.*]

(d) A narrow inlet running from the ocean some distance inland. The White Sea, the Baltic, and the Adriatic Sea may be considered arms of the sea.

"... good reasons can be assigned for believing that this valley was formerly occupied by an arm of the sea."—*Darwin: Voyage around the World*, ch. ix.

2. *Of things not material*:

(a) Power, physical, mental, moral, or spiritual; support of any kind.

"Behold, the days come, that I will cut off thine arm, and the arm of thy father's house, that there shall not be an old man in thine house."—*1 Sam. ii. 31.*

(b) Used as a symbol of Divine power.

"Awake, awake! Put on thy strength, O arm of the Lord."—*Isaiah li. 9.*

(c) Trust, dependence.

"Cursed be the man that trusteth in man, and maketh flesh his arm, and whose heart departeth from the Lord."—*Ser. xvii. 5.*

B. *Technically*:

1. *Her.* The human arm is often found constituting part of a crest. [CUBIT-ARM.]

2. *Naut.* The word *arm* is used for the extremity of a yard. (Generally called the *yard-arm*.)

arm-and-arm, *adv. & a.* The same as ARM-IN-ARM (q. v.).

"Go, fool; and, arm-and-arm with Clodio, plead

Your cause before a bar you little dread."

Cowper: Progress of Error.

arm-bone, *s.* The bone of the arm (the humerus).

"The bone of the arm (humerus) is of remarkable length."—*Owen: Classific. of the Mammalia*, p. 66.

"... an extensive fracture, badly united, of the left arm-bone."—*Ibid.*, p. 90.

arm-chair, *s.* A chair with arms. It is written also *armed-chair*.

"Her father left his good arm-chair,

And rode his hunter down."

Tennyson: The Talking Oak.

arm-ful, *a.* [ARMFUL.]

***arm-gret**, *a.* As great or as thick as the arm.

"A wrethe of gold arm-gret, and huge of wight,

Upon his heed, set ful of stoones bright."

Chaucer: C. T., 2,147-8.

arm-hole, *s.* The armpit.

"Tickling is most in the soles of the feet, and under the armholes, and on the sides. The cause is the thinness of the skin in those parts, joined with the rareness of being touched there."—*Bacon: Nat. Hist.*

¶ In Ezek. xiii. 18, the word rendered "armhole" should probably be translated "fore arm, cubit," though some make it the wrist.

arm-in-arm, *adv. & a.* With one's arm interlocked with that of another; arm-and-arm.

"When arm-in-arm we went along."

Tennyson: The Miller's Daughter.

arm's-end, *s.* A metaphor derived from boxing, in which the weaker man may overcome the stronger, if he can keep him from closing. (*Lit. & fig.*)

"For my sake be comfortable; hold death awhile at the arm's-end."—*Shakesp.: As You Like It*, ii. 6.

arm-shaped, *a.* Shaped like the arm.

arm's-length, *s.* A phrase derived from boxing [ARM'S-END], and signifying to keep a person at a distance, not to permit him to attempt familiarity.

"She ceased, and Paris held the costly fruit

Out at arm's-length . . ."—*Tennyson: Ænone.*

arm's-reach, *s.* The reach of the arm.

arm-strong, *a.* Powerful in the arms. (*Greene: Menaphon*, p. 56.)

arm (2), *s.* [ARMS.] A weapon of war.

¶ Generally in the plural, ARMS (q. v.).

arm (1), *v. t.* [From the substantive *arm* (1).]

1. To offer the arm to; to take by the arm; to take up in the arms.

"Make him with our pikes and partisans

A grave: come, arm him."

Shakesp.: Cymbeline, iv. 2.

†2. To furnish with bodily arms.

"Her shoulders broad and long,

Armed long and round."

Baumont & Fletcher.

arm (2), *v. t. & i.* [From Eng. *arm* (2). In Fr. *armer*; Sp. & Port. *armar*; Ital. *armare*; Lat. *armo*=to furnish with implements, and *spec.*, with warlike weapons; from *arma*=arms.]

A. Transitive:

1. Ordinary Language:

1. *Lit.*: To equip with weapons, defensive or offensive.

"And Saul armed David with his armor, and he put an helmet of brass upon his head; also he armed him with a coat of mail."—1 Sam. xvii. 38.

2. Figuratively:

(a) *Of material things*: To add to anything what will give it greater strength or efficiency.

(b) *Of things immaterial*: To impart to the mind or heart anything that will make it more fitted for offense or defense; to provide against.

"... arm yourselves likewise with the same mind."—1 Pet. iv. i.

II. Technically:

Magnetism. To arm a magnet is to connect its poles by means of a soft iron bar. [ARMATURE.]

B. Intransitive: To equip with weapons of war. (Used of individuals or of communities.)

"... and thus aloud exclaims:

Arm, arm, Patroclus! ..."

Pope: *Homer's Iliad*, bk. xvi., 155-156.

Arm and away: The order for the small boats of a warship to prepare for service.

***arm, *arme, *ar'-eme, a.** [Sw., O. Icel., and Mod. Ger. *arm*=poor.] (*Moral Ode*, ed. Morris, 223.)

ar-mā'-dā, *ar-mā'-dō, s. [Sp. *armada*=a war fleet as contradistinguished from *flota*=a fleet of merchant vessels; Lat. *arma*=arms. From Spanish, *armada* has passed into German, French, &c., and is=Ital. *armata*=a navy, a fleet.]

(1) *Spec.*: The celebrated fleet, called at first, by anticipation, "The 'Invincible' Spanish Armada," which was sent in 1588 to assail England, but which, utterly failing in its object, and coming to a tragic and inglorious end, was latterly known simply as the "Spanish Armada," the word "invincible" being dropped.

"They melt into thy yeast of waves, which mar
Like the Armada's pride or spoils of Trafalgar."
Byron: *Childe Harold*, iv. 181.

Hence (2) *Gen.*: Any war fleet.

"So by a roaring tempest on the flood
A whole armada of convicted sail
Is scatter'd and disjoint'd from fellowship."

Shaksp.: *King John*, iii. 4.

"... We will not leave,
For them that triumph, those who grieve,
With that armada gay."

Scott: *Lord of the Isles*, i. 17.

ar-mā-dil'-lā, s. [In Fr. *armadille*; from Sp. *armadilla*, dimin. of *armada*.] A small armada.

ar-mā-dil'-lō (plural -lōs and -lōes) *s.* [In Ger. *armadill* and *armadilthier*. From Sp. *armadillo*.]

1. The Spanish American name, now imported into English, of various Mammalia belonging to the order Edentata, the family Dasypodidae, and its typical genus *Dasypus*. [DASYPUS.] The name

Armadillo.

armadillo, implying that they are in armor, is applied to these animals because the upper part of their body is covered with large strong scales or plates, forming a helmet for their head, a buckler for their shoulders, transverse bands for their back, and in some species a series of rings for the protection of their tail. Another peculiarity is the great number of their molar teeth; these amount in one species to more than ninety. There are five toes on the hinder feet, and four or five, according to the species, on the anterior ones. The fore feet are admirably adapted for digging, and the animal, when it sees danger, can extemporize a hole and vanish into it with wonderful rapidity. If actually captured, it rolls itself into a ball, withdrawing its head and feet under its strong armor. There are several species—such as the Great Armadillo, or Tatu (*Dasypus gigas*), the Three-banded Armadillo, or Apará (*D. apar*), the Six-banded Armadillo

(*D. sexcinctus*), and the Hairy Armadillo (*D. villosus*). They feed chiefly on ants and other insects and worms, and are peculiar to South America, where a giant-animal of similar organization, the Glyptodon, lived in Tertiary times.

"It is generally understood that the Armadillos bring forth but once a year."—Griffith's *Cuvier*, iii. 286.

2. A genus of Crustaceans belonging to the order Isopoda, and the family Oniscidae, the type of which is the well-known wood-louse. It is so called partly from its being covered with a certain feeble kind of armor; but chiefly from its rolling itself up into a ball after the fashion of the South American mammalian Armadillos.

armadillo-like, a. Like an armadillo, covered with natural armor.

"In the Pampæan deposit at the Bajada I found the osseous armor of a gigantic armadillo-like animal."—Darwin: *Voyage round the World*, ch. vii.

***ar-mā'-dō, s.** [ARMADA.]

ar-mā-mēnt, s. [In Fr. *armement*; Sp., Port., & Ital. *armamento*; Lat. *armamentum*=the outfitting of a ship, the supplying it with everything excepting only its hull: *armo*=to furnish with implements; *arma*=implements, . . . the tackle of a ship.]

I. The act of arming a fleet or army; the state of being armed.

II. That which constitutes the equipment or which is itself equipped.

1. That which constitutes the equipment. (Often in the pl., *armaments*, signifying everything needful to render the naval and military forces of a country efficient.) *Spec.*, weapons and ammunition.

"... and the increase [of expenditure] is for the most part due to more costly armaments."—Times, Nov. 11, 1876.

2. The forces equipped for war.

(a) A naval expedition fitted out for war; a fleet, with the men, guns, ammunition, and stores on board.

"English sailors, with more reason, predicted that the first gale would send the whole of this fair-weather armament to the bottom of the Channel."—Macaulay: *Hist. Eng.*, ch. xvi.

(b) Land forces fully equipped; an army encamped for war (*Lit. & fig.*). (Byron: *Siege of Corinth*, xx.)

ar-mā-mēn'-tā-rŷ, s. [Lat. *armamentarium*.] An armory, an arsenal. (Johnson.)

ar'-man, s. A confection for restoring appetite in horses. (Johnson.)

***ar'-mā-rŷ, s.** [Lat. *armarium*=a chest, a coffin.] [ALMERY.] A chronicle or archive. (Wy-cliffe: 1 Esdras ii. 15.)

ar'-mā-tŭre, s. [In Ger. *armatur*; Fr. *armateur* and *armature*; Sp. *armadura*; Ital. & Lat. *armatura*=(1) armor, (2) armed soldiers, (3) a kind of military exercise.]

A. Ordinary Language:

1. Armor worn for the defense of the body, or, more frequently, the armor in which some animals are enveloped for their protection against their natural foes.

"Others should be armed with hard shells, others with prickles; the rest, that have no such armature, should be endowed with great swiftness and perniciousity."—Ray: *Creation*.

*2. Offensive weapons.

"The double armature is a more destructive engine than the tumultuary weapon."—Dr. H. More: *Decay of Piety*.

B. Technically:

1. **Magnetism:** The armatures, called also the keepers, of a magnetic bar are pieces of soft iron placed in contact with its poles. These, by being acted on inductively, become magnets, and,

Armatures.

re-acting in their turn, not merely preserve, but even increase, the magnetism of the original bar. (Atkinson: *Ganot's Physics*, § 624.) Magnets thus provided are said to be armed.

Sometimes an armature is made of steel and is permanently magnetized. Such an armature is termed a polarized armature, and is used in various appliances, magneto generators, telegraphic instruments, &c.

In dynamic electricity, the armature is the shaft or central revolving arm of an electric generator, by the movement of which the current is generated.

2. Electricity:

(a) *The internal and external armatures, or coatings of a Leyden jar*, and the coatings of tinfoil on its interior, and part of its exterior, surface. (Atkinson: *Ganot's Physics*, § 668.)

(b) *Siemens' armature or bobbin*: An armature designed for magneto-electrical machines, in which the insulated wire is wound longitudinally on the core, instead of transversely, as is the ordinary arrangement. (*Ibid.*, § 782.)

3. *Arch.*: Iron bars employed for the consolidation of a building. (*Gloss. of Arch.*)

armed, a. [From *arm, s.*] Furnished with arms in a literal or figurative sense. Specially in the phrase "an armed chair"=an arm-chair (q. v.).

armed, pa. par. & a. [ARM, *v. t.*]

A. Ordinary Language:

I. Literally:

1. Equipped with weapons offensive or defensive, or both. [B., 1, Mil.]

"So the armed men left the captives and the spoil . . ."—2 Chron. xxviii. 14.

2. Having its natural efficiency increased by mechanical appliances.

"But they continually grow larger, and pass by insensible gradations into the state of cloud, when they can no longer elude the armed eye."—Tyndall: *Frag. of Science*, 3d ed., vii. 150.

II. *Fig.*: Strengthened in mind and heart against danger.

B. Technically:

I. Military and Naval:

1. *Of men.* An armed body of men is a military detachment provided with arms and ammunition, ready for an engagement. [A., 1.] (James: *Mil. Dict.*)

2. *Of ships:*

(a) *Armed in flute*, that is, armed after the manner of a transport, part of her guns having been removed to make more room.

(b) An armed ship is one taken into the Government service, and equipped in time of war with artillery, ammunition, &c. (James.)

3. *Of shot.* A crossbar shot is said to be armed when some rope-yarn is rolled around the end of the iron bar running through the shot.

4. *Of procedure.* Armed neutrality. [NEUTRALITY.]

II. Heraldry:

1. Furnished with arms.

¶ A man armed at all points (see the annexed figure) is a man covered with armor on every portion of him excepting only his face.

2. Adding to anything that which will give it greater strength or efficiency.

¶ The term armed, followed by *Armed at all points.* of, is applied to a beast of prey when his teeth and claws, or to a predatory bird when his talons and beak, are differently colored from the rest of his body.

III. Biology. Used—

1. (Zool.) *Of the natural armature of various parts of the body of man or of the inferior animals:* Furnished with teeth, tusks, nails, claws, &c.

"... the most formidably armed jaws."—Owen: *Classif. of Mammalia*, p. 76.

2. *Botany:* Of thorns, prickles, &c., on plants.

IV. **Magnetism.** An armed magnet: One provided with an armature (q. v.).

***ar'-mēe, s.** [ARMY.]

Ar-mē-ni-an, a. & s. [Eng. *Armenian*(a); -an. In Fr. *Arménien*; from Lat. *Armenia*; Gr. *Armenia*. Armenia, in 2 Kings xix. 37, is in the original *Ararat*, and should have been so rendered.]

A. As adjective: Pertaining to Armenia, a country situated on the mountainous region between the Black and the Caspian seas, between latitudes 37° and 42° N., and longitudes 39° to 50° E.

B. As substantive:

1. A native of Armenia.

Tartary, &c. The *Living* comes from the *Old* or *Dead* Armenian, ranked by Max Müller under the Iranic Branch of the Southern Division of the Aryan Languages.

Armenian bole. A kind of bole from Armenia. [BOLE.]

Armenian stone. A blue carbonate of copper brought from Armenia.

Armenian whetstone. Dana's rendering of the Greek term *akonē ex Armenias*, the name given by Theophrastus to emery (q. v.).

***ar-mēn'-tal, a.** [Lat. *armentalis*; from *armentum*=cattle for plowing or for draft.] Pertaining or relating to a herd of cattle. (Bailey.)

ar-mēn'-tine, a. [Lat. *armentum* (ARMENTAL), and Eng. suffix *-ine*.] The same as ARMENTAL (q. v.). (Bailey.)

***ar-mēn'-tōse, adj.** [Lat. *armentosus*.] Abounding with cattle. (Bailey.)

ar-mēr'-i-a, s. [From the term *Flos Armeria*, applied by the botanists of the Middle Ages to some of the Sweet William Pinks. *Flos Armeria* again is, according to Clusius, the French word *armoiries* (armorial bearings), Latinized. (Hooker and Arnott.)] A genus of plants belonging to the order Plumbaginaceæ (Leadworts).

ar-mēt, s. [French=armor for the head.] A helmet used in the thirteenth, fourteenth, and fifteenth centuries. It is represented in the annexed illustration.

armet-grand, s. [Fr. *grand*=great.] An armet worn with a beaver.

armet-petit, s. [Fr. *petit*=little.] An armet worn without a beaver. It had a guard for the face, consisting of three bars.

arm'-fūl, *arm'-fūll, a. [Eng. *arm*; *full*. In Ger. *arm-voll*.] As much of anything as an arm can hold.

"He comes so lazily on in a simile, with his 'armfull of weeds,' . . ."—Milton: *Apol. for Smectymnus*.

"As an especial favor, he allowed me to purchase, at a high price, an *armful* of dirty straw."—Darwin: *Voyage round the World*, ch. xvi.

***arm'-gāunt, a.** [Eng. *arm*; *gaunt*.] As *gaunt*—i. e., as slender—as the arm; no thicker than the arm.

"So he nodded,
And soberly did mount an *armgaunt* steed."

Shakesp.: *Antony and Cleopatra*, i. 5.

†ar-mif'-ēr-ōus, a. [Lat. *armifer*=weapon-bearing; *arma*=arms, and *fero*=to bear.] Bearing arms. (Ogilvie.)

ar'-mī-gēr, s. [Lat. *armiger*, in inscriptions *armigerus*; from *arma*=arms, and *gero*=to wear, to bear about with one.] An esquire, properly one who attended on a knight, to bear his shield and otherwise render him service. [ESQUIRE.]

"Slender. Ay, and *ratolorum* too; and a gentleman born, master parson: who writes himself *armigero*: in any bill, warrant, quittance, or obligation, *armigero*."—Shakesp.: *Merry Wives of Windsor*, i. 1.

ar-mīg'-ēr-ōus, a. [In Sp., Port., & Ital. *armigero*=martial (see ARMIGER), "bearing arms." Pertaining or relating to an esquire or person who attended on a knight. [ESQUIRE.]

"They belonged to the *armigerous* part of the population."—De Quincey. (Goodrich & Porter.)

ar'-mīl, s. [Lat. *armilla*=a bracelet.] [ARMILLA.]

Mech. & Astron.: An ancient astronomical instrument. It was of two forms: an *Equinoctial Armil*, constructed with a single ring placed in the plane of the equator, for determining the line of the equinoxes; and a *Solstitial Armil*, in which there were two or more rings, one of them in the plane of the meridian, for ascertaining the solstices. (Whewell.)

ar-mī-lāu'-şa, s. [Lat., according to Isidore, contract. from *armiclaus*=a military cloak.] A cloak covering the shoulders.

ar-mīl'-la, s. [Sp., Port., Ital., & Lat.=(1) an arm-ring, a bracelet, (2) a hoop or ring; from *armus*=arm.]

1. A bracelet.
2. **Mech.:** An iron ring, hoop, or brace, in which the gudgeons of a wheel move.
3. **Anat.:** The round ligament which confines the tendons of the carpus.

†ar-mīl'-la-rŷ, a. [In Fr. *armillaire*; Sp. *armilar*; Port. *armillar*; Ital. *armillare*; Low Lat. *armillarius*; from Class. Lat. *armilla*=an armlet, an arm-ring, a bracelet.] Resembling a bracelet in form; circular. (Rarely used, except in Astronomy.)

"He [Hipparchus] is also said to have erected *armillary circles* at Alexandria."—Penny Cycl., ii. 525.

armillary sphere.

Mech. & Astron.: A sphere not solid like a modern celestial globe, but consisting of several metallic or other circles mechanically fixed in such relative positions that one represented the celestial equator, a second the ecliptic, and two more the colures. It was capable of revolving on its axis within a movable horizon. Astronomers used the armillary sphere for purposes of instruction not merely in ancient times, but on to the age of Tycho Brahe, in the sixteenth century. Now, however, it has fallen into disuse, having been superseded by the celestial globe. [ASTROLABE, CELESTIAL.]

"When the circles of the mundane sphere are supposed to be described on the convex surface of a sphere, which is hollow within, and, after this, you imagine all parts of the sphere's surface to be cut away, except those parts on which such circles are described; then that sphere is called an *armillary sphere*, because it appears in the form of several circular rings, or bracelets, put together in a due position."—Harris: *Description of the Globes*.

ar-mīl'-lā-tēd, a. [Lat. *armillatus*.] Wearing bracelets.

***ar'-mīlle, *ar'-mŷlle, s.** [Lat. *armilla* (q. v.).] A bracelet.

***ar'-mīn, s.** [Dut. *arm*=poor.] A beggar.

"O hear God! so young an *armin*!
M. Flow. *Armin*, sweet heart, I know not what you mean
By that, but I am almost a beggar."

London Prod., Supp. Sh., ii. 519. (Nares.)

***ar'-mīned, a.** [ERMINED.]

arm'-īng, pr. par., a. & s. [ARM, v. t.]

A. & B. As pr. par. and participial adj.: In senses corresponding to those of the verb.

C. As substantive:

I. Ordinary Language:

1. The act of equipping one's self with weapons, or the state of being so equipped.

(a) **Lit.:**

"For the *arming* was now universal."—Macaulay: *Hist. Eng.*, ch. xii.

(b) **Fig.:** Confirmation of a suspicion, or of a truth previously but half believed.

"2 Lord. Hath the count all this intelligence?"

1 Lord. Ay, and the particular confirmations, point from point, to the full *arming* of the verity."—Shakesp.: *All's Well that Ends Well*, iv. 3.

2. That which constitutes the equipment.

II. Technically (Nautical):

1. **Plur.:** Waist-cloths; cloths hung about the outside of the ship's upper-works fore and aft, and before the cubbrige heads. Some are also hung round the tops, called *top armings*.

2. **Sing. (in soundings at sea):** A preparation of tallow, placed in the concavity at the bottom of the lead used for soundings, and designed to ascertain the character of the ocean bed at the place.

"The soundings from which this section is laid down were taken with great care by Capt. Fitzroy himself: he used a bell-shaped lead, having a diameter of four inches, and the *armings* each time were cut off and brought on board for me to examine. The *arming* is a preparation of tallow, placed in the concavity at the bottom of the lead. Sand, and even small fragments of rock, will adhere to it; and if the bottom be of rock, it brings up an exact impression of its surface."—Darwin: *On Coral Reefs* (1842), ch. i., p. 7.

D. In composition: Applied to various things used in, and for the purpose of, arming.

arming-buckle, s.

Her.: A lozenge-shaped buckle. (Gloss. of *Heraldry*.)

arming-doublet, s. A surcoat.

"*Arming-doublets* of carnation satten."—Masque of the Inner Temple (1612). (Halliwell: *Contr. to Leicic*.)

arming-points, s. pl. The fastenings keeping the several pieces of armor from separating.

arming-press, s. A press used in bookbinding. [BLOCKING PRESS.]

Ar-mīn'-ī-an, a. & s. [Lat., &c., *Armini(us)*; Eng. suffix *-an*. In Ger. *Arminianer*, s.] Pertaining to Arminius, the Latinized form of the surname of James Harmensen, a noted Dutch theologian. [B.]

A. As adjective: Pertaining to Arminius or to his tenets.

"The *Arminian* doctrine, a doctrine less austere logically than that of the early Reformers, but more agreeable to the popular notions of the divine justice and benevolence, spread fast and wide."—Macaulay: *Hist. Eng.*, ch. i.

B. As substantive:

Church Hist.: A follower of Arminius, or in other words, of James Harmensen (see etym.), first a Dutch minister in Amsterdam, and afterward Professor of Theology in Leyden University. The views of himself and his followers were summed up

in five points, which may be briefly stated thus: 1. That God from all eternity predestinated to eternal life those who He foresaw would have permanent faith in Christ. 2. That Christ died for all mankind, and not simply for the elect. 3. That man requires regeneration by the Holy Spirit. 4. That man may resist Divine grace. 5. That man may fall from Divine grace. This last tenet was at first held but doubtfully; ultimately, however, it was firmly accepted. Arminius died in the year 1609. In 1618 and 1619 the Synod of Dort condemned the Arminian doctrines, the civil power, as was the general practice of the age, enforcing the decrees of the council by pains and penalties. [REMONSTRANTS.] Nevertheless the new views spread rapidly. Archbishop Laud introduced them into the Church of England; the Wesleyans also are essentially Arminians; while the remainder of the English Non-conformists and the Presbyterians are mostly Calvinists.

Ar-mīn'-ī-an-īsm, s. [Eng. *Arminian*; *-ism*. In Ger. *Arminianism*.] The distinctive religious tenets held by the Arminians.

"Laud, Neil, Montagu, and other bishops were all supposed to be tainted with *Arminianism*."—Hume: *Hist. Eng.*

ar-mīp'-ō-tēnt, a. & s. [Sp., Port., & Ital. *armipotente*; Lat. *armipotens*: *arma*=arms, and *potens*=powerful, *possum*=I am able.]

A. As adjective:

1. **Of men:** Powerful or mighty in arms; mighty in war.

"2 Lord. This is your devoted friend, sir, the manifold linguist, and the *armipotent* soldier."—Shakesp.: *All's Well that Ends Well*, iv. 3.

2. **Of God:** Armipotent in arms; specially, as having under His absolute command the angelic hosts.

"For if our God, the Lord *armipotent*,
Those armed angels in our aid down send,
That were at Dathan to his prophet sent,
Thou wilt come down with them."—Fairfax.

B. As substantive: Either an imaginary divinity or the True God.

"But if th' *Armipotent*, or god of light,
Obstruct Achilles, or commence the fight."
Pope: *Homer's Iliad*, xx. 166-7.

ar-mīs'-ō-nant, a. [Lat. *arma*=arms, and *sonans*, pr. par. of *sono*=to sound.] Having sounding arms, or rustling armor. (Ash.)

ar-mīs'-ō-noūs, a. [Lat. *armisonus*: *arma*=arms, and *sono*=to sound.] Having sounding arms or rustling armor. (Bailey.)

ar'-mīs-tīce, s. [Fr. *armistice*; Sp. & Port. *armisticio*; Ital. *armistizio*; from Lat. *arma*=arms, and *sisto*=to cause to stand.] A short cessation of arms for a certain stipulated time during a war; a truce, designed for negotiation or other ends.

"Lastly, he required some guarantee that the king would not take advantage of the *armistice* for the purpose of introducing a French force into England."—Macaulay: *Hist. Eng.*, ch. ix.

"Now that an *armistice* has been accepted, and a conference is about to assemble to elaborate, if possible, terms of peace . . ."—Times, November 11, 1876.

arm'-lēss, *arm'-lēś, a. [Eng. *arm*, and suff. *-less*=without. In Ger. *armlos*.] Without arms.

"And saugh an hond *armles*, that wroot fast."
Chaucer: *C. T.*, 15, 689.

arm'-lēt, s. [Eng. *arm*; suffix *-let*, used as a diminutive.]

1. A small arm.

2. A bracelet worn on the upper arm as contradistinguished from one of the ordinary type encircling the wrist. Armlets are of two kinds.

(a) Those worn by men in Eastern Europe as one of the insignia of royal power. Kitto thinks that the Hebrew *etsadah*, or so-called "bracelet," which the Amalekite said he took from the arm of the slain Saul, was an armlet of this symbolic character. "So I stood upon him and slew him, because I was sure that he could not live after that he was fallen, and I took the crown that was upon his head, and the bracelet that was upon his arm." (2 Sam. i. 10.) The same Hebrew word, again rendered "bracelet," occurs in Numb. xxxi. 50, "We have, therefore, brought an oblation for the Lord that every man hath gotten of jewels, of gold, chains, and bracelets," and probably with the same meaning. Armlets of this

Armlets.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

nature are still seen on Persian, Hindu, and other sovereigns, and in most cases they are studded with expensive jewels.

"Armlet. Although the word has the same meaning as *bracelet*, yet the latter is practically so exclusively used to denote the ornament of the wrist, that it seems proper to distinguish by *armlet* the similar ornament which is worn on the upper arm. There is also this difference between them, that in the East bracelets are generally worn by women, and *armlets* only by men. The *armlet*, however, is in use among men only as one of the insignia of sovereign power."—*Kitto: Bib. Cycl., Art. "Armlet."*

(b) Those worn by women simply for ornament.

3. Armor for the arm.

***ar'-môn-ŷ, s.** [HARMONY.] (Scotch.)

ar'-môr, ʔar'-moŭr, *ar-moure, *ar-mure, s. [In Fr. *armure*; O. Fr. *armure*; Sp. & Port. *armadura*; Ital. & Lat. *armatura* = equipment, outfit, armor; *armo*=to fit out with implements, to equip; *arma*=implements, arms.]

A. Ordinary Language:

1. *Lit.*: Defensive arms; a covering designed to protect the body, especially in war, from being injured by any weapon the foe could use. In the authorized version of the Bible it is frequently mentioned under its appropriate name (1 Sam. xvii. 54; 1 Kings xxii. 38, &c.), and several times under the name *harness*, which was a term for armor common during the fifteenth and sixteenth centuries (1 Kings xx. 11; xxii. 34; 2 Chron. ix. 24). [HARNES.] The heroes of the Trojan war are described by Homer as wearing it. It was in use among the other nations of antiquity, but it was not till the age of chivalry that it reached its full development. From the list of pieces of armor enumerated in the subjoined example, quoted by Nares from Warner, it can be well understood that a knight "in compleat armor" was too well protected to be in much danger from a foe, and too unwieldy to put that foe in much danger. *Mail armor* was in use from 1066 to 1300. It was *tegetated*, consisting of little imbricated plates sewn upon a hauberk without sleeves or hood; *ringed* or *chain*, consisting of interlocking rings; *gamboised*, consisting of padded work stitched; *scaled*, of small circular plates like fish scales. *Mixed armor* to 1410, chain and plate. *Plate armor* to 1600, composed of large plates, and entirely enclosing the body. *Half armor* to eighteenth century, consisting of helmet and body armor only.

2. The metal protection given to warships, usually consisting of plates of supercarbonized steel or nickel steel, sometimes lined with cellulose to prevent leakage through shot-holes. [CELLULOSE, HARVEYZED ARMOR, KRUPPIZED ARMOR.]

"One of the most important inventions of the age is that by which armor can be hardened and made more powerful against the attack of either shot or shell. The process was invented by a Mr. Harvey, and consists in supercarbonizing the face of the armor plate to a depth of an inch or more, as choice may determine. Nickel, in prescribed portions, adds materially to the toughness of the steel. This, too, is a modern element in armor."—*R. G. Skerrett, in Chicago Times-Herald, May 8, 1898.*

2. *Fig.*: Anything designed and fitted to prove a defense against spiritual enemies.

¶ The "*armor of light*" (Rom. xiii. 12), opposed to "the works of darkness," would seem to be holy deeds. "*The armor of righteousness*" (2 Cor. vi. 7), as the name implies, is righteousness, justice. The "*armor of God*" (Eph. vi. 11, 13) is described at length in verses 13 to 20.

B. Technically:

1. *Eng. Law: The Statutes of Armor*, repealed in the reign of King James I., were ancient enactments requiring every one, according to his rank and estate, to provide a determinate quantity of the weapons then in use, that if required he might aid in the defense of his country against domestic commotion or foreign invasion. (*Blackstone's Comment.*, bk. i., ch. 13.) Embezzling or destroying the king's armor or warlike stores was, by 31 Eliz., c. 4, felony. (*Ibid.*, iv. 101, 102.)

2. *Her. Coat-armor*: The same as COAT OF ARMS. [ARMS.]

3. *Magnetism*: The "armor" of a magnet is the same as its *armature* (q. v.).

armor-plate, s. Metal plates for the protection of warships. The most improved form of armor-plate is made of Kruppized steel, capable of infinitely greater resistance than any other substance known. [ARMOR, A. 2, KRUPPIZED ARMOR.]

ar-môr-â-çî-a, s. [Lat. *armoracia, armoracea, armoracium*; Gr. *armorakia*=horse-radish; from *Armorica*, the Latin name of Brittany, where it was said to grow abundantly.] Horse-radish or Water-radish. A genus of plants belonging to the order Brassicaceæ, or Crucifers. It contains the *A. camphobia*, or Great Water-radish, and the *A. rusticana*, or Common Horse-radish, both native to America. The former has yellow flowers, and the latter white.

ar'-môr-bêar-êr, s. [Eng. *armor*; *bearer*.] One who carries the weapons of war belonging to another.

"Then he called hastily unto the young man his armor-bearer, and said unto him, Draw thy sword, and slay me, . . ."—*Judg. ix. 54.*

ar'-môred, a.

1. Armor-plated.

2. Equipped with arms or armor.

Armored train: A train of armor-plated cars, usually equipped with rapid-fire guns and loop-holed for riflemen. Armored trains were first used by the British in South Africa (1899-1902).

ar'-môr-êr, *ar'-mêr-êr, *ar'-mür-êr, s. [Eng. *armor*; -er. In Fr. *armurier*.]

1. One who dresses another in armor.

"The armorers, accomplishing the knights,
With busy hammers closing rivets up,
Give dreadful note of preparation."
Shakesp.: Henry V., iv., Chorus.

2. One who manufactures or repairs armor and weapons.

"This let the armorer with speed dispose;
Last time it more fatigued my arm than foes."
Byron: Corsair, i. 7.

ar-mô'r-î-âl, a. & s. [Fr. *armorial*, from *armoiries* = arms, coats of arms; Lat. *armarium* = a place for tools; hence a chest for clothing, money, &c.; *arma* = tools, implements.]

1. *As adjective*: Pertaining or relating to heraldic arms.

"Ancient *Armorial Quarterings*."—*Nichols: Herald and Genealogist*, vol. viii., p. 247.

2. *As substantive*: A book containing coats of arms. Thus the phrases occur, "the French *armorial*," the Spanish *armorial*," &c.

Ar-môr'-îc, a. & s. [Lat. *Armoricus*. From *Armorica*, said to be derived from two old Gallic words, *ar* (Gallic *air*) = upon, and *mor* (Lat. *mare*) = the sea.]

A. As adjective: Pertaining to Armorica, the western part of the country between the Seine and the Loire. It was inhabited in Cæsar's time by a confederacy of tribes called the Armorican League. He made war against them and subdued them. Long afterward it received the name of Bretagne, in English Brittany, from being inhabited by the Britons. Now it is divided into several French departments.

B. As substantive: The language of Armorica. It is called by the French Bas Breton. It belongs to the Celtic family, and is akin to the Welsh and the extinct Cornish. (In the etymologies of this Dictionary it is cited as *Arm.*)

Ar-môr'-îc-an, a. & s. [Eng., &c., *Armoric*; -an. In *Fr. Armoricaner*.]

A. As adj.: The same as ARMORIC, *adj.* (q. v.).

B. As subst.: A person born in Armorica.

ar'-môr-îst, ar'-moŭr-îst, s. [Fr. *armoriste*.] One well acquainted with coats of arms; one skilled in heraldry. (*Bailey*.)

ar'-môr-plât'ed, a. Covered with metal plates for defense, as an armor-plated ship of war.

ar'-môr-ŷ, s. [O. Eng. *armure*; -y. In O. Fr. *armaire, armarie, armoirie* (in Mod. Fr. *armoiries* is=coats of arms); Prov. *armari*; Sp. *armeira*. From Lat. *armarium*=a place for tools, a chest for clothes; *arma*=tools, implements, arms.]

A. From Eng. armor, in the sense of a coat of arms:

1. Coat armor; coats of arms.

2. Skill in heraldry.

B. From Eng. armor, in its ordinary sense:

1. Defensive armor; also offensive weapons, or both taken together.

2. A place for keeping weapons; a magazine in which all kinds of weapons are deposited and maintained in good order till they are required. (*Lit. & fig.*)

3. (Occasionally.) A place where arms are manufactured.

ar'-mô-zêen, ar'-mô-zîne, s. [Fr. *armosin, armoisin*. Corrupted from Ormuz or Hormuz, an island in the Persian Gulf.] A thick plain silk, generally black, used for clerical robes. (*Goodrich & Porter*.)

arm'-pit, s. [Eng. *arm*; *pit*.] The pit or hollow under the arm where it is joined to the body. The axilla.

" . . . up to their armpits in water."—*Macaulay: Hist. Eng.*, ch. xvi.

arms (1) *s. pl.* The plural of ARM (1) (q. v.).

arms (2) *s. pl.* [In Gael. *armachd* (sing.) = armor, arms; Fr. *armes*, pl. of *arme*; Prov., Sp., & Port. *armas* (pl.); Ital. *arme* (sing.); from Lat. *arma* (pl.) = implements, especially of war, notably a shield. Probably from root *ar*=to fit or join.] [ART.]

A. Ordinary Language:

1. *Lit.*: Weapons offensive or defensive:

" . . . hid their arms behind wainscots or in haystacks."—*Macaulay: Hist. Eng.*, ch. xv.

¶ War is so exciting, that when it breaks out it powerfully attracts the attention of the general public in every country; hence a number of phrases, at first purely military, now occur in ordinary English authors. [For these see B. 1.]

2. War, a state of hostility; the act of taking arms. [B.]

B. Technically:

I. Mil.: In the same sense as A. 1. **Military arms** are of two kinds: *arms of offense*, or *offensive arms*, and *arms of defense*, or *defensive arms*. Under the first category are rifles, pistols, muskets, cannons, swords, bayonets, &c.; and under the latter, shields, helmets, cuirasses, greaves, or any similar defense, for the person. Of offensive weapons, those in which flame is generated are called *fire-arms*.

Arms of parade or courtesy: Those used in ancient tournaments. They were unshod lances; edgeless and pointless swords, some of which, moreover, were of wood; and, finally, even canes. (*James: Mil. Dict.*)

Bells of arms, or Bell-tents: Bell-formed tents, formerly for the reception of arms, now for men also, when an army is in the field.

In arms: The state of having assumed weapons and commenced war or rebellion.

"Rose up in arms, conquered, ruled."—*Macaulay: Hist. Eng.*, ch. iii.

Pass of arms: A kind of combat in which, in mediæval times, one or more cavaliers undertook to defend a pass against all attacks. (*James*.)

Passage of arms:

(a) *Lit.*: A combat in which the armed opponents exchange blows or thrusts with each other.

(b) *Fig.*: A controversial encounter with the pen or some similar weapon.

Place of arms (Fort.): A part of the covered way opposite to the re-entering angle of the counter-scarp, projecting outward in an angle. (*James*.)

Small arms: Those which can be carried in the hand, as muskets, swords, &c., in place of requiring wheel-carriages for their transportation.

Stand of arms: A complete set of arms for one soldier, as a rifle and bayonet.

To appeal to arms: To put a dispute to the arbitrament of war.

"The House of Austria, indeed, had appealed to arms."—*Macaulay: Hist. Eng.*, ch. xxv.

To arms: An exhortation or command to assume weapons and commence rebellion or active warfare.

"And seas, and rocks, and skies rebound,
To arms, to arms, to arms!"—*Pope*.

To take arms: To assume weapons and commence war or rebellion.

"Many lords and gentlemen, who had, in December, taken arms for the Prince of Orange and a free Parliament, . . ."—*Macaulay: Hist. Eng.*, ch. xi.

Under arms: In the state of having one's weapons borne on one's person, or otherwise ready for immediate use.

"The trainbands were ordered under arms."—*Macaulay: Hist. Eng.*, ch. x.

II. Law: Anything which one takes in his hand in anger to strike another with or throw at him. Pistols and swords are, of course, arms in the legal sense, but so also are stones and sticks.

III. Heraldry. Armorial bearings: In the days when knights were so encased in armor that no means of identifying them was left, the practice was introduced of painting their insignia of honor on their shield, as an easy method of distinguishing them. For a time these were granted only to individuals, but Richard I., during his crusade to Palestine, made them hereditary. The reason why they are called *coats of arms* is that they used to be introduced on the surcoat of their possessor, but the term once introduced was afterward retained even when they were displayed elsewhere than on the coat. These are usually divided into (1) *public*, as those of kingdoms, provinces, bishoprics, corporate bodies, &c.; and (2) *private*, being those of private families. These again are separated into many subdivisions, founded mainly on the varied methods by which arms can be acquired. [ASSUMPTION, CANTING, DOMINION, FEUDAL, &c.]

IV. Falconry: The legs of a hawk from the thigh to the foot.

V. Bot.: The same as ARMATURE or ARMOR (q. v.).

***ar'-müre, s.** [ARMOR.]

ar'-mŷ, *ar'-mêe, s. [In Sw., Dan., & Ger. *armee*; Gael. *armailt*; Irish *arbhar, armhar*; Fr. *armée*, all meaning an army; Prov., Sp., & Port. *armada*=a naval armament; Ital. *armata*=an army; from Lat. *armatus* (masc.), *armata* (fem.)=armed, pa. par. of *armo*.] [ARM, v. t., ARMADA, ARMS.]

bôll, bôŷ; pòut, jòwl; cat, cell, chorus, çhin, bench; go, gem; thin, ʔhis; sin, aʃ; expect, Xenophon, exist. ph = f. -cian, -tian = şan. -tion, -sion = şhñ; -ʔion, -şion = zhñ. -tious, -cious, -sious = şhş. -ble, -dle, &c. = bel, del.

1. *Lit. (Ord. Lang. & Milit.)*: A body of men, enlisted, brought together, drilled and armed for warfare.

The American army was limited by an Act of Congress of 1870 to 25,000 men; composed of ten regiments of cavalry, twenty-five of infantry, and five of artillery. The army is raised entirely by voluntary enlistment. The Military Academy at West Point furnishes the finest and most complete military education. The course spreads over four years and covers the whole area of military instruction. A few regiments act as a reserve to the civil power in large cities, the rest are scattered in small posts along the frontiers or in Indian districts. The United States territory is divided into ten departments, which are grouped into four military divisions: 1. The South, comprising the South and Texas. 2. The division of Missouri, comprising the departments of Dakota, the Platte and Missouri. 3. The Pacific, comprising Columbia, California, and Arizona. 4. The East, comprising the departments of the East, and the Lakes. The President of the United States is commander-in-chief of the army and militia. Congress has power to raise, support, and control their government. The Articles of War enacted in 1806, and based on the English form, are practically the governing principles of the American army.

The three chief arms of the British are Infantry, Cavalry and Artillery; all other branches, such as Engineers, the Commissariat, Transport, Police, Postal, Medical, and Chaplains' departments being auxiliary. The officers of the British army consist of field-m Marshals, generals, lieutenant-generals, major-generals, colonels, lieutenant-colonels, majors, captains, and lieutenants.

¶ (a) A *blockading army* is one engaged in blockading or investing a place. [BLOCKADE.] (James.)

(b) A *covering army* is one guarding the approaches to a place. [COVER, v.] (Ibid.)

(c) A *flying army* is one continually in motion, both to cover its own garrisons and alarm the enemy. (Ibid.)

(d) An *army of observation* is one in a forward position engaged in watching the enemy. (Ibid.)

(e) An *army of reserve* is one not itself at the moment engaged in fighting, but all ready to furnish men to another army which is so, or, if need arise, to go en masse to its assistance. (Ibid.)

(f) A *standing army* is an army so embodied that it continues from year to year without requiring for its perpetuation an annual vote of Congress.

2. *Fig. (Ord. Lang.)*: A great number, a mighty host, though not embodied for war.

"... he doeth according to his will in the army of heaven, and among the inhabitants of the earth."—Dan. iv. 35.

army-corps, s. A corps which is complete in itself as an army, furnished with everything necessary for service, usually embracing several divisions and commanded by a general officer of higher rank than a divisional commander.

army-list, s. A list of officers of the army.

army-worm, s. The larvæ of a species of moth (*Leucania unipunctata*), which appears in great numbers and devastates crops, etc. It moves like a destroying army over vast regions devouring all vegetation in its path; hence its name.

***ar-nēst, s.** [EARNEST.]

ar-nī-çā, s. [Corrupted from *Ptarmica*.] [ACHILLEA.]

1. A genus of plants belonging to the order Astera-cæ, or Compositæ.

2. The English name of plants belonging to the above-mentioned genus, and specially of the *A. montana*, the Mountain Arnica, or German Leopard's-bane. It is common in the alpine parts of Germany, Sweden, Lapland and Switzerland. It is a perennial, of a slightly fetid odor, and a bitterish acid taste. Given in large quantities it produces deleterious effects, but the powdered leaves, in moderate doses of five to ten grains, have been found serviceable in paralysis, convulsions, amaurosis, chlorosis, gout and rheumatism. (Castle: *Lexic. Pharmaceut.*, 2d ed.) As an outward application, arnica is in constant use as a remedy for sores, wounds, bruises, and ailments of a similar kind. Its use in all such cases has very largely increased in later years. Surgeons, and especially army-surgeons, set great store by it. It is also employed as an internal medicine.

ar-nī-çine, s. [ARNICA.] A bitter principle contained in the flowers of the *Arnica montana*. [ARNICA.]

Ar-nōld-ist, s. [From the Arnold mentioned below.]

Ch. Hist.: A follower of Arnold of Brescia, who, in the twelfth century, when the papal power was at its maximum, opposed the Pope's temporal authority, and proposed that the Church should be disendowed and left for its support to the free-will offerings of the people. For advocating these views he was strangled to death at Rome in the year 1155, and to prevent the people paying veneration to his remains his corpse was burned and the ashes thrown into the Tiber. All the more on account of his cruel fate, his name was enshrined in the affections of many, and the Arnoldists from time to time gave trouble to the Papacy. (Mosheim: *Ch. Hist.*, Cent. xii., pt. ii., ch. 5, § 10.)

ar-nōt, ar-nāt, s. [EARTH-NUT.]

ar-nōt-tō, ar-nāt-tō, ăn-nōt-tō, ăn-nōt-tā, ă-nāt-tō, s. [Contracted from its Portuguese name *Vejo-seanata* (?).]

1. *Comm.*: The waxy-looking pulp which envelops the seeds in the arnotto-tree. This is detached by throwing the seed into water, after which it is dried partially, and made up first into soft pellets, rolled in leaves, in which state it is called *flag* or *roll arnotto*. Afterward, becoming quite dry, it is formed into cakes, and becomes *cake arnotto*. The South American Indians color their bodies red with it; farmers here and elsewhere use it to stain cheese; in Holland the Dutch employ it to color butter; the Spaniards put it in their chocolate and soups; dyers use it to produce a reddish color, and varnish makers, to impart an orange tint to some varnishes. As a medicine it is slightly purgative and stomachic.

¶ This substance is very frequently adulterated. Previous to the passing of the Adulteration Act it was found almost impossible to obtain a pure sample, the adulterants being flour, rye meal, turmeric, chalk, gypsum, Venetian red, and, in some cases, red lead; this last substance being a poison. At the present time the only adulterants used are flour, turmeric, and small quantities of either chalk or gypsum. Pure arnotto should not contain more than six per cent. of ash. Adulterated samples contain as much as twenty or even thirty per cent. The organic adulterants are easily detected by the microscope.

"Arnotto dyeth of itself an orange-color, is used with pot-ashes upon silk, linen, and cottons, but not upon cloth, as being not apt to penetrate into a thick substance."—Sir W. Petty, in Sprat's *Hist. of the Royal Society*, p. 299.

"Arnotto is mixed up by the Spanish Americans with their chocolate, to which it gives, in their opinion, an elegant tincture and great medicinal virtue. They suppose that it strengthens the stomach, stops fluxes, and abates febrile symptoms; but its principal consumption is among painters and dyers. It is sometimes used by the Dutch farmers to give a richness of color to their butter; and very small quantities of it are said to be applied in the same manner in the English dairies."—Guthrie: *Geography*.

Arnica Montana: Root and Flowers.

2. *Bot.*: The Arnotto-tree, the *Bixa orellana* of Linnæus, has a five-dentate calyx, ten petals, many hypogynous stamens, and a two-valved hispid capsule. It is from twenty to thirty feet in height, and grows in tropical America. [BIXA.] It is the type of the old order Bixaceæ, now more generally called Flacourtiaceæ (q. v.).

ar-nūt, s. [EARTH-NUT.]

ar-rōi-dē-æ, s. pl. [Lat. *arum* (q. v.), and Gr. *eidos*=appearance.] An order of endogenous plants, the same as ARACEÆ (q. v.).

(Boucher.)

¶ A word used apparently as a standard formula for exorcising witches. It seems to have meant, "Avaunt thee! be gone, be off!" In English literature it is hardly found elsewhere than in Shakespeare.

"And aroint thee, witch! aroint thee."

1. Corn-land, a cornfield. [ARURA.]
2. A Grecian measure of superficial extent, a quarter of a plethron, and containing one and a-half hektoi. Porter makes it equivalent to 9 poles. 107'37833 square feet.

a-rōū'se, *v. t.* [Obviously akin to *rouse*, which Mahn considers a secondary form of *raise*. Richardson also derives *arouse* from *arose*, the pret. of *arise*. But it seems more closely connected with A. S. *aræsan*=to rush; Sw. *rusa*; Ger. *rauschen*, *aurauschen*=to rush, to rustle, to roar, to make drunk (*rauschen*=drunkenness); Dan. *ruus*=drunkenness; Dut. *ruischen*=to murmur, purr, whistle, roar; *razen*=to make a great noise, to storm, to rave; *razend*=raving mad. Essential meaning, apparently, to stir up, as a drunkard or a madman is excited to make an uproar.

1. *Gen.*: To excite, to stimulate any person, any passion, &c., at rest or torpid, into a state of activity.

"But absent, what fantastic woes *arous'd*
Rage in each thought, by restless musing fed,
Oh! the warm cheek, and blast the bloom of life."
Thomson: Spring, 1,004.

"We see how easily national jealousies may be *aroused*."
—*Times*, Nov. 16, 1877.

2. *Spec.*: To awake a person from sleep.

ar'-rach (*ch* guttural), *s.* [ORACHE.]

ār-rack, **ār-rac**, **ār'-ack**, **ār'-ac**, **trăck**, *s.* [In Sw. & Fr. *arack* and *rack*; Dan. & Dut. *arak*; Ger. *arrack* and *rack*; Turk. *raki*; Mahratta *arka*=distilled spirit, the sun; Hind. *araq-sharab*; Arab.

araq=(1) perspiration, (2) juice, sap, (3) spirituous liquor; *araga*.] A term used, in the countries to which the Arabs have penetrated, for distilled spirits. In India, where the word is continually used by Anglo-Indians and others, arrack is made by double distillation chiefly from "toddy" or "toddy," a sweet juice derived from the unexpanded flowers of various palm-trees, and notably of the cocoanut (*Cocos nucifera*). [Cocos, Toddy.] It is manufactured also from the succulent flowers of the Bassia genus of trees [BASSIA], from rice, and from other vegetable products. Liberty to sell it in the several districts of India is farmed out to native contractors at a stipulated sum, notwithstanding which it is obtainable at a very cheap rate, which leads to a good deal of drunkenness both among European soldiers in the East and the low caste natives of India. The beverage arrack may be imitated by dissolving forty grains of flowers of benjamin in a quart of rum. Dr. Kitchiner calls this "Vauxhall nectar."

"I send this to be better known for choice of china, tea, arrack, and other Indian goods."—*Spectator*.

arrack-punch, *s.* Punch made of arrack.

"They treated me with port wine and *arrack-punch* . . ."—*Graves: Recollection of Shenstone*, p. 16.

†ar-răg'-ōn-īte, *s.* [ARAGONITE.]

***ar-rā'ied**, *pa. par.* [ARRAYED.]

ar-rā'ign (*g* silent), *v. t.* [O. Fr. *arraigner* *aragnier*, *aregnier*, *aregnir*, *aranier*, *areisnier*, *aresner*, *araisnier*, *areisoner*, *araisoner*, *arraisonner*; Prov. *arrazonar*; Low Lat. *arrainare*, *arraizonare*, *arrationare*=to address, to call before a court, to require a prisoner to make pleadings: *ad*=to, and *rationo*=to speak; Low Lat. *rationes*=pleadings, plural of Class. Lat. *ratio*=the mode or art of thinking.]

I. Law. Of persons: To summon a prisoner to the bar of a court to answer a matter charged against him in an indictment. On being thus called he is required to respond to his name, or in some other way signify that he is the person whose presence is required. Then the indictment is distinctly read over to him in the vernacular tongue, after which he is asked whether or not he is guilty. He may stand mute, or confess the fact alleged, or plead to the indictment. (*Blackstone: Comment.*, bk. iv., ch. 25.)

"When the time was come, they were brought before their enemies, and arraigned."—*Bunyan: The Pilgrim's Progress*, pt. i.

II. Ordinary Language:

*1. The same as ARRANGE. (Apparently an erroneous meaning founded on a wrong etymology of *arraign*.)

"*Arraign*, is to put a thing in order or in its due Place; also to Indict and put a prisoner on his Trial."—*Glossog. Nova*, 2d ed. (1719).

2. To bring an accusation against, to complain of, to find fault with, to denounce; to stigmatize persons, actions, arrangements, or institutions.

"... had been an accomplice in some of the misdeeds which he now arraigned with great force of reasoning and eloquence."—*Macaulay: Hist. Eng.*, ch. xiii.

"Wild she arraigns the eternal doom,
Upbraids each sacred power."
Scott: William and Helen, 22.

ar-rā'ign (*g* silent), *s.* [ARRAIGN, *v.*] Arraignment.

ar-rā'igned, ***a-rē'gn-ŷd** (*g* silent), *pa. par. & a.* [ARRAIGN, *v.*]

ar-rā'ign-ēr (*g* silent), *s.* [Eng. *arraign*; -*er*.] One who arraigns.

ar-rā'ign-ing (*g* silent), *pr. par.* [ARRAIGN, *v.*]

ar-rā'ign-mēnt, ***ar-rā'igne-mēnt**, ***ar-rē'ign-mēnt** (*g* silent), *s.* [Eng. *arraign*; -*ment*.]

A. Ordinary Language:

I. The act of arraigning, accusing, complaining of, or finding fault with; the state of being so arraigned. [B.]

1. In the same sense as B. (q. v.).

"But yet in Layer's case, A. D. 1722, . . . the prisoner stood at the bar in chains during the time of his arraignment."—*Blackstone: Comment.*, bk. iv., ch. 25.

2. In a more general sense.

"Wrathful at such arraignment foul,
Dark lowered the clansman's sable scowl."
Scott: Lady of the Lake, v. 6.

II. The charge made against one.

"In the sixth satire, which seems only an arraignment of the whole sex, there is a latent admonition to avoid ill women."—*Dryden: Æneid; Dedication*.

B. Technically:

Law: The act of calling a person to answer before a court of law to an indictment brought against him, or the indictment to which he is required to plead. [A.]

*ar-rā i-mēnt, *ar-rā'y-mēnt, s. [Eng. array; -ment.] The same as RAIMENT (q. v.).

*ār-rānd, s. [ERRAND.]

ar-rā'ngē, *ar-rā'yngē, v. t. & i. [In Ger. *arrangiren*; Fr. *arranger*; (Fr. *ranger*=to put in order, to draw up in rank; *rang*=rank); Prov. *arrengar*, *rengar*; Port. *arranjar*.] [See RANGE, RANK.]

A. Transitive:

1. Essential meaning: To put in rank. *Spec.*, to put in order, to put persons or things in the places where it is requisite for the carrying out of a purpose that they should be located.

"... candles were arranged in the windows for an illumination."—*Macaulay: Hist. Eng.*, ch. xv.

"... a proud show
Of baby houses curiously arranged."

Wordsworth: *Excursion*, bk. ii.

2. To plan, to prepare beforehand, to settle particulars before commencing action.

"A place and a time were named; and the details of a butchery were frequently discussed, if not definitely arranged."—*Macaulay: Hist. Eng.*, ch. ii.

B. Intrans.: To assume a form of order.

"But soon, within that mirror, huge and high,
Was seen a self-emitted light to gleam;
And forms upon its breast the earl's gan spy,
Cloudy and indistinct, as feverish dream;
Till, slow arranging, and defined, they seem
To form a lordly and a lofty room."

Scott: *Lay of the Last Minstrel*, vi. 18.

ar-rā'nged, pa. par. [ARRANGE.]

ar-rā'ngē-mēnt, s. [Eng. arrange; -ment. In Ger. & Fr. arrangement.]

A. Ordinary Language:

I. The act of putting in rank or in order; the state of being so put in order.

"There is a proper arrangement of the parts in elastic bodies, which may be facilitated by use."—*Cheyne*.

II. The ranks thus formed, the disposition made, the order evoked, the settlement resulting.

1. Of material things: Things placed in rank or in certain defined positions.

"Taking a slice of white light from the beam of an electric lamp, I cause that light to pass through an arrangement of prisms."—*Tyndall: Frag. of Science*, 3d ed., ix. 226.

2. Of things immaterial:

(a) Dispositions, needful preparations.

"Donelagh made the arrangements for the flight."—*Macaulay: Hist. Eng.*, ch. xxii.

(b) Stipulations, conditions of adjustment of outstanding differences.

"It was impossible to make an arrangement that would please everybody, and difficult to make an arrangement that would please anybody; but an arrangement must be made."—*Macaulay: Hist. Eng.*, ch. xi.

B. Technically:

Natural Science: Classification; the placing of animals, plants, and even minerals, along with the species most nearly akin to them.

"I believe that the arrangement of the groups within each class in due subordination and relation to the other groups..."—*Darwin: Origin of Species* (ed. 1859), ch. xiii., p. 420.

ar-rā'n-gēr, s. [Eng. arrang(e); -er. In Fr. *arrangeur*.] One who arranges.

"None of the list-makers, the assemblers of the mob, the directors and arrangers, have been convicted."—*Wurke: Reflections on the Executions in 1780*.

ar-rā'n-gīng, pr. par. [ARRANGE.]

ār-rānt, *ēr-rānd, *ēr-rānt, *ēr-rāunt, a. Of somewhat doubtful etymology. The most obvious hypothesis is to assume its identity with Eng. *errant*, from Lat. *errans*=wandering, from *erro*=to wander. This would first have a good, or at least an indifferent sense, meaning simply wandering, nomad; but would ultimately contract a bad one, from the fact that owing to the facilities which that method of life affords for the commission of certain delinquencies, the wandering races are generally of low morality. This etymology is adopted with more or less confidence by Johnson, Todd, Webster, Mahn, and others. But a more probable one is from *arghand*=timid, cowardly, pr. par. of the Northern verb *argh*. [ARCH.] Owing to similarity of sound, this was easily confounded with the word *errant*, and was changed into *arrant*. (*Skeat*.)

A. Obviously the same as Eng. or Fr. *errant*: Errant, wandering, roaming in search of adventures.

"Come ye to seek a champion's aid,
On palfrey white, with harper hoar,
Like arrant damsel of yore?"

Scott: *The Lady of the Lake*, vi. 9.

B. Of more doubtful etymology: Pre-eminent in some quality, good or bad.

†I. In some good quality.

"An arrant honest woman."—*Burton*.

II. In some bad quality, as in cowardice, folly, dishonesty, &c. (It is generally of persons, rarely of things.)

1. Of persons:

"He [the devil] makes all his subjects errant vassals, yea, chained slaves."—*Bp. Hall: Remains*, p. 25.

"That they were a company of errand hypocrites..."—*Asheton: Serm. at Guildhall Chapel*, 1673, p. 11.

"A vain fool grows forty times an arranter sot than before."—*L'Estrange*.

"... this chief had been a notorious murderer, and was an arrant coward to boot."—*Darwin: Voyage round the World*, ch. xviii.

"... found to have been arrant thieves."—*Froude: Hist. of Eng.*, 2d ed., vol. iii., ch. xvi.

"... he [the Dewan] being an arrant pedlar."—*Hooker: Himalayan Journals*, ch. xxvi., vol. ii., p. 226.

2. Of things, as "arrant weeds"—rank weeds.

"Your justification is but a miserable shifting of those testimonies of the ancientest fathers alleged against you, and the authority of some synodal canons, which are now arrant to us."—*Milton: Animad. on Remonstrants' Def. against Smectymnus*.

"... are weeds, arrant weeds."—*Cowper: Hope*.

ār-rānt-lŷ, *ār-rōn-lŷ, adv. [Eng. arrant; -ly.] Shamelessly, impudently, infamously.

"Funeral tears are as arrantly hired out as mourning cokes."—*L'Estrange*.

ār-rās, s. [In Fr. *arras*; Ital. *arazzo*; Port. *raz*. So called because it was manufactured chiefly in the French city of Arras, the capital in bygone times of the province of Artois, now of the department Pas de Calais. Both Arras and Artois, the former called in Flemish *Atrecht*, are from *Atre-bates*, a barbarian tribe described by Cæsar as inhabiting the region (*De Bell. Gall.* vi. 6.)] Tapestry hangings with interwoven figures hung, in the Elizabethan age, around the rooms of old mansions, often at so great a distance from the wall as to leave a convenient hiding-place behind. At a meeting between Queen Mary and Elizabeth, Philip of Spain was thus concealed behind the arras.

"With goodly arras of great majesty,
Woven with gold and silke, so close and nere
That the rich metall lurked privily."

Spenser: *F. Q.*, III. xi. 23.

"Pol. At such a time I'll loose my daughter to him:
Be you and I behind an arras then;
Mark the encounter."

Shakesp.: *Hamlet*, ii. 2.

"Where were now the brave old hangings of arras which had adorned the walls of lordly mansions in the time of Elizabeth?"—*Macaulay: Hist. Eng.*, ch. xviii.

"For some were hung with arras green and blue,
Showing a gaudy summer-morn,
Where with puff'd cheek the belted hunter blew
His wreathed bugle-horn."

Tennyson: *The Palace of Art*.

ār-rās-wīse, a. [Eng. arras, and suffix -wise=after the manner of.]

Her.: A term used when any square object is so placed as to exhibit a perspective view of its top and two of its sides.

ar-rā'ught, *a-rā'ught (gh silent), v. The pret. of ARECHE (2) (q. v.).

ar-rā'y, *a-rā'y, *a-rā'ye, s. [In Fr. *arroi*=train equipage; O. Fr. *arroi*, *arrai*, *arrei*, from *rai*, *rei*, *roi*=order, arrangement; Prov. *arrei*; Sp. *arreo*=ornament, dress, horse-trappings; Port. *arreio*; Ital. *arredo*=furniture, implements. Cognate also with A. S. *geræd*, *gerædit*, *gerædro*=housing, harness, trappings; Sw. *reda*=order; Gael. *earradh*=dress; Irish *earradh*=armor, accouterments, wares.] [ARRAY, v.]

A. Ordinary Language:

I. The act of arranging, putting in order, or decorating; the state of being so arrayed, adorned, or decorated. *Specialty*:

1. Equipment, equipage.

"But for to telle you of his aray,
His hors was good, but he ne was nought gay."

Chaucer: *C. T.*, Prologue, 734.

2. Order of battle in soldiers.

In *array*: In military order, with the view of immediately fighting. [Used of an army, a "battle" (the main body of an army) (?), or rarely of a single fighting man.] [II.]

"... he chose of all the choice men of Israel, and put them in array against the Syrians."—*2 Sam.* x. 9.

"... and set the battle in array against the Philistines."—*1 Sam.* xvii. 2.

"... they shall ride upon horses, every one put in array, like the man to a battle, against thee, O daughter of Babylon."—*Jer.* l. 42.

3. Adornment.

(a) Lit. Of persons: Dress, especially when rich or beautiful.

"The sun is bright; the fields are gay
With people in their best array
Of stole and doublet, hood and scarf,
Along the banks of the crystal Sharf."

Wordsworth: *White Doe of Rylstone*.

(b) Of things: Regular order, with adornment.

"Again his waves in milder tints unfold
Their long array of sapphire and of gold."

Byron: *The Corsair*, iii. i.

II. The persons thus arrayed or placed in order. *Spec.*, the whole body of fighting men. [See also B.]

"The whole array of the city of London was under arms."—*Macaulay: Hist. Eng.*, ch. i.

"Arm ye for the day!

Who now may sleep amidst the thunders rending,
Through tower and wall, a path for their array?"

Hemans: *The Last Constantine*, 81.

B. Technically (Law):

*1. The Commission of Array was a commission of arranging in military order, formerly issued from time to time by the English sovereigns and put in regular form by Parliament in 5 Henry IV. It empowered certain officers in whom the Government could confide to muster or array—that is, set in military order—the inhabitants of every district. (*Blackstone: Comment.*, bk. i., ch. 13.)

2. The act or process of setting a jury in order to try causes; also the jury thus put in order, or their names when impaneled.

"Challenges to the array are at once an exception to the whole panel in which the jury are arrayed, or set in order by the sheriff in his return."—*Blackstone: Comment.*, bk. iii., ch. 23.

A. Ordinary Language: The act of arresting; the state of being arrested; seizure, detention.

Specially:

*1. Stoppage, delay, hindrance.

"And in he goith, withouten more *arest*,
Thar as he saw most perell and most dred."
Lancelot of the Lake (ed. Skeat), bk. iii., 3,072-3.

2. The seizure of a person charged with some crime, or that of his goods [B., I.]; detention, custody.

"And dwelleth eek in prisoun and *arreste*,"
Chaucer: *C. T.*, 1,312.

To make *arrest upon* or *of*: To arrest, to seize.

"Was lik an hound, and wold have maad *arrest*
Upon my body, and wold han had me deed."
Chaucer: *C. T.*, 16,386-7.

Under arrest: Into or in the state of one who has been and remains arrested, seized, kept in custody, or at least under restraint. (Generally preceded by the verb *to put* or *to place*.)

"William refused to see him, and ordered him put under *arrest*."—Macaulay: *Hist. Eng.*, ch. x.

"The governor was placed under *arrest*."—*Ibid.*, ch. ix.

¶ See also examples given under ARRET, s.

B. Technically:**I. Law:**

1. *Of persons*: The seizure of a suspected criminal or delinquent that security may be taken for his appearance at the proper time before a court to answer to a charge. Ordinarily a person can be arrested only by a warrant from a justice of the peace; but there are exceptional cases in which he can be apprehended by an officer without a warrant, by a private person also without a warrant, or by what is technically called a *hue and cry*. An arrest is made by touching the body of the person accused, and after this is done a bailiff may break open the house in which he is to take him; but without so touching him first it is illegal to do so. The object of arrest being to make sure that he answers to a charge about to be brought against him, it does not follow that after being seized he is incarcerated; if bail for his appearance at the proper time be given, and the case be not too aggravated a one for such security to be accepted, he will be released till the day of trial.

2. *Of things. Arrest of judgment*: The act or process of preventing a judgment or verdict from being carried out till it shall be ascertained whether it is faulty or legally correct. Judgment may be arrested (1) when the declaration made varies from the original writ, (2) where the verdict materially differs from the pleadings and issue thereon, and (3) where the case laid in the declaration is not sufficient in law to admit of an action being founded upon it. (Blackstone: *Comment.*, bk. iii., ch. 24.)

II. Biology: Arrests of development. [See ARRESTED.]

" . . . they are due chiefly to *arrests* of development."—Owen: *Classif. of the Mammalia*, p. 99.

III. Veterinary Science: A mangy humor between the ham and pastern of the hinder legs of a horse. (Johnson.)

†ar-rēs-tā'-tion, s. [Fr. *arrestation*.] The act of arresting; the state of being arrested.

ar-rēs'-tēd, pa. par. [ARREST, v.]

Biol. Arrested development: Development arrested at some stage of its progress. (See the example.)

"Arrested development differs from *arrested* growth, as parts in the former state still continue to grow, whilst still retaining their early condition. Various monstrosities come under this head."—Darwin: *Descent of Man*, pt. i., ch. iv.

ar-rēs'-tēe, s. [Eng. *arrest*; -*ee*.]

Scots Law: The person in whose hands property attached by arrestment is at the time when it is thus dealt with.

ar-rēs'-tēr, **ar-rēs'-tōr**, s. [Eng. *arrest*; -*er*, -*or*.]

Scots Law: The person who obtains legal permission, on which he acts, to arrest a debt or property in another's hands.

ar-rēs't'-ing, pr. par. [ARREST, v.]

ar-rēs't'-ment, s. [Eng. *arrest*; -*ment*. In Ital.

arrestamento=act of arresting.]

Scots Law: The process by which a creditor detains the effects of his debtor, which are in the hands of third parties, till the money owing him is paid. It is of two kinds:—(1.) *Arrestment in security* when proceedings are commencing, or there is reason to believe that a claim not yet in a state to be enforced will speedily become so. (2.) *Arrestment in execution*, being that which follows the decree of a court, or when a debt is otherwise settled to be legally owing.

ar-rēt', ***ar-rēt't**, ***a-rēt'te**, ***a-rīt'te**, v. t. [From Fr. *arrêter*; Low Lat. *arreto*; the same as *arresto*.] [ARREST, v. & s.]

2. An old measure, as yet only partially superseded by the French metric system of weights and measures introduced into Spain on January 1, 1859. It is of two capacities: (1) The *arroba* for wine contains 3½ imperial gallons. (2) The *arroba* for oil contains 2½. (*Statesman's Year-Book*, 1875.)

B. In Portugal: An old Portuguese weight of about thirty-two pounds. (*Simmonds*.) It is too completely disused to be mentioned in the *Statesman's Year-Book*.

ar-rō-de, *v. t.* [Lat. *arrodo*: from *ad*=to, and *rodo*=to gnaw.] To gnaw, to nibble. (*Johnson*.)

ār-rō-gance, **ār-rō-gan-çy*, *s.* [In Fr. *arrogance*; Sp. & Port. *arrogancia*; Ital. *arroganza*; Lat. *arrogantia*; from *arrogans*, *pr. par.* of *arrogō*.] [ARROGATE.] Properly, the act of taking to one's self in an insolent way that which one unjustly claims, or of helping one's self to that which, though one's own, should have been handed to one by another; the taking too much upon one's self; exorbitant pretensions, insolence.

"The fear and hatred inspired by the greatness, the injustice, and the arrogance of the French king were at the height."—*Macaulay: Hist. Eng.*, ch. iv.

ār-rō-gant, *a.* [In Dan. & Fr. *arrogant*; Sp., Port., & Ital. *arrogante*; Lat. *arrogans*; *pr. par.* of *arrogō*.] [ARROGATE.]

1. *Of persons*: Taking in an overbearing manner something which one claims, but not justly, as one's own, or that which, though one's own, should have been passively received by him; assuming, overbearing, manifesting too high an appreciation of one's self; insolent.

"In the hour of peril, the most *arrogant* and mutinous spirits will often submit to the guidance of superior genius."—*Macaulay: Hist. Eng.*, ch. xiii.

2. *Of things*: Marked with arrogance; the offspring of arrogance.

"The pride of *arrogant* distinctions fall."

Cowper: *Retirement*, 659.

ār-rō-gant-ly, *adv.* [Eng. *arrogant*; -*ly*.] In an arrogant manner; with undue assumption.

"Our poet may

Himself admire the fortune of his play;

And *arrogantly*, as his fellows do,

Think he writes well, because he pleases you."

Dryden: *Indian Emperor*. (Prol.)

ār-rō-gant-ness, *s.* [Eng. *arrogant*; -*ness*.] The quality of being arrogant; arrogance. (*Johnson*.)

II. Fig.: In Scripture arrows signify or symbolize (1) litter words (Ps. lxiv. 3); (2) false words (Jer. ix. 8); (3) a false witness; (4) affliction divinely sent (Lam. iii. 12, 13; Job vi. 4; Ps. xxxviii. 2); (5) the judgments of God on sinful nations or individuals (Numb. xxiv. 8; Deut. xxxii. 23), or more specifically (a) famine (Ezek. v. 16, &c.), (b) lightning (2 Sam. xxii. 14, 15; Ps. xviii. 14; Zech. ix. 14); (6) children, especially stalwart sons (Ps. cxxvii. 4).

1. Her.: Arrows are often represented on coats of arms, either singly or in sheaves, i.e., in bundles.

A broad arrow is one with a head resembling a pheon, except in wanting the engraving or jagg on the inner edge. [See 2.] (Gloss. of Heraldry.)

2. Surveying: A "broad arrow" is the name applied to the mark cut by the officers of the Ordnance Department conducting the trigonometrical survey, to note the points from which their several measurements are made.

ăr-rōw-rōot, s. [Eng. arrow; root. The translation of a term originally applied by a tribe of native American Indians to the root of *Maranta arundinacea*], which had long been used by them to counteract the effect of wounds inflicted by poisoned arrows. Other derivations have been given. It is, however, noteworthy that in Ger. arrowroot is *pfeilwurzel*; *pfeil* being=arrow, and *wurzel*=root.]

1. Bot.: The English name of the botanical genus *Maranta*, the type of the endogenous order Marantaceæ, called by Lindley, in his *Nat. Syst. of Bot.*, the Arrow-Root tribe; but altered in his *Vegetable Kingdom* to Marants. The flowers of *Maranta* are in long, close, spike-like panicles, with irregular corollas, each having a single perfect stamen, with half an anther. The veins of the leaves run out obliquely from the midrib to the margin. The root is a fleshy corm, which, when washed, grated, strained through a sieve, and again repeatedly washed, furnishes the substance so much prized as food for invalids, which is described under No. 2.

2. Comm.: The starch extracted from the rhizomes of a *Maranta*, and exported to England in large quantities from the East and West Indies, and from Africa, each importation taking the name of the place from which it comes. Thus they have East Indian arrowroot, Bermuda arrowroot, St. Vincent arrowroot, Natal arrowroot, &c. Attempts have been made to call every starch arrowroot which bore the slightest resemblance to the true *Maranta*; for example, Potato or British arrowroot, from the *Solanum tuberosum*; Tous-les-mois, or French arrowroot, from the *Canna edulis*; Tapioca, or Brazilian arrowroot, from the *Manihot utilissima*, &c. This has failed since the passing of the Adulteration Act, and it is now understood by public analysts, magistrates, &c., that arrowroot must consist entirely of the starch which is extracted from the rhizomes of a *Maranta*, and that any admixture of potato or other starch is regarded as an adulteration.

East India arrowroot is said by some to be prepared from the tubers of the *Curcuma angustifolia*. Such we believe to be the case in Southern India, where it is a favorite food among the natives; but the article sold in this country as East Indian arrowroot is certainly the starch of a *Maranta*, and not a *Curcuma*. This is readily determined by the microscope.

Natal arrowroot has given much trouble to the public analysts, owing to the granules somewhat resembling those of potato-starch. It has, however, been lately proved to be a genuine *Maranta* starch.

Portland arrowroot: A name applied to a starch prepared, some years ago, in Portland, from the roots of the *Arum maculatum*. It is not now an article of commerce.

¶ Arrowroot is adulterated either by the mixing together of various qualities of arrowroot, or by the admixture of other starches, such as potato or tapioca. Neither of these methods renders the arrowroot deleterious; but when we consider that the price of the different qualities of genuine arrowroot varies from 12c. to 60c. per pound, and that the price of potato or tapioca flour seldom exceeds 12c. per pound, we then see how the public may be cheated in pocket. The adulteration by potato or tapioca flour is readily detected by the microscope.

A. Ordinary Language: The substance described under B. 1 (Chem.).

"Arsnek, sal armoniak, and brimstoon."

Chaucer: *C. T.*, 12,726.

B. Technically:

1. Chem.: Arsenic is a triad semi-metallic element, but it may be a pentad in some of its compounds. Symbol, As; atomic weight, 75; vapor density, 150 (H=1); atomic volume, $\frac{1}{2}$; sp. gr., 5.75. It volatilizes when heated without fusing, and its vapor smells like garlic. It is obtained by distilling native alloys of arsenic and iron, copper, cobalt, or nickel; also by heating arsenious oxide (As_2O_3) with charcoal in earthen crucibles. Arsenic has a steel-gray metallic luster, is very brittle, and crystallizes in rhombohedrons. It unites with metals when fused with them, forming brittle alloys called *arsenides*. Arsenic is added to lead used for making shot, to make it run into regular globules. Metallic arsenic is often called *black arsenic*, to distinguish it from the white arsenic of shops, which is arsenious oxide. Arsenic forms two oxides, arsenious oxide (As_2O_3), and arsenic oxide (As_2O_5), but only one chloride, $AsCl_3$ (arsenious chloride). It is prepared by distilling one part of metallic arsenic with six parts of corrosive sublimate or arsenious oxide with strong hydrochloric acid. It is a colorless, oily, poisonous liquid. Arsenic unites with nascent hydrogen, forming hydride of arsenic, AsH_3 . Arsenic forms sulphides (q. v.). It also forms organic bases (see CACODYL and ARSINE). Arsenic is easily detected in cases of poisoning, but the reagents must be first tested for arsenic, as traces occur in zinc and in mineral acids. Compounds of arsenic, when heated on charcoal, give off fumes of metallic arsenic, recognized by its garlic-like smell. If heated with charcoal in a test-tube it forms a metallic ring. Arsenic is precipitated from solutions in the presence of hydrochloric acid by H_2S (see ANALYSIS), as a yellow sulphide, As_2S_3 , soluble in sulphide of ammonium, also in carbonate of ammonium. A piece of bright copper heated in a solution containing arsenious oxide or an arsenite rendered acid by hydrochloric acid, becomes covered with a gray film of metallic arsenic. Any arsenic compound treated with zinc and hydrochloric acid gives off arseniureted hydrogen (AsH_3), which burns with a gray-blue flame, and deposits metallic arsenic on a cold porcelain dish held in the flame. It may be distinguished from antimony by dissolving in hypochlorite of sodium.

Metallic arsenic, heated in a current of air, yields the characteristic octohedral crystals of arsenious acid. Nitrate of silver gives a yellow precipitate with arsenites, and a brick-red one with arseniates. Arseniates require to be reduced or heated before they are precipitated by sulphureted hydrogen. Arseniates give a white crystalline precipitate with magnesium mixture and ammonia like the phosphates.

2. *Min.*: Arsenic occurs native in rhombohedral crystals, or massive, reticulated, reniform, and stalactitic. The hardness is 3.5; the sp. gr., 5.93; the luster, sub-metallic; the color and streak, tin-white, soon tarnishing dark gray. It occurs with various metals in crystalline and schistose rocks. It is found in Norway, Hungary, Silesia, and the United States. [For other ores of it see REALGAR, ORPIMENT, &c.]

White arsenic is the same as Arsenolite (q. v.).

arsenic-glance. In Mineralogy, a variety of Arsenic.

arsenic oxide. In Mineralogy, the same as Arsenolite (q. v.).

arsenic sulphides.

Chem.: There are three sulphides— As_2S_2 , As_2S_3 , and As_2S_5 .

Disulphide of arsenic (As_2S_2) occurs native as realgar (q. v.). It can be prepared by melting metallic arsenic with sulphur. It is used to prepare Indian white fire, a mixture of twenty-four parts of niter, seven parts of sulphur, and two parts of realgar. Heated with strong sulphuric acid, As_2S_2 forms arsenious and sulphurous acids. It is used as a pigment.

Arsenious sulphide (As_2S_3) occurs native as orpiment. It is obtained in a pure state by passing hydrosulphuric acid (H_2S) through a solution of an arsenic acidified by hydrochloric acid. Arsenious sulphide is used as a pigment, called King's Yellow, also as a dye stuff.

Arsenic sulphide (As_2S_5) does not exist in a separate state, but in combination with metallic sulphides, as sulpharsenates.

ar-sên'-ic, a. [Formed from the substantive, but distinguished from it by being accented on the second syllable instead of the first. In Fr. *arsénique*; Port. *arseniaco*.]

arsenic oxide, As_2O_3 , called in the hydrated state *arsenic acid*. This compound is prepared by oxidizing arsenious oxide with nitric acid, also by passing chlorine into aqueous arsenious acid. Arsenic oxide forms three hydrates analogous to phosphoric acid—monhydrate ($HAsO_3$), dihydrate ($H_2As_2O_7$), and trihydrate (H_3AsO_4); the last forms salts isomorphous with the phosphates. Arsenic oxide, when strongly heated, is decomposed into arsenious oxide and oxygen, and is reduced to metallic arsenic by charcoal or cyanide of potassium at red heat. Sulphurous anhydride, SO_2 , reduces As_2O_5 to As_2O_3 . Hydrosulphuric acid, H_2S , passed through a warm solution, acidified with hydrochloric acid, of arsenic acid or of an arsenate, gives a precipitate of $As_2S_3 + S_2$. Arsenic oxide is used in dyeing and in preparing aniline colors. The salts of arsenic acid are called *arsenates* or *arsenites*. The salt of magnesium and ammonium is a white crystalline salt like the corresponding phosphate. Nitrate of silver gives a brick-red precipitate, and with basic acetate of lead a white precipitate, which is reduced by heating with charcoal with evolution of arsenic, recognized by the garlic-like smell.

ar-sên'-ic-al, a. [Eng. *arsenic* (adj.), and suff. -al. In Fr. & Port. *arsenical*.] Pertaining to arsenic; having arsenic as one of its constituents.

arsenical antimony. A mineral, the same as Allemontite (q. v.). It is not identical with Antimonial Arsenic (q. v.).

arsenical bismuth. [In Ger. *arsenik wismuth*.] A mineral consisting of ninety-seven per cent. of arsenic and three per cent. of bismuth. It was known to Werner.

arsenical cobalt. A mineral called also Smaltite (q. v.).

arsenical copper. A mineral, called also Condurrite (q. v.), a variety of Domeykite (q. v.).

arsenical copper pyrites. A mineral, called also White Copper.

arsenical iron. A mineral, the same as Mispickel (q. v.). There is a variety of it called *Argentiferous Arsenical Iron*.

arsenical nickel. A mineral, called also Nickel-ine (q. v.).

arsenical pyrites. A mineral, called also Mispickel (q. v.).

arsenical silver. A mineral, a variety of Dyscrasite. There is also an *Arsenical Antimonial Silver*.

arsenical silver blende. A mineral, called also Proustite (q. v.).

ar-sên'-i-câte, v. t. [Eng. *arsenic* (adj.), and suff. -ate.] To combine with arsenic.

ar-sên'-i-câ-têd, pa. par. [ARSENICATE.]

ar-sên'-i-çite, s. [Eng. *arsenic*, and suff. -ite.] A mineral, the same as Pharmacolite (q. v.).

ar-sên'-ide, s. [Eng. *arsenic* (ic); -ide.] An alloy of arsenic with a metal. These alloys are generally brittle. Metallic arsenides, when fused with niter, are converted into basic arseniates. Arsenides fused with sulphur and an alkaline carbonate yield a sulpharsenite or sulpharsenate of the alkali metal, and the other metal remains as a sulphide free from arsenic.

ar-sên'-i-ô, in compos. [Eng., &c., *arseni*(c); -o.] Containing arsenic.

arsenio-sulphuret, or sulpharsenite. Compounds of arsenious sulphide (As_2S_3) with metallic sulphides. They are generally of a red or yellow color. (See *Watt's Dict. Chem.*)

ar-sên-i-ô-sid'-êr-ite, s. [Eng., &c., *arsenio* (q. v.); and *siderite*, from Gr. *sidêros*=iron.] A mineral, called by Glocker *arsenocrocite*, it being his belief that arseniosiderite was so alike in sound to arsenosiderite that it was expedient to alter one of these terms, and arseniosiderite had the precedence in time. [ARSENOSIDERITE.] It is a fibrous species of a yellow golden color and a silky luster. Hardness, 1-2; sp. gr., 3.520-3.88. Compos.: Arsenic acid, 37.9; sesquioxide of iron, 42.1; lime, 11.1; water, 8.9=100. It occurs in France.

ar-sên'-i-ôus, a. [Eng. *arseni*(c); suffix. -ous.] Pertaining to arsenic; having arsenic as one of its constituents.

arsenious oxide, or arsenious anhydride, As_2O_3 , called in the hydrated state *arsenious acid*. It is formed by burning arsenic in the air, but is obtained by roasting arsenical, pyrites, ores of tin, cobalt, &c., which contain arsenic, in a furnace supplied with air, and condensing it. Arsenious oxide crystallizes in octohedra. It volatilizes at 218° C. If it is condensed on a hot surface it fuses into a vitreous form, which is more soluble in water than the crystalline variety. One part dissolves in twelve parts of hot and thirty parts of cold water; no definite hydrate exists. It is insoluble in alcohol and ether. Arsenious oxide is a violent irritant poison, two grains producing death, but by commencing with small doses it is possible to take even four grains without injury. The Tyrolese eat arsenic to increase the power of the respiratory organs, as they have to climb mountains. Arsenious oxide is used in medicine in small doses in skin diseases. It is rapidly absorbed into the blood when it is applied to a wound. The best antidote is obtained by adding magnesium to ferric chloride; the mixture of sesquioxide of iron and magnesia can be used at once, without washing it. Arsenious oxide reduces chromic acid, manganic acid, &c.; but it is reduced to metallic arsenic by potassium, charcoal, sulphur, and phosphorus at red heat. Arsenious oxide unites with bases forming *arsenites*, but they are not very stable compounds. Their solutions give a yellow precipitate with argentic nitrate, soluble in acetic acid, also in caustic potash; a *light-green* precipitate (Scheele's green) with cupric salts. *Aceto-arsenite* of copper (Schweinfurt green) is used as a pigment for wall papers, and is very poisonous. Arsenite of sodium, formed by dissolving As_2O_3 in caustic soda, is used to prepare the papers to poison flies. Arsenious oxide is used to poison rats and as a flux for glass, also in calico printing and for making pigments. Arsenites are decomposed by heat. Hydrosulphuric acid (H_2S) gives a yellow precipitate, As_2S_3 , from a solution of an arsenite in hydrochloric acid.

ar-sên'-ite, s. [Eng. *arsen*; -ite. In Fr. *arsénite*.] 1. *Chem.*: [See ARSENIOUS OXIDE.]

2. *Min.*: [In Ger. *arsenit*.] The same as Arsenolite (q. v.).

ar-sên'-i-ür-ët, ar-sên'-i-ür-ët, s. [Eng., &c., *arsen* (q. v.); suffix -iuret, -uret (q. v.).] Arsenic in combination with a metal. [ARSENIDE.]

ar-sên'-i-ür-ët-êd, a. [Eng. *arsenuiret*; -ed.] Combined with arsenic.

arseniureted hydrogen, arseneted hydrogen, arsenic trihydride, arsenious hydride, or arsine. A gas, obtained pure by the action of strong hydrochloric acid on an alloy of equal parts of zinc and arsenic; also formed when hydrogen is liberated in contact with arsenious oxide. Arseniureted hydrogen (AsH_3) is a colorless poisonous gas, smelling like garlic; it burns with a blue flame; its sp. gr. is 2.695.

ar-sên-ô-crô'-cite, s. [Eng., &c., *arseno* (q. v.), and *crocite*; from Gr. *krokê*=woof or weft, . . . a thread, so called from its fibrous character. In Ger. *arsenokrokite*.] A mineral, the same as Arseniosiderite (q. v.).

ar-sên'-ô-lite, s. [Eng., &c., *arseno* (q. v.), and suffix. -lite. Altered by Dana from the name *arsenite*, which is used in another sense in Chemistry.] A

mineral the same as White Arsenic, Oxide of Arsenic, and Arsenious Acid. It is isometric, occurs octahedral, usually in minute stelliform crystals, or crusts, investing other substances, or botryoidal or stalactitic. The hardness is 1.5, the sp. gr. 3.698, the luster vitreous or silky, the color white, occasionally tinged with yellowish or reddish, and the taste somewhat sweet. Composition: Oxygen, 24.24; arsenic, 75.76=100. Occurs at Wheal Sparnan, in Cornwall, England, also on the Continent.

¶ Dana has an Arsenolite Group, containing this mineral and Senarmontite. It is the first placed under "Oxyds of elements of the Arsenic and Sulphur Groups, Series ii."

ar-sên-ô-py'-rite, s. [Eng. *arseno* (q. v.), and *pyrite*, from Gr. *puritês*, s.=pyrites; adj.=of or in fire; *pur*=fire.] A mineral ranked by Dana as a distinct species, which he places in his Marcasite Group of the Pyrite Division of minerals, and calls also Mispickel. It is orthorhombic, has a hardness of 5.5-6, sp. gr. 6.0 to 6.4, a metallic luster, and a silvery-white or steel-gray color. Its composition is—arsenic, 46; sulphur, 19.6; iron, 34.4=100. It is found in England, Sweden, Norway, Germany, and North and South America. Dana divides it into Var. (1) Ordinary; (2) Cobaltic, Danaite, including Vermontite and Akontite; (3) Niccoliferous; (4) Argentiferous.

ar-sên-ô-sid'-êr-ite, s.

Min.: An obsolete name for Löllingite (q. v.). [See also ARSENOSIDERITE.]

ar-sên-oüs, a. [Eng. *arsen* (q. v.), and suff. -ous. In Port. *arsenioso*.] Pertaining to arsenic, or having it as one of its constituents. [ARSENIOUS.]

arsenous acid. The same as Arsenolite (q. v.).

***ar'se-vêr-sý, *ar'se-vêr-sie, *ar'-sýe vêr'-sýe, adv.** [Fr. *à renverser*, *à revers*; Ital. *a' rinverso*, *a' riverso*.] Reverse; turned backward.

"But the matters being turned *arsye versye*, they have the fruition of those pleasures that neuer shall decaye."—*Udal*: James, c. 5.

"*Arseversie* preposterously, perversely, without order."—*Glossog. Nova*.

ars'-foot, s. [Eng. *arse*; *foot*.] An English name for a bird—the Great-crested Grebe (*Podiceps cristatus*).

Small arsfot: The Little Grebe (*Podiceps minor*).

far'-shêen, far'-shine, s. [Russ. *arschin*; from Turkish or Tartar *arshin*, *arshim*=an ell, a yard.] A Russian measure of length, 2 feet and 4.242 inches; but the English foot of 12 inches has since 1831 been the common measure of length in Russia. (*Statesman's Year-Book*, 1875.)

ar'-sine. In compos., as a prefix or a suffix.

Chem.: A name given to AsH_3 , arsenious hydride. A name also given to the organic arsenic bases, as Triethylarsine, $As(C_2H_5)_3$, obtained by distilling an alloy of arsenic and sodium with ethyl iodide. It is a colorless, stinking liquid, boiling at 140°. It unites with ethyl iodide, forming a crystalline substance, $As(C_2H_5)_4I$, from which freshly precipitated silver oxide separates the hydrate $As(C_2H_5)_4(OH)$, a powerfully alkaline compound. [See also CODYL.]

ar'-sis, s. [In Ital. & Lat. *arsis*; Gr. *arsis*, from *airô*=to raise.]

I. *Prosody*:

1. A raising of the voice at any part of a line. It is opposed to what the Greeks called *thesis*, which was a depression of the voice.

2. The point in a line on which the stress is laid.

3. The rhythmic accent, metrical accentuation. It has been a subject of controversy whether this was produced by a higher tone, greater force, or more prolonged time.

II. *Music*:

1. The raising or depressing the hand in beating time.

2. The part of the music where this occurs.

***ars'-mêt-rîke, *ars'-mêt-îke, s.** [See ARITHMETIC.]

***ars'-nêk, s.** [ARSENIC.]

ârs'-rôpe, s. [Eng. *arse*, and *rope*.] A gut, an entrail. (*Wycliffe*, 1 *Kings* v. 9.)

ar'-sôn, (1), s. [O. Fr. *arson*, *arsion*, *arsun*; Prov. *arsum*, *arcio*, from Lat. *arsum*, sup. of *ardeo*=to burn.] The malicious and willful burning of a dwelling-house or out-house belonging to another person by directly setting fire to it, or even by igniting some edifice of one's own in its immediate vicinity. If a person, by maliciously setting fire to an inhabited house, cause the death of one or more of the inmates, the deed is murder, and capital punishment may be inflicted. When no one is fatally injured the crime is not capital, but is still heavily punishable; it is a penal offense also to attempt to set a house on fire, even if the endeavor do not succeed.

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pîne, pît, sîre, sîr, marîne; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, ûnite, rûle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

ar'-sôn (2), ***ar'-soûn**, s. [In Fr. *arçon*; Ital. *arcione*; Lat. *arcum*=a bow.] A saddle-bow.

"Between the saddle and the *arsoun*."—*Guy of Warwick*, vol. ii.

***arst**, adv. [A. S. *ærst*, *ærost*, *erest*, superl. of *ær*=before, early, first.] First.

"A sonne thou schalt *arst* habbe."

Alisaunder, 312. (S., in *Boucher*.)

art, ***ard**, v. [A. S. *arth*.] The second person sing. pres. indic. of the verb *to be*. Formerly it was used in speaking to men; now it is rarely employed except in addresses to the Deity.

"Of alle thine riche weden
Nu thu *ard* al skere."

Death, xxiii. (ed. Morris), 179, 180.

"Thou *art*, O Lord, the light and life
Of all this wondrous world we see."

Thomas Moore.

art (1), ***arte**, ***ars**, s. [In Fr. & Prov. *arte*; Sp., Port. & Ital. *art*, from Lat. *artem*, acc. of *ars*=art, of which the root is *ar*=to fit, to join.] [ARTE, v.]

A. Ordinary Language:

I. Subjectively:

1. Skill, dexterity, tact in planning and in carrying out a project.

"It is not strength, but *art*, obtains the prize."

Pope: Homer's Iliad, bk. xxiii. 383.

2. Cunning.

"More matter with less *art*."

Shakesp.: Hamlet, ii. 2.

3. Speculation.

"I have as much of this in *art* as you;
But yet my nature could not bear it so."

Shakesp.: Julius Caesar, iv. 3.

II. Objectively: The results of such skill or dexterity. *Specially*—

1. The principles of science practically carried out; a series of rules designed to aid one in acquiring practical skill or dexterity in performing some specified kind of work, manual or mental. The several arts may be arranged in two groups—(a) the *mechanical*, and (b) the *liberal or fine arts*. The *Mechanical Arts* are those which may be successfully followed by one who does not possess genius, but has acquired the facility of working with his hands which long practice imparts. Such are the arts of the carpenter, the blacksmith, the watchmaker, &c. They are often called *trades*. The *Liberal or Fine Arts* are such as give scope not merely to manual dexterity, but to genius; as music, painting, sculpture, architecture, &c.

"But it is as wrothly an error to speak of any language as an *art* in the use of its having been elaborately and methodically formed."—*Darwin: Descent of Man* (1871), vol. i., pt. i., p. 61.

2. *Spec.*: The visible expression of the sublime and beautiful.

"A thousand lamentable objects there,
In scorn of nature, *art* gave lifeless life."

Shakesp.: Rape of Lucrece, 1,374.

3. Anything planned; a device, a project, a scheme of operations.

"They employed every *art* to soothe and to divide the discontented warriors."—*Macaulay: Hist. Eng.*, ch. i.

4. Whatever has been made by man, as opposed to what is natural.

"Elsewhere we find towns, like St. Petersburg, built on artificial foundations, but the whole country of the Dutch is a work of *art*."—*Times*, Nov. 11, 1876.

"*Art* is the child of nature, yes,
Her darling child in whom we trace
The features of the mother's face,
Her aspect and her mien."

Longfellow: Keramos.

B. Technically:

Medieval Education: The "arts" signified the whole circle of subjects studied by those who sought a liberal education. This included science as well as art. The seven liberal arts, which in the palmy days of Rome plebeians were not allowed to study, were thus divided: 1. The *Trivium*—viz., Grammar, Rhetoric, and Logic. 2. The *Quadrivium*—viz., Arithmetic, Music, Geometry, and Astronomy. It is a remnant of this classification, which was in vogue as early as the fifth century, that we still speak of as the curriculum of arts at a university, and that graduates become bachelors or masters of "arts."

"Four years spent in the *arts* (as they are called in colleges) is, perhaps, laying too laborious a foundation."—*Goldsmith: On Polite Learning*, ch. xiii.

art and jure. [Eng. *art*, and Lat. *jus*, (genit. *juris*)=law, equity.] Arts [ART, B.] and jurisprudence. (*Scotch*.)

"And thereafter to remane thre yeris at the scules of *Arts and Jure*, scio that thai may have knowlege and understanding of the lawis."—*Acts James IV.*, 1496 (ed. 1814), p. 288.

art-union, s. A union of persons interested in art [ART, II. 2.], and who desire to promote it specially by purchasing the pictures of meritorious artists. These are generally distributed to the members by a lottery, which is legal in this case, though the reverse in most others. There is an art-union in London, and others exist in some of the leading provincial cities.

art (2), s. [A contraction for *artifex* (?).] The doer of an action. Used only in the Scotch law phrase, *art and part*, supposed to be a contraction for Lat. *artifex et particeps*=a doer and a participant in a specified crime. The phrase is equivalent to what in English law is called *accessory to a crime*.

"One may be guilty of a crime not only by perpetrating it, but by being accessory to or abetting it; which is called, in the Roman law, *ope et consilio*, and in ours, *art and part*. By *art* is understood the mandate, instigation, or advice, that may have been given towards committing the crime; *part* expresses the share that one takes to himself in it by the aid or assistance which he gives the criminal in the commission of it."—*Erskine: Institutes*, Bk. IV., iv. 12.

-**art**, -**ard**, as a suffix. [ARD.]

ar'-ta, s. A species of catfish found in Ceylon, having power to move on land by means of its side fins.

ar-tā-bō-trÿs, s. [Gr. *artaō*=to fasten, and *botrus*=a cluster of grapes. So called because it possesses tendrils.] A genus of plants belonging to the order Anonaceæ. *A. odoratissima*, or Sweet-scented Artabotrys, is a beautiful Chinese plant, which makes a fine covering for walls.

***ar-tā'il-yē**, s. [ARTILLERY.] (*Scotch*.)

ar-tān-thē, s. [Gr. *artaō*=to fasten or hang one thing upon another, and *anthos*=a blossom, a flower.] A genus of plants belonging to the order Piperaceæ (Pepperworts). The stems are jointed; the flowers are in spikes opposite to the leaves, which are rough, and are used with good effect for stanching blood. *A. elongata*, in Peru, furnishes a kind of cubeb; and *A. adimia*, in Brazil, is a pungent, aromatic, and stimulant.

***ar-tā'-tion**, s. [Low Lat. *artatio*, from Classical Lat. *arto*, *arcto*=to press close.] [ARTE, v.] Exhortation, incitement, encouragement. (*Scotch*.)

"Gaif him gret *artation* to purseu the third weird."—*Bellenden: Cron.*, bk. xii., c. 3. (*Jamieson*.)

art'e, ***arc'te**, v. t. [O. Fr. *arter*=to force; Lat. *artus*, *arcus*=pressed together; hence close, confined, from *arto*=to shut up, to confine.] To constrain, to force, to urge, to compel, to prompt.

"And over al this, myche more he thought
What to speke, and what to holdyn inne,
And what to *artyn*."

Chaucer: Troilus and Creseide, i. 389-91.

"Love *arted* me to do my observaunce
To his estate, and done him obeisaunce."

Chaucer: Court of Love, 46-7.

***ar'-těl**, s. [Russian (?).]

Comm.: An association of laborers who became responsible as a body for the honesty of each individual member of the brotherhood. They placed their earnings in a common fund, whence each received enough for his support, the rest being distributed among the members at the close of the year. Many were Russian crown serfs, chiefly in the province of Archangel.

***ar'-těl-riēs**, s. pl. [ARTILLERY.]

Ar-tē-mī-ā, s. [Gr. *Artemis*, a goddess usually identified with the Roman Diana.]

Zool.: A genus of Entomostracans belonging to the family Branchipodidæ. The *A. salina*, or Brine Shrimp, loves water so salt that most other marine animals die in it.

Ar-tēm-īs, s. [Lat. *Artemis*; Gr. *Artemis*.]

1. *Class. Mythology*: A celebrated Grecian goddess, worshiped in Arcadia and elsewhere. She corresponded to the Roman Diana (q. v.).

2. *Astron.*: An asteroid, the 105th found. It was discovered by Watson on Sept. 16, 1868.

ar-tē-mīš'-ī-ā, s. [Lat. *artemisia*, and Gr. *artemisia*=wormwood. Called after Artemis, the Greek goddess corresponding to the Roman Diana.] Wormwood, Southernwood, or Mugwort. A genus of plants belonging to the order Asteraceæ, or Compositæ. It contains four British species—the *A. campestris*, or Field Southernwood; the *A. vulgaris*, or Common Mugwort; the *A. absinthium*, or Common Wormwood; and the *A. maritima*, or Sea-wormwood. The Common Wormwood grows luxuriantly among the sage brush of the Rocky Mountain regions. [ABSINTHIUM, ABSINTHIC, WORMWOOD.]

"Where Cuckow-pints and Dandelions sprung,
(Gross names had they our plainer sires among),
There Arums, there Leontodons, we view,
And *Artemisia* grows where wormwood grew."

Crabbe's Poems: The Parish Register.

ar-tēr-i-ā, **tar-tēr-i-ūm**, s. Lat. *arteria*, *tarterium*; Gr. *artēria*=(1) the windpipe, (2) an artery.]

Anat.: An artery.

¶ Not used as the ancient Greeks did, for the windpipe.

ar-tēr-i-āl, a. [Fr. *artériel*; Sp. & Port. *arterial*; Ital. *arteriale*.] Pertaining to an artery or to arteries; contained in an artery or arteries.

"... on the opposite sides of those air-bladders, along the surface of which this *arterial* tube creeps."—*Arbuthnot*.

Arterial blood is scarlet in color. It is obtained from the left side of the heart, and from the arteries. (*Todd & Bowman: Physiol. Anat.*, vol. ii., pp. 290, 291.)

Arterial navigation: Navigation through the interior of a country by means of estuaries, rivers, inland lakes, canals, &c., which, to a certain extent, present an analogy to the arteries in the bodily frame.

ar-tēr-i-āl-i-zā-tion, s. [Eng. *arterialize*; -*ation*.] The process of converting venous blood which is dark-red, or even almost black, into arterial blood, which is bright scarlet. This is done by chemical action; the venous blood, while passing through the lungs, absorbing oxygen from the air inhaled, and giving forth the carbonic acid which is breathed forth in succeeding expirations.

ar-tēr-i-āl-i-ze, v. t. [Eng. *arterial*; -*ize*.] To convert venous into arterial blood. [ARTERIALIZATION.] (*Prout*.)

ar-tēr-i-āl-i-zed, *pa. par.* [ARTERIALIZE.]

ar-tēr-i-āl-i-z-ing, *pr. par.* [ARTERIALIZE.]

ar-tēr-i-ōl'-ō-gÿ, s. [In Sp. *arteriología*; Fr. *artériologie*; Port. & Ital. *arteriologia*; Gr. *artēria*=an artery, and *logos*=a discourse.] A discourse regarding the arteries. The part of medical science which treats of the arteries. (*Dunghlison*.)

ar-tēr-i-ōt'-ō-mÿ, s. [In Fr. *artériotomie*; Sp., Port., & Ital. *arteriotomia*; Lat. *arteriotomia*; Gr. *arteriotomia*, from *arteriotomēō*=to cut the wind pipe or artery; *artēria*=artery, and *tomē*=a cutting; *temnō*=to cut.] The operation of making an incision in an artery and drawing blood.

ar-tēr-i-tis, s. [Eng. *arter(y)*; -*itis*.] Inflammation occurring in the arteries. It may be acute or chronic. Its anatomical characters are redness of the internal membrane of the heart and arteries, an effusion of plastic, pseudo-membranous lymph on its surface, and thickening and ulceration of its substance. In chronic, which is much more common than acute inflammation, the internal membrane of the artery is thickened, softened, and colored a deep, dirty red, especially in the vicinity of calcareous and other degenerations. (*Dr. J. Hope: Cycl. Pract. Med.*)

ar-tēr-ÿ, s. [Ger. *arterie*; Fr. *artère*; Sp., Port., Ital., and Lat. *arteria*; Gr. *artēria*=the windpipe or trachea; (2) an artery, from *aēr*=air, and *tērēō*=to watch over; *tēros*=a watch, a guard. So called because the ancients, finding that, in the dead bodies which they examined, the arteries were empty of blood, took up the very erroneous notion that they were designed for the circulation of air through the system. Thus Cicero says, "Spiritus ex pulmone in cor recipitur et per arterias distribuitur, sanguis per venas." (Cicero, *De Nat. Deorum*, ii. 55, 138.) This error was not shaken by Herophilus.] One of the vessels designed to convey the blood from the heart. The arteries are long cylindrical tubes, with three coats, an external tunic commonly called the cellular coat, a middle or fibrous tunic or coat, and an epithelial tunic. The coating of the arteries is very elastic. The largest arteries which leave the heart are the aorta and the pulmonary artery; both spring from the base of the heart in front. They branch and anastomose to a large extent. The contractility of the arteries forces the blood to the extremities from the heart, the valves of which prevent its return. "The prominent difference between blood drawn from the arteries and that from the veins is to be found in the bright scarlet color of the former and the dark red, almost black, of the latter." (*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 310.)

"The chief arteries so frequently run in abnormal courses that it has been found useful for surgical purposes to calculate from 12,000 corpses how often each course prevails."—*Darwin: Descent of Man*, vol. i. (1871), pt. i., ch. iv.

Ar-tē-šī-ān, a. [In Fr. *Artésien*.] Pertaining to Artois, an old province of France. [ARRAS.]

Artesian well. A well of a type copied from those in use in Artois, though it is said that similar ones previously existed in Italy, Egypt, China, and probably elsewhere. If at any place the strata bend into a trough or basin, with its concavity upward, and if two impermeable beds are separated by one or more strata which water can penetrate, then the rain will percolate into the porous beds at any point.

bōil, bōÿ; pōut, jōwl; cat, çell, chorus, -cian, -tian = shān. -tion, -sion = shūn;

çhin, bench; go, gem; thin, ðhis; sin, aş; expect, Xenophon, exist. pn = f. -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

where an outcrop takes place, and, prevented from moving far up or down by the impermeable strata, will accumulate till it reaches the outcrops. If now a bore he made in the center of the basin the water will be forced up by that standing at a higher level than itself, and may reach or even rise above the surface of the ground. Artesian wells now exist at various points in Europe and America.

art'-fûl, *a.* [Eng. *art*, and *-ful*.]

I. *Of persons*: Disposed to have recourse to schemes contrived with art; cunning.

"While a large party was disposed to make her an idol, she was regarded by her two artful servants merely as a puppet."—*Macaulay: Hist. Eng.*, ch. xv.

II. *Of things*:

1. Performed with art.

"The last of these was certainly the most easy; but, for the same reason, the least artful"—*Dryden*.

2. Crafty, cunning.

"... the long-delayed and artful revenge of various animals."—*Darwin: Descent of Man*, pt. I., ch. ii.

3. Artificial as opposed to natural.

art'-fûl-lý, *adv.* [Eng. *artful*; *-ly*.]

1. In a manner to evince art; in an artful manner; craftily.

2. By the operation of art, as opposed to naturally; by the operation of nature.

"He knows indeed that, whether dress'd or rude, Wild without art, or artfully subdued."

Cowper: Retirement.

art'-fûl-nëss, *s.* [Eng. *artful*; *-ness*.] The quality of being artful.

*1. Skill.

"Consider with how much artfulness his bulk and situation is contrived, to have just matter to draw round him these massy bodies."—*Cheyne*.

2. Cunning. (*Johnson*.)

ar-thân'-it-in, *s.* [From *Arthanita officinalis*, a plant now called *Cyclamen Europæum*.]

Chem.: A crystalline substance which may be extracted from the roots of the *Cyclamen Europæum*, *Primula veris*, *Anagallis arvensis*, and *Limosella aquatica*. It is called also *Cyclamin*. It is purgative in its effects, besides producing vomiting. (*Watts: Chem.*)

ar-thrit'-ic, **ar-thrit'-ic-al**, *adj.* [Lat. *arthriticus*; Gr. *arthritikos*, from *arthron*=a joint.]

†1. Relating to the joints.

"Serpents, worms, and leeches, though some want bones, and all extended articulations, yet have they arthritical analogies; and, by the motion of fibrous and muscular parts, are able to make progression."—*Browne: Vulgar Errors*.

2. Relating to the gout, as affecting the joints; gouty.

"Oh, may I live exempted (while I live Guiltless of pampered appetite obscene) From pangs arthritic, that infest the toe Of libertine Excess." *Cowper: Task*, bk. i.

ar-thrî'-tis, *s.* [Lat. *arthritis*; Gr. *arthritis*=belonging to the joints.] Disease of the joints, especially gout. (*Quincy*.)

ar-thrô'-dî-a, *s.* [Gr. *arthrodia*, from *arthron*=a joint; the obsolete radical form of *arâriskô*=to joint, to fit together.]

Anat.: A particular kind of articulation. (See example.)

"The varieties of the diarthrodial joint are as follow:—(a) *Arthrodia*. In this species the surfaces are plane, or one is slightly concave, and the other slightly convex. The motion is that of gliding, limited in extent and direction only by the ligaments of the joint, or by some process or processes connected with the bones."—*Todd & Bowman: Physiol. Anat.*, i. 134, 136.

ar-thrô'-dî-al, *a.* [Eng. *arthrodia*(a); *-al*.] Pertaining to the kind of articulation called *arthrodia* (q. v.).

"Arthrodial joints are generally provided with ligaments."—*Todd & Bowman: Physiol. Anat.*, i. 136.

ar-thrô'-dic, *a.* [Eng. *arthrodia*(a); *-ic*.] The same as *ARTHRODIAL* (q. v.).

ar-thrô'-dýn'-ý-a, *s.* [Gr. *arthron*, a joint, and *odynê*=pain.] Pain in the joints; chronic rheumatism.

ar-thrô'-dýn'-ic, *a.* [Eng. &c., *arthrodynia*(a); *-ic*.] Pertaining to arthrodynia.

ar-thrô'-gäs'-tra, *s. pl.* [Gr. *arthron*=a joint, and *gaster*, genit. *gasteros*, by syncope *gastros*=the belly.] In Prof. Huxley's classification, an order of Arachnida (Spiders), in which the abdomen is distinctly divided into somites—i. e., into segments—each with an upper and lower pair of appendages. The leading genera are *Scorpio*, *Chelifer*, *Phrynus*, *Phalangium*, and *Galeodes*. (*Huxley: Classif. of Animals*, 1869, p. 123.)

ar-thrôg'-ra-phý, *s.* [Gr. *arthron*=a joint, and *graphê*=description.]

Anat.: A description of the joints.

ar-thrô'-lô'-bl-ûm, *s.* [Gr. *arthron*=a joint, and *lôhos*=a legume.] Joint-vetch. A genus of plants belonging to the Leguminous order.

ar-thrôl'-ô-gý, *s.* [Gr. *arthron*, and *logos*=a discourse.] A discourse concerning the joints; that part of anatomical science which treats of the joints.

ar-thrô'-nôm'-al-ûs, *s.* [Gr. *arthron*=a joint, and *anômalos*=uneven, irregular; *an*, priv., and *homalos*=even, level; *homos*=one and the same.] *Zool.* A genus of centipedes. The species *A. longicornis* is phosphorescent.

ar-thrôp'-ô-da, *s. pl.* [Gr. *arthron*=a joint, and *pous*, genit. *podos*=a foot. Animals with jointed feet.]

Zool.: A subdivision of the Annulosa, or Articulata, containing the classes belonging to that subkingdom which are of the highest organization. The body is very distinctly divided into rings or segments, sometimes, as in the Myriapoda (Centipedes and Millepedes), mere repetitions of each other, but more frequently with some of them differentiated for special ends. In general the head, thorax, and abdomen are distinct. Under the subdivision Arthropoda are ranked in an ascending series the classes Myriapoda, Crustacea, Arachnida, and Insecta.

ar-thrô'-sis, *s.* [From Gr. *arthron*=a joint.]

Anatomy: Articulation.

ar'-thrô'-spôre, *s.* [Gr. *arthron*=a joint, and Eng. *spore*.] A spore formed by fission, as opposed to endospore.

ar-thrôs'-pôr-ous, *a.* [Eng. *arthrospor*(e); *-ous*.] Forming spores by fission, as, *arthrosporous bacteria*.

ar'-ti-âd, *s.* [Gr. *artios*=complete; even, opposed to odd.]

Chem.: A name given to elements of even equivalency, as dyads, tetrads, &c.; those of uneven equivalency, as monads, triads, &c., are called perissads [Gr. *perissos*=uneven].

***ar'-tic**, ***ar'-tick**, *a.* [ARCTIC.] The same as ARCTIC (q. v.).

"But they would have winters like those beyond the arctic circle; for the sun would be 80 degrees from them."—*Browne*.

ar'-ti-çhòke, *s.* [In Sw. *ärtstocka*; Dan. *artis-chok*; Dut. *artisjok*; Ger. *artischoke*; Fr. *artichaut*; Sp. *artichoka*; Ital. *articiocco*, *carciofo*, *carciofano*, or *corciofalo*; O. Ital. *archiciocca*.] *Cynara Scolymus*, a plant belonging to the order Asteraceæ, or Composites, the sub-order Tubulifereæ, and the section Carduineæ, the same to which the thistles belong. It considerably resembles a huge thistle. The receptacle on which the florets are situated, and the fleshy bases of the scales are eaten. The modern Arabs consider the root as aperient, and the gum, which they term *kunkirzeed*, as an emetic. Artichokes were introduced into England early in the sixteenth century.

"Artichokes grew sometimes only in the isle of Sicily, and since my remembrance they were so dainty in England that usually they were sold for crowns apiece . . ."—*Moffatt: Health's Improvement*.

† The Jerusalem Artichoke, in Ger. *erdartischoke*, is not from Jerusalem, and is not an artichoke. It is an American sunflower (*Helianthus tuberosus*). The word *Jerusalem* arose from a mispronunciation or corruption of the Italian *girasole*, meaning *turner to the sun*, which is the most obvious peculiarity of the *Helianthus* genus. The tuberous roots of this species have occasionally been used as a substitute for potatoes. (HELIANTHUS, SUNFLOWER.)

ar'-tî-cle (cle as *kêl*), ***ar'-tý-cûle**, *s.* [In Sw., Dan., Dut., & Ger. *artikel*; Fr. *article*; Sp. & Port. *articulo*; Ital. *articolo*; Lat. *articulum*=(1), a little joint, a joint, a knuckle; (2) *Fig.*, (a) a member of a discourse, (b) a moment of time; dimin. of *artus*=a joint: Gr. *arthron*.] [ARTHRDIA.]

Essential meaning: A separate portion of anything connected, in some way, with the other portions of the same thing. *Specially*—

A. Ordinary Language:

1. Lit. Of material things:

†1. *Gen.*: A separate portion of a material thing. [B. 1., Bot.]

2. Any particular commodity or material substance. (Most frequently used of things manufactured, or of things exposed for sale.)

"There were few articles important to the working man of which the price was not, in 1685, more than half of what it now is."—*Macaulay: Hist. Eng.*, ch. iii.

"The large farmer has some advantage in the article of buildings."—*J. S. Mill: Polit. Econ.*, vol. i., bk. i., ch. ix., § 4.

II. *Fig. Of things essentially immaterial*:

1. One of a series of facts, principles, or propositions presented with logical precision and clearness in their natural order. When these are all viewed as a whole, the plural is used.

(a) (Reduced to writing.)

(b) (Not necessarily reduced to writing.)

"*Cæs.* You have broken

The article of your oath; which you shall never Have tongue to charge me with."

Shakesp.: Antony and Cleopatra, ii. 2.

"... each article of human duty."—*Paley*.

2. One distinct portion of a printed newspaper or other periodical too important to be called a paragraph, and not consisting simply of a reported speech.

"For the copyright Dryden received two hundred and fifty pounds, less than in our days has sometimes been paid for two articles in a review."—*Macaulay: Hist. Eng.*, ch. iii.

† A leading editorial is one of the chief articles in a newspaper. It is supposed to be written by, or at least express the views of, the editor, and is accorded larger and more conspicuous type than that used in most other parts of the paper.

3. A point of time: in the phrase, "in the article of death," a translation of the Latin *in articulo mortis*, meaning=at the exact moment of death.

B. Technically:

I. *Bot.*: The part of an articulated stem between the joints.

II. *Gram.*: A part of speech consisting of the particles *a*, *an*, or *the*, placed before a noun to impart to it a more or less limited signification. In Greek the article is thus written: *o*, *e*, *to*; in Fr. *le*, *la*, in the sing., and *les* in the pl.; in Ital. *il*, *lo*, *la*. In Eng. *a* or *an*, the former used before a consonant sound, and the latter before a vowel one, is called the *indefinite article*, because it does not define or limit the exact person or thing to which it points; and *the* is called the *definite article*, because it does thus define or limit the person or thing which it indicates. [A, AN, and THE.]

"The articles are of great value in our language."—*Bain: Higher English Grammar* (ed. 1874), p. 33.

III. *History and Law*:

1. *English History and Law*:

(a) *Articles of the Navy*: Certain express regulations, first enacted soon after the Restoration, but since modified, which enumerate punishable offenses in the navy, and annex specific penalties to each. (*Blackstone: Comment.*, bk. i., ch. 13.)

(b) *Articles of War*: Similar regulations for the army of much later origin, the delay being caused by the reluctance with which Parliament admitted the principle of a standing army. [ARMY, 1. f.]

(c) *Articles of the Peace*: A recognition or obligation whereby certain parties acknowledge themselves indebted to the Crown in a certain sum, but to be void if they appear in court on a certain day and meanwhile keep the peace. (*Blackstone: Comment.*, bk. iv., ch. 18.)

2. *Old Scottish History and Law*:

**Lords of the Articles*. (See example.)

"It had long been the custom of the Parliaments of Scotland to entrust the preparation of Acts to a select number of members who were designated as the Lords of the Articles."—*Macaulay: Hist. Eng.*, ch. xiii.

3. *American Hist. & Law. Articles of Confederation*: The compact entered into by the thirteen States, the confederation of which formed the United States of America. These "Articles" were adopted on March 1, 1781, and remained the supreme law till 1789. (*Goodrich & Porter*.)

IV. *Theology, Church History, Civil History, and Law. The Thirty-nine Articles*: "Articles of Religion," amounting to that number, framed and adopted as the recognized creed of the English Church during the progress of the Reformation struggle, having been "agreed upon by the archbishops of both provinces and the whole clergy," first in a Convocation held in 1562, and then in another in 1571. The ratification of successive sovereigns was also given, the first of them, in conformity with the spirit of the age, adding, "from which" [Doctrine and Discipline of the Church of England now established] "We will not endure any varying or departing in the least degree." The Thirty-nine Articles give prominence to the distinctive tenets which sever the Church of England from that of Rome. They assail the supremacy of the Pope (Art. 37); the asserted infallibility of the Church of Rome and of General Councils (Arts. 19 & 21); the enforced celibacy of the clergy (Art. 32); the denial of the cup to the laity (Art. 30); transubstantiation (Art. 28); and five out of seven of the alleged seven sacraments (Art. 25); purgatory and relics; the worship of images (Art. 22); and finally, works of supererogation (Art. 14). The Thirty-nine Articles agree in doctrine, as distinguished from discipline, with those of the other Protestant communions at home and abroad. Assent to the Articles is required from every one who aspires to the office of a clergyman and pastor in the English Church. Till lately a similar subscription was demanded from every student taking a degree at one of the two oldest English universities, but the Act 17 & 18 Vict., c. 81, removed this disability from Oxford, and the 19 & 20 Vict., c. 83, did so from

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôr, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = ē; ey = â. qu = k.

Cambridge. These acts made it possible for Non-conformist students who had scruples against signing the Thirty-nine Articles to share the honors of the University. [DEGREES, SUBSCRIPTION.]

V. Commercially:

1. *Articles of Association*: Rules, specifications, &c., framed as the basis of commercial agreements.
2. The agreement or conditions on which an apprentice, &c., is articulated.

ar-ti-cle (cle=*kɛl*), *v. t. & i.* [From *article*, *s.* In Fr. *articuler*.]

A. Transitive:

1. To draw up in the form of articles, or a statement of particulars, either for a legal accusation against one, or for some similar purpose.

"He whose life seems fair, yet if all his errors and follies were *articled* against him, the man would seem vicious and miserable."—Taylor: *Rule of Living Holy*.

2. To bind an apprentice to a master by a covenant, agreement, articles, or stipulations.

B. Intransitive: To make a covenant with, to stipulate with.

"If it be said, God chose the successor; that is manifestly not so in the story of Jephtha, where he *articled* with the people, and they made him judge over them."—Locke.

ar-ti-cled (cled=*kɛld*), *pa. par. & a.* [ARTICLE, *v.*]

articled clerk. An apprentice bound by articles requiring him to serve an attorney or solicitor for a certain time on condition of being instructed in his profession.

ar-tic-u-lar, *a.* [In Fr. *articulaire*; from Lat. *articularis*.] Pertaining or relating to the joints.

"... the head of the thigh-bone, an *articular* eminence."—Todd & Bowman: *Physiol. Anat.*, vol. i., p. 105.

"... the acetabulum, an *articular* depression . . ."—*Ibid.*, p. 105.

ar-tic-u-lar-ly, *adv.* [Eng. *articular*; -ly.] In an articular manner; with distinct articulation of each word and letter. (*Huloet*.)

ar-tic-u-lā-ta, *s. pl.* [Lat. *n. pl.* of *articulatus* =divided into joints, *pa. par.* of *articulo*=to divide into joints.] [ARTICLE.] Cuvier's name for the third great division or sub-kingdom of animals. The species so designated have their body divided into rings, with the muscles attached to their interior. Their nervous system consists of two cords extending along the under part of their body, and swelled out at regular intervals into knots or ganglia. One of these is the brain, which is not much larger than the other ganglia. Cuvier divided the *Articulata* into four classes, arranged in an ascending order—the *Annelida*, the *Crustacea*, the *Arachnida*, and the *Insecta*. Professor Owen includes under the province *Articulata* four classes—(1) *Annulata*, (2) *Cirripedia*, (3) *Crustacea*, and (4) *Insecta*. With the insects proper he combines also the *Myriapoda*, or Centipedes, and the *Arachnida*, or Spiders. (Owen: *Palæont.*, 1868.) The name *Articulata* (jointed animals) being somewhat indefinite, *Annulosa* (ringed animals) has been substituted for it by Macleay and other naturalists. Prof. Huxley divides Cuvier's *Articulata* into *Annuloida* and *Annulosa* (*q. v.*). (See also *ARTHROPODA*.)

ar-tic-u-lāte, *v. t. & i.* [From Lat. *articulatum*, supine of *articulo*=(1) to divide into joints, (2) to utter distinctly.]

A. Transitive:

1. *Lit.*: To connect by means of a joint; to joint. "Although the foot be *articulated* to the leg . . ."—Owen: *Classif. of the Mammalia*, p. 72.

II. Figuratively:

- *1. To draw up in articles. "These things indeed you have *articulated*, Proclaim'd at market-crosses, read in churches."—Shakesp.: *1 Henry IV.*, v. 1.
2. To enunciate, to utter, to pronounce. "Parisian academists, in their anatomy of apes, tell us, that the muscles of the tongue, which do most serve to *articulate* a word, were wholly like to those of man."—Ray: *Creation*.

B. Intransitive:

1. To joint; to form a joint with.
2. To treat with; to attempt to form articles of agreement with.

"Send us to Rome
The best with whom we may *articulate*,
For their own good and ours."

Shakesp.: *Coriolanus*, i. 9.

3. To utter distinctly separated, and therefore intelligible sounds; to speak.

"The prisoner, stupefied by illness, was unable to *articulate*, or to understand what passed."—Macaulay: *Hist. Eng.*, ch. v.

ar-tic-u-lāte, *a.* [From Lat. *articulatus*, *pa. par.* of *articulo* (see the verb). In Sp. *articulado*; Ital. *articolato*.]

A. Ordinary Language:

1. Divided into joints.
- *2. Put into the form of articles.

"Henry's instructions were extremely curious and *articulate*, and, in them, more articles touching inquisition than negotiation; requiring an answer in distinct articles to his questions."—Bacon.

3. So uttered as to be intelligible.

(a) *Lit.*: So spoken that each sound is separated from the rest, and each word and letter distinctly enunciated. The gift of doing this is a special glory of man; the inferior animals do not possess it in any considerable degree.

"Those were his last *articulate* words."—Macaulay: *Hist. Eng.*, ch. xxv.

(b) *Fig.*: Intelligible, however uttered or communicated. In this sense it may be applied even to a written document as well as an oral communication.

"Wherever *articulate* contemporary declarations have been preserved, ethnological is not less certain than other sorts of history."—Lewis: *Early Rom. Hist.*, ch. viii., § 1.

B. Technically:

Scots Law. Articulate Adjudication: An adjudication proceeding at the instance of a single creditor for several debts, each placed quite distinct from the other, so that if the evidence for one fail, that for the other may not be damaged. [ADJUDICATION.]

"This is called an *articulate adjudication*, and is strictly a congeries of single adjudications carried on in one action to avoid expense."—Bell: *Comment. Law of Scotland*, 6th ed., 943.

ar-tic-u-lā-tēd, *pa. par. & a.* [ARTICULATE, *v.*]

A. Ord. Lang.: In senses corresponding to those of the verb.

"They would advance in knowledge, and not deceive themselves with a little *articulated* air."—Locke.

B. Technically:

1. *Zool.*: Having joints.

Articulated Animals: A common English name for the animals called in Latin *Articulata* and *Annulosa* (*q. v.*).

2. *Bot.*: (1) United to another body by a real or apparent articulation. (2) Possessed of joints, of which the separate portions at a certain stage of development fall asunder, or at least may be readily separated, as the joints of some legumes.

ar-tic-u-lāte-ly, *adv.* [Eng. *articulate*; -ly.]

1. In the form of a joint; after the manner of a joint.
2. In the form of articles or separated particulars; article by article.
3. With distinct enunciation of the separate sounds, and therefore intelligibly; or intelligibly, without reference to sounds at all.

"... *articulately* pronounced; omitting no letter or syllable."—Elyot: *Governour*, bk. i., ch. 5.

"The secret purpose of our heart no less *articulately* spoken to God, who needs not our words to discern our meaning."—Decay of Piety.

ar-tic-u-lāte-ness, *s.* [Eng. *articulate*; -ness.] The quality of being articulate.

ar-tic-u-lā-tīng, *pr. par.* [ARTICULATE, *v.*]

"... the *articulating* surfaces are generally flattened."—Owen: *Classif. of the Mammalia*, p. 12.

ar-tic-u-lā-tion, *s.* In Ger. *artikulation*; Fr. *articulation*; Sp. *articulacion*; Port. *articulação*; Ital. *articolazione*. From Lat. *articulationem*, acc. of *articulatio*=the putting forth of new joints or nodes.

A. Ordinary language.

I. The act of articulating. *Spec.*, the act of forming sounds distinctly separated.

"I conceive that an extreme small, or an extreme great, sound cannot be articulate; but that the *articulation* requireth a mediocrity of sound."—Bacon.

II. The state of being articulated.

1. *Lit.*: The state of being jointed. [B., *Zool.*, *Bot.*]

2. The state of being articulately sounded, so as to be intelligible, or simply of being intelligible, without indication how.

"The looks and gestures of their griefs and fears
Have all *articulation* in his ears."

Cowper: *The Needless Alarm*.

III. That which is articulated. [B., 1, *Anat.*, &c.; 2, *Bot.*]

B. Technically:

1. *Anat.*, *Zool.*, *Painting*, *Sculpture*, &c.: A joint; the particular kind of connection between two bones. This is of three kinds, *Diarthrosis*, *Synarthrosis*, and *Symphysis* (*q. v.*).

"A joint, or *articulation*, may be defined to be the union of any two segments of an animal body, through the intervention of a structure or structures different from both."—Todd & Bowman: *Physiol. Anat.*, i. 131.

2. *Bot.*: The nodes or joints of an articulated stem.

3. *Gram.*: A consonant, so called because it is formed by the bending of the organs of voice into the joint as closing the lips, &c.

ar-tic-u-lā-tōr, *s.* [Eng. *articulat(e)*, and suff. -or.] One who articulates. (*Boswell*.)

ar-tic-u-lite, *s.* [Lat. *articulus*=a little joint, and *lite*=Gr. *lithos*=stone.] A mineral, called also *Itacolumite*, a variety of *Quartz* (*q. v.*).

ar-ti-fice, *s.* [Fr. *artifice*; Sp. & Port. *artificio*; Ital. *artificio*, *artifizio*=(1) handicraft, trade, art, (2) skill, ingenuity, (3) theory, system, (4) dexterity, skill; from *artificem*, acc. of *artifex*=an artist or an artificer; *ars*=art; *facio*=to make.] [ARTIFICE.]

I. The act or practice of making anything by art.

1. *Lit.*: A handicraft, a trade; art in general.

"... and as ye see a thing made by *artifice* perish."—The Golden Boke, ch. 42. (*Richardson*.)

2. *Fig.*: Skill.

"... such as illustrate the *artifice* of its [the sun's] Maker."—Browne: *Vulgar Errors*, bk. vi., ch. v. (*Richardson*.)

II. Anything contrived by art; anything skillfully devised.

1. (*Not necessarily in a bad sense*): Anything framed, devised, or contrived by man, as contradistinguished from that which emanates more directly from God.

"Rhetoric is *artifice*, the work of man."—Cowper: *Expostulation*.

2. (*In a bad sense*): A stratagem, a trick, a piece of low cunning.

"The ringleaders, the men of rank, fortune, and education, whose power and whose *artifices* have led the multitude into error, are the proper objects of severity."—Macaulay: *Hist. Eng.*, ch. v.

ar-tif-i-cēr, *s.* [Eng. *artificer*; -er. In Fr. *artificier*; Sp., Port., and Ital. *artifice*. From Lat. *artificem*, acc. of *artifex*=(1) one who exercises a liberal art, an artist; (2) a maker of anything: *ars*=art, and *facio*=to make.]

1. *Lit.*: One who is proficient in, or practices, any art. (Originally applied especially to one practicing a liberal art, but now generally to a simple artisan.)

"... for all manner of work to be made by the hands of *artificers*."—1 Chron. xxix. 5.

II. Fig.: One who frames, contrives, or devises anything of whatever kind; a contriver, a deviser, a forger, a framer.

1. *In a good sense*; (Used of God, the great Framer of all things; rarely of man.)

"But by the great *Artificer* endued
With no inferior power."

Wordsworth: *Excursion*, bk. iv.

2. *In a bad sense*: One who devises anything bad. *Spec.*, a cunning person, a trickster.

"He, soon aware,
Each perturbation smooth'd with outward calm,
Artificer of fraud! and was the first
That practis'd falsehood under saintly show."

Milton: *P. L.*, bk. iv.

ar-tif-i-cēr-shīp, *s.* [Eng. *artificer*; suff. *ship*.] The state of being an artificer; the whole body of artificers taken collectively.

ar-ti-fic-iāl (ç as sh), *a. & s.* In Fr. *artificiel*; Sp. & Port. *artificial*; Ital. *artificiale* and *artifiziale*; Lat. *artificialis*, from *artificium*.] [ARTIFICE.]

A. As adjective:

I. Ordinary Language:

1. Framed or produced by art instead of by nature; in some way modified by art rather than by nature.

(a) Framed, made, or produced by art instead of by nature.

"*Artificial* fountains spouted among the flower-beds . . ."—Macaulay: *Hist. Eng.*, ch. xi.

(b) With which art has had to do. *Spec.*, cultivated, as opposed to growing or arising spontaneously. (It may be used in a good sense, as an "artificial grass"=a cultivated one; or in a bad sense, as in the subjoined example.)

"They swathe the forehead, drag the limping limb,
And vex their flesh with *artificial* sores."

Cowper: *Task*, bk. i.

(c) Not conformable to nature; unnatural, as opposed to natural.

"These seem to be the more *artificial*, as those of a single person the more natural governments."—Temple.

2. Contrived with some measure of art or skill, as opposed to what is artless, undesigned, or unskillful.

(a) (*In a good, or at least, in an indifferent sense*): Ingenious.

(b) (*In a bad sense*): Containing or involving some kind of trickery.

bōl, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bɛl, dɛl.

II. Technically:

1. *Rhet. Artificial arguments*: Proofs on considerations which arise from the genius, industry, or invention of the orator. They are thus called to distinguish them from laws, authorities, citations, and the like, which are said to be *inartificial* arguments.

2. *Astron. Artificial horizon*. [HORIZON.]

3. *Mathematics*:

(a) *Artificial lines*: Lines, on a sector or scale, so contrived as to represent the logarithmic sines and tangents; which, by the help of the line of numbers, solve, with tolerable exactness, questions in trigonometry, navigation, &c.

(b) *Artificial numbers*: Logarithms.

4. *Bot. The artificial system of classification*: That of Linnæus, founded mainly on the number of the stamens and pistils; the chief aim being to facilitate the naming of specimens, and not to rank together the plants which are most closely akin. The Natural as opposed to the Artificial System makes this latter object its special one, and the classification of Linnæus, which in its day rendered immense service in popularizing Botany, has now all but sunk into disuse.

†*B. As substantive*: Anything produced by art.

"There ought to be added to this work many and various indices, besides the alphabetical ones; as, namely, one of all the *artificial* mentioned in the whole work."—*Sir W. Petty: Advice to S. Hartlib*, p. 19.

†*ar-tī-fīc-i-āl-i-tŷ* (ç as sh), *s.* [Eng. *artificial*; *-ity*.] The quality of being artificial.

"Trees in hedges partake of their *artificiality*."—*Shenstone*.

ar-tī-fīc-i-āl-i-ze (ç as sh), *v. t.* [Eng. *artificial*; *-ize*.] To render artificial.

ar-tī-fīc-i-āl-i-ŷ (ç as sh), *adv.* [Eng. *artificial*; *-ly*.]

*1. Artfully, skillfully, with contrivance.

"How cunningly he made his faultiness less; how *artificially* he set out the torments of his own conscience."—*Sidney*.

2. By art, not by nature.

"The tail of the giraffe looks like an *artificially* constructed fly-flapper."—*Darwin: Origin of Species* (ed. 1859), ch. vi., p. 195.

ar-tī-fīc-i-āl-nēss (ç as sh), *s.* [Eng. *artificial*; *-ness*.] The quality of being artificial. (*Johnson*.)

**ar-tī-fīc-i-ōūs* (c as sh), *a.* [Lat. *artificiosus*; Fr. *artificieux*.] The same as *ARTIFICIAL* (q. v.). (*Johnson*.)

**ar-tīl-i-ze*, *v. t.* [Eng. *art*, formed on the analogy of *naturalize*: see example.] To make to resemble art. (Used of operations upon nature.)

"If I was a philosopher," says Montaigne, "I would naturalize art, instead of *artificializing* nature." The expression is odd, but the sense is good."—*Bolingbroke to Pope*.

ar-tīl-lēr-ist, *s.* [Eng. *artiller(y)*; *-ist*.] An artilleryman; one practically acquainted with artillery or gunnery.

ar-tīl-lēr-ŷ, **ar-tīl-lēr-ŷe*, **ar-tŷl-ēr-ŷ*, **ar-tīl-yēr-ŷ*, **ar-tīl-rŷe*, **ar-tēl-rŷe* (Eng.), **ar-tā'il-ŷe* (Scotch), *s.* [In Ger. & Fr. *artillerie*; O. Fr. *artillerie*, *arteillerie*, from *artiller* = to render strong by art, to work with artifice, to fortify, to arm; Prov. *artilharía*, *artilheria*; Sp. *artillería*; Port. *artilharia*; Ital. *artiglieria*; Low Lat. *artilare* = to make machines; *artillaria*, *artilleria* = warlike engines, vans laden with military arms; Class. Lat. *ars* = art.]

A. Ordinary Language:

I. Implements of war.

1. Literally:

(1) *Gen.*: Warlike implements of whatever kind.

"And al his vthir *artilery* also
He dowblith hath, that merwell was to sen."
Lancelot of the Lake (ed. Skeat), bk. iii. 2,538-9.

¶ Formerly it might be used in the plural; now only the singular is employed.

"Swiche as han castelles and other manere edifices, and armure, and *artilries*."—*Chaucer: Tale of Melibeus*.

(2) *Specialty*:

**(a)* Bows and arrows.

"And Jonathan gave his *artillery* [bows and arrows] unto his lad, . . ."—1 Sam. xx. 40.

(b) Cannons or other great guns, and also all appliances needful to keep them in a state of efficiency for use in time of war.

2. *Figuratively*:

(1) Any weapon used in intellectual, moral, or spiritual warfare.

"He laughs whatever weapon Truth may draw,
And deems her sharp *artillery* mere straw."

Couper: *Hope*.

(2) The "electric fluid" in the clouds when flashing forth lightning accompanied by the roar of thunder.

"And heaven's *artillery* thunder in the skies."

Shakesp.: *Taming of the Shrew*, i. 2.

II. The science and art of gunnery.

"In *artillery* practice the heat generated is usually concentrated upon the front of the bolt, and on the portion of the target first struck."—*Tyndall: Frag. of Science*, 3d ed., i. 17.

¶ Here the word is used almost adjectively.

III. The men constituting the military corps in charge of the cannons, and who are trained to fire them in war.

"But there was no regiment of *artillery*, no brigade of sappers and miners, . . ."—*Macaulay: Hist. Eng.*, ch. iii.

B. Technically:

Mil.: For the several uses of the word *artillery*, see A., I., II., & III. It is often divided into (1) Horse Artillery, (2) Field Artillery, and (3) Garrison Artillery.

Field Artillery: Artillery designed to be taken with an army to the field of battle.

Park of Artillery [PARK]: Artillery, with the carriages, horses, and stores of all kinds necessary for its effective use.

Siege Artillery: Artillery of heavy metal, designed to be employed in breaching fortifications.

Train of Artillery: A certain number of pieces of cannon mounted on carriages, with all their furniture fit for marching.

ar-tīl-lēr-ŷ-man, *s.* [Eng. *artillery*; *man*.] One who belongs to the artillery or who serves a gun.

" . . . from the *artillerymen* being in particular cases mounted upon the cart attending the brigades."—*James: Military Dict.*, p. 26.

ar-tī-ō-dāc-tŷ-lā, *s. pl.* [Gr. *artios* = equal, and *daktylos* = a finger or toe. Having equal toes.] In the classification of Mammalia by Professor Owen, the first (highest) order of the Ungulata. It is divided into two families or sections: Omnivora, as the Hog; and Ruminantia, as the Sheep.

ar-tī-ō-dāc-tŷ-le, *a.* [ARTIODACTYLA.] Having even toes, that is, toes even in number.

"In the even-toed or '*artiodactyle*' Ungulates, . . ."—*Owen: Classif. of the Mammalia*, p. 39.

**ar-tī-que* (*tique* = *tīk*), *adj.* [ARCTIC.] The same as *ARCTIC* (q. v.).

"From tropic, e'en to pole *artique*."

Dryden: *To Sir G. Etherege*, 6.

**ar-tīs* (Old Eng.), *äirts* (Scotch), *s. pl.* Quarters of the sky. [AIRT.]

"Of a' the *airts* the wind can blaw
I dearly like the west."

Burns: *I Love my Jean*.

ar-tī-šan, *s.* [Fr. *artisan*; Sp. *artesano*; Ital. *artigiano*. From Lat. *ars* = acquired skill, art.]

*1. One who practiced any of the arts, including the liberal ones, such as sculpture and painting, or was a student of books.

"Zeuxis [meaning the celebrated painter], a professed *artisan*, . . ."—*Holland: Pliny*, pt. ii., p. 535. (*Trench: Select Gloss.*, pp. 8, 9.)

2. One trained to practice a manual art; a handicraftsman, a mechanic, a tradesman.

¶ This meaning, though not the original one, has still long existed; for instance, Bullokar, in the edition of his *English Expositor*, published in 1656, defines an artisan to be "A handy craftsman; an artificer."

"Even in the towns the *artisans* were very few."—*Macaulay: Hist. Eng.*, ch. xii.

ar-tīst, *s.* [Fr. *artiste*; Sp., Port., & Ital. *artista*; from Lat. *ars* = art.]

I. Of a person's profession, occupation, craft, or study:

*1. One who has had a liberal education, or at least is a reader, and has in consequence acquired knowledge, as contradistinguished from one who is unread.

"The wise and fool, the *artist* and unread."—*Shakesp.: Troilus and Cressida*, i. 3.

¶ It was used especially (a) for a cultivator of classical learning:

"Some will make me the pattern of ignorance for making this Scaliger the pattern of the general *artist*."—*Fuller: Holy State*, bk. ii., ch. 8.

Or (b) for a cultivator of science. In the subjoined example it probably means "astronomer," or if it be "constructor of the telescope," the example will illustrate signification 2 instead of 1. [ART (B.), ARTSMAN.]

" . . . the moon, whose orb
Through optic glass the Tuscan *artist* views
At evening from the top of Fesole."

Milton: *P. L.*, bk. i.

†2. One who practices an art of whatever kind. (The variety of occupations to which the term may be applied may be seen in the example from Pope under No. II.)

"Then from his anvil the lame *artist* rose."

Pope: *Homer's Iliad*, bk. xviii. 482.

3. One who practices any of the fine arts, as music, painting, sculpture, engraving, or architecture. (This is now the ordinary signification of the word.)

(a) *Literally*:

"Rich with the spoils of many a conquer'd land,
All arts and *artists* Theseus could command,
Who sold for hire, or wrought for better fame;
The master painters and the carvers came."

Dryden.

(b) *Figuratively*:

"Well hast thou done, great *artist*, Memory."

Tennyson: *Ode to Memory*, 5.

"He is the greatest *artist*, then,
Whether of pencil or of pen,
Who follows Nature."

Longfellow: *Keramos*.

*II. One who is possessed of trained skill in any art or occupation, as distinguished from one who is destitute of such training. (*Lit. & Fig.*)

"It is not strength, but art, obtains the prize

And to be swift is less than to be wise,
'Tis more by art than force of numerous strokes
The dexterous woodman shakes the stubborn oaks:
By art the pilot, through the boiling deep
And howling tempest, steers the fearless ship;
And 'tis the *artist* wins the glorious course,
Not those who trust in chariots and in horse.
In vain, unskillful, to the goal they strive,
And short or wide th' ungovern'd courser drive;
While with sure skill, though with inferior steeds,
The knowing racer to his end proceeds."

Pope: *Homer's Iliad*, bk. xxiii., 383-94.

**artist-god*, *s.* [Here the word *artist* is used in the sense I., 2.] Vulcan.

"To her the *artist-god*: Thy griefs resign,
Secure, what Vulcan can, is ever thine."

Pope: *Homer's Iliad*, bk. xxiii., 531-2.

artist-like, *a.* Like an artist.

"*Artist-like*,

Ever retiring thou dost gaze

On the prime labor of thine early days."

Tennyson: *Ode to Memory*, 5.

ar-tīste, *s.* [Fr.] One who practices an art and professes to do so in the highest style. (Often used of play-actors and musicians, but not unfrequently also of milliners and cooks, who, deriving their inspiration from Paris, wish to be designated by a word current in that capital rather than by one of native growth.)

ar-tīs-tic, *ar-tīs-tic-āl*, *a.* [Eng. *artist*; *-ic*, *-ical*. In Fr. *artistique*.]

1. Governed by rules of art.

2. Relating to an artist.

ar-tīs-tic-āl-lŷ, *adv.* [Eng. *artistic*; *-ly*.] In an artistic manner.

art-lēss, *a.* [Eng. *art*; *-less*.] Without art. *Specially*—

I. Of persons or minds:

1. Not understanding art; destitute of all acquaintance with art. (Rarely followed by *of*.)

"The high-shoed plowman, should he quit the land,
Artless of stars, and of the moving sand."—*Dryden*.

2. Guileless, simple, undesigning, too innocent to try to deceive, and not likely to succeed even if the attempt were made.

"Suspicion lurks not in her *artless* breast;
The worst suggested, she believes the best."

Couper: *Charity*.

II. Of things:

1. Destitute of art; not evincing the possession of art in its or their constructor.

" . . . these assemblages of *artless* and massy pillars."

—*Warton: Hist. of Kildington*.

2. Conceived in simplicity and sincerity; not designed to produce an effect, but producing it all the more on account of this.

"Oh, how unlike the complex works of man,
Heaven's easy, *artless*, unencumber'd plan!"

Couper: *Truth*.

art-lēss-lŷ, *adv.* [Eng. *artless*; *-ly*.] In an artless manner. *Specialty*—

1. Without skill.

2. Without craft; simply, guilelessly, undesignedly, sincerely.

"Nature and truth, though never so low or vulgar, are yet pleasing, when openly and *artlessly* represented."—*Pope*.

art-lēss-nēss, *s.* [Eng. *artless*; *-ness*.] The quality of being artless; simplicity, sincerity, unaffectedness; absence of guile or affectation. (*Todd*.)

art-lŷ, *a.* [Eng. *art*; *-ly*.] Artificially, by human skill or contrivance.

"A crabstock, if it have a cyen of some delicate apple
artly grafted upon it, they [the branches] will all follow
the nature of the stock."—*Sanderson: Works*, i. 431.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, nŭt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

ar-tō-car-pā'-cē-æ (*Mod. Lat.*), **ar-tō-car-pāds** (*Eng.*), *s. pl.* [**ARTOCARPUS**.] An order of exogenous plants, placed by Lindley under his Urticales or Urtical Alliance. The female flowers are collected into fleshy masses or heads. The stipules are convolute and sheathing, as in the genus *Ficus*. In 1847, Lindley estimated the known species at fifty-four.

ar-tō-car-pōūs, **ar-tō-car-pē-ōūs**, *a.* [**ARTOCARPUS**.] Relating to the order Artocarpæ, the genus *Artocarpus*, or to the Bread-fruit.

ar-tō-car-pūs, *s.* [In *Ital. artocarpe*; *Mod. Lat. artocarpus*; from *Gr. artos*=bread, and *karpos*=fruit. Bread-fruit.] A genus of plants—the typical one of the order Artocarpæ, or Artocarpaceæ, it contains various species. The most notable is the *A. incisa*, or Bread-fruit tree. It is a middle-

Bread-fruit Tree.

sized tree, with large variously-cut and lobed leaves. It has a round, curiously-muricated fruit. [**BREAD-FRUIT**.] It flourishes in the South Sea Islands. Dampier, Anson, and Captain Cook made it known in Europe, and the expedition of Captain Bligh of the "Bounty," dispatched with the view of introducing it into the West Indies, ended in the mutiny of the crew, the capture of the vessel, and the settlement of some of the mutineers in 1790 on Pitcairn's Island, whence their descendants were transferred to Norfolk Island in July, 1856. The *A. integrifolia* is the Jack-tree. [**JACK-TREE**.]

ar-tō-tŷr-i-tēs, *s. pl.* [*Gr. artotyros*=bread made with cheese: *artos*=a loaf of bread, and *tyros*=cheese.]

Ch. Hist.: A sect in the primitive church who celebrated the Lord's Supper with bread and cheese, on the ground that the first oblations of men were not only the fruits of the earth, but their flocks (*Gen. iv. 3, 4*).

***ar-tōw**, ***ar-tōu**, ***ar-tū**. [*Eng. art*; *thou*.] A contraction for *art thou*.

"Why artow so discolored on thy face?"

Chaucer: C. T., 12,592.

"Chyld, whi artou not a-schamed?"

Dispute between Mary and the Cross (ed. Morris), ii. 22. **art'-ship**, *s.* [*Eng. art*; *-ship*.] Artistic skill. (*Sylvester: The Vocation*, 118.)

***arts'-mān**, *s.* [*Eng. arts*; *man*.] A man skilled in any science or art.

"... and that the pith of all sciences, which maketh the *artisan* differ from the inexpert, is in the middle propositions, which in every particular knowledge are taken from tradition and experience."—*Bacon* (*Quotation from Plato*): *Adv. of Learn.*, bk. ii.

ār-ūm, *s.* [In *Ital. aro*; *Sp. yaro*; from *Lat. aros*, *aron*, *arum*=the cuckoo-pint; *Gr. aron*. Hooker and Arnott think the Greek word may come from the Heb. *ōr*, in the sense of fire or flame, and may refer to the burning or acrid character of these plants.] A genus of plants belonging to the order Araceæ, or Arads. It contains the well-known *A. maculatum*, the Cuckoo-pint (meaning point), Lords and Ladies, or Wake-Robin. The solitary spikes of bright scarlet berries may often be seen under hedges in winter, after the leaves and spadix have disappeared.

Arum Maculatum.

After the leaves and spadix have disappeared.

They are poisonous. The rhizomes are used in Switzerland for soap. There is in them an amylaceous substance, which, after the acrid matter has been pressed out, may be employed in lieu of bread-flour.

A-rūn-dēl'-ī-an, *a.* [*Eng. Arundel*; *-ian*.] Pertaining to any of the successive Earls of Arundel.

Arundelian or *Oxford Marbles*: Certain marbles brought from Italy, Greece, Asia Minor, by Mr. William Petty, who purchased them for Thomas, Earl of Arundel, in 1624. Arriving in London in the year 1627, they were placed in the gardens of Arundel House, which then occupied the site on which Arundel, Norfolk, Surrey, and Howard streets, running off the Strand, in London, now stand. In 1667 the Hon. Henry Howard, grandson of the first purchaser, and afterward Duke of Norfolk, presented the collection, which had met with Vandal treatment in London, to the University of Oxford. It was either from his ancestor or from him that the term *Arundelian*, applied to the marbles, was derived. The marbles contain the *Parian Chronicle* (q. v.).

a-rūn-dīf'-ēr-ōūs, *a.* [*Lat. arundifer*, from *arundo*=a reed or cane; and *fero*=to bear.] Reed-bearing, cane-bearing. Bearing reeds or canes. (*Ogilvie*.)

a-rūn-dī-nā'-cē-ōūs, *a.* [*Lat. arundinaceus*.] Resembling a reed or cane.

a-rūn-dīn-ār'-ī-a, *s.* [From *arundo* (q. v.).] A genus of grasses containing the Cane-brake of North America (*A. macrosperma*).

a-rūn-dīn'-ē-ōūs, **a-rūn-dīn-ō'se**, *adj.* [*Lat. arundineus*, *arundinosus*.]

1. Made of reeds.
2. Abounding in reeds.
3. Resembling a reed.

a-rūn'-dō, *s.* [*Lat. arundo*=a reed.] A Linnæan genus of grasses. One species (*A. donax*) supplies material for fishing-rods, and is imported for the purpose from the south of Europe, where it is indigenous. The striped-leaved variety, formerly more common than it now is in gardens, is called *Gardener's Garters*.

***a-rū-r-a**, ***ar-rū-r-a**, *s.* [*Lat. arura*; *Gr. aroura*=tilled or arable land, corn-land; *aro*=*Lat. aro*=to plow, to till.] A day's plowing. [**AROURA**.]

a-rūs'-pēx, **ṭa-rūs'-pēx**, **a-rūs'-pīce** *s.* [In *Fr., Sp., & Ital. aruspice*; *Port. aruspice*, *haruspice*; *Lat. haruspex*; *faruspex*, from (1) *hira*=the empty gut; Sansc. *hīrā*=the intestines; *Gr. cholas* and *cholix*; Old Norse *gar-nir*=the intestines; and (2) *specio* or *spicio*=to look at.]

Among the *Etruscans* and *Romans*: A soothsayer or diviner who pretended to foretell future events by the inspection of the entrails of victims.

"Adorn'd with bridal pomp, she sits in state;

The public notaries and *aruspex* wait."

Dryden: Juv. Sat. 10.

"The Senate, however, consider this *aruspex* of uncertain authority, and await the response of the Delphian oracle."—*Lewis: Early Rom. History*, ch. xii.

¶ Though the form *aruspice* is given in Dictionaries, the examples cited to illustrate it, being in the plural, do not establish its existence, for *aruspices* might be the plural of the *Lat. aruspex*, as well as of the English *aruspice*.

"The second sort of ministers mentioned by Cicero, were not priests, but augurs and *aruspices*, designed to be the interpreters of the mind of the gods."—*Bp. Story on the Priesthood*, ch. 5.

"They [the Romans] had colleges for augurs and *aruspices*, who used to make their predictions sometimes by fire, sometimes by flying of fowls, &c."—*Howell: Letters*, iii. 23.

a-rūs'-pī-cy, *s.* [From *Lat. aruspice*, accus. of *aruspex*=a soothsayer.] [**ARUSPEX**.] Pretended divination of future events by inspecting the entrails of victims.

"A flam more senseless than the roguery
Of old *aruspicy* and augury."

Butler: Hudibras, pt. ii., c. iii.

ar'-val, ***ar'-vēl**, ***ar'-vīl**, ***ar'-thēl**, *s.* [*Etym.* somewhat doubtful. Wormius says that there is a Danish word *arfwel*=a solemn feast in honor of a deceased chieftain, from *œrf*=an heir, and *ol*=ale. Hutchinson derives *arval* from *Wel. arwyl*=funeral solemnities; and Boucher from *Wel. ar*=over, and *wylo*=to wail, to weep. (*Boucher*.) Barnes considers it Welsh.] A funeral. (Used chiefly in the north of England.)

***arval-bread**, *s.* Bread given to the poor in the north of England on occasion of funerals.

***arval-feast**, ***arvil-feast**, *s.* A feast made at a funeral.

"I had an inclin on't at th' *arvil-feast*."

Yorkshire Dialogue, p. 59. (*Boucher*.)

***arval-supper**, *s.* A supper in connection with a funeral.

ar-vīc'-ōl-a, *s.* [*Lat. arum*=a field, and *colo*=to dwell in, to inhabit.] A genus of rodent mammalia belonging to the family Castoridae, though they have also close affinities with the Muridae, or Mice.

Ar-vō'-nī-an, *a.* [From *Arvonian*, the Roman name of a district in Wales.] Pertaining to the above-mentioned Arvonian.

Geol.: A Pre-Cambrian formation found in Pembrokeshire, Carnarvonshire, and Anglesea, Wales. Dr. Hicks divides the Pre-Cambrian formation into *Dimetian*, *Arvonian*, and *Pebidian*. Each of these must have been many thousand feet in thickness, and their horizontal extension is very wide. The Arvonian formation contains the quartz-felsites and porphyries, called *halletintia* by Törell, and *petrosi lex rocks* by Hunt. (*Q. J. Geol. Soc.*, vol. xxxv., 1879.)

***ar'-wē**, ***ar'-whē**, ***ar'-ōwe**, *a.* [*A. S. earg*=inert, weak, timid.] [**ARGH**, *a.*] Timid.

***ar'-wē**, *v. t.* [*A. S. eargian*=to be a coward.] [**ARWE**, *a.*] To render timid.

"Hast *arwed* many herdy men that hadden wil to fyghte."

Piers Plowman. (*Boucher*.)

***ar'-wē** (plural ***ar'-wēs**, ***ar'-wēn**), *s.* [**ARROW**.] An arrow.

"A bow he bar, and *arwes* bright and kene."

Chaucer: C. T., 6,963.

***ār'-wŷg-ŷll**, *s.* [**EARWIG**.]

***arwygyll-worme**. An earwig (q. v.). (*Prompt. Parv.*)

-ary, *as suffix*. [From *Lat. suff. -arius, -arium*.]

1. An agent in performing any act or doing any work; as *lapidary* (*Lat. lapidarius*)=a worker in stone.

2. A place for; as *library* (*Lat. librarium*)=a place for books.

Ār'-ŷ-an, **Ār'-ī-an**, *a. & s.* [In Sansc. *Arya* (as substan.)=(1) a tribe or nation—the Aryas; (2) in later Sanscrit (as *adj.*)=noble, of good family. India was called *Arya-āvarta*=the country of the Aryas. These Aryas were invading Brahmans, Kshatriyas (warriors), and Vaisyas (merchants); while the aborigines of India were called in the Vedas *Dasyus*. In later Sanscrit *Arya* specially meant the third or merchant class, the most numerous of the three, whence it came to stand for the whole nation. It seems to mean one who plows or tills, and to be connected with the Latin word *aro*=to plow, to till. It was opposed to *Tura*, in Sanscrit meaning (1) *as adj.*=swift; (2) *as substan.*=a nomad. [**TURANIAN**.] In *Zend airya* (*adj.*) means venerable, and (substan.) the Persian people. (The Persians and the Indian Aryans were originally the same nation.) Persia was called by Hellenicus, who wrote before Herodotus, *Aria*. Herodotus says that the Medes called themselves *Arii*. In the cuneiform inscriptions Darius denominates himself *Ariya*. Many other words, ancient and modern, appear to contain the term, as *Iran* (Persia); *Armenia*; *Aria*, in Thrace; the *Arii*, in Germany; and even our own *Erin* and *Ireland*. (See Max Müller on the *Science of Language*, 4th ed., pp. 246-255.) The word has sometimes been written *Arian*; but *Aryan* is more correct, besides having the great advantage of discriminating the term from *Arian*, pertaining to the Presbyter of Alexandria, so prominent in discussions regarding the doctrine of the Trinity.]

A. As adjective:

I. Philol. & Ethnol.: Belonging to the great family of human languages described below.

Aryan family of languages: A great family of languages, sometimes, though rarely, and not quite accurately, called *Japhetic*; more frequently designated as the Indo-European or Indo-Germanic family of tongues. They have reached a higher development than those of the second great family, the "Semitic," better described as the Syro-Arabian family, and are far in advance of the next one—that comprising the Turanian tongues. [**LANGUAGES**.] Like the Syro-Arabian forms of speech, they are inflectional [**INFLECTIONAL**]; while those of Turanian origin are only agglutinate. [**AGGLUTINATE**.] Max Müller separates the Aryan family of languages primarily into a Southern and a Northern division. The former is subdivided into two classes: (1) the Indic, and (2) the Iranic; and the latter into six: (1) the Celtic, (2) the Italic, (3) the Illyric, (4) the Hellenic, (5) the Windic, and (6) the Teutonic. [See these words.] (*Max Müller: Science of Language*, vol. ii., p. 411.) It is often said that Sanscrit, spoken by the old Brahmans, is the root of all these classes of tongues. It is more correct to consider it as the first branch, and assume the existence of a root not now accessible to direct investigation. As an illustration of the affinity among the Aryan tongues, take the common word *daughter*. It is in Sw. *datter*; Dan. *datter*; Dut. *dochter*; Ger. *tochter*; O. H. Ger. *tohtar*; Goth. *dauhtar*; Lith. *duktere*; Gr. *thygatēr*; Armenian

bōil, **bōy**; **pōūt**, **jōwl**; **cat**, **çell**, **chorus**, **çhin**, **bençh**; **go**, **gem**; **thin**, **ṭhis**; **sin**, **aş**; **expect**, **Xenophon**, **exist**. **ph**=**f**. **-cian**, **-tian**=**shan**. **-tion**, **-sion**=**shün**; **-ṭion**, **-şion**=**zhün**. **-tious**, **-cious**, **-sious**=**shūs**. **-ble**, **-dle**, &c.=**bēl**, **del**.

dustr; Sansc. *duhitri*; the last-named word signifying, primarily, "milkmaid," that being the function, in the early Brahman or Aryan household, which the daughter discharged. Not only are the roots of very many words akin throughout the several Aryan tongues, but (a more important fact) so also are the inflections. Thus the first person singular of a well-known verb is in Lat. *do*; Gr. *didōmi*; Lith. *dūmi*; Old Slav. *damy*; Zend *dadāmi*; Sansc. *dadāmi*; and the third person sing. present indic. of the substantive verb is in Eng. *is*, Goth. *ist*, Lat. *est*, Gr. *esti*, Sansc. *asti*.

"... there exists in India a sort of rivalry between the Aryan languages, or rather between the three principal ones—Hindi, Marathi, and Bengali—each considering itself superior to the others."—Beames: *Compar. Gram. Aryan Lang. of India*, vol. i. (1872); Introduction, p. 31.

II. Ethnology:

1. *Gen.*: Pertaining to the old race speaking the primeval Aryan tongue [A.], or any of the numerous forms of speech which have sprung from it. The ancestors of most modern Europeans lived together as one people, speaking the primeval Aryan tongue, in Central Asia, and apparently near the Pamir steppe. Their separation took place at so remote a period that, while they seem to have known gold, silver, and copper, they were unacquainted with iron, the name of which is different in all the leading Aryan tongues. (Max Müller, *Science of Language*, vol. ii., p. 258.)

2. *Spec.*: The Aryan race which invaded India at a period of remote antiquity, possibly 1700 B. C., and still remains the dominant Hindoo race there.

B. As substantive: The race or races described under A., II. (q. v.).

**a-ry'ght* (*gh* silent), *adv.* [ARIGHT.]

**ar'-y-ōle*, *s.* [Lat. *hariolus*=a soothsayer.] A soothsayer, a diviner.

"... for *aryoles*, *nygromancers* brought them to the authors of their god."—Trevisa de *Prop. Rerum*, f. 126. (Boucher.)

**a-ryse*, *v. i.* [ARISE.]

"And made forward erly to *aryse*."—Chaucer: *C. T.*, 33.

**a-ryst'e*, *s.* [A. S. *ærest*, *ærist*=resurrection; *arisan*=to arise.] Resurrection.

"As heo stode and spoken, and weren at *wenyng*, Of vre louerdas *aryste*, and fele other thinge,"
The *Passion of Our Lord* (ed. Morris), 595, 596.

ar-y-tē-nōid, *tar-y-tē-nōid*, *a. & s.* [In Sp. *arytena*=the larynx; Lat. *arytena* or *arutena*; Gr. *arytaina* or *aryter*=ladle or cup; *aryō*=to draw water.] Ladle-shaped or cup-shaped.

A. As adjective:

Arytenoid cartilages: Two pyramidal bodies articulated by their bases with the oval articular substances which exist on the upper margin of the cricoid cartilage in the human larynx. (Todd & Bowman: *Physiol. Anat.*, vol. ii., p. 434.)

Arytenoid muscle: Muscles which pass from one of the arytenoid cartilages to the other. (*Ibid.*)

B. As substantive:

Plural. Arytenoids: The cartilages described above.

"The mobility of the articulation of the *arytenoids* with the cricoid, and their connection with the vocal ligaments, give them great importance in the mechanism of the larynx."—Todd & Bowman: *Physiol. Anat.*

ās, **āse*, *adv.*, *conj.*, & *pref.* [A contraction for Eng. *also*. As in A. S. is *ealswa*, *alswa*; Dut. & Ger. *als*; M. H. Ger. *alse*; O. H. Ger. *also*, from *al*=all, and *so*=so.] [ALSO.]

A. As an adverb of comparison. (Bain: *Higher Eng. Gram.*)

1. Denoting comparison resulting in the discovery of likeness.

1. Like, similar to, resembling.

"And the Lord God said, Behold, the man is become as one of us."—Genesis iii. 22.

"As the husband is the wife is,
Thou art mated to a clown;
And the coarseness of his nature
Will have power to drag thee down."
Tennyson: *Locksley Hall*

2. In the same manner as; like that or those which.

"Ase we hit findeth iwritten
In the goddspele,"
Death, xxiii. (ed. Morris), 15, 16.

"The Lord seeth not as man seeth; for man looketh on the outward appearance, but the Lord looketh on the heart."—1 Sam. xvi. 7.

¶ In some cases, especially when the comparison is presented at length, *as* is either followed or preceded by *so*. (See also B., II., 2.)

"As your fathers did, so do ye."—Acts vii. 51.

"And He said, So is the kingdom of God, as if a man should cast seed into the ground."—Mark iv. 26.

¶ To render the *so* more emphatic, *even* is sometimes placed before it.

"For as in Adam all die, even so in Christ shall all be made alive."—1 Cor. xv. 22.

¶ When *so* is not present it is understood.

"As in my speculations I have endeavored to extinguish passion and prejudice; I am still desirous of doing some good in this particular."—Spectator.

¶ *Such* is occasionally employed as the word in relation to *as*.

"... such an one as Paul the aged."—Philemon 9.

3. With.

"... upon the like devotion as yourselves."

Shakesp.: *Richard III.*, iv. 1.

4. Than. (Scotch.)

"Better be dead as out of the fashion."

Ferguson: *S. Prov.* (Jamieson.)

II. Denoting proportion; in the same degree with, equally with, as much as.

"Thou good old man, benevolent as wise."

Pope: *Homer's Odyssey*.

"Before the place

A hundred doors a hundred entries grace;

As many voices issue, and the sound

Of Sybil's words as many times rebound."

Dryden.

¶ In this sense it is generally succeeded after an interval by another *as*, with which it stands in relation.

"... his personal qualities were as amiable as his poetical, ..."—Pope: *Letter to Wycherley* (1704).

III. Redundant; but this use of the word is vulgar. [See *As how*.]

B. As a subordinating conjunction of reason and cause. (Bain: *Higher Eng. Gram.*)

I. (Implying time): While, whilst.

"... it whistled as it flew."—Dryden.

II. (Implying reason):

1. (Denoting a cause): Since, because, because of being.

"... as thou art a prince, I fear thee."—Shakesp., 1 *Henry IV.*, iii. 3.

*2. (Denoting a consequence): That.

"The relations are so uncertain, as they require a great deal of examination."—Bacon.

C. As an intensifying prefix: Frequently used in Mid. Eng., as *asswythe*, *astyte*, &c.

D. In special phrases, with varying signification, according to the words with which it is combined.

1. As far as: To the extent.

"... as far as I can see."—Darwin: *Descent of Man*, vol. i., pt. ii., ch. xi.

"Every offense committed in the state of nature, may in the state of nature be also punished, and as far forth as it may in a commonwealth."—Locke.

"... as far as can now be ascertained."—Macaulay: *Hist. Eng.*, ch. xx.

2. As for: As far as relates to, with regard to, with respect to.

"As for such as turn aside unto their crooked ways ..."—Ps. cxxv. 5.

3. As how: How, the word *as* being considered redundant. (Provincial.)

"As how, dear Syphax?"—Addison: *Cato*.

4. As if: Like what it would be if.

"As in the case of the ether, beyond the 'as if' you cannot go."—Tyndall: *Frag. of Science*, 3d ed., vii. 135.

¶ In poetry, when the necessities of the meter require it, the *if* is occasionally omitted.

"He lies as he his bliss did know."—Waller.

"... as they would dance."—Milton: *P. L.*, bk. vi.

5. As it were: Like, resembling.

"... and I heard, as it were the noise of thunder, one of the four beasts saying, Come and see."—Rev. vi. 1.

6. As long as: Noting (a) extent of space.

"He draws a bonny silken purse
As lang's my tail."—Burns: *The Two Dogs*.

Or (b) Duration of time.

"Because He hath inclined His ear unto me, therefore will I call upon Him as long as I live."—Ps. cxvi. 2.

7. As soon as: Whenever.

"... as soon as I am gone out of the city."—Exodus. ix. 29.

8. As though: As if.

"... under color as though they would have cast anchors out of the foreship."—Acts xxvii. 30.

9. As to: With respect to, concerning.

"I pray thee, speak to me, as to thy thinkings, As thou dost ruminate; and give thy worst of thoughts The worst of words."—Shakesp.: *Othello*, iii. 3.

10. As well as: Equally with, no less than.

"But I have understanding as well as you; I am not inferior to you."—Job xii. 3.

¶ Sometimes the words *as well* are separated from the *as*.

"... as well the stranger as he that is born in the land."—Lev. xxiv. 16.

11. As yet: Up to this time.

"Though that war continued nine years, and this hath as yet lasted but six; yet there hath been much more action in the present war."—Addison.

Among the Romans: A weight, coin, or measure.

1. As a weight of twelve ounces, the same as a libra or pound, and divided into twelve parts called unciae or ounces. These were: *Uncia*=1 oz.; *sex-tans* ($\frac{1}{4}$ th)=2 oz.; *quadrans* ($\frac{1}{4}$)=3 oz.; *quincunx*=5 oz.; *semis* ($\frac{1}{2}$)=6 oz.; *sextunx*=7 oz.; *bes*=8 oz.; *dodrans*=9 oz.; *dextans*, or *decunx*=10 oz.; *deunx*=11 oz.

II. As a coin, which, in the time of Tullus Hostilius, is said to have weighed twelve ounces. After the first Punic war had exhausted the treasury, it was reduced to two ounces. The second Punic war brought it to one ounce; and, finally, the Papirian law fixed it at half an ounce only. At first it was stamped with a sheep, an ox, a ram, or a sow, but under the empire it had on one side a two-faced Janus, and on the other the rostrum or prow of a ship.

"... three minæ or 3,000 ases for each prisoner."—Arnold: *Hist. Rome*, ch. xlv.

III. As a measure:

1. (Square) An acre.

2. (Linear) A foot.

¶ As in Latin has other significations, among which may be noted (in Law) a portion divided among heirs. [ACE.]

As. The contraction and symbol for Arsenic. Atomic weight, 75; density of vapor, 150; hydrogen being taken as 1.

"By moderns, of course, Procopius means the men of his own time, viz., the sixth century A. D."

2. The mineral described under II. 1.

II. Now (Mineralogy):

1. A variety of Hornblende, which itself is classed by Dana as a synonym or subdivision of Amphibole. He says that the several varieties of Amphibole, and notably Tremolite and Actinolite, when they have little alumina in their composition, tend to become fibrous, in which case they are called Asbestos. Hadly regarded the fibers as rhomboidal prisms. As the etymology imports, asbestos is exceedingly infusible, at least in a mass. It contains a considerable percentage of magnesia in its composition. It occurs mostly in serpentine districts. The varieties are:

(a) *Amianthus*, in which the fibers are so exceedingly long, flexible, and elastic, that they may be woven into cloth. [AMANTHUS.]

(b) *Common Asbestos*, with the fibers much less flexible. It is heavier than the first variety. It is dull green, sometimes pearly in luster, and unctuous to the touch.

(c) *Mountain Cork*, light enough to float on water.

(d) *Mountain Leather*, also very light, but thinner and more flexible than the last.

(e) *Mountain Paper*, a designation formerly given to fine thin specimens of Mountain Leather.

(f) *Mountain Wood*, which, in the external aspect, resembles dry wood.

2. The fibrous varieties of Pyrocene. It is difficult to distinguish these from the former.

ās'-bōl-ite, **ās'-bōl-ān**, s. [Gr. *asbolainō*=to cover with soot; *asbolos*, *asbolē*=soot.] A mineral, called also Earthy Cobalt. Dana makes it a variety of Wad (q. v.), and considers it to be that mineral combined with oxide of cobalt.

ās-cāl'-a-phūs, s. [Gr. *askalaphos*. A word in Aristotle, apparently meaning a kind of owl.]

Entom.: A genus of Neuropterous insects belonging to the family Myrmeleontidæ, or Ant-lions. They differ from the Myrmeleon proper in having much longer antennæ and shorter bodies, while their larvæ do not construct a pitfall.

ās-cār'-ī-dæ, s. pl. [ASCARIS.]

Zool.: A family of intestinal worms belonging to the class Intestina Entozoa of Rudolphi, Cuvier, &c., the class Entozoa of Owen and others, and the doubtful class Scolecida, group or sub-class Nematodea (Thread-worms). They constitute the highest type of intestinal worms. [ASCARIS.]

ās-car'-is, s. [Gr. *askaris*, from *askarizō*, or *skarizō*=to leap, to throb, to palpitate.]

Zool.: A genus of intestinal worms, the typical one of the family Ascaridæ. *A. lumbricoides*, or Round Worm, is the commonest intestinal parasite of the human species, generally occupying the small intestines; it is found also in the hog and ox. In the human species it is much more common in children than in adults, and is extremely rare in aged persons. It reaches seven inches in length. A second species, the *Ascaris* or *Oxyurus vermicularis*, is one of the most troublesome parasites of children, and occasionally of adults. It infests the larger intestines, especially the rectum. The male is two or three lines long, and the female five. (Owen: *Compar. Anatomy of the Invertebrate Animals*, pp. 66, 67, &c.)

"He was initiated, in order to gain instruction in sciences, that were there in their highest ascendant."—*Temple*.

(b) Superiority of any kind, as in power, wealth, influence, intellect, or morality.

"The friends of the English alliance were now recovering the ascendant."—*Froude: Hist. Eng.*, vol. iv., 17.

"By the ascendant he had in his understanding, and the dexterity of his nature, he could persuade him very much."—*Clarendon*.

II. Technically:

**Astrol.*: The degree of the ecliptic which is rising in the eastern part of the horizon at the moment of a person's birth. This, when ascertained, was supposed to indicate his tastes or proclivities, and enable his horoscope to be drawn out. In the celestial theme, other names are given to the ascendant, viz., the first house, the angle of the east, an oriental angle, and the house of life.

"Wel cowde he fortune the ascendent

Of his ymages for his pacient."

Chaucer: C. T., 419-20

" . . . his signe, his houre, his ascendent."—*Gower: Conf. Amant.*, bk. vi.

B. Technically:**I. Astronomy:**

1. The *ascending node* of the moon is that in which the moon passes from the southern to the northern side of the ecliptic. It is opposed to the *descending node*. [DESCENDING.] (Herschel: *Astron.*, § 406.) The meaning is the same in the case of a planet (§ 498).

2. The *ascending signs* of the zodiac are those through which the sun passes while he is approaching his greatest northern declination, the one which to us is many degrees above the horizon. They are Capricornus, Aquarius, Pisces, Aries, Taurus, and Gemini. The other six are called *descending signs*.

3. *Ascending latitude*: The increasing latitude of the moon or a planet.

II. Anat.: Directed upward.

"... has powerfully *ascending rami*."—Owen: *Classif. of the Mammalia*, p. 67.

Ascending vessels: Those which carry the blood upward, that is, from the lower to the higher parts of the body.

III. Bot.: Sloping upward.

V. Print.: *Ascending letters* are those which ascend into the upper shoulders, or above the short letters; as, b, d, l, etc.

as-çen'-sion, ***as-çen'-çion**, ***as-sen'-tion**, *s.* [In Fr. & Sp. *ascension*; Port. *ascensao*; Ital. *ascensione*; Lat. *ascensio*, from *ascensum*, sup. of *ascendo*.] [ASCEND.]

A. Ordinary Language:

I. The act of ascending (lit. or fig.).

1. In a general sense:

"By nature he knew eche *ascentioun*."

Chaucer: *C. T.*, 14,861.

"Ne eek oure spirites *ascencioun*."—Ibid., 12,706.

2. *Spec.*: It is applied to the ascent of our Saviour from the earth, in view of His disciples, some time after His resurrection. Hence the Mount of Olives whence he ascended has since been called by devout Christians the Mount of Ascension.

"The traditional scene of the *Ascension* is one of the four summits of the Mount of Olives, . . ."—Cook: *Holy Bible with Comment.*, vol. i. (1878), p. 471.

†II. That which ascends.

"Men err in the theory of inebriation, conceiving the brain doth only suffer from vaporous *ascensions* from the stomach."—Browne: *Vulgar Errors*.

III. The distance by which anything ascends. [B. *Astron.*]

B. Technically:

Astron. Right ascension: The distance of a heavenly body from the first point of Aries, measured upon the equator. (Hind.) The arc of the equinoctial included between a certain point in that circle, called the *Vernal Equinox*, and the point in the same circle to which it is referred by the circle of declination passing through it. Or the angle included between two hour-circles, one of which, called the *equinoctial colure*, passes through the vernal equinox, and the other through the body. (Herschel: *Astron.*, §§ 108, 293.) It is opposed to *oblique ascension* (q. v.).

† The terms *right ascension* and *declination* are now generally used to point out the position in the heavens of any celestial object, in preference to the old method of indicating certain prominent stars by proper names or by Greek letters. By means of the transit instrument, or by an equatorially-mounted telescope, a star or planet may be readily found, when once its *right ascension* and *declination* are known. [EQUATORIAL TELESCOPE, TRANSIT INSTRUMENT.]

Oblique ascension: The arc of the equator intercepted between the first point of Aries and the point of the equator which rises with a star or other heavenly body, reckoned according to the order of the signs.

Ascension-day, *s.* The day on which our Saviour's ascension is commemorated—the Thursday but one before Whitsuntide, sometimes called Holy Thursday. It is one of the six leading festivals for which services are assigned in the Liturgy of the Episcopalian church.

"This, on *Ascension-day*, each year."

Scott: *Marmion*, ii. 13.

as-çen'-sion-al, *a.* [Eng. *ascension*; -al. In Fr. *ascensionnel*; Sp. *ascensional*.] Pertaining or relating to ascension.

Ascensional difference: The difference between the right and oblique ascensions.

as-çen'-sive, *a.* [Lat. *ascens(us)*, pa. par. of *ascendo*, and Eng. suffix -ive.] Ascending, on an ascending plan.

"... the gradations of the Mammalian structure, of which we have now completed the *ascensive survey*."—Owen: *Classif. of the Mammalia*, p. 51.

as-çent', *s.* [In Sp. & Port. *ascenso*; Ital. *ascendenza* and *ascesa*. Lat. *ascensus(s)*, from *ascensus*, pa. par. of *ascendo*.]

I. The act or process of ascending or moving from a lower to a higher place.

1. Literally:

(a) *Of persons:*

"The ascent had been long and toilsome."—Macaulay: *Hist. Eng.*, ch. xiii.

(b) *Of things:*

"... the ascent of soap bubbles, . . ."—Darwin: *Voyage round the World*, ch. viii.

2. Fig.: Progress upward.

"In regard to animal life, and its assigned work on this planet, there has therefore plainly been an ascent and progress in the main."—Owen: *Classif. of the Mammalia*, p. 60.

"... steeper and hard of ascent."—Holland: *Livy*, p. 995.

II. That which is ascended.

1. Literally:

(a) That by which ascent is made—a flight of steps, an inclined plane artificially formed, or the natural acclivity of a hill.

"... and his ascent by which he went up into the house of the Lord . . ."—2 Chron. ix. 4.

(b) The eminence ascended; or generally an eminence, a hill.

"A wide flat cannot be pleasant in the Elysian fields, unless it be diversified with depressed valleys and swelling ascents."—Bentley.

(c) The slope or angle of the eminence ascended.

2. Fig.: Gradation, series, order.

"Large store of gleaming crimson-spotted tints, Ranged side by side, in regular ascent, One after one, still lessening by degrees Up to the dwarf that tops the pinnacle." Wordsworth: *Excursion*, bk. viii.

"Mer. But how shall I be *ascertained* that I also should be entertained?"—Bunyan: *Pilgrim's Progress*, pt. ii.

II. Of things:

*1. "To assert for certain, to assure."

2. To render a thing certain which before was doubtful.

* (a) By making that fixed which before was fluctuating, or at least liable to change.

"For nought of them is yours, but th' onely usance Of a small time, which none *ascertain* may."

Spenser: *Daphnaïda*.

"... the mildness and precision of their laws *ascertained* the rule and measure of taxation."—Gibbon.

* (b) By arranging matters previously. To insure.

"The ministry, in order to *ascertain* a majority in the House of Lords, persuaded the Queen to create twelve new Peers."—Smollett.

†3. By divine revelation, or at least by credible testimony regarding anything.

"The divine law both *ascertaineth* the truth, and supplieth unto us the want of other laws."—Hooker.

"Money differs from uncoined silver in this, that the quantity of silver in each piece is *ascertained* by the stamp."—Locke.

4. By instituting an inquiry, investigation, examination, or experiment. (This is now the almost exclusive use of the word.)

"The extent to which parliamentary support was bartered for money cannot be with any precision *ascertained*."—Macaulay: *Hist. Eng.*, ch. xv.

"Their periods may, therefore, be regarded as *ascertained* with the utmost exactness."—Sir J. Herschel: *Astron.*, § 486.

† *Ascertain* may be followed by a substantive [examples under No. II. 1, 2, 3 and 4], by *that* [example under No. I.], or by *whether*.

"... but he was there only for the purpose of *ascertaining whether* a descent on England was practicable."—Macaulay: *Hist. Eng.*, ch. xxiii.

as-çer-tā'in-a-ble, *a.* [Eng. *ascertain*; -able.] Capable of being ascertained.

A. As adjective:

1. Retired from the world, and engaged in devotions and mortifications.

"... he entered into such an *ascetic* course as had well nigh put an end to his life."—Life of Bishop Burnett, ch. 13.

2. Severe, harsh, rigid, precise.

B. As substantive:**I. Ordinary Language:**

1. *Spec.*: One who retires from active and adopts a contemplative life spent in devotion, in mortification of the body, &c.: a hermit, a recluse.

In the days of Jesus Christ the Essenes were a large and influential sect of men who lived in the wilderness. John the Baptist was an example of these ascetics.

"I am far from commending those *ascetics*, that, out of a pretense of keeping themselves unspotted from the world, take up their quarters in deserts."—Norris.

2. *Gen.*: One who, whether he retires from active life or not, adopts habits of self-mortification.

II. Church History: A class of persons who, aspiring after higher attainments in holiness than other Christians, thought they would best attain their object by self-mortification. They therefore abstained from wine, flesh, matrimony, and worldly business; and moreover emaciated their bodies by long vigils, fasting, toil, and hunger. Both men and women embraced this austere mode of life. During the second century of the Christian era, when they first attracted notice, they lived by themselves and dressed differently from others, but did not altogether withdraw from the society and converse of ordinary men. During the course of the third century they gradually withdrew to the Egyptian desert, and early in the fourth (about A. D. 305), were associated by Anthony into monastic communities. [ANCHORITE, MONASTICISM.]

"The *Ascetics* who obeyed and abused the rigid precepts of the Gospel."—Gibbon: *Decline and Fall*, ch. xxxvii.

as-çet'-i-çism, *s.* [Eng. *ascetic*; -ism. In Fr. *ascétisme*.] The mode of life of an ascetic; mortification of the body.

"There are two classes of men of very different complexions, by whom the principle of *asceticism* appears to have been embraced; the one a set of moralists, the other a set of religionists."—Bowring: *Jeremy Bentham's Works*, vol. i., p. 4.

as-çet'-ics, *s.* [ASCETIC.] A treatise on the subject of asceticism, or giving rules to be observed by ascetics.

***as-çhā'ime**, *v. t.* [ASHAME.]

***as-çhā'med**, *a.* [ASHAMED.]

***as-çhare**, *adv.* [A. S. *on cyrre*=in the act of turning; *cerran*=to turn.] Aside.

"Euer after the dogges wer so starke, Thei stode *aschare* when thei schuld barke."

Hunting of the Hare, 256. (Boucher.)

***āsçhe**, *s.* [ASH (1) & (2).]

***as-çhē'-pōn**, *pret. of v.* [A. S. *gesceapen*=formed, created.] [SHAPE.] Shaped, formed, devised.

"Watz neuer so blysfyl a bour as watz abos thenne, Ne no schroude hous so schene as *aschepon* thare." Ear. Eng. *Alliter. Poems* (ed. Morris), *Cleanness*, 1,075-6

"Thar ich *aschewe*le pie and crowe."

The Hule and the Nightingale (1601). (Boucher.)

ās'-cī, *s. pl.* [Latinized form of *askoi*, plural of *askos*=a leathern bottle.]

1. Tubes in which the sporules of lichens are contained while in the nucleus. (Lindley.)

2. Tubes in which the sporidia of fungi are placed. They are called also *ascelli* or *thecæ*.

fāte, fāt, fāre, amidst, whāt, fāll, . father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

Ās'-ċi-an (pl. **Ās'-ċi-anš**), *s.* [Lat. *Asci*; Gr. *Askios*, pl. of *askios*=without shadow: *a*, priv., and *skia*=a shadow.]

Plural: Those who at midday of one or two days of the year are destitute of a shadow. Those living in the tropics of Cancer and Capricorn are so at midday once a year, and those living between those circles are so twice a year.

ās-ċid'-i-a, **ċas-ċid'-i-æ** (Mod. Lat.), **as-ċid'-i-anš** (Eng.), *s. pl.* [ASCIDIUM.]

Zool.: The first order of the Tunicated Class of Mollusca. It contains four families: the Ascidiadæ, or Simple Ascidiæ; the Clavellinidæ, or Social Ascidiæ; the Botryllidæ, or Compound Ascidiæ; and the Pyrosomatidæ, an aberrant family tending to the order Biphora. [ASCIDIODA.]

ās-ċid'-i-a-dæ, *s. pl.* [ASCIDIUM.] Simple Ascidiæ. The typical family of the Ascidian order of Tunicated Mollusca. Professor Garrod considers them to be degenerate Vertebrata, which should be placed quite at the end of that sub-kingdom, after Amphioxus. The animals are simple and fixed; they are solitary or gregarious, with their branchial sac simple or disposed in 8-18 deep and regular folds. Their external integument is provided with two apertures, making them look like double-necked jars. When touched they squirt a stream of water to some distance. They look like shapeless cartilaginous masses. Some are highly colored. In Brazil, China, and the Mediterranean they are eaten as food.

ās-ċid'-i-form, *a.* [Mod. Lat. *ascidi(um)*, and Lat. *forma*=shape.] Bottle-shaped, like the leaves of Sarracenia and Nepenthes.

ās-ċid'-i-ōi-da, *s. pl.* [Mod. Lat. *ascidi(um)*, and Gr. *eidos*=appearance.] Professor Huxley's name for the class called by some others Ascidia or Ascidiæ. He classes it under his great division Molluscoidea.

ās-ċid'-i-ūm (pl. **ās-ċid'-i-a**), *s.* [Gr. *askidion*, dimin. of *askos*=a leathern bottle of goatskin or similar material.]

1. Zool.: The typical genus of the Tunicated Mollusca, belonging to the family Ascidiadæ and the order Ascidia. The species vary in length from an inch to five or six inches. One species is the Sea-squirt (*A. hyalinum*). The Ascidian genus, family,

Ascidium (Sea-squirt).

A. Ascidium mentula. B. Ascidia echinatum.

and order have recently acquired greatly-increased interest from the fact that Darwin has taken this part of the animal kingdom as his point of departure in tracing the process of development which he believes to have ultimately resulted in the production of man.

2. Bot.: The pitcher in such plants as Sarracenia and Nepenthes. (Lindley.)

ās-ċig'-ēr-ōūs, *a.* [(1) Gr. *askoi*, pl. of *askos*, (Asci); (2) Lat. *gero*=to wear, to carry about.] Having asci. (Loudon: Cyclop. of Plants; Gloss.)

Ās-ċi'-tæ (Lat.), **Ās-ċi'-tans** (Eng.), *s.* [From Gr. *askos*=a leathern bottle.]

Ch. Hist.: A sect of Montanists who arose in the second century. Their name was designed to express the fact that some Bacchanals of their party believed the passage in Matt. ix. 17, which speaks of pouring new wine into new bottles, required them to blow up a skin or bag, and dance around it when inflated, which accordingly they did with suitable vigor, as an act of solemn worship.

ās-ċi'-tēs, *s.* [In Fr. *ascite*; Port. & Lat. *ascites*; Gr. *askitēs*; from *askos*=a leathern bottle.]

Med.: Effusion of fluid of any kind into the abdomen; specially effusion of fluid within the cavity of the peritoneum, as distinguished from ovarian dropsy and dropsy of the uterus. There is an idiopathic ascites, which may be of a tonic or acute form, or of an asthenic type; and a sympathetic or consequential ascites. Another division is into active ascites, that in which there is a large effusion of serum into the cavity of the peritoneum, after undue exposure to cold and wet; and passive ascites, that produced by disease of the heart or liver.

ās-ċit'-ic, ***ās-ċit'-ick**, **ās-ċit'-ic-al**, *a.* [Eng., &c., *ascites*; Eng. suff. *-ic*, *-ical*. In Fr. *ascitique*; Port. *ascitico*.] Pertaining or relating to the disease called ascites.

"When it is part of another tumor it is hydropical, either anasarca or ascitical."—Wiseman: Surgery.

ās-ċi'-tī-tious (tious as **shūs**), *a.* [Low Lat. **ascititius*; from Lat. *ascitus*=approved, adopted, pa. par. of *ascisco*=to approve, to adopt.] Not originally existent; adopted, additional, supplemental. [ADSCITITIOUS.]

"Homer has been reckoned an *ascititious* name from some accident of his life."—Pope.

ās-clē'-pī-ād, *s.* [In Fr. *asclépiade*; Sp. *asclepiadeo*; Lat. *Asclepiadeus*.]

Ancient Prosody: A kind of verse used by Horace and other writers, and divided into two primary types: (1) *Asclepiadeus minor*, consisting of a spondee, a choriambus, a dactyl, a trochee, and a cæsure, as *Maecō | nās ātāvis || ēdītē | rēgī | būs* (Horace); and (2) the *Asclepiadeus major*, consisting of a spondee, two choriambuses, a trochee, and a cæsure, as *Quis pōst | vinā grāvem | militiam aut | paup̄rēm | crēpāt?* (Schmitz: Lat. Gram., 1860, p. 306.)

ās-clē'-pī-a-dā'-ċē-æ, *s. pl.* [ASCLEPIAS.] *Asclepiads*. An order of plants closely allied to the Apocynaceæ, or Dogbanes. Lindley places them under his alliance Solanales. They have a 5-divided persistent calyx; a monopetalous 5-lobed regular corolla; 5 stamina, with the filaments usually connate; anthers 2—sometimes almost 4-celled; the pollen at length cohering in masses, or sticking to 5 processes of the stigma; styles 2; stigma 1, tipping both styles, dilated, 5-cornered; ovaries, 2; fruit, 2 follicles, of which one is sometimes abortive; seeds numerous. Shrubs, or more rarely herbs, almost always milky, and frequently twining. Leaves entire, opposite; flowers umbellate, fascicled, or racemose. Their favorite habitat is Africa. They occur also in India, and the tropics generally. In 1846 Lindley estimated the known species at 910; now fully 1,000 are known. The milk, which in some species furnishes caoutchouc, is usually acrid and bitter, though apparently not so deleterious as that of Apocynaceæ. That of *Calotropis gigantea*, the *akund*, *ycerum*, or *mudar* plant of India, has been used with effect in leprosy, elephantiasis, and some other diseases. The roots of *Cynanchum tomentosum*, and *Periploca emetica* are emetic. *Gymnema lactiferum* is the Cow-plant of Ceylon [COW-PLANT]. *Pergularia edulis* and *Periploca esculenta* are eatable. *Diplopepis vomitoria* is expectorant and diaphoretic, and is used like ipecacuanha in dysentery. *Hemidesmus Indica* is the Indian Sarsaparilla [SARSAPARILLA]. The leaves of *Cynanchum Argel* are used in Egypt for adulterating senna. *Marsdenia tenacissima* is employed for bowstrings by the mountaineers of Rajmahal, while *M. tinctoria* and *Gymnema tingens* yield an indigo of excellent quality. (Lindley.) [ASCLEPIAS.]

ās-clē'-pī-ād'-ē-an, *a.* [Lat. *asclepiadeus*.] Pertaining or relating to the meter called *Asclepiad* (q. v.).

"The distichs used by Horace are—(1) The second *Asclepiadean* meter, consisting of a Glyconic and the *Asclepiadeus minor*."—Schmitz: Lat. Gram. (1860), p. 306.

ās-clē'-pī-ād'-ic, *a.* [Eng. *asclepiad*; *-ic*.] The same as *ASCLEPIADEAN* (q. v.).

ās-clē'-pī-ās, *s.* [In Fr. *asclépiade*; Ital. *asclepiade*; Sp. *asclepiada*; Lat. *asclepias*; Gr. *asklēpias*, a plant, the Swallow-wort (*Asclepias vincetorix-cum?*); from *Asklēpios*, the Roman Æsculapius or Esculapius, the fabled god of medicine.] A genus of plants, the typical one of the order *Asclepiadaceæ*. The species are found chiefly along the eastern portion of North America, in Bermuda, &c. Though all more or less poisonous, they are used medicinally. *A. decumbens* excites general perspiration without in any perceptible degree increasing the heat of the body. It is used in Virginia as a remedy against pleurisy. Another variety, *A. tuberosa*, is a mild cathartic and diaphoretic. The root and tender stalks of *A. volubilis* create sickness and expectoration. *A. tuberosa* (Butterfly Weed) and *A. curassavica*, sometimes but incorrectly called ipecacuanha, are also medicinal plants, while *A. lactifera* yields a sweet copious milk used by the Indians, &c.; hence the ordinary name *milkweed*. *A. aphylla* and *stipitacea* are eatable. (Lindley.)

ās-cō-mŷ-ċē'-tēs, *s. pl.* [Gr. *askos*=a bag, and *mykēs*=a mushroom.] A group of fungi whose spores or sporidia are contained within asci.

ās-cō-mŷ-ċē'-toūs, *a.* [Eng., &c., *ascomycet(es)*; *-ous*.] Belonging to or connected with the *ascomycetes* (q. v.).

a-scri'-ba-ble, *a.* [Eng. *ascrib(e)*; *-able*.] That may be ascribed.

"... the effects of nature's abhorrency of a vacuum, which seem to be more fitly *ascribable* to the weight and spring of the air."—Boyle, vol. i., p. 17.

a-scri'-be, *v. t.* [In Ital. *ascrivere*. From Lat. *ascribo*=(1) to add to or insert in a writing; (2) to impute: *ad*=to, and *scribo*=... to write.]

*1. To write down.

"Hereupon the Athenians do *ascribe* that day for a most unfortunate day."—North: Plutarch, p. 181.

2. To attribute, to impute, to assign. Used—

(a) *Of qualities or actions attributed to a person or other being*:

"... *ascribe* ye greatness unto our God."—Deut. xxxii. 3.

"They have *ascribed* unto David ten thousands, and to me they have *ascribed* but thousands."—1 Sam. xviii. 8.

(b) *Of effects attributed to causes*:

"The mind, indeed, enlighten'd from above,
Views Him in all; *ascribes* to the grand cause
The grand effect; ..."—Cowper: Task, bk. iii.

¶ Regarding the difference between the verbs *to ascribe*, *to impute* and *to attribute*, Crabb considers that *to ascribe* is *to assign* anything in one's estimate as the possession or the property of another; *to impute* is to form an estimate of a person, and *to attribute* is to assign a thing as a cause. What is *ascribed* is generally honorable; what is *imputed* is generally dishonorable." (Crabb: English Synonyms.)

a-scri'-bed, *pa. par.* [ASCRIBE.]

a-scrib'-ing, *pr. par.* [ASCRIBE.]

***a-scri'e**, ***a-skri'e**, ***a-skrŷ'e**, *v. t.* [Cf. Sw. *anskrī*=an outcry, scream, cry; O. Fr. *escrier*=to call out.] To cry out to, to shout to.

"Seraphe was of hem wel war and faste him *ascries*."
Joseph of Arimathe (ed. Skeat), 530.

a-scrip'-tion, *s.* [Lat. *ascriptio*=an addition in writing: from *ascribo* (ASCRIBE); or from *ad*=to, and *scriptio*=the act of writing; *scribo*=to scrape with a sharp point, ... to write.]

1. The act of attributing, imputing or assigning, as an effect to a cause, or qualities or actions to any being; the state of being attributed.

"... that noble subsequent life which would render simply impossible the *ascription* to Faraday of anything unfair."—Tyndall: Frag. of Science, xii. 357.

2. That which is ascribed.

as-crip'-tī-tious, *a.* [Lat. *ascriptitius*=enrolled.] Ascribed, imputed, assigned.

"An *ascriptitious* and supernumerary god."—Farindon: Sermons, p. 82.

as-ċŷ'-rūm, *s.* [Lat. *ascyron*; Gr. *askyron*, a kind of St. John's Wort.] A genus of plants belonging to the order Hypericaceæ, or Tutsans. They are found in North America.

a-se'-i-tŷ, *s.* [As if from Low Lat. *aseitas*.] The state or condition of having an independent existence. (Prof. W. R. Smith.)

***ā'-sēl**, *s.* [AYSELL.]

***a-sē-le**, *v. t.* [A. S. *asælan*=to bind, fasten.] To seal.

"The Angel him schewed, with-outen weoles,
A put *asēled* with seven seles."
The XI. Pains of Hell (ed. Morris), 193-4.

a-sēl'-lī, *s. pl.* [ASELLUS.]

a-sēl'-lī-dæ, *s. pl.* [ASELLUS.]

Zool.: A family of Isopod Crustaceans. Some species are marine, and others fresh-water. The *Limnoria terebrans*, so destructive to woodwork immersed in the ocean, belongs to the family.

a-sēl'-lūs (pl. **a-sēl'-lī**), *s.* [Lat. *asellus*=a little ass.]

1. Zool.: The typical genus of the Asellidæ. It contains the *A. aquaticus*, or Water-hog Louse, common in fresh water.

2. Astron.: Two stars in the constellation Cancer. The Greeks, through whom we have received the sign Cancer, placed two asses in it, where they still remain, under the titles of Asellus Boreas and Asellus Australis; and near them is the asterism Præsepe, or the Manger, in which there are about forty small stars visible in the telescope.

a-sēp'-sis, *s.* [Pathol.: [Gr. *a*, priv.=not, and *sēpsis*=putrefaction.] The condition of being free from putrefaction; absence of toxinous or pathogenic bacteria.

a-sēp'-tā, *s. pl.* [N. pl. of Gr. *asēptos*=not liable to putrefy; *a*, priv., and *sēptos*=putrefied; *sēpō*=to putrefy.] Substances not liable to putrefaction.

a-sēp'-tic, *a.* [Gr. *asept(a)*; Eng. suff. *-ic*.] Not liable to putrefaction; free from septic matter or toxinous bacteria.

aseptic operation, *s.* *Antiseptic surgery*: The asepticizing of a wound by the introduction into it of antiseptic solutions. This operation is not necessary except where septic matter has been carried into the blood or where the wound has not been promptly treated by antiseptics (q. v.).

a-sēp'-tī-ċism, *s.* [Eng. *aseptic*; *-ism*.] The doctrine or principles of antiseptic surgery (q. v.).

a-sēp'-tī-ċi-tŷ, *s.* [Eng. *aseptic*; *-icity*.] The quality of being aseptic.

a-sēp'-tī-ċize, *v. t.* [Eng. *aseptic*; *-ize*.] To cause to become aseptic.

a-sēp'-tō-lin, *s.* [ASEPTIC.] A preparation of carbolic acid designed as a germicide in cases of phthisis, invented by Dr. Cyrus Edson, of New York, and announced by him in February, 1896.

***a-sē'rue**, ***a sērve**, *v. t. & i.* To merit, to deserve.

"Vche mon schal haue as thei a serue."
Mary and the Cross (ed. Morris), st. xxxvii. 478.

***a-sēs'se**, *v. t.* [Fr. *cesser*=to cease.] To cause to cease. [ACESE.]

"And assesse the werre anon,
Betwyxe hym and hys brother Jhon."
Richard, 6,311. (*S. in Boucher*.)

a-sēth'. [ASSETS.]

***a-sēt'-nēs**, *s.* [A. S. *asetnys*=what is set or fixed; a statute, a law.] A regulation.

"This ilke abbot at Ramsai
Asetnes set in his abbai."

MS. Coll. Med. Edinb., H. iii., 12, f. 47b. (*S. in Boucher*.)

ā-sēx'-ū-ā, *a.* [Gr. *a*, priv., and Eng. *sexual*.]

Bot.: Without sexes. Applied to the flowerless plants in which stamina and pistils are wanting.

***āš-fa'ste**, *adv.* [Eng. *as*; *fast*.] Anon, quickly. (*Prompt. Parv.*)

Āš'-gard, *s.* [O. Sw., &c.] An old Scandinavian deity.

"... of his eyebrows they formed Asgard their god's dwelling."—*Carlyle: Heroes and Hero-Worship*, Lect. i.

A. Ordinary Language:

†I. In the singular: Rarely used as a simple word, except by geologists and chemists. In composition, however, it is very common. (See words under C. and II. Plur.)

"With fyre foule Heauin consumit was with as
For that foule stinkand sin of Lychorie."

E. E. Text. Soc., Lauder's Minor Poems, 503.

"Collected, my ledly! what would ye collect out of the sute and the ass?"—*Scott: Bride of Lammermoor*, ch. xi.

"... an amalgam of coarse altered ash."—*Q. J. Geol. Soc.*, vol. xxxii. (1876), p. 22.

II. In the plural:

1. Literally:

(a) *Gen.*: The residuum left after the burning of anything combustible.

"... and take up the ashes which the fire hath consumed."—*Lev.* vi. 10.

(b) The remains of a cremated dead body preserved in an urn or coffin; or more figuratively, the remains of a body buried without cremation.

"And the ashes of Johne the baptyste."

The Stacions of Rome (ed. Furnivall), 417.

"The coffins were broken open. The ashes were scattered to the winds."—*Macaulay: Hist. Eng.*, ch. xi.

"E'en in our ashes live their wonted fires."

Gray: Elegy, 23.

2. Fig.: Whatever is worthless or expresses humiliation; referring, however, to the fact that of old a person in calamity would at times put ashes upon his head, or, groveling on the ground, bury his lips among them, as if he were feeding upon them.

"He [the idolater] feedeth on ashes: a deceived heart hath turned him aside . . ."—*Isa.* xlv. 20.

"He hath cast me into the mire, and I am become like dust and ashes."—*Job* xxx. 19.

"To give unto them beauty for ashes."—*Isa.* lxi. 3.

B. Technically:

Geol. **Volcanic ashes**, **volcanic ash**: The porous remains of certain molten rocks thrown out by ancient volcanoes, and in many cases laid down in beds stratified by the gravitation of the falling bodies themselves, or by the action of water. (For example see A. 1.)

† For the distinction between *ashes* and *tuffs* see the subjoined example.

"In answer to the question as to what was the difference between *ashes* and *tuffs*, he [Mr. David Forbes, F. R. S.] defined *ashes* as purely sub-aërial formations, thrown out of the volcanic orifice, and falling down on land or sea, as the case happened; whilst *tuffs*, on the contrary, were molten lava poured out into, or more often under, water, and thus instantaneously quenched and disintegrated into fragments of powder, more or less fine, in proportion as the action of the water was overpowering. In *ashes* each separate particle bore on its exterior the evidence of its having been exposed to the action of fire in the throat of the volcano, and externally is altered, glazed, or coated with a crust or skin, often resembling that of a meteorite, an appearance which is never to be observed in *tuffs*."—*Q. J. Geol. Soc.*, vol. xxxi. (1875), p. 421.

C. In composition: Denoting various objects having certain similarities of form, color, &c., to ashes.

ash-color, *s.* A color like ash or ashes. [ASH-COLORED.]

ash-colored, *a.* Colored like ashes. Between brown and gray.

"Clay, ash-colored, was part of a stratum which lay above the strata of stone."—*Woodward: On Fossils*.

Ash-colored Falcon: A name for Montagu's Harrier (*Circus cineraceus*).

Ash-colored Harrier: Another name for the same bird.

ash-fire, *s.* The subdued or low fire used in chemical furnaces. (*Todd*.)

ash-gray, *a.*

Bot., &c.: A mixture of pure white and pure black, so as to form an intermediate tint. (*Lindley*.)

ash-grayish, *a.*

Bot., &c.: Ash-gray, but with more of the white admixed. (*Lindley*.)

ash-hole, *s.* A receptacle for ashes beneath a furnace.

ash-pan, *s.* A pan beneath a furnace or grate for the reception of ashes.

ash-tub, *s.* A tub beneath a furnace or grate for the reception of ashes.

Ash-Wednesday, *s.* [Eng. *Ash*; *Wednesday*. In Sw. & Dan. *Aske-onsdag*; Dut. *Ashdag*; Ger. *Aschermittwoch*.] The first day of Lent, the connection of which with "ash" or ashes seems to have been that, according to the injunction of Pope Gregory the Great, in the sixth century, ashes, which first had been blessed, were sprinkled on the heads of worshipers, or the form of the cross was traced with ashes upon their foreheads, one main object at first being to put them in remembrance that their bodies were but "dust and ashes." As on the same day notorious sinners, professing penitence, had to appear in church clothed in sackcloth, and with tears solicit absolution, repentance "in sackcloth and ashes" was also suggested, and added a fresh association with the day. At the time of the Reformation the law or practice which required applicants for pardon of sin to be subjected to this severe discipline was swept away, and the "Commination" service, still in use, was introduced in its room, "until the said discipline may be restored again, which is much to be wished." (*Liturgy: Commination*.)

āsh (2), ***āsche**, ***ēsche**, *s., a. & in comp.* [A. S. *æsc*; Sw. *ask*; Dan. *ask*, *asketræ*; Dut. *esch*, *esscheboom*; Ger. *esche*; O. H. Ger. *asc*, *asch*; O. Icel. *askr*.]

A. As substantive:

I. Ordinary Language:

1. The name of a well-known tree, the *Fraxinus excelsior*. It has pinnate leaves. The flowers, which come out before the leaves, are destitute of calyx and corolla. The stamens are two, the fruit a two-celled and two-seeded samara.

"And ash far-stretching his umbrageous arm."

Cowper: Task, bk. i.

2. The wood of the ash (*Fraxinus excelsior*). It is used for the construction of various agricultural implements. The qualities to be sought in good ash-wood are strength, toughness, and elasticity.

"Let me twine

Mine arms about that body, where against,
My grained ash an hundred times hath broke,
And scar'd the moon with splinters."

Shakesp.: Coriolanus, iv. 5.

II. Scripture: The ash of Scripture, in Heb. *ōrēn* (*Isa.* xlv. 14), is probably not a *Fraxinus*, but what it is has not yet been decided.

"... he planteth an ash, and the rain doth nourish it."—*Isa.* xlv. 14.

B. As adjective: Made of ash; pertaining to the ash; resembling the ash. [ASHEN (2).]

C. In composition: Denoting=made of, or pertaining to ash.

ash-keys, *s. pl.* The seed-vessels of the ash. [ASHEN KEYS.]

"As I have seen the ash-keys fall on a frosty morning."—*Scott: Tales of my Landlord*, xxv.

ash-spear, *s.* A spear of which the wooden portion is made of ash.

"The tough ash-spear, so stout and true,
Into a thousand flinders flew."

Scott: Lay of the Last Minstrel, iii. 6.

ash-tree, *s.* *Fraxinus excelsior*, described above.

"Then the angry Hiawatha
Raised his mighty bow of ash-tree,
Seized his arrows, jasper-headed,"

Longfellow: Song of Hiawatha, ix.

ash-weed, *s.* A name sometimes given to the Gout-weed (*Egopodium podagraria*), from the resemblance of its leaflets to those of the ash-tree.

ash-wood, *s.* The wood of the ash-tree.

"Like reeds he snapped the tough ash-wood."

Scott: Rokeby, v. 36.

ā-shā'me, ***as-çhā'me** (pa. par. **ā-shā med**, ***ā-shā'-mýd**, ***a-sçhā'-mýd**), *v. t.* [Eng. *a*; *shame*. A. S. *ascamian*=to be ashamed; *gescamian*=to make ashamed; from *scama*=shame; *gescamian*=to shame, to blush. In Dut. *beschaamd* is an adj.=ashamed; Ger. *beschämen*=to shame.]

A. As a verb in contradistinction to a participle it is obsolete: To put to shame; to cause to blush.

B. As a past participle (ashamed, **ashamyd*, **aschamyd*), it is in common use: Made to blush, or feel abashed or confused, from consciousness of secret guilt, from a feeling of inferiority, from the humiliation produced by the exposure of disreputable moral conduct, or of intellectual folly with which one is chargeable.

† In Scripture it is followed by *of*, or more rarely by *for* or *because*, applied to that which causes the shame.

"And Moab shall be ashamed of Chemosh, as the house of Israel was ashamed of Beth-el their confidence."—*Jer.* xlviii. 13.

"... they shall see, and be ashamed for their envy at the people."—*Isa.* xxvi. 11.

"... they shall be ashamed because of their sacrifices."—*Hosea* iv. 19.

In *Ordinary Language*: To be ashamed for a person is to blush on account of his misconduct, the desire being felt that he should not disgrace himself.

ā-shā'm-ēd-lý, *adv.* [Eng. *ashamed*; *-ly*.] So as to manifest shame; bashfully. (*Huloet*.)

āsh'-būd, *s.* [Eng. *ash* (2), and *bud*.] A bud on or from an ash-tree.

"Darker than darkest pensies, and that hair

More black than ashbuds in the front of March."

Tennyson: The Gardener's Daughter.

***ashe**, *v. t.* [ASK.]

āsh'-ēn (1), *a.* [From Eng. *ashes*.] Of a color between brown and gray.

"On the Earl's cheek the flush of rage

O'ercame the ashen hue of age."

Scott: Marmion, vi. 14.

āsh'-ēn (2), **ās'-shēn**, *a.* [From Eng. *ash*; and suff. *-en*. In Ger. *aschen*.]

1. Pertaining to the ash-tree.

2. Made of ash-wood.

"And each his ashen bow unbent."

Scott: Lord of the Isles, iv. 9.

ashen keys. The seed vessels of the ash-tree.

They are called by botanists *Samaras*, i. e., dry, indehiscent, winged, two-celled, two-seeded capsules. [SAMARA.] Their length and lateral compression create the resemblance to keys.

[ASH-KEYS.] *Her.*: The seed-vessels of the ash-tree, which are occasionally represented on an escutcheon. (*Gloss. of Heraldry*, 1847.)

ā-shīne, *a.* Shining; radiant; bright. Ashen Keys.

āsh'-lār, **āsh'-lēr**, ***a-çhēl'-or** (Eng.), **āis'-lēr**, ***āis'-lār**, ***ēst'-lēr** (Scotch), *s. & a.* [O. Fr. *aisseler*, from *aisselle*=the armpit; Lat. *axilla*=the armpit.] [AXIL.]

A. As substantive:

Arch.: Hewn or squared stone used in building, as contradistinguished from that which is rough, as when it came from the quarry. "J. J." in

Ashlar.

Boucher's *Dict.* states that the earliest instance of the use of the word *ashlar* which had been discovered when he wrote, was in connection with the erection of the College of Fotheringhay. [See example.]

fāte, **fāt**, **fāre**, **amidst**, **whāt**, **fāll**, **father**; **wē**, **wēt**, **hēre**, **camel**, **hēr**, **thēre**; **pīne**, **pīt**, **sīre**, **sīr**, **marine**; **gō**, **pōt**, **or**, **wōre**, **wolf**, **wōrk**, **whō**, **sōn**; **mūte**, **cūb**, **cūre**, **unite**, **cūr**, **rūle**, **fūll**; **trȳ**, **Sȳrian**. **æ**, **æ = ē**; **ey = á**. **qu = kw**.

"... the ground of the body and isles be maad within the ende under the ground table-stones with rough stone; and all the remanent of the said body and isles, unto the full hight of the said quire, with cleane hewne ashler, altogedir in the outer side unto the full hight of the said quire."—*An Indenture* (A. D. 1411), *Monast. Anglic.*, vi. 1, 414.

Nigged Ashlar: Stone hewn with a pick or with a pointed hammer, instead of with a chisel. The term is used principally in connection with the hewing of the hard Aberdeen granite. (*Weale: Rudiment. Dict. of Terms used in Arch.*, pt. iii., p. 304.)

B. As adjective: Pertaining to hewn or squared stones; made of or with ashlar or hewn stones.

"The ashler buttress braves its force."

Scott: *Cadzow Castle*.

"It is no square-built gloomy palace of black ashlar marble, shrouded in awe and horror, as Gray gives it us, . . ."—*Carlyle: Heroes and Hero-Worship*, Lect. i.

āsh'-lēr-ing, *s.* [Eng. *ashler*; -ing.]

Architecture:

1. Pieces of wood, about three feet high, placed in garrets so as to cut off the acute angles formed by the junction of the roof and floor.

2. The act of bedding ashlar in mortar.

a-shō'-ca, a-sō'-ca, *s.* [In Bengali, &c., *ashoka*.] A magnificent tree, the *Jonesia asoca*, called after Sir William Jones, founder of the Asiatic Society, who says that the vegetable world scarce affords a richer sight than an ashoka-tree in full bloom. The flowers, which are in cymes, are of a rich orange color. The fruit is leguminous. The tree is wild in the Malayan peninsula, and also cultivated in Indian gardens.

a-shō're (1), *adv.*

1. Aslope, slantwise. (*Babes Book* (ed. Furnivall), p. 121.)

2. Astraddle. (*Ibid.*, p. 136.)

a-shō're (2), *adv.* [Eng. *a=on*; *shore*.]

1. To the shore; upon the shore from the sea. *Used* (a) of a person landing from a ship:

"Yet then, when called ashore, he sought

The tender peace of rural thought."

Wordsworth: *To the Daisy*.

Or (b) of the ship itself flung ashore, or anything from the deep similarly hurled upon the land.

"May thy billows rowl ashore

The beryl and the golden ore."

Milton: *Comus*.

2. On the shore, as contradistinguished from being on board a ship or in the sea.

"Our position was often ashore."—*Hooker: Himalayan Journals*, ch. iii.

Āsh'-tōr-ēth, **Ās'-tōr-ēth**, **Ās-tar'-tē** (pl. **Āsh'-tār-ōth**), *s.* [Heb. *Ashtōreth*, pl. *Ashtarōth*; Gr. *Astartē*; Assy. *Ishtar*; Pers. *Istarah*; Gr. *Astēr*=a star.] [STAR.] A goddess worshiped in Phenicia, Philistia, and elsewhere. She was symbolized by the moon, and also by the planet Venus. The place Asteroth Karnaim (Gen. xiv. 5) means the horned or mooned Astartes, probably from images of that goddess set up and worshiped there.

She is supposed to be the "Queen of Heaven," mentioned in Jer. vii. 18 and xlv. 17. Heb. *āshērah*, wrongly translated "grove" or "groves" in Judg. vi. 25, 2 Kings xxiii. 4, and various other places, seems to signify an image of Astarte. It is connected with Heb. *ēshēr*=happiness, good fortune, Astarte being the goddess of good fortune. She represented the female principle, and was worshiped with impure rites. She is frequently connected with Baal, the corresponding male divinity. [BAAL.]

"For Solomon went after *Ashtoreth*, the goddess of the Zidonians."—1 Kings xi. 5.

āsh'-y, *a.* [Eng. *ash*; -y.] Of an ash color, or tending toward one; whitish-gray, pale.

"And dying eyes gleam'd forth their *ashy* lights,

Like dying coals burnt out in tedious nights."

Shaksp.: *Tarquin and Lucrece*.

ashy-green, *a. & s.*

A. As adjective: Colored green, commingled with ash color.

B. As substantive: The color now described.

"... the back of an *ashy-green*."—*Warrington, in Miscell. and Mag. of Nat. Hist.*, October, 1852.

ashy-pale, *a.* Pale like ashes.

"... he looked *ashy-pale* and haggard."—*Hooker: Himalayan Journals*, vol. ii., p. 201.

Ā-sia (sia as *shā*), *s.* [Sw. & Dan. *Asien*; Dut. *Azie*; Fr. *Asie*; Sp., Port., Ital. & Lat. *Asia*; Gr. *Asia*.]

A. Classical Mythology:

1. A daughter of Oceanus, mentioned by Hesiod, the first Greek writer who used the term *Asia*, and then not in a geographical sense.

2. The wife of Prometheus.

B. Geog.: [*Asia* in this sense is said to be derived from the daughter of Oceanus afore-mentioned.]

*1. Apparently the region east of the Archipelago once ruled over by King Attalus, and extending from Pergamos, in Mysia, to Caria. Herodotus is the first writer in which this—the oldest—geographical sense of the word *Asia* is known to occur. Livy also uses it with the same signification, generally known as *Asia Minor*.

2. The Roman province of the name, including Phrygia, Mysia, Lydia, and Caria. This is the New Testament sense of the word.

"... the dwellers in Mesopotamia, and in Judea, and Cappadocia, in Pontus, and *Asia*, Phrygia, and Pamphylia, . . ."—*Acts* ii. 9, 10.

3. The great continent east of Europe and Africa. When this extended sense was introduced, then the region between the Black Sea, the Archipelago, and the Mediterranean, within which the Roman province of Asia was situated, came to be called in Latin, by way of distinction, *Asia Minor* (Lesser Asia). The first author known to have used the latter term for Asia west of the Taurus was Orosius, in the fifth century A. D. (See *Trench: On the Study of Words*, p. 96.)

C. Astron.: An asteroid, the sixty-seventh found. It was discovered by Pogson on the 18th of April, 1861.

Ā-sian (sian=*shan*), *adj.* [Lat. *Asius*,] Belonging to Asia.

"From *Asian* Taurus, from Imaus stretch'd."

Thomson: *Seasons; Autumn*.

Ā-si'-arch (or *sī=shī*), *s.* [In Ger. *Asiarch*; Fr. *asiarque*; Lat. *asiarchus*; Gr. *asiarchēs*.]

Under the Romans: The director-general of religious ceremonies in the province of Asia. The expression occurs in the Greek Testament, *Tines de kai tōn Asiarchōn*, "And certain also of the Asiarchs" (*Acts* xix. 31). Properly speaking, there was but one Asiarch residing at Ephesus; the others referred to were his subordinates.

Ā-si'-āt'-ic, ***Ā-si'-āt'-ick** (or *sī=shī*), *a. & s.* [In Fr. *Asiatique*, *adj.*; Sp., Port. & Ital. *Asiatico*; Lat. *Asiaticus*; Gr. *Asiaticos*.]

A. As adjective: Pertaining, relating, or belonging to Asia in any of the geographical senses of that word.

Now (Spec.): Referring to the Asiatic continent.

"The commerce of *Asiatic* Russia bears a small proportion to that of European Russia, the proportion being as 4 to 35."—*Leoni Levi: Hist. Brit. Comm.* (1872), p. 467.

Asiatic Society: The name given to any society which makes Asia and its inhabitants the main subject of inquiry. The first modern society of the kind was the Asiatic Society of Bengal, founded at Calcutta by Sir William Jones, in January, 1784. The Royal Asiatic Society of Great Britain and Ireland was formed in March, 1823, and incorporated in August, 1824. It holds its meetings in London, but has affiliated societies or branches at Bombay and Madris. The Bengal Society also, though earlier in point of time, is now virtually a third branch. Other Asiatic societies exist among the Continental nations of Europe, the best known being that of Paris, founded in 1822.

¶ For terms in Zoology, Botany, &c., commencing with *Asiatic*, such as *Asiatic elephant*, see the substantives subjoined.

B. As substantive: A native of Asia in any of the geographical senses of the word. *Spec.*, a native of the Asiatic continent.

"If the Japanese and the Malays exhibit a character manly, enterprising, and different from that of the other *Asiatics*. . . ."—*Matte Brun: Phys. Geog.*, 2d ed. (1834), p. 622.

Ā-si'-āt'-i-çism, *s.* [Eng. *Asiatic*; -ism.] An imitation of Asiatic manners.

a-si' de, *adv.* [Eng. *a=on* or *to*; *side*.] [SIDE.]

A. Ordinary Language:

I. To one side.

1. In a general sense:

"... are cast *aside*,

As useless, to the moles and to the bats."

Couper: *Task*, bk. vi.

2. Specially:

(a) To or at a little distance from the rest; to be left in waiting, or for some other purpose.

"... thou shalt set *aside* that which is full. . . ."—2 Kings iv. 4.

(b) To a solitary spot; outside a crowd.

"And he took him *aside* from the multitude, . . ."—*Mark* vii. 33.

II. At one side. Specially—

1. Out of hearing, privately, or to one's self.

"Then lords and ladies spake *aside*,

And angry looks the error chide."

Scott: *The Lord of the Isles*, ii. 7.

¶ So in dramas a speaker makes certain statements *aside*.

2. Away from the body, as a garment taken off and then laid down.

"He riseth from supper and laid *aside* his garments."—*John* xiii. 4.

¶ In Scotch it is sometimes used as a preposition = beside.

"Since Maggie I am in *aside* ye."

Tannahill Poems, p. 153. (*Jamieson*.)

III. Figuratively:

1. Morally separate; away from the soul, or away from the right direction.

"... let us lay *aside* every weight, and the sin which doth so easily beset us, . . ."—*Heb.* xii. 1.

(The metaphor is that of a long flowing garment hovering around us, and tripping the feet when we attempt to run.)

2. Away from the morally right path.

"They are all gone *aside*, they are all together become filthy."—*Ps.* xiv. 3.

B. Technically:

Law: To set *aside* a verdict is to render it abortive, to quash it, to overthrow it. To set *anything aside* = to destroy it, or render it abortive.

***a-si'-dis hālf**, *adv.* To one side; aside. (*Wycliffe: Kings* iii. 27.)

as-i-ēn'-tō. [ASSIENTO.]

***a-si'le**, *s.* [ASYLUM.] A retreat; a place of safety. (*Wycliffe: 2 Macc.* iv. 34.)

a-sil'-i-dæ, *s. pl.* [ASILUS.]

Entom.: A family of insects belonging to the order Diptera, and the tribe Brachycera. They are generally called Hornet-flies. They are fierce and voracious, mostly feeding on other insects, which they catch on the wing. In flying they make a humming noise.

āš'-il-ūs, *s.* [Lat. *asilus*=a gadfly, a horsefly.] A genus of two-winged flies (Diptera), the typical one of the family Asilidæ.

***ās'-in-ar-y**, *a.* [Lat. *asinarius*.] Pertaining to an ass.

ās-i-nē'-gō, **ās-si-nē'-gō**, *s.* [Sp. *asnico*=a small ass.]

1. *Lit.:* A small ass.

"We jogged leisurely on upon our mules and *assin*-negoes."—*Sir T. Herbert: Travels*, p. 127.

2. *Fig.:* A stupid fellow.

"Or are you so ambitious 'bove your peers,

You'd be an *assinego* by your years?"

Ben Jonson: *Expost. with Inigo Jones*.

ās'-in-ine, *a.* [In Sp. & Ital. *asinino*; Lat. *asininus*.]

1. Pertaining or relating to an ass, as the animal actually is.

"You shall have more ado to drive our dullest youth, our stocks and stubs, from such nurture, that we have now, to hale our choicest and hopefulest wits to that *asinine* feast of sow-thistles and hophulles."—*Milton*.

2. Stupid, silly, as the ass is popularly believed to be. [PONS ASINORUM.]

ās-i-nin'-i-tŷ, *s.* [Eng. *asinin(e)*; -ity.] *Asinine* behavior; obstinate stupidity.

ās'-in-ūs, *s.* [Lat.] A genus of mammals, of the order Pachydermata, and sub-order Solipedia. It contains the ass. There is a fossil ass or zebra (*Asinus fossilis*) in the drift and cave period, and in the marl beneath the peat. (*Owen: British Fossil Mammals and Birds*, pp. 396-398.)

ās'-i-ō, *s.* [Lat.] The name used by Pliny and adopted by Swainson for the "Horned Owls." It is not now generally used, *Bubo* having taken its place. [BUBO.]

a-si'-phōn-ate, *a.* [Gr. *a*, priv., and Eng. *siphonate*.]

In Conchology: Destitute of siphon.

"Some holostomatous and *asiphonate* Gastropods."—*Owen: Classif. of the Mammalia*, p. 61.

a-sit'-i-a, *s.* [Gr. *asitia*=want of food, loss of appetite; *asiteō*=not to eat; *asitos*=without eating; *a*, priv., and *sitos*=wheat; also food.]

Med.: Loss of appetite, loathing of food.

ask, ***aske**, ***asche**, ***ashe**, ***ask'-i-ēn**, ***ēsk'-i-ēn**, ***ask'-ēn**, ***ask'-in**, ***ass**, ***axe**, ***āx'-i-ēn** (pret. **asked**, ***ask'-ēde**, ***āsch'-ēd**, ***āc'-sēde**, ***āsch'-ēde**, ***ē-āsk'-ed**), *v. t. & i.* [A. S. *acsian*, *ascian*, *acsian*, *ahsian*, *axian*, *acsigan*, *axigean*. In Sw. *aska*; O. Icel. *ækja*; O. Fris. *askea*, *aschia*; Dut. *eischen*; Ger. *heischen*; O. H. Ger. *eiscen*; O. L. Ger. *escon*=to ask; Sansc. *ish*=to desire.]

A. Transitive:

I. To solicit or demand a reply in words to a question put.

1. To question, to inquire of, to interrogate.

"... when your children *ask* their fathers in time to come, saying, What mean ye by these stones?"—*Josh.* iv. 6.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aq; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bel, del.

¶ Sometimes the word *question* is put after the interrogatory verb, as—

“ . . . neither durst any man from that day forth ask him any more questions.”—*Matt.* xxii. 46.

2. To inquire about, to solicit information regarding.

“Ask counsel, we pray thee, of God, . . .”—*Judg.* xviii. 5.

¶ *Ask* in this first sense of inquire is followed by the objective of the person, and concerning or regarding or of prefixed to the thing about which information is solicited.

“Ask now the priests concerning the law, . . .”—*Hagg.* ii. 11.

“Ask me of things to come . . .”—*Isa.* xlv. 11.

*II. To lay to one's charge; the original meaning probably being to demand from one an answer to a charge.

“False witnesses did rise up; they laid to my charge [margin, *asked*] me things that I knew not.”—*Ps.* xxxv. 11.

III. To solicit or demand any desirable thing, as contradistinguished from mere words.

1. To solicit by prayer or petition; to beg.

“Wherefore I *aske* you pardoun and youre grace, Sithe me behoveth deth or youre mercye.”
La Belle Dame Sanz Mercy (ed. Furnivall), 687-8.

“ . . . ye shall *ask* what ye will, and it shall be done unto you.”—*John* xv. 7.

2. To demand (of), to require (from), or, at least, to expect (from).

“To whom men have committed much, of him they will *ask* the more.”—*Luke* xii. 48.

IV. To invite: as, To *ask* one to a party.

¶ To *ask after* one: To inquire after one's health.

V. *Fig.*: To require, to need, to stand in need of.

“To carry nature lengths unknown before,
To give a Milton birth *ask'd* ages more.”
Cowper: Table Talk.

“Man's coltish disposition *asks* the thong.”
Cowper: Progress of Error.

¶ Or it is followed by two objectives, the one of the person and the other of the thing:

“ . . . I will *ask* thee a thing; hide nothing from me.”—*Jer.* xxxviii. 14.

(Properly speaking, there is an ellipsis, of being omitted before the person: “I will *ask* [of] thee.”)

In the sentence, “Ask us a king” (1 Sam. xii. 19), there seems an ellipsis of *for*: “Ask [for] us a king.”

¶ Or it is followed by the objective of the thing, and of, from, or at of the person the last named:

“Ask thee a sign of the Lord thy God; . . .”—*Isa.* vii. 11.

B. *Intransitive*:

1. To inquire, to put a question, to solicit Divine direction.

“I *ask* therefore for what intent ye have sent for me?”—*Acts* x. 29.

2. To pray, to solicit.

“But let him *ask* in faith, nothing wavering.”—*James* i. 6.

¶ *Ask*, *v. i.*, is followed by *of* or *at* prefixed to the person addressed.

“ . . . thou wouldest have *asked* of him, and he would have given thee living water.”—*John* iv. 10.

“ . . . have not *asked* at my mouth.”—*Isa.* xxx. 2.

Or before a noun of multitude *among* may be used.

“Ask ye now *among* the heathen, who hath heard such things, . . .”—*Jer.* xviii. 13.

¶ The object inquired about or petitioned for is preceded by *for* or *after*.

“That any spir, othir man or wine,
Or efter the cros will the ass,
That ihesu crist on hanged was.”
Finding of the Cross (ed. Morris), 186-188.

“ . . . *ask* for the old paths, where is the good way and walk therein, . . .”—*Jer.* vi. 16.

“Why *askest* thou thus after my name, . . .”—*Judg.* xiii. 18.

**āske*, **āsk-ēr* (*O. Eng.*), *ask*, **ēsk* (*Scotch*), *s.* [A. S. *athere* = a lizard, a newt; Ger. *eidechse* = a lizard; O. H. Ger. *egidehsa*.] A water-newt, an eft. Any of the Tritons or Lissotritons. (*Scotch.*) [TRITON, LISSOTRITON.]

as-kā'nt, **as-kā'unt*, **as-cā'unt*, *adv.* [Connected on the one hand with *askance*, and on the other with *aslant* (q. v.); O. Fr. *a scanche* = obliquely (*Palsgrave*).] Obliquely, askance, askew, aslant, slantingly. (Used specially of the eyes.)

“At this Achilles roll'd his furious eyes,
Fix'd on the king *askaunt*, and thus replies:
O, impudent.”
Dryden.

as-kā'nçe, **as-kā'unçe*, **as-cā'unçe*, **as-cā'uns*, *adv.* [Wedgwood derives this from O. Fr. *ascanche* = awry, crosswise; Ital. *schiancio*, as

adv. = oblique, sloping; as substantive = a declivity.] [ASKANT, ASKLENT, ASLANT, SKLENT, SLANT.] Obliquely, sideways; or applied to the eye, squintingly.

“Aside the devil turn'd
For envy; yet with jealous leer malign
Eyed them *askance*.”
Milton: P. L., bk. iv. 504.

¶ A contemporary of Spenser's, who wrote a glossary to that poet's *Shepherds Calendar*, included *askance* in his list of old words, but since then it has completely revived.

**as-kā'nçe*, *v. t.* [ASKANCE.] To turn away.

asked, **ask'-ēde*, *pa. par.* [ASK, *v. t.*]

**ask'-ēn*, *v. t.* [ASK.]

ask'-ēr (1) *s.* [Eng. *ask*; -*er*.]

1. One who asks in the sense of questioning or inquiring; an interrogator, an inquirer.

“Every *asker* being satisfied, we may conclude that all their conceptions of being in a place are the same.”—*Digby: Of Bodies.*

2. One who asks in the sense of petitioning; a petitioner.

“Have you
Ere now denied the *asker*? and, now again
On him that did not ask, but mock, bestow.”
Shakesp.: Coriol., ii. 3.

āsk'-ēr (2), *s.* [ASKL.] A newt.

**āsk'-ēs*, *s. pl.* [ASHES, ASH.]

as-kew' (ew=ū), **as-kū'e*, **as-cū'e*, *adv. & adj.* [Eng. *a*; *skew*. In Dan. *skiev* is=crooked, oblique; Dut. *schuin*=slant, sloping, oblique; *schuins*=slopingly; *schuinte*=slope; *schief*=wry, slanting, sloping; Ger. *schief*; Lat. *scævus*; Gr. *skaios*=on the left hand; Sansc. *sarya*=left.] [SKEW, SHUNT.]

A. *As adverb*:

1. Askance, askint. (Used of the eyes.)

“For when ye mildly look with lovely hue,
Then is my soul with life and love inspir'd:
But when ye lowre, or look on me *askew*,
Then do I die.”
Spenser: Sonnet, 7.

“He looked *askew* upon him, as one he envied or hated.”
—*Bp. Patrick* on 1 Sam. xviii. 9.

2. In an oblique direction. (Used of anything else.)

“All things are now discovered to proceed *askew*, the round world and all.”—*Gayton: Notes on Don Quixote*, p. 39.

B. *As adjective*: Oblique, awry.

“Thus in time the tail becomes quite *askew*, and is a tolerable guide to the length of time the bird has been sitting.”—*Mr. Ramsay*, quoted in Darwin's “Descent of Man,” pt. ii, ch. xv.

**as-kewse*, *v. t.* [EXCUSE.] Excuse, acquit.

ask'-īng, **ask'-yng*, *pr. par., adj., & s.* [ASK, *v.*]

A. & B. *As pr. par. & adj.*: In senses corresponding to those of the verb.

“With many an *asking* smile, and wondering stare,
They whisper round, and gaze upon Gulnare.”
Byron: The Corsair, iii. 16.

C. *As subst.*: Petitioning, expressed wish; solicitation.

“Here, too, lands may be had for the *asking*.”
Longfellow: Evangeline, ii. 3.

āsk'-īng-lŷ, *adv.* [Eng. *asking*; -*ly*.] In an inquiring manner; interrogatively.

**a-skōf*, *adv.* [O. Eng. *a*; *skof*=scoff.] In a scoffing manner; deridingly.

“Alisaunder loked *askof*
As he no gef nought therof.”
Alisaunder, 874. (*Boucher.*)

**a-slā'ke*, *v. t. & i.* [Eng. *a*; *slake*=slack; A. S. *aslacian*=to slacken, to loosen, to untie, to remit, to dissolve, to encrvate.] To cause to become slack, to slacken, to extinguish.

“That thurgh your deth your lignage schuld *aslake*.”
Chaucer: C. T., 8,013.

as-lā-nī, *s.* [From Turkish and Tartar *aslan*, *arslan*=a lion: as, *Alp Arslan*=Alp the Lion.] An old Turkish coin worth from 115 to 120 aspers. [ASPER.] It is not included in the *Statesman's Year-Book* among the coins now current in Turkey. Goodrich and Porter mention, on the authority of Buchanan, that the name *aslanī* is sometimes applied to the Dutch dollar in the Levant.

a-slā'nt, **a-slēt'*, **a-slout'*, **a-slō'wte* (Eng.), **as-klēnt'*, **as-klīnt'* (*Scotch*), *adv. & prep.* [Eng. *a*; *slant*. The *k* of the Scotch *asklent* connects it also with *askant*. In Sw. *slinta*=to slip, to slide; Dut. *slinks*=obliquely, *slinksch*=oblique; Wel. *ysglentio*=to slip or slide; O. Fr. *eschlincher*=to slip or slide; Ital. *a schianco*=crosswise, slopingly; in a wrong sense.] [ASKANT, ASKANCE, SLANT, GLANCE.]

A. *As adverb*:

1. *Lit.*: Not at a right angle; slantingly; obliquely. Not in a straightforward manner. [B.]

“Maggie coost her head fu' high,
Looked *asklent* and unco skeigh.”
Burns: Duncan Gray.

2. *Fig.*: In a morally oblique manner.

“Sin' thou came to the world *asklent*.”
Burns: To his Illegitimate Child.

B. *As prep.*: In a slanting direction to anything; obliquely to anything.

“The swelling upland, where the sidelong sun
Aslant the wooded slope, at evening goes.”
Longfellow: Spirit of Poetry.

¶ The old forms **aslet*, **aslout*, and **aslowte* are from *Prompt. Parv.*; and *aslout* in the *Babees Book* (ed. Furnivall), p. 155. Possibly they may be connected with *aslope* rather than with *aslant*.

a-slā'we, *pa. par.* [A. S. *aslegen*, *aslagen*=slain.] Slain.

“Tho caym hadde his brother *aslawe*, iflemd he was theruore.”
The Holy Rode (ed. Morris), 20.

a-slē'ep, *a. or adv.* [Eng. *a*=on, and *sleep*; A. S. *aslapan*=to be asleep.]

I. In sleep. (Applied to rest in the state of sleep.)

1. *Lit.*: In literal sleep, sleeping.

“The ship was covered with the waves; but He was *asleep*.”—*Matt.* viii. 24.

2. *Figuratively*:

(a) Dead; in the sleep of death.

“We which are alive, and remain unto the coming of the Lord, shall not prevent them which are *asleep*.”—1 *Thess.* iv. 15.

(b) Benumbed, numb. [II. 2 (b).]

II. Into sleep. (Applied to the passage from the state of waking to the state of sleep.)

1. *Lit.*: Into literal sleep.

2. *Figuratively*:

(a) Into death.

“When He had said this He fell *asleep*.”—*Acts* vii. 60.

(b) Benumbed; into a benumbed state.

“Leaning long upon any part maketh it numb, and, as we call it, *asleep*.”—*Bacon: Nat. Hist.*, cent. viii., § 735.

**a-slēt'*, *adv.* [ASLANT.]

a-slō'pe, *a. or adv.* [Eng. *a*=on, and *slope*.] With a slope; slopingly, aslant, obliquely.

“To set them, not upright, but *aslope*.”—*Bacon: Nat. Hist.*, cent. v., § 425.

**a-slō'wte*, *adv.* [ASLANT.]

a-slūg', *adv.* [Eng. *a*; *slug*.] After the manner of a slug—i. e., in a sluggish manner, sluggishly, lazily. (*Fotherby.*)

as-mat-ōg'-ra-phŷ, *s.* [Gr. *asma*, genit. *asmatos* = a song, from *adō*=to sing; *graphē*=a writing.] A writing about songs; a treatise on songs.

a-smear', *a.* [Eng. *a*=on, and *smear*, *s.*] Smeared over; befouled. (*Dickens: Great Expectations*, ch. xx.)

Ās-mōn-ē'-an, *Ās-mōn-æ'-an*, *a. & s.* [From *Asmoneus*. (See def.)]

A. *As adjective*: Pertaining or relating to Asmoneus, the great-grandfather of that Mattathias who commenced the Maccabee revolt. (*Josephus: Antiq.*, bk. xii., ch. vi. § 1.) Or pertaining or relating to the illustrious Jewish family of patriots and princes called after him.

B. *As substantive*: A member of the Asmonean family described above.

a-sō'ak, *a. or adv.* [Eng. *a*; *soak*.] Soaking, in a soaking state. (*Holdsworth.*)

a-sō'-ca, *s.* [ASHOCA.]

**a-sō'l*, *v. t.* [ASSOIL (1).]

a-sōm'-a-toūs, *a.* [Lat. *asomatus*; Gr. *asōmatos*, from *a*, priv., and *sōma*=body.] Destitute of a body; incorporeal. (*Johnson.*)

**a-sōm'-ōn*, *v. t.* [SUMMON.]

**a-sōn'-dēr*, *adv.* [ASUNDER.]

**asonghe*, *v.* [O. Fr. *essoynier*.] To excuse.

“And for-do all that wertow fare,
And thou may nocht *asonghe* the.”
Ratis Raving, bk. i. (ed. Lumby), 999, 1,000.

a-sō'-pī-a, *s.* [From Gr. *Asōpos*, the “god” of the river Asopus in Achaia (there was another in Beotia).] A genus of moths belonging to the family Pyralidæ. *A. farinalis* is the so-called Meal-moth. [MEAL-MOTH.]

āsp (1), *s.* [ASPEN.]

asp (2), *ās'-pīc*, *ās'-pīck*, *s.* [In Sw. *espīng*; Fr. *aspic*; Prov. *aspic*, *aspis*; Sp. *aspīd*; Port. *aspīde*, *aspīd*; Ital. *aspīde*; Lat. *aspis*; Gr. *aspis*=a round shield; an asp.]

1. The kind of serpent peculiar to Egypt and Libya, which has obtained great celebrity from having been chosen by Cleopatra to give her an easy death. Its poison is so quick and deadly in its operation, that it kills without a possibility of applying any remedy. It is believed to have been the Naia Haje. It is the same genus as the Cobra Capello, but differs in having the neck less wide, and having

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hère, camēl, hēr, thère; pine, pit, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

the color greenish, bordered with brown. It is probably the "asp" (*aspis*) of the New Testament (Rom. iii. 13), and the "asp" (*pethen*) of the Old (Deut. xxxii. 33; Job. xx. 14. 16; Isa. xi. 8.)

"Their wine is the poison of dragons, and the cruel venom of asps."—Deut. xxxii. 53.

"The poison of asps is under their lips."—Rom. iii. 13.

"Swell, bosom, with thy fraught,
For 'tis of aspics' tongues!"

Shakesp.: *Othello*, iii. 3.

2. The Common Asp or Chersæa (*Vipera aspis*) is alive above, with four rows of black spots. Its poison is severe. It is common in Sweden and some other parts of Europe.

3. (Poetically): Any venomous serpent. Describing the Laocoon, Byron says:—

"... the enormous asp
Enforces pang on pang, and stifles gasp on gasp."

Byron: *Childe Harold's Pilgrimage*, iv. 160.

**ās-pāl'-a-thūm*, s. [ASPALATHUS.] An obsolete name for Calambac wood. (See Parr's *Med. Dict.*) It is the same as AGALLOCH, AGILA, EAGLEWOOD, or LIGN ALOES (q. v.).

**ās-pāl'-a-thūs*, s. [In Fr. *aspalat*; Lat. *aspalathus*; Gr. *aspalathos*, a thorny shrub, the bark and roots of which yielded a fragrant oil. It has not been certainly identified. It was called from the island of Aspalathus, on the coast of Lycia, where it grew.]

1. The unidentified ancient shrub.

"I gave a sweet smell like cinnamon and *aspalathus*, and I yielded a pleasant odor like the best myrrh."—*Ecclus.* xxiv. 15.

2. A plant called the Rose of Jerusalem, or Our Lady's Rose. (*Johnson.*)

3. *Mod. Bot.*: A genus of plants belonging to the order Leguminosæ and the sub-order Papilionaceæ. It contains about 150 shrubs and under-shrubs, some of them cultivated in gardens. The genus stands in classification near *Ulex* (*Gorse*).

**ās-pā-lāx*, s. [Gr. *aspalax* or *spalax*=a mole.] A genus of Rodentia, to which belongs the *A. typhlus* of Turkey, Southern Russia, and Persia. It has no real affinity to our mole, which is ranked under the Insectivora, and not the Rodentia.

**ās-par-āg'-ē-æ*, *ās-par-a-gīn'-ē-æ*, s. pl. [ASPARAGUS.]

Bot.: A tribe or section of the order Liliaceæ (Lilyworts), consisting of species with succulent fruits. Type, *Asparagus* (q. v.). They have usually the stem fully developed, and sometimes, indeed, even arborescent, with branches. Sometimes it is forming. Sometimes, again, there is no stem; in which latter case the leaves are often coriaceous and permanent.

**ās-pār'-a-gī*, s. pl. [ASPARAGUS.]

**ās-pār'-a-gīn*, *ās-pār'-a-mīd*, s. [In Ger. *asparagin*; from Eng., &c., *asparagus* (q. v.).] A chemical substance found in the roots of marshmallows and the shoots of asparagus, and in several other plants. The crystals are brilliant, tasteless, transparent, and colorless. They have a faint cooling taste, and are soluble in water, especially if it is hot. The formula is $C_4H_8N_2O_3H_2O$. It is somewhat akin to Malamide. (*Fownes.*)

**ās-par-a-gīn'-ē-æ*, s. pl. [ASPARAGÆE.]

**ās-par-āg'-īn-ōus*, a. [Mod. Lat. *asparagin(ea)*, and Eng. suffix *-ous*.] Pertaining or relating to asparagus.

Asparaginous vegetables (*Gardening*): Those vegetables the tender shoots of which are eaten like those of asparagus.

**ās-pār'-a-gūs*, s. [In Sw. *sparris*; Dan. *asparges*; Dut. *aspersie*; Ger. *aspergie*, *spargel*; Fr. *asperge*; Sp. *esparrago*; Port. *asparago*; Ital. *sparago*, *asparago*; Russ. *sparsa*; Lat. *asparagus*, *aspharagus*; Gr. *asparagos*; Attic *aspharagos*, from *sparassō*=to tear. So called because of the strong prickles with which some of the species are armed. Formerly written *sperage* or *sparage*.]

A. *Ord. Lang.*: A culinary plant, the tender shoots of which are eaten. It is the wild *Asparagus* (*Asparagus officinalis*), developed by cultivation.

"Pardons for murder, for robbery, for arson were sold at Whitehall scarcely less openly than asparagus at Covent Garden."—*Macaulay: Hist. Eng.*, ch. xi.

B. *Bot.*: A genus of plants belonging to the order Liliaceæ, or Lilyworts, and the tribe Asparagus, of which it is the type. It contains the Common *Asparagus* (*A. officinalis*), which is a plant with drooping, greenish-white flowers, and red berries. As mentioned above, it is the origin of the Garden *Asparagus*.

In the plural. *Asparagi*: A name given by the old botanists to the shoots covered with scales, like those of the asparagus, which are sent forth by some plants. The name now given to such a shoot is *turio*. (*Lindley: Introd. to Bot.*, 3d ed., 1839, p. 72.)

Mineralogy. Asparagus-stone: A mineral, a variety of Apatite, found in Spain. Dana couples it with Moroxite, and places them both as a first sub-variety of ordinary Apatite, its only distinctive characteristic being its yellowish-green color.

**ās-par'-tāte*, s. [Eng. *aspart(ic)*; -ate.] [ASPARTIC ACID.]

**ās-pār'-a-mīd*, s. [Eng. *aspar(agus)* and *amid* (q. v.).] The same as ASPARAGIN (q. v.). (*Watts.*)

**ās-par'-tīc*, a. [Formed from *asparagin* (q. v.).]

aspartic acid ($C_4H_7NO_3$). An acid formed from animal or vegetable proteids. (*Watts.*)

**As-pā'-sī-a*, s. [From *Aspasia*; or from Gr. *aspasios*=gladly welcomed; *aspazomai*=to welcome kindly.] A genus of plants belonging to the order Orchidaceæ, or Orchids.

1. *Aspasia* was a daughter of Hermotimus of Phocæa, famous for her personal charms and elegance, and called *Milto* (vermilion) on account of her complexion. She was priestess of the sun, and loved successively by Cyrus, his brother Artaxerxes and Darius.

2. A daughter of Axiochus, born at Miletus, was famous for her mental and personal attractions. She taught eloquence at Athens. She became the mistress of Pericles.

**ās-pā'-sī-ō-lite*, s. [Gr. *aspasios*=greatly welcomed, and suffix *-ite*.]

Min.: According to the British Museum Catalogue, a variety of Oosite, a mineral placed by Dana under Pinite. He regards *Aspasolite* as a variety of *Fahlunite*. It is of a green or greyish color. It occurs in Norway with *Iolite*, of which it may be only an altered state. [FAHLUNITE, OOSITE, IO-LITE.]

**āspe*, s. [ASPEN.]

**ās-pēct*, **ās-pēct'*, **ās-pēct'e*, s. [In Sw. & Dan. *aspekt*; Ger. *aspekt*, *aspekt*; Fr. *aspect*; Sp. *aspecto*; Port. *aspecto*, *aspeito*; Ital. *aspetto*; Lat. *aspectus*=(1) a seeing, view; (2) the sense of sight; (3) (by metonymy) the look, aspect, mien; from *aspectus*, pa. par. of *aspicio*=*adspicio*=to look to or at: *ad*=to, at; *specio*=to look at, to behold.]

A. *Ordinary Language*:

†I. The act of looking, a glance.

"The tradition is no less ancient, that the basilisk killeth by *aspect*, and that the wolf, if he see a man first, by *aspect* striketh a man hoarse."—*Bacon: Nat. Hist.*, Cent. x., § 924.

II. The appearance presented.

1. *Of persons*:

(i) *Gen.*: Countenance, look, also mien. (Applied to a man, or at least to a living being.)

"Which when Beelzebub perceived, than whom Satan except, none higher sat, with grave
Aspect he rose, . . ." *Milton: P. L.*, bk. ii.

(ii) *Spec. Figuratively*: (In the astrological sense.) [B. 2.]

"To praise the clear unmatched red and white,
Which triumphed in that sky of his delight,
Where mortal stars, as bright as heaven's beauties,
With pure *aspects* did him peculiar duties."

Shakesp.: *Tarquin and Lucrece*.

"... another Pollio shine,
With *aspect* open, shall erect his head,
And round the orb in lasting notes be read."
Pope: Moral Essays; Epistle v. 64-66.

2. *Of things*:

(i) *Of material things*: The appearance presented by a place; also the adaptation which a building or other station possesses for affording an outlook in any particular direction. (Used with more or less tacit allusion to the astrological sense.)

"The whole *aspect* of the place has been altered."—*Macaulay: Hist. Eng.*, ch. ix.

"I have built a strong wall, faced to the south *aspect* with brick."—*Swift*.

† Often in the plural, both with this and other significations.

"The *aspects* of nature are more varied and impressive in Alpine regions than elsewhere."—*Tyndall: Frag. of Science*, 3d ed., ii. 31.

(ii) *Of things not essentially material*: The appearance presented to the mind instead of to the eye.

"The *aspect* of affairs was, on the whole, cheering."—*Macaulay: Hist. Eng.*, ch. xviii.

"The character, thus formed, has two *aspects*."—*Ibid.*, ch. xii.

B. *Technically*:

1. *Old Astron.*: The position of a planet in the heavens, especially with respect to other planets. Five different aspects received names. If two planets had the same longitude, they were said to be in *conjunction*; if 60° apart, the aspect was *sex-*

tile; if 90°, *quartile*; if 120°, *trine*; if 180°, then the two bodies were said to be in *opposition*. The symbols were the following:—

Conjunction	δ
Sextile	*
Quartile	□
Trine	Δ
Opposition	8

Of these terms only the first and last are now retained. [CONJUNCTION, OPPOSITION.] In the subjoined example, *square* is the same as *quartile*, and *opposite* means in *opposition*.

"To the blank moon,
Her office they prescrib'd: to th' other five,
Their planetary motions and *aspects*,
In sextile, square, and trine, and opposite."

Milton: P. L., bk. x.

2. *Astrol.*: This pseudo-science, recognizing the different aspects of the planets described under No. 1 (*Old Astron.*), further superadded the notion that these could, on the one hand, exert good, and on the other, an evil or malign influence on human affairs.

"... if Nature's concord broke,
Among the constellations war were sprung,
Two planets, rushing from *aspect* malign
Of fiercest opposition, in mid sky
Should combat, and their jarring spheres confound."

Milton: P. L., bk. vi.

"... and the astrologers call the evil influences of the stars evil *aspects*."—*Bacon: Essays (Civil & Mor.)*, ch. ix.

3. *Her.*: The position which an animal occupies with regard to the eye of the spectator. It may be (1) *full aspect*, that is, full-faced, looking toward the spectator; or (2) *passant*, that is, with its side toward him; or (3) of *trian aspect*, that is, neither the one nor the other, but between the two.

4. *Painting. A double aspect*: A single figure representing two or more different objects.

**ās-pēct'*, v. t. [From *aspect*, s. (q. v.).] To look at, to behold, to contemplate.

"Happy in their mistake, those people, whom
The northern pole *aspects*; whom fear of death,
The greatest of all human fears, ne'er moves."

Temple.

**ās-pēct'-a-ble*, a. [Lat. *aspectabilis*.] That may be looked at or beheld.

"To this use of informing us what is in this *aspectable* world, we shall find the eye well fitted."—*Ray: Creation*.

**ās-pēct'-ant*, a. [Lat. *aspectans*, pr. par. of *aspecto*=to look at.] Looking at.

Her.: A term applied to two birds facing one another, or looking at one another. (The term *aspecting* has the same meaning.)

**ās-pēct'-ēd*, pa. par. & a. [ASPECT, v.]

1. *As pa. par.*: Looked at, beheld.

2. *As adj.*: Having an aspect.

**ās-pēct'-īng*, pr. par. & a. [ASPECT, v.]

I. *Ordinary Language*:

1. *As pr. par.*: Looking at, beholding.

2. *As adj.*: Having an aspect.

II. *Her.*: The same as ASPECTANT (q. v.).

**ās-pēc'-tion*, s. [Lat. *aspectio*=a look, a view.] The act of looking at anything.

"A Moorish queen upon *aspection* of the picture of Andromeda conceived and brought forth a fair one."—*Browne*.

**ās-pēn*, **āsp* (1), **āspe*, **ēspe*, a. & s. [A. S. *æsp*, *æpse*, *epse*=an aspen; *æpse* (adj.)=tremulous; Sw. *asp*; O. Icel. *ösp*; Dan. *espetræ*; Dut. *esp*, *espeboom*; Ger. *espe*, *aspe*, *öspe*; O. H. Ger. *aspa*.]

A. *As adjective*: Pertaining in any way to the trembling poplar. [See A., *subst.*] *Spec.*, consisting of or made of its wood

"You see those lifeless stumps of *aspen* wood."

Wordsworth: Hart-Leap Well, pt. ii.

B. *As substantive*: A tree, the *Populus tremula*, or Trembling Poplar. The leaves are nearly orbicu-

lar, and are bluntly sinuate-toothed. They soon become glabrous on both sides. The tremulous movement of the leaves which exists in all the poplars,

but culminates in the aspen, mainly arises from the length and slender character of the petiole or leaf-stalk, and from its being much and laterally compressed.

"Willows whiten, aspens quiver."

Tennyson: *The Lady of Shalott*.

aspen-leaf, *s.*

1. *Lit.*: The leaf of the aspen.

"And his joints, with nerves of iron twined,
Shook like the aspen-leaves in wind."

Scott: *Lay of the Last Minstrel*, ii. 24.

*2. *Fig.*: The tongue.

"For if they (*i. e.* wiues) myghte be suffered to begin ones in the congregacion to fall in disputing, those aspen leaues of theirs would neuer leave waggyng."—*Sir T. More's Works*, p. 769. (*S. in Boucher*.)

ās'-pēr, ās'-pre (pre as pēr), *a* & *s.* [Lat. *asper*=rough.]

As adjective:

1. Rough; not smooth on the surface.

"... he saith that the way to heauen is straite and aspre and painful."—*Sir T. More's Works*, p. 74. (*S. in Boucher*.)

"Cold maketh the arteries and flesh more asper and tough."—*Bacon: De Calore et Frigore*.

2. Sharp in sound.

"All base notes, or very treble notes, give an asper sound."—*Bacon: Nat. Hist.*, Cent. ii., § 173.

3. Bitter in spirit.

"For if Creseide had erst complained sore,
Tho gan the plain a thousand times more,
And in her aspre plaint, thus she seide."

Chaucer: *Troil. and Cres.*, bk. iv.

ās'-pēr, *s.* [Low Lat. *asperus*, *asprus*, *asperum*, *asprum*; Mod. Gr. *aspron*: from *aspros*=white; the rendering of Turkish *aqtscheh*, *aktsche*, as adj.=white; as subst.=an old Turkish coin, called by Europeans *atsche* or *atche* (q. v.). (*Mahn*.)]

Numis.: An old Turkish coin of silver, the third of a medine. It was worth about an English half-penny.

*ās'-pēr-ā, *a.* [The fem. of Lat. *asper*, -a, -um=rough.]

**Anatomy.* *Aspera arteria*: The windpipe.

¶ The ancients considered all arteries to contain air and not blood.

"... the weasand or wind-pipe, which we call *aspera arteria*, ..."—*Bacon: Nat. Hist.*, Cent. ii., § 174.

ās'-pēr-āte, *v. t.* [In Ital. *asperare*=to exasperate; Lat. *aspero*=(1) to make rough, (2) to sharpen, (3) to exasperate.] To roughen; to make rough.

"Those corpuscles of color insinuating themselves into all the pores of the body to be dyed, may *asperate* its superficies, according to the bigness and texture of the corpuscles."—*Boyle*.

ās'-pēr-ā-tēd, *pa. par.* & *a.* [ASPERATE.]

ās'-pēr-ā-tīng, *pr. par.* [ASPERATE.]

ās'-pēr-ā-tion, *s.* [Lat. *asperatio*.] Roughness. The act of making rough; the state of being made rough; that which imparts the roughness. (*Johnson*.)

*ās'-pēr-āunt, *a.* [Lat. *asperans*, *pr. par.* of *aspero*.] [ASPERATE.] Bold. (*Alisaunder*, 4871.)

ās'-pēr-gēs, *s.* [Lat.=thou shalt sprinkle.]

1. The rod for sprinkling holy water.

2. The Antiphon, "Asperges me, Domine," which is sung before a High Mass, or a Missa Cantata, while the priest is sprinkling the congregation with holy water.

ās'-pēr-gil'-li-form, *a.* [Low Lat. *aspergillus* (q. v.), and Lat. *forma*=form, shape.]

Bot.: Shaped like an aspergillus; brush-shaped. Example, the stigmas of grasses.

ās'-pēr-gil'-lūm, *s.* [From Low Lat. *aspergillus* (q. v.).] Watering-pot shell. A genus of molluscs belonging to the family Gastropodidae. The shell, which is small, is cemented to the lower end of a long shelly tube. This tube is closed at the end by a perforated disc like the spout of a watering-pot. The species occur in the warmer seas. In 1875, Tate enumerated twenty-one recent and one fossil, the latter from the Miocene.

ās'-pēr-gil'-lūs, *s.* [Low Lat. *aspergillus*; from Lat. *aspergo*=a sprinkling; *aspergo*=to scatter, to sprinkle.]

1. *Roman Catholic Ritual*: The brush used for sprinkling "holy water" in all Roman Catholic churches.

2. *Bot.*: Moldiness. A genus of fungi belonging to the cohort Concomycetes. The species are found on rotten substances, on decaying fungi, on damp plants, in herbaria, and in similar situations.

ās'-pēr-goire (oire as wār), *s.* [Fr. *asperge*; Lat. *aspergo*=to sprinkle.]

Roman Catholic Ritual: A sprinkling with "holy water."

ās'-pēr-i-fō'-li-æ, *s. pl.* [Lat. *asper*=rough, and *folium*=a leaf.] Linnæus' name for the natural order of plants now called Boraginaceæ, or Borage-worts. It was given because, as a rule, they have hairy leaves.

ās'-pēr-i-fō'-li-āte, *a.* [Lat. *asper*=rough, and *foliatus*=leaved; from *folium*=a leaf.] Having rough leaves, *i. e.*, leaves roughened with hairs.

ās'-pēr-i-fō'-li-ōūs, *a.* [Lat. *asper*=rough, and *folium*=a leaf.]

Bot.: The same as ASPERIFOLIATE. (*Todd*.)

ās'-pēr-i-tŷ, *s.* [In Fr. *asperité*; Ital. *asperita*; Lat. *asperitas*; from *asper*=rough.]

I. Of things tested by the senses:

1. Roughness of surface; unevenness of surface.

"Sometimes the pores and asperities of dry bodies are so incommensurate to the particles of the liquor, that they glide over the surface."—*Boyle: Works*, vol. i., p. 682.

2. Roughness of sound, unpleasant sharpness; also harshness of pronunciation.

3. Roughness of taste; tartness, sourness.

II. Of things tested by the mind:

1. Roughness to be encountered in one's path, difficulties in one's way; something distasteful to the feelings requiring to be done.

"... the acclivities and asperities of duty."—*Barrow*, vol. iii., Ser. 42.

2. Sourness or bitterness of feeling; bitterness in soul.

3. Roughness of temper, moroseness, sourness, crabbedness. This may be temporary and produced by provocation, or it may be permanent and resulting from long-indulged ill-nature.

"... and was answered with equal asperity and even more than equal ability by Sir John Dalrymple."—*Macaulay: Hist. Eng.*, ch. xvi.

*ās'-pēr-lŷ, *ās'-pre-lŷ (pre as pēr), *adv.* [Eng. & Lat. *asper*, and Eng. suff. -ly=like.] Roughly.

"... and there assaulted them so asprely, that the Captaine of the Romans, called Lucretius, might easily take them."—*Sir Thomas Elyot: The Governor*, p. 57.

ā-spēr-mōūs, *a.* [Gr. *aspermōs*, from *a*, priv., and *sperma*=a seed; *speirō*=to sow.] Without seed, destitute of seed. (*Brande*.)

ās'-pēr-nā'-tion, *s.* [Lat. *aspernatio*, from *aspernor*=to spurn away: *ab*=from, and *spernor*=to despise; *sperno*=to separate, to despise.] Contempt, disdain. (*Johnson*.)

*ās'-pēr-nesse, *ās'-pre-nesse, *s.* [Eng., &c., *asper*; O. Eng. suff. -ness.] Roughness, bitterness, unpleasantness to the taste or feelings; adverseness, calamitousness.

"The aspernesse of his estate."—*Chaucer: Boecius*, bk. iv.

ās'-pēr-ō-lite, *s.* [Lat. *asper*=rough; *o*, euphonic; and -lite, from Gr. *lithos*=stone. "Named *asperolite* on account of its great brittleness." (*Dana*.)] A mineral, a variety of Chrysocolla. It is of a bluish-green color, and comes from Tagilsk, in Russia.

*ās'-pēr-ōūs, *a.* [Eng. & Lat. *asper*.] Full of roughness, very uneven.

"The asperous edge . . ."—*Wilson: Great Britain* (1653). (*Halliwel: Cont. to Lexic*.)

"Black and white are the most asperous and unequal of colors, so like that it is hard to distinguish them; black is the most rough."—*Boyle*.

ās'-pēr-se, *v. t.* [In Fr. *asperger*; Port. *aspergir*; Ital. *aspergere*; Lat. *aspergo*; sup. *aspersum*=to scatter or strew upon, to besprinkle: *ad*=to, and *spargo*=to throw here and there. Cognate with Gr. *speirō*=to sow.]

†1. *Lit.*: To besprinkle one, to scatter or cast over one.

2. *Fig.*: To bespatter one with calumnies; to set in motion injurious charges against one, made either to his face or behind his back; to vituperate one.

"For he who tempts, though in vain, at least *asperses* The tempted with dishonor foul . . ."

Milton: *P. L.*, bk. ix.

ās'-pēr-sed, *pa. par.* & *a.* [ASPERSE, *v.*]

1. *Ord. Lang.*: In senses corresponding to those of the verb.

2. *Her.*: Strewed or powdered with a number of small charges, such as *fleur de lis*, cinquefoils, &c. It is the same as Fr. *semé* (q. v.). (*Gloss. of Her.*)

ās'-pēr-sēr, *s.* [Eng. *aspers(e)*; -er.] One who besprinkles or bespatters another, either in a literal or in a figurative sense. (*Todd*.)

ās'-pēr-sing, *pr. par.* [ASPERSE, *v.*]

ās'-pēr-sion, *s.* [In Fr. & Sp. *aspersión*; Port. *aspersão*; Ital. *aspersione*, *aspergine*; Lat. *aspersio*.]

I. The act of sprinkling; the state of being sprinkled—

†1. *Lit.*: With water or other liquid; or with any material thing capable of division into minute drops.

"... as when the armorers make their steel more tough and pliant, by *aspersión* of water or juice of herbs."—*Bacon: Physiol. Rem.*

2. *Fig.*: With anything not of a material kind. *Specially*—

*(a) With allusions or references to, or illustrations derived from, certain departments of human knowledge.

"And if the Book of Job be turned over, it will be found to have much *aspersión* of natural philosophy."—*Bacon: Inter. of Nat.*, ch. i.

(b) With injurious or calumnious charges.

"The same *aspersions* of the king, and the same grounds of a rebellion."—*Dryden*.

†II. That with which one is aspersed. *Spec.*, an injurious statement against one.

ās'-pēr'-sive, *a.* [Eng. *aspers(e)*; suffix -ive.] Involving aspersions, containing aspersions; calculated to asperse. (*Ogilvie*.)

ās'-pēr'-sive-lŷ, *adv.* [Eng. *aspersive*; -ly.] By way of aspersión.

"... those many envious and injurious detractions which the ignorant may *aspersively* cast thereon."—*Sir T. Drake Revived. To the Reader*. (*Richardson*.)

ās'-pēr-sō'r-i-ūm, *s.* [Low Lat. *aspersorium*, whence the Ital. *aspersorio*.]

1. The stoup, or holy-water basin, in mediæval churches.

2. The aspergill, or sprinkle. (*Gloss. of Arch.*)

ās'-pēr-sōr'-ŷ, *a.* [Eng. *aspers(e)*; -ory.] Having a tendency to asperse; slanderous.

ās'-pēr-ū'-gō, *s.* [In Sp. *asperugo*; Ital. *asperugine*; Lat. *asperugo*, a plant with prickly leaves; from *asper*=rough.] Madwort. A genus of plants belonging to the order Boraginaceæ (Borageworts). It contains only one species, *A. procumbens*, or German Madwort, a very hispid plant, with solitary blue flowers in the axils of the leaves.

ās'-pēr'-u-la, *s.* [In Fr. *asperule*; from Lat. *asper*=rough, so called on account of the roughness of some species of the genus.] Woodruff. A genus of plants belonging to the order Galiaceæ, or Stel-lates.

ās'-phālt, ās'-phālte, ās'-phāl-tūm, ās'-phāl-tūs, ās'-phāl-tōs, *s. & a.* (In Dut. & Ger. *asphalt*; Fr. *asphalte*; Port. *asfalto*; Sp. *asfalto*; Ital. *asfalto*, *asfalto*; Mod. Lat. *asphaltum*, *asphaltus*; Gr. *asphaltos*, according to Liddell and Scott not a proper Greek word. *Mahn* deems it of Phœnician origin; but in Hebrew, which is closely akin to Phœnician, *asphalt* is *chhemar* (Gen. xi. 3; xiv. 10; Exod. ii. 3), which is from quite another root.)

A. As substantive:

I. Ordinary Language (of the forms asphalt, asphalte, and asphaltus): Bitumen, Jews' pitch.

1. The mineral substance described under II. 1.

2. The artificially-made substance described under II. 4.

II. Technically:

1. *Mineralogy* (of the form asphaltum): A mineral placed by Dana in the Appendix to his Hydrocarbons. Pliny called it *bitumen*, a name still in common use. More specifically, it is compact bitumen. It has been termed also *mineral pitch* and *Jews' pitch*. It is amorphous; the spec. grav. 1-1.8; the color, brownish black and black; the luster, pitchy; the odor, bituminous, especially when it is rubbed. There are more fluid and more solid kinds of it. It melts at 90° to 100° C., and burns with a bright flame. It may be dissolved either in whole or in part in oil of turpentine, ether, or alcohol. It consists of oils, vaporable at different temperatures, resins, black or brownish-black substances, and others of a nitrogenous character. It contains about eighty per cent. of carbon, eight or nine per cent. of hydrogen, with varying proportions of oxygen, nitrogen, and ash. It exists in and along the shores of the Dead Sea, which was thence called Lake *Asphaltites*, or *Asphaltitis*. (*Josephus: Wars*, bk. iv., ch. viii.) The "slime-pits" with which the "vale of Siddim" was "full," were of asphalt (Gen. xiv. 10). It also constituted both the "slime" and the "pitch" (there is only one substance mentioned in Hebrew) with which the ark of bulrushes designed for the reception of the infant Moses was daubed (Exod. ii. 3). It was found at Hit, above Babylon, on the Euphrates, and was the "slime" which the builders of the tower of Babel employed instead of mortar (Gen. xi. 3). It occurs also near the Tigris and in the Caucasus. In America, it is met with in the island of Trinidad, where a large lake of it exists [see A. II. 2]; in Peru, and in California. In Europe it is found in the island of Zante; in Albania and Dalmatia; in Carinthia; in the Harz, in Germany; in France; and abundantly in the Val de Travers, in the Canton of Neuchâtel, in Switzerland; besides small quantities in England in Derbyshire, Cornwall, and Shropshire. [BITUMEN.]

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

2. *Geol. (chiefly of the forms asphaltum and asphalt):* Asphaltum is apparently of vegetable origin. Treating of the pitch lake of Trinidad, Sir Charles Lyell mentions that fluid bitumen is seen to ooze from the bottom of the sea on both sides of the island of Trinidad, and to rise up to the surface of the water. He also states, on the authority of Gumilla, that "about seventy years ago" [about 1780?] a spot of land on the west coast of Trinidad sunk suddenly, and was replaced by a small lake of pitch. The celebrated "Pitch Lake" may have had a similar origin. The Orinoco has for ages been rolling quantities of vegetable matter into the adjacent ocean. Subterranean fires may have converted them into petroleum, which being forced upward by similar causes, has been inspissated and transformed into different varieties of asphaltum. (Lyell: *Princip. of Geol.*, ch. xvii., 8th ed., 1850.) It occurs in rocks of various ages, but most abundantly in those of very recent date.

3. *Chem. (of the forms asphalt and asphaltum).* Asphalt is said to consist chiefly of a substance called by Boussingault *asphaltene*. [ASPHALTENE.] Dana, however, considers Boussingault's conclusions as by no means finally established.

4. Art and Commerce:

(a) Most of the asphalt of antiquity was brought from the Dead Sea. The Egyptians used it in embalming their dead. Solid asphalt is still used in Arabia, Egypt, and Persia instead of pitch for ships, and the fluid asphaltum for varnishing and for burning in lamps. It is also used for covering roads and pavements, being smooth, impermeable to water, and very durable. Much, however, of the asphalt which is used for covering streets, pavements, bridges, roofs, &c., in New York, Philadelphia, Chicago, and other large cities, is not that of nature, but is manufactured artificially from bitumen, pitch, and gravel, or from a brown bituminous limestone found near the Jura mountains. When employed for paving it is melted in large iron caldrons and laid down hot, that it may consolidate into a continuous sheet of impermeable material. It is the same as asphaltic mastic.

(b) A composition of asphalt, lamp black, and oil of spike, or turpentine, used for drawing black figures on dial-plates. (Nicholson.)

B. As adjective: Pertaining to asphalt; consisting of, or at least containing asphalt.

asphalt-like, a. Like asphalt.

"... a black lustrous asphalt-like solid, his [Boussingault's] asphaltene."—Dana: *Mineralogy*, 5th ed., p. 751.

ās-phāl'-tēne, s. [Eng., &c., asphalt; suff. -ene.]

Chem.: Boussingault's name for a substance which consists for the major part of asphalt. Its formula is $C_{20}H_{32}O_3$. It arises probably from the oxidation of petroleum. [ASPHALT, A., II. 3.] (Fownes: *Man. of Chem.*, 10th ed., p. 586.)

ās-phāl'-tic, ās-phāl'-tick, a. [Eng. asphalt; -ic.] Pertaining to asphalt; consisting of asphalt; containing asphalt.

"... beyond
The flowery dale of Sibma clad with vines,
And Eleāle to the asphaltic pool."

Milton: *P. L.*, bk. i.

ās-phāl'-tite, a. [In Fr. *asphaltite*; from Gr. *asphaltitēs*.] The same as ASPHALTIC (q. v.). (Bryant.)

ās-phāl'-tōs, ās-phāl'-tūm, ās-phāl'-tūs, s. [ASPHALT.]

ās-phō-dēl (Eng.) ās-phōd'-ēl-ūs (Lat.), s. [In Sw. *asfodillrot*; Ger. *asphodille*, *affodil*, *affodille*; Dut. *affodil*; Russ. *asfalt*; Fr. *asphodèle*; Sp. *affodelo*; Port. *asphodelo*; Ital. *asfodelo*; Lat. *asphodelus*; Gr. *asphodelos*.] Possibly from *a*, priv., and *sphallō*=to balk, to foil. In this case it would mean a flower which cannot be balked or foiled when in competition with others. Now called by the common name *daffodil*.

A. Ord. Lang. (of the form asphodel): The English name of the plants belonging to the genus *Asphodel* (q. v.). The yellow and white species were introduced into this country during the sixteenth century—the former about the year 1596, and the latter in 1551. Immense tracts of land in Apulia are covered with white asphodel, which affords good nourishment to sheep. The asphodels, being sacred to Proserpine, were used in classic times in funeral ceremonies, and the souls of the departed were supposed by the poets to wander in meadows adorned with these beautiful flowers.

Yellow Asphodel.

"Resting weary limbs at last on beds of asphodel." Tennyson: *The Lotus-eaters*; *Choric Song*, 8.

"... flowers were the couch,
Pansies and violets, and asphodel,
And hyacinths."

Milton: *Paradise Lost*, bk. ix.

B. Bot. (of the form Asphodelus): A genus of plants belonging to the order Liliaceæ and the section Anthericæ. About eight species are familiar, the best known being *A. luteus*, the Yellow; *A. albus*, the White; and *A. ramosus*, the Branched Lily or Asphodel, called also King's Rod. To this family belong the Garlic, the Hyacinth, the Squill and the Star of Bethlehem.

ās-phō-dēl'-ē-æ, s. pl. [ASPHODELUS.]

Bot.: An old order of plants, separated by Robert Brown from the Liliaceæ on account of their possessing a black, crustaceous, brittle seed-coat; but this character has been since deemed unimportant, and the Asphodelæ are now ranked as a section of the order Liliaceæ, or are suppressed even as a section.

ās-phōd'-ēl-ūs, s. The Latin name of the English word ASPHODEL (q. v.).

***as-phū'r-ē-lātes, *as-phū'r-ē-lā-ta, s. pl.** [Gr. *a*, priv., and *sphurēlatos*=wrought with the hammer; *sphura*=a hammer.] An old designation for metals deemed immalleable. Under it were included bismuth, antimony, cobalt, zinc, and mercury.

as-phŷx'-ī-a (Mod. Lat.), as-phŷx'-ŷ (Eng.), s. [In Fr. *asphyxie*; Mod. Lat. *asphyxia*; Gr. *asphuxia*=a stopping of the pulse; *sphuxis*=the pulse; *sphuzō* fut. *sphuxō*=to throb.]

1. *Originally*: Syncope fainting.

2. *Now*. Suspended animation: An interruption of the arterialization of the blood, causing the suspension of sensation and voluntary motion. It may be produced by breathing some gas incapable of furnishing oxygen, by submersion under water, by suffocation, from an impediment to breathing applied to the mouth and nostrils, by strangulation, or by great pressure, external or internal, upon the lungs. If asphyxia continue unrelieved for a short period, it is necessarily followed by death.

as-phŷx'-ī-āte, v. t. [Mod. Lat. *asphyxia*, and suff. -ate.] To prevent the arterialization of the blood; to suffocate. (Generally, if not exclusively, in the past participle.)

†as-phŷx'-ī-ā-tēd, pa. par. [ASPHYXIATE.]

"She died like one asphyxiated."—Todd & Bowman: *Physiol. Anat.*, i. 305.

as-phŷx'-iēd, pa. par. [ASPHYXY, v.]

"Like higher organisms, the bacterial genus are poisoned by the excess and asphyxiated by the defect of oxygen."—Prof. Tyndall, quoted in *Times*, May 24, 1877.

†as-phŷx'-ŷ, v. t. [From *asphyxia*, s. (q. v.).]

†as-phŷx'-ŷ, s. [ASPHYXIA.]

†ās'-pīc, *ās'-pīck, *ās'-pīk, s. [From Fr. *aspic*=an asp.] [ASP (2).]

†A. Ord. Lang.: The same as ASP (2) (q. v.).

The venomous asp. Poetic.

"Swell, bosom, with thy fraught,
For 'tis of aspie's tongues."

Shakesp.: *Othello*.

B. Technically:

1. *Bot.*: The French name of the *Lavandula spica*, the plant which yields the oil of spike. [LAVANDULA.]

†2. *Gunnery*: A piece of ordnance weighing about 4,250 pounds, and carrying a twelve-pound shot. (James.)

3. *Cookery*: A savory jelly; meat or eggs enclosed in a savory jelly.

ās-pīd'-ēl-ite, s. [Apparently from Gr. *aspis*, genit. *aspidos*=(1) a small round shield, (2) an asp; *dēlos*=clear, manifest, and suff. -ite; Gr. *lithos*=stone.] A mineral, a variety of Spheic, which again is placed by Dana under Titanite. Aspidelite is of a pale yellowish-green color, and occurs at Arendal in Norway.

ās-pīd'-ī-ūm, s. [Gr. *aspidion*=a small shield; *aspis*=a small round shield, which the involucre of the several species more or less resemble.] Shield-fern. A genus of ferns belonging to the order Polypodiaceæ. The sori are roundish, and the involucre covering them orbicular or kidney-shaped. There are ten British species. Some have orbicular reniform involucre fixed by their sinuses, while others have orbicular and peltate involucre. To the former, sometimes called Lastrea, belong the *A. Filix mas*, or Blunt; the *A. spiculosa*, or Prickly-toothed; the *A. oreopteris*, or Heath; and the *A. Thelypteris*, or Marsh Shield-fern, with other species more rare; and to the latter, the *A. Lonchitis*, or Rough Alpine; the *A. lobatum*, or Close-leaved Prickly; the *A. aculeatum*, or Soft Prickly; and the *A. angulare*, or Angular-leaved Shield-fern.

ās-pīd'-ōph'-ōr-ūs, s. [Gr. *aspis*, genit. *aspidos*=a small round shield; and *phoros*=bearing, carrying; *phero*=to bear or carry.] A genus of fishes of the order Acanthopterygii and the family with hard cheeks. The species, six inches long, called *A. Europæus* (Cuv.), the Armed Bull-head, Pogge, Lyrie, Sea-Poacher, Pluck, or Noble, are to be found in the British seas.

***a-spī'e, *a-spŷ'e, v. t.** [ESPY.] To espy.

"Oure privetee, that no man us aspie."

Chaucer: *C. T.*, 13,063.

"Til fynally seche gan of hem aspye,
That he was last seyn in the Jewerie."

Ibid., 15,002-3.

***a-spī'e, *a-spŷ'e, s.** [From *aspie*, v. (q. v.).] [SPY.] A spy.

"For it

Were impossible to my wit,
Though Fame had all the pries
In all a realme and all aspies,
How that yet he should heare all this.

Chaucer: *House of Fame*, ii. 196.

"Have her my trouth, as thou art his aspye.
Tel wher he is, or elles thou schalt die."

Chaucer: *C. T.*, 14,170, 14,171.

***a-spī'ed, *a-spŷ'ed, *a-spŷ'yd, pa. par.** [ASPIE, v.]

***a-spī'e-ing, *a-spŷ'-yng, pr. par. & s.**

As substantive: Spying, exploration. (Prompt. Parv.)

***a-spīl'le, v. t.** [A. S. *spillan*=to spill, spoil, deprive of, destroy, kill.] To spill, to destroy, to kill.

"Hwo so hit ileueth myd gode wille
Ne may nouht the feond his saule a-spille."

An Orison of Our Lord, xvi. (ed. Morris), 55-6.

ās-pī'r-ant, a. & s. [In Fr. *aspirant*, a. & s.; Port. *aspirante*; Ital. *aspirante*, adj.; from Lat. *aspirans*, pr. par. of *aspiro*=to breathe or blow upon.]

A. As adjective: Aspiring, aiming at.

B. As substantive: One who pants after some object of attainment; one whose desire or ambition it is to gain a certain object.

"In consequence of the resignations which took place at this conjuncture, the way to greatness was left clear to a new set of aspirants."—Macaulay: *Hist. Eng.*, ch. ii.

ās-pīr-āte, v. t. & i. [From Lat. *aspiratum*, supine of *aspiro*=to breathe or blow upon; *ad*=to or on, and *spiro*=to breathe or blow; Gr. *aspiro*=to pant or gasp; *a*, euphonic, and *spairō*=to pant or gasp.] [ASPIRE.]

A. Transitive: To pronounce with a full breath, the effect being to prefix the sound of *h* to the vowel "aspirated."

B. Intransitive: To come forth, or be pronounced with a full breath.

"Where a vowel ends a word, the next begins either with a consonant, or what is its equivalent, for our *w* and *h* aspirate."—Dryden.

ās-pīr-āte, a. & s. [From Lat. *aspiratus*, pa. par. of *aspiro*. (ASPIRE.) In Ital. *aspirato*=aspirated.]

†A. As adjective: Pronounced with a full breath.

"For their being pervious, you may call them, if you please, perspire; but yet they are not aspirate, i. e., with such an aspiration as *h*."—Holder.

B. As substantive: A letter pronounced with a full breath. *h*. (For the Greek *aspira* see ASPER, I.)

"With this he mingled the Attic contractions, the broader Doric, and the feeble Æolic, which often rejects its *aspiro* or takes of its accent . . ."—Pope: *Pref. to Homer*.

ās-pīr-ā-tēd, pa. par. & a. [ASPIRATE, v.]

"... aspirated checks. . . ."—Max Müller: *Science of Lang.* (6th ed.), vol. ii. (1871), p. 163.

1. Lit.: A well-known mammalian quadruped. It is the *Equus asinus* of Linnæus, and is now sometimes made the type of the genus or sub-genus *Asinus*. It is known from the most nearly allied animals by its long ears, the tuft at the end of the tail, and the black stripe on the shoulders. Its native country seems to be Central and Southern Asia, where troops of it are still seen, though whether aboriginal or descended from domesticated individuals escaped from servitude it is not easy to determine. [WILD ASS.]

"Ne he nedde stede ne no palefray
Ac rod vppe on asse."

Passion of Our Lord (ed. Morris), 67, 68.

"And Abraham rose up early in the morning, and saddled his ass."—*Gen.* xxii. 3.

¶ The sexes are often distinguished by the terms *he-ass* and *she-ass*.

"... and he had sheep and oxen, and he-asses . . . and she-asses."—*Gen.* xii. 16.

¶ The young of the ass is called an *ass' colt* (*Gen.* xlix. 11; also *Matt.* xxi. 5.)

¶ The *wild ass* is the same species as the domesticated one, but very unlike it in character, being high-spirited and untamable.

"Who hath sent out the wild ass free? or who hath loosed the bands of the wild ass?"—*Job* xxxix. 5; see also verses 6-8.

(For a fossil ass or zebra see *ASINUS*.)

2. Fig.: A person destitute of understanding, the deficiency of the ass in this respect being popularly exaggerated.

"That such a crafty devil as is his mother
Should yield the world this ass!"

Shakesp.: Cymbel, ii. 1.

"... as they think our Doctors asses to them, we'll think them asses to our Doctors."—*Pope*: Letter to Digby (1717).

I. Lit.: To leap or rush upon.

1. Of persons: To rush upon a person with the intention of doing him some more or less serious bodily injury.

"Will I depart from honor's laws;
To assail a wearied man were shame."

Scott: Lady of the Lake, iv. 31.

2. Of armies, navies, forts, or communities: To attack with military or naval forces, with the view of overcoming, capturing, slaying or plundering the people on whom the warlike aggression is made. [ASSAULT.]

"... he ne tholeth thet no vyend ous uondy ouer oure

"Remember, if He guard thee and secure,
Whoe'er assails thee, thy success is sure."

Cowper: Expostulation.

II. Figuratively:

1. Of persons:

(a) To attack a person without doing him bodily violence; as by bringing a true or false charge against him, or ridiculing him or his work. (Used lit. or fig.; in the latter case, a thing, instead of a person, may make the attack.)

"My gracious lord, here in the parliament
Let us assail the family of York."

Shakesp.: 3 Henry VI., i. 1.

"Disdeining life, desiring leave to dye,
She found her selfe assayld with great perplexity."
Spenser: F. Q., I. x. 22.

(b) To attack a person's moral principles by taking means fitted to seduce him or her from the paths of virtue, or from his or her immediate duty.

"... and aye the ilke vice uighte huer ha zighth.

"How have I fear'd your fate! but fear'd it most,
When love assail'd you on the Libyan coast."
Dryden: Virgil's *Aeneid*, vi. 941.

2. Of things:

(a) To attack by word or writing.

"All books he reads, and all he reads assails."
Pope: Essay on Criticism, 616.

(b) To molest.

"Nature hush'd in slumber sweet,
No rude noise mine ears assailing."

Cowper: Watching with God, No. 2.

as-sā'il-a-ble, *as-sā'ile-a-ble, a. [Eng. *assail*; -able.] Able to be assailed.

"There's comfort yet, they are assailable."

Shakesp.: Macbeth, iii. 2.

as-sā'il-ant, a. & s. [Eng. *assail*; -ant. In Fr. *assaillant*.]

A. As adjective: Assailing; attacking.

"And as an evening dragon came,
Assailant on the perched roosts
And nests in order ranged
Of tame villatic fowl."

Milton: Samson Agonistes.

B. As substantive: One who assails or attacks a person or persons, or a thing.

1. One who attacks a person. (In this sense it is properly opposed to a defendant.)

"The Duke of Saint Albans, with the help of his servants, beat off the assailants."—*Macaulay*: Hist. Eng., ch. xxiii.

2. One who assails an enemy in a military way.

"'It is ten to one,' says a late writer on the art of war, 'but that the assailant who attacks the enemy in his trenches is always victorious.'"—*Goldsmith*: Essays, iv.

3. One who assails anything, as a philosophy, a religion, a science.

B. As substantive:

1. A piece of land cleared. (*Ash*.)

2. A tree plucked up by the roots. (*Ash*.)

3. *Old Law*: The offense against the forest laws of plucking up by the roots the trees requisite to furnish thickets or coverts.

as-sās'-sīn, As-sās'-sīn, s. [In Ger. *Assassinen* (pl.); Fr. & Prov. *assassin*; Sp. *asesino*; Port. & Ital. *assassino* (all sing.); Arab. *Haschischin*=as substantive, a member of the sect described under No. 1; as adj., inspired by *haschisch*, an intoxicating liquid or drug called in India *bhāng*, prepared from the powdered leaves of *Cannabis sativa*, or Common Hemp. Many Eastern desperadoes, when they wish to do some nefarious deed, deaden what remnants of conscience they possess and stimulate their passions by means of this *bhāng*. (*BHANG*.) Some etymologists derive *assassin* from Hassan ben Sabah, the founder of the order (I., 1).]

I. Literally:

1. *Hist.*: A military and religious order which constituted an offshoot from the Ismaili branch of the great Shiah sect of Mohammedans. It was founded in A. D. 1090 by Hassan ben Sabah, at the hill fort of Alamoot, in Persia. A section of them afterward removed from Persia to Mount Lebanon, where they came in contact with the Crusaders, and through them acquired infamous notoriety in Europe. By the rules of their founder, they were bound implicitly to carry out the commands of their chief (popularly known in Western Europe as the "Old Man of the Mountain"), even to the extent of murdering any king or inferior person in Europe, Asia, or anywhere, with whom he might have a quarrel. Several proud potentates are said to have paid him blackmail for safety's sake; but the gallant Knights Templars had more of a kingly spirit, and defied his power. The Mongols made a general massacre of the Persian branch of the order in 1256, and Sultan Bibars all but rooted out the Syrian offshoot in 1270, but traces of them are said still to exist in both countries, especially at Kalat el Masryad, in Persia. Despite their origin, the Assassins were not pure Shiahs in faith; their religion was a mixture of Magianism, Judaism, Christianity, and Mohammedism. There was a certain resemblance between their tenets and those of the Druses in Mount Lebanon.

2. A ruffian who, either from personal animosity or from having been hired to do the atrocious deed, murders one by open violence or by secret or sudden assault.

"... of all the Jacobites, the most desperate assassins not excepted, ..."—*Macaulay: Hist. Eng., ch. xvii*.

II. Fig.: One who criminally destroys the polity of his country.

"The hir'd assassins of the commonweal."

Thomson: Liberty, pt. v.

assassin-like, a. Like an assassin.

"... the Syrian king, who, to surprise

One man, *assassin-like*, had levied war,
 War unproclaim'd."—*Milton: P. L., bk. xi*.

as-sās'-sīn-āte, v. t. & i. [Eng. *assassin*; -ate.] [ASSASSIN, v.]

A. Transitive:

1. To murder by open violence or by secret and sudden assault.

"What could provoke thy madness,

To *assassinate* so great, so brave a man?"

Philips.

*2. Exceedingly to maltreat.

"Such usage as your honorable lords

Afford me, *assassinated* and betrayed."

Milton: Samson Agonistes.

B. Intransitive: To perpetrate murder.

"You who those ways feared of late,

Where now no thieves *assassinate*."

Sandys: Paraphrase of Sacred Songs; Judges v.

***as-sās'-sīn-ate, s.** [ASSASSINATE, v.]

1. An assassin.

"The old king is just murdered, and the person that did it is unknown. Let the soldiers seize him for one of the *assassinates*, and let me alone to accuse him afterward."—*Dryden*.

2. An assassination; a murder.

"Were not all *assassinates* and popular insurrections wrongfully chastised, if the meanness of the offenders indemnified them from punishment."—*Pope*.

as-sās'-sīn-ā-tīng, pr. par. [ASSASSINATE, v.]

as-sās'-sīn-ā-tion, s. [Eng. *assassin*; -ation.]

The act of assassinating; the act of murdering another by open violence or secret and sudden assault; the state of being assassinated.

On the 9th Thermidor, 1794, the French National Convention would no longer allow Robespierre to domineer over it, and would not permit him even to defend himself. Almost the last words he addressed to it before his arrest were these: "Presidents of assassins, for the last time I ask liberty to speak."

On the 14th of April, 1865, President Lincoln was shot by an assassin and died the next day. On the 2d of July, 1881, President James A. Garfield was shot, and died September 19th of the same year.

as-sās'-sīn-ā-tōr, s. [Eng. *assassin*; -ator. In Port. *assassinador*.] One who assassinates; an assassin. (*Johnson*.)

as-sās'-sīn-ōus, a. [Eng. *assassin*; -ous.] Murderous. (*Cockeram*.)

***as-sā'-tion, s.** [From Lat. *assatum*, sup. of *asso*=to roast or broil; Gr. *azō*=to dry up.] Roasting.

"The egg expiring less in the elixation or boiling; whereas, in the *assation* or roasting it will sometimes abate a drachm."—*Browne: Vulgar Errors*.

Lat. *assultus*=a leaping upon an attack; *ad*=to, and *saltus*=a leaping; *salio*=to leap.] [ASSAIL.]

A. Ordinary Language:

I. Lit.: A violent attack made upon any person, persons, or place, with the hands or with material weapons. [B., 1, 2, 3.]

"And by *assault* he wan the citee after."

Chaucer: C. T., 991.

"But whanne there was maad an *assaught* of the hethene men."—*Wycliffe: Dedes xiv. (Richardson)*.

"And when there was an *assault* made both of the Gentiles, and also of the Jews with their rulers, to use them despitefully and to stone them."—*Acts xiv. 5*.

"They resisted his *assaults* desperately, and obliged him to turn the siege into a blockade."—*Arnold: Hist. Rome, ch. xlv.*

II. Figuratively:

1. (In which the attacking force consists of a person or persons.)

(a) An attack by means of a charge against one; abusive language, calumny, &c.

"After some unhappy *assaults* upon the prerogative by the parliament, which produced its dissolution, there followed a composure."—*Clarendon*.

(b) An attack upon one's virtue, which may be by seduction rather than violence.

(c) An attack upon a thing, as upon a religion, an opinion, &c.

"Theories built upon narrow foundations are very hard to be supported against the *assaults* of opposition."—*Locke*.

2. (In which the attacking force is a thing. (An adverse natural force brought to bear upon a person or thing.)

"... and unshaken bears the *assault*

Of their most dreaded foe, the strong southwest."

Wordsworth: Excursion, bk. v.

B. Technically:

1. *Mil.*: A furious effort to carry a fortified post, camp, or fortress, where the assailants do not screen themselves by any works. (*James*.) It is the appropriate termination of a siege which has not led to the capitulation of the garrison.

"On the 8th of September [1855], after a furious bombardment of three days, the Allies *assaulted* the town [Sebastopol] in five places, and, though repulsed in four, the *assault* of the French attack on the Malakhoff completely succeeded."—*Times: Annual Summary (1855)*.

To give an assault: To attack any post. (*James*.)

To repulse an assault: To cause the assailants to retreat, to beat them back. (*Ibid.*)

To carry by assault: To gain a post by storm. (*Ibid.*)

2. *Fencing, &c. Assault of Arms*: An attack on each other (not in earnest) made by two fencers to exhibit or increase their skill. (Sometimes it is used in a wider sense for other military exercises.)

"The 20th annual *assault of arms* of the Honorable Artillery Company was held last evening. . . . *Boxing*, fencing, sticks, bayonet exercise, cavalry sword exercise, &c., composed the programme."—*Daily Telegraph, March 29, 1877*.

3. *Law*: A movement which virtually implies a threat to strike one, as when a person raises his hand or his cane in a menacing manner, or strikes at another but misses him. It is not needful to touch one to constitute an assault. When a blow actually takes effect the crime is not simple assault, but assault and battery. A person assaulting another may be prosecuted by him for the civil injury, and may also be punished by the criminal law for the injury done to the public. (See *Blackstone: Comment., bk. iii., chap. 8; iv., chaps. 11, 15.*)

as-sā'ult, *as-sā'ut, v. t. [O. Fr. *assaultar*. In Sp. *asaltar*, *assaltar*, *assaltar*; Ital. *assaltare*; Low Lat. *assalto*.] [ASSAULT, s.]

I. Of persons:

1. To make a hostile attack upon a person, a people, a fortification, a house, &c., using for the purpose material weapons.

"Struck at the sight, the mighty Ajax glows

With thirst of vengeance, and *assaults* the foes."

Pope: Homer's Iliad, bk. v., 756-7.

"... and *assaulted* the house of Jason."—*Acts xvii. 5*.

2. To attack one in another way than by warlike weapons; to do so, for instance, by making a charge against him, calumniating him, writing against him, &c.

"'Tis a mercy I do not *assault* you with a number of original sonnets and epigrams."—*Pope: Letter to H. Cromwell, March 7, 1709*.

II. Of things: To do that which is fitted to injure (applied to things rather than persons), to threaten with injury.

"Before the gates the cries of babes new-born,

Whom fate had from their tender mothers torn,

Assault his ears."

Dryden.

as-sā'ult-a-ble, a. [Eng. *assault*; -able.] Capable of being taken by assault; assailable.

"A breach, be it made never so *assaultable*, having many hands to defend it with any valor, lightly is never entered."—*Sir Roger Williams: Actions of the Low Countries, p. 106*.

as-sā'ult-ant, a. & s. [Eng. *assault*; -ant. Ital. *assaltante*.]

1. *As adj.*: Leaping upon, assaulting, assailing,

2. *As subst.*: An assailant; a term applied to a predatory animal when represented on the escutcheon as if leaping on its prey. (*Gloss. of Her.*)

as-sā'ult-ēd, pa. par. [ASSAULT, v.]

"So long as the *assaulted* person is in actual danger."—*Jeremy Taylor: On Forgiving Injuries*.

A. Ordinary Language:

*1. The act of trying or experimenting; a trial, an experiment, an attempt, essay.

"Quod this chanoun, 'Yet wol I make assay.'" *Chaucer: C. T.*, 13, 177.

" . . . never more
To give the assay of arms against your majesty." *Shakesp.: Hamlet*, ii. 2.

*2. The state of being tried; trial, suffering, hardship.

"For they be two the prowtest knights on grownd,
And oft approved in many hard assay." *Spenser: F. Q.*, II. iii. 15.

*3. The result of such trial or experiment; *spec.*, purity, value.

" . . . beholding all the way
The goodly workes, and stones of rich assay." *Spenser: F. Q.*, IV. x. 15.

4. The thing subjected to trial or examination. (B., 1, 2.)

¶ Originally *assay* and *essay* were the same word, but now *assay* is obsolete, except for the testing of metals, while *essay* is used for bodily or mental attempts. [ESSAY.]

*At all essays=in every way.

"He is a frende at all assayes."

Hormann: Vulgaria (1530).

"At all assaies, you bear a heart true bent."—*Taylor: Workes* (1630). *Halliwell: Contr. to Lexic.*

B. Technically:

1. Chemistry:

1. The determination what percentage of a metal, especially of a precious one, is in any particular ore or alloy. An *ordinary* or a *simple assay* is designed to ascertain how much a compound of gold or silver varies from the prescribed standard, while a *parting assay* is designed to separate the two metals from each other in the specimen examined, that the proportion in the bullion of which it is a fair sample may be ascertained. In a *gold parting assay*, the amount of silver in the gold is ascertained; and in a *silver parting assay*, the amount of gold in the silver. [ASSAYING, TOUCH.] The analysis, or *assay*, of an alloy of gold and copper is usually made by cupellation with lead. The weight of the button remaining on the cupel gives directly the amount of gold in the alloy after certain corrections similar to those required in the case of silver. (*Graham: Chem.*, 2d ed., vol. ii., p. 362.)

2. The alloy or metal assayed.

" . . . like an assay fused before the blow-pipe."—*Darwin: Voyage round the World*, ch. iii.

II. Law: The examination or testing of the weights and measures of this or any other country by a fixed standard.

"You shall . . . make the assays of these moneys of gold and silver, and truly report if the said moneys be in weight and fineness according to the standard weights for weighing and testing the coins of the realm."—*Oath administered to the Jury of Goldsmiths sworn to Test the Pyx.* (*Times*, Friday, July 17, 1874.)

assay-balance, s. A delicate balance used in assaying. It is furnished with a *rider* (q. v.).

assay-furnace, s. A furnace used in assaying.

assay-master, s. An assayer; an officer appointed to ascertain the amount of the two precious metals in coins and bullion.

as-sâ y, ***a-sâ y**, v. t. & i. [In Mod. Fr. *essayer*; O. Fr. *asaier*, *assayer*; Prov. *essaier*; Sp. *ensayar*; Port. *ensaiar*; Ital. *saggiare*=to try, to attempt; to assay a metal; *saggiare*=to try, to essay, to taste.] [ASSAY, s.; ESSAY, v.]

A. Transitive:

1. To try anything or any person.

1. Of things:

(a) In the same sense as No. II. (q. v.).

* (b) To attempt anything; to try its practicability by the test of experience.

"Ulysses, and his brave maternal race,
The young Autolycei, assay the chase."

Pope: Homer's Odyssey, bk. xix. 501-2.

*2. Of persons: To try a person's strength, courage, skill, and fortitude by attacking him.

"But, seeing thou fall'st on me so luckily,
I will assay thee: so defend thyself."

Shakesp.: 1 Henry IV., v. 4.

*II. To proffer.

"Whom thus afflicted when sad Eve beheld,
Desolate where she sat; approaching nigh,
Soft words to his fierce passion she assay'd."

Milton: P. L., x. 567.

III. Chem., Metall., &c.: To subject a ring, a coin, an alloy, &c., to examination, trial, or experiment, with the view of ascertaining what its component parts are, and specially, in the latter case, what proportion of the precious or other metals enters into its composition.

B. Intransitive: To attempt, to endeavor.

as-sâ yed, *pa. par.* [ASSAY, v.]

as-sâ y'êr, s. [Eng. *assayer*; -er. In Dut. & Fr. *essayeur*.] One who assays bullion. *Spec.*, an officer of the Mint, whose function it is to try the purity of the precious metals used for coin.

" . . . a confidential man of business, a practical miner and assayer, would have been all that was required."—*Darwin: Voyage round the World*, ch. xvi.

as-sâ y'îng, ***a-sâ i'ÿnge**, *pr. par. & s.* [ASSAY, v.]

As substantive: The act or process of subjecting coins, quantities of bullion, or alloys, to examination and experiment, with the view of ascertaining what proportion of each of the precious metals they contain. The proportion in gold coin in the United States is $\frac{10}{100}$ of gold and $\frac{90}{100}$ of alloy. This is called the *standard*. That it is actually reached is proved by the *Trial of the Pyx*, which from time to time takes place. [PYX.] The process adopted to assay the precious metals is *cupellation* (q. v.). The assayer's work has been much facilitated by the discovery that the application of sulphuric acid can separate gold and silver. The French call cupellation the *dry method* of assaying, and adopt another of their own called the *humid one*. [ASSAY.]

"This method is also sometimes used in the assaying of coins to afford an indication of the quantity of silver required in the cupellation."—*Graham: Chem.*, 2d ed., vol. ii., p. 362.

"By the canon law, a person, after he has been in full possession of a second benefice, cannot return again to his first, because it is immediately void by his *assecution* of a second."—*Ayliffe: Parergon*.

äs-sê-gâi, **tä's-sa-gâi**, **tä's-sa-gây**, ***za-gâye** (*Caffre*), s. & a. [In Fr. *zagaie*; Sp. *azagaya*; Port. *zagaia*, *zagaglia*=javelin; Arab. *alkhazeqah*.]

A. *As substantive*: A missile weapon, like a javelin, used by the Caffres, Zulus, and other South African tribes in war. It is of some considerable length. There is also a short stabbing assegai.

"Alert to fight, athirst to slay,
They shake the dreaded *assegai*."

Stratford de Redcliffe. (Times), March 29, 1879.)

¶ It is sometimes used in connection with other nations than those of South Africa.

"Then a terror fell on the King Bucar,
And the Libyan kings who had join'd his war;
And their hearts grew heavy, and died away,
And their hands could not wield an *assegai*."

Hemans: The Cid's Funeral Procession.

B. *As adjective*: Pertaining to or produced by the spear described under A.

The young Prince Imperial of France was *assegaied* to death when fighting for the British in Zululand. When found he had thirty-seven *assegai* wounds on his body.

***as-seize**, v. t. [SEIZE.]

as-sêm'-blage, s. [Fr. *assemblage*.]

†1. The act of assembling.

†2. The state of being assembled.

"With innocence and meditation joined,
In soft *assemblage*." *Thomson*.

3. The persons or things assembled.

(a) The persons assembled; a gathering of individuals; an assembly.

"Castile enjoyed the supremacy in that great *assemblage* of races."—*Macaulay: Hist. Eng.*, ch. xxiii.

(b) Of things assembled:

"The bases of an *assemblage* of pyramids."—*Herschel: Astron.*, § 277.

***as-sêm'-blânçe** (1), ***as-sêm'-blânçe**, s. [Eng. *assembl(e)*; -ance.] Assembling, assembly.

"He chaunst to come, where happily he spide
A rout of many people farre away;
To whom his course he hastily applide,
To weet the cause of their *assemblance* wide."

Spenser: F. Q., V. iv. 21.

***as-sêm'-blânçe** (2), s. [Lat. *ad*=to, and Eng. *semblance* (q. v.).] Semblance, resemblance.

"Care I for the limb, the thewes, the stature, bulk, and big *assemblance* of a man!"—*Shakesp.: 2 Henry IV.*, iii. 2.

äs-sêm'-blâ-tion, s. [ASSEMBLY, s.]

as-sêm'-ble, ***a-sêm'-ble**, v. t. & i. [In Fr. *assembler*; *ensemble*=together; Prov. *assemblar*; from Lat. *simul*=at once, together, at the same time. Cognate with Dut. *verzamelen*= . . . to assemble; *zamelen*=to collect; from *samen*=together; Ger. *sammeln*=to assemble; *zusammen*, *beisammen*=together.]

A. Transitive:

*1. To compare, to liken. (*Latimer: Works*, i. 188.)

2. To convene, to call together. (Used both of persons and things.)

¶ (a) Sometimes it is followed by two objectives—the one of the person or being for whom the gathering is brought together, and the other of the persons or things assembled. But before the first objective there is really an ellipsis of *to* or *for*.

"Then said the king to Amasa, *Assemble* me the men of Judah within three days, and be thou here present."—*2 Sam.* xx. 4.

(b) It is sometimes used reciprocally.

"And all the men of Israel *assembled* themselves unto King Solomon at the feast of the month Ethanim . . ."—*1 Kings* viii. 2.

B. Intransitive:

1. Gen.: To come together, to meet together, to gather, to congregate.

"They, however, still *assembled* and prayed in private dwellings, . . ."—*Macaulay: Hist. Eng.*, ch. xvi.

*2. Spec.: To meet in a hostile manner, to encounter.

"Now Eualac and Tholomer tures han *a-senblet*." *Joseph of Arimathe* (ed. Skeat), 520.

***as-sêm'-blê**, s. Old spelling of ASSEMBLY.

as-sêm'-bled (bled=beld), *pa. par. & a.* [ASSEMBLE.]

"Lordynges, the needes for whiche we beu *assembled* in this place, is ful hevy thing, . . ."—*Chaucer: Tale of Melibeus*.

"Assembled armies oft have I beheld;
But ne'er till now such numbers charg'd a field."

Pope: Homer's Iliad, bk. ii. 968-9.

as-sêm'-blêr, s. [Eng. *assemble(e)*; -er. In Fr. *assembleur*.]

1. One who convenes an assembly, or brings a number of people together.

"None of the list-makers, the *assemblers* of the mob, the directors and arrangers, have been convicted."—*Burke: Reflections on the Executions* in 1780.

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pîne, pît, sîre, sîr, marîne; gô, pôť, ör, wôre, wôlf, wôrċ, whô, sôn; mûte, cûb, cûre, unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â. qu = kw.

2. One who himself constitutes part of such a gathering.

"For your confession of faith, which you say shall be published by your *assemblers*."—*Hammond to Cheyuel*. (*Hammond: Works*, i. 193.)

as-sēm'-blīng, *pr. par. & s.* [ASSEMBLE.]

As substantive: A gathering together, a meeting together.

"Not forsaking the *assembling* of ourselves together, as the manner of some is . . ."—*Heb.* x. 25.

"Let all rude and riotous *assemblings* . . . be banished from this day of rest and holiness."—*Bishop Fleetwood: Charge*.

***as-sēm'-blit**, *pa. par.* [ASSEMBLED.]

as-sēm'-blŷ, ***as-sēm'-blē**, *s.* [In *Fr. assemblée* = a meeting of persons (originally, it is believed, a deliberative political assembly; afterward also one of the clergy); *assemblé*=one of the steps in a dance; *Prov. assemblada*; *Sp. asamblea*; *Ital. assemblea*=a meeting of persons; *Sw. assemble*.] [ASSEMBLE, *v.*]

A. Ordinary Language:

I. In a passive sense:

1. *Gen.*: That which is convoked; a gathering together of persons, or, in some cases, of things, for any purpose.

"I sat not in the *assembly* of the mockers."—*Jer.* xv. 17. (See also *Gen.* xlix. 6.)

"I was almost in all evil in the midst of the congregation and *assembly*."—*Prov.* v. 14.

2. *Specially*:

(a) A great gathering of people for religious or political purposes, or for both. In Old Testament Scripture it is frequently used of the whole congregation of the Israelites convened for any religious or national object, especially of their assembling at Sinai to receive the law. [See also *B.*]

" . . . on the eighth day shall be a holy convocation unto you, and ye shall offer an offering made by fire unto the Lord; it is a solemn *assembly*."—*Lev.* xxiii. 36. (See also *Deut.* xvi. 8, and *2 Kings* x. 20. In a *fig. sense*: *Heb.* xii. 23.)

" . . . according to all the words which the Lord spake with you in the mount, out of the midst of the fire, in the day of the *assembly*."—*Deut.* ix. 10. (See also *Deut.* x. 4; *xviii.* 16.)

(b) A deliberative body exercising legislative functions, and bearing rule over a nation, province, or district. In the United States these assemblies are known as "conventions."

"Officers and men muttered that a vote of a foreign *assembly* was nothing to them."—*Macaulay: Hist. Eng.*, ch. xi.

(See also *Acts* xix. 39.)

II. In an active sense: That which convokes. [*B. 2. Mil.*]

B. Technically:

1. *Church Hist., &c.*: The term now given to the highest deliberative body in some Presbyterian churches, and specially to what, when fully named, are termed the "General Assembly of the Established Church of Scotland," and the "General Assembly of the Free Church of Scotland." These consist of ministerial and lay or half-lay representatives, equal to each other in number, sent from each presbytery, and in spiritual matters discharge deliberative, legislative, judicial, and executive functions. The word *Assembly*, in this second sense, seems to have been introduced into Scotland from France, while the natives of the former country had much intercourse with Calvin. From Scotland it passed to England, where the "Westminster Assembly" was an assembly of 121 divines who, with certain lay assessors, met at Westminster in 1643, by authority of the Parliament, with the view of attempting to produce ecclesiastical formularies which might lead to uniformity of worship in England and Scotland. It sat five years, produced the Directory of Public Worship, the Confession of Faith, and the Larger and Shorter Catechisms, and was ultimately dissolved by Oliver Cromwell.

2. *Mil.*: The second beating of the drum in a camp to summon the soldiers to strike their tents.

assembly-room, *s.* A room in which public assemblies are wont to be held.

" . . . nor could she enter the *assembly-rooms*."—*Johnson: Life of Savage*.

***as-sēnd'e**, *v. i.* Old spelling of ASCEND.

***as-sēn'-dŷt**, *pa. par.* An obsolete spelling of ASCEND.

***ās'-sēn-ēl**, *s.* Old spelling of ARSENIC.

as-sēnt', ***ā-čēnt'e**, *s.* [O. *Fr. assent*, *assens*; *Port. assenzo*; *Lat. assensus*; from *assentio* or *assentior*=to assent.] [ASSENT, *v.*]

A. Ordinary Language:

1. The act of admitting the truth of any statement. Such assent emanates from the understanding, and differs from *consent*, which is an operation of the will. [See ¶ below.]

"I trowe ther needeth litel sermonyng
To make you *assente* to this thing."

Chaucer: C. T., 3,093-4.

"Her utmost reach, historical *assent*,
The doctrines warp'd to what they never meant."
Cowper: Conversation.

2. It is not unfrequently, however, used as synonymous with *consent*.

" . . . the talents which obtain the *assent* of divided and tumultuous assemblies to great practical reforms."—*Macaulay: Hist. Eng.*, ch. xx.

3. Accord; agreement.

" . . . the words of the prophets declare good to the king with one *assent*."—*2 Chron.* xviii. 12.

¶ We *assent* to what we admit to be true; we *consent* to what we allow to be done. *Assent* may be given to anything, whether positively proposed by another or not, but *consent* supposes that what is consented to is proposed by some other person. If *assent* and *consent* are both used of speculative propositions, then *assent* is the act of an individual, and *consent* that of many, as in the phrase, "By the common *consent* of mankind." Approbation, which is a much stronger word, is a species of assent and concurrence of consent. The latter term is properly used only of numbers, not of single individuals. (*Crabb.*)

B. Technically:

Law. The royal assent signifies the consent of the king to have his signature affixed to Acts of Parliament which have passed both Houses of the Legislature. This assent gives them the force of law.

"All those acts of the Long Parliament which had received the *royal assent* were admitted to be still in full force."—*Macaulay: Hist. Eng.*, ch. ii.

as-sēnt', *v. i.* [In *Fr. assentir*; *Sp. asentir*; *Port. assentar*; *Ital. assentire*; *Lat. assentio*=to assent; *ad*=to, and *sentio*=to discern by the senses, to feel.]

1. To admit a statement to be true.

"And the Jews also *assented*, saying that these things were so."—*Acts* xxiv. 9.

2. To consent to a proposal affecting one's interests.

"The princess *assented* to all that was suggested by her husband."—*Macaulay: Hist. Eng.*, ch. vii.

*3. To yield to the seductive influence of any vice.

"Loke wel, that ye unto no vice *assent*."

Chaucer: C. T., 13,502.

¶ For the difference between *assent* and *consent*, see ASSENT, *s.*

ās-sēn'-tā'-tion, *s.* [Lat. *assentatio*=flattering assent, pretended concurrence with everything that a person says; *assentor*=to assent habitually, with insincerity; *assentior*=to assent to; *ad*=to, and *sentio*=to feel.] Hypocritical assent to everything which another says; pretended concurrence in every opinion, however absurd, which he broaches; the implied object being, for the most part, to flatter him for selfish ends, or at least to avoid giving him offense.

"It is a fearful presage of ruin when the prophets conspire in *assentation*."—*Bishop Hall*.

ās-sēn'-tā'-tōr, ***ās-sēn'-tā'-toŭr**, *s.* [Ital. *assentatore*; *Lat. assentator*.] A flatterer.

"Other there be which, in a more honest term, may be called *assentatours* or followers, which do await diligently what is the form of the speech and gesture of their master, and also other his manners and fashion of garments."—*Sir T. Elyot: Gov.*, fol. 138 b.

***ās-sēn'-tā'-tōr-ī-lŷ**, *adv.* [Eng. *assentator*; -*ly*.] After the manner of a flatterer.

"I have no purpose, vainly or *assentatorily*, to represent this greatness [of Britain] as in water, which shows things bigger than they are . . ."—*Bacon*.

as-sēnt'-ēr, *s.* [Eng. *assent*; -*er*.] One who assents to anything.

"She is not an *assenter* (though thousands be) to that rabbinical rule cited in *Drusus* from Rabbi Haurica."—*Whitlock: Manners of the Eng.*, p. 353.

ās-sēn'-tī-ent (tī as shī), *a.* [Lat. *assentiens*, *pr. par.* of *assentio*=to assent to.] Assenting to, as opposed to *dissentient*; dissenting from. (*Quar. Rev.*) (*Worcester's Dict.*)

ās-sēnt'-īng, *pr. par. & a.* [ASSENT, *v.*]

"On female truth *assenting* faith relies."

Pope: Homer's Odyssey, bk. i., 276.

ās-sēnt'-īng-lŷ, *adv.* [Eng. *assenting*; -*ly*.] In an assenting manner; in such a manner as to express or imply assent. (*Huloet.*)

ās-sēnt'-ive, *a.* [Eng. *assent*; -*ive*.] Assenting. (*Savage.*)

ās-sēnt'-mēnt, *s.* [Fr. *assentiment*; Ital. *assentimento*.] The same as ASSENT (*q. v.*)

"Their arguments are but precarious, and subsist upon the charity of our *assentments*."—*Browne: Vulgar Errors*.

***ās'-sēn-ŷke**, *s.* Old name for ARSENIC (*q. v.*).

ās'-sēr, *s.* [Lat. *asser*=a small beam or lath.]

Arch.: A thin rafter, board, or lath.

as-sērt', *v. t.* [From *Lat. assertum*, supine of *asser*=to put or join to, . . . to affirm; *ad*=to, and *sero*, pret. *serui*=to put in a row, to join. In *Ital. asserire*.]

I. Of persons or other beings:

1. To affirm, to declare positively; to aver.

" . . . *asserting*, on proper occasions, the dignity of his country and of his master."—*Macaulay: Hist. Eng.*, ch. xiii.

2. To vindicate one's rights by actions as well as words.

"Human nature at last *asserted* its rights."—*Macaulay: Hist. Eng.*, ch. xii.

"Such just examples on offenders shown,
Sedition silence, and *assert* the throne."

Pope: Homer's Iliad, bk. ii., 338-9.

II. Of things: (Used figuratively in senses analogous to I. 1 and 2.)

"But, lo! from high Hymettus to the plain
The queen of night *asserts* her silent reign."

Byron: Curse of Minerva.

as-sērt'-ēl, *pa. par. & a.* [ASSERT.]

ās-sērt'-ēr, *s.* [ASSERTOR.]

as-sērt'-īng, *pr. par.* [ASSERT.]

as-sēr'-tion, *s.* [In *Fr. assertion*; Ital. *asserzione*; Ital. *assertio*=(1) a formal declaration regarding the freedom or servitude of any one; (2) an assertion generally.]

1. The act of asserting, affirming, or declaring positively.

2. The statement asserted or affirmed positively.

"The government, on full consideration, gave credit to his *assertion* that he had been guilty of a double treason."—*Macaulay: Hist. Eng.*, ch. xxi.

as-sērt'-ive, *a.* [In *Fr. assertif*.] With strong assertion; dogmatical, peremptory.

"He was not so fond of the principles he undertook to illustrate as to boast their certainty, proposing them not in a confident and *assertive* form, but as probabilities and hypotheses."—*Glanville*.

as-sērt'-ive-lŷ, *adv.* [Eng. *assertive*; -*ly*.] So as to assert; affirmatively.

"Read it interrogatively, and it is as strong for Soto and the Dominicans, as if it were read *assertively*, for Catherine and the Jesuits."—*Ep. Bedell: Letters*, p. 403.

as-sērt'-ōr, **ās-sērt'-ēr**, *s.* [Eng. *assert*; -*or* and -*er*.] One who asserts, affirms, supports, or maintains anything.

"The *assertors* of liberty said not a word . . ."—*Macaulay: Hist. Eng.*, ch. x.

" . . . an *asserter* of the hereditary principles of his family . . ."—*Lewis: Early Rom. Hist.* (1855), ch. xii., pt. iii., § 54.

as-sērt'-ōr-ŷ, *a.* [Eng. *assert*; -*ory*. In *Ital. assertorio*.] Involving an assertion; designed to support an assertion.

" . . . both with oaths promissory and *assertory*."—*Jeremy Taylor: On the Decalogue*.

***as-sēr'-ve**, *v. t.* [Lat. *asservio*.] To serve; to assist. (*Johnson.*)

as-sēss', *v. t.* [O. *Fr. assesser*=to regulate, settle; Low *Lat. assesso*=to value for the purpose of taxation; *Class. Lat. assessum*, sup. of *assideo*=to sit near, to be an assessor; *ad*=to, or near, and *sedeo*=to sit.]

A. Ordinary Language:

1. To fix by authority the exact portion of a tax which any particular person is required to pay.

2. To make a valuation of property in any place, with the view of settling what amount of local or other taxation its owner or occupier should be required to pay.

B. Law: To fix the amount of damages, costs, &c., in a law case.

***as-sēss'**, *s.* [From *assess*, *v.* (*q. v.*)] Assessment.

"Taking off *assesses*, levies, and free-quarterings, might appear plausible aims."—*Princely Pelican*, ch. 8.

as-sēss'-a-ble, *a.* [Eng. *assess*; -*able*.] Subject to assessment.

as-sēss'-a-blŷ, *adv.* [Eng. *assessabl(e)*; -*y*.] In the manner of an assessment.

as-sēs'-sion-ār-ŷ, *a.* [Eng. *assession*; *-ary*.] Pertaining or relating to assession.

"One of the answers of the jury, upon their oaths at the assessionary court, I have inserted."—*Carew: Survey of Cornwall*.

as-sēs'-mēt, ***as-sēs'-e-mēt**, *s.* [Eng. *assess*; *-ment*.]

A. Ordinary Language:

1. The act of fixing a certain sum, after consideration of a person's means, as the portion of a tax which he should fairly be required to pay; or the act of valuing property for purposes of taxation, and adjudging the proper sum to be levied on it. (It is followed by *on* or *of*.)

"It was determined that the greater part of this sum should be levied by an assessment on real property."—*Macaulay: Hist. Eng.*, ch. xv.

"... the business of the census involving the enumeration of persons and the assessment of property."—*Lewis: Early Rom. Hist.*, ch. v., § 1.

2. The state of being assessed.

3. The amount which is imposed on an individual after consideration of his resources, or on property after valuation.

B. Law: The act of assessing damages by means of a jury.

as-sēs'-ōr, *s.* [In Sw., Dan., Ger., & Port. *assessor*; Fr. *assesseur*; Sp. *asesor*; Ital. *assessore*, from Lat. *assessor*=(1) one who sits by another, an assistant; (2) (*Law*) the assistant of a magistrate: *ad*=to or near, and *sedeo*=to sit.]

1. One who sits near another—

(a) As being next to him in dignity:

"That His great purpose He might so fulfill,
To honor His anointed Son, avenged
Upon His enemies, and to declare
All power on Him transferr'd: whence to His Son,
The assessor of His throne, He thus began."
Milton: P. L., bk. vi.

Or (b) to render him assistance.

¶ In this latter sense it specially signified an assistant to a judge. (*Dryden: Virgil's Æneid*, vi. 583.)

2. One who assesses people or property for purposes of taxation. (*Glossog. Nova*.)

ās-sēs-sō'r-i-āl, *a.* [In Fr. & Port. *assessorial*; Lat. *assessorius*.] Pertaining to an assessor. (*Coxe*.)

Fr. *aset*, *asez*, *assez*; *asseiz*, *asses*=enough; Prov. *assatz*; O. Sp. *asaz*; Port. *assaz*; Ital. *assai*=enough; from Lat. *as*=to, and *satis*=enough.]

A. As adj. & adv. (chiefly of the form **assetth*): Sufficient, enough.

"Yet neuer shall make his richesse
Assetth unto his greedinesse."

Romaunt of the Rose.

B. As substantive:

I. Ordinary Language:

1. Formerly (of some among the obsolete forms given above, and especially of the form **asetth*):

(a) Compensation for an injury, satisfaction, or acceptable offering or concession. [ASSITH.]

"And Pilat, willynge to make *asetth* to the puple, left to hem Barabas."—*Wycliffe: Mark* xv.

(b) Assets.

"And if it suffice not for *assetth*. . . ."—*Piers Plowman*.

2. Now (of the form *assets* only): The same as *a* and *b*.

II. Technically (of the form *assets*, *s. pl.* only):

1. *Book-keeping, Bankruptcy, &c.*: All a person's property, every part of which may be made liable for his debts. In balancing accounts assets are put on one side and debts on the other—the assets on the *Cr.* side, and the debts on the *Dr.* one. The amounts of a merchant's debts and assets are always ascertained and recorded if he become insolvent.

2. *Law*: Property left by a deceased person which is salable and may be converted into ready money. It receives its name; *assets*—meaning *enough*, or *sufficient*—because its possession is sufficient to render the executor or administrator liable to discharge the debts and legacies of the deceased person, so far as the assets may be sufficient for the purpose. Assets obtained in this way are called *personal*. Besides these, there are others called *assets by descent*, or *real assets*. If a person covenant that he and his heir shall keep a house in repair, the heir is bound only as he has assets enough inherited from the promiser. (*Blackstone: Comment.*, bk. ii., chaps. 15, 20, 32.)

1. *Properly*: The act of sitting down, or the state of remaining seated, in order to work steadily at any business which one has to do. Hence, close application, diligence.

"Some cultivated rhetoric with such *assiduity* and success that their discourses are still justly valued as models of style."—*Macaulay: Hist. Eng.*, ch. iii.

2. Careful attention to a person.

as-sid'-u-ōūs, *a.* [In Fr. *assidu*; Sp. *asiduo*; Port. & Ital. *assiduo*; Lat. *assiduus* = (1) sitting by or near in constant attendance; (2) unremitting: from *assideo*.] [ASSIDENT.]

1. *Of persons or other animated beings (Lit.)*: Sitting closely and uninterruptingly to one's work, instead of getting up from time to time to take relaxation; hence giving close or constant application to one's work, diligent. (It is used both of specific instances of such uninterrupting application, and of one's general character.)

"The public were too strenuously employed with their own follies to be *assiduous* in estimating mine."—*Goldsmith: Essays* (Preface).

"Thus as the bee, from bank to bower,
Assiduous sips at every flower."

Cowper: Annus Memorabilis (1789).

2. *Of things*: Performed with unremitting constancy and diligence.

"... they became, under *assiduous* training, the first soldiers in Greece."—*Macaulay: Hist. Eng.* (ed. 1861), ch. xxiii. (Note).

"... by *assiduous* observation of the sun's transits over the meridian."—*Herschel: Astron.*, § 377.

"... finally, *assiduous* and oft-repeated effort . . ."
—*Tyndall: Frag. of Science* (3d ed.), Preface, vi.

as-sid'-u-ōūs-lŷ, *adv.* [Eng. *assiduously*; *-ly*.] In an assiduous manner; with unremitting regularity and diligence.

"For, such as his mind was, it had been *assiduously* cultivated."—*Macaulay: Hist. Eng.*, ch. xx.

as-sid'-u-ōūs-nēss, *s.* [Eng. *assiduous*; *-ness*.] The quality of being assiduous.

"Persons that will have the patience to understand, and press with art and *assiduousness*."—*Lett. dat.* 1637; *Sidney State-Papers*, vol. ii., 509.

***as-siē'ge**, ***a-sē'ge**, *v. t.* [Fr. *assiéger*.] To besiege.

***as-siēg'-ēr**, *s.* [Eng. *assieg(e)*; *-er*.] A besieger.

"No lesse to keepe then coole th' *assiegers'* pride."

Hudson: Judith, iii. 254.

ās-si-ēnt'-ist, *s.* [Eng., &c., *assient(o)*; *-ist*.] A shareholder or stockholder of the Assiento Company; also one holding the Assiento contract. (*Bancroft*.)

ās-si-en'-tō, **ās-i-ēn'-tō**, *s.* [Sp. *asiento*=a seal, . . . a contract or lease; from Lat. *assideo*=to sit near.] [ASSIDENT.]

Commerce & History: A contract or convention between the King of Spain and other powers for furnishing slaves for the Spanish dominions in America. The contract of the Assiento was made with Great Britain on March 26, 1713.

Assiento Company: Any company entrusted with the function of fulfilling the Assiento contract. The first one which agreed to undertake the degrading task was the French Guinea Company. In July, 1713, the Treaty of Utrecht handed it over to Great Britain, and for twenty-six years the South Sea Company did something toward rendering the odious service required. But the breaking out of war in 1739 placed the Assiento contract in abeyance. It was never revived, and ultimately Britain became the mortal foe, first of the slave-trade, and then of slavery itself.

as-si'gn, ***as-si'gne**, ***as-sŷ'gne** (*g* silent), *v. t.* [In Fr. *assigner*; Prov. *assignar*; Sp. *asignar*; Port. *assignar*, *assinar*; Ital. *assegnare*; from Lat. *asigno*=(1) to mark out, to assign, to allot, (2) to ascribe, to impute, (3) to consign, to seal: *ad*=to, and *signum*=a mark.] [SIGN.]

A. Ordinary Language:

1. *Properly*, to sign over to another rights or property which have hitherto belonged to one's self. [B., I. & II.]

2. To mark out, to allot, to apportion.

"... for the priests had a portion *assigned* them of Pharaoh, and did eat their portion which Pharaoh gave them."—*Gen.* xlvii. 22.

"... which *assigned* each battle, or war, or siege, or other leading event, to its proper consuls."—*Lewis: Early Rom. Hist.*, ch. xii., pt. i., § 14.

3. To designate for a specific purpose; to name, to fix upon.

"And they appointed Kedesh in Galilee in Mount Naphtali, . . . And on the other side Jordan by Jericho eastward, they *assigned* Bezer . . ." [meaning, named it as a city of refuge].—*Josh.* xx. 7, 8.

4. To attribute to; to allege specifically.

"... and with a velocity regulated according to the law above *assigned*."—*Herschel: Astronomy*, 5th ed. (1858), § 361.

B. Technically:

I. Law:

1. To transfer to another by means of a signed document.

2. To apportion; to allot.

"If the heir or his guardian do not *asstgn* her dower within the term of quarantine, or do assign it unfairly, she has her remedy at law, and the sheriff is appointed to assign it."—*Blackstone: Comment.*, bk. ii., ch. 8.

3. To appoint a deputy. [ASSIGNEE.]

4. To set anything forth specifically, or with the full particulars given. Thus, to *assign* error is to show in what part of the process error is committed; to *assign* false judgment, is to declare how and where the judgment is unjust; to *assign* the cessor, is to show how the plaintiff had ceased or given over; to *assign* waste, is to show wherein especially the waste has been committed. (*Cowel*.)

II. Comm. (In the same sense as A. 1, and B., I. 1.) To sign over to another rights or property which have hitherto belonged to one's self. To transfer money or property to a person by the endorsement of a check or bill, or by a similar document signed.

as-sign-a-ble (*g* silent), *a.* [In Fr. *assignable*.]

A. Ordinary Language:

1. Able to be assigned, allotted, or given over as property to an individual named.

2. Able to be specified or pointed out.

"So far as that element is concerned, production is susceptible of an increase without any assignable bounds."—*J. S. Mill: Polit. Econ.*, vol. i., bk. i., ch. xi., § 4.

B. Technically:

I. Law & Comm.: Able to be transferred so as to pass from hand to hand, as an endorsed check.

II. Mathematics:

1. *Assignable magnitude or quantity:* A magnitude or quantity which, not being infinite, is capable of being definitely stated.

2. *Assignable ratio:* A ratio capable of such definite statement.

ās-sī-gnat' (*gnat* as *nyāt*), *s.* [Fr.] An annuity founded on the security of lands. Specially, French Republican paper money. When the revolutionary French Assembly of 1790 took the decisive step of disendowing the church, and appropriating all ecclesiastical property to the state, the prodigious quantity of church lands, amounting to about one-third of the soil of France, thrown upon its hands could not be disposed of all at once. The labor of selling it was therefore devolved on each commune or parish, which was required to pay the proceeds, when realized, into the state treasury. Meanwhile the government, being without adequate revenue, issued paper money on the security of the funds to be paid it by the communes. The bonds issued for the purpose were called *assignats*. Ultimately over-issue of these paper notes greatly depreciated their value, so that in the year 1795, 3,000 instead of about twenty-four of them were given in change for a louis-d'or (\$4.80). (*Evans Crowe's Hist. of France; Cabinet Cyclopædia*, 1831, vol. ii., p. 304; vol. iii., p. 121.)

ās-sī-gnā'-tion, *s.* [In Fr. *assignation*; Sp. *asignacion*; Port. *assignação*; Ital. *assegnazione*; from Lat. *assignatio*=a marking out, an allotment; *assignatum*, supine of *assigno*.] [ASSIGN.]

A. Ordinary Language:

I. The act of assigning. Specially—

1. The act of transferring property by a written deed, or in a similar way.

"It could be converted into private property only by purchase or *assignation*; and *assignation* always proceeded on regular principles, and awarded equal portions of land to every man."—*Arnold: Hist. Rome*, vol. i., ch. xiv., p. 268.

2. The act of making an appointment of time and place for love-interviews.

"The lovers expected the return of this stated hour with as much impatience as if it had been a real *assignation*."—*Spectator*.

II. The state of being assigned.

III. That which is assigned.

"That by new instances are not always to be understood new recipes, but new *assignations*; and of the diversity between these two."—*Bacon: Inter. of Nat.*, ch. xii., p. 388.

B. Technically:

1. *Law & Comm.:* In the same sense as A., I. 1. (*q. v.*)

2. *Comm. (In Russia):* A bank-note or bill; paper money.

ās-sī'gned (*g* silent), *pa. par. & a.* [ASSIGN, *v.*]

"In their *assign'd* and native dwelling place."

Shakesp.: As You Like It, ii. 1.

ās-sī-gnē'e (*g* silent), *s.* [In Fr. *assigné*=defendant at law.]

In Law:

1. A person to whom any duty or property is assigned. An assignee may be one *in deed* or *in law*. He is the former if appointed by a person, and the latter if appointed by the administrators of the law.

2. *Assignees in bankruptcy:* Persons to whom a bankrupt's estate is assigned, and in whom it shall be vested for the benefit of his creditors. (*Blackstone: Comment.*, bk. ii., ch. 31.)

ās-sī'gn-ēr (*g* silent), *s.* [Eng. *assign*; -*er*.] One who or that which assigns. [ASSIGNOR.]

"The gospel is at once the *assigner* of our tasks and the magazine of our strength."—*Dr. H. More: Decay of Piety*.

ās-sī'gn-īng, *pr. par.* [ASSIGN, *v.*]

ās-sī'gn-ment, *s.* [Eng. *assign*; -*ment*. In Ital. *assegnamento*.]

A. Ordinary Language:

I. The act of assigning or of designing any person or thing to a particular use.

1. The act of assigning or allotting any person or thing to a particular use.

"Triumvirs, for the *assignment* of lands and the receipt of names, are appointed."—*Lewis: Early Rom. Hist.*, ch. xii., pt. ii., § 34.

*2. The act of designing anything; design.

"The second Bulwarke was the Hearing sence, 'Gainst which the second troupe *assignment* makes." *Spenser: F. Q.*, II. xi. 10.

II. The state of being assigned.

"I believe the years of *assignment* are passed away with discontent and unhappiness."—*Darwin: Voyage round the World*, ch. xix.

III. That which is assigned; also the document by which assignment is made, such as a signed or endorsed check or bill, a lease, &c.

"... to those to whom it has granted a portion of the revenue, and are indemnified by *assignments* on the revenue collectors."—*J. S. Mill: Polit. Econ.*; *Prelim. Rem.*, p. 17.

"... on an *assignment* of hearth money there was no difficulty in obtaining advances."—*Macaulay: Hist. Eng.*, ch. x.

B. Technically:

Law, Comm., &c.: The act of signing over to another rights or property which have hitherto belonged to one's self. [A. I. 1.; III.]

Assignment of estate is a transfer, or making over to another, of the right a person has in any estate. It is usually applied to an estate for life or years. It differs from a lease, for in a lease he grants an interest less than his own, reserving to himself a reversion; while in an assignment he parts with the whole property, which from that time absolutely belongs to the assignee. (*Blackstone: Comment.*, bk. ii., ch. 20.)

ās-sign-or' (*g* silent), *s.* Of the same meaning as ASSIGNER.

"... in assignments he parts with the whole property, and the assignee stands to all intents and purposes in the place of the *assignor*."—*Blackstone: Comment.*, bk. ii., ch. 20.

ās-sim-īl-a-bīl'-ī-tŷ, *s.* [Eng. *assimilable*; -*ity*.] Capability of being assimilated. (*Coleridge*). (*Reid's Dict.*)

ās-sim-īl-a-ble, *a. & s.* [In Fr. *assimilable*.]

A. As adjective: That may be assimilated. Able to be made in one or more particulars to resemble something else.

B. As substantive: That which is capable of being assimilated.

"The spirits of many will find but naked [habitations, meeting no *assimilables* wherein to re-act their natures."—*Browne: Vulgar Errors*.

ās-sim-īl-āte, *v. t. & i.* [In Ger. *assimiliren*; Fr. *assimiler*; Sp. *asimilar*; Port. *assimilar*; Ital. *assimigliare*. *assimilare*: from Lat. *assimilis*=similar; *ad*=to, and *similis*=like; or from Lat. *assimulo* (there is not an *assimilo*)=to make like, to compare.]

A. Transitive:

*I. *Ordinary Language:*

1. To compare.

"To these 4 brutes, living in this estate, Four kinds of men we may *assimilate*."

Times Whistle, E. E. Text Soc. (ed. Cowper), *De quatuor elementis*, 77, 78.

2. To create a likeness between two or more different things; to render one thing like another.

"A ferine and necessitous kind of life would easily *assimilate* at least the next generation to barbarism and ferineness."—*Hale*.

"The downy flakes Descending, and with never-ceasing lapse Softly alighting upon all below, *Assimilate* all objects." *Cowper: Task*, iv. 329.

3. To convert into a substance identical with, or at least similar to, that operating upon it. [II. *Physiol.*]

"Tasting concoct, digest, *assimilate*, And corporeal to incorporeal turn." *Milton: P. L.*, v. 412.

"Hence also animals and vegetables may *assimilate* their nourishment, moist nourishment easily changing its texture till it becomes like the dense earth."—*Newton*.

II. Animal and Vegetable Physiol.: In the same sense as I. 3. (Used of the power possessed by plants and animals of converting their appropriate nourishment into portions of themselves.)

B. Intransitive:

I. Ordinary Language: To become similar. (Followed by the preposition *to*.)

"With regard to the spelling of native names, ... I have adopted that which *assimilates* most to the English pronunciation."—*Hooker: Himalayan Journals*, vol. i., Preface, p. xviii.

II. Animal and Vegetable Physiol.: To be converted into the substance of an animal or plant.

ās-sim-īl-ā-ted, *pa. par. & a.* [ASSIMILATE, *v.*]

ās-sim-īl-āte-nēss, *s.* [Eng. *assimilate*; -*ness*.] The quality of being similar to; likeness. (*Johnson*.)

ās-sim-īl-ā-tīng, *pr. par.* [ASSIMILATE, *v.*]

ās-sim-īl-ā-tion, *s.* [In Dan. & Fr. *assimilation*; Port. *assimilação*; Ital. *assimilazione*; Lat. *assimulatio*=likeness, similarity.]

1. *Ordinary Language:* The act or process of assimilating, *i. e.*, of making one being, person, or thing similar to another; the state of being so assimilated.

"It is as well the instinct as duty of our nature to aspire to an *assimilation* with God, even the most laudable and generous ambition."—*Decay of Piety*.

2. *Animal and Vegetable Physiol.:* The process by which an animal or a plant converts into textures, identical with its own, such foreign molecules as are fitted for its nutriment. (See Glossary to Owen's *Comparative Anatomy of the Invertebrate Animals*, 2d ed., 1855, p. 669.)

"These two processes, *excretion*, or the expulsion of effete particles, and *assimilation* of substances from without, are necessarily mutually dependent."—*Todd & Bowman: Physiol. Anat.*, vol. i.; *Introd.*, p. 12.

ās-sim-īl-a-tive, *adj.* [Eng. *assimilate*; suff. -*ive*.] Assimilating; having the power of assimilating.

"... an attractive, a retentive, an *assimilative*, and an expulsive virtue."—*Hakewill: Apology*, p. 5.

ās-sim-īl-a-tōr-ŷ, *a.* [Eng. *assimilate*; -*ory*.] Tending to assimilate.

***ās-sim-ūl-āte**, *v. t.* [Lat. *assimulo*=(1) to make like; (2) to counterfeit; *similis*=like.] To feign, to counterfeit. (*Johnson*.)

***ās-sim-ūl-ā-tion**, *s.* [Lat. *assimulatio*=(1) similarity; (2) *Rhet.*, a feigning that an audience is unfavorable to the views the orator expresses when he knows it to be the very opposite.] A dissembling, a counterfeiting. (*Johnson*.)

ās-sī-nē-gō, **ās-ī-nē-gō**, *s.* [Sp. & Port. *asno*=an ass.] An ass, a dolt, a stupid person.

"... thou hast no more brain than I have in mine elbows; an *assinego* may tutor thee; thou scurvy valiant ass! thou art here put to thrash Trojans . . ."—*Shakesp.: Troilus and Cressida*, ii. 1.

***ās-sī'se**, *s.* [ASSIZE (2).]

ās-sī'sh, *a.* [Eng. *ass*; suff. -*ish*.] Asinine; resembling an ass; stupid.

ās-sī'sh-nēss, *s.* Obstinate stupidity.

ās-sī'sh-ōr, *s.* [ASSIZER.]

ās-sīst', *v. t. & i.* [In Fr. *assister*; Sp. *asistir*; Port. *assistir*; Ital. *assistere*; from Lat. *assisto*=to stand at or by; *ad*=to or near; *sisto*=to cause to stand.] Properly, to stand by one; hence to help, to aid, to support one, whether in action or in sorrow.

A. Transitive: In the above sense.

"... that ye *assist* her in whatever business she hath need of you."—*Rom.* xvi. 2.

B. Intransitive: To give help or aid.

"Myself *assisting* is the social joy."

Pope: Homer's Odyssey, bk. iv., 331.

ās-sīst'-aŋce, *s.* [In Fr. *assistance*; Sp. *asistencia*; Port. *assistencia*; Ital. *assistenza*; Low Lat. *assistentia*.] Help, aid; whatever in the circumstances will enable one to do his work more easily or in a shorter time, or will encourage him with more fortitude to sustain his sorrow.

"Let us entreat this necessary *assistance*, that by his grace he would lead us."—*Rogers*.

ās-sīst'-ant, *a. & s.* [In Fr. *assistant*, *a. & s.*; Sp. *asistente*, *s.*; Port. *assistente*, *adj.*, *assistant*, *s.*; Ital. *assistente*; from Lat. *assistens*, *pr. par.* of *assisto*.] [ASSIST.]

A. As adjective: Aiding, helping, auxiliary.

"Around, a train of weeping sisters stands, To raise her, sinking, with *assistant* hands."

Pope: Homer's Iliad, bk. xxii., 304-5.

B. As substantive: Properly, one who stands by or attends upon another, an attendant; but now the word means one who aids or helps another in any way.

"Of four *assistants* who his labor share, Three now were absent on the rural care."

Pope: Homer's Odyssey, bk. xiv., 27, 28.

ās-sīst'-ant-lŷ, *adv.* [Eng. *assistant*; -*ly*.] In a manner to assist.

Lat. *assensus*=a sitting by; *assideo*=to sit by: *ad*=to, . . . by, near, and *sedeo*=to sit.]

A. Ordinary Language:

I. A formal session or sitting; or in the plural sessions or sittings specially for judicial purposes.

1. Literally:

(a) In a general sense: A sitting for any purpose, as for worship, to hear confessions, &c.

"In daunger he hadde at his owne *assise*
The yonge gurlis of the dioicse."

Chaucer: C. T., 665-6.

¶ In daunger is=under his jurisdiction.

(b) (Generally pl.): With the same signification as that given under B., II. 3.

"Thenceforward his writs ran and his judges held *assises* in every part of Ireland . . ."—*Macaulay: Hist. Eng.*, ch. i.

(c) The time or place of holding a judicial sitting.

"The law was never executed by any justices of *assize*; but the people left to their own laws."—*Davies: Ireland*.

2. *Fig.*: The last judgment.

"The judging God shall close the book of fate,
And there the last *assizes* keep,
For those who wake and those who sleep."

Dryden: Mrs. Killigrew, 182.

II. The result of such judicial or other sitting.

*1. A statute. [B., II. 5.]

"Bitoknen thine seuen wise,
That han irowt ayen the *assise*."

Seuyn Sages, 2,490. (*Boucher*.)

As in the *asyse* of Sodomas to seggez that passen."

E. Eng. Allit. Poems (ed. Morris); *Cleanness*, 843-4.

B. Technically:

I. *English Law & Government*: An assembly of knights and other substantial men met at a certain place and time for the discharge of public business. In this sense, the General Council of Wittenagemote of England was called the General Assize. Glanvil, who wrote in the reign of Henry II., says it had never yet been ascertained by the general assize or assembly, but was left to the custom of particular counties. (*Blackstone: Comm.*, bk. i., ch. 2.)

II. *Law*:

1. A jury, so called from their sitting together. Blackstone thinks that jury was the original meaning of the word *assize*. The grand assize, or grand

jury, was instituted by Henry II., and might be appealed to by one who preferred it to trial by battle. (*Blackstone: Comm.*, bk. iii., chaps. 10, 22, and 23.)

2. The court which summons together such a jury by a commission of assize, or *ad assisas capiendas*. (*Ibid.*, ch. 10.)

3. The sittings held, by the commission of the sovereign, at stated intervals, by one or more judges in the county towns of England, for the trial of civil and criminal cases. [See A., I., 1 (b).] The judges sit on such circuits by virtue of five authorities—the commission of the peace, that ofoyer and terminer, that of general gaol delivery, that of assize, and that of nisi prius. The foundation of the present system was laid by Magna Charta, and by the statute Westm. 2, 13 Edw. I., c. 30. The commission of assize was so called because it was sent to take the verdict of a particular kind of assize—that is, jury. (*Ibid.*, bk. iii., chaps. 22, 23.)

4. An action at law for recovering the possession of lands. It is applicable to no more than two species of injury—by ouster, viz., abatement [ABATEMENT], and recent or novel disseisin. [DISSEISIN.] If the abatement happened upon the death of the demandant's father, mother, brother, sister, nephew, or niece, the remedy is by an assize of *mort d'ancestor*; if by that of relatives different from these, then various other terms are applied to it. An assize of novel disseisin—that is, of recent disseisin—does not essentially differ from that now described. These actions were called *writs of assize*. (*Ibid.*, bk. iii., ch. 10.)

¶ A certificate of assize was a second trial granted when a miscarriage of justice appeared to have occurred. (*Blackstone: Comm.*, bk. iii., ch. 24.)

5. A statute or ordinance. [A., II., 1, 2, 3.]

(a) In a general sense: A statute or ordinance of any kind. The assize of arms was an enactment of Henry II. that each person should provide arms suitable to his rank, which on his death should descend to his son or other heir.

¶ The assize of the forest meant rules for the management of the royal forests.

¶ Rents of assize are certain established rents of the freeholders and ancient copyholders of a manor, which cannot be departed from or varied. They are also called *quit-rents*. [QUIT.] (*Blackstone: Comm.*, bk. ii., ch. 3.)

(b) *Spec.*: An ordinance for regulating the measure and price of the articles sold in the market; also one for similarly fixing the standard weights and measures.

¶ To break the assize of bread is to violate the laws regulating the sale of bread, as by using false weights or giving short weight. (*Blackstone: Comm.*, bk. iv., ch. 12.)

6. The articles officially weighed and measured; also the standard weights. [A., III., IV.]

*III. Chess:

"The long assise, apparently a term of chess, now disused."—*Sir W. Scott*.

"And sette he hath the long *asise*,
And endred beth ther inne;
The play biginneth to arise,
Tristrem deleth atvinne."

Sir Tristrem, F. J., st. xxx. (*S. in Boucher*.)

as-si'ze, *v. t.* [From *assize*, *s.*]

1. To fix by a legal ordinance the weight, measure, or price of articles to be exposed for sale.

*2. To assess as a taxpayer. (*Buners*.)

as-si'zed, ***as-si'sed**, *pa. par.* [ASSIZE.]

as-si'z-ër, **as-si's-ër**, **as-si's-or**, **as-si'z-ör**, *s.* [Eng. *assize*, *v.*; -er, or.]

A. Of the forms assizer, assiser, and assisor (*Eng.*): An officer who fixes the "assize"—that is, the weight, measure or price of articles to be sold.

***as-sö'-bër**, ***as-sö'-bre** (*bre as bër*), *v. t.* [From Fr. *sobre*=sober.] To sober; to make sober; to keep sober. [SOBER.]

"And thus I rede thou *assobre*,
Thyn heste, in hope of such a grace."

Gower: Conf. Amant., bk. vi.

as-sö'-ci-a-bil'-i-tÿ (or *ci as shi*), *s.* [Eng. *associable*; -ity. In Ger. *assoziabilität*.] The quality of being capable of associating together.

as-sö'-ci-a-ble-ness (or *ci as shi*), *s.* [Eng. *associable*; -ness.] The ability to be associable.

as-sö'-ci-äte (*ci as shi*), *v. t. & i.* [From the adj. In Fr. *associer*; Sp. *asociar*; Port. *associar*=to associate.]

A. Transitive:

I. Of persons:

1. To join with one as a companion, a friend, a partner, or a confederate; to associate a person with one's self in some one of these relations; to unite together in friendship or confederacy, as two persons or parties may do.

"One of our order, to *associate* me,
Here in this city visiting the sick."

Shakesp.: Romeo and Juliet, v. 2.

"A fearful army, led by Caius Marcius,
Associated with Aufidius, rages
Upon our territories."

Shakesp.: Coriolanus, iv. 6.

"Associate yourselves, O ye people, and ye shall be broken in pieces."—*Isa.* viii. 9.

*2. To show sympathy with, by tears or otherwise, as a sincere associate or friend, even in one's woe.

"Shed yet some small drops from thy tender spring
Because kind nature doth require it so ;
Friends should *associate* friends in grief and wo."

Shakesp.: Titus Andronicus, v. 3.

II. Of things: To unite, blend, or join together, as feelings, mental conceptions, or material substances may do.

"Members of the three great groups of feelings severally *associate* themselves primarily with members of their own group."—*Herbert Spencer: Psychol.* (2d ed., 1870), vol. i., p. 253.

"Native silver is always *associated* with gold."—*Graham: Chemistry* (2d ed.), vol. ii., p. 343.

¶ Formerly the verb *to associate* was at least occasionally followed by *to*; now *with* is employed. (See the subjoined example and the examples above.)

"Some oleaginous particles unperceivedly *associated* themselves to it."—*Boyle*.

B. Intransitive:

1. Of persons: To keep company (with), to have intimate friendship with, to be in confederacy with.

"They appear in a manner no way assorted to those with whom they must *associate*."—*Burke*.

2. Of things: To unite together in action, to act harmoniously. (*The elder Darwin*.)

as-sö'-ci-äte (or *ci as shi*), *a. & s.* [From Lat. *associatus*, *pa. par.* of *associo*: *ad*=to, and *socio*=to unite together; *socius*=a partner, a companion.]

A. Ordinary Language:

1. The act of associating, uniting, or joining together.

1. *Of persons, or other beings capable of action:*
"F. Cuvier has observed that all animals that readily enter into domestication consider man as a member of their own society, and thus fulfill their instinct of association."—*Darwin: Voyage round the World*, ch. viii., p. 150.

2. Of things:

"... his [man's] mental powers, in association with this extraordinarily-developed brain."—*Owen: Classif. of Mammalia*, p. 49.

II. The state of being so associated, united, or joined together. (Used of beings, of persons, or of things.)

1. Of beings or persons:

"Self-denial is a kind of holy association with God; and, by making you his partner, interests you in all his happiness."—*Boyle*.

"... those animals which were benefited by living in close association."—*Darwin: Descent of Man*, pt. i., ch. iii.

2. Of things. [B.1.]

III. An aggregate of persons or things associated together.

1. *Of persons:* A society of any kind; persons in union with each other for any purpose, civil or ecclesiastical, political or non-political. [B. 2.]

"The Association also holds itself liable to print in detail those researches on particular points of inquiry which it has requested individuals or societies to undertake."—*Brit. Assoc. Rep.*, vol. i. (2d ed., 1835), p. viii.

2. *Of things:* An aggregate of things so associated together, as mental conceptions with each other, a mental feeling or thought with nerve action, or material substances with each other.

"We may build more splendid habitations,
Fill our rooms with paintings and with sculptures,
But we cannot
Buy with gold the old associations."
Longfellow: Birds of Passage (Golden Milestone).

"Here a name of noble intellectual associations. . ."
—*Tyndall: Frag. of Science* (3d ed.), xii. 559.

IV. A contract containing the rules or articles by which persons uniting with each other mutually pledge themselves to carry out the common objects of their society.

"He . . . had been the author of that Association by which the Prince's adherents had bound themselves to stand or fall together."—*Macaulay: Hist. Eng.*, ch. x.

"... was forced to content himself with dropping the Association into a flower-pot which stood in a parlor near the kitchen."—*Ibid.*, ch. xviii.

B. Technically:

1. Mental and Moral Philosophy.

(a) *Association of ideas:* The connection in the mind, especially in matters relating to memory, between two ideas, so that one tends to recall the other. If, for example, on walking out, one come to a spot where on a previous occasion something exciting happened, the sight of the place will almost certainly recall the occurrence. Dugald Stewart considers that the ideas which tend to suggest each other are those connected together by resemblance, analogy, contrariety, vicinity in time or in place, the relation of cause and effect, of means and of end, or of premises and conclusion.

"Association of ideas is of great importance, and may be of excellent use."—*Watts*.

(b) *The association of feelings* is a similar connection among the feelings.

"... the ultimate law to which the association of feelings conforms."—*Herbert Spencer: Psychology*, 2d ed. (1870), vol. i., p. 252.

2. *Science, Literature, &c.:* The word *Association*, though not so common as *Society*, is still in general use in the sense detailed under A., III. 1. The chief scientific association in the United States is fully and formally designated "The American Association for the Advancement of Science."

†(3) To adopt or receive into a society.

"The sixth was a young knight of lesser renown and
lower rank, assumed into that honorable company."—
Scott: Goodrich and Porter.

2. To take upon one's self, to arrogate to one's self
authority.

"With ravish'd ears,
The monarch hears,
Assumes the god,
Affects to nod,
And seems to shake the spheres."

Dryden: *Alexander's Feast*.

II. Technically:

Logic: To take anything for granted without
proof. This may be done either through inadvert-
ence or because what is assumed is really axio-
matic.

"In every hypothesis something is allowed to be as-
sumed."—*Boyle*.

"... we must not therefore assume the liberty of
setting aside well-ascertained rules of historical evidence."
—*Lewis: Early Rom. Hist.*, ch. viii., § 1.

B. Intransitive:

1. *Ordinary Language*: To be arrogant or pre-
tentious; to claim more than is one's due.

2. *Law*: To undertake an obligation of any kind,
as by a verbal or other promise to do anything.

as-sū'med, *pa. par. & a.* [ASSUME.]

As participial adjective:

1. *Gen.*: In senses corresponding to those of the
verb.

"... the assumed uniformity of the exciting causes
..."—*Darwin: Descent of Man*, vol. i., pt. i., ch. iv.

2. *Spec.*: Pretended, hypocritical.

"Disastrous news!" dark Wycliffe said;
Assumed despondence bent his head,
While troubled joy was in his eye,
The well-feigned sorrow to belie."

Scott: *Rokeby*, i. 14.

"Brutus now throws off his assumed character, . . ."
—*Lewis: Early Rom. Hist.*, ch. xi., § 37.

*as-sū'-mēt, *s.* [Lat. *assumentum*, from *assuo*

sew.] A patch.

"This assumption or addition Dr. Marshal says he never
could find anywhere but in this Anglo-Saxonic transla-
tion."—*Lewis: Hist. Eng. Bibles*, p. 9.

as-sū'-mēr, *s.* [Eng. *assume*; -*er*.] One who takes
to himself more than he is entitled to, or takes upon
himself what he has no right or is unable to do; a
pretender; also a woman who does so.

"Can man be wise in any course in which he is not safe
too? But can these high assumers, and pretenders to
reason, prove themselves so?"—*South*.

as-sū'm-īng, *pr. par., a. & s.* [ASSUME.]

A. As pres. participle: In senses corresponding
to those of the verb.

B. As adjective: Pretentious, arrogant, pre-
sumptuous, self-confident.

"His haughty looks, and his assuming air,
The son of Isis could no longer bear."—*Dryden*.

J. As substantive: Assumption, presumption.

"The vain assumings

Of some quite worthless of her [Poesy's] sovereign
wreaths."—*Ben Jonson: Poetaster*.

†as-sū'm-īng-nēss, *s.* [Eng. *assuming*; -*ness*.]
Assumption, presumption.

"Dyslogistic—viz., . . . 12. Haughtiness. 13. Assum-
ingness. 14. Arrogance."—*Bowring: Bentham's Works*,
vol. i., p. 201.

Law:

1. A verbal promise made by any one, or which
he may in justice be held to have more or less di-
rectly made. [See No. 2.] In the former case the
assumpsit or promise is said to be *explicit*, and in
the latter, *implied*. One may actually promise to
pay a sum of money or build a house by a certain
day, in which case the promise is deemed explicit,
and an action lies against him if he violate his
verbal engagement. Certain contracts are, however,
so important that the law requires them to be in
writing. *Implied promises* are such as the follow-
ing: A person, when in want of certain articles, is
in the habit of obtaining them at a certain shop.
Having done so, it is not legally competent for him
to turn round on the shopman and say, "Prove that
I ever promised to pay for the articles I received."
The law rightly judges that if there was not an *ex-*
PLICIT, there was at least an *IMPLIED* promise to pay
for the goods, else the shopman would not have
given them. So also if a person contract to build a
house, and erecting it in defiance of the principle
of gravity, see it tumble to pieces before his eyes,
he is not allowed to plead that he knew nothing of
building. His having taken the contract is held to
imply that he gave himself out as competent to
perform the work which he undertook to do.

"... the assumpsit or undertaking of the defendant
... A third species of implied assumpsits is . . ."
—*Blackstone: Comment.*, bk. iii., ch. 9.

2. An action at law brought for the enforcement
of such a promise, express or implied. (*Blackstone*:
Comm.)

*as-sūmp't', *v. t.* [From Lat. *assumptus*, *pa. par.*

A. Ordinary Language:

I. The act of assuming or taking to, up, upon, or
for granted.

1. The act of taking to or upon one's self, or tak-
ing up, or adopting.

"The personal descent of God Himself and His assump-
tion of our flesh to His divinity. . . ."—*Hammond*:
Fundamentals.

"Now, war with China must mean the acquisition of
territory and the assumption of immediate political
power."—*Times*, Nov. 10, 1875.

[See also B., I. 1.]

2. The act of taking for granted without proof.

"By showing that by the assumption of this wonderful
intangible ether all the phenomena of optics are ac-
counted for."—*Tyndall: Frag. of Science* (3d ed.), ix. 223.

II. The state of being assumed in any of the ways
now mentioned.

"Adam, after a certain period of years, would have
been rewarded with an assumption to eternal felicity."—
Wake.

"These, by way of assumption under the two general
propositions, are intrinsically and naturally good or
bad."—*Norris*.

III. A thing or things assumed. Spec., a thing
taken for granted without proof. (Followed by
that.)

"... possible to keep a compact based on the as-
sumption that Turkey either would or could behave like a
civilized State."—*Times*, Nov. 9, 1875.

B. Technically:

I. Theol., Church, Hist., &c. According to the
Greek and Roman churches:

1. The taking of the Virgin Mary up into heaven.

"Upon the feast of the assumption of the blessed Vir-
gin, the pope and cardinals keep the vespers."—*Stilling-*
fleet.

2. *In an elliptic sense*: The festival commemorat-
ing this alleged occurrence. It is kept by the
Roman and Greek churches on the 15th of August.

II. Her.: *Arms of assumption* are those which a
person may, in certain circumstances, legitimately
assume. They are now distinguished from *assump-*
tive arms. [ASSUMPTIVE.]

III. Logic:

*1. The minor or second proposition in a cate-
gorical syllogism.

*2. The consequence drawn from the major and
minor. (*Dyche*.)

3. Anything taken for granted without proof or
postulate. [A., III.]

"There are, however, geologists who maintain that this
is an assumption, based upon a partial knowledge of the
facts."—*Owen: Classif. of the Mammalia*, p. 58.

as-sūmp'-tīve, *a.* [Fr. *assumptif*; Port. *assump-*
tivo; from Lat. *assumptivus*.] Which is assumed,
or which may be assumed; capable of being as-
sumed.

Heraldry. Assumptive Arms:

*1. *Originally*: Arms which had been assumed in
a legitimate way.

"... in Heraldry, assumptive arms are such as a
person has a title to bear, by virtue of some action done
or performed by him, which by birth he could not wear;
as if a person that has naturally no coat should, in lawful
war, take a prince or nobleman prisoner, he has from that
time a right to bear the arms of such prisoner, by virtue
of that military law, that the dominion of things taken
in lawful war passes to the conqueror."—*Dyche: Dict.*
(1758).

2. *Now*: Arms assumed without proper authority;
those legitimately taken being called *arms of as-*
sumption, and not *assumptive arms*. (*Gloss. of Her.*
1847.)

A. As substantive:

I. Ordinary Language:

1. The act of assuring or insuring.

fāte, fat, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pēt,
or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

(i.) The act of imparting to another, who is distrustful or anxious, grounds on which confidence may be based, or of actually inspiring him with confidence itself. (*Lit. & fig.*)

"But, lordes, wol ye maken assurance,
As I schal say, assenting to my lore?
And I schal make us sauf for evermore."
Chaucer: *C. T.*, 4,761.

"Not a house but seems
To give assurance of content within."
Wordsworth: *Eccursion*, bk. v.

(ii.) The act of "insuring one's life." [*A.*, II. 3.]
2. The state of being assured, or being insured.

(i.) The state of being assured.

(a) The state of receiving statements, designed to inspire confidence either with respect to one's personal security or any other matter which else would be doubtful.

"We have as great assurance that there is a God, as we could expect to have, supposing that He were."—Tillotson.

(b) Firm belief in such statements, unwavering conviction.

"Such an assurance of things as will make men careful to avoid a lesser danger, ought to awaken men to avoid a greater."—Tillotson.

(c) Confidence, trust, produced by such conviction.

"Thou shalt fear day and night, and shalt have none assurance of thy life . . ."—Deut. xxviii. 66.

"And the work of righteousness shall be peace; and the effect of righteousness quietness and assurance forever."—Isa. xxxii. 17.

¶ To make assurance doubly sure: To take steps which seem much more than sufficient to remove every cause of apprehension, and produce tranquil confidence.

"Macb. Then live, Macduff: what need I fear of thee,
But yet I'll make assurance doubly sure."
Shakesp.: *Macbeth*, iv. 1.

(d) The confidence produced by comparing one's self with others. This may be moderate, and therefore legitimate; indeed, it may be only the absence of false modesty or overbashfulness.

"Men whose consideration will relieve our modesty, and give us courage and assurance in the duties of our profession."—Rogers.

"With all th' assurance innocence can bring,
Fearless without, because secure within."
Dryden. .

Or it may be immoderate and become forwardness or impudence.

"This is not the grace of hope, but a good natural assurance or confidence, which Aristotle observes young men to be full of, and old men not so inclined to."—Hammond.

Or again it may be supported by a feeling of duty, and become intrepidity or fortitude, which is highly commendable.

"They, like resolute men, stood in the face of the breach with more assurance than the wall itself."—Knolles.

(ii.) The state of being insured. [*A.*, II. 3.]

3. That which is designed to render a person or thing assured or insured.

(i.) That which is designed to assure a person, or inspire him with confidence.

"Assurances of support came pouring in daily from foreign courts."—Macaulay: *Hist. Eng.*, ch. xx.

" . . . the answer returned to these affectionate assurances was not perfectly gracious."—*Ibid.*, ch. xxiii.

(ii.) That which is intended to insure a person or his life, or, more truly, his property. [*A.*, II. 3.]

"An assurance being passed through for a competent fine, hath come back again by reason of some oversight."—Bacon.

II. Technically:

1. *Theology*: The unwavering conviction, divinely produced, that one is now acceptable to God, and will, through the mediation of Christ, at last infallibly attain to heavenly felicity.

"And we desire that every one of you do shew the same diligence to the full assurance of hope unto the end."—Heb. vi. 11.

"Though hope be indeed a lower and lesser thing than assurance, yet, as to all the purposes of a pious life, it may prove useful."—South.

2. *Law*: A legal document drawn out to give one a guarantee with respect to the assurance designed to be conveyed.

3. *Arithmetic, Comm., Insurance, &c.*: The act of "insuring" a person's life; the state of being insured; also a contract between a person on the one hand and a company on the other, by which the former agrees to pay a stipulated sum at fixed times, and the latter promises a certain amount to be given over to his heirs in the event of his dying during the period for which he has paid. The sum for which the individual insured becomes responsible is called the *premium*. If given all at once it is called a *single premium*; if at the commencement of each year, an *annual premium*.

While the time of a single person's death is not ascertainable beforehand by man, the percentage of deaths out of 10,000, or 100,000, or a million, is wonderfully fixed, the variations becoming less as the number from which the percentage is calculated grows greater. It may, therefore, become the subject of arithmetical and algebraical calculation. [ANNUITIES, LIFE, EXPECTATION.]

To find the present value of \$100, to be paid at the end of the year in which the assurer, A, dies: Find the present value of an annuity of \$1 for the life A. If this be called *a*, then (*a*+1) multiplied by the present value of \$1 due a year hence, with *a* subtracted from the result, and the remainder then multiplied by 100, will give the sum required. Or, find A's expectation of life, and calculate the present value of \$100 that number of years hence.

To find the annual premium which would furnish such a sum on the death of A: Divide the present value of \$100, as ascertained in the previous paragraph, by the present value of an annuity of \$1 for the same time.

¶ In the United States the term most commonly used to express this sense of the word is *insurance*, but in England for some years back *assurance* has come more and more into use in the case of *Life*, leaving *insurance* as the term of *Fire-offices*. In a list published in 1879, of the several companies which figure under the heading "Insurance Offices," eighteen have in their title the words "Life Assurance," while there is only one "Fire Assurance Society," and one Fire and Life Assurance Society. Four have in their title the words Fire Insurance; there is also one Insurance Company "for lives only." Thus the distinction has firmly established itself, but has not yet quite displaced the previous usage.

as-sû're, ***a-sû're** (sûr as shûr), *v. t.* [In Ger. *assecuriren*, *assekurieren*; Dut. *assurereen*; Fr. *assurer*; O. Fr. *asseürer*, *aseürer*; Sp. *asegurar*; Port. *assegurar*; Ital. *assecurare*; Low Lat. *assecurare*, from *ad*=to, and *securus*=free from care or from danger.] [ASSURANCE, ASSECURE.]

A. Ordinary Language:

I. To adopt means for inspiring belief or confidence.

1. To make one's self sure; or to make promises or statements, once or repeatedly, with the design of inspiring another person with belief or confidence.

"But whence they sprang, or how they were begott,
Unearth is to assure . . ."—Spenser: *F. Q.*, II. x. 8.

"Avaux assured Louvois that a single French battalion would easily storm such a fastness."—Macaulay: *Hist. Eng.*, ch. xii.

*2. To betroth.

"This drudge, diviner laid claim to me; called me Dromio; swore I was assured to her."—Shakesp.: *Comedy of Errors*, iii. 2.

3. To render property or any other desirable acquisition secure to one; to impart an indisputable title to certain property. To confirm, to guarantee.

" . . . then he shall add the fifth part of the money of thy estimation unto it, and it shall be assured unto him."—Lev. xxvii. 19.

4. To insure, as a life in an insurance office.

"One pound ten shillings per annum on the sum assured."—*Advt. of an Insurance Office.*

II. Actually to inspire belief or confidence.

1. To convince.

" . . . assur'd that man shall live
With all the creatures, and their seed preserve."
Milton: *P. L.*, bk. xi.

2. To embolden; to render confident.

"His heigh astate assured him in pryde;
But fortune cast him down, and ther he lay."
Chaucer: *C. T.*, 15,674-5.

"And hereby we know that we are of the truth, and shall assure our hearts before him."—1 John iii. 19.

B. Comm., Insurance, &c.: To insure one against some of the pecuniary consequences to his family which death would otherwise produce [ASSURANCE, II. 3], or to insure one's self or property against certain contingencies.

as-sû're (sûr as shûr), *pa. par. & a.* [ASSURE.]
As adjective:

1. In senses corresponding to those of the verb.

Specialty—

(a) Certain; undoubted.

" . . . I will give you assured peace in this place."—Jer. xiv. 13.

(b) Secure.

2. Impudent.

as-sû'r-êd-lý (sûr as shûr), *adv.* [Eng. *assured*; -ly.] With the security produced when a trustworthily assurance has been given; certainly, undoubtedly.

"Dol. Most noble empress, you have heard of me?
Cleo. I cannot tell.

Dol. Assuredly, you know me."
Shakesp.: *Antony and Cleopatra*, v. 2.

"Therefore let all the house of Israel know assuredly, that . . ."—Acts ii. 36.

as-sû'r-êd-ness (sûr as shûr), *s.* [Eng. *assured*; -ness.] The quality of being assured; assurance, certainty.

"One face, one color, one assuredness."—Daniel: *To Sir T. Egerton.* (*Richardson.*)

as-sû'r-êr (sûr as shûr), *s.* [Eng. *assur(e)*; -er. In Fr. *assureur*.]

1. One who seeks to inspire another with belief or confidence.

2. One who insures any person's life or property.

" . . . the general body of new assurers are to have no claim on either of the existing assurance funds."—John M. Candlish: *Times, City Article*, February 22, 1877.

as-sû'r-gent, *a.* [Lat. *assurgens*, *pr. par.* of *assurgo*=to rise up: *ad*=to or up, and *surgo*=to rise.] Rising up; rising out of.

1. *Her.*: Rising out of. (*Gloss. of Her.*, 1847.)

2. *Bot.*: Rising upward. (*Loudon: Cycl. of Plants*, 1829, *Glossary.*) The same as ASCENDING (q. v.).

as-sû'r-ing (sûr as shûr), *pr. par. & a.* [ASSURE.]

as-sû'r-ing-lý (sûr as shûr), *adv.* [Eng. *assuring*; -ly.] In an assuring manner.

1. *As adjective*: Pertaining to Assyria.

"There is Sir Henry Rawlinson's *Assyrian Canon* . . ."—*Trans. Bib. Arch. Soc.*, vol. iii. (1874), p. 5.

2. *As substantive*: A native of Assyria, especially if belonging to the dominant race.

"The Assyrian came down like the wolf on the fold."
Byron: *Destruc. of Sennacherib*.

Assyrian Language: A dead language belonging to the Aramæan, or Northern group of the Syro-Arabian tongues. Its nearest living analogue is the Neo-Syriac. It is only in the present century that it has been recovered. From its richness of grammatical forms, the late Dr. Hincks termed it "The Sanscrit of the Shemitic family of languages." The researches of Sir Henry Rawlinson on the trilingual inscriptions of Behistun proved the language of Babylonia, in the time of Darius, to be essentially the same as the Assyrian of Tiglath Pileser. The Biblical Archaeological Society's publications are full of information regarding Old Assyria, its language, and its history.

As-sýr'-i-ôl'-ô-gíst, *s.* [Lat. *Assyria*; from Gr. *Assyria*, and *logos*=a discourse.] One who makes the antiquities and history of Assyria his special study.

"There is no question among Assyriologists, including Mr. Smith, that . . ."—*Trans. Bib. Archæol. Soc.*, vol. iii., p. 4.

Gawan & Gol., i. 5. (*Jamieson.*)

***a-stānd'-an**, *v. i.* [A. S. *astandan*=to stand out, to endure.] To stand up. (*Layamon*, i. 277.)

***a-start'**, ***a-stērt'**, ***æt-stūr'-tēn**, ***at-stīr'-tēn**, ***ēt-stēr'-tēn** (pret. ***a-start'ed**, ***a-stērt'**, ***æt-stūrt'e**, ***at-stūrt'e**), *v. i. & t.* [Eng. *a*; *start*.]

A. Intrans.: To start from, to escape; to flee, to get free.

"That oft out of her bed she did *astart*,
As one with view of ghostly feends affright."

Spenser: *F. Q.*, III. ii. 29.

"He to his hous is gon with sorweful herte.
He saith, he may not from his deth *asterte*."

Chaucer: *C. T.*, II, 333-4.

B. Transitive:

1. To cause to start, to startle, to terrify, to affright; to befall, to come upon suddenly.

"No daunger there the shepheard can *astert*."

Spenser: *Shep. Cal.*, xi.

2. To release.

"Ther might *astert* him no pecunial payne."

Chaucer: *C. T.*, 6, 896.

3. To avoid. (*Scotch.*)

"Giff ye a goddesse be, and thet ye like
To do one payne, I may it not *astert*."

King Quair, ii. 25. (*Jamieson.*)

Ās-tar'-tē, *s.* [Gr. *Astartē*.]

1. *Myth.*: A Phœnician goddess corresponding to the Ashtoreth of Scripture. [*ASHTORETH*.]

"With these in troop

Came Astoreth, whom the Phœnicians call'd
Astarte, queen of heaven, with crescent horns;
To whose bright image nightly by the moon
Sidonian virgins paid their vows and songs."

Milton: *P. L.*, bk. i.

Others claim for Astarte a correspondence to the Greek Venus: she had a famous temple at Hierapolis, served by 300 priests.

2. *Zool.*: A genus of bivalve mollusks belonging to the family Cyprinidae. They have 2-2 hinge teeth, and are suborbicular, compressed, thick, smooth, or concentrically furrowed shells. Tate estimated the recent species known at twenty and the fossil at 285. The former belong to the temperate and arctic zones, and the latter to the rocks from the Carboniferous formation upward.

***a-stā'te**, ***as-tā't**, *s.* [*ESTATE*, *STATE*.]

"And kepte so wel his real *astat*,

as-tāt'-ic, *a.* [Gr. *astatos*=never standing still; from *a*, priv., and the pass. of *histēmi*=to cause to stand. Not influenced by the earth's magnetism.

An *astatic needle* is a needle movable about an axis in the plane of the magnetic meridian, and parallel to the inclination. When so situated, the terrestrial magnetic couple acting in the direction of the axis cannot impart to the needle any determinate direction, and therefore it is *astatic*.

An *astatic system* is a combination of two needles of equal force joined parallel to each other, with the poles in contrary directions. They counterbalance each other so that the system becomes completely *astatic*, and sets at right angles to the magnetic meridian.

a-stā'y, *adv.* [Eng. *a*, and *stay*.]

Naut.: A term used of an anchor, which, on being hauled up, temporarily takes such a position that the cable or chain from which it depends forms an acute angle with the surface of the water.

***a-stē'ir**, *v. t.* [A. S. *astyrian*=to excite.] To rouse, to excite, to stir. (*Scotch.*)

"My plesoure prikis my paine to prouoke,
My solace sorow sobbing to *asteir*."

K. Henry's Test. Poems, 16th cent., p. 262.

ās'-tē-ism, *s.* [Lat. *asteismus*; Gr. *asteismos*; from *asteios*=urbane, polite, witty, clever; *astu*=a city.]

Rhet.: Refinement of speech; urbanity.

***as-teor-ven**, *v. i.* [A. S. *asteorfan*=to starve.] To starve; to die. (*Stratmann.*)

ās'-tēr, *s.* [In Ital. *astero*; Dut., Ger., Fr., Sp. & Lat. *aster*; Gr. *astēr*=a star; from Sansc. *as*=to shoot, in which case it means the "shooters of rays," "the darters of light," or more probably from Sansc. *star*=to strew, applied to the stars as strewing about or sprinkling forth their sparkling light. (*Max Müller.*)] [*STAR*.] A genus of plants, the type of the order Asteraceæ, or Compositæ. It is so called because the expanded flowers resemble stars. There is but one British species, the *A. tri-polium*, Sea Starwort, or Michaelmas Daisy. In the United States these Asters grow wild in the meadows and on the prairies. They grow to beautiful forms under cultivation.

¶ The popular name *Aster* is applied to some species not of this genus. Thus the China Aster is *Callistephus chinensis*, and the Cape Aster *Agathæa amelloides*.

ās-tēr-ā'-çē-æ, *s.* [From the typical genus *aster* (q. v.).]

Botany:

*1. *Formerly*: An order, the fourth of five arranged under the alliance Compositæ, or Asterales, the others being Calyceraceæ, Mutisiaceæ, Cichoraceæ, Asteraceæ, and Cynaraceæ. These, excluding Cynaraceæ, constitute the Compositæ proper. The term Asteraceæ in this sense is called also *Corymbifera*, and comprehends the larger portion of the modern Tubulifloræ.

2. *Now*: A vast order, comprising the whole of the Compositæ proper. [See No. 1.] It is placed by Lindley, in his *Vegetable Kingdom* (1846), as the last order of his Campanales, or Campanal Alliance. It includes plants like the daisy, the thistle, the dandelion, and others, possessing what, to a superficial observer, appears like a calyx, but is in reality an involucre, surrounding a receptacle on which are situated not, as might at first sight appear, numerous petals, but many florets. Their calyxes very frequently take the form of pappus; the corollas are tubular, ligulate, or both; the stamens, four or five, syngenesious, that is, united by the anthers into a tube; their style simple; and the ovaries single, one-celled, with a solitary erect ovule. In 1846, Lindley estimated the known species at 9,000, placed in 1,005 genera. They are believed to constitute about one-tenth of the whole vegetable kingdom. They are everywhere diffused, but in different proportions in different countries; thus they constitute one-seventh of the flowering plants of France, and half those of tropical America. The order is divided into three sub-orders: I. Tubulifloræ; II. Labiatifloræ; and III. Ligulifloræ. All are bitter. For more specific information regarding their qualities, see the sub-orders and some of the genera.

***a-stēr'-ēn**, *v. t.* [A. S. *asteran*=to disturb.] To excite, to resuscitate. (*Stratmann.*)

as-tēr'-ī-a, *s.* [In Fr. *astérie*; Port. & Lat. *asteria*; Gr. *asteria*.]

Min.: Pliny's name for the sapphire when it shows a silvery star of six rays, if viewed in the direction of the vertical axis of the crystal. [*ASTERIATED SAPPHIRE*.]

as-tēr'-ī-as, *s.* [Gr. *asterias*=starred, spotted; from *astēr*=a star, . . . a star-fish.] A genus of

radiated animals, the typical one of the family Asteridæ. It contains the several species of star-fishes. [*STAR-FISH*.]

as-tēr'-ī-ā-tēd, *a.* [Gr. *asterios*=starry.] Radiated, with rays diverging from a center, as in a star.

asteriated sapphire. A variety of sapphire, having a stellate opalescence when viewed in the direction of the vertical axis of the crystals. It is the *asteria* of Pliny. (*Dana.*) [*ASTERIA*, *ASTROITE*.]

as-tēr'-ī-a-tōse, *s.* [From *asterias* (q. v.), and suff. *-ite*.] A fossil star-fish of the genus *Asterias*, or at least resembling it.

ās'-tēr-id, *s.* [Eng., &c., *aster*; suff. *-id*.] An English name for an animal belonging to the genus *Asterias*, or at least the family Asteridæ. (*Huxley: Class. of Animals*, p. 45.)

ās-tēr'-ī-dæ, **ās-tēr'-ī-a-dæ**, *s. pl.* [*ASTERIAS*.] A family of radiated animals belonging to the class Echinodermata, order Stellerida. It contains the so-called Star-fishes.

ās-tēr-id'-ē-a, *s. pl.* [From the typical genus *Asterias* (q. v.).] A word used by Professor Huxley and others to designate the Asteridæ.

ās-tēr'-ī-na, *s.* [Lat. *aster*; suff. *-ina*.] A genus of Star-fishes. *A. gibbosa* is the Gibbous Starlet.

ās'-tēr-isk, *s.* [In Fr. *astérisque*; Sp., Port., & Ital. *asterisco*; Lat. *asteriscus*; Gr. *asteriskos*=(1) a small star, (2) an asterisk, dimin. from Gr. *astēr*=a star.]

I. Ordinary Language:

1. *Lit.*: A well-known star-like mark used in printing or writing to refer to a foot-note. When notes are so numerous that they exhaust the separate symbolic marks, *, †, ‡, §, ||, ¶, then ** commences a new series. Sometimes one, two, or several asterisks mark an omitted portion of a word or sentence, as General D * * * *.

"[He] noted by *asterisks* what was defective, and by obelisks what was redundant."—*Grew*.

*2. *Fig.*: Anything in the shape of a star.

II. *Eccles. & Ch. Hist.*: A star-shaped frame placed over the paten in the Greek church, to prevent anything coming in contact with the sacred bread.

***ās'-tēr-isk**, *v. t.* [*ASTERISK*, *s.*] To mark with an asterisk. (*North: Examen*, p. 279.)

ās'-tēr-ism, *s.* [In Sp., Port., & Ital. *asterismo*, Gr. *asterismos*=a marking with stars.]

1. A constellation; any small cluster of stars.

"Poetry has filled the skies with *asterisms*, and histories belonging to them."—*Bentley: Sermons*.

†2. An asterisk. (*Dryden: Dufresnoy*.)

ās'-tēr-ite, *s.* [*ASTROITE*.]

a-stēr'n', *adv.* [Eng. *a*, and *stern*.]

I. In a ship, near the stern.

1. In the hinder part of a ship. (Used of any person or thing at rest there.)

"The galley gives her side and turns her prow,
While those *astern*, descending down the steep,
Thro' gaping waves behold the boiling deep."

Dryden.

2. Toward the hinder part of a ship. (Used of a person on board moving, or a thing being moved, from the bow toward the stern; or of the ship itself going sternward.)

II. In or into the water or elsewhere a greater or less distance behind a ship.

"Between latitudes 56° and 57° south of Cape Horn, the net was put *astern* several times . . ."—*Darwin: Voyage round the World*, ch. viii.

¶ *Astern* is opposed to *ahead*.

ās'-tēr-ōid, *a. & s.* [In Ger. *asteroid*; Fr. *astéroïde*; Gr. *astēr*, and *eidos*=form.]

A. As adjective: Presenting the aspect of a star.

"The *asteroid* polypes are all compound animals."—*Dallas: Nat. Hist. of the Animal Kingdom*, p. 56.

B. As substantive:

1. *Astron.*: The name given to any single individual of a great group of minute planets placed together between Mars and Jupiter. Prof. Titius, of Wittenberg, having drawn attention in 1772 to the fact that, with the exception of Jupiter, each planet has an orbit just about double that nearest to it on the side of the sun, Prof. Bode, of Berlin, drew the natural inference that the one exception to the rule would probably be removed by the discovery of a planet less remote from the sun than Jupiter, and more distant than Mars. A society was formed in 1800 for the special purpose of exploring the zodiac with the hope of discovering the supposed planet, but its efforts were not crowned with success. On the first day of the present century (January 1, 1801) a planetary body, afterward called *Ceres*, was found by Piazzi (who did not belong to the society) in the part of the solar system theoretically indicated; it was, however, far more diminutive in size than had been expected. Within the next six years three more asteroids (Pallas, Juno, and Vesta) were found in proximity to *Ceres*, and the suspicion arose that a goodly-sized planet had either been blown to pieces by internal forces of an explosive character, or splintered in a collision with some other heavenly body. Sir D. Brewster boldly affirms this in his edition of "Ferguson's Astronomy," while Sir J. Herschel at one time ridiculed the idea. It was reasoned that if such a catastrophe had taken place, many more than four fragments of the shattered planet would probably exist; but the search having been considered futile, it was

abandoned in 1816. It was subsequently resumed and up to November, 1898, 426 of these small planets had been discovered, seventy by Americans. All are of minute size, and some angular in place of spherical. According to Mr. Daniel Kirkwood, an American astronomer, they would collectively make a planet only a little larger than Mars.

The term *asteroid*, applied to these small bodies, is now becoming obsolete, the appellation *minor planets* taking its place. *Planetoids* is another name. They are sometimes also called *extra-zodiacal planets*, from their orbits stretching outside the zodiac, which is not the case with those of the normal type. Authorities differ respecting some minute points in the list of asteroids. Melete, when discovered on the 9th of September, 1857, was mistaken for Daphne, an error not detected till January, 1859. Herschel, Proctor, &c., number it 56, and place the date 1857, where it offends the eye, in 1859; we, with Mr. G. F. Chambers, transfer it to 1857, which alters the numbering of all the minor planets from 47 to 56. Before it was called *Melete* it used to be designated *Pseudo-Daphne*. There are other minute differences between lists of asteroids by leading authorities.

2. *Pyrotechnics*: A firework which projects starlike bodies into the air.

“... rockets with pearl stars . . . ditto with magenta stars . . . *Asteroids* changing colors while sailing through the air.”—*Advt. in Times*, Nov. 4, 1875.

ās-tēr-ōl'-dā, *s. pl.* [Gr. *astēr*=a star; *eidōs*=form, shape.] An order of radiated animals, the second of the class Polypi. All the species are compound animals inhabiting a polypidom. The polypes have eight flat tentacles arranged around the mouth in a single circle. The order consists of four families—the Tubiporidae, the Alcyonidae, the Gorgonidae, and the Pennatulidae.

ās-tēr-ōl'-dal, *a.* [Eng. *asteroid*; -al.]

I. Astronomy:

1. *Gen.*: Relating to any star.

2. *Spec.*: Relating to the asteroids.

II. Zool.: Relating to the Asteroida (q. v.).

ās-tēr-ō-ite, *s.* [Gr. *astēr*=a star, and suff. -ite (*Min.*) (q. v.).] A mineral, a variety of Augite.

ās-tēr-ō-lēp'-is, *s.* [Gr. *astēr*=a star, and *lepīs*=a scale, from *lepō*=to strip off a rind, to peel.] A genus of ganoid fishes named on account of the starry color of its scales. A bone of a species belonging to this genus, found at Stromness, the capital of Orkney, suggested to Hugh Miller the writing of his beautiful volume entitled *Footprints of the Creator*; or, *the Asterolepis of Stromness*. It was an elaborate argument against the development hypothesis. According to that hypothesis, the first species of any class appearing on the scene should be low in organization, and probably small in size. Mr. Miller showed that the *Asterolepis* was large in size and high in organization, and yet it was at that time believed to be the oldest fossil vertebrate found in Scotland. His argument was subsequently weakened by the discovery that the Stromness rocks were less ancient than the Forfarshire beds, containing *Cephalaspis* and other fish genera subsequently discovered, mostly of small size, though not of low organization.

ās-tēr-ō-phyl'-lī-tēs, *s.* [Gr. *astēr*=a star; *phyllon*=a leaf; and suff. *itēs*=of the nature of.] A genus of Cryptogamous plants, allied to Calamites, belonging to the order Equisetaceae. All are fossil, and belong to the Carboniferous period. Their name was given on account of the starry appearance of the verticillate foliage. Their stems were articulated and branched, and it is now known that the fossils termed *Volkmanina* constituted their fructification.

ās-thēn'-ī-a, **†ās'-thēn'-y**, *s.* [Gr. *asthenia*; from *asthenēs*=without strength; *a*, priv., and *sthenos*=strength.]

Med.: Absence of strength; debility.

ās-thēn'-ic, *a.* [Gr. *asthenikos*.]

In Medicine:

1. *Of persons*: Weakly, infirm; marked by debility.

2. *Of diseases*: Produced by debility; the result of exhausted excitability.

“Upon these principles he [Brown] founded the character and mode of treatment of all diseases, which were supposed to consist but of two families, the *sthenic* and the *asthenic*, the former produced by accumulated, the latter by exhausted, excitability, and marked by indirect debility.”—*Dr. Tweedie: Cycl. Pract. Med.*, vol. ii., p. 160.

[See BRUNONIANS.]

ās-thēn-ōl'-ō-gy, *s.* [Gr. *astheneia*, and *logos*=a discourse.] A discourse concerning asthenic diseases. The department of medical science which treats of those diseases in which debility is a marked feature.

ās'th-mā, *s.* [Ger. *asthma*; Fr. *asthme*; Sp., Port. & Ital. *asma*; Gr. *asthma*; from *aō*=to blow.]

In Medicine:

1. *Gen.*: Chronic shortness of breath, from whatever cause it may arise. Till a comparatively recent period good medical writers used the term in this wide sense, and non-professional writers and the public do so still.

2. *Spec.*: Asthma, or spasmodic asthma, is “a difficulty of breathing, recurring in paroxysms, after intervals of comparatively good health, and usually accompanied by fever.” It is most common in persons possessing the nervous temperament. After some precursory symptoms, it commences, often at night, with a paroxysm in which there is a great tightness and constriction of the chest. The patient breathes with a wheezing sound, and flings open the door or throw up the window in the effort to obtain more air. After a time the paroxysm passes away. Other fits of it probably succeed on subsequent days, but by no means with the regularity of intermittent fever. It is produced by a morbid contraction of the bronchial muscles. There are two leading varieties of the disease, a nervous and a catarrhal, the former of pure sympathetic and symptomatic forms, and the latter latent, humeral, and mucous chronic sub-varieties, besides an acute congestive, and an acute catarrhal form.

By a strong siding champion, conscience."
Milton; *Comus*.

"... but Preston, *astounded* by his master's flight,
..."
Macaulay: *Hist. Eng.*, ch. x.

2. *Intransitive*: To send forth a stunning sound; to peal forth as thunder.

"The lightnings flash a larger curve, and more
The noise *astounds*."—*Thomson*; *Summer*, 1, 137-8.

as-tōu'nd-ēd, **as-tōu'nd**, *pa. par. & a.* [ASTOUND.]

as-tōu'nd-ing, *pr. par. & a.* [ASTOUND.]

as-tōu'nd-mēnt, *s.* [Eng. *astound*; *-ment*.] Astonishment.

***as-tōu'n-ied**, *pa. par.* [ASTONIED.]

***as-tōy'n-yn**, ***as-tōyn**, *v. t.* [ASTON.] To shake, to bruise. (*Prompt. Parv.*)

As-tra-cān', **As-tra'-khān**, *s. & a.* [For etym. see def.]

A. *As substantive*:

1. *Geog.*: A province of Russia, on the northwestern coast of the Caspian Sea.

2. *Comm.*: A name given to curled, woolly skins, obtained from the sheep found in the province of Astracan, and in Persia and Syria; a fabric with a pile in imitation of this.

B. *As adj.*: Made of, or resembling, the skins or fabric described under A. 2.

ās'-tra-çism, *s.* [From Gr. *astraios* = starry, starred.] Starriness.

"Above the three-fold *astracism* of heaven."

Marlowe.

As-træ'-a (1), **As-trē'-a**, *s.* [Lat. *Astræa*.]

I. *Class. Myth.*: The goddess of justice. Like other divinities, she lived for a time on the earth, but being disgusted with the iniquity of mankind, she was obliged to quit it, being, however, the last of the deities to depart. When at length she went away she was transformed into a constellation (Virgo).

"This our land contains
Some in whose heart devine *Astræa* reignes."
Times Whistle, E. E. Text Soc., sat. 4, 1, 523-4.

"In this life of probation for rapture divine,
Astræa declares that some penance is due."
Byron: *Love's Last Adieu*.

II. Astronomy:

*1. The constellation Virgo, called also Erigone and Isis. [See No. I.]

"Hung forth in heaven his golden Scales, yet seen
Betwixt *Astræa* and the Scorpion sign."
Milton: *P. L.*, bk. iv.

2. An asteroid, the fifth found. It was discovered by Hencke on the 8th of December, 1845.

ās-træ'-a (2), *s.* [From Gr. *astraios* = starry, starred; *astron*=a star; generally in pl. *astræ*=the stars.]

Zool.: A genus of radiated animals, the typical one of the family *Astræidæ*. It received the name *Astræa* because the animals are thickly studded over it like stars in the sky. There are many recent and also many fossil species.

As-træ'-an, *a.* [From *Astræa* (q. v.).] Pertaining to *Astræa*; favored by the presence of *Astræa*.

"Intent on her, who rapt in glorious dreams,
The second-sight of some *Astræan* age."
Tennyson: *The Princess*, ii.

ās-træ'-i-dæ, *s. pl.* [From *astræa*, the typical genus.] [ASTRÆA (2).]

Zool.: A family of radiated animals belonging to the class *Polypi* and the order *Helianthoida*. It is specially to this family that the formation of coral reefs is to be attributed. It contains the genera *Astræa*, *Meandrina*, &c.

ās'-tra-gāl, *s.* [ASTRAGALUS.]

ās-tra-gāl'-ē-æ, *s. pl.* [ASTRAGALUS.] A tribe of papilionaceous plants.

as-träg'-al-ō-mān'-çy, *s.* [Gr. *astragalos*, in the plur.=dice, and *manteia*=divination.] Pretended divination performed by throwing down small dice with marks corresponding to letters of the alphabet, and observing what words they formed. It was practiced in the temple of Hercules, in Achaia.

as-träg'-al-ūs, **as'-tra-gāl**, *s.* [In Fr. *astragale*; Sp., Port., & Ital. *astragalo*; Lat. *astragalus*; Gr. *astragalos*=the ball of the ankle-joint. A leguminous plant, so called because its knotted root resembled an ankle-joint. In *Arch.*, a molding in the capital of an Ionic column):

A. (*Of the form astragalus*):

1. *Anat.*: One of the bones belonging to the tarsus.

"The tibia rests upon the *astragalus*, and through that bone transmits the weight to the foot."—*Todd & Bowman*: *Physiol. Anat.*, vol. i., p. 146.

2. *Bot.*: A genus of plants belonging to the order *Fabaceæ* and the sub-order *Papilionaceæ*. The English name is *Milk Vetch*. The genus contains about two hundred American species. *A. verus* furnishes *Gum-tragacanth* (q. v.). It is a native of Northern Persia. The seeds of *A. beticus*, after being roasted and ground, are used in Hungary as a substitute for coffee. There are many other foreign species of *Astragalus*, many of them ornamental.

B. (*Of the forms astragal and astragalus*):

Arch.: "A small semi-circular molding or Bead, sometimes termed Roundel." (*Gloss. of Architecture*.)

"I presume the three sets of double *astragals* at the base of the columns, one of which is in the British Museum, were all ended with gold fillets, as here described."—*Letter of Mr. Wood*, entitled "*Diana of the Ephesians*," *Times*, February 17, 1874.

as'-tra-kan-ite, *s.* [In Gr. *astrakanit*. From *Astrakhan*, near which it occurs.] A mineral, with whitish crystals. It is the same as *Bloedite* (q. v.).

ās'-tral, *a.* [Ger., Fr., Sp., & Port. *astral* (adj.); Ital. *astrale* (adj.); Lat. *astralis* (adj.), from *astrum*=a star; Gr. *astra*, pl.=the stars.]

A. *As adjective*: Pertaining to the stars; starry.

"Some *astral* forms I must invoke by pray'r,
Fram'd all of purest atoms of the air;
Not in their natures simply good or ill,
But most subservient to bad spirits' will."
Dryden.

B. *As substantive*: The same as *ASTRAL LAMP* (q. v.). Speaking of a room in a peasant's hut transformed by imagination into a splendid drawing-room, Whittier says:

"The tallow candle an *astral* shone,"

astral body, *s.* The spiritual body, as distinct from the material.

astral lamp. A lamp similar in character to an Argand Lamp (q. v.).

astral spirits, or spirits dwelling in the heavenly bodies, in the demonology of the Middle Ages were conceived of sometimes as fallen angels, sometimes as souls of dead men, or as spirits originating in fire and hovering between heaven, earth, and hell, without belonging to either.

a-strānd', *adv.* [Eng. *a=on*; *strand*.] Stranded.

"As the tall ship, whose lofty prore
Shall never stem the billows more,
Deserted by her gallant band,
Amid the breakers lies *astrand*."
Scott: *Lady of the Lake*, vi. 13.

as-trān'-ti-a, *s.* [In Ger. *astranz*; Fr. *astrance*; Port. *astrancia*; Gr. *astron*=a star, and *anti*, here implying comparison with. So called from the beautiful star-like involucre.] Master-wort. A genus of plants belonging to the order *Apiaceæ*, or Umbelliferae.

ās'-tra-pæ-a, *s.* [Gr. *astrapaios*=pertaining to lightning; *astrapē*=a flash of lightning.] A genus of plants belonging to the order *Sterculiaceæ*, or Sterculiads, and the tribe *Dombeyæ*. It has large heads of flowers so splendid in color that they suggested the choice of the generic name.

a-strā'y, ***a-strā'ye**, *adv., v., & s.* [Eng. *a=on*; *stray*.]

A. *As adverb*:

1. *Lit.*: Out of the right path, or inclosure, or place, where the person or animal described as straying ought to be.

"For ye were as sheep going *astray*; but are now returned unto the Shepherd and Bishop of your souls."—1 *Peter* ii. 25.

2. *Fig.*: Out of the path of truth, of propriety, or of moral rectitude.

"You run *astray*, for whilst we talk of Ireland, you rip up the original of Scotland."—*Spenser*: *Ireland*.

B. *As verb*: To stray away

"They *astrayed* from God."—*Hudson*: *Judith*, ii. 352.

C. *As substantive*: An animal or a person out of the right way or place. (*Prompt. Parv.*)

***a-strā'y-lý**, *adv.* [Eng. *astray*; *-ly*.] The same as *ASTRAY*, *adv.* (q. v.). (*Prompt. Parv.*)

***as'-tre** (*tre=tēr*), *s.* [Fr. *astre*, from Gr. *astron*=a star.] A star. (*Scotch*.)

"The glittering *astres* bright."

Hume: *Chron. S. P.*, iii. 336. (*Jamieson*.)

As-trē'-a, *s.* [ASTRÆA (1).]

***as-trē-la'-bre** (*bre=bēr*), *s.* An old spelling of *ASTROLABE* (q. v.).

***a-strēngth'e**, *v. t.* [A. S. *strengan*=to strengthen; *strengthu*=strength.] To strengthen.

"This is si vaire miracle thet thet godspel of te day us telth. Therefore sal hure be-liaue bie the betere *astrengthed*."—*Old Kentish Sermons* (ed. Morris), p. 32.

***a-strēt'ch-yn**, ***a-strēt'che**, *v. t.* [A. S. *astrecan*, *astrecan*, *astrecan*, pret. *astrehte*, *pa. par.* *astreht*=to stretch out, to bow down.] To stretch out, to reach. (*Prompt. Parv.*)

a-strīct', *v. t.* [From Lat. *astrictus*, *pa. par.* of *stringo*: *ad*=to, and *stringo*=to draw tight; Gr. *strangō*=to draw tight.] [ASTRINGE.]

A. *Ord. Lang.*: To contract by means of an application; to bind fast.

"The solid parts were to be relaxed or *astricted*, as they let the humors pass, either in too small or too great quantities."—*Arbuthnot*: *Aliments*

B. *Law*: Legally to bind. (*Scotch*.)

"None salde holdin nor *astrictit* to mak forder payment of their partis of the said taxation."—*Acts Jas.* VI. (1535).

a-strīct', *a.* [In Port. *astricto*; Lat. *astrictus*, *pa. par.* of *stringo*.] Contracted, concise.

"An epitaph is a superscription, or an *astrict* pithy diagram."—*Weever*: *Funeral Mon.*

a-strīc'-tion, *s.* [In Fr. *astriction*; Sp. *astriccion*; Port. *adstricção*; Lat. *adstrictio*.] [ASTRICT, *v.*]

A. *Ordinary Language*:

I. The act or capability of binding closely. *Used—*

(1) *Of the body*:

"This virtue requireth an *astriction*, but such an *astriction* as is not grateful to the body . . . for a pleasing *astriction* doth rather bind in the humors than expel them; and therefore such *astriction* is found in things of an harsh taste."—*Bacon*: *Nat. Hist.*, Cent. i., § 40.

(2) *Of the mind and will*:

"So of marriage he is the author, yet hence will not follow any divine *astriction* more than what is subordinate to the glory of God, and the main good of either party."—*Milton*: *Doctrine of Divorce*, bk. i., ch. 13. (*Rickardson*.)

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt. or. wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr. rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

II. The state of being so bound, physically or mentally.

"Lenitive substances are proper for dry atrabiliar constitutions, who are subject to *astription* of the belly and the piles."—*Arbutnot; Diet.*

III. That which binds closely; an astringent.

"*Astription* is in a substance that hath a virtual cold, and it worketh partly by the same means that cold doth."—*Bacon.*

¶ See also example under I. (1).

B. Technically:

Med.: In the same senses as those under A. I. (1), II. & III.

a-strict-ive, a. [Eng. *strict*; -ive.] Possessing the quality of contracting or binding; styptic. "The naked branches and bunches whereupon there were grapes have an *astriptive* virtue."—*Holland; Pliny*, bk. xxiii, ch. 1. (*Richardson.*)

a-strict-ōr-ŷ, a. [Lat. *astriktorius*.] Possessing the quality of contracting or binding; astringent; actually contracting or binding.

a-strīde, adv. [Eng. *a*; *stride*.]

1. Lit.: With the legs across, as when a person is on horseback.

"And yet for all that rode *astride* on a beast."—*C. Cotton: A Voyage to Ireland.*

2. Fig.: Supported on either side of anything, as spectacles on the nose.

"... and glasses with horn bows
Sat *astride* on his nose, with a look of wisdom supernal."—*Longfellow; Evangeline*, pt. i, 3.

as-trīf-ēr-oūs, a. [Lat. *astriker*; *astrum*=a star, and *fero*=to bear.] Bearing stars; starry.

as-trīg-ēr-oūs, a. [Lat. *astriker*, from *astrum*=a star, and *gero*=to carry.] Carrying stars; starry.

*a-strīk'-kīt, pa. par. [ASTRICT.] (*Scotch.*)

a-string'e, v.t. [In Fr. *astreindre*; Sp. *astringir*; Port. *adstringir*; Ital. *astringere*; from Lat. *astringo*.] [ASTRICT, v.]

1. Lit.: To bind together, by compressing the parts which till then have remained separate; to compress.

"Tears are caused by a contraction of the spirits of the brain; which contraction, by consequence, *astringeth* the moisture of the brain, and thereby sendeth tears into the eyes."—*Bacon.*

2. Fig.: To bind the mind or conscience by an obligation. (*Wolsey.*)

a-strīn'-gēn-čŷ, s. [In Fr. *astringence*; Port. *adstringencia*, *astringencia*; Ital. *astringenza*, *astringenza*; from Lat. *astringens*, pr. par. of *astringo*=to draw close, to bind.] [ASTRINGE.] The act or power of binding or contracting any part of the bodily frame. (It is opposed to RELAXATION.)

"Astriction prohibiteth dissolution; as, in medicines, astringents inhibit putrefaction; and by *astringency*, some small quantity of oil of vitriol will keep fresh water long from putrefying."—*Bacon; Nat. Hist.*

"Acid, acrid, austere, and bitter substances, by their *astringency*, create horror; that is, stimulate the fibers."—*Arbutnot.*

a-strīn'-gēnt, a. & s. [In Fr. *astringent*; Sp. & Ital. *astringente*; Port. *adstringente*; from Lat. *astringens*, pr. par. of *astringo*.] [ASTRINGE.]

A. As adjective:

1. Contracting and condensing the muscular fiber. (It is opposed to LAXATIVE.)

"*Astringent* medicines are binding, which act by the asperity of their particles, whereby they corrugate the membranes, and make them draw up closer."—*Quincy.*

2. It is sometimes used of tastes which seem to contract the mouth.

B. As substantive:

Med.: A substance which produces contraction and condensation of the muscular fiber: for instance, when applied to a bleeding wound they so contract the tissues as to stop the hemorrhage. The contraction thus produced is different from that effected by an ordinary stimulant, and from that caused by the administration of a tonic. [STIMULANT, TONIC.] They may be divided into (1) those which exert a tonic influence, as tannin combined with gallic acid; also sulphuric, acetic acids, &c.; (2) those which have a sedative effect, as the salts of lead; and (3) those which operate chemically, as chalk or other variety of carbonate of lime. Astringents are useful in various diseases. (*Dr. A. T. Thomson, in the Cycl. of Pract. Med.*)

"In medicines, astringents inhibit putrefaction."—*Bacon; Nat. Hist.*

a-strīn'-gēnt-lŷ, adv. [Eng. *astringent*; -ly.] In an astringent manner; in the way that astringents act; so as to bind or contract.

†a-strīn'-gēr, *au-strīn'-gēr, *ōs-trēg'-ī-ēr, s. [Low Lat. *ostercus*, *austercus*=a goshawk (*Nares*); O. Fr. *astour*, *ostour*, *ostorr*, *ostor*; Mod. Fr.

astour; Prov. *astour*; O. Sp. *astor*; Ital. *astore*; from Lat. *acceptor*, *accipiter*=a goshawk.] A falconer; *spec.*, one who keeps a goshawk.

Enter a gentle Astringer.

"This man may help me to his majesty's ear."

Shakesp.: *All's Well that Ends Well*, v. 1.

a-strīng'-īng, pr. par. [ASTRINGE.]

as-trīp'-ō-tēnt, adj. [Lat. *astrum*=a star, and *potens*=potent, powerful.] Ruling the stars.

"The high *astripotent* auctor of all."

MS. Harl., 2,251, f. 80 b. (*Boucher.*)

*ās'-trīte, s. [ASTROITE.]

as-trō-cār'-ŷ-ūm, s. [Gr. *astron*=a star, and *karuon*=(1) nut, (2) the stone in stone-fruits.] A genus of palms belonging to the family *Cocoinæ*.

as-trō-dēr'-mūs, s. [Gr. *astron*=a star, and *derma*=the skin.] A genus of spiny-finned fishes belonging to the *Scomberidæ*, or Mackerel family.

Astrodermus Guttalis.

The *A. guttalis* is from the Mediterranean, and is somewhat akin to the *Coryphæna*.

ās-trōg'-ēn-ŷ, s. [Gr. *astron*=a star, and *gennaō*=to bring forth, to produce.] The coming into existence of the celestial bodies.

as-trō-guō'-ŷ-i-a, as-trō-guō'-ŷ-ŷ, s. [Gr. *astron*=a star, and *gnōsis*=inquiry, knowledge; *gnōnai*, 2 aor. inf. of *gignōskō*=to learn, to know, to perceive.] Knowledge of the stars.

as-trōg'-ra-phŷ, s. [Gr. *astron*=a star, and *graphe*=... a writing, a description.] A writing or treatise on the stars; a description of the stars; a delineation of the stars. (*Johnson.*)

as-trōl'-d, a. [Gr. *astron*=a star, and *eidos*=form, shape.]

Heraldry: A mullet.

*ās-trō-i'te, *ās-trō-i't, *ās-trī'te, *ās-tēr-i'te, s. [In Fr. *astroite*; Lat. *asterites*, *astrites*; Gr. *astron*, or *aster*=a star, and suff. -ite=like.] [ASTERIA.]

1. Gen.: Any star-stone, i. e., stone of a radiate structure or superficially radiated, whether a mineral or a fossil organism, the necessity of precise identifications in such matters never having been popularly understood. Hence various radiated minerals, also joints of fossil encrinites, and anything similar, have by one unscientific person or other been designated as *astroites* or *star-stones*.

"*Astroites* or star-stones . . ."—*Brome: Travels* (1700), p. 12. (*Halliwel: Cont. to Lexic.*)

"In the arable grounds toward Barton, lying on a bed of stone, has been found a species of the *astroite*, or starry-stone, very beautiful, deeply intagliated or engraved like a seal."—*Warton: Hist. of Kiddingington*, p. 25.

2. Spec.: An ancient gem, called by Pliny *asteria*. Some have thought this the mineral named *cat's-eye*, which possesses a certain faint resemblance to a star, in having a fibrous substance; others, amianthus or asbestos inclosed in quartz; but both Phillips and Dana regard it as a variety of the sapphire—that sometimes called the *asteriated sapphire*. [ASTERIA.]

ās-trō-lābe, *ās-trŷ-lābe, *ās-trō-byre, s. [In Dan., Dut., & Ger. *astrolabium*; Fr. *astrolabe*; Prov. *astrolabi*; Sp., Port. & Ital. *astrolabio*; Low Lat. *astrolabium*; Gr. *astrolabos*, *astrolabikon*, from *astron*=a star, and *labein*, 2 aor. inf. of *lambanō*=to take.] In its etymological sense, any instrument for taking the altitude of a star or other heavenly body, a definition which would include not merely the astrolabe properly so called, but also the sextant, the quadrant, the equatorial, the altitude and azimuth circle, the theodolite, or any similar instrument. But, practically, the word is limited to the three following significations:

1. A planisphere, a stereographic projection of the sphere upon the plane of one of its great circles. This may be either the plane of the equator, in

Astrolabe.

which case the eye is supposed to be at the pole; or the plane of the meridian, in which case the eye is considered to be at the point of intersection of the equinoctial and the horizon.

2. An armillary sphere or any similar instrument. [ARMILLARY.] This type of astrolabe was in use among astronomers at least from the early part of the second century A. D., if not even from the second or third century B. C.

"His *astrylabe*, longyng for his art."

Chaucer: *C. T.*, 3,209.

"Liv'd Tycho now, struck with this ray, which shone
More bright i' the morn than others beam at noon,
He'd take his *astrolabe*, and seek out here
What new star 'twas did gild our hemisphere."

Dryden: *Death of Lord Hastings*, v. 45.

¶ The former use of the word was common in the sixteenth and seventeenth centuries. Such an astrolabe as that first described was the badge of an astrologer.

"She sente for him, and he came;
With him his *astrolabe* he name,
With points and circles merveillous,
Which was of fine gold precious."

Gower: *Conf. Am.*, bk. vi.

¶ The forms *astyllabyre* and *astyrlaby* are in *Prompt. Parv.*

"... for we see spheres, globes, *astrolabes*, maps, and the like, have been provided as appurtenances to astronomy and cosmography, as well as books."—*Bacon: Adv. of Learn.*, bk. ii.

3. A graduated circle, with sights attached, in use early in the eighteenth century for taking the altitude of the heavenly bodies at sea. It was ultimately superseded by Hadley's quadrant, introduced to public notice about 1730. (*Penny Cyclopædia.*)

as-trōl'-a-trŷ, s. [Gr. *astra*=the stars, and *latreia*=worship.] The worship of the stars. (*Cudworth.*)

as-trōl-lith-ōl'-ō-gŷ, s. [Gr. *astron*=a star, *lithos*=a stone, and *logos*=... a discourse.] A name proposed by Professor Shepard to designate the science which treats of meteorites or *aërolites*. (*Sowerby: Popular Mineralogy* 1850; *Aërolites*, p. 218.)

*as-tro-loge, s. [In Sw. & Ger. *astrolog*; Fr. *astrologue*; Sp. & Port. *astrologo*; Ital. *astrologo*, *astrologo*; Lat. *astrologus*; Gr. *astrologos*=(1) an astronomer, (2) (later) an astrologer; *astron*=a star, pl. *astra*=the stars, and *legō*=... to speak of.] The same as ASTROLOGER (q. v.).

"Of alle men i-blessed most he be
The wise *astrologe* daun Ptholomé."

Chaucer: *C. T.*, 5,905-6.

as-trōl'-ō-gēr, *as-trōl'-ō-gēre, s. [Eng. *astrolog(y)*; -er.] [ASTROLOGE, ASTROLOGY.]

*1. Originally: An astronomer.

"A worthy *astrologer*, by perspective glasses, hath found in the stars many things unknown to the ancients."—*Raleigh.*

¶ As most, if not all, the ancient astronomers believed that the heavenly bodies have an influence upon human destinies; and any one who predicted fortunes from the position of the stars, required to study their movements, no need was at first felt for drawing a distinction between an astronomer and an astrologer in the modern sense of these terms.

2. Subsequently and now: An astrologer, as contradistinguished from an astronomer. A man of unscientific mind who studies the heavenly bodies, not to ascertain the laws which affect their existence and movements, but in the vain hope of forecasting the future destiny of himself or others.

"This made the *astrologers* so idle as to judge of a man's nature and destiny, by the constellation of the moment of his nativity or conception."—*Bacon: Colors of Good and Evil*, ch. x.

"... the *astrologers*, the star-gazers, and monthly prognosticators, . . ."—*Isa.* xlvii. 13.

*ās-trō-lō'-gī-an, s. [Eng. *astrolog(y)*; -ian. In Prov. *astrologian*.] The same as ASTROLOGER (q. v.).

"The twelve houses of heaven, in the form which *astrologians* use."—*Camden.*

"... an *astrologian*

That in his works said such a day o' the month
Should be the day of doom, . . ."

Webster: *Duchess of Malfi*, iv. 2.

ās-trō-lōg'-īc, *ās-trō-lōg'-īck, ās-trō-lōg'-īc-al, a. [In Fr. *astrologique*; Sp., Port., & Ital. *astrologico*; from Gr. *astrologikos*=pertaining to astronomy.]

1. Pertaining or relating to astronomy; commingled, as the old astronomy was, with astrology.

2. Relating to astrology; believing, professing or practicing astrology.

"No *astrologic* wizard honor gains

Who has not oft been banished, or in chains."

Dryden: *Juvenal*, sat. vi.

ās-trō-lōg'-īc-al-lŷ, adv. [Eng. *astrological*; -ly.] After the manner of astrologers, or according to the rules of astrology. (*Johnson.*)

*as-trōl'-ō-gīe, s. [ASTROLOGY.]

as-trōl'-ō-gīze, v. t. [Eng. *astrolog(y)*; -ize. In Gr. *astrologēō*=to study or practice astronomy; *astrā*=the stars, and *logos*=discourse.] To study or practice astrology. (Johnson.)

ās'-trō-lōgue, s. [ASTROLOGE.]

as-trōl'-ō-gŷ, *as-trōl'-ō-gīe, s. [In Ger. & Fr. *astrologie*; Dan. & Sw. *astrologi*; Sp., Port., Ital., & Lat. *astrologia*=(1) a knowledge of the stars, astronomy, (2) astrology; Gr. *astrologia*=astronomy; from *astron*, generally used of stars in the plural, *astēr*=a single star, *logos*=discourse, also reason. A discourse concerning the stars, or the reason of the stars.]

1. *Originally*: The word *astrology*, as yet unspecialized, included both the true science of astronomy and the pseudo science defined under No. 2. [See etymology.]

2. *Now*: The word having become specialized, signifies the pseudo science which pretends to foretell future events by studying the position of the stars, and ascertaining their alleged influence upon human destiny. *Natural Astrology* professes to predict changes in the weather from studying the stars [ASTROMETEOROLOGY], and *Judicial or Judiciary Astrology* to foretell events bearing on the destiny of individual human beings or the race of mankind generally.

¶ In the infancy of the world, when the stars were assumed to be, as they seemed, sparkles of light, whose diminutiveness so markedly contrasted with the hugeness of the earth, it was a perfectly legitimate conjecture or hypothesis that one main function which the shining specks served in the economy of nature might be to influence human destinies. Hence the Chinese, the Egyptians, the Chaldeans, the Romans, and most other ancient nations, with the honorable exception of the Greeks, became implicit believers in astrology. It was partly the cause and partly the effect of the prevalent worship of the heavenly bodies. The "stargazers," sarcastically referred to by Isaiah (xlvi. 13), were evidently astrologers; so also were what are called in the margin "viewers of the heavens;" but the Heb. word rendered "astrologers" in Dan. i. 20; ii. 2, 27; iv. 7; v. 7, is a much vaguer one, meaning those who practice incantations, without indicating what the character of these incantations may be. The later Jews, the Arabs, with other Mohammedan races, and the Christians in mediæval Europe, were all great cultivators of astrology. The ordinary method of procedure in the Middle Ages was to divide a globe or a planisphere into twelve portions by circles running from pole to pole, like those which now mark meridians of longitude. Each of the twelve spaces or intervals between these circles was called a "house" of heaven. The sun, the moon, and the stars all pass once in twenty-four hours through the portion of heavens represented by the twelve "houses;" nowhere, however, except at the equator, are the same stars uniformly together in the same house. Every house has one of the heavenly bodies ruling over it as its lord. The houses symbolize different advantages or disadvantages. The first is the house of life; the second, of riches; the third, of brethren; the fourth, of parents; the fifth, of children; the sixth, of health; the seventh, of marriage; the eighth, of death; the ninth, of religion; the tenth, of dignities; the eleventh, of friends; and the twelfth, of enemies. The houses vary in strength, the first one, that containing the part of the heavens about to rise, being the most powerful of all: it is called the *ascendant* [ASCENDENT]; while the point of the ecliptic just rising is termed the *horoscope*. The important matter was to ascertain what house and star was in the ascendant at the moment of a person's birth, from which it was deemed possible to augur his fortune. It followed that all people born in the same part of the world at the same time ought to have had the same future, an allegation which experience decisively contradicted. Even apart from this, astrological predictions of all kinds had a fatal tendency to pass away without being fulfilled; and when, finally, it was discovered that the tiny looking stars were suns like that irradiating our heavens, and the earth not the center of the universe, but only a planet revolving around another body, and itself much exceeded in size by several of its compeers, every scientific mind in Europe felt itself unable any longer to believe in astrology, which has been in an increasingly languishing state since the middle of the seventeenth century. It still flourishes in Asia and Africa. Thus when a Brahman boy comes into the world means are at once taken to construct his "horoscope," indicating what his future destiny is to be. But in this country no one can profess to believe in astrology without exciting the gravest doubt regarding his intellect, his knowledge, or his good faith. It is legal to publish a work disfigured with astrological vaticinations; but the moment one accepts payment for telling, by the help of the stars, the "fortune" of an individual, he or she becomes

liable to arrest upon a charge of obtaining money under false pretenses. No belief, extensively held and long prevalent, ever passes away without leaving traces in language, and *ascendant*, *ascendency*, *disaster*, *disastrous*, *evil-starred*, *influence*, *mercurial*, *jovial*, *saturnine*, &c., are all astrological words.

"I find my zenith doth depend upon
A most auspicious star; whose influence
If now I court not, but omit, my fortunes
Will ever after droop."

Shakesp.: *Tempest*, Act 1, Sc. 2.

ās-trō-mē-tē-ōr'-ōl'-ō-gŷ, s. [Gr. *astron*=a star, and Eng. *meteorology* (q.v.).] The investigation of the influence excited by the sun, moon, and stars upon the weather. The sun, of course, excites transcendent influence. The notion that changes of the weather take place at changes of the moon is not borne out by impartial inquiry. The stars seem absolutely void of perceptible effect on the weather.

ās-trō-mē-tē-ōr'-ō-scōpe, s. [Gr. *astron*=a star, and Eng. *meteo-scope* (q.v.).] An apparatus invented by Mr. Pichler for demonstrating, by means of the optical lantern, the effects of persistence of vision.

as-trōm'-ē-tēr, s. [Gr. *astron*=a star, and *metron*=a measure.] An instrument invented by Sir John Herschel for measuring the apparent relative magnitudes of the stars.

as-trōm'-ēt-rŷ, s. [ASTROMETER.] The measurement and the numerical expression of the apparent magnitudes of the fixed stars.

*as-trōm'-ŷ-ēn, s. [Apparently abbreviated from O. Eng. *astronomien* to make it fit more easily into a line of poetry.] An astronomer, an astrologer, or both in one person.

"Of gold he made a table,
Al ful of steorren, saun fable,
And thoughte to seyn, amonges men,
That he is an astronomen."

Alisaunder, i. 136. (Boucher.)

as-trōn'-ōm-ēr, *as-trōn'-ōm-ēre, *as-trōn'-ōm-yēr, s. [Eng. *astronom(y)*; suff. -er. In Sw. *astronom*; Fr. *astronome*; Sp., Port., & Ital. *astronomo*; Lat. *astronomus*; Gr. *astronomos*, as adj. =classing the stars, as *substan.*=an astronomer; *astron*=a star, *astrā* (pl.)=stars, and *nemō*=to distribute, . . . to pasture (a flock). Hence an astronomer is a classifier of the stars, or, according to Herschel, a "shepherd of the stars."] [ASTRONOMY.]

Essential signification: One who studies the stars, the word giving no indication as to his motive in so doing. During ancient and mediæval times the keenest spur to the exploration of the heavens was furnished by the belief, then all but universally entertained, that the stars influenced human destinies; hence *astronomer* signified—

*1. *Originally*: In the main an astrologer; one who studied the stars, partly, no doubt, from scientific curiosity, but chiefly because he believed they influenced human destinies.

"If astronomers say true, every man at his birth by his constellation hath divers things and desires appointed him."—Pilkington: *Exposition upon the Prophet Aggeus*, ch. i. (See Trench: *Select Glossary*, p. 12.)

"But what was ominous, that very morn
The sun was entered into Capricorn,
Which, by this bad astronomer's account,
That week the Virgin Balance should remount."

Dryden: *Hind and Panther*.

2. *Subsequently*: As study of the heavens advanced, the more gifted minds discovered the fallacy of the old notion that the stars influenced human destinies, while the less talented firmly adhered to the popular delusion on the subject. It consequently became needful to distinguish the two classes of men. The word *astronomer* was therefore reserved for any really scientific student of the stars, while the term *astrologer* was abandoned to the credulous, if not even insincere, star-gazer. Convenience dictated this arrangement: if etymology were followed, an astrologer would be regarded as the equal, if not the superior, of an astronomer. [ASTROLOGER.]

"It [Encke's comet] was predicted and generally observed in 1825, and so anxious were astronomers to discover it, that two new comets were found in looking for it."—Airy: *Report on Astronomy*. Brit. Assoc. Rep., vol. i., 2d ed. (1832), p. 163.

Astronomer Royal: The appellation given to the eminent astronomer intrusted by the British Government with the care of the Greenwich Observatory, and who is expected to turn to the best account the splendid instruments erected there for the survey of the heavens.

ās-trō-nōm'-ic, *ās-trō-nōm'-ick, ās-trō-nōm'-ic-āl, a. [In Fr. *astronomique*; Sp., Port., & Ital. *astronomico*; Lat. *astronomicus*; all from

Gr. *astronomikos*.] Pertaining or relating to astronomy, or to the methods in use among astronomers.

"Can he not pass an *astronomic* line?"—Black.

"The starry heavens, as you know, had for Immanuel Kant a value beyond their astronomical one."—Tyndall: *Frag. of Science*, 3d ed., v. 104.

astronomical instruments. Instruments used for observing the heavenly bodies. The following list includes some which are now superseded, but the great majority are still in use: Armil, armillary sphere, artificial horizon, astrolabe, astrometer, astroscope, azimuth circle, azimuth dial, back-staff, chronometer, clock, collimator, comet-seeker, compass, cosmolabe, diploidoscope, dip sector, equatorial telescope, gnomon, heliometer, meridian circle, micrometer, mural circle, orbit-sweeper, orrery, pendulum, planetarium, quadrant, reflecting circle, refraction circle, sextant, spectro-scope, telescope, tellurian, transit instrument, zenith sector, zenith tube.

astronomical measurements. The measurement of the arc of the heavens intercepted between two points, as between a star at a certain moment and the horizon. Or a measurement of the exact time of some event, say a transit. This is done by means of a clock, or, more generally, a chronometer. (Herschel: *Astron.*, § 150.)

astronomical observations. Observations of the heavenly bodies made to further the science of astronomy. (*Ibid.*, § 136.)

astronomical year. A year, the precise length of which is determined by astronomical observations. It embraces both the tropical and the sidereal years. It is opposed to the civil year, being that which each nation has adopted for itself. [YEAR.]

"Niebuhr thinks that the allusion is to a solar eclipse, visible in the Mediterranean, which occurred on the 21st of June, in the *astronomical* year 399 B. C."—Lewis: *Early Rom. Hist.*, ch. v., § 11.

ās-trō-nōm'-i-cal-ly, adv. [Eng. *astronomical*; -ly.] In an astronomical manner; after the manner of astronomers; in conformity with the principles or methods of astronomy.

*ās-trō-nōm'-i-cōn, s. [Gr. *astronomikos*, neut. -kon.] A treatise on astronomy.

*as-trō-nōm'-i-ēn, *as-trō-nōm'-ŷ-ēn, s. [O. Eng. *astronomie*; Mod. Eng. *astronomy*; suff. -en.] An astronomer, an astrologer, or both combined in one individual.

"Astronomyens al day here art faillen
That whilen warned men byfore what shoulde byfalle
after."

Piers Plouman.

"Lo astronomyens camen fro the eest to Jerusalem."—Wycliffe: *Matthew* ii. 1.

†as-trōn'-ō-mīze, v. i. [Eng. *astronom(y)*; -ize.] To study astronomy, as botanize means to study botany.

"... thus they astronomized in caves."—Browne: *Christ. Mor.* ii. 9.

as-trōn'-ō-mŷ, *as-trōn'-ō-mīe, *as-trōn'-ō-mŷe, *as-trōn'-ōm-ige, s. [In Sw. & Dan. *astronomi*; Ger. & Fr. *astronomie*; Sp., Port., & Ital. *astronomia*; Lat. *astronomia*; Gr. *astronomia*: *astron*=a star, and *nomos*=usage, custom, law; *nemō*=to deal out, to distribute.]

*1. *Originally*: The pseudo science which studied the movements of the stars, with the view of obtaining information (which they were not fitted to give) regarding the destiny of individuals or bodies of men; astrology. [ASTROLOGY. See also ASTRONOMER.]

"And hem lerede, witter like

Astronomie and *armetike*."

Story of Genesis and Exodus, (ed. Morris), 791-2.

Not from the stars do I my judgment pluck,

And yet methinks I have *astronomy*."

Shakesp.: *Sonnets*, 14.

2. *Subsequently and now*: The sublime science which treats of the distances, magnitudes, masses, composition, motions, and all that is discoverable regarding the heavenly bodies, meaning the sun, the earth, the moon, the planets, the fixed stars, the comets, the meteorites, the nebulae, and all other material bodies really or apparently moving in infinite space. It is founded on careful and oft-repeated observations, made chiefly with elaborately-constructed instruments [ASTRONOMICAL INSTRUMENTS]; these observations being next made the basis of reasoning, founded, wherever it is practicable, as it generally is, on mathematical demonstration. Astronomy may be variously divided. A simple distinction is sometimes made into *geography*, which treats of the earth, and *uranography*, the subject of which is the "heavens." Sometimes the branch of science which describes the celestial bodies as they are is called *Descriptive Astronomy*. When the specific subject treated is the "fixed" stars, it becomes *Sidereal Astronomy*. The sciences now mentioned have sought rather to record than to explain phenomena; but what is

fāts, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, wāō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāl; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

called *Physical Astronomy* proposes to itself the high aim of accounting for the facts observed. Its chief ally in this arduous task is mathematics, with which every astronomer worthy of the name requires to be very familiar.

¶ The vault of heaven being visible in all its glory alternately by day and night in every portion of the world, absolute ignorance regarding celestial phenomena cannot have existed in any place or at any time. The people belonging to some nations were, however, more observant in this respect than others, and claims to early proficiency in astronomy, in some cases leading to vehement controversy, have been preferred in favor of the Chinese, the Chaldeans, the Egyptians, and the Hindoos. In these and other countries, in early times, the stars were not so much studied as worshiped, there being strong temptation, even in the most pious minds, to this form of religious error (Job xxxi. 26-28). Hipparchus of Bithynia and Rhodes (?), who flourished from B. C. 160 to 125, catalogued the stars visible above the horizon, noting down 1,080. Among his numerous discoveries may be reckoned the precession of the equinoxes, trigonometry, and apparently the stereographic projection of the sphere. The next very great name was that of Ptolemy, the geographer and astronomer of Alexandria, A. D. 130-150, who discovered the lunar evection, refraction, &c. [EVECTION, REFRACTION.] He was also the author of the Ptolemaic system, with its *primum mobile*, its eccentrics, and its epicycles.

"Oh, how unlike the complex works of man
Heaven's easy, artless, unnumbered plan!"
Cowper: *Truth*.

The Arabs translated a work of Ptolemy's, called *Megistē*, into their own language, and prefixing to its name their article *al*=the, transformed it into *Almagest*. The Christians during the "dark ages" deriving their knowledge of astronomy from the Arabs rather than from a study of the heavens, received from their instructors the Ptolemaic system and the *Almagest*, which did not lose credit in Western Europe till the seventeenth century. [ALMAGEST, PTOLEMAIC.] In 1472 or 1473 was born Copernicus, who in 1543, just before his death, published his great work, *On the Revolutions of the Heavenly Bodies*, composed more than thirteen years before. It propounded the Copernican system [COPERNICAN], which, modified and improved, is now received as established truth, being supported by an amount of evidence of which Copernicus had no conception. The next very great name is that of Tycho Brahe, a Dane by birth, but of Swedish ancestry. He was born on the 14th of December, 1546, and died in 1601. Though not accepting the Copernican system, but holding views partly borrowed from Copernicus and partly from Ptolemy [TYCHONIC], his extensive and accurate observations gave a great impulse to astronomy, and prepared the way for some further discoveries in addition to those which he had himself made. Two great names now come together upon the scene, those of Kepler and of Galileo. The former was a pupil of Tycho. He will forever be remembered for the discovery of the three laws which bear his name, the first and second made known in 1609, and the third in 1618. [KEPLER'S LAWS.] About 1581, Galileo had discovered the isochronism of the pendulum [PENDULUM]; having constructed a telescope, he discovered in 1610 the satellites of Jupiter, the phases of Venus, the mountains of the moon, with other new truths. In 1642, the year in which Galileo died, Sir Isaac Newton was born, and in 1687 he published his immortal *Principia*, in which the law of gravitation was announced, thus constituting an epoch in the history of science which probably will never be paralleled at any future time.

"Nature and Nature's laws lay hid in night;
God said, 'Let Newton be,' and all was light."
Pope.

The year that Newton died (1727) was the one in which the discovery was made by Bradley of the aberration of light, which irrefragably proved the motion of the earth, and gave the death-blow to the Ptolemaic and Tychonic systems, both of which were founded on the hypothesis that it was stationary. As we approach modern times the discoveries become far too numerous to be chronicled here; but room must be found to mention the Herschel family—the first of the name, Sir William Herschel, who was born in 1738, and died in 1822, having, among other great discoveries, added nine new members of the solar system, one of them, the planet Uranus, to the eighteen previously known. The work on astronomy so often quoted in these pages was penned by his son, Sir John Herschel, also a great discoverer; and the third generation of the family are now at work. Many discoveries will be found recorded under other articles. [ASTEROID, COMET, CONSTELLATION, GRAVITATION, PLANET, SOLAR SYSTEM, STAR, &c.]

"In astronomy, for instance, the superior departments of theory are completely disjoined from the routine of practical observation."—Herschel: *Study of Nat. Phil.* (1831), § 126.

**as-trōn'-ōm-yēr*, s. [ASTRONOMER.]

ās'-trō-phēl, **ās'-trō-fēll*, s. [From Gr. *astron*=a star.] A bitter herb; probably what the old botanists called starwort or aster. (Lyte: *Dodoens*, p. 41.) (Nares.)

"My little flock, whom earst I lov'd so well,
And wont to feed with finest grasse that grew,
Feede ye henceforth on bitter *astrofēll*
And stinking smallage and unsaverie rue."
Spenser: *Daphne*, 344.

"The gods, which all things see, this same beheld,
And pitying this paire of lovers trow,
Transformed them, there lying on the field,
Into one flowre that is both red and blew:
It first growes red, and then to blew doth fade,
Like *astrofēll*."
Todd's Spenser, vol. viii., p. 60.

as-trō-phō-tō-mēt'-rīc-al, a. [Gr. *astron*=a star; *phōtos*, genit. sing. of *phōs*=light, and *metron*=a measure.] Pertaining to the measurement of the light which reaches the earth from the several stars.

"On a new *Astrophotometrical* method by Prof. Ch. V. Zenger."—*Astron. Soc. Notices*, vol. xxxviii. 65.

ās-trō-phyl'-lite, s. [In Ger. *astrophyllit*; Gr. *astron*=a star, and *phyllon*=a leaf.]

Min.: An orthorhombic mineral classed by Dana under his Mica Group. The hardness is 3; the sp. gr., 3.324; the luster, sub-metallic, pearly; the color, bronze-yellow to gold-yellow. It is translucent in thin plates. Composition: Silica, 32.21 to 33.71; protoxide of iron, 18.06 to 25.21; protoxide of manganese, 9.90 to 12.68; titanic acid, 7.09 to 8.84, with lesser quantities of potassa, soda, zirconia, alumina, and other ingredients. It is found in Norway.

ās-trō-phyl'-tōn, s. [Gr. *astron*=a star, and *phuton*=that which has grown: (1) a plant, (2) a creature. "Starry creature."] A genus of starfishes, containing the Shetland Argus. [ARGUS.]

ās'-trō-scōpe, s. [In Ger. *astrooskop*; Gr. *astron*=a star, and *skopeō*=to look at.] An astronomical instrument for instructing the memory with respect to the relative position of the stars. These are delineated on two cones. A celestial globe, however, is both more accurate and more convenient.

ās'-trō-scōp'-y, s. [In Ger. *astroscopie*.] [ASTROSCOPE.] Observation of the stars. (Johnson.)

**a-strō'te*, adv. [ASTRUT.]

as-trō-thē-ōl'-ō-gy, s. [In Ger. *astrotheologie*; Gr. *astron*=a star, and *theologia*=theology (q. v.).] Theology founded on what is known of the heavenly bodies and the laws which regulate their movements.

"That the diurnal and annual revolutions are the motions of the terraqueous globe, not of the sun, I shew in the preface of my *Astro-Theology*."—Derham: *Physico-Theology*.

a-strūt', **a-strō'te*, adv. [Eng. *a*; *strut* (q. v.).]

**A*. (Of the form *astrote*): In a swelling manner.

"Hys yen stode owte *astrote* forthy."
Le Bone Florence, 2,329. (Boucher.)

**ās'-trý-lābe*, s. [ASTROLABE.]

**as-tū'ce*, a. [In Fr. *astucieux*; Ital. *astutaccio*.] [ASTUTE.] Astute.

"... that your facines be nocht sedusit be their *astuce* and subtil persuasions."—*Complaynte of Scotland*, p. 151.

ās-tū'-cious, a. [Fr. *astucieux*.] Astute, cunning. (Scott: *Fair Maid of Perth*, ch. xxi.)

"If the reader should wonder how Bonaparte, able and *astucious* as he was, came to be overreached in the treaty of Tilsit, we believe the secret may be found in a piece of private history."—Sir W. Scott.

ās-tū'-cī-tý, s. [As if from a Low Lat. *astucitas*.] Astuteness. (Carlyle: *Fr. Revol.*, pt. 1 bk. i., ch. iii.)

a-stūnd', v. t. [Eng. *a*; *stun*. In A. S. *astunian*=to stun.] To stun. [ASTOUND, STUN.]

"He fell rebounding; breathless and *astunned*,
His trunk extended lay."
Somerville: *Rural Games*, c. ii.

**a-stūnd'e*, adv. [Pref. *a*=on, for; A. S. *stund*=a moment, time.] [ASTUNTE.] For a time.

"Bothe in boskes and in bank,

A Song on the Passion (ed. Morris), 13, 14.

**a-stūnt'e*, pret. of verb. [A. S. *astintan*=to stop.] Stood, remained. [ASTINT.]

"The barons *astunte* without toun beside,
And vaire sende unto the toun to the king hor sonde,
That he ssolde, vor Gode's lone, him bet vnderstonde."
Robert of Gloucester's Chronicle, p. 546. (Boucher.)

ās'-tūr, s. [Lat. *astur*, whence Ital. *astore* and Fr. *autour*.]

Ornithology: A genus of raptorial birds belonging to the family Falconidae and the sub-family Accipitrinae, or Sparrow-hawks. The *A. palumbarius*, or European Goshawk [see GOSHAWK], which is figured in the accompanying illustration, is a well-known species; and there are various other species, of which the best known in America is the *A. atricapillus*.

**a-stūrt'e*, pret. of verb. [ASTART.] Started.

as-tū'te, a. [O. Fr. *astut*; Sp., Port., & Ital. *astuto*; Lat. *astutus*, from *astus*=cleverness, craft, cunning (a single act, as distinguished from *astutia*=habitual craftiness).] [ASTUCE.] Penetrating, discerning, subtle; wily, cunning.

"We terme those most *astute* which are most *versuta*."
—Sir M. Sandys: *Essays*, p. 163.

¶ Neither *astute* nor any one of its compounds is in the last edition of Johnson's Dictionary.

as-tū'te-ly, adv. [Eng. *astute*; -ly.] In an astute manner; cleverly, penetratingly, discerningly.

as-tū'te-ness, s. [Eng. *astute*; -ness.] The quality of being astute; penetration, discernment; mental subtlety.

"The policy of the French Government was marked by vigor and *astuteness*."—*Times*, Nov. 9, 1875.

ās'-tý, s. [Lat. *astu*; Gr. *astu*=a city, especially Athens. In anglicizing Greek words, *v* becomes *y*; thus *asty* exactly corresponds to the Gr. *astu*.]

Architecture: A city or town.

**as-ty-en*, v. [A. S. *astigan*=to go, proceed, step, or mount; *astignes*=an ascent; ascending.] To ascend.

"Otte he heom myd spek ther hi weren to-gedere
Er he wolde *astyen* to heuene to his vedere."
The Passion of Our Lord (ed. Morris), 623-4.

a-stý-lar, a. [Gr. *astulos*=without pillar or prop; *a*, priv., and *stulos*=a pillar.] Arch.: Without columns or pilasters.

ās'-týl, s. [Low Lat. *astula*; O. Ger. *ast* and *asti*; Goth. *ast*.] A shingle; a thin board of wood. (Prompt. Parv.) (Boucher.) [ASTEL.]

**as-týl-lā-byre* (y=i), **ās'-týr-lā-bý*, s. [ASTROLABE.]

as-týl'-lēn, s. A small ward or stoppage in an adit or mine to prevent the full passage of the water, made by damming up. (Weale.)

**as-tý't*, **as-tý'te*. [ASTIT.]

a-sūn'-dēr, **a-sūn'-dýr*, **a-sūn'-drī*, **a-sūn'-dēr*, **a-sūn'-dýr*, **a-sūn'-dre* (dýr as dīr, dre as dēr), adv. [Eng. *a*=on, and *sunder*; A. S. *onsundran*=asunder, apart, alone, privately; Ger. *auseinander*; Sp. *asundre*.] [SUNDER.]

1. Into different pieces, into different places; separately, apart. (Lit. & fig.)

"I took my staff, even Beauty, and cut it *asunder*."—Zech. xi. 10.

"What therefore God hath joined together, let not man put *asunder*."—Mark x. 9.

2. In different pieces; in different places; apart; in a divided state.

"Freres and feendes been but litel *asonder*."
Chaucer: *C. T.*, 7,256.

"Lucifer. No, we reign
Together; but our dwellings are *asunder*."
Byron: *Cain*, ii. 2.

a-sūn'-dēr-ly, adv. [Eng. *asunder*; -ly.] Separately; apart.

"*Asunderly*. Disjunctim . . ."—Prompt. Parv.

**a-sūn'-drī*, adv. [ASUNDER.]

**ā'-sūr* (sūr as zhūr), a. [AZURE.]

a-sū-r-a, s. [Sanskrit.]

Indian Mythology: A demon; an enemy of the gods. The Asuras seem to have been at one time the Turanian aborigines in conflict with the Aryan invaders of India, and at another the Buddhist religionists in conflict with the professors of the Brahmanic faith.

**ā'-sūre* (sūr as zhūr), a. [AZURE.]

**a-swā'ge*, v. t. & i. [ASSUAGE.]

ās-wāil, s. [Zoology: Native East Indian name.] The *Ursus labialis*, or Sloth-bear, found in the mountains of India.

**a-swēlt'*, v. t. [A. S. *asweltan*=to die, to depart.] To become extinguished.

"No the fuyr for theo snow *aswelt*."—*Alisaund*, 6,639. (S. in Boucher.)

"Al we schulen *a-sȳen* and seo to the nede,
Ther the crysmchild for sunnes sore schal drede."

On Serving Christ, ix. (ed. Morris), 10, 11.

a-sȳ'-lūm, ***a-sȳ'le**, ***a-sȳ'le**, *s.* [In Dan. *asyl*; Fr. *asile*; Sp. & Ital. *asilo*; Port. *asilo*, *asilo*; Lat. *asylum*; Gr. *asulon* = au asylum; properly the neut. of the adj. *asulos* = safe from violence, inviolate; *a*, priv., and *sulaō* = to strip off, to pillage.]

I. A place of refuge and security.

1. Originally: A sanctuary, a place which it was deemed sacrilege for one to invade, and which, therefore, proved an inviolable retreat for criminals, debtors, and other people liable to be pursued. (See *Archæologia*, viii., A. D. 1787, p. 3.) [SANCTUARY.]

"From every *asylum* ruffians sallied forth nightly to plunder and stab."—*Macaulay: Hist. Eng.*, ch. ix.

2. Now:

(a) *Gen.*: Any place of refuge; any place where one is sheltered, as a foreign land used as a retreat for political or religious refugees.

"... and who knew themselves to be marked out for destruction, had sought an *asylum* in the Low Countries."—*Macaulay: Hist. Eng.*, ch. v.

(b) *Spec.*: An institution designed for the reception and shelter of those who are incapacitated from successfully fighting their own way in the world, as the blind asylum, the lunatic asylum.

II. The protection accorded in such places; refuge, shelter.

"Much he would speak not, bnt beneath his roof
They found *asylum* oft, but ne'er reproof."

Byron: *Lara*, ll. 8.

***a-sȳm'-mēt-ral**, *a.* [Eng. *asymmetr(y)*; -*al*.] Unsymmetrical; destitute of symmetry; having perfection marred by conspicuous defects.

***a-sȳm'-mēt-ri-cal**, *a.* [Eng. *asymmetr(y)*; -*cal*.] Unsymmetrical; incapable of adjustment.

"Asymmetrical or unsociable, that is, such as we see not how to reconcile with other things evidently and confessedly true."—*Boyle*, in *Norris on Reason and Faith*, ch. 3.

***a-sȳm'-mēt-roūs**, *a.* [Eng. *asymmetr(y)*; -*ous*.] Unsymmetrical. (*Barrow*.)

a-sȳm'-mēt-rȳ, *s.* [Gr. *asymmetria*; from *asymmetros* = (1) incommensurable, (2) unsymmetric. Or from *a*, priv., and *summetria* = symmetry; *summetros* = commensurate with; *sun* = together, and *metron* = a measure.]

1. *Ord. Lang.*: Want of symmetry; want of proportion.

"The *asymmetries* of the brain, as well as the deformities of the legs or face, may be rectified in time."—*Grew*.

†2. *Math.*: The incommensurability of two or more numbers; that is, that the numbers stand to each other in such a relation that they have no common measure. Such, for example, is the relation between the side and diagonal of a square which are in the ratio of 1:√2.

a-sȳmp'-tōte, *s. & a.* [In Ger. & Fr. *asymptote*; Port. *asymptota*; Gr. *asumptōtos* = irregular: *a*, priv., and *sumptō* = to fall together; *sun* = together, and *piptō* = to fall; perf. *peptōka*.]

A. *As substantive. Geometry*: A term used in describing the characteristics of a hyperbola.

An *asymptote* of a hyperbola is a diameter which, the further it is produced, always approaches more and more nearly to the curve, and yet, though produced ever so far, does never actually meet it. (The word is generally used in the plural, *asymptotes*.)

B. *As adj.*: Pertaining to such a line as that now described; continually approaching another line without ever reaching it.

"*Asymptote* lines, though they may approach nearer together, till they are nearer than the least assignable distance, yet, being still produced infinitely, will never meet!"—*Grew*.

a-sȳmp-tōt'-ic, **a-sȳmp-tōt'-ic-al**, *s.* [Eng. *asymptote*; -*ic*, -*ical*. In Fr. *asymptotique*.] Pertaining or relating to the asymptotes of a hyperbola; perpetually approaching anything, but never meeting it.

"Curves are said to be *asymptotical* when they continually approach without a possibility of meeting."—*Johnson*.

a-sȳn-ar'-tēte, *a.* [Gr. *asynartētos* = not united, inconsistent; *a*, priv., and *synartaō* = to hang up with, to knit or join together: *sun* = together, and *artaō* = to fasten to.] Not fitted or adjusted; disconnected.

Asynartete sentences (*Gram.*): Those of which the members are not united by connective particles. [ASYNDETON.] (*Brande*.)

Asynartete verse (*Pros.*): A verse consisting of two members, having varied rhythms; as, for example, when the first consists of iambuses and the second of trochees, or the first of dactyles and the second of iambuses.

a-sȳn'-dē-tōn, *s.* [In Ger. *asynдетон*. From Gr. *asundetōn*, neut. of adj. *asundetos* = (1) unconnected, (2) without conjunction; *a*, priv., and *sundetos* = bound together; *sundeō* = to bind together.]

Gram.: A figure in which the copulative conjunction and is omitted in a sentence, as in Lat. *Veni, vidi, vici*, "I came, I saw, I conquered," instead of *Veni, vidi, et vici*, "I came, I saw, and I conquered." In most cases, as in that now given, the omission of the copulative gives increased force to the statement or sentiment embodied in the sentence. It is opposed to POLYSYNDETON (q. v.).

a-sȳs'-tō-lē, **a-sȳs'-tō-lēm**, *s.* [Gr. *a*, priv., and *syntolē* = a contracting.]

Pathol.: That condition of the disease of the heart in which the organ remains filled with blood, the muscular contraction being too feeble to expel more than a small portion of it.

āt, ***ätte**, ***āt-ēn**, *prep. & adv.* [A. S. *æt*, *at* = (1) at, by, near, to, next, with, against, in, (2) of, from. In Sw. *at* = (1) sign of the infinit. mood, (2) that; Dan. *att* (same meaning), *ad* = to; O. Sw., O. Icel., O. Dan., O. L. Ger., and Goth. *at* = at, O. Fris. *et*; O. H. Ger. *az*, *ez*; Wel. *at* = to; Lat. *ad* = to (AD); Sansc. *adhi* = upon.]

A. *As preposition*:

I. Denoting nearness to in place or in time.

1. Denoting nearness in place, i. e., that a person or thing is at rest in proximity to a certain place. As a rule, the proximity is not so great as that indicated by *on*, and considerably less than that designated by *in*.

(a) In immediate proximity to.

"This custom continued among many, to say their prayers at fountains."—*Stillingsfleet*.

(b) In, within; occupying as a habitation. (*Lit. & fig.*)

(c) On; upon.

"Their various news I heard, of love and strife,
Of storms at sea, and travels on the shore."—*Pope*.

(d) In a position, attitude, state, or condition, as at gaze = in a gazing attitude. [GAZE.] (In this sense it is sometimes followed by a superlative.)

"We bring into the world with us a poor, needy, uncertain life, short at the longest, and unquiet at the best."—*Temple*.

2. Denoting nearness in time.

"At the same time that the storm beats upon the whole species, we are falling foul upon one another."—*Addison*.

II. Denoting motion toward any person, place, or thing, in place or in time; denoting also motion through any place.

1. Literally:

(a) Denoting motion toward the place where a person or thing is, a verb being understood.

(b) Denoting motion through a place.

2. *Fig.*: Denoting effort to realize an aim.

"We find some arrived to that sottishness, as to own roundly what they would be at."—*South*.

III. Denoting the effect produced by proximity of one person or thing to another in place and in time; causation, operation upon.

1. With the preposition prefixed to the source from which this emanates:

(a) In consequence of.

"At his touch,

Such sanctity hath heaven given his hand,

They presently amend."—*Shakesp.*: *Macbeth*, iv. 3.

"They take the timbrel and harp, and rejoice at the sound of the organ."—*Job* xxi. 12.

(b) On.

"Others, with more helpful care,

Cry'd out, aloud, 'Beware, brave youth, beware!'

At this he turned."—*Dryden*: *1 Cong. of Gran.*, l. 1.

(c) Under.

"But thou, of all the kings, Jove's care below,
Art least at my command, and most my foe."

Dryden: *Homer; Iliad* l.

(d) From; of.

"Mai he no leue at hire taken."

Story of Gen. & Exod. (ed. Morris), 2,697.

2. With the preposition prefixed to that which is operated upon: To, into.

"So cam on werlde wreche and wrake,

For to blissen swile sinnes same,

That it ne wexe at more hun-frame."

Story of Gen. & Exod. (ed. Morris), 552-4.

B. *As adverb*:

1. So as, at ever, soever.

2. To (used as a prefix to the infinitive mood).

"Thou art to old at bykyr and fyght."

Richard, 1,621.

¶ This use of the word is borrowed from the Danish.

"And sa thai that are all weill schrewyne, and deis in the feithe and sacramentis of haly kyrk, how wyolently at euer thai dee."—*The Craft of Deyng*.

C. Subjoined are the chief expressions and phases of the word at:

1. **At after* (Scotch). After; afterward.

2. *At all*:

(a) At all events.

"That he that stands may stand, and nocht do fall,

And quho hes fallin, may know the sam at all."

Lauder: Minor Poems; E. Eng. Text Soc., 41, 45.

(b) Altogether.

"The first of thai four principall

Is stalwartnes of hart at all."

Ratis Raving, bk. i. (ed. Lumby), 1,128-9.

(c) Of any kind.

"Most women have no characters at all."—*Pope*.

(d) To any extent, in any degree, in the least.

"... neither hast thou delivered thy people at all."—*Exod.* v. 23.

3. *At arms*: Furnished with arms. (Used only in the phrase, "a man at arms" = a man furnished with arms.)

"Infuse his breast with magnanimity,

And make him, naked, foil a man at arms."

Shakesp.: *3 Henry VI.*, v. 4.

4. *At a' will* (Scotch): To the utmost that one could wish. (*Jamieson*.)

5. *At end*. [ATTE ENDE.]

6. *At first*: At the beginning of any effort, enterprise, or event.

7. *At gaze* (Her.) [GAZE.]

Milton: P. L., bk. iii.

(b) Copiously, diffusely, at length.

11. *At last*, **atte laste*: Denoting that an event long foreseen and expected has, after much delay, happened.

"And hath so long a lyf, as we may seee,

Yet *atte laste* wasted is the tree."

Chaucer: C. T., 3,021-2.

12. *At length*:

(a) In an extended form; diffusely.

(b) The same as AT LAST (q. v.).

13. *At once*; all at once:

(a) Without any delay; promptly, as opposed to dilatorily; or at one operation, as opposed to a series of acts or efforts.

"One warms you by degrees, the other sets you on fire all at once."—*Dryden: Fables*, (Pref.)

(b) At one time; at the same moment; simultaneously.

ate, fāt, färe, amidst, whāt, fäll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, füll: trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

14. *At pleasure*. To any extent, in any place, or in any way that one prefers, with uncontrolled freedom; *ad libitum*.

"The rest, for whom no lot is yet decreed,
May run in pastures, and at pleasure feed."
Dryden: Virgil; Georgic, iii. 258.

15. *At the trouble*: Prepared to take the trouble. "What they will not be at the trouble to do by reason of."—*Arbuthnot*.

**at-anis*, **atanis*, **at-enes*, **atenes* (*Old Eng.*), *atanis*, *attanis*, *atanys*, *atainze* (*Scotch*), *adv.* [*O. Eng. at; anis=once.*] At once.

Were wroth, sche wolde brynge hem at *oon*,
So wyse and rype wordes hadde sche,
And juggement of so gret equité."
Chaucer: C. T., 8,312-15.

"So beene they both at *one*, and doen upreare
Thur bevers bright each other for to greet,
Goodly compourtaunce each to other beare."
Spenser: F. Q., II. i. 29.

"And the next day he shewed himself unto them as they strove, and would have set them at *one* again, saying, Sirs, ye are brethren, . . ."
—*Acts vii. 26.*

**at-our*, *adv.* Over and above.
". . . with hyrdis of catell, and multitud of corne at-our al thaim tat was befor me in Jerusalem."
—*The Wisdom of Solomon (ed. Lumby), 411, 412.*

**ât*, *pro.* [*Contr. from Eng. that (pro.) (q. v.).*] Who, which, that. (*Eng. & Scotch.*)

"For in ensampill thare-of he gaif to the maist synare maist mercy and grace, as to Petyr at denyd hym."
—*The Craft of Deyng (ed. Lumby), 97, 98.*

"He salte hime [gather] garlands of the gay flowrys,
At in that sesoun spredis so fayre."
Early Scottish Vers, iv. (ed. Lumby), 46, 47.

**ât*, **âtte*, *conj.* [*Contr. from Eng. that (conj.) (q. v.).*] That. (*O. Eng. & Scotch.*)

Because that I wolde you *atake*."
Chaucer: C. T., 12,512-13.

Ät-a-län-tä, *s.* [*Lat. Atalanta, Atalante; Gr. Atalantē.*]

1. *Classical Mythology*:

(a) A daughter of Schoeneus, king of Scyros, who from her beauty had many suitors, but would marry none unless she obtained a man who could outrun her. The lover started first, she following and slaying him if she overtook him. At last, by one account Hippomanes, and by another Milanion, safely reached the goal, by dropping in succession three beautiful apples given him by Venus. He therefore became the husband of Atalanta.

(b) A daughter* of Jasius, who was the first to wound the boar in the mythic hunt at Calydon.

† Some think the two Atalantas were the same person.

2. *Astronomy*: An asteroid, the thirty-sixth found. It was discovered by Goldschmidt at Paris on the October 5, 1855, the date on which Fides was first seen at Bilk by the astronomer Luther.

Ä-tē, *s.* [*Gr. Atē=* the goddess of mischief, authoress of all blind and foolish actions; *atē*=(1) bewilderment, judicial blindness, (2) sin, (3) destruction; from *aaō*=(1) to hurt, (2) to go astray.]

1. *Class. Myth.*: The goddess thus described (the term being used by or attributed to persons who may have believed her to have had a real existence.)

"Not by myself, but vengeful *Ate*, driven."
Pope: Homer's Iliad, bk. xix., 92.

"And Cæsar's spirit, ranging for revenge,
With *Ate* by his side, come hot from hell."
Shakesp.: Julius Cæsar, iii. 1.

2. *Gen.*: Mischief or destruction personified (the term *Ate* being used by or attributed to, those who did not believe in its classical mythology).

"Come, talk not of her; you shall find her the infernal *Ate* in good apparel."
—*Shakesp.: Much Ado About Nothing, ii. 1.*

-*âte*, *in compos.* [*From the Lat. suff. -atus, the pa. par. of verbs belonging to the first conjugation, or sometimes from their supine -atum.*]

I. *As a termination in adjectives* it is equivalent to the participle or participial adjective -ed; as *animate*, *adj.*, the same as *animated*=possessed of breath, life, or spirit; *determinate*=determined.

II. *As a termination in verbs* it is in almost every case formed from the adjective. It signifies either to make, or to act, or do that which is indicated by the adjective or substantive to which it corresponds; as *propitiate*=to make propitious; *dominate*=to act as a dominus or lord over; *radiate*=to make or emit radii, i. e., rays.

III. *As a termination in nouns*:

1. *In ordinary words* it is=office or dignity; as *tribunate*=the office or dignity of a tribune.

2. *In chemical terms* it is used in naming salts. The -ic of the acid is changed into -ate, and the word thus formed is connected by of with the name of the substance combined with the acid. Thus, from *acetic acid* comes *acetates*; as *acetates of lead, copper, alumina, &c.* From *sulphuric acid* comes *sulphates*; as of *soda, lime, and alumina.*

**a-tē'inte*, *v. t.* [*Old Fr. atincter.*] To give a coloring to.

ât'-ē-lēs, *s.* [*Gr. atelēs=without end, . . . imperfect: a, priv., and telos=end, completion.*] A genus of Cebidæ, or American monkeys. They have a facial angle of 60°; the thumbs of the fore-hand concealed under the skin, and the prehensile part of the tail naked underneath. There are several species. They are generally called Spider Monkeys. They inhabit Brazil and the neighboring regions.

a-tēl'-ē-sīte, *s.* [*Gr. atelēs=without end, . . . imperfect, incomplete; and suff. -ite.*] A mineral imperfectly known, containing bismuth. It is found at Schneeberg. Dana places it in the appendix to his Anhydrous Silicates.

†a-tēl'-ī-er (er as *ā*), *s.* [*Fr.*] A workshop, a studio.

† The word has other meanings in French.

Ä-tēl'-lan, *a.* [*Lat. Atellanus, from Atella, an ancient Campanian town belonging to the Osci.*]

A. As adjective: Pertaining or relating to Atella, or to the farces there acted.

"Their Fescennin and *Atellan* way of wit was in early days prohibited."
—*Shaftesbury.*

B. As substantive: A popular kind of farces acted by the young men of Atella. They seem to have consisted of burlesque metrical imitations of the dialect and manners of the peasantry.

"Many old poets . . . did write fescennines, atellans, and lascivious songs."—*Burton: Anat. of Mel.*, p. 414.

"Love-stories, plays, comedies, atellans, jigs."

Ibid., p. 542.

āt'-ē-lō-, *in compos.* [Gr. *atelēs* = . . . imperfect.]

Med.: Imperfect, as *atelo-gnathia*=malformation of the jaws.

a tēm'-pō, a tēm'-pō prī'-mō, *used as adv.* [Ital., the same as Lat. *in tempore*=in time, or *in tempore primo*=in the first time.]

Music: In the original time, signifying that after any change of time in a musical composition the original time is to be resumed.

a tēm'-pō gī'-ūs'-tō, *used as adv.* [Ital., the same as Lat. *in tempore justo*=in just time.]

Music: In just, marked, or proper time.

***āt'-ēn**, *prep.* [AT, ATTE. Contracted from *at then*.]

aten end. At end; finally.

a-tē'nd, *pa. par.* [A. S. *atendan*.] Set alight, set fire to. (*Sir Ferumbras*, 3,280.)

***at-ē-neš**, *adv.* [AT-ANIS, ENES.]

***a-tēnt'**, *s.* [From *attentum*, sup. of *attendo*.] [ATTEND.] An object, an intention. (*Sir Amadas*, 372.)

***at-hal-den, *æt-hal-den**, *v. t.* [A. S. *healdan*.] [ATHOLD.]

a-thā'-li-a, *s.* [From Gr. *athalēs*=not verdant, withered.] A genus of saw-flies (*Tenthredinidae*). *A. spinarum* or *centifolia* is the Turnip Saw-fly, so called because its larvæ, which are the animals called *blacks* or *niggers*, feed on turnips. The perfect insect is common in some years from May to August. It has a black head, a red thorax, with two large and several smaller spots on the back, and an orange-colored abdomen. (*Curtis*.)

***ath-a-mā'unte**, *s.* [ADAMANT.] The same as ADAMANT (q. v.).

"This world with byndyng of youre word eterne,
And written in the table of *athamaunte*
Yourre parlement and youre eterne graunte."

Chaucer: C. T., 1,806-8.

a-thā'-nas, *s.* [From Gr. *athanatos*=undying; *a*, priv., and *thanatos*=death.] A genus of Crustaceans, of the family Alpheidae. *Athanas nitescens*, or Montague's Shrimp. It is thought, but erroneously, by the fishermen to be the young of the lobster.

Āth-an-ā'-ši-an (or *sian*=shan), *a. & s.* [Eng. *Athanasius* (us); suffix *-an*.]

A. As adjective: Pertaining to Athanasius, who was raised to the see of Alexandria in A. D. 326, and from that date till his death in 373, amid many trials, acted as the great champion of Trinitarian doctrine. (See example under the substantive.)

B. As substantive: A follower of Athanasius, or one holding his views with respect to the Trinity.

"Upon the revival of the Arian controversy in Gaul, under the influence of the Burgundian kings, it was obvious to call one side *Athanasians*, and the other side Arians; and so also to name the orthodox faith the Athanasian faith, as the other Arian."—*Waterland: Hist. of the Athanasian Creed*.

Athanasian Creed. The creed which the framers of the Liturgy of the English Episcopal Church, with proper critical acumen, designate as "this Confession of our Christian Faith commonly called the Creed of Saint Athanasius," thus avoiding any expression of belief as to its real authorship. Though correctly expressing the doctrine of that Christian father, it seems not to have been penned till after his time. Dr. Waterland ascribed it to Hilary, Bishop of Arles from A. D. 430 to 449. It was about the beginning of the eighth century that it commenced to be read in liturgic worship. The English Episcopal Prayer-book enjoins that it be used in the churches on the principal festivals, when it is to take the place of the Apostles' Creed, and to be sung or said "by the minister and people standing." The Greek Church has modified the article relating to the "Procession" of the Holy Ghost.

ath'-a-nor, *s.* [In Ger. *athenor*; from Arab. *at-tannūr*; Heb. *tannūr*=a furnace.] A digesting furnace formerly in use among chemists. It was designed to maintain an unvarying amount of heat, which could be increased or diminished at pleasure by opening or shutting apertures with sliders over them called *registers*. (*Quincy, &c.*)

Āth'-ar-ist, *s.* [CATHARIST.] (*Scotch*.)

A-thar'-va-na, *s.* [Sanskrit.] The fourth of the Indian Vedas. Its language is more modern than that of the other three. The Sanhitā, or collection of prayers and invocations, is comprised in twenty books. The number of verses is stated as 6,015; the sections more than 100; and the hymns upward of 760. The theological treatises, regarded as fifty-two in number, called *Upanishads*, are appended to the Atharvan Veda.

āthe, āith, *s.* [OATH.] (*Scotch*.)

ā-thē-ism, *ā-thē-isme, *s.* [In Ger. *atheism*, *atheismus*; Fr. *athéisme*; Sp. & Ital. *ateismo*; Port. *ateismo*; from Gr. *a*, priv., and *theos*=God.] Literally, disbelief in a God, if such an attainment is possible; or, more loosely, doubt of the existence of a God; practically, a denial that anything can be known about the supernatural, supposing it to exist. [AGNOSTICISM.]

"It is true that a little philosophy inclineth man's mind to *atheism*, but depth in philosophy bringeth men's minds about to religion."—*Bacon: Essays, Civ. & Mor.*, ch. xvi.

Hist. & Philos.: Among the Greeks *atheism* consisted in a denial or non-recognition of the gods of the State. [PYRRHONISM, SKEPTICIS, SOPHISTS.] Socrates was put to death for asserting the superiority of the Divine wisdom to the other gods, as the ruler and disposer of the universe, thus contradicting Greek mythology, which assigned that office to Zeus. In Latin times *atheism* still continued to be a negation, with no pretension to rank as a system. Voltaire speaks of it as having destroyed the republic, and says that it was factious in the time of Sulla and of Cæsar, and slavish under Augustus and Tiberius. It was closely akin to that cultured unbelief which extensively prevailed at the Roman Curia during the early part of the Renaissance. Macaulay (*Ranke's History of the Popes*) is very severe on the "men who, with the Latinity of the Augustan age, acquired its atheistical and scoffing spirit." The *atheism* of the eighteenth century was a protest against the persecution of fanaticism; and, like its predecessors, put forward little or nothing to replace the system it attempted to destroy. The *atheism* of the present century may be taken to include every philosophic system which rejects the notion of a personal Creator: in this sense it ranks as a genus, of which Atomism, Pantheism, Positivism, &c., are species. Strictly, it is the doctrine that sees in matter the sole principle of the universe. Popularly, *atheism* consists in the denial of a God: this view is probably founded on the mis-translation of Psalm xiv. 1, and liii. 1, which should be, "The fool hath said in his heart, No God for me"—i. e., he willfully rejects God, at the same time knowing that He is.

ā-thē-ist, *s. & a.* [In Ger. *atheist*; Fr. *athée*, *athéiste*; Sp. & Ital. *ateista*; Port. *atheista*; Lat. *atheos*; from Gr. *a*, priv., and *theos*=God.]

A. As substantive: One who holds any of the opinions described under *Atheism* (q. v.).

B. As adjective: Entertaining any of the opinions described under *Atheism* (q. v.).

atheist-wretch, *s.* A contemptuous term for an atheist.

"The weakest *atheist-wretch* all heaven defies,
But shrinks and shudders when the thunder flies."
Pope: Homer's Iliad, bk. xx., 421-2.

ā-thē-ist'-ic, ā-thē-ist'-ic-al, *s.* [Eng. *atheist*; *-ic*, *-ical*. In Ital. *ateistico*.]

1. *Of persons:* Disbelieving or doubting the existence of a God.

"It is an ignorant conceit, that enquiry into nature should make them *atheistic*."—*Bp. Hall: Contemplations; The Sages and Stars*. (*Richardson*.)

2. *Of speeches, writings, &c.:* Containing or involving *atheism*.

"... *atheistical* explications of natural effects and common events."—*Barrow*, vol. i., Ser. 3.

ā-thē-ist'-ic-al-lŷ, *adv.* [Eng. *atheistical*; suff. *-ly*.] In an atheistic manner; inclined toward *atheism*.

"I entreat such as are *atheistically* inclined to consider these things."—*Tillotson*.

ā-thē-ist'-ic-al-nēss, *s.* [Eng. *atheistical*; *-ness*.] The quality of being *atheistic*.

"Lord, purge out of all hearts profaneness and *atheisticalness*."—*Hammond: Fundamentals*.

ā-thē-i'ze, *v. t. & i.* [Gr. *atheos*=without God; denying the existence of God; and Eng. *-ize*=to make.] [See suffix *-IZE*.]

A. Transitive: To render atheistic.

"... they endeavored to *atheize* one another . . ."
—*Bp. Berkeley: The Minute Philosopher*, Dial. ii.

B. Intransitive: To speak or write in an atheistic manner.

"... to see if we can find any other philosophers who *atheized* before Democritus and Leucippus, as also what form of *atheism* they entertained."—*Cudworth: Intell. Syst.*, p. 3. (*Richardson*.)

ā-thē-i'z-ēr, *s.* [Eng. *atheize*; *-er*.] One who *atheizes*; one who teaches or encourages *atheism*.

"These men were indeed the first *atheizers* of this ancient atomick philosophy."—*Cudworth: Intell. Syst.*, Pref. (*Richardson*.)

***āth'-ēl, *ād'-ēl, *æ'-thēl** (O. Eng.), ***āth'-il, *āth'-ill, *hāth'-ill, *hath'-ēl, *hāth'-ēlle, *āch'-il, *āch'-ill**, *adj., s., & in compos.* [A. āth'-ēl-ing, ād'-ēl-ing, ēd'-ēl-ing, ēth'-līng, ēth'-ēl-ing, *s.* [A. S. *ætheling*=(1) the son of a king, a prince, one of the royal blood, the heir apparent, a nobleman next in rank to the king; (2) a ruler, governor, man. (*Bosworth*.)] [ADELING, ÆTHELING.] Properly, a title of honor belonging to the heir apparent or presumptive. It was first conferred on Edgar by Edward the Confessor, his grand-uncle, who bestowed it when he designed to make him successor to himself on the throne.

Thral unbuxom,
Atheling britheling."

MS. Cott., Calig., A. ix., f. 246 b. (*S. in Boucher*.)

a-thēn-æ'-ūm, a-thēn-ē'-ūm, *s.* [In Fr. *athénée*; Port. *atheneo*; Lat. *athenæum, atheneum*, a place built by Hadrian, and consecrated to Minerva, in which poets and other authors read aloud their productions; Gr. *Athēnaion*, the temple of *Athēna*.] [ATHENE.] A term used to designate various institutions more or less connected with literature; as—

1. A public reading-room furnished with newspapers and other periodicals, with possibly a library attached.

2. A periodical specially designed to record the progress of art and review new books, as the well-known *Athenæum* published in London; or simply a newspaper, as the *Madras Athenæum*.

A-thē-nē, A-thē-na, *s.* [Gr. *Athēna*, in Hom.

Athēnē, Athēnaiē. Max Müller believes that the root from which *Athene* came was *ah*, which yielded also the Sanscrit *ahanā, aghuyā*, i. e., *ahuyā*=the dawn, and *akar*=day.] The Grecian goddess corresponding to the Roman Minerva. She was the tutelary goddess of Athens, which was said to have been called after her. She was the goddess of war, of wisdom, and of the arts and sciences.

"He spake, and to her hand pre-
ferred the bowl.
A secret pleasure touch'd *Athe-*
na's soul."

Pope: Homer's Odyssey, bk. iii., 64, 65.

Athene was known to the Romans as Minerva.

"They of your society [Jesuits], as they took their original from a soldier, so they are the only *atheologians*, whose heads entertain no other object but the tumult of realms; whose doctrine is nothing but confusion and bloodshed."—*Hayward: Ans. to Doleman*, ch. 9.

ā-thē-ōl-ō-gy, *s.* [Gr. *a*, priv., and Eng. *theology* (q. v.).] Atheism. (*Swift*.)

***ā-thē-ōūs**, *a.* [Lat. *atheos*; Gr. *atheos*: *a*, priv., and *theos*=God.] Atheistic; not believing in God, or acting as if one did not do so.

"Thy Father, who is holy, wise, and pure,
Suffers the hypocrite or *atheous* priest
To tread his sacred courts and minister
About his altar, handling holy things."

Milton: P. R., bk. i.

ā-thēr-ī-ās-tīte, *s.* [From Gr. *atheriastos* (its discoverer says), which is a word not in Liddell and Scott. Should it be *atheristos*=unheeded (?).] A mineral, a variety of Scapolite, placcd by Dana under the mineral Wernerite. It is of a greenish color, and is found at Arendal, in Norway.

āth-ēr-īne (*Eng.*), **āth-ēr-ī-nā**, *s.* [Mod. Lat. *atherina*; from Gr. *atherinē*=a kind of smelt (*Aristotle*).]

A. Of the form atherine:

Ordinary Language: A pretty little fish, from five to six inches long, called also the Sandmelt. It is the *A. presbyter* of Cuvier. It is found along the southern coasts of Europe, occupying a region distinct from that in which the smelt (*Osmerus eperlanus*) occurs. It is used as food. There is an American species, the *Menidia notata*, commonly called *silversides*.

B. Of the form atherina:

Zool.: A genus of fishes of the order Acanthopterygii and the family Mugilidae (Mulletts). Several species are known in the Mediterranean and elsewhere. The young, which congregate together, are the Aphyes of the ancients. Now, in the south of Europe, they are called *Nonnat*.

ā-thēr-man-çy, *s.* [From Gr. *athermantos*=not heated; *athermos*=without heat: *a*, priv., and *thermos*=hot.] The term used by Melloni to express the power which certain bodies have of stopping radiant heat. [DIATHERMANCY.] (*Atkinson: Ganot's Physics*, § 373.)

ā-thēr-man-ōūs, *adj.* [From Eng. *atherman* (*cy*); *-ous*.] [ATHERMANCY.] Pertaining or relating to athermancy (q. v.). (It is opposed to *diathermanous*.)

āth-ēr-ō-mā, *s.* [Lat. *atheroma*; Gr. *athērōma*=a tumor upon the head filled with matter; from *athērē*, also *athara*; Attic *atharē*=groats or meal.] A species of wen filled with curdy matter. It does not cause pain, discolor the skin, or yield easily to the touch.

"If the matter forming them resembles milk curds, the tumor is called *atheroma*; if it be like honey, meliceris; and if composed of fat, or a suety substance, *steatoma*."—*Sharp*.

āth-ēr-ōm-a-toūs, *a.* [Gr. *athēromatos*, genit. of *athērōma* (ATHEROMA), and Eng. suffix *-ous*.] Pertaining or relating to atheroma. Curdy in appearance and consistency.

A. As preposition:

I. Ordinary Language:

1. Literally:

(a) Across, transversely; from one side to the other.

"He sate him down at a pillar's base,
And pass'd his hand *athwart* his face."

Byron: Siege of Corinth, 19.

(b) So as to cross, without reference to whether it is transversely, longitudinally, or diagonally.

"Her lights, wi' hissing eerie din:
Athort the lift they start and shift,
Like fortune's favors' tint as win."

Burns: A Vision.

2. Figuratively:

(a) So as to cross; so as to thwart.

"Strikes the rough thread of error right *athwart*
The web of every scheme they have at heart."
Cowper: Expostulation.

(b) Through; in the midst of.

"Now, *athwart* the terrore that thy vow
Has planted round thee, thou appear'st more fair."
Addison.

II. Technically:

Naut. Athwart hawse: A term applied to the situation of a ship when she lies across the stem of another one, either in immediate contact with her or a short distance off.

Athwart ships: Reaching across the ship from side to side; transversely across the ship.

***ā-thyr** (yr as ūr), *a.* [OTHER.] (*Scotch*.)

a-thyŕ-i-ūm, *s.* [Gr. *a*, priv., and *thyŕion*=a little door, a wicket.] A genus or sub-genus of ferns containing the *A. filix-fœmina* and the *A. fontanum*. [ASPLENIUM.]

bōll, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = șan. -tion, -sion = șn; -țion, -șion = zhŭn. -tious, -cious, -sious = șhŭs. -ble, -dle, &c. = bēl, dēl.

*ā'-tīl, *ā'-tīle, v. t. [O. Fr. *attiler*.] To equip, to supply with necessary stores.

"Upe is stede i-armed is, and atiled thorn out al."
Rob. Glouc.: *Chron.*, p. 525.

"Al ys folc wel atyled to the batayle sseet."
Ibid., p. 361. (*S. in Boucher*.)

*ā'-tīl, *ā'-tīl, s. [From the verb.] Furniture, necessary supplies.

"And al here atyl and tresour was also asseynt."
Rob. Glouc.: *Chron.*, p. 51. (*Boucher*.)

¶ In another MS. it is *catel*, and in a third *attyre*. (*S. in Boucher*.)

ā-tīl', ā-tīl', adv. & a. [Eng. *a*, and *tilt*; *at tilt*.] [TILT.] As if tilting; as a person would do who tilts.

1. As adv.: As if thrusting at an antagonist.

"... when in the city Tours,
Thou ran'st atilt, in honor of my love,
And stol'st away the ladies' hearts of France."
Shakesp.: 2 *Hen. VI.*, i. 3.

2. As adj.: In the position of a barrel raised or tilted behind, to make it run out.

"Such a man is always atilt: his favors come hardly from him."—*Spectator*.

āt-i-mŷ, s. [Gr. *atimia*=dishonor; *atimaō*=to dishonor; *a*, priv., and *timē*=worship, honor; *tiō*=to pay honor.]

In ancient Greece: Infamy; public disgrace inflicted on those who had been guilty of certain offenses.

-ā'-tion. [Eng. suff., from Lat. *-atio*, as *oblation*, from Lat. *oblatio*=an offering.] It signifies (1) the act of, (2) the state of being, and (3) that which. For example: "God's creation of the world" means "God's act of creating the world;" "the world's creation" signifies "its state of being created," and by the expression "the visible creation" we mean "the persons who and things which have been created."

at-lān'-tā, s. [From the Atlanta, in which the species occur (?).] A genus of mollusks, the typical one of the family Atlantidae (q. v.). The shell, which is minute, is glassy, with a dextral operculum, though it is a dextral shell, a phenomenon of a unique character. According to Tate, in the year 1875 there were known of recent species eighteen, from the Canary Islands and the warmer parts of the Atlantic. A sub-genus *Oxygyrus* added four more to the list.

Āt-lān-tē-ān, †Āt-lān-tī-ān, at-lān-tē-ān, *Āt-lān-tīc, a. [Lat. *Atlanteus*; Gr. *Atlantēios*.]

A. (Of the forms Atlantean and atlantean only):

1. Spec.: Pertaining to Atlas or the mountains called after him. [ATLAS.]
2. Gen.: Strong; capable of bearing great weight. (Used chiefly of shoulders.)

"Sage he stood,
With Atlantean shoulders, fit to bear
The weight of mightiest monarchies."
Milton: *P. L.*, bk. ii.

"What more than Atlantean shoulder props
The incumbent load."

Young: *Night Thoughts*, 9.

†B. (Of the forms Atlantian and Atlantean): Pertaining to the probably fabulous island of Atlantis (q. v.).

At-lān-tēs, s. pl. [In Fr. *atlante* (sing.); Sp. *atlantides*. From Gr. *Atlantes*, plural of *Atlas*, genit. *Atlantos*.]

Arch.: Colossal statues of men used instead of pillars to support an entablature. Roman architects called them Gr. *talamones*. (Vitruv., vi. 10.) When statues of women support an entablature they are generally called Caryatides (q. v.).

At-lān-tīc, (1), a. & s. [In Fr. *Atlantique*; Sp., Port. & Ital. *Atlantico*; Lat. *Atlanticus*; Gr. *Atlantikos*.]

A. As adjective: Pertaining or relating to the ocean so designated.

"The murmurs of th' Atlantic wave,"
Couper: *Task*, bk. iv.

B. As substantive: The great ocean between Europe and Africa on the one side and America on the other, divided into the Northern, the Inter-tropical, and the Southern, or simply into the Northern and Southern Atlantic.

"The doctrine that there has been a continuous formation of Globigerina mud on the bottom of the Atlantic from the Cretaceous epoch to the present time . . . must be admitted as (to say the least) a not improbable hypothesis."—Dr. W. Carpenter. (*Ency. Brit.*, 9th ed., iii. 21.)

The Bed of the Atlantic: Between soundings and photography there is a prospect that marine depths will become almost as familiar to students of oceanography as the dry land. Surveys of the Atlantic have somewhat modified pre-existing views as to the contour of its bed. Proceeding westward from the Irish coast the sea deepens very gradually, the gradient being for the first 230 miles not more than six feet to the mile. In the next twenty miles, however, the fall is more than 9,000 feet, the descent being so precipitous that in many places depths of 1,200 to 1,600 fathoms are found close to the 100-fathom line. When a depth of 1,800 to 2,000 fathoms is reached the bed becomes a slightly undulating plain, with scarcely any variation for a distance of 1,200 miles. So far as is known the greatest depth in the Atlantic is about 100 miles to the north of St. Thomas, where soundings of 3,875 fathoms have been obtained. The seas around Great Britain, instead of forming part of the Atlantic hollow as supposed, are now believed to be part of the platform banks of the great European continent which the sea has overflowed.

At-lān-tīc (2), a. [ATLANTEAN.]

At-lān-tī-ca, s. [ATLANTIS.]

at-lān-tī-dē, s. pl. [ATLANTA.]

I. Ethn.: According to Latham, one of the primary varieties of the human species. The maxillary profile is projecting; the nasal one generally flat; the frontal one retiring; the cranium dolichocephalic, the parietal diameter being generally narrow. Eyes rarely oblique. Skin often jet black, very rarely approaching a pure white. Hair crisp, woolly, rarely straight, still more rarely light-colored. Languages with an agglutinate, rarely an amalgamate inflection. Distribution, Africa. Influence on the history of the world inconsiderable.

II. Zool.: A family of mollusks belonging to the class Gasteropoda and the order Nucleobranchiata. There is a symmetrical discoidal shell, sometimes closed by an operculum. The gills are contained in a dorsal mantle-cavity. Genera: Atlanta, Bellerophon, &c.

At-lān-tī-dēs, s. pl. [Lat. *Atlantides*, *Atlantides*.]

1. Class. Myth.: The daughters of Atlas, seven of whom were called also Pleiades, after their mother Pleione. After their death they were supposed to have been transformed into the constellation Pleiades.

2. Astron.: A designation sometimes given to the stars constituting the Pleiades.

At-lān-tīs, At-lān-tī-ca, s. [From Gr. *Atlantis*.] An island, said by Plato and others to have once existed in the ocean immediately beyond the Straits of Gades, that is, in what is now called the Atlantic ocean, a short distance west of the Straits of Gibraltar. Homer, Horace, and some others made two "Atlanticas," distinguished as the *Hesperides* and the *Elysian Fields*, and believed to be the abodes of the blest. Plato states that an easy passage existed from the one Atlantis into other islands, which lay near a continent exceeding in size all Europe and Asia. Some have thought this America. Atlantis is represented as having ultimately sunk beneath the waves, leaving only isolated rocks and shoals in its place. Geologists have discovered that the coast-line of Western Europe did once run farther in the direction of America than now; but its submergence seems to have taken place long before historic times, so that the whole ancient story about Atlantis was probably founded on erroneous information, or arose from a clever guess put forth by a man of lively imagination.

¶ The New Atlantis: The title which Lord Bacon gives to a literary fragment, in which he sketched out an ideal commonwealth.

āt-las, Āt-las, s. [In Sw., Dan., Dut., Ger., Fr., Sp., & Port. *atlas*, *Atlas*; Lat. *Atlas*, genit. *Atlantis*; Gr. *Atlas*, *Atlantos*; *atlas*, *atlantos*.]

A. Of the form Atlas:

1. Class. Myth.: A king of Mauritania, believed to have been transformed, by looking at the head of Medusa, into the range of mountains of the same name. He was supposed to support the world on his shoulders.

"Atlas her sire, to whose far-piercing eye
The wonders of the deep expanded lie;
Th' eternal columns which on earth he rears
End in the starry vault, and prop the spheres."
Pope: *Homer's Odyssey*, bk. i., 67-70.

2. Geog.: The range of mountains mentioned above. The highest peak, which is in Morocco, is about 11,400 feet in elevation.

B. Of the form atlas:

I. Ordinary Language:

1. A collection of maps, probably so called from the fact that some volumes of maps used to have as a frontispiece a representation of Atlas supporting the world on his shoulders. The celebrated geographer Mercator was the first to use the word in this sense. He lived in the sixteenth century.

2. A large square folio, externally resembling a quarto or a book of maps, but which consists of large engravings, as for instance, anatomical plates, or landscapes illustrative of a country.

"Owen's report of a geological survey of Wisconsin, Iowa, and Minnesota, and part of the Nebraska Territory, with atlas of colored plates."—*Name of Book*.

¶ This use of the word is somewhat rare in England and America, but very common in France.

†3. A book in which the information is presented in a tabular form.

†4. In the same sense as B. 3.

II. Technically:

1. Arch.: The supporters of a building. [ATLAN-TES.]

2. Anat.: The first cervical vertebra, the one on which the head is balanced. It is very strong, and has great freedom of movement.

"The first and second cervical vertebrae, called respectively atlas and axis."—*Flower*: *Osteology of the Mammalia*, p. 22.

3. Silk-weaving: A rich kind of silk or stuff manufactured in the East, and designed to be used in making articles of female attire.

"I have the convenience of buying Dutch atlases with gold and silver, or without."—*Spectator*.

4. Paper-making: A large kind of drawing paper.

¶ Atlas beetle: A fine lamellicorn beetle found in portions of Eastern Europe. It is the *Chalcosoma atlas*. The male is brilliant metallic olive-green; the female duller. The male is about three inches long.

†atlas-fine, a. & s. A kind of paper, opposed to atlas-ordinary (q. v.). [ATLAS, B., II. 4.]

†atlas-ordinary, a. & s. A kind of paper, opposed to atlas-fine (q. v.). [ATLAS, B., II. 4.]

"The preservation of this faith is of more consequence than the duties on red lead, or white lead, or on broken glass, or atlas-ordinary, or demy-fine, or blue royal."—*Burke on Amer. Tax*.

āt-las-ite, s. [Apparently from Ger., &c., *atlas* = . . . satin, named from the satiny or silky character of the mineral. The term corresponds with Ger. *atlaserz*=fibrous malachite.] A mineral believed by Dana to be not sufficiently distinct from Azurite to constitute a quite independent species. He believes that it may be a mixture of about 3½ parts of Azurite with one part of Atacamite. It is from Chili.

āt-mī-dēm-ēt-ēr, s. [From Gr. *atmidos*, genit. of *atmis*=the steam of a fomentation. Cognate with *atmos*.] [See ATMOMETER.] An instrument still in use, invented by Babington, for measuring the evaporation from water, ice, snow, &c. It consists of two glass or metal bulbs, one of them placed above the other, with which it communicates by a narrow neck. The lower one is weighted with shot or mercury, and the upper has on it a small glass or metal stem, with a scale graduated in grains and half-grains. On the top of all there is a shallow pan. The instrument being immersed in a vessel of water through a circular hole in which the steam rises, distilled water is gradually poured into the pan above, causing it to sink to the point at which the zero of the steam is on a level with the cover of the vessel. As then the water in the pan gradually evaporates, the stem slowly ascends, the amount of evaporation being indicated in grains on the graduated scale. (Brande.)

Atmidometer.

āt-mōl'-ō-gŷ, s. [Gr. *atmos*=vapor and *logos*=discourse.] The science which treats of atmospheric vapor.

āt-mōl'-ŷs-is, s. [ATMOLYZE.] The act or operation of separating two gases in combination from each other. (Fownes.)

āt-mō-lŷ-ze, v. t. [Gr. (1) *atmos*=smoke or steam; (2) *lysis*=a loosing or setting free; *lyō*=to loose.] To separate, at least partially, two gases or vapors of unequal diffusibility which are combined with each other. (Fownes: *Manual of Chemistry*, 10th ed., p. 140.)

āt-mō-lŷ-zed, pa. par. [ATMOLYZE.]

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf. wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

ät-mö-lyz-är, s. [Eng. *atmolyze*(e); -er.] That which produces atmolysis, the partial separation of gases or vapors of unequal diffusibility.

Tube atmolyzer: An instrument for effecting this result. It consists of a tube of unglazed earthenware, about two feet in length, placed within a shorter tube of glass in contact with an air-pump. The air between the two tubes being to a large extent exhausted, the mixed gases are allowed slowly to traverse the earthenware pipe, when much of the lighter one escapes through the pores into the other. (Fownes.)

ät-mö-lyz-äng, pr. par. [ATMOLYZE.]

ät-möm-ë-tër, s. [Gr. *atmos*=smoke, steam, vapor; Sansc. *atma*=spirit, soul; and Gr. *metron*=measure.] An instrument invented by Sir John Leslie for measuring the quantity of moisture exhaled in a given time from any humid surface. It consists of a very thin ball of porous earthenware, from one to three inches in diameter, having a small neck firmly cemented to a long and rather wide tube of glass, to which is adapted a brass cap with a narrow collar of leather to fit closely. It is filled with distilled or pure water, and its cap screwed tightly. It is then suspended out of doors in a situation where it is exposed freely to the action of the wind, but is sheltered from rain. As the water evaporates from the external surface of the ball, it transudes through its porous substance, and the waste is measured by the corresponding descent of the liquid in the stem. To test the amount of this descent there is a finely-graduated scale. When the water has sunk to the bottom of the stem the latter requires to be filled anew.

Atmometer.

through its porous substance, and the waste is measured by the corresponding descent of the liquid in the stem. To test the amount of this descent there is a finely-graduated scale. When the water has sunk to the bottom of the stem the latter requires to be filled anew.

ät-mö-sphère, s. [In Sw. *atmosfer*; Ger. *atmosphäre*; Fr. *atmosphère*; Sp. & Ital. *atmosfera*; Port. *atmosfera*; from Gr. *atmos*=smoke, steam, vapor, and *sphaira*=a ball, a sphere.]

1. *Lit.*: The air surrounding our planet, and which, as the etymology implies, is, speaking broadly, a "sphere" (not, of course, a solid, but a hollow one). With strict accuracy, it is a hollow spheroid. Its exact height is unknown. At 27 miles above the surface of the earth half its density is gone, and the remainder is again halved for every further rise of 27 miles. Some small density would remain at forty-five miles high. At eighty miles this would have all but disappeared. But from sundry observations, made at Rio Janeiro and elsewhere, on the twilight arc, M. Liais infers that the extreme limit of the atmosphere is between 193 and 212 miles. For its weight, see ATMOSPHERIC PRESSURE. In the lower strata of the atmosphere the temperature falls at least a degree for every 352 feet of ascent; hence, even in the tropics, mountains of any considerable elevation are snow-capped. The atmosphere appears to us blue, because, absorbing the red and yellow solar rays, it reflects the blue ones. It revolves with the earth, but being extremely mobile, winds are generated in it, so that it is rarely long at rest. [WIND.] For its composition, see AIR. Evaporation continually at work sends into it quantities of water in a gaseous state; clouds are formed [CLOUDS], and in due time descend in rain. [RAIN, METEOROLOGY.] The atmosphere always contains free electricity, sometimes positive and sometimes negative. There appears to be no atmosphere around the Moon; but the case seems different with the Sun, Venus, Mars, Jupiter, and Saturn.

"How as a talisman of magic fame,
This atmosphere conveys th' enlightening beam,
Reflects, infects, refracts the orient ray
Anticipating sheds the rising day."

Brooks: *Universal Beauty*. (Richardson.)

2. *Fig.*: Any pervading intellectual, moral, religious, or other influence by which one is surrounded; as in the expression, "He lives in an atmosphere of suspicion."

***Electrical atmosphere:** An obsolete name for the sphere immediately surrounding an electrified body and operated upon by it.

Magnetic atmosphere: The sphere within which the attractive force of the magnet acts.

ät-mö-sphër-ic, ät-mö-sphër-ic-al, a. [Eng. *atmospheric*(e); -ic, -ical. In Fr. *atmosphérique*; Sp. *atmosférico*.] [ATMOSPHERE.] Pertaining or relating to the atmosphere. *Specially*—

1. Constituting or pervading the atmosphere; made of air.

"... the transparent atmospheric envelope . . ."
—Herschel: *Astronomy*, § 566.

2. Existing within the atmosphere.

"... but when we reflect that the Cordillera, running in a north and south line, intercepts, like a great wall, the entire depth of the lower atmospheric current . . ."
—Darwin: *Voyage round the World*, ch. xv.

3. Produced by the atmosphere.

"Measure of atmospheric pressure, . . ."—Prof. Atty: *Sound*, p. 8.

†4. Under the influence of the atmosphere; affected in temperament by the atmosphere. (Pope.)

†atmospheric air. The ordinary air belonging to the atmosphere, as contradistinguished from other "airs," the old term for gases. Now that the word *air* has come specifically to mean that in the atmosphere, the expression *atmospheric air* is a tautology, and will probably sink into disuse.

atmospheric or atmospheric clock. A machine planned by Sir David Brewster for measuring the mean temperature of the atmosphere.

atmospheric engine. An engine in which the piston was forced down by the pressure of the atmosphere, when the steam, which caused it to rise, was condensed so as to produce a near approach to a vacuum in the cylindrical chamber beneath it. Such was Newcomen's engine, constructed in 1705, and subsequently improved by Smeaton, Brindley, and others, till superseded by Watt's single-acting engine, which was a genuine steam-engine. The atmospheric engine was used only for pumping water.

Mech.: A line drawn upon an indicator-card by a pencil worked by the steam of a steam-engine, and designed to register the equilibrium line between steam pressure on the piston and the extent of the vacuum produced on the other. The former is indicated by numbers ascending above the atmospheric line; the latter by numbers descending below it; while itself it stands at zero. [INDICATOR-CARD.]

atmospheric pressure. The pressure exerted by the atmosphere, not merely downward, but in every direction. It amounts to 14.7 lbs. of weight on each square inch, which is often called in round numbers 15. On a square foot it is=2,160 lbs., or nearly a ton. It would act upon our bodies with crushing effect were it not that the pressure, operating in all directions, produces an equilibrium. If any gas or liquid press upon a surface with a force of 15 lbs. on a square inch, it is generally described as having a pressure of one atmosphere; if 60 lbs., of two atmospheres; if 120 lbs., of four atmospheres, and so on.

atmospheric railway. A railway in which the propulsive force designed to move the carriages along is that of the atmosphere. The notion of such a method of locomotion seems first to have suggested itself, in the latter part of the seventeenth century, to the French physician, Papin, whose name is forever associated with the celebrated digester. [DIGESTER.] In 1810 Mr. Medhurst published a work entitled *A New Method of Conveying Letters and Goods by Air*. His proposal was to construct a closed tunnel, in which the carriages—the last of them provided with a piston fitting the tunnel—should be propelled by air forced in behind them. Vallance, of Brighton, in 1825, recommended as an improvement on this plan the exhaustion of the air in front. About 1835 Mr. Henry Pinkus, an American gentleman residing in England, patented a scheme for placing the carriages in the open air, but connecting them below with a small tunnel, having a narrow slit above, with ingeniously constructed apparatus to render the tunnel temporarily air-tight notwithstanding the slit. Not much was done to carry out the patent; and Pinkus' scheme of what he called a Pneumatic Railway was considered as having failed, when, in 1840, Messrs. Clegg and Samuda brought forward a somewhat similar project under the name of the "Atmospheric Railway." An experimental fragment of line laid down near Wormwood Scrubs, just outside of London, on the Great Western line, was successful, as was one designed for actual use from Kingstown to Dalkey, in Ireland, another between London and Croydon, and a third in South Devon; all, however, have been since abandoned. For passengers at least, and to a great extent even for the transmission of letters, the railways of the ordinary type, on which steam is the impelling force, have triumphantly held their own against the innovation of the Atmospheric or Pneumatic Railway, and all that now remains of the latter method of propulsion are the pneumatic dispatch tubes, used for transmitting parcels to short distances. [PNEUMATIC.]

atmospheric tides. Tides which must exist in the atmosphere as they do in the ocean, from the attractions of the moon and the sun.

a-töök, s. [South American name.]

Zool.: A variety of the *Mephitis Americana* found at Quito, whence Humboldt called it *Gulo Quitensis*. It is sometimes termed the Zorra.

a-töll, s. & a. [A Maldivé word Anglicized. In Fr. *atollon*.]

A. As substantive: The name applied by geologists and others to any one of the lagoon islands or annular coral reefs found in the Pacific and

the Indian Oceans, the Red Sea, and some other parts of the tropics. An atoll is a ring of coral rock, oval rather than circular in form. One reaches eighty-eight miles in its longer, by twenty in its shorter, diameter; but in general they are of much more limited dimensions.

On the top of the coral rock, which rises but slightly above the sea-level, is vegetation of some luxuriance—the cocoanut being the most conspicuous plant. On the convex circumference of the ring is a beach of white sand, exterior to which is a line of breakers, and a few feet beyond them the unfathomable ocean. The ring of land, which is less than half a mile across, encircles a lagoon of comparatively still water, which, from reflection, is of a bright but pale-green color. In the view of Mr. Darwin, now almost universally adopted, there was once an island, possibly even containing high land, in the place now occupied by the lagoon. It was surrounded by a "fringing reef" of living coral close to the shore. As, from geological causes, it slowly subsided into the deep and disappeared, the coral animals built up to the surface of the water, and formed the ring of rock constituting the modern island. In the larger atolls there are generally two or three breaks in the ring, affording ship-channels into the lagoon; these mark the spots where fresh water, discharged from the old subsiding land into the sea, prevented the coral animals, which are marine, from locating themselves or building. [CORAL.]

Atoll.

"... hence I have invariably used in this volume the term 'atoll,' which is the name given to these circular groups of coral islets by their inhabitants in the Indian Ocean, and synonymous with lagoon-island."—Darwin: *Coral Reefs* (1842), p. 2.

atoll-building, a. Building atolls.

"If, then, the foundations, whence the atoll-building corals spring, were not formed of sediment . . ."
—Darwin: *Voyage round the World*, ch. xx.

atoll-formed, a. Of the shape of an atoll.

"The three classes, atoll-formed, barrier and fringing reefs, together with the modifications just described of the latter, include all the most remarkable coral formations anywhere existing."—Darwin: *Coral Reefs*, p. 59.

atoll-like, a. Like an atoll.

"... with their atoll-like structure."—Darwin: *Coral Reefs*, p. 28.

atoll-shaped, a. Shaped like an atoll.

"... an atoll-shaped bank of dead rock."—Darwin: *Coral Reefs*, p. 107.

atoll-structure, s. The structure of an atoll.

"... the true atoll-structure . . ."
—Darwin: *Coral Reefs*, p. 169.

B. As adjective: Pertaining to an atoll.

"... all these reefs are more probably allied to the barrier or atoll classes."—Darwin: *Coral Reefs*, p. 195.

ät-öm, *ät-öme, *ät-öm-ÿ (1), *ät-öm-üs, s. [In Sw., Dan., & Ger. *atom*; Fr. *atome*; Sp., Port., & Ital. *atomo*; Lat. *atomus*, as *substan.*=an indivisible element; as *adj.*=undivided, indivisible; from Gr. *atomos*=(1) uncut, (2) that cannot be cut, indivisible: from *a*, priv., and *temnō*=to cut.]

*A. Of the form *atomus*, pl. *atomi*. (This form is found in Bacon.)

B. Of the forms *atom* and *atome*. [ATOMY.]

1. Ordinary Language:

Lit.: Anything composed of matter which, to our senses, seems too small to be divided again; anything very minute, without reference to whether or not it can be divided again. [ATOMY.]

"Measures an atom, and now girds a world."

Cowper: *Task*, bk. i.

"The sun," says Daniel Culverwell, "discovers atoms, though they be invisible by candle-light, and makes them dance naked in his beams."—Tyndall: *Frag. of Science*, 3d ed., xi. 291.

2. *Figuratively*:

(1) Any immaterial thing, viewed as very small; the smallest amount.

"He [King James II.] would yield nothing more, not an atom; and, after his fashion, he vehemently repeated many times, 'Not an atom.'"—Macaulay: *Hist. Eng.*, ch. ix.

(2) Man, viewed as no more than a speck or invisible point in creation.

"And teach these atoms, thou hast made, thy praise?"

Cowper: *Glory to God Alone*.

töil, böy; pöüt, jöwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. ph = 1.
-cian, -tian = şan. -tion, -sion = şhün. -tious, -cious, -sious = çhüs. -tle, -dle, &c. = bel, del.

II. Technically:

1. *Mental Phil.*: A particle of matter so infinitely small that it cannot again be subdivided; the idea of a divided atom—that is, of a division of that which cannot be divided—being self-contradictory. It is a mental conception simply; for the senses cannot take cognizance of anything so minute.

2. *Nat. Phil.*: One of the exceedingly minute ultimate particles of matter, aggregates of an immense number of which, held in their place by molecular forces, constitute all material bodies.

3. *Chem.*: The smallest particle into which an element can be divided. An atom cannot exist in a separate state, but unites with one or more atoms to form a molecule. The atoms of different elements have definite relative weights fixed and invariable for each, the weight of an atom of hydrogen being regarded as unity. [ELEMENT.]

¶ The existence of bodies smaller than atoms—corpuscles, or ions, or whatever they are to be called—has long been suspected, and some recent researches on obscure forms of radiation, such as that which led to the discovery of radium and its remarkable properties, seem to verify this supposition.

atom-like, *adj.* Like an atom; exceedingly minute.

a-tôm'-ic, ***a-tôm'-ick**, **a-tôm'-ic-al**, *a.* [Eng. *atom*; -ic, -ical. In Fr. *atomique*.] Consisting of atoms, or otherwise pertaining or relating to an atom or atoms.

atomic heat.

Chem.: A term introduced by M. Regnault. The atomic heat of the elements in a solid state is nearly a constant quantity, the mean value being 6.4. This number is obtained by multiplying the specific heat of an element by its atomic weight. The atomic heat of an element represents the quantity of heat which must be imparted to or removed from atomic proportions of the several elements, in order to produce equal variations of temperature. (See *Watts' Dict. Chem.*)

atomic or atomical philosophy.

Mental and Nat. Phil. The *Doctrine of Atoms*: A doctrine or hypothesis originally broached by Leucippus, afterward developed by Democritus, and which underwent further modifications at the hands of Epicurus. It represented atoms as possessed of gravity and motion, and attributed to their union the formation of all things. Democritus is reported to have said that they come together in different order and position like the letters, which, though they are few, yet by being placed in conjunction in different ways produce innumerable words.

atomic theory.

Nat. Phil. & Chem.: A theory first propounded by John Dalton in his *New System of Chemical Philosophy*, published in 1807. He stated that the atoms of each element were incapable of being subdivided, and each had a definite relative weight, compared with that of hydrogen as 1; that the composition of a definite chemical compound is constant; that if two elements, A and B, are capable of uniting with each other in several proportions, the quantities of B which unite with a given quantity of A usually bear a simple relation to one another. If an element A unites with certain other elements B, C, D, then the quantities B, C, D, which combine with A, or simple multiples of them, represent the proportions in which they can unite among themselves. Dalton supposed that one element replaced another atom for atom, but it has since been found that one atom of an element can replace one or more atoms of another element, according to their respective atomicities. [ATOMICITY.]

atomic volume.

Chem.: A term introduced by Graham in lieu of the phrase "specific volume," used by Dr. Kopp. (*Graham's Chemistry*.) It signifies the volume or measure of an equivalent or atomic proportion in different substances. It is obtained by dividing the molecular weight of a compound by its specific gravity. The specific gravity of a compound gas or vapor referred to hydrogen as unity is equal to half its atomic weight; therefore the atomic volumes of compound gases or vapors referred to hydrogen as unity are, with few exceptions, equal to 2. The densities of isomorphous solid compounds are proportional to their molecular weights, that is, they have equal atomic or specific volumes. The differences of specific or atomic volume of organic liquids is often proportional to the differences between the corresponding chemical formulæ. Thus liquids whose formulæ differ by $n\text{CH}_2$ differ in specific or atomic volume by n times 22. (See *Watts' Dict. Chem.*)

atomic weight. (Symbol and abbreviation, At. Wt.)

Chem.: The weight of an atom of an element compared with the weight of an atom of H, which

is regarded as unity. Thus the atomic weight of oxygen is 16; that is, an atom of O is sixteen times as heavy as an atom of H. The sum of the atomic weights of a chemical compound is called its molecular weight, and, with a few exceptions, the specific gravities of all bodies, simple and compound, in the gaseous state are equal to half their molecular weights. The specific heats of many of the elements are nearly proportional to their atomic weights. (For atomic weights, see ELEMENT.)

a-tôm'-i-cal-lý, *adv.* [Eng. *atomic*; -ally.] After the manner of those holding the atomic philosophy. "Empedocles, who was a Pythagorean, also did physiologize atomically."—*Cudworth: Intell. System*, p. 14.

a-tôm'-i-çism, *s.* [Eng. *atomic*; -ism.] The doctrine of atoms or of the atomical philosophy. (*Cudworth*.)

ăt-ôm-ic'-i-tý, *s.* [Eng. *atomic*; -ity.]

Chem.: The combining capacity of an element or radical. It is measured by the number of atoms of H or other monatomic elements with which the element in question can directly combine, or can replace in a substance. When an element does not unite with H its atomicity may be measured by the number of atoms of Cl or some other monatomic element with which it can directly combine, since the atomicity of these elements is equal to that of H, and they may be substituted for it, atom for atom. The atomicity of an element cannot be estimated by the number of diatomic or polyatomic atoms that it can take up, as this number is indefinite. A diatomic element like oxygen may attach itself to another element, or group of elements, by one of its combining bonds, leaving the other free; and to this again another diatomic or polyatomic element may be attached, and so on indefinitely. The atomicity of an element is also called its *quantivalence*.

ăt-ôm-i'-z-ēr, *s.* [Eng. *atom*; -izer.] An instrument used for reducing a liquid into spray for disinfecting, cooling, perfuming, and similar purposes.

řat-ôm-işm, *s.* [Eng. *atom*; -ism.] The doctrine of atoms or of the atomical philosophy; atomicism (q. v.). (*Todd*.)

ăt-ôm-ist, *s.* [Eng. *atom*; -ist. In Ger. *atomist*.] One who holds the doctrine of atoms or of the atomic philosophy.

"The atomists, who define motion to be a passage from one place to another, what do they more than put one synonymous word for another?"—*Locke*.

ăt-ôm-ist'-ic-al, *a.* [ATOMIC.]

ăt-ôm-ize, *v. t.* [Eng. *atom*; -ize.]

1. To convert into atoms, to reduce to atoms. (*Baxter*.)

2. To adopt the tenets of the atomic philosophy. (*Cudworth: Intell. Sys.*, p. 26.)

ăt-ôm-ol'-ô-gý, *s.* [Gr. *atomos* = an atom, and *logos* = . . . discourse.] A discourse about atoms. The department of Natural Philosophy which treats of atoms. (*Knowles*.)

ăt-ôm-ý (1), *s.* [ATOM.] An atom.

"It is as easy to count atomies as to resolve the propositions of a lover."—*Shakesp.: As You Like It*, iii. 2.

ăt-ôm-ý (2) (*O. Eng.*), ***ăt-ôm-ie**, ***ăt-tam-ie** (*Scotch*), *s.* [Contr. from *anatomy*.] Ludicrously: A skeleton.

"You starved blood-hound! . . . Thou *atomy*, thou!" *Shakesp.: 2 Henry IV.*, v. 4.

"They grew like atomies or skeletons."—*Serm. affixed to Society's Contendings*. (*Jamieson*.)

***atone** (**at-wŭn'**), *adv.* [AT ONE (q. v.).]

a-tō'ne, ***at-tō'ne**, *v. i. & t.* [Eng. *at*; *one*.] [AT ONE.]

A. Intransitive:**I. Ordinary Language:**

*1. (*Properly*.) To be "at one," to be reconciled; to cease from strife with, to agree, to accord. [AT ONE.]

"He and Aufidius can no more atone, Than violentest contrariety." *Shakesp.: Coriolanus*, iv. 6.

2. To make expiation or satisfaction for some crime, sin or fault.

" . . . that large class of persons who think that there is no excess of wickedness for which courage and ability do not atone."—*Macaulay: Hist. Eng.*, ch. xiii.

3. *Specially*. [See II. Theol.]

II. *Theol.*: To expiate sin. (Used of the death of Christ, viewed as a sacrificial offering.)

"The Lamb, the Dove set forth His perfect innocence, Whose blood of matchless worth Should be the soul's defense: For he who would for sin atone Must have no failings of his own." *Cowper: Olney Hymns; O. Test. Gospel*.

B. Transitive:

1. To make at one; that is, to reconcile those who before were in feeling two; to create sympathy between those who before had antipathy to each other; to make peace where before there was strife or war. *Used*—

(a) *Of individuals*:

"I have been attoning two most wrangling neighbors."—*Beaumont & Fletcher: Spanish Curate*, ii. 4.

"Since we cannot atone you, we shall see Justice design the victor's chivalry." *Shakesp.: Richard II.*, i. 1.

Or (b) *of nations*:

"French. . . . I was glad I did atone my countrymen and you; it had been pity you should have been put together with so mortal a purpose as then each bore. . . ."—*Shakesp.: Cymbeline*, i. 5.

*To atone together: To unite together.

2. To appease; to render propitious.

"And may thy god, who scatters darts around, Aton'd by sacrifice, desist to wound." *Pope: Homer's Iliad*, bk. i., 580-81.

"Neptune aton'd, his wrath shall now refrain, Or thwart the synod of the gods in vain." *Pope: Homer's Odyssey*, bk. i., 100, 101.

3. To expiate; to afford satisfaction for.

" . . . behold, King James, the Douglas, doomed of old, And vainly sought for near and far A victim to atone the war." *Scott: Lady of the Lake*, v. 25.

***a-tō ned**, *pa. par. & a.* [ATONE, *v. t.*]

¶ It is also the pret. of the *v. i. & t.*, and the perf. par. of the *v. i.*

***ăt-one-mă'-kēr**, ***ăt-tone-mă'-kēr** (one as *wun*), *s.* [Eng. *at*; *one*; *maker*.] One who makes two persons or two beings, whom he finds at variance, one with each other in feelings; a reconciler. *Spec.*, Christ.

"Paul sayth (1 Tim. ii.), One God, one Mediator (that is to say, advocate, intercessor, or an atonemaker) between God and man: the man Christ Jesus, which gave Himself a ransom for all men."—*Tyndall: Workes*, p. 158. (*Richardson*.)

"And that there is one mediator, Christ, as Paul (1 Tim. ii.). And by that word understand an atonemaker, a peace-maker, and brynger into grace and favor. . . ."—*Ibid.: The Testam. of M. W. Tracie*. (*Richardson*.)

a-tō ne-měnt, ***at-tō ne-měnt**, ***at-tō ne-měnte**, *s.* [Eng. *at*, and *O. Eng. onement* = agreement, harmony; from Eng. *one*, and suffix -ment. (ONEMENT.) Or from Eng. *at, one*, and suffix -ment.] [AT ONE.]

A. Ordinary Language:

*1. *Originally & properly*: "At-one-ment," a making "at one" of those who before were "two" in point of feeling; that is, who were in antipathy to each other; reconciliation, agreement, harmony, peace. *Used*—

(a) *Of reconciliation between men at variance*.

"Buck. Ay, madam: he desires to make atonement Between the Duke of Gloster and your brothers, And between them and my lord chamberlain." *Shakesp.: Richard III.*, i. 3.

(b) *Of reconciliation, not merely of men together or among themselves, but of God to men, and men to God*.

"And like as he made the Jewes and the Gentiles at one between themselves, even so he made them both at one with God, that there should be nothing to breake the atonement, but that the thinges in heaven and the thynges in earth should be ioyned together as it were into one body."—*Udal: Ephes.*, ch. ii. (*Richardson*.)

2. Expiation of a sin against God, or of a crime or offense against man or anything similar. [B., I. 1.]

"Great as Sawyer's offenses were, he had made great atonement for them."—*Macaulay: Hist. Eng.*, ch. xv.

B. Technically:**I. Scripture:**

1. *Old Test.*: In the authorized version of the Old Testament the word *atonement* occurs not less than fifty-eight times in the text, and once in the margin; all but five of the places in which it is found being in the Pentateuch. It signifies—

(1) Expiation of sin by means of a typical sacrifice, generally of a victim, offered in faith.

"For the life of the flesh is in the blood: and I have given it to you upon the altar to make an atonement for your souls; for it is the blood that maketh an atonement for the soul."—*Lev. xii. 11*.

"And one kid of the goats for a sin-offering, to make an atonement for you."—*Numb. xxix. 5*. (See also *Lev. i. 4*; *iv. 35*; *x. 17*; *xvi. 10, 33, 34*; *Numb. viii. 21*; *xvi. 46*; *xxv. 13*; *2 Sam. xxi. 3*; *2 Chron. xxix. 24*, &c.)

(2) The removal, by a sacrificial offering, of ceremonial impurity (*Lev. xii. 7, 8*). In this sense the term was sometimes used of inanimate things—namely, of the altar (*Exod. xxix. 36, 37*; *Lev. xvi. 18*); of a house infected with the "leprosy" (*xiv. 53*); of the holy place, on account of the sins of the

fāte, řāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, came!, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or. wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trý, Sýrian. æ, œ = ē; ey = ā. qu = kw.

worshippers (xvi. 16); of the holy of holies (ver. 33); of the tabernacle of the congregation (*ibid.*), and of the work of the Temple (Neh. x. 33).

(3) Ransom.

"Then he is gracious unto him, and saith, Deliver him from going down to the pit: I have found a ransom [margin, *atonement*]."—*Job xxxiii. 24.*

(4) In one place *atonement* is used for what was, in its essential features, a thank-offering (Numb. xxxi. 50).

¶ (a) *Atonement money*: Money paid for purposes of atonement.

"And thou shalt take the *atonement money* of the children of Israel."—*Exod. xxx. 16.*

(b) The Day of Atonement or the Great Day of Atonement was on the tenth of the seventh month. (For details regarding it, see Lev. xxiii. 26-32; xxv. 9.)

2. *New Test.*: In the New Testament the word occurs only once—viz., in Rom. v. 11: "And not only so, but we also joy in God through our Lord Jesus Christ, by whom we have now received the *atonement*" (in the margin, *reconciliation*). The Greek word is *katallagē*=(1) the exchange of one thing for another, as, for instance, money for an article; (2) a change from enmity to friendship; reconciliation; from *katallassō*=(1) to change money; (2) to change a person from enmity to friendship; to reconcile. The marginal rendering is evidently correct. And in 2 Cor. v. 18, 19, the same Greek substantive is twice rendered "reconciliation," and the same Greek verb, also twice, "reconcile." [A., 1.]

II. *Theology*: The sacrificial offering made by Christ in expiation of the sins, according to the Calvinists, of the elect only; according to the Arminians, of the whole human race.

a-tō-nēr, s. [ATONE.] One who atones, either in the sense of reconciling alienated persons, or in that of making expiation.

a-tō-nī-a, s. [ATONY.]

a-tōn'-ic, a. & s. [Gr. *atonas*=not stretched or strained; relaxed.] [ATONY.]

A. As adjective:

1. *Med.*: Pertaining to atony; having no tone in the system.

2. *Gram.*: Not having an accent.

B. As substantive (*Gram.*): A word not having an accent.

a-tōn'-ing, pr. par. & a. [ATONE.]

"With an *atoning* smile a more than earthly crown." *Byron: Child Harold's Pilgrimage*, iv. 83.

āt-ō-nỹ, *a-to-nī-a*, s. [In Ger. & Fr. *atonie*; Port. *atonia*; Gr. *atonia*=slackness, enervation; *atoneō*=to be relaxed or languid; *a*, priv., and *tonōō* or *toneō*=to stretch, strain, brace up; *tonos*=that by which anything is braced up; a rope; the sinews; the tone on a word: *teinō*=to stretch.]

Med.: Want of tone in the system.

a-tōp', adv. [Eng. *a*; *top*.] On the top, at the top.

"What is extracted by water from coffee is the oil, which often swims *atop* of the decoction."—*Arbuthnot: Aliments*.

**at-orn'*, **at-orn'*, v. i. [A. S. (*at*)*rennan*, (*at*)*-ornan*=to run away.] To run away.

"He *atornd* as baste as he myght that was his best won." *Rob. of Glouc.*, p. 419. (*S. in Boucher.*)

**a-tō ur*, s. Old spelling of ATTIRE.

**a-tō ur*, prep. & adv. [ATTOUR.]

āt-ra-bīl'-ā-ire, a. [Fr.] Atrabiliary, atrabilious. [ATRABILARIAN.]

"A preposterous love of mirth hath turned you all into wits; quite down from the sanguine orator of the independent Whig to the *atrabilaire* blasphemer of the miracles."—*Warburton: Divine Legation of Moses*, Dedication. (*Richardson.*)

āt-ra-bīl'-ā-r-i-an, a. [Fr. *atrabilaire*; Sp. *atrabilari(o)*; Eng. suff. *-ian* or *-an*. From Fr. & Ital. *atrabile*; Sp. & Port. *atrabilis*=black bile; Lat. *atra*, fem. of *ater*=black, and *bilis*=gall, bile. Cognate with Gr. *cholē*, *cholos*=gall, bile.] [ATRABILIS, CHOLERIC, MELANCHOLY.] Pertaining to "black bile," which the ancients supposed to be the cause of the melancholic temperament and its product melancholy; hence *atrabiliarian* and the cognate adjectives signify also melancholy.

"The *atrabiliarian* constitution (or a black, viscous, pitchy consistence of the fluids) makes all secretions difficult and sparing."—*Arbuthnot: Diet*.

āt-ra-bīl'-ā-r-i-ōūs, a. [Fr. *atrabile*=black bile, and Eng. suff. *-ous*. In Sp. *atrabilario*.] [ATRABILARIAN.] Full of black choler; atrabilious.

"The blood, deprived of its due proportion of serum, or finer and more volatile parts, is *atrabiliarious*, whereby it is rendered gross, black, unctuous, and earthy."—*Quincy.*

āt-ra-bīl'-ā-r-i-ōūs-nēss, s. [Eng. *atrabiliarius*; *-ness*.] The state of being affected with "black bile;" the state of being melancholic or melancholy. (*Johnson.*)

āt-ra-bīl'-ī-ar, *āt-ra-bīl'-ī-ar-ỹ*, a. [From Port & Ital. *atrabiliario* and Eng. suff. *-y*.] The same as ATRABILARIAN (q. v.).

"... splenetic *atrabiliar* reflections on his own misery . . ."—*Carlyle: Heroes and Hero-Worship*, Lect. iii.

āt-ra-bīl'-ī-ar-ỹ, a. [ATRABILAR.]

atrabiliary capsules.

Anat.: Two small gland-like bodies situated one on the upper and interior edge of each kidney. They are called also the *renal* or *suprarenal* glands or capsules.

āt-ra-bīl'-i-ōūs, a. [Fr. *atrabile*, and Eng. suff. *-ous*. In Sp. *atrabilioso*.] [ATRABILARIAN.] The same as ATRABILARIOUS (q. v.).

ā-tra-bī-lis, s. [Lat. *atra* and *bilis*.] [ATRABILARIAN.]

Old Anatomy: Black bile; a thick, black, acrid fluid, which the ancients believed to be secreted by the spleen, the pancreas or the atrabiliary capsules, but which was really only the ordinary bile altered by morbid influence.

āt-ra-cās'-pīs, s. [Gr. *atraktos*=(1) a spindle, (2) an arrow, (3) the top of a mast; and *aspis*=a round shield, . . . an asp.]

Zool.: A genus of snakes. The *A. irregularis* of South Africa has the poison-fangs longer than those of any known serpent.

a-trāct-ēn-chỹ'-ma, s. [Gr. *atraktos*=a spindle, and *enghyma*=an infusion: *en*=in, and *cheō*=to pour.]

Bot.: Professor Morren's name for fusiform, that is, spindle-shaped tissue. It is the fourth division of his Parenchyma (q. v.).

**a-trā'id*, pa. par. [ATRAY.]

āt-ra-mēn-tā'-cē-ōūs, a. [Lat. *atramentum*=anything black; ink; from *ater*=dull-black, and Eng. *-aceous* (q. v.)=Lat. *aceus*.] Pertaining or relating to ink; inky, black as ink. (*Derham.*)

āt-ra-mēn'-tal, a. [Lat. *atramentum*= . . . ink; Eng. suffix *-al*.] [ATRAMENTACEOUS.] Inky, black as ink; atramentaceous, atramentarious; helping to produce such a color. (*Browne: Vulgar Errors*, bk. vii., ch. xii.)

āt-ra-mēn-tār'-i-ōūs, a. [Lat. *atramentari-um*=an inkstand, and Eng. suff. *-ous*.] [ATRAMENTACEOUS.] Suitable to be employed in the manufacture of ink. Applied especially to copers, one of its ingredients. (*Fourcroy.*)

āt-ra-mēn'-toūs, a. [Lat. *atramentum*=ink, and Eng. suff. *-ous*.]

Lit.: Inky, inky-looking; very black (*lit. & fig.*). (*Swift: Battle of the Books.*)

**a-trā'y*, v. t. [A. S. *tregian*=to vex, to trouble, to grieve.] To vex, to trouble.

"Swithe sore sche him *atraid*."

Sevyn Sages, 1876. (*Boucher.*)

**a-trā'yed*, pa. par. [ATRAY.]

**ā-tred* (*tred* as *tērd*), a. [Lat. *ate*. All black, not glossy-black.] Colored black.

"It cannot express any other humor than yellow choler, or *atred*, or a mixture of both."—*Whitaker: Blood of the Grape*, p. 76.

**āt-rē'de*, v. t. [A. S. (*æt*)*rædan*.] To surpass in counsel or wisdom. (*Chaucer: C. T.*, 2,451.)

**āt-rēn'ne*, v. t. [A. S. (*æt*)*rennan*.] To outrun, to beat in running. (*Chaucer: C. T.*, 2,451.)

**a-trē'te*, **a-treēt'*, **at-rēed'*, adv. [Etym. doubtful. Conybeare compares it with Fr. *à trait*= "in my discourse, in earnest;" and Stevenson with Sw. *rad*=order.] Continually, distinctly. (*Prompt. Parv.*)

"The wynd that bleugh the schip with blast,

Hit was gode preyers I hit *atrete*."

Elegy on Edw. III., *Archæologia*. (*S. in Boucher.*)

**āt-rī'de*, v. t. [A. S. (*æt*)*ridan*.] To beat in riding, or on horseback. (*Layamon*, iii. 264.)

**a-trī'e*, v. t. [O. Eng. *a*; *trie*=try.] To try as a judge.

"Chief justioe he satte the sothe to *atrie*."

Rob. de Brunne: Chron., p. 89. (*S. in Boucher.*)

a-trīp', adv. [Eng. *a*; *trip*.]

Naut.: A term used (1) of an anchor, which is atrip when it is drawn out of the ground at right angles to it; (2) of the topsails of a vessel, when they are hoisted as high as possible on the masts, or just started from the caps.

āt-rip-lēx, s. [In Ital. *atrepice*; Lat. *atriplex*, originally *atriplexum*; Gr. *atraphaxis*=an orach plant: *a*, priv., and *trephō*= . . . to nourish.] A

genus of plants belonging to the order Chenopodiaceæ (Chenopods). Eight species are indigenous, and one or two more partially naturalized, in Britain. Of the former may be mentioned the *A. laciniata*, or Frosted Sea-orache; the *A. Babingtoni*, or Spreading Fruited; the *A. patula*, or Spreading Halberd-leaved; the *A. angustifolia*, or Narrow-leaved Sea-orache; and the *A. littoralis* or Grass-leaved Sea-orache. The leaves may be used as pot-herbs.

ā-trī-ūm, s. [Lat. In Ital. *atrio* means a portico or vestibule.]

I. In ancient times: The hall or principal room in an ancient Roman house. It communicated with the street by the vestibule and the front door. There was in the center of its ceiling a large aperture called *compluvium*, designed to admit light. As glass was not then in use, the same opening permitted the ingress also of rain, hence its name *compluvium*. [COMPLUVIUM.] Beneath it there was scooped out in the pavement a cistern called *impluvium*. [IMPLUVIUM.] In a large house rooms opened into the atrium from all sides, and were lighted from it.

Atrium of a Roman House.

II. In mediæval times:

1. Till the twelfth century: A covered court, somewhat on the model of the ancient atrium, constructed in front of the principal doors of an edifice. (*Gloss. of Arch.*)

2. After the twelfth century: The church-yard. (*Ibid.*)

a-trō'-ciōus (*ciōus* as *shūs*), a. [In Fr. & Ital. *atroce*; Sp. & Port. *atroz*; from Lat. *atrox*, genit. *atrocis*; cognate with *trux*=wild, rough, savage.]

A. Ordinary Language:

1. Of deeds:

I. Excessively cruel, or enormously wicked in any other respect.

"When Catiline was tried for some *atrocious* murders . . ."—*Porteus: Beneficial Effects of Christianity*. (*Richardson.*)

"An advocate is necessary, and therefore audience ought not to be denied him in defending causes, unless it be an *atrocious* offense."—*Ayliffe: Parergon*.

2. Stern, expressive of cruelty.

"The fierce *atrocious* frown of sinewed Mars."

Thomson: Liberty, pt. ii.

3. Colloquially (in a hyperbolic and humorous sense): Very bad, as when it is said, without any real imputation of moral guilt, that one's handwriting is "atrocious."

II. Of persons: Savage, cruel, fierce, harsh, severe.

B. Technically:

**Old Medicine*. Of diseases: Very violent; angry.

a-trō'-ciōus-lỹ (*ciōus* as *shūs*), adv. [Eng. *atrocious*; suff. *-ly*.] In an atrocious manner; with much cruelty or other flagrant wickedness.

"As to my publishing your letters, I hold myself fully justified by the injury you have done me by abusing me infamously and *atrociously*."—*Lowth to Warburton*, Lett. 2.

a-trō'-ciōus-nēss (*ciōus* as *shūs*), s. [Eng. *atrocious*; *-ness*.] The quality of being atrocious.

"He [Herod] thought of John's character, the *atrociousness* of the murder, and the opinion which the world would entertain of the murderer."—*Horne: Life of St. John Baptist*, p. 218.

a-trōc'-i-tỹ, **a-trōc'-ỹ-tē*, s. [In Fr. *atrocité*; Ital. *atrocita*; Lat. *atrocitas*=fierceness.] Excessive cruelty or other flagrant wickedness; atrociousness.

" . . . in this case there was no peculiar *atrocitỹ*, no deep-seated malice, no suspicion of foul play."—*Macaulay: Hist. Eng.*, ch. xxv.

¶ It is often used in the plural for excessively cruel deeds.

" . . . the disgrace and scandal brought upon Liberty by the *atrocities* committed in that holy name."—*De Quincey: Works* (ed. 1863), vol. ii., p. 185.

āt-rō-pa, s. [In Sp. & Ital. *atropa*; from Gr. *Atropos*, one of the three Fates, infernal goddesses, supposed to determine the life of man by spinning a thread. The genus *Atropa* is so called from its deadly effect.] Nightshade, or Dwale. A genus of

bóil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðis; sin, aș; expect, Xenophon, exíst. ph = f. -cian, -tian = shan. -tion, -sion = shün; -ñion, -ñion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del.

plants belonging to the order Solanaceæ, or Nightshades. It contains the well-known species, *A. belladonna*, or Deadly Nightshade. It is three or more feet high, has its ovate leaves paired, large and small together, drooping lurid purple flowers, and black berries of the size of a small cherry, which if eaten produce delirium, dilation of the pupils of the eyes, and death. The flowers and fruit are both powerful medicinal agents. It is largely used by the Homeopathic school.

Deadly Nightshade (*Atropa belladonna*).

āt-rōph-ied, *a.* [In Fr. *atrophié*, *pa. par.* of *atrophier*; Gr. *atrophos*=not well fed; *atrophēō*=to have no food, and therefore to waste away; *a*, priv., and *trophēō*, or *trophō*=to nourish. Or from *a*, priv., and *trophē*=food, nourishment.] Unfed, not supported by their proper nourishment; hence wasting or wasted away. (It is used of muscles, nerves, &c.)

"... the muscles were in so atrophied a condition that the experiment failed."—Todd & Bowman: *Physiol. Anat.*, i. 379.

"When the eye is destroyed the optic nerve often becomes atrophied."—Darwin: *Descent of Man*, vol. i., pt. i., ch. iv.

āt-rō-phŷ, *s.* [In Fr. *atrophie*; Sp. & Ital. *atrofia*; Gr. *atrophia*.] [ATROPHIED.]

Ord. Lang. & Med.: A continual wasting of the body or its organs through disease or old age.

"Pining atrophy, Marasmus, and wide-wasting pestilence." Milton: *P. L.*, bk. xi.

āt-rō-phŷ, *v. t. & i.*

1. *Transitive*: To cause to waste away.

2. *Intransitive*: To waste or dwindle away.

ā-trōp'-ic, *a.* [Eng. *atrop(ine)*; *-ic*.] Pertaining to atropine (q. v.).

atropic acid.

Chem.: $C_9H_8O_2$. A crystalline acid obtained, together with a basic compound tropine, by the action of alkalis on atropine. (Fownes.)

āt-rō-pine, *s.* [From *atropa* (q. v.).]

Chem.: $C_{17}H_{23}NO_3$. An organic base obtained from the Deadly Nightshade, *Atropa belladonna*. It crystallizes in colorless needles, and is used in medicine. It dilates the pupils of the eye.

āt-rō-poŷs, *a.* [Gr. *atropos*=not to be turned; *a*, priv., and *tropos*=a turn; *trepō*=to turn.]

Bot.: A term used in describing the position of an ovule in the ovary. An atropous (*lit.*, an unturned ovule) is erect, with the chalaza at its base and the foramen at its apex. It is the same as ORTHOTROPOUS (q. v.). (Lindley: *Introd. to Bot.*, 3d ed., 1839, pp. 214-15.)

ā-trōŷs, *a.* [Lat. *ater* (masc.), *atra* (fem.), *atrum* (neut.)=dead black, corresponding to the Gr. *melas*. It is opposed to *niger*=glossy black.]

Botany, &c.: Pure black; black without the admixture of any other color. (Lindley.)

āt-rōŷte, ***at-rāt'e**, *v. i.* [Etym. doubtful. Probably from *at*, and Fr. *route*=an assembly, a gathering.]

1. To assemble against, to oppose.

"Ther nas prince unethe that hym myghte atroute." Robert of Glouc., p. 78. (*S. in Boucher.*)

2. To appear.

"That thu ne might no war atrute." Hule and Nyghtingale, l. 156. (*S. in Boucher.*)

***a-trŷ'**, ***at-tri'e**, *adj.* [A. S. *attor*, *atter*, *ator*, *ater*=poison, matter, pus.]

1. Purulent, containing matter. (Applied to a cankered sore.)

"... the kind of the disease, as ye may gather out of that verse, was a pestilential byle, ani attrie kind of byle, striking out in many heades or in many plukes."—Bruce: *Serm.*, fol. i. b. (Jamieson.)

2. Stern, grim.

"Fix atry phiz beneath her een." Ross: *Helenore*, p. 86. (Jamieson.)

***at-sitt'**, ***at-sitte**, ***at-sŷte**, *v. t.* [Eng. *at*; O. Eng. *sitt*=sit.] To sit against.

"In ys ryght hond ys lance he nom that cluped was Ron, Long and gret and strong ynon hym ne myghte atsytte non." Robert of Gloucester: *Chron.*, p. 174.

"That in joustes schnde atsitte the dynt of the lance." Havelok, 2,200. (Boucher.)

***at-stand'** (pret. *at-stō'de*), *v. t.* [Eng. *at*; *stand*.] To stand against, to withstand, to oppose.

"That hym ne myghte no man ne geannt atstonde." Rob. of Glouc.: *Chron.*, p. 15. (Boucher.)

***at-stō de**, pret. of verb. [ATSTAND.]

at-tāc'-cā, *s.* [Ital. *attaceo*=a sticking, a cleaving to; *attacare*=to hang, to fasten.]

Music: A direction given at the end of a movement to proceed to the next one without stopping for any intermediate pause. (Often with the word *subito*.)

at-tāch', (Eng.), **at-tē'ich** (Scotch), *v. t.* [In Fr. *attacher*=to fasten, to tie, . . . to allure, &c.; Sp. *atacar*=to lace, to tie up, to ram in, to attack, to tease; Port. *atacar*=to fasten to, to lace, to tag; *atocar*, *attacar*=to attack; Ital. *attacare*=to hang, to fasten, to apply the mind, to quarrel, to kindle war. Cognate with Eng. *ATTACK*, *TACK*, *TAKE*, &c. (q. v.).]

A. Ordinary Language:

I. To fasten, to tie, or in some similar way to connect one thing with another.

"Then, homeward, every man attach the hand Of his fair mistress."

Shakesp.: *Love's Labor's Lost*, iv. 3.

II. Irresistibly to seize on one by physical force against one's will.

1. *Lit.*: (Used specially of seizing a person or his goods by judicial authority.) [B., 1.]

(a) Of seizing himself.

"Par. I do defy thy conjurations

And do attach thee as a felon here."

Shakesp.: *Romeo and Juliet*, v. 3.

¶ It had formerly of before the offense alleged.

"You, Lord Archbishop, and you, Lord Mowbray, Of capital treason I attach you both."

Shakesp.: *2 Henry IV.*, iv. 2.

(b) Of seizing his goods. [B., 2.]

"France hath flaw'd the league, and hath attach'd Our merchants' goods at Bourdeaux."

Shakesp.: *Henry VIII.*, i. 1.

2. *Fig.* (Used of the irresistible influence of natural agencies or forces.)

"I cannot blame thee; Who am myself attach'd with weariness, To the dulling of my spirits."

Shakesp.: *Tempest*, iii. 3.

¶ The foregoing example shows the essential identity of the verbs *attach* and *attack*.

III. To cause one to adhere to another by moral instead of material force; to unite one to another by the ties of self-interest or of affection.

"God, working ever on a social plan, By various ties attaches man to man."

Cowper: *Charity*.

"The great and rich depend on those whom their power or their wealth attaches to them."—Rogers.

IV. To attribute; to ascribe.

"The other party wondered that any importance could be attached to the nonsense of a nameless scribbler of the thirteenth century."—Macaulay: *Hist. Eng.*, ch. ix.

B. Law:

1. To arrest a person by judicial authority. [A., II. 1 (a).]

¶ It is now used specially respecting the process adopted in cases of contempt of court. (See Blackstone's *Comment.*, bk. iii., ch. 27.) [ATTACHMENT.]

2. Similarly to arrest or seize upon one's goods by process of law. [A., II. 1 (b).]

at-tāch'-a-ble, *a.* [Eng. *attach*; *-able*.] Liable to be attached by legal process.

attaché (at-tāch'-ā), *s.* [Fr.] One attached to a person or thing. (Specially used with respect to an *attaché* of an embassy, one connected with an embassy, who, being of much inferior dignity to the ambassador, can move about without attracting much notice, and in consequence can often pick up items of information valuable to his chief or even to his country.)

at-tāch'-ed, *pa. par. & a.* [ATTACH.]

at-tāch'-ing, *pr. par.* [ATTACH.]

at-tāch'-mēt, ***at-tāch'-e-mēt**, *s.* [Eug. *attach*; *-ment*. In Fr. *attachement*; Ital. *attacamento*.]

A. Ordinary Language: The act of attaching; the state of being attached; that which is attached. *Specially*—

1. *Lit.*: The state of being attached to a person or thing in a literal sense.

"... and when the rest of the cranium is modified, concomitantly, for the attachment of muscles to work the jaw."—Owen: *Classif. of the Mammalia*, p. 65.

2. *Fig.*: The state of being bound to a person, a party, or a principle, by moral or other ties not of a material kind; as by affection or self-interest.

"But Friendship can vary her gentle dominion; The attachment of years in a moment expires."

Byron: *To George, Earl Delawarr.*

"... poured forth their blood for a leader unworthy of their attachment."—Macaulay: *Hist. Eng.*, ch. v.

"But though he was very unwilling to die, attachment to his party was in his mind a stronger sentiment than the fear of death."—*Ibid.*, ch. xxii.

¶ It may be used in the plural for friendship with various individuals.

"Attachments by fate or by falsehood reft."

Pringle: *Afar in the Desert*.

¶ Drawing the distinction between *inclination*, *attachment*, and *affection*, Crabb shows that *inclination* is the weakest of the three words. *Inclinations*, he says, arise of themselves, *attachments* are formed; *inclination*, moreover, has respect chiefly to things, *attachment* to either persons or things, and *affection* to persons only. "*Attachment*, as it regards persons, is not so powerful or solid as *affection*. Children are *attached* to those who will minister to their gratifications; they have an *affection* for their nearest and dearest relatives. *Attachment* is sometimes a tender sentiment between persons of different sexes; *affection* is an affair of the heart without distinction of sex. The passing *attachments* of young people are seldom entitled to serious notice; although sometimes they may ripen by long intercourse into a laudable and steady *affection*. Nothing is so delightful as to see *affection* among brothers and sisters."

B. Technically (Law):

1. *Of the ordinary courts*: The act or process of attaching, i. e., arresting a person or his goods. It is especially used of cases in which contempt of court is being shown. In some of the states attachment may be issued against an absconding debtor, and in most of them against his real and personal property.

An attachment out of Chancery is a process designed to be used to enforce answers and obedience to the decrees and orders of the Chancery Division Court.

A writ of attachment or pone is a writ issued to the sheriff requiring him to attach a person by taking gage, that is, certain of his goods, or requiring him to find security for his appearance in the court. (Blackstone: *Comment.*, bk. iii., ch. 19.)

Foreign attachment: A local custom existing in parts of England to arrest the money or goods of a foreigner within a certain liberty or city (like arrestment in Scotland), till some claims against him be satisfied.

2. *Of the Old Forest Courts*:

Court of attachments, wood-mote or forty-days' court: A court formerly held before the verderors of a forest every forty days to inquire regarding all offenders against vert and venison, and report offenses to higher courts. [REGARD, SWEINMOTE, JUSTICE-SEAT.] (Blackstone: *Comment.*, bk. iii., ch. 6.)

An attachment of the forest is the proceeding in the old English courts of attachments, wood-mote or forty-days' courts.

at-tāck', *v. t. & i.* [In Fr. *attaquer*; Sp. & Port. *atacar*; Ital. *attaccare*=to hang or fasten, . . . to engage in battle. Cognate with *attach*, this specially appearing in the Italian.]

A. Transitive:

I. Ordinary Language:

1. *Of assaults, direct or indirect, upon persons*: To make an assault on an army, a fortification, &c., with weapons of war, or on a person with material weapons of any kind.

"Unite thy forces and attack their lines."

Dryden: *Virgil's Æneid*, bk. ix.

(1) To assail a person by hostile words, writings, &c., with the view of damaging his reputation with the community or insulting himself; to censure, to find fault with.

"It would be easy to attack them. It would be hardly possible to defend them."—Macaulay: *Hist. Eng.*, ch. xxiv.

(2) To assail a person, the assailant being a thing. (Specially used of diseases.)

"On the fourth of March he was attacked by fever . . ."—Macaulay: *Hist. Eng.*, ch. xxv.

2. *Of assaults on things instead of persons*:

Specially: To attempt to gain knowledge by what may be figuratively considered as a hostile assault, on some portion of nature.

"... we have never been able to attack those parts of the sun's surroundings . . ."—*Transit of Venus*. (Times, April 20, 1875.)

II. Technically:

Mil. To attack in front and flank: To attack the salient angle or both sides of a bastion. It is also used colloquially in the army for military attacks made by bodies of men on each other.

†*B. Intransitive*: To make an assault as contradistinguished from standing on the defensive.

"Those that attack generally get the victory, though with disadvantage of ground."—Cane: *Campaigns*.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

¶ *Attack*, v. & s., is not in Bullokar's Dictionary (1656), though "attache" and "attachement" are. Richardson says that *attack* is not an old word in the English language, and that the term preceding it was *assault*.

at-täck', s. [From the verb. In Fr. *attaque*; Sp. & Port. *ataque*; Ital. *attacco*.] [ATTACK, v.]

A. Ordinary Language:

I. Of assaults, direct or indirect, on persons:

1. An assault upon an army, a place, or upon an individual with material weapons, whether natural or acquired.

"... a tumultuary attack of the Celtic peasantry."—Macaulay: *Hist. Eng.*, ch. xii.

2. An assault upon a person's feelings, reputation, &c.

"But, whenever any personal attack has been made on my lord, I have done him the best service that I could."—Macaulay: *Hist. Eng.*, ch. xxiv.

¶ It may be used where the assailant is a disease or some other thing.

"... the sudden manner in which the attack [of eruptive fever or smallpox] commences."—Dr. Andrew: *Domest. Med.*, p. 501.

II. Figuratively. Of assaults upon things:

1. When the assailant is a person. [ATTACK, v.]

"The Committee of the Royal Society laid so much stress upon this part of the attack that no less than three instruments were devoted to it by the Siam party alone."—*Transit of Venus*. (Times, April 20, 1875.)

2. When the assailant is a thing.

"... the dark rays, after having passed through the receiver, still possessing sufficient power to ignite the charcoal, and thus initiate the attack of the oxygen."—Tyndall: *Frag. of Science*, 3d ed., viii. 7, p. 191.

B. Technically:

Mil.: Any general assault or onset made to gain a post or break a body of troops. (James.)

Attack and defense: A part of the drill for recruits learning the sword exercise. It is carried on first on horseback; afterward, when more proficiency is gained, at a walk, and finally, "in speed," which, however, does not exceed three-quarters of that which a trained soldier would attain were he really pursuing or being pursued. (*Ibid.*)

False attack: One carried on to compel the enemy to divide his forces, thus weakening his position in front of what is meant to be the real attack. (*Ibid.*)

Regular attack: One carried out according to military rules. (*Ibid.*)

at-täck'-a-ble, a. [Eng. *attack*; -able. In Fr. *attaquable*.] In a condition to be attacked.

at-täck'ed, pa. par. & a. [ATTACK, v.]

at-täck'-ēr, s. [Eng. *attack*; -er.] One who attacks.

"To so much reason the attackers pretend to answer."—Elphinstone: *Prin. of Eng. Lang.*, ii. 468.

at-täck'-ing, pr. par. & a. [ATTACK, v.]

"... it would have been difficult for an attacking army to force a passage."—Froude: *Hist. Eng.*, vol. iii., p. 144.

at-täck'-öl-ite, s. [In Ger. *attakolith*. From Gr. *attakeus*, a salmon which the mineral resembles in color. (Dana.)] A pale-red mineral, of which the chief constituents, according to Blomstrand, are: Phosphoric acid, 36.06; alumina, 29.75; lime, 13.19; and water, 6.90. It occurs in Scania, in Sweden.

ät-tä-cūs, s. [Lat. *attacus*; Gr. *attakos* and *atakēs*, a kind of locust.] A genus of moths belonging to the family Bombycidae. *A. cynthia* is the Ailanthus Silkworm, so called because its caterpillar

Attacus Cynthia. (One-third real size.)

lar feeds upon the Ailanthus-tree (*Ailanthus glandulosus*). It is a hardy insect, living well in this country, though it is a native of China. The Ailanthus is hardy also; and the rearing of the Attacus silkworm upon it is an easy process. (Wood, &c.)

ät-tä-gäs, ät-tä-gën, s. [In Gr. *attagas*, a long-billed bird of the grouse family, fond of the water, and esteemed a great delicacy. The Godwit (?). (Liddell & Scott.) Also Gr. *attagën*; Lat. *attagen*=a hazel-ben or heath-cock (*Tetrao bonasia*, Linn., or *T. alchata*, Linn.), found in Spain, the south of France, &c. (Dr. Wm. Smith.)]

Ornith.: The *Attagas* of Buffon, the *Attagen* of Aldrovandi, is believed by Cuvier to be the young or the female of *Tetrao bonasia* mentioned before, and the *Attagen* or *Ganga* to be the pintailed grouse (*T. alchata*, Linn.). The latter of these is found all round the coasts of the Mediterranean.

ät-tä-ghan, s. [ATAGHAN, YATAGHAN.]

at-tā'in, *at-tā'ine, *at-tē'ine, *at-tē'yne, v. i. & t. [Apparently from Lat. *attineo*=(1) to hold on, to hold fast, delay, (2) to stretch to, to reach to; from *ad*=to, and *teneo*=to hold fast, to hold, . . . to reach, attain. The corresponding word in Mod. & O. Fr. is *atteindre*=to attain, to reach, overtake, strike, catch, equal, come to; Port. *atingir*: these are not from Lat. *attineo*, but from *attingo*=(1) to touch, (2) to assault, to reach, to arrive at: *ad*=to, and *tango*=to touch, to reach, to strike. The Eng. *attain* agrees better in signification with the Fr. *atteindre* and Lat. *attingo* than with Lat. *attineo*, though its form is modified from the last-mentioned verb.]

A. Intransitive:

1. To reach, grasp, or arrive at some object of pursuit or of desire, physical, mental, moral, or spiritual.

"... the more part advised to depart thence also, if by any means they might attain to Phenice, . . ."—Acts xxvii. 12.

"... have not attained unto the days of the years of the life of my fathers in the days of their pilgrimage."—Gen. xlvii. 9.

"... a man of understanding shall attain unto wise counsels."—Prov. i. 5.

"... how long will it be ere they attain to innocency?"—Hos. viii. 5.

"If by any means I might attain unto the resurrection of the dead."—Phil. iii. 11.

"But to her purpos schul they never atteyne."—Chaucer: C. T., 13,327.

2. It is used also of material objects in process of reaching a certain state.

"Milk will soon separate itself into cream, and a more serous liquor, which, after twelve days, attains to the highest degree of acidity."—Arbuthnot: *Aliments*.

¶ It is rarely followed by an infinitive. In the subjoined example "attain to know" is=attain to the knowledge of.

"... and wherein lies
The offense that man should thus attain to know."
Milton: P. L., bk. ix.

B. Transitive (formed from the intransitive verb by the omission of the preposition to):

I. Of persons:

1. *Lit.*: To reach a place at which one seeks to arrive, or a person with or at whom one wishes to be.

"Canaan he now attains; I see his tents
Pitch'd above Sichem, and the neighboring plain
Of Moreh."—Milton: P. L., bk. xii.

"The earl hoping to have overtaken the Scottish king, and to have given him battle; but not attaining him in time, set down before the castle of Aton."—Bacon.

2. *Fig.*: To reach or grasp any object, physical, mental, moral, or spiritual, at which one is aiming.

¶ To say that a person attains a thing is not the same as to say that he obtains it. *Attain* implies that one is making active efforts, or at least indulging earnest wishes, to gain the object; while *obtain* can be used though he be passive, or even indifferent.

"The eminence on which her spirit stood,
Mine was unable to attain."
Wordsworth: *Excursion*, bk. iii.

II. Of things: To reach.

"Things that rigour never sholde atteine."
Chaucer: C. T., 11,087.

"It is when the sun has attained its greatest height that such scenes should be viewed."—Darwin: *Voyage round the World*, ch. xxi.

at-tāin-a-bil'-i-tŷ, s. [Eng. *attainable*, -ity; or *attain*, and -ability.] Attainableness. (Coleridge.)

at-tā'in-a-ble, a. [Eng. *attain*; -able.]

1. Able to be attained; able to be reached by proper effort.

"... tending all
To the same point—attainable by all:
Peace in ourselves, and union with our God."
Wordsworth: *Excursion*, bk. iv.

2. *Less properly*: Obtainable; that is, which may possibly be reached without its being implied that effort has been put forth at all.

at-tā'in-a-ble-ness, s. [Eng. *attainable*; -ness.] The quality of being attainable.

"Persons become often enamored of outward beauty, without any particular knowledge of its possessor, or its attainableness by them."—Cheyne.

at-tā'in-dēr, s. [From O. Fr. *atteindre*=to ~~cor~~rupt or attaint, or to reach, to strike, to hit, to injure; Port. *atingir*; from Lat. *attingo* (ATTAIN). In this case the metaphor would be of the law overtaking, touching, and seizing a criminal whom it had been pursuing. Wedgwood and Mahn are in favor of this etymology. Blackstone, Webster, Richardson, &c., connect *attainder* and *attaint* with Lat. *attinguo*=to moisten, to sprinkle; and not with *attingo*=to touch. *Attingo* is from *ad*=to, and *tingo*, *tango*=to wet, . . . to dye; Gr. *tengō*=to wet, . . . to dye.] [TINGE.]

A. Ordinary Language:

1. The act of attainting a criminal; the state of being so attainted.

"A bill for reversing the attainder of Stafford was passed by the Upper House, . . ."—Macaulay: *Hist. Eng.*, ch. iv.

2. That which constitutes, establishes, or declares an attainer; an actor or a bill of attainer.

"... the great Act of Attainder."—Macaulay: *Hist. Eng.*, ch. xii.

"The terrible words, Bill of Attainder, were pronounced . . ."—*Ibid.*, ch. xxii.

3. *Figuratively*: Taint upon one's character, whether of proved crime or fault, or of suspicion only.

"So smooth he daub'd his vice with show of virtue
That
He liv'd from all attainer of suspect."
Shakesp.: *Richard III.*, iii. 5.

B. Law: The state or condition of being attainted, which, according to Blackstone, meant "stained" or "blackened."

I. In the United States: The Constitution of the United States requires that "No bill of attainder shall be passed, and no attainer of treason, in consequence of a judicial sentence, shall work corruption of blood or forfeiture except during the life of the person attainted."

II. In England:

Formerly. Attainder, in its old and more rigorous form, followed, not when a criminal was convicted of a capital offense, but when sentence of death upon him was pronounced. No formalities were then needed to attaint him; the attainer followed as a natural consequence from the sentence. He was regarded as being out of the pale and protection of the law. He was not allowed to be witness in any case. Nay, more, there were forfeiture of his real and personal estates, and the "corruption of his blood;" the last-mentioned phrase implying that not merely could he not inherit any property from his ancestors, but he could not transmit it to any descendants, all of whom, even to the remotest generations, were thus to suffer for a crime in which they had taken no part. (Blackstone: *Comment.*, bk. iv., ch. 29, &c.)

at-tā'ined, pa. par. & a. [ATTAIN.]

at-tā'in-ing, pr. par. [ATTAIN.]

at-tā'in-mēt, s. [Eng. *attain*; -ment.]

I. The act of attaining.

1. The act or process of reaching any place.
2. The act or process of reaching any object of desire.

"The great care of God for our salvation must appear in the concern He expressed for our attainment of it."—Rogers.

II. The state of being attained.

"Education in extent more large, of time shorter, and of attainment more certain."—Milton.

III. That which is attained. Specially—

In the plural: Knowledge, acquaintance with branches of science or literature.

"His manners were polished, and his literary and scientific attainments respectable."—Macaulay: *Hist. Eng.*, ch. xiii.

at-tā'int, *at-tā'ynte, *at-tē'ynt, *a-tēynt, *as-tē'ynte, v. t. [Fr. *atteint*, s.; from O. Fr. *attaint*, *attainct*, pa. par. of *atteindre*; Mod. Fr. *atteindre*.] [ATTAINDER.]

A. Ordinary Language:

1. To disgrace, specially in the way described under B., I. [ATTAINER.]

"Was not thy father, Richard Earl of Cambridge,
For treason executed in our late king's days;
And by his treason stand'st not thou attainted,
Corrupted, and exempt from ancient gentry?"
Shakesp.: 1 Henry VI., ii. 4.

"If we try the Act which attainted Fenwick . . ."—Macaulay: *Hist. Eng.*, ch. xxiii.

¶ It is often followed by *of* standing before the crime.

"They had conspired against the English government, and had been attainted of treason."—Macaulay: *Hist. Eng.*, ch. i.

2. *Fig.*: To taint, to stain, to dim, obscure, to blacken, to darken, as an attainer was supposed

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aș; expect, Xenophon, exist. ph = f
-cian, -tian = șan. -tion, -sion = șūn; -țion, -șion = zhūn. -tious, -cious, -sious = șūș. -ble, -dle, &c. = bēl, dēl.

to stain or blacken the person against whom it was directed. [ATTAINDER.] Used—

(a) Of a person's reputation.

"How would the sons of Troy, in arms renown'd,
And Troy's proud dames, whose garments sweep the
ground,

Attaint the luster of my former name,
Should Hector basely quit the field of fame?"

Pope: *Homer's Iliad*, bk. vi. 562-5.

"For he attaints that rival's fame
With treason's charge . . ."

Scott: *Marmion*, ii. 28.

(b) Of anything lustrous in nature capable of being dimmed; or anything, whether lustrous or not, capable of being tainted or stained.

"His warlike shield all closely covered was

* * * * *

For so exceeding shone his glistening ray
That Phoebus' golden face it did attaint,
As when a cloud his beames did overlay."

Spenser: *F. Q.*, I. vii. 33, 34.

3. To corrupt, as the blood of a person under attainder was supposed to be legally "corrupted." [ATTAINT, *particip. adj.* (2).]

B. Old Law:

*1. To declare a jury infamous, and inflict on them a punishment severe even to extravagance, on account of their having given a false verdict. [See ATTAINT, s. B. 1.] (*Blackstone: Comment*, bk. iii., chaps. 23-25.)

2. To place one under an attainer, which is done upon sentence of outlawry, or on that of death for treason or felony. (*Blackstone: Comm.*, bk. iv. 29.) [ATTAINDER.] Formerly a man might be attainted in two ways: (1) By appearance, by which was meant that he really presented himself in the court, and was subject to attainer, having confessed his crime, been vanquished in battle, or adjudged guilty by a verdict. Or (2) by process, when having fled and failed to answer, after being five times called publicly in the county, he was at last outlawed for non-appearance.

[The Constitution of the United States, Article, I., Section IX., Clause 3, provides that "no bill of attainder or *ex post facto* law shall be passed."

at-tā'int, *at-tē'inct, s. [From the verb. In Fr. *atteinte*; O. Fr. *attainte*.] [ATTAINT, v.]

A. Ordinary Language:

I. Literally:

1. *Gen.*: A stain, a blot. (Now shortened into TAINT.)

"No man hath a virtue that he hath not a glimpse of; nor any man an *attaint*, but he carries some stain of it."—*Shakesp.: Troil. and Cress.*, i. 2.

2. *Spec.*: In the legal sense described under B., 1.
". . . shall be sued of an *atteinet*, and bound to appeare at the Starre Chamber."—*Holinshed: Chron.*, bk. ii., ch. iv.

*II. *Fig.*: Anything injurious; as illness, weariness.

"Nor doth he dedicate one jot of color
Unto the weary and all-watched night;
But freshly looks and overbears *attaint*
With cheerful semblance."

Shakesp.: *Henry V.*, iv., Chorus.

B. Technically:

1. *Old Law*: A process commenced against a former jury for bringing in a false verdict. The jury empaneled to try such a case was the grand one, consisting of twenty-four of the best men in the county; the appellation "grand" being used to distinguish it from the "petit," or small jury—the first one. If convicted, they were pronounced infamous, their goods were forfeited, their wives and families were turned out of doors, their houses razed, their trees rooted up, &c. At length the practice of setting aside verdicts, upon motion made for the purpose, and granting new trials, superseded the old system of attainments, which was finally swept away by 4 Geo. IV., c. 50. (*Blackstone: Comment.*, bk. iii., ch. 25.)

2. *Veterinary Medicine*: A blow or wound on the hinder foot of a horse.

†at-tā'int, *particip. adj.* [Fr. *atteint*; O. Fr. *attaint*.] [ATTAINT, v.]

1. Under an attainer; attainted.

"He is then [when convicted of a capital crime and sentenced to die] called *attaint*, *attinctus*, stained or blackened."—*Blackstone: Comment.*, bk. iv., ch. 29.

2. Corrupted.

"My tender youth was never yet *attaint*,
With any passion of inflaming love."

Shakesp.: *Henry VI.*, v. 5.

at-tā'int-ēd, *at-tā'ynt-ēd, *pa. par. & a.* [ATTAINT, v.]

As participial adjective:

" . . . there are more *attaynted* landes, concealed from her Majestie, then she hath now possessions in all Ireland."—*Spenser: Present State of Ireland*.

"Whether Flora MacDonald was justified in concealing the *attainted* heir of the Stuarts, . . ."—*Macaulay: Hist. Eng.*, ch. v.

at-tā'int-ing, *pr. par.* [ATTAINT, v.]

at-tā'int-mēt, s. [Eng. *attaint*; -ment.] The state of being attainted.

"This manor and castle was made over by Henry VIII. to that great man [Cardinal Wolsey], upon whose *attaintment*, that sacrilegious prince re-annexed it to the crown."—*Ashmole. Berkshire*, i. 45.

at-tā'in-türe, s. [Eng. *attaint*; -ure.] The act of attainting; the state of being attainted; the writ or act attainting one.

"Hume's knavery will be the duchess's wreck,
And her *attainture* will be Humphrey's fall."

Shakesp.: *2 Henry VI.*, i. 2.

āt-tal, s. [O. E. *adel*, A. S. *adela*, mud.] Waste matter from mines; refuse. [ATTLE.]

at-tal'-ē-a, s. [From Attalus III., Philometer, king of Pergamus.] A genus of palms belonging to the section Coccothraustes. The species are found in the tropical parts of South America. *A. funifera* is called by the Brazilians *Piassaba*. Its fibers afford the finest cordage for the navy of their country. Here it is used for brooms to sweep the streets. The seeds are called *coquilla nuts*. They are hard, and being large, are used in turnery for making the handles of doors, umbrellas, and other articles. *A. compta* is the Pindavo Palm of Brazil. The seeds are eaten as a delicacy, and the leaves used for thatching, for making hats, &c. *A. speciosa* and *A. excelsa* furnish nuts, which are burnt to dry the juice of *Siphonia elastica*, whence India-rubber is obtained. *A. cohune*, a native of Honduras, produces nuts called *cahoun nuts*, which furnish a valuable oil.

*āt-tar (1), s. [ATTER.]

āt-tar (2), †a'-tar, †ōt'-tō. [In Hindoostanee. Mahratta, &c., *attār*; from Arab. *itr*=perfume. *a'tira*=to smell sweetly.] Essence, especially of roses.

attar or otto of roses. The essential oil obtained from roses by distillation. It is said that 100,000 roses yield only 180 grains of attar; hence the temptation to adulterate it is very great. The oil is first pale-green, then, after being kept, it becomes darker, and exhibits various tints of green, yellow, and red. It is manufactured in various villages and towns of Turkey just south of the Balkans, as well as in India.

"And attar of rose from the Levant."

Longfellow: *A Wayside Inn; Prelude*.

attar-gul, atar-gul. [(1) *Attar*, and (2) *gul*, in various Indian languages=a rose.] The same as ATTAR OF ROSES (q. v.).

" . . . festooned with only those rarest roses from which the *Attar Gul*, more precious than gold, is distilled. . . ."—*Moore: Lalla Rookh; Light of the Haram*.

*at-ta'sk, v. t. [Old form of TASK (q. v.)] To take to task, to blame.

"You are much more *attask'd* for want of wisdom,
Than prais'd for harmful mildness."

Shakesp.: *King Lear*, i. 4.

*at-tā'ste, *a-tā'st, v. t. [O. Fr. *taster*.] [TASTE, v.] To taste.

"This is his own staff, thou seyst, therof he shall *atast*."—*Chaucer: The Pardoner and Tapstere*. (Richardson.)

"For gentlemen (they said) was nought so fit,
As to *ataste* by bold attempts the cup
Of conquest's wine, whereof I thought to sup."

Mirror for Mag., p. 297.

*ätte, *at'-tēn, *āt-tān, a contraction for *at the*. [AT.] At, at the.

"Kyng William *atte laste*."

R. Glouc., p. 379. (R. T. in Boucher.)

*ätte, *prct. of v.* [HATTE.]

*at-tē'ich, v. t. [ATTACH.] (Scotch.)

*at-tē'ine, v. t. & i. [ATTAIN.]

at-tēl'-a-būs, s. [From Lat. *attelabus*; Gr. *at-telabos*=a small, wingless species of locust.]

Entom.: A genus of Coleoptera (Beetles), belonging to the family Curculionidae (or Weevils). It was originally introduced by Linnaeus with the character, "Head attenuated, behind inclined. Antennae somewhat thick toward the apex." In the 13th edition of his *Systema Naturae* (1767), as many as thirteen species are enumerated. Most of these, however, are now transferred to other genera of Coleoptera. In Stephens' *Illustration of British Entomology* (1828), only one species is mentioned, *A. curculionoides*.

āt-tēle, v. t. [ETTLE.]

†at-tēm'-pēr, v. t. [In O. Fr. *attemperer*; Ital. *attemperare*; Lat. *attempero*=to fit, to adjust, to accommodate; from *ad*=to, and *tempero*=duly to proportion.] [TEMPER.]

1. To mix anything with another in just proportions; to regulate.

2. To temper; to dilute or reduce to a more moderate strength or amount anything that is excessive.

"Nobility *attempers* sovereignty, and draws the eyes of the people somewhat aside from the line royal."—*Bacon*.

3. To soften; to mollify.

"His early providence could likewise have *attempered* his nature therein."—*Bacon*.

"Those smiling eyes, *attemp'ring* every ray,
Shone sweetly lambent with celestial day."

Pope: *Eloisa to Abelard*, 63-4.

4. To fit to something else.

"Phemius! let acts of gods and heroes old,
Attempered to the lyre, your voice employ."

Pope: *Homer's Odyssey*, i. 436.

*at-tēm'-pēr-ānce, *at-tēm'-pēr-āunçe, s. [Eng. *attemper*; -ance.] Temperance, moderation. 1. *Gen.*: In all things.

at-tēmt', *at-tēmt'e (p mute) v. t. & i. [In Old Fr. *attempter*, *atempter*; Mod. Fr. *attenter*,

*āte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre. unite, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

Prov. & Port. *attentar*: Sp. *atentar*; Ital. *attentare*; Lat. *attento*=to reach after, to try; freq. from *attendo*= . . . to attend (ATTEND): *ad*=to, and *tendo*=to stretch.]

A. Transitive:

I. Gen.: To make trial or experiment of; to try, to endeavor.

1. (Followed by an adjective of the person or thing of which one makes trial or experiment, or after whom or which one puts forth an endeavor.)

"Something attempted, something done,
Has earned a night's repose."
Longfellow: The Village Blacksmith.

2. (Followed by the infinitive.)

"The government regarded these infant colonies with aversion, and attempted violently to stop the stream of emigration."—*Macaulay: Hist. Eng.*, ch. i.

II. Specially:

*1. To try in the sense of tempting; to tempt. (In this sense the word *tempt* has taken its place.)

"Who in all things wise and just,
Hindered not Satan to attempt the mind
Of man, with strength entire and free-will armed."
Milton: P. L., x. 8.

2. To attack.

"Tript me behind, got praises of the king,
For him attempting who was self-subdued."
Shakesp.: Lear, ii. 2.

B. Intrans.:

"I have been so hardy to attempt upon a name, which, among some, is yet very sacred."—*Glanville: Scopsis Scientifica*.

at-tēpt', *at-tēpt'e, (p mute), s. [From the verb.]

1. An endeavor, an effort.

"An attempt was made with great success to set up iron works."—*Macaulay: Hist. Eng.*, ch. xi.

2. An attack, an assault.

"If we be always prepared to receive an enemy, we shall long live, in peace and quietness, without any attempts upon us."—*Bacon*.

at-tēpt-a-bīl'-i-tŷ (p mute), s. [Eng. *attempt*; *ability*.]

1. Capability of being attempted.

2. A person or persons, or a thing, or things capable of being attempted.

"Short way ahead of us, it is all dim; an nnwonnnd skein of possibilities, of apprehensions, *attemptabilities*, vague-looming hopes, . . ."—*Carlyle: Heroes and Hero-Worship*, Lect. vi.

at-tēpt'-a-ble, **at-tēpt'-i-ble** (p mute), a. [Eng. *attempt*; *-able*, *-ible*.] Capable of being attempted; capable of being attacked.

"The gentlemen vouching his to be more fair, virtuous, wise, and less *attemptable* than the rarest of our ladies."—*Shakesp.: Cymbeline*, i. 4.

at-tēpt'-tāte (p mute), s. [Lat. *attentatum*, neut. of *attentatus*, pa. par. of *attento*.] In Fr. *attentat*.] An attempt, an endeavor, especially to commit a crime. In 1589, Puttenham ranked this word as one quite recently introduced in the language. It arose, however, somewhat earlier.

"To forbear that *attemptate*."—*Sadler* (A. D. 1543), in *Froude: Hist. Eng.*, vol. iv., p. 241.

at-tēpt'-ēd (p mute), *pa. par.* & *a.* [ATT-TEMPT, v.]

at-tēpt'-ēr (p mute), s. [Eng. *attempt*; *-er*.] One who attempts. *Specially:*

1. One who assails a person or his virtue; an assailant; a tempter.

"The Son of God, with godlike force endued,
Against th' *attempter* of thy Father's throne."
Milton: P. R., iv. 603.

2. One who endeavors to do anything.

"Yon are no factors for glory or treasure, but disinterested *attempters* for the universal good."—*Glanville: Scopsis Scientifica*.

at-tēpt'-i-ble, (p mute), a. [ATTEMPTABLE.]

at-tēpt'-īng (p mute), *pr. par.* & *s.* [AT-TEMPT, v.]

A. As *pr. par.*: (In senses corresponding to those of the verb).

B. As *subst.*: Perpetration, commission (in a bad sense, followed by *of*). (*Scotch.*)

"The *attempting* of sic foul and shameful enormities."—*Acts Jas. VI.*, 1581 (ed. 1814), p. 217. (*Jamieson.*)

at-tēpt'-lēss (p mute), a. [Eng. *attempt*; *-less*.] Without trying. (*Marlowe: 1 Tamburlaine*, ii. 5.)

at-tēnd', *v. t. & i.* [In Fr. *attendre*=to wait, stay, put off, delay; Prov. *attendre*; Sp. *atender*; Port. *attender*; Ital. *attendere*. From Lat. *attendo*=(1) to stretch or bend anything material—a bow, for example; (2) to stretch or bend the mind to: *ad*=to, and *tendo*=to stretch, implying that one who attends to any person or thing is as if he stretched out his neck to hear and see more effectively.]

A. Transitive:

I. Lit. (When the subject of the verb is a person.)

1. To turn the thoughts toward; to apply the mind to.

(a) To bend the desires toward attaining any object.

"Their hunger thus appeased, their care *attends*
The doubtful fortune of their absent friends."
Dryden: Virgil; Aeneid i. 299.

(b) To fix the mind upon anything; to listen to anything; to turn the eyes fixedly upon it, or reflect upon it earnestly.

"Sing then, and Damon shall *attend* the strain."
Pope: Pastorals; Spring, 29.

2. To wait upon or for a person.

(i.) *In a good sense:*

(a) To wait upon a person as a servant does upon a master. It may be used when a servant ministers to his master at home, but is more frequently employed when he accompanies him on a journey.

" . . . his companion, youthful Valentine,
Attends the emperor in his royal court."
Shakesp.: Two Gent. of Ver., i. 3.

" . . . with devoted loyalty, though with a sore heart and a gloomy brow, he prepared to *attend* William thither."—*Macaulay: Hist. Eng.*, ch. xxiii.

(b) To come to a superior when summoned; to present one's self in obedience to a summons.

"The lord mayor and the sheriffs of London were summoned to *attend* the king."—*Macaulay: Hist. Eng.*, ch. ix.

(c) To wait for the expression of a superior will. It is used by Milton in an analogous sense for the Son of God reverentially and submissively attending to the will of his Heavenly Father.

" . . . as a sacrifice
Glad to be offer'd, He *attends* the will
Of his great Father." *Milton: P. L.*, bk. iii.

(d) To wait upon a person in a professional capacity, as a physician may do upon a patient.

"The fifth had charge sick persons to *attend*,
And comfort those in point of death which lay."
Spenser.

(ii) *In a bad sense:*

†(a) To accompany with hostile intentions.

"He was at present strong enough to have stopped or *attended* Waller in his western expedition."—*Clarendon*.

(b) To lay wait for.

"Thy interpreter, full of despight, bloody as the hunter, *attends* thee at the orchard end."—*Shakesp.: Twelfth Night*, iii. 4.

3. To wait for or expect an event, whether one desire or deprecate its coming.

¶ This signification is possessed also by the French *attendre*.

"Three days I promis'd to *attend* my doom,
And two long days and nights are yet to come."
Dryden: Indian Emperor, iii. 2.

"So dreadful a tempest, as all the people *attended* therein the very end of the world and judgment day."—*Raleigh: History*.

II. Fig. (When the subject of the verb is a thing.)

1. To accompany, to be appendant to.

"Dangers of every shape and name
Attend the followers of the Lamb."
Cowper: Olney Hymns, xxxvii.

2. To follow upon, to be consequent to.

"Secure of conquest, where the prize
Attends superior worth."
Cowper: Promotion of Thurlow.

3. To await, to be in store for.

"To him who hath a prospect of the state that *attends* all men after this, the measures of good and evil are changed."—*Locke*.

B. Intransitive:

I. To bend the mind to, or concentrate it upon, some object of study or pursuit.

"Since man cannot at the same time *attend* to two objects, if you employ your spirit upon a book or a bodily labor, you have no room left for sensual temptation."—*Taylor*.

II. To yield attention to; to listen to anything audible, or turn the eye fixedly on anything visible, "Hear, ye children, the instruction of a father, and *attend* to know understanding."—*Prov.* iv. 1.

¶ It is used in Scripture in the sense of God's "hearing a prayer" and answering it.

"But verily God hath heard me: he hath *attended* to the voice of my prayer."—*Ps.* lvi. 19.

III. To be present or within call; to wait upon, as a servant may do on a master.

(1) As a companion or servant of the person accompanied, or to render professional service, sacred or secular.

"His squire, *attending* in the rear,
Bore high a gauntlet on a spear."
Scott: Lay of the Last Minstrel, iv. 18.

"Look how thy servants do *attend* on thee,
Each in his office ready at thy beck."
Shakesp.: Taming of the Shrew; Induction, ii.

Or (2), in obedience to a summons, in compliance with a wish.

"The nurse *attended* with her infant boy,
The young Astyanax, the hope of Troy."
Pope: Homer's Iliad, vi. 486.

IV. To wait for, to wait, to delay. [See Fr. *attendre* in the etym.]

"Plant anemones after the first rains, if you will have flowers very forward; but it is surer to *attend* till October."—*Evelyn*.

¶ (a) Crabb thus distinguishes between the verbs to *attend*, to *mind*, to *regard*, to *heed*, and to *notice*:—*Attend* is the generic; the rest are specific terms. "To *mind* is to attend to a thing, so that it may not be forgotten; to *regard* is to look on a thing as of importance; to *heed* is to attend to a thing from a principle of caution; to *notice* is to think on that which strikes the senses. . . . Children should always *attend* when spoken to, and *mind* what is said to them; they should *regard* the counsels of their parents, so as to make them the rule of their conduct, and *heed* their warnings, so as to avoid the evil; they should *notice* what passes before them, so as to apply it to some useful purpose."

(b) *Attend* to and *wait upon* are thus discriminated: "*Attendance* is an act of obligation; *waiting on*, that of choice. A physician *attends* his patient; a member *attends* on Parliament; one gentleman *waits upon* another."

(c) The following is the distinction between to *attend*, to *hearken*, and to *listen*: "*Attend* is a mental action; *hearken*, both corporeal and mental; *listen*, simply corporeal. To *attend* is to have the mind engaged on what we hear; to *hearken* and *listen* are to strive to hear. People *attend* when they are addressed; they *hearken* to what is said by others; they *listen* to what passes between others." (*Crabb: Eng. Synon.*)

*at-tēnd', s. [ATTEND, v.] Attendance.

at-tēnd'-ançe, *at-tēnd'-āunçe, s. [O. Fr. *attendance*.]

I. The act of attending.

1. The act of waiting upon a person or upon people; service, ministry; as that of—

(i.) A servant waiting upon a master, or followers upon a chief.

"And the meat of his table, and the sitting of his servants, and the *attendance* of his ministers and their apparel . . ."—*2 Chron.* ix. i.

"Attendance is a bribe, and then 'tis bought."

Dryden: The Hind and Panther, iii.

¶ For the difference between *attendance* and *waiting upon*, see ATTEND, IV. (b).

(ii.) A professional man making a point of being present at proper times at the place where he discharges his public duties.

" . . . another tribe, of which no man gave *attendance* at the altar."—*Heb.* vii. 13.

"The next morning he held a Privy Council, discharged Chief Justice Keating from any further *attendance* at the board, . . ."—*Macaulay: Hist. Eng.*, ch. xii.

¶ (a) *In attendance*: Attending, attendant upon. "A gnard of honor was everywhere in *attendance* on him."—*Macaulay: Hist. Eng.*, ch. xxiii.

(b) *To dance attendance upon*: To wait upon a superior who is regardless of the comfort of his inferiors, or a government similarly inconsiderate, and find one's self kept in lively moment, like that of a dancer, no profitable result, to the performer at least, following from all this activity.

"I had thought

They had parted so much honesty among 'em,
At least, good manners, as not thus to suffer
A man of his place, and so near our favor,
To *dance attendance* on their lordship's pleasures,
And at the door, too, like a post with packets."
Shakesp.: Henry VIII., v. 2.

2. Concentration of the mind upon; attention.

" . . . give *attendance* to reading, to exhortation, to doctrine."—*1 Tim.* iv. 13.

3. Expectation.

"That which causeth bitterness in death, is the languishing *attendance* and expectation thereof, ere it come."—*Hooker*.

II. The state of being attended.

III. The persons attending; a train; a retinue. (*Milton: P. L.*, bk. x.)

*at-tēnd'-an-çy, s. Attendance; a following or retinue.

"It sheweth what honor is fit for prelates, and what *attendancy*."—*Hooker*.

"The Secretary shared largely in the attentions which were paid to his chief."—*Macaulay: Hist. Eng.*, ch. xxiii.

II. The state of being attended to.

"... the labor bestowed by him upon what he has heretofore and now laid before the public, entitled him to candid attention . . ."—*Wordsworth: Preface to the Excursion*.

III. The power, ability, or faculty which man possesses to attend to anything. [B. 1.]

"Hardly any faculty is more important for the intellectual progress of man than the power of attention."—*Darwin: Descent of Man*, pt. i., ch. ii.

¶ *To draw or to call the attention to*: To point out to any one an object calculated to a greater or less extent to attract the notice.

"My attention was called to this subject."—*Darwin: Descent of Man*, pt. i., ch. i.

B. Technically:

1. *Mental Phil.*: Intelligent consciousness voluntarily applied; consciousness concentrated in order intellectually to conquer a particular object; the positive act of concentrating consciousness.

"Attention is consciousness and something more. It is consciousness voluntarily applied, under its law of limitations, to some determinate object; it is consciousness concentrated."—*Sir W. Hamilton: Metaph.*, vol. i., p. 238.

"Attention is consciousness applied by an act of will or desire under a particular law. . . . This law, which we call the law of limitation, is, that the intention of our knowledge is in the inverse ratio of its extension—in other words, that the fewer objects we consider at once, the clearer and more distinct will be our knowledge of them."—*Ibid.*, p. 246.

"Attention, then, is to consciousness what the contraction of the pupil is to sight; or to the eye of the mind what the microscope or telescope is to the bodily eye. The faculty of attention is not, therefore, a special faculty, but merely consciousness acting under the law of limitation to which it is subjected. But whatever be its relation to the special faculties, attention doubles all their efficiency, and affords them a power of which they would otherwise be destitute. It is, in fact, as we are at present constituted, the primary condition of their activity."—*Ibid.*, p. 248.

2. *Mil.*: A command given to soldiers, who for a time have been permitted to "stand at ease," to resume a more normal military attitude. When "Attention" is ordered, the hands are to fall smartly down the outside of the thighs, and the right foot to be brought up on a level with the left.

at-tēn'-tīve, *at-tēn'-tīve, *a.* [Fr. *attentif*.]

1. *Of persons*: With the mind fixed on the object to which the person is said to be attending; heedful. If the object be one of which the eye takes cognizance, then the eye is directed keenly to it; if one cognizable by the ear, then the ear is similarly intent; if on a book, then the eye and the mental powers are in operation; if its own thoughts are the subject of reflection, then the mind introverted becomes vividly conscious of its own working.

"... Knowledge dwells
In heads replete with thoughts of other men;
Wisdom in minds attentive to their own."
Cowper: Task, bk. vi.

¶ It may be used also figuratively of God.

"... let now thine ear be attentive to the prayer of thy servant, . . ."—*Nehem.* i. 11.

2. Of things:

"I bring a trumpet to awake his ear;
To set his sense on the attentive bent,
And then to speak."
Shakesp.: Troil and Cress., i. 3.

"Its various parts to his attentive note."
Cowper: Tirocinium.

at-tēn'-tīve-lī, *adv.* [Eng. *attentive*; -ly.] In an attentive manner; heedfully; with the mind fixed on what is in progress.

"Hear *attentively* the noise of his voice, and the sound that goeth out of his mouth."—*Job* xxxvii. 2.

at-tēn'-tīve-nēss, *s.* [Eng. *attentive*; -ness.] The state or quality of being attentive; attention.

"... at the relation of the Queen's death, . . . bravely confessed and lamented by the King, how *attentively* wounded his daughter."—*Shakesp.: Winter's Tale*, v. 2.

†at-tēnt'-lī, *adv.* [Eng. *attent*; -ly.] In an attentive manner; attentively.

"Those who *attēntly* regard a locust or a caterpillar . . ."—*Barrow*, vol. ii., Sermon 6.

at-tēn'-u-ant, *a. & s.* [In Fr. *attēnuant*; Sp. *atenuante*; Port. *atenuante*; Lat. *attēnuans*, *pr. par.* of *attēnuo*=to make thin.] [ATTENUATE.]

A. *As adj.*: That which has the power of making a liquid thin, or diluting it.

"They put into the stomach those things that be *attēnuant*, incisive, and sharp, for to provoke and stir up the appetite."—*Holland: Plutarch*. (*Richardson*.)

B. *As substantive (Pharm.)*: That which possesses the power of imparting to the blood a more thin and fluid consistency than it previously possessed. Water, and other aqueous fluids, have this property to a greater or less extent. (*Castle*.)

at-tēn'-u-āte, *v. t.* [From Lat. *attēnuatus*, *pa. par.* of Lat. *attēnuo*=to make thin; *ad*=to, and *tēnuo*=to make thin; *tēnuis*=thin. (THIN.) The Fr. *attēnuar*, Sp. *atenuar*, Port. *atenuar*, Ital. *attēnuare* (*pa. par.* *attēnuato*), correspond in signification to our English word.]

I. Lit.: To make thin.

1. *Of liquids*: To make thin in the sense of less dense; to render more watery and of less consistency.

"Of such concernment too is drink and food
I'ncrassato, or *attēnuate* the blood."
Dryden: Lucretius, bk. iv.

2. *Of solids*: To render finer, as a wire which is filed away or partially dissolved in an acid.

"It is of the nature of acids to dissolve or *attēnuate*; and of alkalies to precipitate or *incrassate*."—*Newton: Optics*.

II. Fig.: To lessen, to diminish.

"... for this fatal sect hath justled her out of diverse large regions in Africk, in Tartary, and other places, and *attēnuated* their number in Asia."—*Howell: Letters*, ii. 10.

at-tēn'-u-āte, *a.* [From Lat. *attēnuatus*, or Ital. *attēnuato*.] [ATTENUATE, v.]

A. Ordinary Language:

1. *Of liquids*: Made thin in consistency; rendered less dense.

"Vivification ever consisteth in spirits *attēnuate*, which the cold doth congeal and coagulate."—*Bacon*.

2. *Of solids*: Rendered finer or more slender.

B. *Bot.*: Made thin or slender; tapering. (*London*.)

at-tēn'-u-ā-tēd, *pa. par. & a.* [ATTENUATE, v.]

at-tēn'-u-ā-tīng, *pr. par.* [ATTENUATE, v.]

at-tēn'-u-ā-tion, *s.* [In Fr. *atténuation*; Sp. *atenuación*; Port. *atenuação*; Ital. *attenuazione*; Lat. *attenuatio*.]

1. The act of rendering thinner; the state of being rendered thinner.

¶ *Used specially (a)* of a liquid or gas rendered less dense.

"... the diminished density, or *attenuation* of the wort, . . ."—*Fownes: Manual of Chem.*, 10th ed., p. 604.

"Chiming with a hammer upon the outside of a bell, the sound will be according to the inward concavo of the bell; whereas the elision or *attenuation* of the air can be only between the hammer and the outside of the bell."—*Bacon*.

Or (b) of a solid rendered finer or more slender in form, as, for instance, ductile wire drawn out to a greater or less extent of tenuity.

†2. A person or thing attenuated.

"I am ground even to an *attenuation*."—*Donne: Devotions*, p. 517.

*at-tēr, *at-tyr (yr=īr), *s.* [A. S. *atter*, *attor*, *ator*, *ater*=poison; matter, pus. In Sw. *etter*; Dan. *edder*.] Poison venom; pus from an ulcer.

"And nithful neddre, loth and lither,
Sal gliden on hise brest nether
And erthe freten wile he mai liuen,
And *atter* on is tange cliuen."
Story of Gen. & Exod. (ed. Morris), 369-72.

*at-tēr-cōppe, *at-tīr-cōppe, *at-tyr-cōppe, *at-tēr-cōb, *at-tēr-cāp, *ad-ēr-cōp, *ā-dyr cōp (yr=īr), *s.* [A. S. *attercoppa*=a spider; from *atter*=poison, and *copp*, *cop*=(1) the head, top, apex, (2) a cup. In Dan. *edderkop*.]

I. Literally:

1. A spider. (*Prompt. Parv.*, &c.)

"Araneus; an *aderecop*, or a spynner."
Vocab. Stanb., Sig. D, 2 b. (*Boucher*.)

2. *Less properly*: A spider's web.

"I sees her kronkin astride o' th' bawk, her hair au ful of *attercops*."—*Craven: Dialogues*, p. 228. (*S. in Boucher*.)

II. Figuratively: A peevish, ill-natured person.

"Thou yreful *attercap*, Pylat, apostata,
Judas, Jew's jangler, Lollard lawreate."
Ever Green, ii., 74. (*Boucher*.)

*at-tēr-filth, *s.* [O. Eng. *atter*, and Eng. *filth*.] Corruption.

*at-tēr-lāthe, *s.* [A. S. *atterlathe*, *aterlathe*=betony, penny-grass.] A plant, betony.

*at-tēr-lī, *adv.* [From O. Eng. *atter* (q. v.), and suffix -ly.] With poison; venomously. (*Chaucer*.)

fāte, fāt, fāre, āmidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, ūnite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

āt-tēr-ne, *āt-tēr-n, a. [A. S. *cetterne*, *cettren*, *cetren*=poisonous; M. H. Ger. *eiterin*.]
1. Venomous; poisonous. (*Stratmann*.)

āt-tēr-rā-tiŋg, pr. par. [ATTE.] [ATTE.]

āt-tēr-rā-tion, s. [Eng. *atterrat(e)*; -ion.] The process of adding to the land or of forming into dry land.

at-tēst, v. t. & i. [In Fr. *attester*; Sp. *atestar*, *atestigar*; Port. *attestar*; Ital. *attestare*; Lat. *attestor*; from *ad*=to, and *testor*=to be a witness; *testis*=a witness.]

A. Transitive:

*I. To call to witness.

"But I attest the gods, . . ."
Shakesp.: Troil and Cress., ii. 2.

II. To bear witness.

1. Lit.: Where the witness is a person.

(a) Properly: To bear witness to the genuineness of a document and the truth of its contents by appending one's signature to it; to certify.

(b) In any other way, whether by word or deed, to confirm the truth of an allegation or fact.

"Live thou; and to thy mother dead attest
That cleare she dide from blemish criminall."
Spenser: F. Q., ii. i. 37.

"Idomoneus, whom Ilion fields attest
Of matchless deeds . . ."
Pope: Homer's Odyssey, bk. xix., 211-12.

2. When the witness is a thing, as, for instance, a book, a passage or passages in a book, coincidences of fact in a statement, or anything similar.

" . . . they formerly did so, as is attested by passages in Pliny."—*Darwin: Origin of Species* (1859), ch. i., p. 34.

" . . . the casual coincidences of fact, with which contemporary literature abounds, serve to attest the narrative of the historian, and to confirm its veracity."—*Lewis: Early Roman Hist.*, ch. vi., § 5.

B. Intrans.: To bear witness.

"Till, from the fleet our presents be convey'd,
And, Jove attesting, the firm compact made."
Pope: Homer's Iliad, bk. xix., 189-90.

āt-tēst, s. [From the verb.] Attestation.

" . . . the exalted man, to whom
Such high attest was given . . ."
Milton: P. R., bk. i.

āt-tēs-tā-tion, s. [In Fr. *attestation*; Sp. *atestación*; Port. *attestação*; Ital. *attestazione*; all from Lat. *attestatio*.] The act of attesting; the state of being attested; that which attests.

Specially:

1. Of persons: The act of bearing witness to any document by appending one's signature to it; also the act of witnessing any opinion or statement in a less formal manner.

" . . . men, as we know them, do not sacrifice their lives in the attestation of that which they know to be untrue."—*Tyndall: Frag. of Science* (3d ed.), iii. 53.

2. Of things: That which attests anything; specially historical evidence of an external character to the authorship or events of a history.

" . . . the external attestation, corroborated by the internal evidence of the narrative, . . ."—*Lewis: Early Roman Hist.*, ch. xiv., § 1.

āt-tēs-tā-tive, adj. [From Lat. *attestatus*, perf. par. of *attestor* (ATTEST), and Eng. suff. -ive.] Attesting.

"Of attestative satisfaction: Satisfaction arising from establishing truth by evidence against a false statement prejudicial to one."—*Bowring: Bentham's Works*, vol. i., p. 374.

āt-tēst-ēd, pa. par. [ATTEST, v.]

āt-tēst-ēr, **āt-tēst-ōr**, s. [Eng. *attest*; -er, -or.] One who attests.

"The credit of the attesters, and truth of the relations."—*J. Spenser: Prodigies*, p. 397.

"This arch-attester for the public good
By that one deed ennoble all his blood."
Dryden: Absalom and Achitophel.

āt-tēst-iŋg, pr. par. [ATTEST, v.]

"Nor speak I rashly, but with faith averr'd,
And what I speak attesting Heaven has heard."
Pope: Homer's Odyssey, bk. xiv., 175-6.

"Alternate each th' attesting scepter took,
And, rising solemn, each his sentence spoke."
Pope: Homer's Iliad, bk. xviii., 587-8.

āt-tēst-ive, a. [Eng. *attest*; -ive.] Attesting; containing an attestation. (*Worcester*.)

āt-tēst-ōr, s. [ATTESTER.]

āt-tē-yn-ant, a. [From Lat. *attinens*, pr. par. of *attineo*.] [ATTAIN.] Appertaining, belonging.

"That to my dull wytte it is not atteynant."
Fabian: Chron. (Prologue, p. 2). (*S. in Boucher*.)

***āt-tē-yn**, v. i. & t. [ATTAIN.]

Āt-tic, **āt-tic**, ***Āt-tick**, a. & s. [In Fr. *Attique*; Sp. *Atico*; Port. & Ital. *Attico*; Lat. *Atticus*; Gr. *Attikos*, from *Attica*.]

A. As adjective:

I. Ordinary Language:

1. Of or belonging to Attica, a province of Greece or to Athens, its world renowned capital; to the inhabitants of Attica or Athens; or, finally, to their writings and other productions.

"Who, scarcely skill'd an English line to pen,
Scans Attic meters with a critic's ken."
Byron: A College Examination.

2. Classical: Used especially of poetic or other compositions, in whatever language they may be written.

"How can I Pult'ney, Chesterfield forget,
While Roman Spirit charms, and Attic Wit."
Pope: Epilogue to the Satires; Dial. ii. 84, 85.

II. Technically:

1. Philology:

Attic dialect: The dialect of ancient Athens. The old Attic was the same as the Ionic, from which the Attic properly so-called somewhat diverged. The latter was the accepted standard of the Greek language; the other dialects were regarded as provincial forms of speech.

2. Architecture:

(a) *Attic base*: A peculiar base which the ancient architects used in buildings of the Ionic and Corinthian orders, and which Palladio introduced also into the Doric style.

(b) *Attic order*: An order of small square pillars placed by Athenian architects at the uppermost parts of a building.

B. As substantive:

I. Ordinary Language:

1. A native of Attica. *Spec.*, an Athenian.

"A time when the Atticks were as unlearned as their neighbors."—*Bentley: Dissert. upon Phalaris*, p. 390.

2. A room or series of rooms at the top of a house just under the roof; a garret.

" . . . betaking himself with his books to a small lodging in an attic."—*Macaulay: Hist. Eng.*, ch. xiv.

¶ It is often used in the plural.

"The wild wind rang from park and plain,
And round the attics rumbled."
Tennyson: The Goose.

II. Architecture:

1. A low story placed above an entablature or a cornice, and limiting the height of the main part of an elevation. It is to be found chiefly in the Roman and Italian styles. (*Gloss. of Arch.*)

2. In the same sense as B., I. 2.

Attic muse. A fine poetic vein.

***Āt-ti-cal**, a. [Eng. *attic*; -al.]

1. Lit.: Of or belonging to Attica.

2. Fig.: Pure or classical in style.

"If this be not the common Attical acception of it, yet it will seem agreeable to the penning of the New Testament; in which, whosoever will observe, may find words and phrases, which perhaps the Attick purity, perhaps grammar, will not approve of."—*Hammond: Serm.*, 12.

Āt-ti-çism, s. [In Ger. *atticism*; Fr. *atticisme*; Port. *atticismo*; Gr. *attikismos* = (1) a siding with the Athenians; (2) the Attic style; an atticism.]

¶ 1. Attachment to the Athenian people. Used specially in narratives of the Peloponnesian war.

"Tydus and his accomplices were put to death for Atticism."—*Hobbes: Thucydides*, bk. viii. (*Richardson*.)

2. A mode of expression characteristic of the Attic dialect; also classical, elegant, polished.

"They made sport, and I laughed; they mispronounced, and I misliked; and to make up the Atticism, they were out, and I hissed."—*Milton: Apology for Smeectymnuus*.

"There is an elegant Atticism which occurs, Luke xiii. 9, 'If it bear fruit, well.'"—*Newcome: View of the Eng. Biblical Trans.*, p. 279.

āt-ti-çize, v. t. & i. [In Lat. *atticisso*; from Gr. *attikizō*.]

A. Transitive: To cause to conform to the idiom of Attica, or of its capital, Athens.

B. Intransitive: To speak or write like a native of Attica.

"If any will still excuse the tyrant for atticizing in those circumstances, . . ."—*Bentley: Dissert. upon Phalaris*, p. 317.

Āt-tics, s. pl. [From Gr. *Attika*, the title of the first book in Pausanias's *Itinerary of Greece*, which treats of Attica and Megaris.] A geographical, topographical, historical, or other description of Attica.

¶ *Attics*, the pl. of *attic*, has a slightly different etymology. [ATTIC, B. 2.]

***at-tig-u-ous**, a. [Lat. *attiguus*, from *attigo*, old form of *attingo*.] [ATTINGE.] Contiguous, bordering on, near, hard by. (*Ogilvie*.)

at-tig-u-ous-ness, s. [Eng. *attiguous*; -ness.] The quality of being attiguous; contiguity. (*Ogilvie*.)

at-tin'ge, v. t. [Lat. *attingo*=to touch, to handle; *ad*=to, and *tango*=to touch.] To touch lightly or gently. (*Coles: Dict.*, 1685.)

at-tire, ***a-ti're**, v. t. [Connected apparently with two classes of words. It has affinity with O. Fr. *attirer*, *attirer*, *attirer*=to provide, to array, to dispose, to adorn. (This is not closely akin in signification to Mod. Fr. *attirer*, which is=to attract, to procure.) From O. Fr. *tier*=rank, order; Prov. *atieyar*; Sp. *ataviar*=to adorn. Compare also Ger. *ziere*=to adorn; *zier*=ornament. The Eng. *attire* has also intimate relations with O. Fr. *attourner*=to clothe; Mod. Fr. *attourner*=to adorn; from O. Fr. *atour*. *attour*=(1) a hood, (2) a head-dress for a woman. The Eng. word *tire-woman*, to a certain extent, connects both classes of words.] [ATTIRE, s., TIRE, TIRE-WOMAN.] To clothe one in garments, especially of a gorgeous character. (Used literally or figuratively, followed by *with* or *in*.)

" . . . and with the linen miter shall he be attired."
—*Lev. xvi. 4.*

"Religion, if in heavenly truths attired,
Needs only to be seen to be admired."
Cowper: Expostulation.

at-ti're, ***a-ti're**, ***at-ty're**, ***a-ty're** (yr as *ir*).
***at-tō ur**, s. [O. Fr. *atirer*=to attire.]

A. Ordinary Language:

I. (Of the form *atour*): A woman's head-dress.

"This lady was of good entaile,
Right wonderfull of apparayle;
By hir attyre so bright and shene,
Men myght perceyve welle, and sene,
She was not of religioun.
Nor I nelle make mencoun
Nor of robe, nor of tresour,
Of broche, neithir of hir rich attour."
Romaunt of the Rose, 3,718-3,725.

II. (Of the other forms of the word): Dress, apparel, vestments.

1. *Spec.*: Of a splendid kind.

"Can a maid forget her ornaments, or a bride her attire?"—*Jer. ii. 32.* (See also Ezek. xxiii. 15.)

2. *Gen.*: Whether splendid or not.

"Not brothers then in feature or attire."
Wordsworth: Excursion, bk. viii.

¶ In ordinary language it is rarely used in the plural.

"But, when return'd, the good Ulysses' son
With better hand shall grace with fit attires
His guest"
Pope: Homer's Odyssey, bk. xiv., 533-5.

B. Technically:

*1. *Old Bot.*: The stamens, pistils, &c., of a plant included within the calyx (called *impalement*) and the corolla (denominated *foliation*). The terms used in the subjoined extract from Johnson's *Dictionary* are so thoroughly dead and gone that the extract itself is fitted to excite mirth in the botanical mind.

"Attire . . . [in Botany]. The flower of a plant is divided into three parts—the empalement, the foliation, and the attire, which is either florid or semiflorid. Florid attire, called thrums or suits, as in the flowers of marigold and tansy, consists sometimes of two, but commonly of three parts: the outer part is the floret, the body of which is divided at the top, like the cowslip flower, into five distinctive parts. Semiflorid attire consists of two parts—the chives and apices; one upon each attire."—*Johnson's Dictionary*.

2. *Her.*: (1) Clothing; (2) a single horn of a stag. The plur. *attires* is used for two horns. (*Gloss. of Her.*)

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aș; expect, Xenophon, exist. ph = f.
-cian, -tian = șan. -tion, -sion = șun; -tjon, -șion = zhun. -tious, -cious, -sious = șus. -ble, -dle, &c. = bel, del.

at-tī' red, *pa. par. & a.* [ATTIRE, *v.*]

1. *Ord. Lang.*: With a signification corresponding to that of the verb.

2. *In Heraldry*: Ornamented with horns or antlers. (Used of the Stag or Hart.) A reindeer is represented in Heraldry with *double attires*—one pair erect, and the other drooping. (*Boutell: English Heraldry.*)

"Attired. A term used among Heralds when they have occasion to speak of the horns of a Buck or Stag, . . ."—*Bullock: Eng. Etymos.* (ed. 1856).

Attired.

at-tī'r-ēr, *s.* [Eng. *attir(e)*; *-er.*] One who attires another; a dresser. (*Johnson.*)

at-tī'r-īng, *pr. par. & s.* [ATTIRE, *v.*]

A. *As present par.*: With a signification corresponding to that of the verb.

B. *As substantive*:

1. *Spec. Plur.*: The head-dress of women.

" . . . attirings, that which gentlewomen wear on their heads, *redimicula*, . . ."—*Huloet.*

2. *Gen.*: Dressing; dress of any kind.

(a) *Literally*:

"In the attiring and ornament of their bodies, the duke had a fine and unaffected politeness."—*Sir H. Wotton: Remains*, p. 171.

(b) *Figuratively*: Ornamental covering of any kind. (*Sidney: Astrophel and Stella.*)

āt-tīr-līng, *s.* [A. S. *attor*, *aterpoison.*] A shrew, a villain.

"Meekely thou him answer, and not as an attirling." *Babees Book* (ed. Furnivall), p. 38.

***at-tī-tle** (*tle = tēl*), *v. t.* [Lat. *attitulo.*] To entitle.

¶ Its place is now supplied by ENTITLE (*q. v.*).

"This Aries out of the twelve

Hath March attitled for hym selfe."

Gower: Conf. Am., bk. 7.

āt-tī-tūde, ***āt-tī-tū-dō**, *s.* [In Sw. *attitud*; Fr. & Port. *attitude* = posture; Sp. *actitud*; Ital. *attitudine* = (1) aptness, fitness, (2) posture; Low Lat. *aptitudo*; from Class. Lat. *aptus* = fitted, adapted. (Apt.) While the signification aptness, fitness, suggests Low Lat. *aptitudo*, from Class. Lat. *aptus* = fitted, adapted, the Sp. *actitud* points to Class. Lat. *actio* = doing, action, and to *actus* = an impulse, an act; from *actus*, *pa. par.* of *ago* = to drive, . . . to do. The Ital. *attitudine* also is connected with Ital. *atto* = action, deed, which comes from the Lat. *actus*. (Act.) Richardson and Mahn adopt the first of these ultimate etymologies; Johnson, Webster, and Wedgwood the second.]

1. The posture in which a person stands, or in which a human being or animal is represented in a painting or sculpture.

"They were famous originals that gave rise to statues, with the same air, posture, and attitudes."—*Addison.*

"Declining was his attitude."

Byron: Siege of Corinth, 19.

2. The posture or position of a nation, of a person's mind or heart, or even of inanimate things.

" . . . the attitudes assumed by idealists and skeptics."—*Herbert Spencer: Psychol.* (2d ed.), vol. ii., p. 312, § 388.

¶ Malone points out that in Evelyn's *Idea of the Perfection of Painting* (A. D. 1688) *attitudo* occurs instead of *attitude*, and even it is defined as being a word little known. (*Todd.*)

at-tī-tū-dīn-āl, *a.* [Apparently from Ital. *attitudin(e)*, and Eng. suff. *-al.*] Pertaining or relating to attitude.

āt-tī-tū-dīn-ār-ī-an, *s.* [Apparently from Ital. *attitudin(e)*, and Eng. suff. *-arian.*] One who gives particular attention to attitudes.

āt-tī-tū-dīn-ī-ze, *v.* [Apparently from Ital. *attitudin(e)*, and Eng. suff. *-ize.*] To practice or assume attitudes.

"They had the air . . . of figurantes, *attitudinizing* for effect."—*De Quincey: Works*, vol. v., p. 158.

āt-tī-tle (*tle = tēl*), *s.* [Cognate with ADDLE (?) (*q. v.*).] (*Mahn.*)

Mining: Refuse or rubbish, consisting of broken fragments of the rock, rejected after examination as containing no ore worth extraction. (*Weale.*) [ATTAL.]

āt-tōl-lent, *a. & s.* [Lat. *attolens*, *pr. par.* of *attollo* = to lift up; *ad* = to, and *tollo* = to lift up.]

A. *As adjective*: Lifting up, raising, elevating. (Used chiefly in Anatomy.)

"I shall farther take notice of the exquisite libration of the *attolent* and *deprimant* muscles."—*Derham: Physico-Theol.*

B. *As substantive*:

Anat.: A term applied to one of the muscles whose function is to raise any portion of the bodily frame.

***at-ton'ē** (once as *wūnce* [?]), *adv.* [Eng. *at; once.*] At once; together in place, or simultaneously in point of time. [ATTONE.]

"The mov'd with wrath, and shame, and Ladies' sake,
Of all attonce he cast avengd to be."

Spenser: F. Q., I. v. 12.

***at-ton'e** (one as *wūn*), *adv.* [O. Eng. *att=at*; and Eng. *one.*]

1. *Of proximity or identity in place*: Together, connected with; side by side.

"But what are you whom like unlucky lot
Hath linckt with me in the same chains attone?"

Spenser: F. Q., IV. vii. 14.

" . . . as white seemes fayrer macht with blacke attone."

Ibid., III. ix. 2.

2. *Of proximity or identity in time*: At once; simultaneously.

" . . . and from one reft both life and light attone."

Spenser: F. Q., III. v. 7.

"The warlike Dame was on her part assaid
Of Claribell and Blandamour attone."

Ibid., IV. ix. 30.

¶ For AT ONE as quite separate words, see AT ONE, ATONEMENT.

***at-tō-ne-mēnt**, *s.* [ATONEMENT.]

at-tōrn', ***at-tūrn'**, *v. t. & i.* [O. Fr. *attorner* = to direct, to dispose, to attorn; from *torner*, *tourner* = to turn; Ital. *attorniare* = to encompass, to enclose; *attorno* = about; Low Lat. *attornare*, *attorniare*, *atturnare* = to commit business to another, to attorn; from Class. Lat. *ad* = to, and *torno* = to turn in a lathe, to round off; Gr. *tornus* = (1) a carpenter's tool, like our compasses, for drawing a circle, (2) a turner's chisel, a lathe chisel, (3) a circle.] [TURN.]

A. *Transitive*:

Old Feudal Law or Custom: To transfer the feudal allegiance of a vassal, or the vassals generally, to a new lord on his obtaining an estate from its former possessor.

"In some case a lord might *atturn* and assign his vassal's service to some other: but he might not *atturn* him to his deadly foe."—*Sadler: Rights of the Kingdom*, p. 16.

B. *Intransitive*:

1. *Old Feudal Law or Custom*: To profess to become the tenant of a new lord; that is, to give consent to one's landlord transferring his estate to another, and intimating one's willingness to become the tenant of the new proprietor.

"This consent of the vassal was expressed by what was called *attorning*, or professing to become the tenant of the new lord."—*Blackstone: Comment.*, bk. ii., ch. 19.

2. *Mod. Law*: To agree to become tenant to a landlord to whom the estate on which one is located is about to pass by reversion. [ATTORNMENT.]

at-tōr-neŷ, ***at-tūr-neŷ**, ***a-tūr-neŷ** (*pl. at-tōr-neŷs*, *at-tōr-nīes*), *s.* [From O. Fr. *attorné*, *atorné*, *atourné*, *pa. par.* of *attorner*, *atorner*, *atourner*; Low Lat. *attornatus*, *atturnatus*, *pa. par.* of *attorno*, *atturno* = to commit business to another; Lat. *ad* = to, and *torno* = to round off.] [ATTORN.]

A. *Ordinary Language*:

*I. *Formerly, in a general sense*: One appointed to act for another in important matters, and especially in those pertaining to law.

1. *Literally*:

"Rich. Tell me, how fares our loving mother?

Stan. I, by attorney, bless thee from thy mother,

Who prays continually for Richmond's good."

Shakesp.: Richard III., v. 3.

"I am a subject,

And I challenge law: *attornies* are denied me;

And therefore personally I lay my claim

To my inheritance of free descent."

Shakesp.: Richard II., ii. 3.

2. *Figuratively*:

"But when the heart's attorney once is mute,

The client breaks, as desperate in his suit."

Shakesp.: Venus and Adonis.

II. *Now. Spec.*: (In the same sense as B.)

"He frequently poured forth on plaintiffs and defendants, barristers and attorneys, witnesses and jurymen, torrents of frantic abuse, intermixed with oaths and curses."—*Macaulay: Hist. Eng.*, ch. iv.

*B. *Law*: One who managed any legal matters for another in a common law court; in this differing from a solicitor who practiced in a court of equity. He corresponded to the procurator or proctor of the civilians and canonists.

Letter or Power of Attorney: A legal document by which a person appoints another to act for him in some particular matter, as to claim or receive a debt due to him. One who acts in consequence of being named in such a document is called a *private attorney*, and need not be a lawyer at all.

attorney-general, *s.*

**General*: A lawyer permanently retained by a person of rank to defend his interests.

"If you do wrongfully seize Hereford's rights,
Call in the letters patent that he hath
By his attorneys-general to sue
His livery, and deny his offer'd homage."

Shakesp.: Richard II., ii. 1.

In the United States the Department of Justice is presided over by the Attorney-General, whose duty it is to furnish all legal advice needed by Federal authorities, and conduct all litigation in which the United States is concerned. He is also called upon to recommend persons to fill the places of judges of the United States Circuit and District courts. There is an attorney-general for each State whose duty it is to furnish legal advice to the legislature; he represents the State in suits at law, and aids in prosecuting offenses against the State.

In England the highest legal functionary permanently retained, on a salary, to take the part of the Crown in any suits affecting the royal (by which is really meant the public) interests. In precedence, he ranks above the solicitor-general. When he files an information in the appropriate courts regarding damage to the "king's" lands, great political or other crimes, &c., it is sure to meet with immediate attention. He is not a member of the Cabinet, but goes out with the Ministry from whom he received his appointment.

"Somers, now attorney-general, strongly recommended delay."—*Macaulay: Hist. Eng.*, ch. xix.

attorney-generalship, *s.* The office or dignity of the attorney-general.

āt-tōr-neŷ (*pa. par. at-tōr-neŷed*, *at-tōr-nīed*), *v. t.* [ATTORNEY, *s.*]

1. To employ as one's deputy or proxy.

"As I was then

Advertising and holy to your business,

Not changing heart with habit, I am still

Attorned to your service."

Shakesp.: Measure for Measure, v. 1.

2. To perform an act by attorney, deputy, or proxy.

" . . . their encounters, though not personal, have been royally *attorned* with interchange of gifts, letters, loving embassies."—*Shakesp.: Winter's Tale*, i. 1.

at-tōr-neŷ-shīp, *s.* [Eng. *attorney*, and suff. *-ship.*] The office of an attorney, in its first and more general sense; or, in the modern and specific one, of an attorney-at-law acting for one in a legal matter. [ATTORNEY.]

"Marriage is a matter of more worth

Than to be dealt in by attorneyship."

Shakesp.: 1 Henry VI., v. 5.

at-tōrn-īng, *pr. par.* [ATTORN.]

at-tōrn-mēnt, *s.* [O. Fr. *attornement*; from Low Lat. *attornamentum.*] [ATTORN.]

Old Feudal Law: Consent given by tenants or vassals to a lord's alienating his estate. By the old feudal arrangements, both lords and tenants were supposed to have mutual obligations, so that the former could not sell his estate without the *attornement* or permission of the tenant, or the tenant transfer his land to another tenant without the lord's permission.

at-tō-ur, ***at-tō-ure**, ***at-tō-ur**, ***a-tō-ur**, ***a-tō-ur**, ***at-tū-re** (*Old Eng. & Scotch*), *prep. & adv.* [Fr. *autour* = round about; or Eng. *out, over* (pronounced rapidly and indistinctly).]

A. *As preposition*: Over, across, beyond, above, further onward than, exceeding in number, past. (*Scotch.*)

"Na, na, lad! Od! she is, maybe, four or five years younger than the like o' me, by and *attour* her gentle havings."—*Scott: Red-gauntlet*, Letter xii.

B. *As adverb*: Moreover.

¶ *Attour alquhare*: Anywhere, anywhere.

"Attour, the King shall remain in thy government and keeping, till he come to perfect age."—*Pittscottie*, p. 13. (*Jamieson.*)

¶ *To go attour*: To remove to some distance. (*Jamieson.*)

To stand attour: To keep off. (*Jamieson.*)

By and attour: Besides all that, moreover, over and above.

"By and *attour*, the same few farm duty allanerly."—*A Charter on Bibl. Topog.*, vol. v. (Zetland), p. 71.

at-trāct', *v. t.* [Low Lat. *attrahere*; from *attrahere*, sup. of *attrahere* = to draw to or toward; *ad* = to, and *trahere* = to draw. In Mod. Fr. *attirer*; O. Fr. *attraicte*; Sp. *atraer*; Port. *attrahir*; Ital. *attrarre.*]

I. *Lit.*: To draw any material substance to or toward another one, or exert an influence which, but for counteracting causes, would so attract it. [ATTRACTION.]

"The single atoms each to other tend,

Attract, attracted to, the next in place

Form'd and impelled its neighbor to embrace."

Pope.

bōil, **bōy**; **pōut**, **jōwl**; **cat**, **çell**, **chorus**, **çhin**, **bençh**; **go**, **gem**, **thin**, **thiŷ**; **sin**, **aŷ**; **expect**, **Xenophon**, **exiŷt**. **ph = f.**
-cian, **-tian** = **ŷan**. **-tion**, **-ŷion** = **ŷhūn**. **-tious**, **-cious**, **-ŷious** = **ŷhūŷ**. **-ble**, **-dle**, &c. = **bēl**, **dēl**.

"The law of gravitation enunciated by Newton is, that every particle of matter in the universe attracts every other particle with a force which diminishes as the square of the distance increases."—Tyndall: *Frag. of Science*, 3d ed., i. 6.

II. Figuratively:

1. To draw hearts by influences fitted to operate upon them; to allure.

"Adorn'd
She was indeed, and lovely, to attract
Thy love, not thy subjection."

Milton: *P. L.*, bk. x.

"This stipend, coupled with the hope of a pension, does not attract the English youth in sufficient numbers."—Macaulay: *Hist. Eng.*, ch. iii.

2. To arrest, to fix (applied to the mind or attention), to draw the notice of.

"The former is the error of minds prone to reverence whatever is old; the latter of minds readily attracted by whatever is new."—Macaulay: *Hist. Eng.*, ch. vii.

"... to attract a large share of the public attention."—*Ibid.*, ch. ii.

*at-trăct', s. [From the verb. In O. Fr. *attraict*: Mod. Fr. *attirait*.] [ATTRACT, v.]

"Feel darts and charms, attracts and flames,
And woo and contract in their names."

Hudibras.

at-trăct-a-bil'-i-tŷ, †at-trăct-i-bil'-i-tŷ, s. [Eng. *attract*; *ability*.] Capability of being attracted.]

"There is a strong propensity, which dances through every atom, and attracts the minutest particle to some peculiar object; . . . thou wilt not find a corpuscle destitute of that natural attractibility."—Sir W. Jones: *Tr. of Shirin and Ferhad*, (*Asiat. Res.*, iv. 178.)

at-trăct-a-ble, †at-trăct-i-ble, a. [Eng. *attract*; *-able*.] That may be attracted. (Kerr, *Lavoisier*.)

at-trăct-ĕd, pa. par. & a. [ATTRACT, v.]

†at-trăct-ĕr, s. [ATTRACTOR.]

*at-trăct-ĭc, *at-trăct-ĭc-al, a. [Eng. *attract*; *-ic*, *-ical*.] Possessing the power of drawing to or toward.

"Some stones are endued with an electrical or attractive virtue."—Ray on the Creation.

at-trăct-ĭle, a. [Eng. *attract*; *-ile*.] Having the power to attract anything. (More commonly written ATTRACTIVE.) [ATTRACTIVE.]

at-trăct-ĭng, pr. par. & a. [ATTRACT, v.]

"... especially if that thing upon which they look has an attracting virtue upon the foolish eye."—Bunyan: *Pilgrim's Progress*, pt. ii.

at-trăct-ĭng-lŷ, adv. [Eng. *attracting*; *-ly*.] So as to exert attraction. (Todd.)

at-trăc-tion, s. [In Ger. *†attraction*, *†attraktion*; Fr. *attraction*; Sp. *atracción*; Port. *atração*; Ital. *attrazione*. All from Lat. *tractio*, from *trahō*=to draw together: *ad*=to, and *trahō*=to draw.]

A. Ordinary Language:

I. The act or power of attracting.

1. Lit.: The act of one material body in drawing another to or toward itself; also the power of doing so. [B.]

"... in so far as their orbits can remain unaltered by the attractions of the planets."—Herschel: *Astron.* (1858), § 564.

2. Fig.: The act or power of drawing a person by moral means to one's self; the power of alluring.

"... in his eye
There is a fastening attraction which
Fixes my fluttering eyes on his; my heart
Beats quick; he awes me, and yet draws me near,
Nearer, and nearer." Byron: *Cain*, i. 1.

II. The state of being attracted, either in a literal or in a figurative sense.

"Since Newton's time the attraction of matter by matter was experimentally established by Cavendish."—Atkinson: *Ganot's Physics*, § 58.

III. That which attracts, either in a literal or in a figurative sense; attractive qualities.

"... to female attractions."—Macaulay: *Hist. Eng.*, ch. xiii.

B. Technically:

I. *Nat. Phil., or Universal Attraction*: A force in virtue of which the material particles of all bodies tend necessarily to approach each other. It operates at whatever distances the bodies may be from each other, whether the space between them be filled with other masses of matter or is vacant, and whether the bodies themselves are at rest or are in motion. When they are not closely in contact, the attraction between them is called that of *gravitation* or of *gravity*.

It is of various kinds:—

(1) *The Attraction of Gravitation or of Gravity* is the operation of the above-mentioned attraction when the bodies acting and acted upon are not

closely in contact. It is often called the *Law of Gravity* or *Gravitation*, but the term *Law* in this case means simply generalization. It states the universality of a fact, but does not really account for it. By this law or generalization, the attraction between any two material particles is directly proportional to the product of their masses, and inversely proportional to the square of their distance asunder. [GRAVITY.]

"Thus the attraction of gravity at the earth's surface is expressed by the number 32, because, when acting freely on a body for a second of time, it imparts to the body a velocity of thirty-two feet a second."—Tyndall: *Frag. of Science* (3d ed.), i. 10.

(2) *Molecular attraction* differs from the former in acting only at infinitely small distances. It ceases to be appreciable when the distances between the molecules become appreciably large. It is divided into COHESION, AFFINITY, and ADHESION (q. v.).

Capillary Attraction (from Lat. *capillus*=a hair), meaning the attraction excited by a hair-like tube on a liquid within it, is, properly speaking, a variety of adhesion. [ADHESION, CAPILLARY.]

"... and for the attraction of gravity substitute that of chemical affinity, which is the name given to the molecular attraction."—Tyndall: *Frag. of Science* (3d ed.), i. 10.

II. *Chemistry. Chemical Attraction*: The same as *Chemical Affinity*. [AFFINITY.] [See also I., 2.]

III. *Magnetism. Magnetic Attraction*: The power excited by a magnet or loadstone of drawing and attaching iron to itself.

IV. *Electricity. Electrical Attraction*: The power possessed by an electrified body of drawing certain other bodies to itself. The repulsions or attractions between two electrified bodies are in the inverse ratio of the squares of their distance. The distance remaining the same, the force of attraction or repulsion between two electrified bodies is directly as the product of the quantities of electricity with which they are charged. (Atkinson: *Ganot's Physics*.)

at-trăct-ĭve, a. & s. [Eng. *attract*; *-ive*. In Fr. *attractif*; Sp. *atractivo*; Port. *atractivo*; Ital. *attrattivo*.]

A. As adjective:

1. Lit.: Drawing, or having the power to draw to or toward. (Applied to the action of gravity, cohesion, &c., on material bodies.) [ATTRACT (q. v.).]

"... other stars,
By his attractive virtue and their own
Incited, dance about him various rounds?
Their wandering course, now high, now low, then hid,
Progressive, retrograde, or standing still."

Milton: *P. L.*, bk. viii.

"The reason of this stability is that two forces, the one attractive and the other repulsive, are in operation between every two atoms."—Tyndall: *Frag. of Science* (3d ed.), x. 251.

2. Fig.: Drawing the mind or heart; allurements.

(a) Chiefly by physical beauty. Hence, an "attractive" female as a rule means a beautiful one. The term may be applied, in an analogous sense, to the inferior animals.

"... successive males display their gorgeous plumage and perform strange antics before the females, which, standing by as spectators, at last choose the most attractive partner."—Darwin: *Origin of Species* (ed. 1859), ch. iv., p. 89.

(b) Chiefly by mental or moral graces, or by both combined.

"... and with attractive graces won
The most averse, thee chiefly"

Milton: *P. L.*, bk. ii.

B. *As substantive*: That which draws; an attraction, an allurements.

"The condition of a servant staves him off to a distance; but the gospel speaks nothing but *attractives* and invitation."—South.

at-trăct-ĭve-lŷ, adv. [Eng. *attractive*; *-ly*.] In an attractive manner. (Johnson.)

at-trăct-ĭve-nĕss, s. [Eng. *attractive*; *-ness*.] The quality of being attractive.

"... the same attractiveness in riches."—South: *Works*, vol. vii., Sermon 14.

at-trăct-ĭr, at-trăct-ĕr, s. [Eng. *attract*; and suffixes *-or*, *-er*.] One who or that which attracts.

"... and most prevalent attracter, the earth."
Derham: *Physico-Theol.*, bk. i., ch. 5.

"If the straws be in oil, amber draweth them not; oil makes the straws to adhere so that they cannot rise unto the attractor."—Browne: *Vulgar Errors*.

ăt-tră-hĕnt, a. & s. [In Fr. *attrayant*, *attirant*; Port. *atrakente*; all from Lat. *attrahens*, pr. par. of *atrāho*=to draw to or toward: *ad*=to, and *trāho*=to draw.]

A. *As adjective*: Drawing to or toward.

B. *As substantive*:

1. Gen.: That which draws to or toward.

"Our eyes will inform us of the motion of the steel to its attractent."—Glanville: *Scep sis*.

*2. Specially. Old Med.: An external application, which was formerly supposed to draw the humors to the part of the body on which it was put. It is now known that the action, easily excited, is that of the part itself. Sinapisms, rubefacients, &c., fall under the category.

*at-trăp', (1) v. t. [From Lat. *ad*, and Eng. *trap* (q. v.). In Sw. *drapera*; Fr. *draper*=to line with cloth, especially with black cloth; to drape; *drap*=woolen cloth, stuff, sheets; Sp. & Port. *trapo*=a rag, tatter, clout, cloth; a suit of sails; ragged people; Low Lat. *trapus*=cloth; *trappatura*=trappings.] [DRAPE, TRAP, TRAPPINGS.] To clothe, to dress.

(a) In ornate style.

"Attrapped royalty; 'instratus ornata regio.'"—Baret: *Alvearie*.

(b) In plebeian fashion.

"... all his steed
With oaken leaves attrapt, yet seemed fit
For salvage wight"

Spenser: *F. Q.*, IV. iv. 39.

*at-trăp' (2), v. t. [From Fr. *attraper*=to catch, to seize, to deceive, to trick.] To entrap.

"... he was not attrapped eyther with net or snare."—Grafton: *Henry VIII.*, an. 17. (Richardson.)

*at-trăp'ped (1), *at-trăpt', pa. par. [ATTRAP (1).]

*at-trăp'ped (2), pa. par. [ATTRAP (2).]

ăt-trĕc-tă-tion, s. [Lat. *attractio*, from *attracto*=to touch, to handle; *ad*=to, and *tracto*=to drag about; freq. from *traho*=to draw.] The act of handling frequently: the state of being frequently handled. (Johnson.)

*ăt-trĭ, *ăt-trĕ-ă, a. [ATTRY.]

at-trĭb-u-tă-ble, a. [Eng. *attribut(e)*, *-able*; Fr. *attribuable*.] That may be attributed, ascribed, or imputed to.

"The errors which were almost entirely attributable to carelessness in the adjustments."—Hooker: *Himalayan Journals*, vol. ii., Appendix I.

at-trĭb-ute, *ăt-trĭ-bŭte, v. t. [In Fr. *attribuer*; Sp. *atribuir*; Port. *atribuir*; Ital. *attribuire*; Lat. *attribuo*: *ad*=to, and *tribuo*=to distribute, grant; *tribus*=the third part of the Roman people, hence a tribe.]

1. *Of persons*: To ascribe to, to impute; to consider as having been done by one.

(a) That which is ascribed to one being good or indifferent.

"Little as either the intellectual or the moral character of Blount may seem to deserve respect, it is in a great measure to him that we must attribute the emancipation of the English press."—Macaulay: *Hist. Eng.*, ch. xix.

(b) That which is ascribed to one being bad.

"... the treason of Godolphin is to be attributed altogether to timidity . . ."—Macaulay: *Hist. Eng.*, ch. xvii.

2. *Of things*: To ascribe to, as when a certain effect is ascribed to a particular cause.

"I now admit . . . that in the earlier editions of my 'Origin of Species' I probably attributed too much to the action of natural selection, or the survival of the fittest."—Darwin: *Descent of Man*, pt. i., ch. iv.

¶ In one place, as Nares remarks, Spenser accents the verb *attribute* on the first syllable, like the substantive.

"Right true: but faulty men use oftentimes
To attribute their folly unto fate."

Spenser: *F. Q.*, V. iv. 28.

In another, however, he does so on the second, as is now universally done.

"Ye may attribute to yourselves as kings."

Ibid., I, Cant. on *Mulab*, st. 49.

ăt-trĭ-bŭte, s. [In Sw., Dan., Ger., & Fr. *attribut*; Sp. *atributo*; Port. & Ital. *attributo*, from Lat. *attributus*, pa. par. of *attribuo*.]

A. Ordinary Language:

1. That which is attributed, ascribed, or imputed to any person or thing, as an essential characteristic of him or it. A characteristic quality of any person or thing.

"Reflect his attributes, who placed them there."
Cowper: *Tirocinium*.

2. That which is symbolic of one's office or character, or of anything. [B., 2.]

"A crown, an attribute of sovereign power."
Wordsworth: *Excursion*, bk. v.

3. Honor, reputation.

"The pith and marrow of our attribute."
Shaksp.: *Hamlet*, i. 4.

bôil, bôy; pôut, jôwl; cat, çell, chorus, çhin, bench; go, çem; thin, çhis; sin, aç; expect, çenophon, exĭst. ph = f

B. Technically:

1. *Logic*: That which is predicated of any subject; that which may be affirmed or denied of anything. Sir William Hamilton divides *attributes* into Primary, Secundo-primary, and Secondary. Herbert Spencer, objecting that these words have direct reference to the Kantian doctrine of Space and Time, from which he dissents, and that they are in another respect inaccurate, divides *attributes* into Dynamical, Statico-dynamical, and Statical (q.v.). (*Herbert Spencer: Psychol.*, 2d ed., vol. ii., p. 136, § 317.)

2. *Painting and Sculpture*: That which is represented with one as being symbolical of one's office or character. Thus the trident is the attribute of Neptune. [A., 2.]

at-trib'-u-tēd, *pa. par.* [ATTRIBUTE, v.]

at-trib'-u-tiŋg, *pr. par.* [ATTRIBUTE, v.]

āt-trī-bū-tion, *s.* [In Fr. *attribution*; Port. *atribuição*; Ital. *attribuzione*; Lat. *attributio*= (1) the assignment of a debt; (2) an attribute.]

1. The act of attributing or ascribing anything; the state of being ascribed.

"... in the *attribution* and distribution of which honors, we see, antiquity made this difference."—Bacon: *Adv. of Learn.*, bk. i.

2. That which is ascribed. *Spec.*, commendation, honor.

"Hot. Well said, my noble Scot: if speaking truth, In this fine age, were not thought flattery, Such *attribution* should the Douglas have."

Shakesp.: 1 *Henry IV.*, iv. 1.

at-trib'-u-tive, *a. & s.* [Eng. *attribute*; -ive.] In Fr. *attributif*; Port. *attributivo*.]

A. As adjective: Attributing.

"And the will dotes that is *attributive*."

Shakesp.: *Troilus and Cressida*, ii. 2.

B. As substantive (*Gram.*): A term introduced by Harris to designate words which are significative of attributes. He classifies them as *Attributives* of the first order, or those which are attributes of substances, namely, Adjectives, Verbs, and Particles; and *Attributives* of the second order, or those which denote the attributes only of attributes—namely, Adverbs.

"Proper subjects of the *attributives* good and bad."—Browning: *Bentham's Works*, vol. i., p. 216.

at-trib'-u-tive-lŷ, *adv.* In an attributive manner.

at-trist', *v. t.* [Fr. *attrister*.] To sadden. (*Walpole: Letters*, iii. 382.)

at-tri'te, *a.* [Lat. *attritus*, *pa. par.* of *attero*=to rub at, toward, or against: *ad*=to, and *tero*=to rub.]

I. *Ordinary Language*: Rubbed; subjected to the action of friction. (*Milton: P. L.*, x. 1,073.)

II. *Roman Catholic Theology*: Sorry for having committed sin, but solely on account of the punishment associated with it.

at-tri'te-nēss, *s.* [Eng. *attrite*; -ness.] The quality of being rubbed away or worn down by friction. (*Dyche*.)

at-tri'-tion, ***at-trŷc'-ŷ-ōn**, *s.* [In Fr. *attrition*; Ital. *attrizione*; Lat. *attritio*.]

1. *Ord. Lang. & Nat. Science*: The act or process of rubbing down or away; abrasion; the state of being rubbed away. (Used of rocks, teeth, &c.)

"If this great bed of pebbles, without including the mud necessarily derived from their *attrition*, was piled into a mound, it would form a great mountain chain."—Darwin: *Voyage round the World*, ch. viii.

"... the posterior concavity having been smoothly deepened by *attrition*, . . ."—Owen: *British Fossil Mammals and Birds*, p. 6.

2. *Roman Catholic Theology*: Sorrow for having committed sin, not, however, through hatred of the sin itself, but merely on account of the punishment brought in its train. It is considered the lowest degree of repentance.

"He the whyche hath not playne contricyon, but all onely *attricyon*, the whyche is a manner of contricyon unparlyte and unsufficyent for to have the grace of God."—*Institution of a Christian Man*, p. 162.

***āt-trŷ**, ***āt-tēr-lŷ**, *adv.* [A. S. *attor*, *atter*, *ator*, *ater*=poison, venom.] Venomous.

"Somed that the *attri* heorte sent up to the tunge."—MS. Cott., Nero, A. xiv., f. 21. (*S. in Boucher*.)

***at-trŷc'-ŷ-ōn**. [ATTRITION.]

at-tū'ne, *v. t.* [Lat. *ad*, and Eng. *tune*.]

I. *Literally*:

1. To tune to; to render one musical instrument or one sound accordant with another one.

2. To render musical.

II. *Fig.*: To render accordant. (Applied to human hearts, the passions, &c.)

"Social friends,

Attun'd to happy union of soul."

Thomson: *The Seasons*; Summer.

"... but harmony itself,

Attuning all their passions into love."

Ibid., Spring.

âuc'-tion, s. [In Sw. & Ger. †*auktion*; Dan. *auction*=an auction; from Lat. *auctio*=(1) an increasing, (2) an auction; *augeo*=to cause to increase.]

1. The public disposal of goods to the highest bidder. None but those who have taken out an auction license are at present allowed to conduct such sales. To ascertain who the highest bidder is, two leading processes may be adopted. The goods may be put up at a low figure, and then competitors for them, bidding against each other, will raise this to a higher price. This is what is generally done. In what is called a "Dutch auction," however, the process is reversed. The goods are put up at a price much above their value, and gradually lowered till a bid is given for them, and they are then forthwith knocked down to him from whom it proceeded.

"Then followed an *auction*, the strangest that history has recorded."—Macaulay. Hist. Eng., ch. vii.

2. The goods sold by auction.

"Ask you why Phrine the whole *auction* buys?
Phrine foresees a general excise."—Pope.

âu-dî-ençe, s. [In Sw. *audiens*; Ger. *audienz*; Dan. & Fr. *audience*; Sp. & Port. *audiencia*; Ital. *audienza*, *audiencia*; all from Lat. *audientia*.]

A. Ordinary Language:

I. The act or opportunity of hearing; hearing, listening; attention.

"Let thine handmaid, I pray thee, speak in thine *audience*."—1 Sam. xxv. 24.

To give audience is to give ear, to listen, to attend.

"Men of Israel, and ye that fear God, give audience."—Acts xiii. 16.

II. The state or opportunity of being heard, listened to, or attended to.

1. In a general sense:

"Unhappily sarcasm and invective directed against William were but too likely to find favorable *audience*."—Macaulay: Hist. Eng., ch. xi.

2. Spec.: A formal interview granted to important personages, particularly to an ambassador presenting his credentials or making a communication to a sovereign; also a private interview with a monarch given to a court favorite.

"This was the state of affairs when, on the next day (the 2d), Lord Augustus Loftus was admitted to an *audience*, . . ."—Times, Nov. 24, 1876.

"He was every day summoned from the gallery into the closet, and sometimes had long *audiences* while peers were kept waiting in the ante-chambers."—Macaulay: Hist. Eng., ch. iv.

III. The person or persons hearing, listening, or attending.

Gen.: An assemblage of hearers; an auditory.

"... still govern thou my song,
Urania, and fit *audience* find, though few."

B. Technically:

1. In England: The same as AUDIENCE-COURT (q. v.).

"None to be cited into the arches or *audience*, but dwellers within the archbishop's diocese or peculiars."—Const. & Canons Eccl. 94.

2. In Spain: One of the seven supreme courts.

3. In Spanish America before it became independent: The supreme court of justice and its jurisdiction.

"... as little as the aboriginal population of Darien regarded the authority of the Spanish Viceroy and *Audiences*."—Macaulay: Hist. Eng., ch. xxiv.

audience-chamber, s. A chamber in which formal audiences are granted.

"He summoned all the princes now resident in this court, to appear before him in the great *audience-chamber*."—Translation of Boccacini (1626), p. 94.

audience-court, s. Eng. Eccles. Law: A court belonging to the Archbishop of Canterbury. Being accustomed formerly to hear causes extra-judicially in his own palace, he usually requested that difficult points should be discussed by men learned in the law, called *auditors*, whence ultimately sprung up by slow degrees a court held to have equal authority with that of Arches, though inferior to it both in dignity and antiquity. The audience-court is now merged in the Court of Arches, the duties of its former presiding officer being discharged by the Dean of the Arches.

***âu'-dî-ent**, s. [Lat. *audiens*, pr. par. of *audio*=to hear.] A hearer.

"The *audients* of her sad story felt great motions both of pity and admiration for her misfortune."—Shelton: Trans. of Don Quixote, iv. 2.

âu-dî-ôm'-êt-êr, **âu-dîm'-êt-êr**, s. [Lat. *audio*=to hear, and Gr. *metron*=measure.] An instrument devised by Prof. Hughes, the inventor of the microphone, and described by Dr. Richardson at a meeting of the Royal Society of London in 1879. Originally its object was to measure with precision the sense of hearing. Among its constituent parts are an induction coil, a microphone key, and a telephone.

Recently the audiometer has been materially modified, and is now principally used for obtaining a balance of induction from two electric coils acting upon a third. A scale is provided to show the extent of the movement. A varying or interrupted current being passed through the two outer coils, the preponderating current will produce the most induction if the central coil is equidistant. It can always be moved to such a point that there will be no inductive effect, one counteracting the other. Thus its position measures the relative induction. A telephone is in circuit with the intermediate coil and is used to determine when its position is such that no current is induced in it.

âu-dî-ôm-êt-ric, a. [Eng. *audiometer*; -ic.] Pertaining to or connected with audiometry.

âu-dî-ôm'-êt-rÿ, s. [Eng. *audiometer*; -y.] The act or practice of testing the sense of hearing, by means of the audiometer (q. v.).

âu-dî-phône, s. [Lat. *audio*=to hear, and Gr. *phonê*=a sound.]

Acoustics: An instrument which enables deaf mutes to hear, and by which they can be taught to speak. A triangular plate of hardened caoutchouc, very sensitive to sound vibrations, is its essential part. The patient, holding the audiphone, places the upper edge against his upper teeth; the sounds are gathered and conveyed to the auditory nerve by the teeth, and not by the tympanum.

A. Ordinary Language:

1. A hearer; one of an audience.

"Workers of Goddes word, not *auditours*."
Chaucer: C. T., 7,518-19.

"His vigorous and animated discourse doubtless called forth the loud hums of his *auditors*."—*Macaulay: Hist. Eng.*, ch. x.

2. One appointed to examine accounts, compare the several items with the corresponding vouchers, and finally certify to the accuracy of the whole. In general, two auditors act together, to give greater weight to the statement signed as to the accuracy of the account.

"*Flav.* If you suspect my husbandry, or falsehood, Call me before the exactest *auditors*, And set me on the proof."

Shakesp.: Timon of Athens, ii. 2.

Auditors are, of course, required for the government accounts.

"The house swarmed with placemen of all kinds, . . . tellers, *auditors*, receivers."—*Macaulay: Hist. Eng.*, ch. xix.

B. Technically: A national or state officer whose duty it is to audit the accounts of the nation or state.

âu'-dī-tō'r-i-ūm, *s.* [AUDITORY, *s.*]

¶ The Auditorium of Chicago takes rank as one of the most magnificent of modern public buildings. Its permanent seating capacity is over 4,000; but when the stage and all the available space is utilized, as on the occasions of holding National and other conventions, 8,000 people can be accommodated. The stage is the largest and the organ the most costly and complete in the world. Beside the Auditorium proper there is a Recital Hall, capable of holding 500 people, and a Hotel with Annex capable of entertaining nearly a thousand guests. The Tower Observatory, which rises to the altitude of 260 feet, is occupied by the U. S. Signal Service. The Auditorium is lighted by 12,000 electric lights, provided by eleven dynamos. The first and second stories are granite, the balance is Bedford stone. The entire weight of the building is figured at 110,000 tons.

âu'-dīt-ōr-ship, *s.* [Eng. *auditor*; and suff. *-ship*.] The office, dignity, or functions of an auditor.

" . . . the *auditorship* of the exchequer."—*Johnson: Life of Halifax*. (*Richardson*.)

âu'-dīt-ōr-ŷ, ***âu'-dīt-ōr-le**, *a.* [From Lat. *auditorius*=relating to a hearer or hearing; from *audio*=to hear.]

1. *Ord. Lang. & Anat.*: Pertaining to the organs of hearing.

2. Perceived by means of the organs of hearing.

" . . . the *auditory* perception of the report."—*Airy on Sound* (1868), p. 135.

¶ The *auditory artery* is a ramification of the internal carotid one, the several branches of which are distributed through the brain.

The *auditory canal*, or external meatus of the ear, is considered to belong to the external portion of that organ. It extends inward from the concha for rather more than an inch. Part of it is cartilaginous and part osseous. (*Todd & Bowman: Physiol. Anat.*, vol. ii., p. 67.)

The *auditory nerve*, called also the *acoustic nerve*, enters the ear by the internal auditory canal, and divides into two leading branches, which again subdivide to an amazing extent. It is remarkably soft in texture. The auditory and the facial nerves together constitute the seventh pair of nerves in Willis' arrangement.

"We wish to extend our inquiries from the *auditory* nerve to the optic nerve."—*Tyndall: Frag. of Science* (3d ed.), vii. 133.

âu'-dīt-ōr-ŷ, ***âu'-dīt-ōr-le**, **âu'-dī-tō'r-i-ūm**, *s.* [In Fr. *auditoire*; Port. *auditoria*=the tribunal of an auditor; *auditorio*=people assembled for hearing; Sp. & Ital. *auditorio*=a court, a sessions house; Sw., Dan., & Ger. *auditorium*, from Lat. *auditorium*=(1) a lecture-room, a hall of justice; (2) a school; (3) (by metonymy) an audience, persons assembled for hearing.] [AUDITORY, *adj.*]

A. Of the form auditorium:

Arch. In ancient churches: The nave; that part of the church in which the audience sat.

B. Of the forms auditory and *auditorie:

I. Of places or things:

1. A hall, an apartment, or a portion of a hall or apartment in which an audience sits.

2. A bench on which a judge sits in a law-court.

II. Of persons: An audience; people assembled to hear.

"Several of this *auditory* were, perhaps, entire strangers to the person whose death we now lament."—*Atterbury*.

âu'-dī-trēss, *s.* [The feminine form of Eng. *auditor*.] A female hearer.

" . . . such pleasure she reserv'd,
Adam relating, she sole *auditress*."
Milton: P. L., bk. viii.

âu'-dīt-u-al, *a.* [From Lat. *auditus*=hearing, and Eng. suff. *-al*.] Pertaining to hearing. (*Cole-ridge*.)

***âu'-ē**, ***âu'-ēn**, *v.* Old forms of HAVE.

***âu'-ēde**, *pret. of v.* Old form of HAD.

âu'-ēr-bach'-ite, *s.* [Named after Dr. Auerbach.] A mineral, believed by Dana to be simply altered zircon.

âuf, *s.* [Dut. *alf*.] A fool, a silly person. [OAF.]

âu fā'it (*it* silent), *used as an adj.* [Fr. (*lit.*)=to the deed; also in fact, indeed, in reality.] Acquainted with, skilled in.

***âu'-fald**, *a.* The same as AFALD (q. v.).

Âu-gē'-an, *a.* [From Lat. *Augeas*, in Gr. *Augeas*, or *Augeias*; and Eng. suff. *-an*.]

1. *Class. Myth.*: Pertaining to Augeas, one of the Argonauts, King of Elis, who was represented as having a stable, or cow-house, which had been occupied for thirty years by 300 of his cattle, without ever once having been cleansed. Hercules undertook the great task, and succeeded completely in his endeavor, by turning the course of the rivers Alpheus and Peneus through the polluted stable. He next slew the king, who had defrauded him of his hire, and put on the throne Phyleus, the son of the erring monarch.

2. Pertaining to whatever has been too long neglected, and cannot now, without Herculean labor, be put right, or of any task that seems to be in the nature of the case impossible of performance.

âu'-gēl'-ite, *s.* [In Ger. *augelith*; from Gr. *augē*=bright light, radiance, and suff. *-ite*.] A colorless or pale-red mineral, with its luster strongly pearly on cleavage surfaces. The composition is: phosphoric acid, 35.3; alumina, 51.3; and water, 13.4=100. It is found in the province of Scania, in Sweden.

âu'-gēr, ***âu'-gre** (*gre* as *gēr*), *s.* [A. S. *nafe*, *nafu*=the nave or middle of a wheel, *gar*=a gorer, piercer; *nafe-bor*=a nave-borer, an auger. Bosworth asks if *nafegar* has not also the same meaning; *gar*=a dart, javelin, spear, lance, or weapon; in Sw. *nafoare*; Icel. *nafarr*; Dut. *avegaar*; Mod. Ger. *naber*; O. H. Ger. *nabager* mean=an auger. Thus *n* has been dropped from the beginning of the word.]

Auger.

1. An instrument used for boring holes in wood, or other soft substance. It is used by carpenters, shipwrights, joiners, wheelwrights, and cabinet-makers. It consists of a wooden handle and an iron shank, with a steel bit terminating it at the bottom.

"The *auger* hath a handle and bit; its office is to make great round holes. When you use it, the stuff you work upon is commonly laid low under you that you may the easier use your strength; for in twisting the bit about by the force of both your hands, on each end of the handle one, it cuts great chips out of the stuff."—*Moxon: Mechanical Exercises*.

"Men. What's the news? what's the news?
Com. Your temples burned in their cement, and
Your franchises, whereof you stood, confined
Into an *augre's* bore."—*Shakesp.: Coriolanus*, iv. 6.

2. An instrument of a similar kind, but on a much larger scale, used for boring into the soil, or through the geological strata for water, to ascertain the character of the subsoil or of the beds traversed. It has connecting-rods to adapt it to the different depths required.

auger-hole, ***augre-hole**, *s.* A hole drilled by an auger.

"What should be spoken here, where our fate,
Hid in an *auger-hole*, may rush, and seize us?"
Shakesp.: Macbeth, ii. 3.

auger-shell, *s.* The English name of the shells belonging to the genus *Terebra*. It is given in consequence of their being long and pointed.

âu'-gēt, **âu'-gētte**, *s.* [Fr. *auget*=a trough.] *Mil.*: A wooden pipe containing the powder designed to be used in exploding a mine. (*James*.)

âught, **†ought** (*ou* as *â*), ***âuht**, ***aght**, ***aht** (*gh* and *h* guttural or mute), *s. & adv.* [A. S. *aht*, *awht*, *auht*, *awiht*, *awuht*, *owiht*, *owuht*=*auht*, anything, some; *a* or *o*=one; *wuht*, *wiht*=(1) *auht*, something, anything; (2) a thing, a creature, a wight, an animal; O. H. Ger. *wiht*; Goth. *vaiht*=a thing, anything.] [AGHT, AUGHT, WHIT, WIGHT.]

A. As substantive:

1. *Gen.*: Anything, whether great or small.

"Who digging, round the plant, still hangs his head,
Nor *auht* remits the work, while thus he said."
Pope: Homer's Odyssey, bk. xxiv., 285-6.

2. *Spec.*: The smallest portion of anything, a whit, a jot, or tittle.

B. As adverb: In anything, in any respect.

"Thy sire and I were one: nor varied *auht*
In public sentence, or in private thought."
Pope: Homer's Odyssey, bk. iii., 155-6.

¶ *Aught*=anything, is sometimes erroneously spelled *ought*, and thus confounded with *ought*=should, or is under an obligation. It would tend to clearness if the former were uniformly spelled, as correctness requires, with *a*, and the latter with *o*.

âught, **âucht** (*gh* and *ch* guttural), *s.* [AGHT, AUHT.] Possession, property. (*Scotch*.)

"Edie Ochiltree caught hold of the rein, and stopped his further proceeding. 'Whu's *auht*, ye cullant?'"—*Scott: Antiquary*.

Bad âught: "A bad property." (Used of an obnoxious ill-conditioned child.) (*Jamieson*.)

âught, **âucht** (*gh* and *ch* guttural), *pret. of v. t.* [AGH.] Possessed as one's property. (*Old Eng. & Scotch*.) [AUCHT.]

***â'ught-and**, ***â'ght-and** (*gh* guttural), *pr. par.* [AUGHT, AGHT.] Owing.

"That the debts *auhtand* be our armie—or propertie *auhtand* be officiaris and soldiouris."—*Acts Chas. I.* (ed. 1814), v. 347.

***â'ught-whère** (*gh* guttural), *s.* [Eng. *auht*; where.] Anywhere.

" . . . that he had *auhtwhere* a wife for his estate."
—*Chaucer: Legend of Good Women*, 1538. (*S. in Boucher*.)

âu'-gîte, **âu'-gîte**, *s.* [In Ger. *augit*, &c. In Lat. *augites*; Gr. *augitēs*, a precious stone, supposed by some to be the turquoise; *augē*=bright light, radiance.] An important mineral, interesting from

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

its geological as well as its mineralogical relations. The term has not always been used in the same sense.

1. *Formerly*: The augite of Werner was the same as what has been called volcanic schist and volcanite.

2. *Now*: Dana applies the name *augite* to the greenish or brownish-black and black kinds of aluminous pyroxene, found chiefly in eruptive, but sometimes also in metamorphic rocks. [PYROXENE.] When altered into hornblende it is called Tralite (q. v.). Augite was once suspected by many mineralogists to be essentially the same mineral as hornblende, differing only in this respect, that the former species resulted from rapid and the latter from slow cooling. But Dana separates the two, regarding hornblende as an aluminous variety of amphibole [AMPHIBOLE], and not of pyroxene. [HORNBLLENDE.] Whatever its exact place in the system, it is so much akin to hornblende that Gustav Rose, fusing a mass of the latter mineral, found that on cooling it uniformly became augite. Both are found in modern and in ancient volcanic products. The green and dark kinds of eruptive rock have hornblende or augite predominant, while the reddish ones owe their color to the abundance of feldspar in their composition.

augite-rock, *s.* A kind of basalt, or greenstone, composed wholly or chiefly of granular augite. (Leonhard, Lyell, &c.)

âu-gît'-ic, âu-gît'-ic, *a.* [Eng. *augit(e)*; -ic.] Pertaining to augite, or composed in greater or lesser amount of augite.

"It was also remarked, that in the crystalline slags of furnaces, *augitic* forms were frequent, the hornblende entirely absent; hence it was conjectured that hornblende might be the result of slow, and augite of rapid cooling."—Lyell: *Man. of Geol.* 4th ed., p. 359.

augitic porphyry. A volcanic rock, consisting of Labrador feldspar and augite on a green or dark-gray base. (Rose, Lyell, &c.)

âug-mënt', v. t. [In Fr. *augmenter*; Sp. & Port. *augmentar*; Ital. *augmentare*; from Lat. *augmento*, -avi, -atum, *v. t.*=to increase; *augeo*, fut. *auxi*=to increase; Gr. *auxanō*, and *auxō*=to increase.] [See WAX, EKE.]

A. Trans.: To increase the size of anything; to make anything larger in reality or to the imagination.

"... old taxes were *augmented* or continued."—Macaulay: *Hist. Eng.*, ch. xxii.

"At half this distance the attraction would be *augmented* four times."—Tyndall: *Frag. of Science*, 3d ed., i. 13.

"*Augment* the fame and horror of the fight."—Pope: *Homer's Iliad*, bk. xvi., 792.

B. Intrans.: To increase.

"Strength is deriv'd from spirits and from blood;
And those *augment* by generous wine and food."
Pope: *Homer's Iliad*, bk. xix., 159-60.

âug'-ment, s. [In Ger. †*augment*; Fr. *augment*; Port. *augmento*; Ital. *augmento*; Lat. *augmentum*, from *augeo*=to increase.]

A. Ordinary Language:

1. The act of augmenting or increasing; the state of being augmented or increased.
2. That by which anything is increased; also the time during which increase takes place.

"You shall find this *augment* of the tree to be without the diminution of one drachm of the earth."—Walton: *Angler*.

"Discutients are improper in the beginning of inflammations, but proper when mixed with repellants in the *augment*."—Wiseman.

B. Technically:

1. *Philol. & Gram.*: In Greek grammar, a prefix to the past tenses and to the paulo-post future, intended to distinguish them from other tenses. The augment to the perfect and the paulo-post future prefix the initial consonant with *e*, and retain the syllable thus formed through all the moods. In this case the augment is called the *reduplication*. Thus from *tuptō*, to strike or beat, comes *tetupha*, *tetupsomai*, where *te* is the augment. Constituting, as it does, a syllable, it is called a *syllabic augment*. Sometimes the augment is formed by substituting for a short vowel its corresponding long one, as *elpidzō*, *ēlpidzon*; the augment thus produced is termed a *temporal augment*.

† Dr. Donaldson, in 1839, published the hypothesis that the augment is properly a pronominal particle, denoting distance or remoteness, originally in space and then in time; a view which has since been adopted by Bopp, Garnett, Curtius, and others. (Donaldson.) There is an augment in Sanscrit as well as in Greek.

âug-mënt'-a-ble, a. [Eng. *augment*; -able.] Able to be augmented; able to be increased.

"Our elixirs be *augmentable* infinitely."

Ashmole: *Theat. Chem.* (1652), p. 183.

âug-mënt-tâ'-tion, s. [In Fr. *augmentation*; Sp. *augmentación*; Port. *augmentação*; Ital. *augmentazione*, *amentazione*.]

A. Ordinary Language:

1. The act of augmenting or increasing.

"They would not, he thought, be much alarmed by any *augmentation* of power which the Emperor might obtain."—Macaulay: *Hist. Eng.*, ch. xxiii.

2. The state of being augmented.

"What modification of matter can make one embryo capable of so prodigiously vast *augmentation*, while another is confined to the minuteness of an insect."—Bentley.

3. The amount added to produce the increase.

"... the amount of the *augmentation* it would be ridiculous to attempt to estimate."—J. S. Mill: *Logic*, vol. ii., p. 101.

B. Technically:

1. *Astronomy*. *Augmentation of the Moon's Semi-diameter*: The increase in her apparent magnitude, due to the difference between her distance from the observer and the center of the earth.

2. *In Heraldry*. *Arms of Augmentation of Honor* are a grant from one's sovereign of an additional charge on a coat of arms for a meritorious service rendered, or for some other cause. (*Glossary of Heraldry*, 1847.) They are called also *Arms of Concession of Honor*.

augmentation court. A court erected by King Henry VIII., for the increase of the revenues of his crown, by the suppression of monasteries.

âug-mënt'-a-tive, a. & s. [In Fr. *augmentatif*; Ital. *augmentativo*.]

A. As adjective: Having the power of increasing any particular thing, or actually increasing it.

"Some of them [terminations of verbal nouns] being *augmentative*, some diminutive."—Instructions for Oratory, p. 32.

B. As substantive: A word which expresses in an augmented form—that is, with increased force—the idea conveyed by the simple word from which it was derived. Thus the Indian term *Maharajah* (in *Mahratta maha*=great, *raja*=king) is an augmentative of the simple word *raja*. It is opposed to *diminutive*. To the latter category belongs the word *kinglet* (*king*, and *let*=little).

âug-mënt'-ed, pa. par. [AUGMENT, *v.*]

"Precipitate thee with *augmented* pain."

Milton: *P. L.*, bk. vi.

âug-mënt'-ër, s. [Eng. *augment*; -er. In Fr. *augmenteur*.] One who or that which augments or increases anything.

"The Egyptians, who were the world's seminaries for arts, ascribe all to learning, as to its patroness and *augmenter*."—Waterhouse: *Apol. for Learn.*, &c. (1653), p. 177.

âug-mënt'-ing, pr. par. & a. [AUGMENT, *v.*]

"... and hence the increased supply, required by increasing population, is sometimes raised at an *augmenting* cost by higher cultivation."—J. S. Mill: *Polit. Econ.*, vol. i., bk. i., ch. xii., § 2.

augrym-stones. Stones or counters formerly used to aid in arithmetical calculation.

"His *augrym-stones*, leyen faire apart."

Chaucer: *C. T.*, 3,210.

Augs'-bürg, s. & a. [From the city of Augsburg (called by the Romans *Augusta*), in Bavaria.]

Augsburg Confession. A confession of faith, rough hewn by Luther and polished by Melancthon, which, being subscribed by the Reformers, was read before the Emperor Charles V., at the diet of Augsburg, June 25, 1530. It is sometimes called the *Augustan Confession*. (See the etym.)

âu'-gür, s. [In Sw., Ger., & Port. *augur*; Fr. *augure*; Sp. (pl.) *augures*; Ital. *auguratore*, *augura*, *augures* (m.), and *auguratrice* (f); all from Lat. *augur*.] [AUGURY.]

1. A member of the college of augurs at Rome, a highly dignified college that pretended to predict future events by the methods described under AUGURY (q. v.). Being consulted on all important occasions, they long possessed enormous powers in the Roman State; but as knowledge increased they were applied to only for form's sake, and at last not at all.

"*Cesar*. What say the *augurs*?"

Servant. They would not have you stir forth to-day; Plucking the entrails of an offering forth,
They could not find an heart within the beast."

Shakesp.: *Julius Cesar*, ii. 2.

"Oh? spare an *augur's* consecrated head."

Pope: *Homer's Odyssey*, bk. xxii., 355.

2. Any person who attempts to read futurity and predict events which have not yet occurred.

"'Twas false thou know'st—but let such *augurs* rue,
Their words are omens Insult renders true."

Byron: *The Corsair*, III.

(Max Müller: *Science of Language*, 6th ed., vol. ii., 1871, pp. 265, 266.)]

I. The act or practice of pretending to prognosticate future events.

1. After the manner of the old Roman college of augurs [AUGUR], namely, by noting the flight or singing of particular birds; the avidity or otherwise with which the sacred chickens devoured their food (1); the movements of quadrupeds; and the occurrence of lightning, thunder, or both, in particular parts of the sky.

"... and they inquired of the gods by *augury* to know which of them should give his name to the city."—Arnold: *Hist. Rome*, ch. i.

2. In any other way.

"The very children who pressed to see him pass observed, and long remembered, that his look was sad and full of evil *augury*."—Macaulay: *Hist. Eng.*, ch. v

†II. The state of being augured.

III. That which is augured; an omen; a prognostication; a prophecy; a vaticination.

A title given by the Roman Senate to Octavianus when confirming him in the imperial dignity.] Sacred, majestic; fitted to inspire reverence; not to be touched without awe. Used—

1. Of royal or princely personages:

"Her Majesty, and three, at least, of her *august* daughters, were amongst the subscribers to the fund."—*De Quincey: Works* (ed. 1863), vol. ii., p. 26.

2. Of anything appertaining to such dignitaries:

"He was far too wise a man not to know, when he consented to shed that *august* blood [that of Charles I.], that he was doing a deed which was inexpiable."—*Macaulay: Hist. Eng.*, ch. i.

3. In a more general sense, of anything grand and magnificent;

"And still let man his fabrics rear,
August in beauty, grace, and strength."

Hemans: Ivy Song.

4. Of the Divine Being or His arrangements for the government of the universe:

"The trumpet—will it sound, the curtain rise,
And show th' *august* tribunal of the skies."

Âu-gŭst, s. [In Dan. & Ger. *August*; Sw. *Augusti*; Dan. *Augustus*, *Oogst*; Fr. *Août*; Sp. and Ital. *Agosto*; Lat. *Augustus*, from Augustus, the first Roman emperor.]

1. *Formerly*: The sixth month of the old Alban or Latin year, which began with March and not with January. At first it was called in consequence *Sextilis*, from *sextus*=the sixth. Afterward the senate altered that name into *Augustus*, in honor of Augustus Cæsar, the first Roman emperor, who during this month was created consul, three times over obtained triumphs, subdued Egypt, and terminated the civil war.

2. *Now*: The eighth month of the year in this and other parts of the Christian world.

"August was dedicated to the honor of Augustus Cæsar, because in the same month he was created consul, thrice triumphed in Rome, subdued Egypt to the Roman empire, and made an end of civil wars; being before called *Sextilis*, or the sixth from March."—*Peacham.*

Âu-gŭs'-tan (1), *a.* [Lat. *Augustanus*.] Pertaining to Augustus Cæsar. As literature in ancient Rome reached its highest development during the reign of Augustus Cæsar, the expression "the *Augustan* age" of literature in any country means the age in which it is at its highest point.

"The Genius of the Augustan age
His head among Rome's ruins rear'd."

Couper: On the Author of "Letters on Literature."

Âu-gŭs'-tan (2), *a.* [From *Augusta*, the old Roman name of Augsburg, in Bavaria.] Pertaining to Augsburg.

Augustan Confession.

Theology and Church History: What is now commonly known as the *Augsburg Confession* (q. v.).

Âu-gŭs-tineŝ, Âu'-gŭs-tinŝ, s. pl. [From *Augustine*.] [AUGUSTINIANS.]

Âu-gŭs-tin'-i-an, a. & s. [From *Augustine* or St. *Augustine*, the very eminent theologian and Christian father, born at Tagaste, in Numidia, on November 13, A. D. 354; a presbyter of Hippo Regius (now Bona, in Algeria) from 391; and finally bishop of the same Hippo from 395 to his death on August 28, 430.]

A. As adjective: Pertaining to St. Augustine.

Augustinian Canons regular: Canons whose mode of life was regulated by what was considered to be the rule of St. Augustine. [CANONS.] (*Mosheim: Church Hist.*, Cent. xi., pt. ii., ch. ii. § 29.)

Augustinian Eremites: The same as AUGUSTINIANS [B., 2 (q. v.).] (*Ibid.*, Cent. xiii., pt. ii., ch. ii., §§ 22, 23.)

B. As substantive:

I. *Gen.*: Any follower of Augustine.

II. *Spec. (Plural)*:

1. Those who follow Augustine in his views of the doctrines of grace, which were essentially what are now called *Calvinistic*.

2. An order of monks called after Augustine. Other English designations for them are *Augustines* or *Augustins*, and they are also sometimes called *Augustinian Eremites*, or simply *Eremites*. They were formed into an order by Alexander IV., in 1256, he having required various societies of Eremites—of which some followed the rules of William the Eremite, and others those of St. Augustine—to unite into one body. When, in 1272, the orders of Mendicants were reduced by Pope Gregory X. to four, the Augustinians were one of these four. They are the same that are called *Austin friars*. Their garb is black.

Âu-gŭs-ti-ŏus, a. [AUGUST *a.*] The same as AUGUST (q. v.).

âuk (in Provenc. Eng. *âlk*), *s.* [Icel. *aulka*; Sw. *alka*=a puffin; Dan. *âlke*; Ger. *alk*; Mod. Lat. *alca*.] [ALCA.] The name given to several seabirds, especially the Great and the Little Auk.

1. The Great Auk is the *Alca impennis* of Linnaeus. [ALCA, ALCIDÆ.] It is from two to two and a-half feet high, with short wings almost useless for flight. In the water, however, it makes way with astonishing rapidity. It is essentially a Northern bird. It seems to be rapidly verging to extinction. Its bones left behind show that it was formerly abundant on the shores of Iceland, Greenland, and Denmark. (*Owen: Classif. of the Mammalia*, p. 57, and other works.)

The Razor-Bill (*Alca torda*).

2. The Little Auk of Pennant and others, called also the Common Rotche, and the little White and Black Diver, is the *Mergulus melanoleucos* of Yarrell's *British Birds*, the *M. alle* of Carpenter and Dallas, and the *Alca alle* of Linnaeus. It has the breast, the belly, a dot above the eyes, and a stripe on the wing, white; the rest of the plumage black. Its length is nine inches, and the extent of its wings sixteen. Its dimensions are thus about those of a large pigeon. It nestles in holes or crevices on the bare rocks, laying one bluish-green egg. It is abundant in the Arctic seas. It is found also in Great Britain.

3. One of the English names given to a bird, the Razor-bill (*Alca torda*).

King of the Auks: A Scotch name for the Great Auk (*Alca impennis*). [See No. 1.]

†âuk'-ward, a. [AWKWARD.]

†âul, s. [AWL.]

âul'-la, s. [In Sp., Lat., &c., *aula*. In Gr. *aulê*= (1) a courtyard or its wall; (2) the court or quadrangle around which the house itself was built; (3) any court or hall; (4) (later) the court, or *aula regia*.]

1. A court baron. (*Spelman.*)

2. In some old ecclesiastical writings: The nave of a church.

3. A *regia* or *regis*: A court established by William the Conqueror in his own hall, and comprised of the great officers of state usually attendant on his person. It was ultimately transferred to Westminster Hall.

âul'-læ-ŭm, s. [Lat. *aulceum*; Gr. *aulaia*= . . . a curtain; tapestry.]
